Q. How frequently do you get implement parts or small implements from Moline, Illinois?

A. I would say three times a week.

Q. How do those move from Moline to Dexter?

A. Rock Island Motor, or rail, either one.

Q. Which is the better service, Rock Island Motor or Rock Island rail?

[fol. 1569] A. Rock Island Motor.

Q. State what the fact is whether or not the Rock Island Motor operates a daily service in and through Dexter, Iowa, from both east and west.

A. Yes.

Q. And you have used that service, have you not, over the years?

A. Yes, I have.

Q. How long have you been in business in Dexter?

A. Since 1948.

Q. Have you used the service of the Rock Island Motor for these Chicago and Moline shipments during that period of time?

A. Yes, we have.

Q. What has been the quality of that service, whether satisfactory or otherwise?

A. We have had no objection to their service at all; we think they have done very well.

Q. State whether or not you need a continuation of that service in your business to Dexter, Iowa?

A. Yes, we need a continuation of that service.

Q. Do you know of any other trucking company that provides the same kind of daily service to Dexter that the Rock Island Motor Transit Company provides?

A. Not to my knowledge. Of course, there are a lot of trucks that go through there.

Q. Do they all stop there?

[fol. 1570] A. No.

Q. And so far as you know there is no other trucking company that makes a regular scheduled stop in Dexter, is there?

A. No.

Q. State whether or not your business would be adversely affected if the Rock Island Motor Transit Company were required to terminate or curtail its operations to only occasional operations into Dexter. Would that affect your business?

A. Yes. Our shipments from Moline, I am sure, would be much slower if it were not for the Rock Island Motor Transit.

Q. What has been your experience in getting your shipments in by rail? Is that a rather slow and impatient process?

A. Yes, it is.

Q. Do you know how many days shipments from Moline to Dexter by rail would take?

A. They run all the ways from 10 days to 2 weeks.

Q. What has been the service via Rock Island Motor Transit?

A. Well, 3 days; in a good many cases in one day.

Q. You have had shipments overnight and second-day delivery? Is that right?

A. That is right.

Q. Isn't it true, Mr. Godby, when you need a repair part you need it as soon as you can get it? Is not that correct?

A. That is correct.

Mr. Nolan: I believe that is all.

[fols. 1571-1572] Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Have you made any investigation to see whether or not any of these other truck lines stop at Dexter?

A. No, I have not.

Q. In other words, your service with the Rock Island Motor Transit has been satisfactory and you haven't had occasion to check on it?

A. No, we haven't.

Q. And these shipments by the Rock Island Motor Transit are all small shipments, are they?

A. What do you mean by small shipments?

Q. Oh, under a thousand pounds.

A. Oh, no, they would not all be. We get harrows and manure spreaders and stuff like that.

Q. What will they weigh?

A. Well, your harrows would run, I suppose, all the way from 800 to 2,000 pounds, depending on how many we put in.

Q. Would that be about your heaviest item?

A. Yes, I think that is probably about the highest, the heaviest in weight.

Q. And does the Rock Island Motor Transit Company bring the harrows in too?

A. Yes.

Q. Do you ship anything out?

[fol. 1573] A. No.

Q. Who do you pay your freight bills to? Your motor freight bills?

A. You mean the Rock Island Motor?

Q. Yes.

A. You mean the person himself?

Q. Well, do they have an agent there?

A. They do at the station, yes. That is the person we pay.

Q. You pay at the station?

A. Yes.

Q. And is it the railroad station agent that you pay?

A. Yes.

Q. Regardless whether it is motor truck billed freight or rail billed freight?

A. Yes.

Q. If you have a claim to make, do you see that same station agent to handle it?

A. Yes.

Q. Does he process that claim?

A. Yes.

Q. And he does that regardless whether it is rail freight or motor freight?

A. Yes.

Q. The fact of the matter is your rail freight comes in on the truck, doesn't it?

[fol. 1574] A. You mean all of it?

Q. Yes. If you have some small rail freight that is billed rail, doesn't that come in on the same truck with the other?

A. Well, I suppose some of it could be that; I haven't paid any attention to that. However, we do get some by rail.

Q. And is that delivered to your door?

A. Yes.

Q. The rail shipments?

A. They have a man who delivers it.

Q. Who is that?

A. John Caldwell.

Q. Is he an employee of the Rock Island Railroad?

A. I think that is right.

Q. Or is he an employee of the Rock Island Motor Transit?

A. I couldn't tell you that. I don't know.

Q. Does he bring in your motor freight?

A. Yes.

Q. He serves both, then, doesn't he?

A. Yes.

Q. Then, you do get your rail freight and your motor freight on the same truck brought by this gentleman you spoke of?

A. Yes. However he does not rent him a truck. He has got a little hand cart he uses on the pieces he can't handle.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

[fol. 1575] Redirect examination.

By Mr. Nolan:

Q. Mr. Caldwell is your local delivery man?

A. Yes.

Q. And he delivers for any company that leaves freight there for him to deliver?

A. Yes.

Q. Now, Mr. Godby, in regard to payment of settlement of claims, any claim you have settled with the Rock Island Motor Transit Company, you get a Rock Island Motor Transit Company's check, do you not?

A. That is right.

Q. Whereas the agent might take the claim, it is turned over to the Rock Island Motor Transit Company for processing and settlement, is it not?

A. Yes.

Q. Did you ever have the experience of presenting a claim to Mr. Caldwell and he turning it over to the Rock Island Motor Transit?

A. No.

Mr. Nolan: I believe that is all.

Mr. Bradshaw: Nothing further.

Exam. Carpenter: That is all. Thank you, sir.

(Witness excused.)

Mr. Nolan: Mr. Brown, please.

T. B. Brown was sworn and testified as follows:

[fol. 1576] Direct examination.

By Mr. Nolen:

Q. Your name is T. B. Brown?

A. Yes, sir.

Q. And you live at Washington, Iowa?

A. At Washington, Iowa.

Q. What is your occupation?

A. Superintendent of the American Pearl Button Company.

Q. What is the business of that company?

A. Manufacturer of fresh-water pearl buttons.

Q. Out of what are those buttons manufactured?

A. Out of the muscle of clam shell.

Q. What is the source of your clam shells?

A. At the present time as of right now the southern rivers produce more than the nearby rivers; it is a fresh water product.

Q. Do you mean from the mouth of the Mississippi to the Gulf?

A. No; down through Alabama, Tennessee, Georgia and down in there?

Q. How do those clam shells ordinarily come in?

A. By rail carload lots.

Q. You get the clam shells in by rail in carload quantities?

A. That is right.

Q. Do you grind the buttons out of the clam shells?

A. We cut out the blanks to the size of the buttons we want.

Q. Have you any of the buttons with you?

A. I have some in my shirt here; I got some in the bag [fol. 1577] up to the hotel.

Q. As I understand it, you grind out or process many different types of pearl buttons. Is that right?

A. Yes.

Q. Different sizes.

A. Different sizes, but pretty much to standard all through the industry.

Q. Is your company a national concern or is it local there in Washington?

A. It is owned locally, but we sell nationally.

Q. How long has your company been in business in Washington, Iowa?

A. For 46 years.

Q. How big a pay roll in numbers do you have there?

A. We have 250 employees.

Q. Is it year around production?

A. Year around.

Q. As I understand it, buttons are the only thing you make there?

A. That is right.

Q. Are those buttons shipped out in bulk or carded before shipped?

A. They are shipped out in bulk, but we retail them on cards.

Q. The bulk is shipped out in a given size; and they go to the clothing industry, do they not?

A. Yes, to the garment industry.

[fol. 1578] Q. Then, the buttons you have are in different combinations of assortments on cards and they go to the retail trade?

A. Eventually, yes, through jobbers, or to the chain stores.

Q. To what territory do you ship your finished product, your buttons, either in bulk or on card?

A. All over the United States.

Q. What is the size of Washington, Iowa?

A. Six thousand, and according to the Chamber of Commerce it is 7,500.

Q. Are you representing the Washington Chamber of Commerce here today?

A. Yes.

Q. I assume Washington has all the retail establishments and service establishments that a city the size of Washington has in an ordinary agricultural community?

A. Yes.

Q. Do you have any other industry there besides your pearl button business?

A. Oh, yes; there are six or eight other manufacturers, some small and some large. We have one of the largest calendar factories there; we have a turkey processing plant there; the Eyebolt Company is there; Cargo is there with their grain processing plant but that is all carload.

Q. That is an animal feed processing plant?

A. Yes.

[fol. 1579] Q. What type of merchandise does the Eyebolt Company make?

A. What do you call them? Eyebolts. They got a hole in them at both ends accompanied by a swivel. The- make eyebolts and turnbuckles.

Q. What size quantities are your outbound shipments. Mr. Brown?

A. They will average 500 pounds.

Q. Would that be in both the bulk shipments and the card shipments?

A. Right.

Q. What transportation facility do you primarily use on your outbound shipments?

A. The Rock Island Motor to date.

Q. How long have you been using the Rock Island Motor Transit?

A. Should I tell my story or just answer the question?

Mr. Bradshaw: Just answer the question.

By Mr. Nolan:

Q. Tell them your story.

Mr. Bradshaw: Just a minute.

Mr. Nolan: He is answering the question.

Exam. Carpenter: Read the question, please, Mr. Reporter.

(Question read.)

A. Six -- seven years.

By Mr. Nolan:

Q. What agency did you use before that?

A. Hedrick or Keeshin.

Q. Explain in detail, if you care to do so, why you changed to the Rock Island Motor Transit Company.

[fol. 1580] A. Now, we are getting somewhere.

Mr. Bradshaw: Just a minute. I object on the ground this story is going to be too remote to have any bearing on this case. It is irrelevant.

Exam. Carpenter: Objection overruled. Go ahead. Don't make it too long.

A. All right. Hedrick & Keeshin had franchises to come in there. They hired a local transfer outfit to act as their local agent or representative to do the pickup work. The local transfer has a dock; they both pick up their shipments at the same dock. They both come in at uncertain times, no one knows when or how often a week. They have the

most irregular schedules and transfer any motor line could have.

Our experience back as far as 6 years ago has been we couldn't tell if a shipment would leave Washington that day or maybe next week. Between them they had only one key to the dock and warehouse.

By Mr. Nolan:

Q. You mean at the local transfer?

A. At the local warehouse to which they have one key. If there is a shipment there and it is not on their bill of lading, the other truck company takes it out. So we lose a shipment, can't find it and no one has any record of it because they do not sign for the receipt of it, there is no signature there. They just pick it up. We are in the habit now, when we need to trace a shipment, of writing to both of them.

[fol. 1581] I am not knocking them; this is a story. Naturally we are so dependent upon the Rock Island Motor Transit because we do get overnight service from Chicago. By rail from Washington to Chicago it takes 4 days. We can get overnight service into Davenport, Chicago, Omaha and Kansas City.

Q. Do you use the Rock Island Motor Transit's service to the Twin Cities?

A. Right, to and from.

Q. Then, as I understand your testimony, you have been using the Rock Island Motor Transit exclusively almost for the last 6 years. Is that right?

A. Right, with the exception we do use rail to the south. We have branches of the Rock Island, Milwaukee and Burlington in Washington.

Q. But on your truck shipments you have been using the Rock Island Motor Transit for outbound shipments for the last 6 months?

A. Right.

Q. With what frequency do you have outbound Rock Island Motor Transit service out of Washington?

A. Daily.

Q. Has the service of the Rock Island Motor Transit been satisfactory?

A. Very satisfactory.

Q. Does the Rock Island Motor Transit Company have an agent there at Washington?

[fol. 1582] A. Yes.

Q. Do they provide pickup and delivery service for you?

A. Right.

Q. You have some inbound shipments in leaa-than-truckload quantities. Where do they come from?

A. Printed cards from the Twin Cities, steel wire from Chicago, also button shanks from the far eastern part of the United States.

Q. And those shipments would come through the Chicago gateway?

A. Right.

Q. How have those shipments been coming in to you?

A. We don't specify to our dealers how they ship. We think it is up to them to give us good service, and they should know more than we do what lines are better in their localities than we do, so we do not specify as to how they come.

I didn't include before a shipment from Milwaukee coming by the Bruce Line, corrugated cartons tied in bundles. Out of 54 bundles we got 3 bundles because of the transfer. I checked back on this shipment. It was handled from Milwaukee to Chicago, given to Bruce and then to Hedrick and by them to the local transfer and the local transfer brought it over, and they were all loose in the truck.

Q. How long did it take that shipment to come that way from Milwaukee?

A. I am not positive but I would say 6 or 8 days.

Q. Does the Rock Island Motor Transit bring in regular [fol. 1583] shipments to your place of business from these out-of-state points to which you have referred?

A. Oh, yes.

Q. Has that service been of a high quality?

A. It is very fine.

Q. What would be the size of those inbound shipments ordinarily?

A. I would say from 250 to 500 pounds.

Q. You have no volume shipments like 10,000 pounds?

A. Nothing like that.

Q. What effect, in your opinion, would it have on your company's business if the Rock Island Motor Transit Company should be required to terminate or substantially reduce the regularity of its service?

A. I would hate to think of having a thing like that. I don't know just what we would do.

Q. And the only other agencies you know of that have any schedules in there, whether they operate them or not, are Hedrick Freight Lines and Keeshin Motor Freight?

A. Yes, interstate.

Q. You say those schedules are not maintained?

A. We have no way of knowing when they are going.

Q. Would it then be fair to say your company would be greatly damaged and handicapped if the Rock Island Motor service should be eliminated or curtailed at Washington?

A. Yes.

[fol. 1584] Mr. Nolan: You may cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Mr. Brown, you say the Rock Island Motor Transit maintains a pick-up and delivery service at Washington?

A. That is right.

Q. Do they pick up your rail freight as well as your motor freight?

A. When we have some, yes.

Q. And you do have some once in a while?

A. Very seldom; we are on the branch line.

Q. The same truck picks it up?

A. The same truck.

Q. The same driver?

A. Well, there are two pickup drivers.

Q. Do you know where he takes that freight?

A. Yes; they have a department in the freight house that is entirely motor transit freight.

Q. Does he take the rail freight he picks up at your place of business to the motor freight department?

A. Well, in the same building but at the other end of the building.

Mr. Bradshaw: That is all.
Mr. Nolan: I believe that is all, Mr. Brown.
Exam. Carpenter: That is all, Mr. Brown. Thank you.

(Witness excused.)

[fol. 1585] Mr. Nolan: I will call Mr. Walker.

LEWIS J. WALKER was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation, please?

A. Lewis J. Walker, Atlantic, Iowa, Secretary of the Atlantic Chamber of Commerce.

Q. How long have you been so engaged, Mr. Walker?

A. Going on to 2 years.

Q. Have you had other Chamber of Commerce experience prior to that?

A. Yes, sir.

Q. Will you give us a general idea of Atlantic as a community, the business establishments, business enterprises and factories?

A. Atlantic has the general run of retail outlets in a city of that size plus 10 or 11 manufacturing establishments, the Western Popcorn Company, Majestic Venetian Blind Company, Walnut Grove Products, and 10 or 11 others.

Q. What is the population of Atlantic, Iowa?

A. About 6,857.

Q. Now, Atlantic is located on U. S. Highway No. 6 between Des Moines and Omaha, Nebraska, is it not?

A. Yes, sir.

Q. And also located on the main line of the Rock Island Railroad?

[fol. 1586] A. That is correct.

Q. What is the position of the Atlantic Chamber of Commerce in this case? You appeared here as a witness before and you are appearing here now. Is it in support of the application?

A. That is right.

Q. What is the position of your organization with respec to this application?

A. Our primary interest in this application is twofold

Mr. Bradshaw: May I inquire?

Exam. Carpenter: Go ahead.

By Mr. Bradshaw:

Q. Are you here with any authority?

A. Yes, sir.

Q. Will you relate that authority?

A. I have written instructions here.

Q. From whom?

A. From the members of the Atlantic Chamber of Commerce.

By Mr. Nolan:

Q. Were you authorized to appear here on behalf of the Atlantic Chamber of Commerce?

A. Yes, sir, I was instructed to.

By Mr. Bradshaw:

Q. How many members?

A. Approximately 300.

Q. That instructed you to come here?

A. Approximately 40. The first interest is to continue good service to our retail outlets regardless whether it is motor or rail. The second: Atlantic, the same as any other [fol. 1587] city, is trying to progress, and we have made industrial surveys and made studies of our transportation facilities and found that we have good transportation facilities, which includes the Rock Island Motor Transit and which is giving us excellent service at the present time.

We advertise throughout the country as to the various facilities in the transportation field of the Rock Island Motor Transit.

By Mr. Nolan:

Q. State whether or not you have been able to interest new industry in Atlantic by reason of the general make-

up of the community and by reason of your transportation facilities?

A. Yes, we have several industries at the present time interested in locating in the City of Atlantic due primarily to the transportation situation at Atlantic because, being on U. S. 6, the principal transcontinental highway and being on the main line of the Rock Island between Denver and Chicago.

Q. And in your endeavor to get new industry to Atlantic you have included in your prospectus the transportation facilities offered the City of Atlantic by the Rock Island Motor Transit Company?

A. Yes, sir, that is correct, the existing service of the Rock Island Motor Transit as well as all other forms of transportation.

Q. Now, you do have other transportation companies operating in and through Atlantic, do you not?

A. Yes; we have the Iowa-Nebraska exercising the rights, Watson Brothers exercising the rights, the Rock Island [fol. 1588] Motor Transit and Merchants; however, the Des Moines Transit has rights but do not exercise them; I believe Bos is in there; there are seven altogether.

Q. Does the Rock Island Motor Transit have an agent there, a terminal office and facilities for the servicing of shipments, rates and claims and things of that character?

A. Yes, sir, they do have.

Q. Do any other Iowa or highway carriers operating through Atlantic have the same facilities?

A. No, sir; not that the Rock Island Motor Transport has.

Q. I assume your industries in Atlantic are small industries?

A. Top employment I would say is 125.

Q. I assume those industries do not have a full traffic department like a big industry does. Is that correct?

A. Only one.

Q. Which is that?

A. Walnut Grove products.

Q. I assume, in working with your industries in Atlantic and other points where you have served as Secretary of the Chamber of Commerce, it is necessary for such small industries to use the facilities of transportation agencies in regard to rates and routings and things of that character?

A. That is correct.

Q. Would you say the Rock Island Motor Transit does have that service available there and the other transporta-
[fol. 1589] tion companies do not?

A. That is correct.

Q. Are you familiar with the outbound destinations of your industries at Atlantic?

A. Yes, sir. The Majestic Venetian Blind ship throughout the United States; Walnut Grove serves primarily a seven-state area.

Q. What is the name of this venetian blind company?

A. The Majestic Venetian Blind Company.

Q. And it manufactures venetian blinds for office, homes and so forth?

A. Yes, sir, and supplies chain stores such as Gambles and so forth.

Q. What would be the effect of the elimination or substantial curtailment of the service of the Rock Island Motor Transit insofar as the business and industrial welfare of your city is concerned?

A. It would reduce our advantage. We feel fortunate having the transportation services which we do have. The Rock Island Motor Transit is the primary trucking firm of our city, and we have based our transportation situation along with the service of the Rock Island Motor Transit as well as the railroad, and it would hinder our contracts which we have made and which we intend to make in the future. A manufacturing company or any company is interested in the transportation facilities of a city before they locate in it.

[fol. 1590] Q. And from your observation has the Rock Island Motor Transit operated primarily and solely as a motor carrier and independent from the railroad?

A. Yes, sir, as independent as far as Atlantic, Iowa, is concerned.

Q. So far as you know has the services of the Rock Island Motor Transit been efficient and satisfactory to your people there?

A. That is right. I know that is correct.

Q. Have you ever had any complaints made to you of their service?

A. As a Chamber of Commerce we write various firms who have hauled stuff in to our various members in regard to claims and so forth.

Q. Well, have you had any such dealings with the Rock Island Motor Transit Company?

A. I have never written a letter to the Rock Island Motor Transit Company.

Q. But you have had occasion to write other trucking firms on claims?

A. Yes; the Iowa-Nebraska and Watson Brothers.

Q. And those complaints have been made at the request of your members?

A. That is right. Any claim should be handled in 6 months.

Q. And after 6 months you get after them?

A. We write a letter and maybe a second letter.

[fol. 1591] Q. What do you do after the second letter?

A. We go and see them.

Q. And you say you have never had occasion to file or make any complaints for your members with regard to the service of the Rock Island Motor Transit Company?

A. Not as yet.

Q. That day may come?

A. That day may come.

Mr. Nolan: That is all.

Cross-examination.

By Mr. Bradshaw:

Q. How far is Atlantic from Omaha?

A. Approximately 44 miles.

Q. You have a drayage man besides the Rock Island Motor Transit, do you not?

A. Yes, Smiley Transfer.

Q. Is it your contention rates can't be made through him?

A. He may have them available, that I won't say for sure, but he cannot read the rates. I mean I can read the rates better than he can.

Q. Do you maintain a rate service?

A. I have tariffs in my office.

Q. You don't depend, then, exclusively on the Rock Island Motor Transit, do you?

A. To any destinations they operate to, yes. Smiley is primarily an intrastate carrier.

[fol. 1592] Q. Don't these manufacturing companies have traffic departments?

A. Only one which is located there now.

Mr. Bradshaw: That is all.

Redirect-examination.

By Mr. Nolan:

Q. I didn't get who couldn't read the rates.

A. The Smiley Transfer man.

Mr. Nolan: That is all.

Mr. Bradshaw: Nothing further.

Exam. Carpenter: That is all. Thank you, sir.

(Witness excused.)

Mr. Nolan: Mr. Nielsen, please.

Niels C. Nielsen was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. You are——

A. Niels C. Nielsen.

Q. And you are from——

A. Audubon, Iowa.

Q. Do they call you Nels around Audubon?

A. No, sir.

Q. What business are you in?

A. I have a 5-cent to $-store, also a drygoods store.

Q. Are those separate stores?

A. Yes, sir.

Q. Those are owned by you?

[fol. 1593] A. Yes, sir.

Q. They are not chain stores?

A. No, sir.

Q. How long have you been in business in Audubon?

A. For 22 years.

Q. Where do you get your merchandise?

A. For the Dime Store I get it from Chicago; for the Drygoods store I get it from Minneapolis.

Q. What transportation service do you use in getting your merchandise in?

A. Rock Island Motor.

Q. How long have you been using them?

A. Ever since they started.

Q. How has that service been? Satisfactory or otherwise?

A. It has been satisfactory.

Q. Do you know of any other transportation company that will give you the same type of service as the Rock Island Motor Transit Company gives you?

A. I do not.

Q. Is that service daily?

A. Yes, sir.

Q. I believe you have a truck company from Des Moines serving Audubon, do you not, the Roberts Truck Line?

A. Yes. They headquarter in Audubon.

Q. Have you used that service?

[fol. 1594] A. I have a little.

Q. Do you get direct service from Chicago and Minneapolis by the Rock Island Motor Transit?

A. I do.

Q. Without transfer?

A. That is right, I do.

Q. If you used the Roberts Truck Line you would have to transfer at Des Moines?

A. That is correct.

Q. Have you used the Roberts Truck Line occasionally?

A. Once in a while.

Q. Do you direct all your shipments, whenever possible, to come Rock Island Motor Transit?

A. It is directed to so ship.

Q. Has that service by Roberts been satisfactory?

A. I would like to state one particular instance in regard to a shipment to the local hospital, a shipment of stainless steel which Roberts brought out from St. Louis, Missouri.

It came out on Saturday and laid there for a week. It was a shipment of stainless steel tables and things of that kind. That is the type of service we have been getting not only to the hospital but to the local merchants.

Q. And that service was not satisfactory?

A. No, not to anybody.

Q. Now, Mr. Nielsen, what would be the effect on your [fol. 1595] business if the Rock Island Motor Transit Company was either required to terminate its operations or substantially reduce its operations?

A. We would have to go back to the service we used before the Rock Island Motor Transit started operations which would have to be Rock Island rail which is slower and would not be the best of service.

Q. The service which you now get from Chicago and the Twin Cities, I presume, is second-day delivery?

A. That is right.

Q. How about the rail service?

A. We have had shipments in transit over a month by rail.

Q. Do you know of any other transportation agencies serving Audubon that can give you the same service the Rock Island Motor Transit has been giving you?

A. There is none.

Q. Then your business would be very severely harmed if the Rock Island Motor Transit Company were forced to curtail or cease operations?

A. It would decrease our capital considerably.

Q. You would have to anticipate your orders 2 or 3 months ahead of shipping date, would you not?

A. That is correct.

Q. What is the general makeup of the community of Audubon?

A. The population of Audubon is approximately 3,000. It has the same type of retail stores found in any county [fol. 1596] seat town. We have very few industries in Audubon. We have, however, the Carlson Hybrid Seed Company and the milling company; that is about all the industries we have.

Q. Do I understand that Audubon County is one of the highest per capita in the State of Iowa as far as agricultural is concerned?

A. That is right.

Q. How frequent do you get shipments in via the Rock Island Motor Transit Company?

A. Sometimes every day; once in a while we will skip 2 or 3 days.

Q. Does the Rock Island Motor Transit have daily service into Audubon?

A. They do.

Q. Do they give you pickup and delivery service?

A. They do. Alvin Roberts delivers our freight for the Rock Island Motor.

Q. That is a different Roberts than the one that runs the Roberts Truck Line?

A. That is correct.

Mr. Nolan: That is all.

Cross-examination.

By Mr. Bradshaw:

Q. Mr. Nielsen, do you have any other motor carriers that go into or through Audubon other than Roberts and the Rock Island Motor Transit?

A. Yes, there are other carriers coming in there.

[fol. 1597] Q. Can you name them?

A. No, I can't.

Q. Does Iowa-Nebraska Transportation Company sound familiar to you?

A. I have seen their truck in there.

Q. And does Kennard?

A. No, I don't know of Kennard.

Q. How about Bos?

A. I haven't seen their truck in Audubon for years. They used to come in there but I haven't seen them for a long time. Brady used to come in there.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Redirect-examination.

By Mr. Nolan:

Q. As I understand your testimony, Mr. Nielsen, whereas some of those truck companies come in there occasionally,

none of them, so far as you know, maintain any scheduled service in and out of Audubon? Is that right?

A. That is right.

Q. At least they never called upon you and offered you any such service, have they?

A. No.

Mr. Nolan: All right. That is all.

Mr. Bradshaw: No further questions.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

[fol. 1598] Mr. Howland: Mr. Christoffersen, please.

Carl M. Christoffersen was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Carl M. Christoffersen.

Q. And you live where, Mr. Christoffersen?

A. In Hamlin, Iowa.

Q. Hamlin is located where with reference to Audubon?

A. Four miles south on 71.

Q. Hamlin is situated at the junction of Highway 64 extending east and west and I believe it is Highway 71 that extends north and south?

A. That is right.

Q. What type of community is Hamlin? That is, as to size and the establishments there.

A. It is just a small place of about 150 population.

Q. What is the nature of the business concerns there?

A. We have a grocery store and a locker plant and a lumber yard and several oil stations and the Post Office.

Q. Do you operate a locker plant there?

A. That is right.

Q. Do you have occasion to have supplies and equipment shipped into Hamlin from time to time?

A. Just supplies primarily is all we are getting now.

[fol. 1599] Q. From what points do you get your supplies?

A. Primarily Des Moines.

Q. Do you get any shipments from outside the State of Iowa, or do any of the other merchants there have shipments coming in from out of the State of Iowa?

A. Well, from Omaha, yes.

Q. What service do you have from Omaha, Nebraska, other than the Rock Island Motor Transit?

A. The Roberts Transfer.

Q. Is there any other service besides those two lines?

A. Iowa-Nebraska goes through there, but they do very little business there.

Q. Do they render a regular, daily service to Hamlin?

A. No. They go through there but they don't ever stop.

Q. It is just more of a casual arrangement?

A. Yes.

Q. Would the elimination of the Rock Island Motor Transit service from Omaha, Nebraska, affect your business there, Mr. Christoffersen?

A. Not from Omaha, no. We don't get anything from Omaha.

Mr. Howland: I think you may cross examine.

Mr. Bradshaw: No cross examination.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Howland: Mr. Petersen, please.

[fol. 1600] Ernest Petersen was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Ernest Petersen.

Q. You are living at Hamlin, Iowa?

A. Yes.

Q. What is your business, Mr. Petersen?

A. I run a grocery store.

Q. Do you have some general merchandise lines?

A. Yes, we do.

Q. What is the source from which you get your merchandise? Where do you buy your goods?

A. Well, we get our work clothing out of Illinois.

Q. How about your grocery and food lines?

A. Most of that is brought right from the grocer houses.

Q. That is delivered direct by the wholesalers?

A. That is right.

Q. Does that come from Audubon or primarily from Des Moines?

A. From Des Moines and Omaha.

Q. But the wholesalers maintain truck delivery service to your community?

A. That is right.

Q. With reference to shipments from outside the state; how frequently do you have occasion to have shipments in [fol. 1601] there from Illinois points?

A. Oh, sometimes we have them weekly, sometimes twice a week, sometimes every other week. It all depends on what we need.

Q. Depending on the volume of your business, what you have been buying and what the demand is at the particular time?

A. That is right.

Q. Who brings your shipments from the east to you there?

A. The Rock Island Motor.

Q. Is there any other service from eastern points into Hamlin than the Rock Island Motor Transit Company?

A. Well, the Iowa-Nebraska stops not very often; once in a great while they will stop.

Q. Do they render a regular service into Hamlin?

A. No.

Q. Is it more casual or intermittent?

A. It is just for dropoffs.

Q. Do I understand the trucks of the Iowa-Nebraska frequently go through without stopping?

A. Oh, yes.

Q. What kind of service have you had from the Rock Island Motor Transit Company on your shipments from out of the state?

A. Just perfect.

Q. In the event that service would be eliminated entirely or substantially reduced, would that affect your ability to get merchandise into Hamlin for your business?

[fol. 1602] A. Well, I don't know. We would have to look for some other transporter.

Q. Well, other than Iowa-Nebraska, does Roberts serve Hamlin?

A. They do once in a while.

Q. Is that a regular service?

A. Well, it all depends where it comes from. If it comes from Omaha, Roberts will bring it.

Q. In other words, Roberts operates primarily as an Audubon-to-Omaha and Omaha-to-Audubon carrier?

A. That is right.

Q. That is their principal operation as you have observed it? Is that right?

A. That is right.

Q. Do you have any information about whether the service of the Roberts Transfer from the east, that is from Des Moines to Audubon, is to be continued?

A. That I don't know anything about.

Mr. Howland: I think that is all.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. If you call Iowa-Nebraska and tell them you have something to ship, they will stop, won't they?

A. I never tried it, but I don't think they would.

Q. And these trucks of theirs, which you say go through, would stop there to drop off something if they have any-[fol. 1603] thing for them?

A. I imagine.

Mr. Bradshaw: That is all.

Redirect-examination.

By Mr. Howland:

Q. How far is it from Hamlin over to Avoca?

A. Gosh, I don't know.

Q. Somewhere in the neighborhood of 18 or 20 miles, isn't it?

A. More than that.

Q. Of course, none of the carriers have any freight depot there in Hamlin. Isn't that true?

A. That is right; they do not.

Q. And the only way you could contact Iowa-Nebraska would be to call Avoca. Wouldn't that be true?

A. That is right.

Q. These Iowa-Nebraska trucks that come through from the west, do you know whether they are loaded or empty, or what the situation is?

A. I would not know.

Mr. Howland: That is all I have.

Exam. Carpenter: Recross.

Recross examination.

By Mr. Bradshaw:

Q. Who do you call when you call the Rock Island Motor Transit?

A. We just have them bring the stuff to our door, and they will ask us when we want them to pick up anything and we will tell them.

[fol. 1604] Q. Do they have a freight agent there?

A. No.

Q. The closest one is at Audubon?

A. Yes.

Q. Do you have any dealings with him?

A. Very little.

Q. Where would you file your claims if you had any?

A. I wouldn't know. I never had any.

Mr. Bradshaw: That is all.

Mr. Howland: No further questions.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: I will call Mr. Clark.

Riley Clark was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Riley Clark.

Q. And you live where, Mr. Clark?

A. At Lewis, Iowa.

Q. Now, Lewis, Iowa, is located where with reference to Atlantic, Iowa?

A. Lewis is at the junction of 6 and 92. We are 8 miles west and a half a mile south of Atlantic, and 50 miles out of Omaha.

Q. You are 8 miles south and a half a mile west of Atlantic?

[fol. 1605] A. Yes. It would be more south than west of Atlantic.

Q. What is the size of Lewis? What population does it have?

A. I would say between 500 and 600.

Q. It was formerly on a branch of the Rock Island Railroad?

A. That is right.

Q. And it was abandoned some years ago?

A. When they took the rails our of there, the older people more or less figured the Rock Island was going to serve them by truck.

Q. You have no rail line in Lewis?

A. No.

Q. What business establishments and what concerns are located there?

A. Well, my father-in-law and I each have a machinery and general garage; we have Ferguson Implements; we have Marker's Hardware; Joyce Lumber Company has a large yard there; we have a man, Millard Cavin, who has a cabinet shop, he does fine wood work; we have a Standard Oil Service man there, he gets all his pipe and fittings and his pumps and stuff by Rock Island Motor.

Q. Does he run a bulk station?

A. No; he serves a large territory around there. We have a bulk station there too.

Q. And I suppose there is a general store there too?

A. That is right. We have two stores, a drugstore and the Post Office, and another garage.

Q. Now, your town is located right at the junction of [fol. 1606] Highway 92 and U. S. Highway 6?

A. That is right.

Q. Highway 6 comes in the northerly edge of town?

A. That is right. It used to run right by our door, and they moved it. It was moved a half mile north of town.

Q. Do you have any shipments brought into your place of business there from outside the State of Iowa?

A. Well, fairly often we do.

Q. From what points do you get such shipments?

A. Mostly from Chicago.

Q. Are those shipments principally smaller implements and parts?

A. It would be mostly parts. We have 24-hour wrecker service and in that business we need axles and parts on heavy trucking equipment, things we have to have for emergency service. You can't even get them from Atlantic; it would hold us up getting them from Atlantic.

Q. In other words, you are a small community located down there, and if you don't have substantially the same service on replacement parts and matters of that sort as the larger towns like Atlantic have, you would be handicapped. Is that right?

A. Yes, and it is more than that. I have a letter here from the merchants; this Joyce Lumber Company gets all their stuff from Chicago and he says, "I can get at least 2 days' service", and he says he has stuff laying over in Atlantic for a week. If it is brought in there by the Rock Island Motor Transit it is laid down at the door.

[fol. 1607] Q. Is there any other carrier that performs any regular service into the community of Lewis other than the Rock Island Motor Transit Company?

A. There is a private concern that runs out of Greenfield, Iowa, for Omaha, Bob McVay.

Q. Now, the McVay Truck Line has its eastern terminus at Greenfield, which is the county seat town about 20 or 25 miles east.

A. It is 30 miles.

Q. It is 30 miles east of Lewis on Highway 92.

A. I think their primary purpose is to pick up freight in Omaha and deliver east as they go.

Q. Do they have another connecting carrier with whom they can interchange freight from the east coming into Lewis?

A. Not that I know of. They are a little bit like Roberts up around Audubon.

Q. They do pick up freight at Omaha, Nebraska, which has been brought in by other carriers and deliver that freight on their eastward movement?

A. That is my understanding.

Q. Now, you said a moment ago something about having a petition that was signed by the business men or the merchants there in Lewis.

A. We had a meeting last night, and I have a letter from our community. We just didn't dream of such a thing coming to pass. We depend on the Rock Island Motor Transit [fol. 1608] Company; and we had this meeting last night, and it was such short notice, and I am down here today to see what could be done.

Q. Were you authorized to speak for them, while in attendance at that meeting, in the hearing here today?

A. That is right.

Q. If this Rock Island Motor Transit service were cut out altogether or the service was reduced to, say, once or twice a week, what effect would that have on business in Lewis?

A. I was thinking about that a while ago. It would put an embargo on this distance between Lewis and the highway. It would just upset us. Our machinery would lay over in Atlantic; the same way with the lumber yard's shipments. Such an embargo was placed a little over a year ago, and that brings back to me what we would be up against if the service of the Rock Island Motor Transit stopped altogether.

Q. Do you think you would be able to continue your business in the same manner you have done heretofore?

A. No, we couldn't. We would have to invest in a truck of some kind, which we don't want to do, and it would just run us into a lot of trouble. These shipments are all small shipments and it wouldn't pay us to attempt to fool with them; we can't afford to have someone handle them for us. We are a small town, and that is why we had this meeting last night. They all feel the same way about it.

Q. And you feel the continuation of the Rock Island [fol. 1609] Motor Transit Company's service to your community is essential to the continued existence of the community?

A. I personally feel I cannot see any reason for not continuing it. We have been dependent on it for a long time, and there isn't any use of us not having it. I guess Watson and maybe Merchants and even Iowa-Nebraska have rights through there, but they are through transports;

you wouldn't catch them slowing down for us.

Q. Have any of those concerns ever made deliveries of any merchandise in your town?

A. Not that I know of; they handle strictly through freight. I work on wrecker service 24 house a day and I get a lot of calls from those boys and I have noticed it is all through service they are handling.

Q. You referred a bit ago to shipments tied up in Atlantic. Was that while there was an embargo on the highway?

A. Yes.

Q. Were such shipments handled by the Rock Island Motor Transit Company or some other carrier?

A. Well, in this particular situation it was the Rock Island Motor Transit; that embargo would not let them deliver to us and they left it at the Rock Island depot at Atlantic.

Q. In other words, the embargo was on the gravel highway?

A. That is right. It is 6 miles from Lewis to Highway 71, and we are a half a mile from the blacktop, and they put [fol. 1610] an embargo on the whole thing.

By Exam. Carpenter:

Q. Who put the embargo on? The State of Iowa or the Rock Island Motor Transit?

A. Well, the State Highway Commission did. The thing we were complaining of, although we were on the gravel such a short distance, it stopped our freight.

By Mr. Howland:

Q. If your shipments came into Atlantic and there were no Rock Island Motor Transit service, as I understand it, it would be necessary for you to operate a truck of your own to get those shipments out to Lewis. Is that right?

A. That is right. Nobody would haul it down there.

Mr. Howland: I think you may cross examine.

Mr. Bradshaw: No cross examination.

By Mr. Nolan:

Q. Mr. Clark, have you had any experience where some other trucking company other than the Rock Island Motor

Transit Company brought shipments to Atlantic and left them for you?

A. No. Our stuff always comes via the Rock Island Motor Transit. The time I spoke of where we had the trouble was when they had that embargo on.

Q. I was under the impression you had some experience where some other carrier brought a shipment for you and left it for you at Atlantic, Iowa.

A. Well, that stuff came express, but it is the same principle. In other words, if axles and emergency parts [fol. 1611] come by express and we have to go to the express office and get them, by the time he sends us a card it takes a day to get that card. There is another thing to consider and that is that the man in Atlantic is there only part of the time. We have to get hold of him before we can get our shipments.

Q. You mentioned something about having a meeting of the merchants and people of Lewis. Was that your Commercial Club?

A. Members of the Commercial Club.

Q. Your civic organization is the Commercial Club; that is the Civic Chamber of Commerce?

A. That is right. It was a specially called meeting.

Q. Did the members there sign a petition for you to represent them at these proceedings?

A. Yes.

Q. Do you have that petition with you?

A. Yes, sir.

Mr. Nolan: I will offer this document for identification.

Exam. Carpenter: It will be marked as applicant's exhibit No. 21.

(The document referred to was marked as "Applicant's Exhibit No. 21, Witness Clark", for identification.)

By Mr. Nolan:

Q. I will hand you what has been marked for identification as exhibit 21 and ask you if you were present when that document was signed and if you know the signatures and the occupations of the signators on that document? [fol. 1612] A. That is right.

Q. You are personally acquainted with all of them and they signed that paper in your presence?

A. That is right.

Mr. Nolan: I offer in evidence document which has been marked for identification as exhibit No. 21.

The Witness: Those people who signed that— We are in a small community and we have to have service.

Mr. Bradshaw: I object to the exhibit unless the parts pertaining to the various shops and garages and lumber yards in the town are deleted, as we didn't have an opportunity to cross examine these people who are endeavoring to put evidence in here of some sort of service they may or may not be able to get.

As far as the signatures are concerned, I don't care about them, but this letter goes too far and it offers evidence without the opportunity of cross examination.

Exam. Carpenter: The objections are overruled. The document, consisting of two sheets, is received in evidence as exhibit No. 21.

(Applicant's exhibit No. 21, Witness Clark, was received in evidence.)

Mr. Howland: I think that is all we have with the witness.

Exam. Carpenter: Do you have anything further?

Cross examination.

By Mr. Bradshaw:

Q. How did you happen to call this special meeting [fol. 1613] last night?

A. This thing has been going on for quite some time, and we just heard about this thing, and we can't imagine how it will affect service.

Q. Was there a representative there from the Rock Island Railroad or the Rock Island Motor Transit?

A. There wasn't a representative there last night. This driver the other day said he was operating on temporary permit.

Q. This was a ground swell from the community and it froze up?

A. Yes.

Mr. Nolan: That is all.

Mr. Bradshaw: No further questions.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Lensch, please.

H. A. LENSCH was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you give us your name, please?

A. H. A. Lensch.

Q. You live where?

A. Exira, Iowa.

Q. Exira is located where with reference to Atlantic and Audubon?

A. Well, it is on Highway 71 approximately 17 miles north of Atlantic and 9 miles south of Audubon.

[fol. 1614] Q. What business are you engaged in, Mr. Lensch?

A. I am in the implement business. We have an Oliver contract and a New Idea contract. We have also plumbing and heating, and we also render a water-system, repair-work service for the farmers.

Q. How long have you been engaged in business there at Exira?

A. Since 1944.

Q. Now, you handle the Oliver equipment line?

A. That is right.

Q. And the New Idea line?

A. That is right.

Q. And then you render a plumbing and heating service as well as the water service?

A. That is right.

Q. That includes both farming water systems and home water systems?

A. Correct.

Q. I take it, in your Oliver farm equipment and implement line, you get shipments from different points?

A. Yes; Omaha, Des Moines, Charles City, and we do have occasional shipments coming out of Springfield, South Bend and Battle Creek.

Q. That would encompass what items?

A. Items not carried in stock in branch houses where we get direct factory shipments.

[fol. 1615] Q. In other words, the Oliver Farm Equipment Company has manufacturing plants at those other locations?

A. Right.

Q. And there are replacement and repair parts which you order and which are not stocked in either Omaha or Des Moines?

A. That is correct.

Q. And those are shipped direct to your company?

A. Yes.

Q. Exira has about what population?

A. Oh, I would say approximately 1,300.

Q. What types and kinds of business establishments are located there?

A. Well, we have a large creamery; we also have the Cozy Manufacturing Company which prefabricates ready-made homes, and granaries.

Q. Is that a sort of a ready-cut, farm-building establishment?

A. That is right.

Q. Any other manufacturing concerns that are located there?

A. No. We have a wholesaler in town.

Q. What is his line?

A. Electrical.

Q. Electrical appliances and electrical supplies, wiring?

A. Electrical supplies mostly.

Q. In what territory does he distribute?

A. Well, Mr. Spoo is here and I would sooner have you [fol. 1616] question him as to the territory. I am not familiar with it.

Mr. Howland: All right. We will ask Mr. Spoo about that.

By Mr. Howland:

Q. Now, with respect to these New Idea farm implements which you handle, do you have shipments coming into Exira for implement parts?

A. Yes, implement parts. Manure spreaders, the larger

machines, corn pickers and the like, they are usually brought in by rail or we go into Omaha and pick them up with our own truck.

Q. Where do you get your New Idea parts from?

A. Well, the bulk of the parts would come out of Omaha. I don't know whether you are familiar with it or not but our repair catalogs have a symbol or a code for us whereby we order certain parts. The symbol indicates they do not have it at Omaha and they recommend us ordering it direct from the factory.

Q. They have a factory where?

A. Out at Cold Water.

Q. Your plumbing and heating supplies come from what points?

A. I would say 90 percent of it from Omaha and Des Moines.

Q. Would that include your water service supplies?

A. Well, no, not necessarily. We receive some water service supplies from Beatrice, I believe.

Q. Is that from the Dempster Mill Manufacturing Company?

A. That is right; and we have hand mills coming in from Hastings, Nebraska.

Q. That is parts?

[fol. 1617] A. Complete machines.

Q. And you handle those also?

A. Yes.

Q. That is these portable hand mills?

A. Well, portable or stationary.

Q. Either one?

A. Either way.

Q. What service have you been using to get your shipments into Exira from points primarily outside of the State of Iowa? This hearing is concerned with interstate shipments primarily?

A. Well, we usually specify Rock Island Motor Transit if it is available at the other end. Otherwise, we usually specify "best way".

Q. What has been your experience in having shipments come in by Rock Island Motor freight?

A. Well, I would have to say good, very satisfactory.

Q. Now, do you have any other service to Exira?

A. Yes; we have Roberts Transfer from Audubon.

Q. Do you know from what points Roberts performs that service? Is it primarily from Omaha, or does he also come in from the east?

A. He comes in from Des Moines also. We have used him from both directions.

Q. Have you been informed that Roberts is giving up his Des Moines-to-Audubon service?

[fol. 1618] A. I heard a rumor to that effect today. I don't know whether there is any truth in it. I would not say.

Mr. Howland: We will make a showing with respect to that, I think, if the Examiner please.

By Mr. Howland:

Q. In event Roberts should discontinue his service would you have any regular, continuous service from the east outside of the Rock Island Motor Transit?

A. Not to my knowledge. Iowa-Nebraska do come into town but it is not a regular service. I think they have a contract with the creamery company.

Q. In other words, they handle the creamery shipments in large quantities moving to the east?

A. That is right.

Q. That would be truckload quantities of butter, eggs and things of that sort?

A. Yes.

Q. If this Rock Island Motor Transit service were to be discontinued to Exira or if it were to be reduced from the present service down to, say, twice a week, would that affect your business in any way?

A. Well, I think probably it would have some effect on it.

Q. Well, just tell the Examiner how it would affect you.

A. Well, if we want emergency shipments, regardless whether coming out of Omaha or Des Moines or out of state, we invariably always specify Rock Island Motor Transit Company because we do have faith in them. They [fol. 1619] have given us good service. We always specify Rock Island.

Q. On shipments from Omaha, how long does it ordinarily take you to get a shipment delivered at Exira after you order it out from Omaha?

A. We have had overnight service. Through emergency we have had, where we call the wholesaler at Omaha like today at noon, had the shipment delivered tomorrow morning which lots of times is oftener than mail service or parcel post service.

Q. That service has been rendered by the Rock Island Motor Transit Company?

A. Yes.

Q. How frequently in your business do you have shipments from points outside of the State of Iowa?

A. I can't answer that correctly. I would say several times a month.

Q. Do you have any large shipments where the shipments will run over 5,000 pounds in weight?

A. No, not very often. That would not happen too often.

Q. About what do your shipments customarily run in weight?

A. Oh, they would run all the way from 50 pounds up to 4,000 or 5,000 pounds.

Mr. Howland: I think you may cross examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No cross examination.

[fol. 1620] Exam. Carpenter: That is all. Thank you, sir.

(Witness excused.)

Mr. Howland: Mr. Spoo, please.

RONALD SPOO was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. State your name, please.

A. Ronald Spoo.

Q. Do you live at Exira, Mr. Spoo?

A. Yes, I do.

Q. What is your occupation?

A. I own a hardware store there, and in addition to that I have a wholesale electric business.

Q. And this hardware store, I take it, is a retail store?

A. Yes.

Q. And you carry in that store what, if you know, in addition to the usual line of hardware goods? Do you have appliances?

A. We have appliances, general hardware, plumbing and heating, floor covering; it is a pretty complete store.

Q. You have a floor-covering line you say?

A. Yes.

Q. You also handle farm supplies such as tank heaters and the like?

A. Yes, some rural supplies. We don't go into implements or anything connected therewith.

[fol. 1621] Q. How about water service supplies? Do you handle those?

A. No.

Q. Is this wholesale electrical business a separate establishment?

A. Yes, it is.

Q. What do you handle in that line?

A. Just general electrical supplies such as wire, conduit, light fixtures, switches, just electrical supplies. We don't go into appliances in the wholesale business, not household appliances such as toasters, irons and articles of that sort.

Q. To whom do you sell your electrical equipment and supplies?

A. To electricians who are out doing this work throughout the territory, to variety stores. We cover an area approximately 70 miles each direction from Exira.

Q. And that would extend west out to Harlan, east to Greenfield, north to Wall Lake, south to Corning and Creston?

A. That is right.

Q. What is your source of supply with respect to your electrical line?

A. Practically everything we get comes from the east coast, New York, Rhode Island, Massachusetts, a lot of merchandise from Philadelphia; and some from Denver.

Q. On your shipments from the east, how do you cus-

tomarily get those in? Do they come by motor freight or some other form of transportation?

[fol. 1622] A. It seems to be about fifty-fifty rail freight and Rock Island Motor Transit freight.

Q. Some of it is shipped by motor carrier through the Chicago gateway direct, is it not?

A. Yes; it comes to Chicago, I believe, International Forwarding Company and the Rock Island Motor Transit picks it up at Chicago.

Q. How is the railroad freight handled there as far as delivery service at Exira is concerned?

A. The same.

Q. It comes in to the Rock Island Freight House on the trucks?

A. That is right. Occasionally it is delivered direct to our door.

Q. Who collects the freight on your rail shipments?

A. Well, there is a young fellow there in town who has a truck of his own who picks up for the railroads.

Q. Are your Motor Transit shipments delivered direct to you?

A. Some of them; and some of them are delivered, I presume, at the freight house and he brings them up. I am not sure where he picks them up.

Q. They are delivered by the local drayman there?

A. That is right.

Q. How much would these shipments from the east weigh?

A. They will vary from 200 pounds— Oh, occasionally we will get a shipment of wire in that will go up to 10,000 pounds.

[fol. 1623] Q. Does that come either by motor freight or by the rail?

A. Either way.

Q. Both ways?

A. Yes. We don't specify how it is to be shipped, usually just "best way"; but it seems like it is evenly divided.

Q. You do have these motor freight shipments coming in, do you, that weigh as high as 10,000 pounds on a single shipment?

A. Yes, we do.

Q. Now, with respect to your hardware lines, what are your sources of supply of the goods you handle in your hardware store?

A. Practically everything comes out of Des Moines; there is a little from Omaha and a little from St. Joe, Missouri; but I would say 80 percent of it from Des Moines.

Q. Do you know by what line your shipments from St. Joe, Missouri, and Omaha, Nebraska, customarily come into Exira?

A. No, sir, I cannot say. I am not acquainted with that.

Q. How has the service that has been performed by the Rock Island Motor Transit Company been with respect to being satisfactory or otherwise?

A. It has been excellent; we have had very good service; but speaking from the standpoint of the wholesale business I would like to say that our claims service has been excellent in that respect. On shipments of light fixtures where there is a lot of glassware we do have damage that just can't be helped, but since the Rock Island Motor Transit has been hauling most of it we have had a minimum amount [fol. 1624] of damage; and when I present a claim I can depend on having that claim settled within one month.

Q. Have you had experience with other motor carriers than the Rock Island Motor Transit from the claim standpoint?

A. Roberts Transfer gets one of those shipments occasionally, and when we have very much hauled by them we have plenty of damage and have a lot of trouble collecting on claims.

Q. That is, as far as the claim payment angle is concerned it is slower and requires a longer period of time for adjustment?

A. That is right.

Q. If the Rock Island Motor Transit service to Exira were to be eliminated or substantially reduced, would that have any effect on your business?

A. In the respect that it would slow us down in receiving shipments from the east it would. Shipments by rail from the east coast has taken as much as a month and a half to reach us after date of shipment. What happens to them I don't know. Anything from the east by truck we

have noticed it comes through in a week up to three weeks; but it has cut it down quite a bit and it has cut down, in turn, our capital investment in merchandise.

Q. In other words, you don't have to anticipate your requirements as far ahead if you can get your shipments in within a week or ten days from the time the shipment is made?

A. One of the important factors in the wholesale business is a quick turnover and to turn it quick you have to get it quick.

[fol. 1625] Q. Do you handle any of these knocked-down farm buildings or matters of that sort in your business?

A. No, we do not.

Q. What is the name of the concern that handles those?

A. Cozy Manufacturing Company.

Q. Is there any representative here from that concern?

A. No, there is not.

Q. On this wholesale electrical supply line, do you maintain salesmen in your territory?

A. Yes, we have a truck on the road. We haul the merchandise out and they pick their merchandise from the truck.

Q. That is, you have a rolling electrical supply store which you take out direct?

A. Yes, sir. The result is we ship very little merchandise out of Exira other than by parcel post.

Q. You are primarily interested in the inbound service to Exira as far as interstate points are concerned, points in the eastern part of the United States, and Chicago; St. Joseph, Missouri; and Omaha, Nebraska?

A. That is right.

Mr. Howland: I think that is all I have.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. You say you have frequent claims in your electrical fixture business?

[fol. 1626] A. Yes, we do.

Q. Who do you file your Rock Island Motor Transit claims with?

A. We file them in Des Moines. We started filing them here.

Q. In other words, you just keep a supply of blanks on hand?

A. Yes, that is right.

Q. Now, does not your Rock Island Motor Transit freight come in under rail billing?

A. Motor freight under rail billing?

Q. Yes.

A. None that I know of.

Q. Do you know?

A. Well, I can't say as to that. As I stated here a few minutes ago, a lot of this freight is hauled by the same carrier from our depot.

Q. Well, isn't this true, the cartage gentleman there brings you both your motor freight and your rail freight?

A. Yes.

Q. So you have no way of identifying it unless you study the bills?

A. That is right.

Q. And you haven't had occasion to do that?

A. No, I haven't.

Mr. Bradshaw: That is all.

Mr. Howland: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 1627] Exam. Carpenter: We will have a 5-minute recess.

(Recess.)

Exam. Carpenter: We are reconvened.

Mr. Howland: I will call Mr. Emory.

VICTOR L. EMORY was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?
A. Victor L. Emory.
Q. Your home is where, Mr. Emory?
A. St. Joseph, Missouri.
Q. What is your occupation?
A. I am the Transportation Commissioner of the St. Joseph Chamber of Commerce.
Q. What particular types of industries are located at St. Joseph, Missouri, which serve in that part of the Iowa territory located on or adjacent to U. S. Highway 6 and for a distance of some miles both north and south of that highway?
A. Our principal manufacturers are work clothing manufacturers, candy manufacturers; in addition to that we have a number of wholesalers, one in particular being the Wyeth Company that distributes in a wide area and has for some 100 years.
Q. What is the particular line of that wholesaler?
A. Hardware, saddlery, sporting goods and furniture.
Q. All right. Proceed with your statement.
[fol. 1628] A. Our other important wholesale items are electrical goods, drygoods and drugs. All of those wholesalers distribute in the Iowa area along Highway 6.
Q. Have you been authorized to appear here on behalf of the St. Joseph Chamber of Commerce?
A. Yes, I have. That was handled in our Chamber of Commerce by vote of the Transportation Committee and that vote was taken at a meeting on March 13th.
Q. At that meeting was the question of the limitation of 5,000 pounds maximum, under which the Rock Island Motor Transit Company has been operating, a subject of consideration?
A. Not at that meeting; but just subsequent to that in a telephone poll of the committee we developed their desire to have a request made that the application, if possible,

be amended to eliminate the restriction that was in the application as we received it.

Q. You understand, do you, that the application has been amended so that the 5,000-pound restriction is now eliminated so far as the application itself is concerned and that the matter has been thrown open for action by the Commission?

A. I so understand from hearing so today.

Q. What method of distribution is customarily followed by the members of your Transportation Department of the St. Joseph Chamber of Commerce in distributing their merchandise into this territory that is involved? On that [fol. 1629] category, do they maintain warehouses, do they ship direct to dealers, or do they sell direct to the consumer?

A. The Chamber of Commerce itself or its Transportation Department routes no freight for its members. The shippers that are members of the Chamber and members of the Transportation Committee use all forms of transportation, but specifically a large proportion of the total is by common carrier by motor vehicle.

In the case of work clothing, some estimated 95 percent of it moves via common carrier truck. Other distribution is direct to retail stores and generally it finds its way into every retail store in the area they serve, and that is a very wide area extending as far east as Illinois and as far west as Montana and western Colorado and New Mexico and Texas.

In the case of the Wyeth Company, the wholesaler hardware firm, their distribution is direct to the hardware retail stores and in some cases retail furniture stores, and they ship, almost without exception, to every hardware store in an 8 or 9 state area including Iowa and Missouri east of St. Joseph and to plants generally south, north and west of St. Joseph.

In the case of the American Electric Company, their distribution is somewhat narrower, but it does include some points along Highway 6 in Iowa and points in southern Nebraska and west to the Colorado border.

The whole-sale drug house has a distribution pattern to retail drug stores and generally about the same area as

[fol. 1630] described for the electrical wholesaler. Each of these make shipments direct to the retail outlets.

Q. Now, your shippers located in St. Joseph, Missouri, make shipments into this territory generally in what quantities?

A. Well, the preponderance of the shipments are under 500 pounds of the firms that I described; and some of the smaller firms that I haven't mentioned ship larger quantities at times; feed manufacturers, serum manufacturers usually have the smaller shipments, but sometimes they ship as much as four and five thousand pounds.

While it is not a general shipping practice, there are times when our packers, our very large national packers, make shipments ranging from small minimum shipments up to five and six thousand pounds, but those are not regular shipments.

Q. One of the industries located in St. Joseph, Missouri, I believe is the meat-packing industry?

A. Yes. It is a very large and important part of our total industrial strength, and actually comprises about 20 to 23 percent of our total labor force.

Q. And that is in addition to those other concerns you referred to?

A. Yes, sir.

Q. As comprising the shippers who are interested in the service along Highway 6 across the State of Iowa?

A. Sure.

[fol. 1631] Q. You have been connected with transportation work for about how long a period of time all told?

A. About 30 years.

Q. During that time I take it you have seen the development of the present motor carrier industry in the United States from its very earliest days. That is correct, is it not?

A. I will say, "Yes".

Q. In connection with the motor carrier service do you have an opinion as to whether a service can be performed under present-day conditions to the intermediate smaller points without also including a service to the larger centers of population in this case, points such as Des Moines, Iowa; Omaha, Nebraska, and similar centers of population?

A. Well, from my experience in being before rate bodies of motor common carriers, I have observed that generally the carriers who are serving the smaller points, or are forced to serve them through shipper pressure, find that the tonnage to the smaller towns is not sufficient to carry the entire line without the larger towns, that they have light loads with costs still running proportionately the same; and, with some few exceptions, the very small carriers seem to not only need the larger towns but are constantly fighting for our shippers who serve large and small towns alike.

Our biggest fight is to keep the larger lines serving the smaller points that their certificate calls for, but they seem [fol. 1632] unwilling to serve because of the added cost without added revenue.

Q. Have you observed that there is a general trend in the motor carrier industry to concentrate on what might be referred to as overhead sl ›ments, or point to point shipments, as compared to service to intermediate communities of smaller population?

A. Yes, very definitely. Particularly at general rate committee meetings of the Middlewest Motor Freight Bureau I find carriers' representatives pointing out constantly that they lose money on the smaller towns and that they wished the St. Joseph Chamber would not be as insistent on complete service as we are because of the fact that they tell us they are losing money at these smaller towns. And we are just as insistent that they serve all of the points for which they have certificates.

Q. And are some of the carriers, who have taken the position you refer to, carriers operating in the Iowa territory?

A. Yes. One of them that stands out, the actual example I am thinking of, is over in the State of Kansas. Just recently Watson Brothers notified some of our shippers, and it was the result of some further correspondence, that they desired not to serve certain small towns that have been served and are being served by a small carrier named Ragland Truck Lines. While it was not with complete agreement, the wholesale hardware firm, before referred to, has at the moment dropped their protest to the lack

of service by a carrier in that territory just west of St. [fol. 1633] Joseph on Highway 36.

Q. As you have observed, is that the same trend on the part of the carriers noticeable in the south half of Iowa as well as Missouri and eastern Kansas?

A. Without having any specific examples, my observations would include that territory because of the general observations made at meetings such as I earlier referred to, that certainly the southern Iowa territory is included in that group of carriers or that class that apparently would like to serve only the larger towns where more tonnage is available.

Q. Mr. Emory, I will ask you if you are familiar in a general way with the service rendered by the Rock Island Motor Transit Company in the communities on and adjacent to U. S. Highway 6 through the territory extending from Omaha east to Des Moines and thence on to the eastern border of the State of Iowa?

A. In discussing the service of the Rock Island Motor Transit with two or three of our larger shippers I find that their experience in the territory that you described is that the service of the Rock Island Motor Transit is quite satisfactory.

Q. What would you say as to whether there is a need for the continuation of the service of the Rock Island Motor Transit Company in this general area, particularly to small intermediate centers of population?

A. Certainly there is such a need, and St. Joseph welcomes the application of any motor carrier who expresses [fol. 1634] a willingness to serve the small points, because it is a continuing problem with us and quite possibly to any territory. Where we are offered that service we would lend our strong support because it is a continuing problem for us to try to continue to serve the small towns where our customers are located.

Q. With respect to the restriction of a maximum of 5,000 pounds per shipment, I believe some action was taken with respect to addressing a letter in support of an amendment to the application urging the Rock Island Motor Transit Company to apply for an elimination of the 5,000 pound maximum limitation.

Q. Is there anything further you can add to what you have already said about that?

A. Well, only this: In the time I have been at the St. Joseph Chamber, some 3½ years, I have found that St. Joseph shippers as far as possible desire to have a complete service. In other words, they don't like motor carriers who pick certain types of freight and discourage other types of freight, such as refrigerated versus non-refrigerated. They become irritated when a carrier tells them they don't handle shipments of over 5,000 pounds, that they handle only shipments under 5,000 pounds in weight.

From my observation they definitely favor carriers that handle their truckload and also their l. t. l. business, because truckload business at the moment seems much more attractive; and it has been the subject of discussion on many occasions that the shippers there intend to favor those carriers that render a complete service rather than [fol. 1635] anything less than complete.

Q. Are there shippers in the St. Joseph area who are required to make shipments in excess of 5,000 pounds in this southern Iowa territory and particularly along Highway 6 in that territory?

A. I would say, with the possible exception of the electrical wholesaler, each of the shippers I have previously mentioned have occasion to make shipments over that weight as is sometimes obvious in the general wholesale business, but when they have a 5,000-pound shipment they dislike the necessity of searching for a carrier that would take that shipment in deference to the small carrier that had been handling their small shipments as a regular thing.

Q In other words, your shippers prefer in a particular territory, if the service is satisfactory, to limit the number of transportation agencies with which they deal?

A. Yes. The limitation of the number of companies becomes just as necessary at certain shipper's docks in St. Joseph as is true in Chicago, for instance. The amount of space available for loading is limited at many of the stores so it is only good business for them that their traffic managers keep the number of lines limited as much as possible. In fact, it becomes a necessity.

In the case of several industries, and the packing industry is an example of it, at least the two larger ones are industrial plants that were set up long before the advent [fol. 1636] of motor trucks, and the truck docks are more in the nature of fill-in operations, or something more in the nature of plant operations, it costs them much more. The docks aren't at the end of the production line as are the rail tracks. The many problems found in the larger cities is just as true as found in St. Joseph, and among them is the necessity for limiting the number of carriers.

Q. Now, you have a number of interline carriers serving St. Joseph, Missouri, that make connections with the Rock Island Motor Transit Company. I wish you would tell us a little bit about shipments from the St. Joseph manufacturers, jobbers and wholesalers, moving into this Iowa territory on and adjacent to Highway 6.

A. From my discussions with shippers recently I find, almost without exception, that they are using just one carrier from St. Joseph to Des Moines in connection with interline traffic for the Rock Island Motor Transit, and that is because of the service they get by that carrier.

Their experience has been that the Burlington Transportation Company can make early deliveries to the Rock Island Motor Transit on the following day after shipment from St. Joseph so the deliveries are made with a minimum of delay, and I find, almost without exception, they are using that carrier out of St. Joseph.

Q. So that shipments moving out of St. Joseph, Missouri, into this territory are interlined at Des Moines for points [fol. 1637] both east and west of Des Moines. What is the approximate total elapsed time in transit from St. Joseph, Missouri, to point of destination?

A. They tell me they are getting a next afternoon and second morning delivery in many cases.

Q. You referred to the meat packers located in St. Joseph, Missouri. Are there plants of all the large meat packing organizations located in St. Joseph, Missouri?

A. Two of them are. One is the plant of Armour & Company and the other is the plant of Swift & Company. In addition to that we have a local packer, the Dugdale Packing Company, which is a large and important packer

and specializes strictly in beef, and the Seitz Packing Company, which is a relatively small company, handles and processes all kinds of animals, that is the usual livestock animal.

Mr. Howland: I think you may cross examine.
Exam. Carpenter: Mr. Bradstreet.

Cross-examination.

By Mr. Bradstreet:

Q. Did you name the one carrier it is said does most of this interlining with the Rock Island Motor Transit at Des Moines? A. Yes; the Burlington Transportation Company.

Q. Mr. Emory, would you tell us what other common carrier transportation is available from St. Joseph to Des Moines?

A. Watson Brothers, Knaus, I believe Wagner is, Bos [fol. 1638] Transportation, I believe, serves Des Moines.

Q. Is that all?

A. That is all I think of at the moment.

Q. What are the rails between St. Joseph and Des Moines?

A. The Burlington and the Rock Island.

Q. Do you know who handles for your shipper clients the shipments that you mentioned of over 5,000 pounds at the present time?

A. No; I am not informed as to that.

Q. You haven't had any complaints about them not being able to get them out, have you?

A. Only to the extent they testified they would like to have the same carrier handle all of them.

Q. Answer the question.

A. I am sorry, sir. I intended to answer your question.

Q. Well, I asked you if you had had any complaints.

A. Well, you will have to qualify that question.

Mr. Bradshaw: Well, let's let it go. That is all.

Redirect-examination.

By Mr. Howland:

Q. You did receive, when you polled the members of your transportation organization, definite requests for the removal of the 5,000-pound limitation restriction, did you not?

A. Yes, sir.

By Mr. Bradshaw:

Q. How was that poll made?

[fol. 1639] A. By telephone calls. I made them personally.

Q. Why was that? You are recommending they agree to that?

A. No, I would not say so.

Mr. Bradshaw: That is all.

Exam. Carpenter: Thank you, sir. You are excused.

(Witness excused.)

Exam. Carpenter: We will adjourn until tomorrow morning at 9:30 a. m. at this same place.

(Whereupon, an adjournment was taken at 4:25 p. m., March 27, 1952, until 9:30 a. m., March 28, 1952.)

[fol. 1639a] TRANSCRIPT OF PROCEEDINGS OF MARCH 28, 1952

ADDITIONAL APPEARANCES:

William A. Landau, 1307 East Walnut Street, Des Moines 16, Iowa, appearing for Eldon Miller, Inc., Intervenor in opposition.

[fol. 1640] Exam. Carpenter: The hearing is convened.

Mr. Nolan: I will call Mr. Smith.

PAUL B. SMITH was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Please state your name, your address and occupation.

A. Paul B. Smith, Columbus Junction, Iowa. I am in the stationery manufacturing business.

Q. How long have you been so engaged, Mr. Smith?

A. About 20 years.

Q. Where is Columbus Junction located?

A. Columbus Junction is midway between Chicago and Kansas City on the Rock Island, and midway between St. Paul and St. Louis also on the Rock Island.

Q. Columbus Junction is a junction point on the Rock Island Railroad, in other words?

A. Yes, sir; likewise at the junction of the Cedar and Iowa Rivers.

Q. What highways are you located on?

A. No. 92 and 76.

Q. Do you understand the nature of this application is the establishment of motor carrier service on U. S. Highway No. 6 between Davenport and Omaha, Nebraska, also [fol. 1641] serving points adjacent to Highway 6 as well?

A. That is right.

Q. What use have you made of the Rock Island out of Columbus Junction for the past 12 or 13 years?

A. Well, we operate on a national scale; we don't do any local business; we ship all over the United States, not so much by freight, but most of our shipments go out by parcel post. However, we do receive a great amount of stock coming in. A lot of our shipments are from the east, from eastern mills as far as Massachusetts, and we use the Rock Island Motor almost exclusively from Chicago into Columbus Junction in connection with another carrier into Chicago.

Columbus Junction is in what might be called an orphan territory down there; we have practically only the one line of service that can give us any kind of service; although several years ago there was quite a bit of contest between the Burlington and the Rock Island for franchises

to come in there. The Rock Island came first and maintained the franchise rights on interstate shipments. A few years ago I went to Davenport and appeared for the Burlington to get interstate rights for another carrier; but since that time I think the Rock Island Motor Freight service has improved. It is my honest opinion they are probably serving our territory as good as any truck line could serve it.

Q. Is that a daily service?

A. That is right.

[fol. 1642] Q. That service comes out of Davenport or Cedar Rapids? Do you know?

A. Out of Davenport.

Q. As I understand it, you manufacture announcement cards and different kinds of stationery and things of that character. Is that correct?

A. We just have two lines, a line of school graduation invitations and a line of wedding invitations which we market through stores.

Q. What would be the frequency of inbound shipments?

A. Probably half a dozen shipments a week.

Q. Does the Rock Island Motor Transit Company operate into Columbus Junction daily?

A. Yes, they do.

Q. What is the size of the town of Columbus Junction?

A. Oh, about 1,200. There are two adjoining towns which makes a population center of about 2,000.

Q. What is the fact as to whether or not Columbus Junction has the usual retail service establishments as a town and community of that size has?

A. That is right.

Q. Do you have any other industry there?

A. We have a button factory and we have a canning factory.

Q. What would be the effect on your business in the event the Rock Island Motor Transit service would terminate or [fol. 1643] would be substantially curtailed in your community?

A. My feeling is that the business in a small town like ours is not enough for another line, unless it has a franchise like the Rock Island Motor Transit has to take care of the smaller towns along our line, that there isn't enough busi-

ness any particular freight line would go out of its way to do anything about it.

Q. As I understand it, the Rock Island Motor Transit Company is the only regular over-the-road carrier service that serves your community interstate. Is that correct?

A. That is right. The main point out of which any direct shipments are particularly important to us is Chicago.

Q. And your stock and your inbound shipments come from Chicago or out of eastern points through the Chicago gateway. Is that correct?

A. That is right.

Q. Has that service been reasonably satisfactory?

A. It has been satisfactory or I would not be there.

Q. Do you have any shipments in excess of 5,000 pounds coming in?

A. We have a good many skids of paper coming in and they run all the way from 1,500 pounds to perhaps 3,000 pounds.

Q. But you do not have any single shipments exceeding 5,000 pounds?

A. No. You mean as one piece?

Q. Yes; or as one shipment.

[fol. 1644] A. We can get a shipment of more than 5,000 pounds. We might get three or four skids of paper in a shipment.

Q. Well, have you had occasion to have three or four skids of paper come in together on one order?

A. Yes, we have.

Q. You would have occasional orders for shipments in excess of 5,000 pounds coming in?

A. Very occasional; once in a while.

Mr. Nolan: That is all. You may cross examine.

Exam. Carpenter: Cross examine.

Cross-examination.

By Mr. Bradshaw:

Q. Columbus Junction is located on the Rock Island Railroad line?

A. That is right; there are two lines. Incidentally, that is our reason for locating in Columbus Junction to build up

our business there because we have had ideal shipping facilities. As I said, we are midway between four cities, Chicago, Kansas City, St. Louis and St. Paul. We have had ideal postal business there.

Q. Most of your outbound shipments are by parcel post?

A. That is right.

Q. Do any of your inbound shipments come by rail?

A. Not any more.

Q. Did they at one time?

A. Yes, at one time we received shipments by rail more or less.

[fol. 1645] Q. How long ago?

A. Several years ago. Since that time we have been specifying motor freight.

Q. Well, you still get rail freight into your plant via the Rock Island Motor Transit, do you not?

A. Not as far as I know. It is a little hard to tell where we have the two coming into town and one freight depot; we don't check some of our shipments close enough to know whether they come by rail or motor. As I understand it, practically all freight into our town is by motor freight.

Q. Does your shippers designate the carrier, or do you do that?

A. We do.

Q. On the inbound?

A. Yes.

Q. I assume you usually designate Rock Island Motor Transit?

A. That is right. I have talked to one or two other shippers in the town. One of them said he specified shipments by rail, and the other one said he specifies by motor freight.

Q. Now, the shipper that specified rail freight, do you know whether or not he gets his rail fraight via the Rock Island Motor Transit?

A. I don't know.

Q. How far out of Davenport is Columbus Junction?

A. It is 40 miles.

Q. What type of truck does the Rock Island Motor [fol. 1646] Transit send in from Davenport?

A. Well, I don't know exactly. They have different types. Just what do you want to know?

Q. This truck, I take it, comes direct to your door?

A. That is right.

Q. What type of truck is that?

A. Well, it is a covered-up 3-ton truck, something like that.

Q. Not a semi?

A. No.

Q. Does he take or pick up any of your outgoing rail shipments?

A. We don't have any outgoing rail shipments; we have some outgoing motor freight.

Q. And he picks that up, I take it?

A. That is right.

Q. When you have this outgoing motor freight, who do you notify?

A. Well, we are located so we usually can catch the truck as it goes down the alley past our plant door. We can see it; and if we have anything to go any particular day we can telephone their office in Washington, Iowa.

Q. Who do you telephone there? The rail agent?

A. Yes. We are midway between Washington and Muscatine and we can telephone Washington or Muscatine.

Q. If you would telephone Muscatine, who would you talk to there?

A. Well, I have the address and phone number.

[fol. 1647] Q. Do you know who that representative is?

A. I am probably mistaken. I have never called Muscatine. I would call Washington; that is the office serving our town.

Q. You would call the Washington rail agent if you had a shipment going out?

A. Yes.

Q. Now, doesn't Western Transportation come into your town at some time?

A. Not to my knowledge. It has never been my knowledge that any other line had the interstate rights.

Q. Well, as I understand it, you have been pretty satisfied with the service of the Rock Island Motor Transit?

A. That is right.

Q. Have you had any occasion to look for other carriers?

A: No.

Q. You don't know whether Poole or Keeshin come into Columbus Junction?

A. Not that I know of. I don't believe they do. They come through there more or less on the highway.

Q. How do you get these shipments of over 5,000 pounds into your plant?

A. You mean out of the truck?

Q. Who brings them?

A. Rock Island Motor. They transport skids up to as high as 2,500 to 3,000 pounds in their trucks.

[fol. 1648] Q. As I understand it, you very seldom have a shipment over 5,000 pounds in weight. Is that correct?

A. That is right.

Q. But when you do, the Rock Island Motor Transit brings it in?

A. That is right.

Q. Do you know whether or not that shipment is broken down into smaller shipments, or is it all one shipment?

A. Well, that is hard to say. We don't have it happen often enough, to have shipments over 5,000 pounds.

Q. Have you had any in the last 6 months?

A. Yes, we have.

Q. How many?

A. Probably one.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Redirect-examination.

By Mr. Nolan:

Q. Mr. Smith, have you ever been solicited by any other truck line for your business?

A. Never have. That is conditional.

Q. I mean within the last 2 or 3 years?

A. The Burlington line was active about 3 or 4 years ago in trying to work up our business. They finally gave up because they have no facilities there, and their service is very poor, and any shipments that came in they usually had to get you out of bed at night to take care of them, or take them to Ottumwa.

[fol. 1649] Q. This service of the Rock Island Motor Transit Company is daily service, is it not?

A. That is right.

Q. When you call the agent at Washington do you know whether or not that is the rail agent or the motor agent?

A. I don't know.

Q. You just have the name and the telephone number at Washington to call and it may be the rail agent or the motor agent?

A. That is right. We catch their truck when they pass the door and when they come in we tell them when we will have a shipment.

Q. How far are you from Washington?

A. About 17 miles.

Q. In regard to those shipments in excess of 5,000 pounds, did you know up until about the 1st of August, 1951, the Rock Island Motor Transit could haul any size shipment and after that day there have been some limitations on their rights to haul such shipments?

A. You say that is true?

Q. Since August 1st there has been a certain restriction on the size shipment they can haul. Have you had any experience with that?

A. I don't believe so.

Q. Have you received a shipment in excess of 5,000 pounds that could have come in from an intrastate point? [fol. 1650] A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: Recross.

Recross examination.

By Mr. Bradshaw:

Q. Where did this one shipment that you had in the last six months come from that was over 5,000 pounds?

A. Well, it would have come from Springfield, Massachusetts, by way of Chicago.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Redirect Examination.

By Mr. Nolan:

Q. Do you know whether or not it could have been brought to Davenport by some other carrier and interlined with the Rock Island Motor Transit at Davenport and they brought it down to Columbus Junction?

A. It could have been.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: Mr. Dietz, please.

ERBEN DIETZ was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Will you give us your name, place of residence and occupation, please?

[fol. 1651] A. Erben Dietz, Walcott, Iowa; automobile dealer.

Q. Where is Walcott located?

A. About 15 miles west of Davenport on Highway 6.

Q. And on the Rock Island Railroad?

A. Right.

Q. But about a mile or so off of U. S. Highway No. 6?

A. That is right.

Q. What automobile agency does your company have?

A. Ford.

Q. Do you handle the Ford Tractor line?

A. No, I don't.

Q. I assume you have parts and auto supplies and things of that character?

A. That is correct.

Q. What is the size of Walcott?

A. About 500 population.

Q. It has the usual businesses and service establishments of a town that size in a good agricultural community?

A. That is right.

Q. What out-of-state shipments do you have coming into Walcott?

A. Motor parts and automobile parts from Chicago.

Q. What service do you use to get them?

A. Rock Island Motor truck.

Q. Have you been using that service for a number of years?

A. Yes.

[fol. 1652] Q. How long have you been in business?

A. Six years.

Q. How has the service of the Rock Island Motor Transit Company been from Chicago?

A. Very good.

Q. Do you know of any other motor carrier serving Walcott?

A. I have never been solicited.

Q. Have you had an occasional shipment brought in in the past six years by any other carriers?

A. I don't think of a single one.

Q. What would be the effect on your company's business in the event the Rock Island Motor Transit service was abandoned or materially reduced in regularity?

A. Well, it would slow up our parts, it would affect our parts business because it would delay shipments of parts coming from Chicago.

Q. With what frequency do you have shipments coming in from Chicago?

A. We have large shipments regularly twice a month, and we have smaller shipments several times a week.

Q. And those all come via the Rock Island Motor Transit?

A. That is right.

Q. Do you ever have occasion to have shipments in excess of 5,000 pounds?

A. No, sir.

[fol. 1653] Q. Your shipments are parts and supplies and things of that character?

A. Yes, sir.

Q. Do you know where you would go for transportation service if the Rock Island Motor Transit service should be terminated there?

A. I don't know.

Mr. Nolan: You may cross examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No questions.

Exam. Carpenter: You may be excused.

(Witness excused.)

Mr. Nolan: Mr. Riley Dietz, please.

Riley Dietz was swown and testified as follows:

Direct examination.

By Mr. Nolan:

Q. You are Mr. Riley Dietz?

A. That is right.

Q. And you live at Walcott, Iowa?

A. Yes, sir.

Q. You are a brother of Mr. Dietz who preceded you on the witness stand?

A. No, I am not.

Q. Some relation?

A. Well, about a third or fourth cousin.

[fol. 1654] Q. What business are you in?

A. I run an electrical shop; appliances.

Q. You are located in Walcott, Iowa?

A. Right in Walcott.

Q. How long have you been engaged in business there?

A. I would say about 6 to 7 years.

Q. What is the source of your merchandise from out-state points?

A. Well, mostly from Chicago; some from Freeport, but most of it is out of Chicago.

Q. You are referring to Freeport, Illinois?

A. That is right.

Q. What do you get from Freeport?

A. Water softeners.

Q. You handle all lines of electrical equipment?

A. I handle all appliances, gas stoves, gas appliances and so forth, as well as water softeners.

Q. That is where you have the butane or gas under compression to supply the stores?

A. That is right.

Q. You handle the gas tubes filled with gas or butane?

A. Yes, I do.

Q. You get your electrical supplies out of Freeport and your other merchandise out of Chicago?

A. All I get out of Freeport are the water softeners. From Chicago I get gas ranges and so forth; nothing big about it.

[fol. 1655] Q. Would you ever get a shipment in in excess of 5,000 pounds?

A. Never.

Q. I mean where you would get a lot shipment of several stoves or things of that character.

A. No. I don't have the facilities for storage.

Q. In other words, you depend on the overnight service from those points?

A. That is right.

Q. Have you been using the service of the Rock Island Motor Transit Company since you have been in business there?

A. That is right.

Q. What has been the quality of that service?

A. Very good. If you want me to enlarge on that, I think I can tell you more about it.

Q. Go ahead.

A. We run a small business. I have two men there out on jobs. I know these trucks come in there, but most of them go straight through without leaving anything there. I have a pickup truck; and last week I had a shipment coming in and they said, "If you want to pick it up we will put it on the truck."

Q. With what frequency would you say you have shipments coming into your place of business from out-state points?

A. Not too frequent; maybe two shipments a month for

our business; sometimes it is oftener; it depends on the amount of business we do. At times our business will run crowded and the next time it will slack off.

[fol. 1656] Q. Do you ever observe the service of many other truck lines through Walcott?

A. No.

Q. Have you been solicited by any other carrier than the Rock Island Motor Transit Company?

A. No, sir.

Q. If the service of the Rock Island Motor Transit Company would be abandoned out of Chicago, do you know where you would place that business?

A. No, I do not.

Mr. Nolan: You may examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No cross examination.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Nolan: I will call Mr. Lovewell to the stand.

CLARENCE LOVEWELL was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Your name is Clarence Lovewell?

A. Yes, sir.

Q. And you live at Walcott, Iowa?

A. Yes, sir.

Q. What is your business, Mr. Lovewell?

[fol. 1657] A. Plumbing and heating appliances and pumps, everything in that line for the farmers.

Q. How long have you been in business there?

A. Well, for myself I imagine something like 7 or 8 years, but I ran that business for about 10 years for another fellow before that.

Q. Then you have been in business there, directly or indirectly, since the Rock Island Motor Transit Company have been operating through that territory?

A. Ever since they have been operating through there.

Q. You were operating the business there when the old Otto Truck Line done business there?

A. That is right.

Q. Then the Rock Island Motor Transit Company was the successor to Otto?

A. That is right.

Q. What is the source of your inbound shipments from out-of-state points?

A. A good many, Rock Island, Moline, St. Louis, Chicago, just various points where I have to get my material.

Q. How frequently do you have shipments coming in to your place of business from those out-of-state points?

A. It is pretty frequent.

Q. Would it be once or twice a week?

A. Yes.

[fol. 1658] Q. Once or twice a day?

A. No; usually once a day. Sometimes shipments come in there in the evening from Davenport.

Q. You say you have had as high as two different shipments in one day via the Rock Island Motor Transit?

A. That is right.

Q. Do you have occasion to have shipments come in from out-of-state points which are in excess of 5,000 pounds in weight?

A. No.

Q. In other words, there might be several articles in a package shipment, but altogether they would not weigh in excess of 5,000 pounds?

A. That is right. The largest shipment I have would be the steam boilers for the average home, and they don't run that weight.

Q. Do you have any other motor truck service at Walcott than the Rock Island Motor Transit Company?

A. Not that I know of.

Q. In the event the Rock Island Motor Transit operations should cease or be curtailed, where would you go to place that business?

A. I don't know.

Q. Would your business be adversely affected if that service should be terminated or curtailed?

A. Some, yes. I like their service, you can depend on it pretty well.

[fol. 1659] Q. Would you say the service is satisfactory from the standpoint of the time element and the handling of claims for loss and damage?

A. It is.

Mr. Nolan: That is all.

Exam. Carpenter: Mr. Bradshaw you may cross examine.

Cross examination.

By Mr. Bradshaw:

Q. As I understand it, Mr. Lovewell, you have used the services of the Rock Island Motor Transit for the past 6 years and you are satisfied with the service.

A. That is right.

Q. And you haven't had any occasion to look around for any other type of service. Is that it?

A. No, I have never had any occasion to.

Mr. Bradshaw: That is all.

Exam. Carpenter: Any redirect?

Redirect examination.

By Mr. Nolan:

Q. Do any other motor carriers serve the town of Walcott, or have you observed any other trucks in there?

A. No, I have never observed any. Once in a while, and I don't know whether it is a common carrier or not, I see a semi in town occasionally.

Q. It is not one you would see in there regularly unloading merchandise to the different merchants?

[fol. 1660] A. No.

Q. Isn't it true that in a town like Walcott everybody knows what is going on around town?

A. I believe so. I know I can't do anything without it being known.

Mr. Nolan: That is all.

Mr. Bradshaw: Nothing further.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Howland: Is there anyone else here from Walcott, Iowa?

Will you please come forward and be sworn?

KENNETH HERBERT DIETZ was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. State your name, please.

A. Kenneth Herbert Dietz.

Q. Your home is in Walcott, Iowa?

A. Yes, sir.

Q. What business are you engaged in?

A. Banking.

Q. How long have you been located at Walcott in that business?

A. Since March, 1946.

Q. Do you have occasion, in connection with your business, to use the services of the Rock Island Motor Transit Company at Walcott?

[fol. 1661] A. Yes, sir.

Q. In what respect? What is the occasion for you having shipments either in or out of your place of business?

A. It would be inbound, bank supply shipments.

Q. With what frequency do you get shipments from outside of the State of Iowa?

A. Not too frequent.

Q. Most of your shipments come from points within the State of Iowa?

A. Locally, yes.

Q. So far as you are advised, is there any other truck line that renders any service of any kind to the town of Walcott than the Rock Island Motor Transit Company?

A. None whatsoever.

Q. On interstate shipments that you do have occasion

to receive from points outside of the State of Iowa, would there be some of those shipments that come from points like Chicago or other interstate points of origin?

A. That is right.

Q. About how frequent would such shipments occur?

A. Possibly once a month.

Q. Mr. Dietz, as far as you know is there any other carrier that is presently operating at Walcott that would render the service to that town that the Rock Island Motor Transit Company has been rendering to your community?

[fol. 1662] A. No.

Mr. Howland: I think you can cross examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No cross.

Exam. Carpenter: You may be excused.

(Witness excused.)

Mr. Howland: Mr. Sweany, please.

R. L. SWEANY was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. State your name, please.

A. R. L. Sweany.

Q. Where do you live, Mr. Sweany?

A. At Muscatine, Iowa.

Q. Your business is what?

A. General Secretary of the Chamber of Commerce.

Q. Muscatine, Iowa, is located on the westerly and northerly bank of the Mississippi River about how far from Davenport, Iowa?

A. Just about 30 miles south and west of Davenport.

Q. What is the population of Muscatine?

A. 20,000.

Q. What type of community is it with respect to whether there are any manufacturing and industrial projects there?

A. We have got a little industry; of course, we still con-

sider ourselves an agricultural community; but, as you [fol. 1663] might have heard, we are the button center of the world, we have the Celon company there, a manufacturer of plastics.

Q. And you have various types of industries there too, do you not?

A. Yes, grain processing and grain alcohol manufacturing.

Q. You have the Carver Pump Company there?

A. Yes.

Q. You have the Kent Feeds there?

A. Right; and the McKee Feed & Grain Company is there. We have the H. J. Heinz Company, Roach & Musser Sash and Door Company, and Huttig Sash and Door Company.

Q. Roach & Musser and Huttig are both large industries, are they not?

A. Yes, they are.

Q. Would you know about the number of employees each of those plants would approximate?

A. I would venture a guess of between four and five hundred employees each. That is the way we have them listed there.

Q. How large a plant does Celon operate with respect to personnel?

A. At the present time they are employing about 250 people; but they are in the process of moving their entire operation to Muscatine over from Madison, Wisconsin, so it will grow as time goes on.

Q. Now, the Heinz plant is a seasonal plant, is it not?

A. That is right.

[fol. 1664] Q. They have a large warehouse there, do they not?

A. Yes.

Q. What types of Heinz products do they manufacture?

A. They manufacture catsup, bean soup, all the different pickle products, they manufacture a tomato sause and chili sauce.

Q. And tomato soup?

A. Yes, they make tomato soup and also oven-baked beans.

Q. Now, with respect to the Carver Pump Company, what is their particular line of industry?

A. Their major line is industrial pumps. They make all types of water pumps. They design a pump to pump anything.

Q. That company is about how large a plant with respect to the number of employees?

A. I would say 250 to 300 personnel, quite a large operation. They do a world-wide business. They design pumps that might be sold in Egypt next week.

Q. You also have wholesale grocer concerns in Muscatine, do you not?

A. That is right.

Q. And you also have some— What is the fact as to whether Muscatine is also a vegetable-producing area?

A. Yes; we have what we call the Muscatine Island area, which is the sand flats south of Muscatine, where everything in the truck-gardening classification will be raised, everything from cabbage to carrots and so on down the line are raised.

[fol. 1665] Q. You say you are the General Secretary of the Chamber of Commerce of Muscatine?

A. That is right.

Q. About how many concerns make up the membership of the Chamber?

A. I would say firm memberships are probably around 300.

Q. I take it, in addition to these manufacturing and industrial concerns we have been talking about, you have the usual retail establishments and service establishments of various types?

A. We like to consider them a little bit better than usual.

Q. Well, you have such establishments?

A. That is right.

Q. Now, what transportation service is available by way of railroad facilities at Muscatine?

A. We have both Rock Island and Milwaukee, a joint agreement, I believe, using the same tracks through Muscatine.

Q. In fact, they use the same facilities as far as freight house and passenger station are concerned, do they not?

A. That is right. Their agent, I believe, is a joint agent.

Q. What do you have in the way of motor carrier facilities serving Muscatine?

A. Well, our major motor carrier in Muscatine, of course, is the Jim Poole Transfer. They serve daily the Minneapolis area and also into Chicago.

Q. Poole is a Chicago and Twin Cities operator from Muscatine?

A. That is right.

[fol. 1666] Q. Does Poole maintain a daily service from Chicago to Muscatine on less-than-truckload shipments?

A. It is my understanding that he does; now I may be wrong.

Q. Does Poole maintain any western service? That is to western points?

A. Not at all. He possibly does on a contract basis.

Q. But not on a regular route service?

A. No.

Q. And on shipments moving to Omaha or points west of Omaha or into that area, the only service available on a regular-route service would be the Rock Island Motor Transit Company?

A. That is right.

Q. What about the service to Kansas City and points south and west?

A. Well, again that would all be Rock Island Motor Transit, yes.

Q. Does the Burlington Transportation Company maintain any interstate service serving Muscatine?

A. It is my understanding that Burlington does come into Muscatine and will pick up and deliver. They have no terminal there, to my knowledge, nor do they do much business there at all.

Q. Now, the Poole Transfer has a terminal at Muscatine?

A. Yes, he does.

Q. And the Rock Island Motor Transit maintains a terminal at Muscatine?

A. That is right.

[fol. 1667] Q. Are you familiar with the character and the quality of the service which has been furnished you from out-of-state points by the Rock Island Motor Transit Company?

A. If I may ramble just a minute here? I came down here Tuesday; I was in a hearing of the Iowa Highway Commission at Ames when I heard about the hearing here and I was asked to come down by some of our users in Muscatine; Iowa.

Immediately upon my return to Muscatine I began to call some of these people I know, who used the Rock Island Motor Transit Company, to find out what effect the losing of such service would be on their business. I tried, in contacting them, to contact both our retail establishments and our industrial people, and I found, just generally speaking, it would be a catastrophe, as one man put it, if they should lose that service.

Q. Do you have a memorandum of the people you contacted with reference to the Rock Island Motor Transit service there?

A. Yes, I have. I wrote this all down because I wanted to be sure I would have the information you wanted when I got here.

Mr. Bradshaw: Just a moment. Do you want to limit this to questions and answers?

Mr. Howland: All right.

By Mr. Howland:

Q. I will ask you to give the names of some of the retailers and wholesalers and manufacturers with whom this matter was discussed by you as Secretary of the Chamber of Commerce.

[fol. 1668] A. Well, as far as retailers are concerned I talked with the Batterson Store.

Q. What is their line?

A. That is a department store. It is our largest department store there. I visited with a man in the Goodyear Service Store. In the wholesale grocer line I talked with Mull & Son, and with Carl Paetz, a wholesale grocer. As far as the manufacturers are concerned I talked with Barry Pulley Company, the Northern Gravel Company, the Piper Products Company, the Celon Company, Roach & Musser Company, and I talked with Brewer & Son, which is a furnace and plumbing company.

Q. On shipments from points to the south, southeast or southwest, does Poole handle any of those shipments except the ones that come through Chicago?

A. I believe not.

Q. With respect to these people who you contacted and who expressed interest in the continuation of the Rock Island Motor Transit service, do these concerns have inbound shipments into Muscatine from the west, south or southwest?

Mr. Bradshaw: Just a minute. I object to that on the ground it is purely hearsay. This information, if he did obtain it, was restricted to telephone conversations, it is not shown who the conversations were with, these people would be available as witnesses to testify in their own behalf, it is strictly a hearsay proposition, and irrelevant.
[fol. 1669] Exam. Carpenter: The objection is overruled.

By Mr. Howland:

Q. You may answer.

The Witness: Will you repeat that question?

(Question read.)

A. Yes, a great many of them do.

By Mr. Howland:

Q. Well, the Huttig Sash and Door Company has its headquarters, I believe, at Kansas City. Is there some movement of any kind between Kansas City and Muscatine in their case? Do you know?

A. I can't answer that question; I do not know.

Q. All right. Where does Celon get its material?

A. Most of it comes down from Madison, Wisconson; that is my understanding. I talked with them and they said they did use the Rock Island Motor Transit sometimes for materials coming in, but that a great deal of it comes in by rail. They have a spur right down at the plant.

Q. And their outbound shipments from Muscatine are handled in smaller quantities?

A. That is right.

Q. Are they interested in shipping into the territory to the west through the Omaha gateway?

A. Some of that is done, yes; they said about 5 percent of their business.

Q. How about the pump and these other concerns?

A. The Crawford Pump Company said between 1 and 2 percent is actually carried by motor transport, but, he said, [fol. 1670] if they should lose the service of the Rock Island Motor Transit it certainly would be detrimental to their business, because they do depend on it. May I offer something here?

Q. Do you have information from some other shipper?

Mr. Bradshaw: Just a minute. I object to voluntary statements on the part of the witness. This should be limited to questions and answers.

By Mr. Howland:

Q. I will ask you, Mr. Sweany, to give such additional information as is within your knowledge.

Mr. Bradshaw: I object to that type of questioning.

Exam. Carpenter: Objection sustained.

By Mr. Howland:

Q. Have you had any communications from any shippers or receivers of freight by motor carrier with respect to the continuation of this Rock Island Motor Transit service?

A. Yes, I have.

Q. And who were those from?

A. One was the Roy Brewer Furnace Company of Muscatine who depends 100 percent upon the Rock Island Motor Transit for its inbound——

Mr. Bradshaw: Just a moment.

By Mr. Howland:

Q. Where does Brewer get his supplies and merchandise from?

A. From Des Moines.

Q. That is intrastate?

A. It is all intrastate business.

[fol. 1671] Q. As far as he is concerned?

A. That is right.

Q. This hearing is devoted, of course, to the interstate question, which is separate and apart from——

Mr. Howland: I think that is all. You may cross examine.

Exam. Carpenter: You may cross examine, Mr. Bradshaw.

Cross examination.

By Mr. Bradshaw:

Q. The Crawford Pump Company, you say, ships via common carrier between 1 and 2 percent?

A. That is right.

Q. And all of these common carrier shipments are not just the ones restricted to this application, are they?

A. I don't know that I understand you on that. That is strictly Rock Island Motor Transit.

Q. That is both interstate and intrastate?

A. Yes, that is right.

Q. In other words, we are only interested here in the interstate portion. You understand that?

A. Yes.

Q. Is the same thing true with the 5 percent that you say Celon ships to the west?

A. That would be interstate.

Q. By west what do you mean?

A. Well, west, probably Omaha and Kansas City; that was the basis on which I was talking to him.

[fol. 1672] Q. What other carriers do they use to Kansas City?

A. I don't know.

Q. Do you know whether there is other transportation available to Kansas City other than the Rock Island Motor Transit?

A. Not to my knowledge via common motor carrier.

Q. Have you had any occasion to investigate?

A. Yes; I did everything I could to date to investigate.

Q. How about rail?

A. To Kansas City?

Q. Yes.

A. Well, these people I talked to on l. c. l. shipments——

Q. No; I am not talking about your clients now. I am talking about you as a traffic man, what information you have that is available with respect to rail service between Muscatine and Kansas City.

A. None direct from Muscatine, to my knowledge.

By Mr. Howland:

Q. Well, you mean on l. c. l. shipments.

A. No; I mean on just any of it. You are just speaking about service. Is that it?

By Mr. Bradshaw:

Q. My question covered the whole thing, but I will ask you to answer Mr. Howland's question, if you wish.

A. Not to my knowledge.

Q. In other words, you don't know.

A. That is right.

Q. Are there any other motor common carrier terminals [fol. 1673] in Muscatine other than the Poole Transfer and the Rock Island Motor Transit?

A. No, there are not. As I understand it, the other services I couldn't even find any one representing them; but there is a service station somewhere in town where stuff can be left to be picked up, where small shipments can be left.

Q. Does the Green Transfer come to Muscatine?

A. Yes.

Q. Do they stop there?

A. I couldn't find anyone there who uses the service.

Q. Do you know whether they have authority in there?

A. Yes, they have authority in there because they do come through.

Q. Are you familiar with which direction they come from to Muscatine?

A. No, I am not.

Q. How about Hedrick?

A. I know their operation comes through Muscatine.

Q. Do you know which direction they come from to Muscatine?

A. No, I don't.

Q. How about Keeshin? Do you know whether they come into Muscatine?

A. I don't believe they do.

Q. Does Knaus come into Muscatine?

A. No, they don't.

[fol. 1674] Q. Now, Western serves Muscatine from Chicago. Is that right?

A. That is right. They come through.

Q. I believe you have already testified that Muscatine is served by the Milwaukee and Rock Island Railroads.

A. That is right.

Q. Now, is the Rock Island Motor Transit freight station or terminal located in the railroad station occupied by the Milwaukee and Rock Island Railroads?

A. The have a freight house.

Q. Is it in connection or in conjunction with the freight depot of the Rock Island Railroad?

A. I believe so. I am not sure.

Q. You think they are probably housed in the same building?

A. I think they have a joint operation on that.

Q. Do you know whether or not the Rock Island rail freight agent is the same person as the Rock Island Motor Transit freight agent?

A. No; they are two different people.

Q. But they occupy the same space?

A. I believe they are in the same offices.

Q. Does the Rock Island Motor Transit have a pickup and delivery service in Muscatine?

A. Oh, yes.

Q. And do you know whether or not that pickup and delivery service also picks up and delivers rail freight?

[fol. 1675] A. No, I don't know that they do. I would imagine so, but I can't say— I would rather say I don't know.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Now, with respect to the rail service, both the Rock Island and the Milwaukee operate to Kansas City from Muscatine, do they not?

A. On the trackage coming through Muscatine?

Q. Yes.

A. Well, I am not going to answer one way or the other. I haven't used the service and haven't been there long enough to know.

Mr. Howland: That is all. Thank you.

Mr. Nolan: I have some questions.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: Back on the record.

By Mr. Nolan:

Q. Mr. Sweany, you were asked about the service of the Hedrick Motor Freight Line. That is a north and south operation between Burlington and Muscatine, is it not?

A. I am not sure of the directions at all. The operation is through the town.

Q. In regard to the Rock Island Motor Transit Company, what is the fact as to whether or not the Rock Island [fol. 1676] Motor Transit Company is the only company that provides a local service in intrastate service between Muscatine and Davenport? That is a fact, isn't it, that that is the only company that offers that service?

A. Yes.

Q. What is the fact whether or not you made any survey or have given any consideration to the matter of the necessity in an industrial town such as Muscatine, where you have so many small companies, having a carrier serving that community which has not only an agent there but whose rate information is available and who has facilities for tracing shipments and for making claims for lost and damaged items?

A. Those are vital services and are available there.

Q. You have a number of small industries and, then, you have some sizable industries. Is it true that many of the small industries do not have a traffic department?

A. That is true.

Q. And they do depend upon the carriers, do they not, for rates and classifications and routings?

A. Yes.

Q. You say the Rock Island Motor Transit and the Poole Transfer are the only two concerns which have offices there and have rate and classification and routing information?

A. That is right.

Q. And that Poole operates from Chicago via Muscatine [fol. 1677] to the Twin Cities and does not give any westbound or southwest service?

A. That is correct.

Q. What is the fact whether or not the Rock Island Motor Transit would be the only agency which would have rate information, routing information and information of that character for your industries, which do not have traffic departments, on shipments moving through the Omaha gateway or the Kansas City gateway?

A. That is right. It is very important.

Q. You use the Rock Island Motor Transit agency for that information, do you not?

A. Yes, sir.

Q. And do you do that because you have inquiries from some of your members?

A. That is right. That is done in answer to those inquiries we receive.

Q. And if it were not for the Rock Island Motor Transit Company giving service on shipments destined to the west and southwest, then you would have to seek that information from Davenport or somewhere else?

A. We have contacted Davenport as well as Mr. Poole.

Q. Is Mr. Massey still there?

A. I talked directly with Jim Poole who is a freight man.

Q. But for routing and interline information and things of that nature to the west and southwest you have called the Rock Island Motor Transit for that information?

[fol. 1678] A. That is right.

Q. Where there are many shipments going out from Muscatine is it necessary to have the facilities for tracing shipments as well as having facilities for making claims for lost and damaged items?

A. Yes. It has been very important.

Q. In event of the loss of the transportation service of the Rock Island Motor Transit, if that condition should be imposed upon both intrastate and interstate service, what would be the effect on industrial business in Muscatine? That is taking into account the loss of rate, routing, classification and claim information attendant upon such service.

A. Good service or the lack of it can either make or break a community. If that service were folded up and nothing else to take its place it would practically fold up the town.

Mr. Nolan: That is all.

Mr. Bradshaw: That is all.

Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Howland: Mr. Gould, please.

JAMES A. GOULD was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Your name is James A. Gould?

[fol. 1679] A. That is right.

Q. You live at Muscatine?

A. I do.

Q. What is your business?

A. I am a grain buyer, manager of the grain department for the McKee Feed and Grain Company and the Hawkeye Soy Products Company, and I also look after the traffic work of both companies.

Q. Those are affiliated companies?

A. They are.

Q. As far as ownership and managers are concerned?

A. That is right.

Q. You have lived in Muscatine for how long?

A. Ten years.

Q. Are you familiar in a general way with the business and industries carried on there as to transportation available?

A. I am to a certain extent.

Q. What is the business of these two concerns for which you have been acting in connection with traffic matters?

A. Well, the McKee Feed and Grain Company is engaged in the buying and selling of grain and manufacturing livestock feeds, and we also are engaged in grain shipping both by rail and barge.

Our Hawkeye Soy Products Company grinds and crushes soy beans and makes soy bean oil and soy bean meal therefrom. The soy bean meal is used, of course, in livestock feeds.

Q. Does the McKee Grain and Feed Company process [fol. 1680] and distribute livestock feeds?

A. Yes.

Q. And that is one of the two concerns engaged in the feed business on a large scale at Muscatine?

A. In Muscatine, yes, sir.

Q. You have a competitor there?

A. We have.

Q. Mr. Kent of the Mississippi Valley Grain Company?

A. That is right.

Q. Now, Mr. Gould, do your companies for which you act have any occasion to make shipments of either an inbound or outbound character by motor freight service?

A. Yes, occasionally. I would say once or twice a week.

Q. What, generally, is the type and character of those shipments?

A. Well, I would say we receive shipments of machinery from outside of the state.

Q. In your plants you have a more or less continuous movement of parts and equipment and machinery?

A. For processing the soy bean meal and feeds.

Q. From what points do you have those shipments coming in?

A. They are from Michigan, Ohio, Kansas, St. Louis; I would say as a rule from the east and occasionally from the west and at times from Minneapolis and St. Paul.

Q. What service have you used in connection with the [fol. 1681] transportation of those shipments?

A. Both the Rock Island Motor and Jim Poole.

Q. What has been the character, generally speaking, of the service that you have received from the Rock Island Motor Transit Company?

A. Good.

Q. You heard the testimony of Mr. Sweany, did you not?

A. Yes, sir.

Q. About Poole's operations?

A. Yes, sir.

Q. Poole has no operations through the Omaha territory nor through Kansas City, does he?

A. No; I don't think he has any operating rights there.

Q. His operations are confined, are they not, through Chicago and from the Twin Cities into Muscatine?

A. That is right.

Q. Would a termination of the interstate service of the Rock Island Motor Transit Company or the substantial reduction in the quantity of it affect the business of the companies that you represent at Muscatine?

A. Well, it would hurt it.

Q. Would you explain why this is so?

A. Well, of course, for instance, on our Kansas shipments I don't know how we would get the stuff in there. As far as Chicago and east is concerned, they would naturally have to go to Poole, and Poole at times has [fol. 1682] not been giving us too good a service. Well, I don't know what we would do with the bulk of our shipments; so coming from Chicago and east I don't know what we would do.

Q. What has been your observation with respect to Poole's service, particularly on the smaller shipments, on the l. t. l. shipments? Has it been somewhat limited in volume because of a limited amount of equipment?

A. I think so.

Q. I take it, then, that it would be your judgment, as a shipper and receiver of freight, shipments would require

a continuation of the Rock Island Motor Transit service?

A. It most certainly is. I think it would result in a tremendous loss of business to the people of our town if that service should be curtailed or abandoned.

Q. Mr. Gould, are you a member of the Chamber of Commerce of Muscatine?

A. I am a member and on the Board of Directors.

Q. Have the membership of the Directors of the Chamber of Commerce contacted some of the other industries that operate in Muscatine with respect to this subject?

A. I have.

Q. Can you tell us some of those that you have contacted about it?

Mr. Bradshaw: Just a moment. I object to this on the [fol. 1683] ground it is purely hearsay.

Exam. Carpenter: The objection is overruled.

A. I have contacted the Hedrick Manufacturing Company and they told me they were using motor truck more than they formerly did. They formerly put out nothing but straight carloads, but apparently they are frequently doing some l. c. l. and l. t. l. shipping.

I contacted the Northern Gravel Company which are heavy processors of gravel for concrete for waterworks and certain chemical companies.

Q. Filter sands?

A. Filter sands; and they are very much surprised at the volume they do. But they have a large volume of l. t. l. shipments of filter sands or cleaning sands to various chemical industries.

Q. Do you know, as a matter of fact, in what territory the Northern Gravel Company sells and distributes those products and whether they do any shipping in a westerly direction?

A. They go to the west, and I know they go as far east as Cincinnati. I also contacted our Post Office agent. I happen to live at a hotel right by the railroad station and I see Rock Island Motor Transit trucks bring in a good volume of mail every morning early, and I find that same truck returns east to Rock Island about 11 o'clock every day. The curtailing of that service would be a hardship on

the merchants of our town if the Rock Island Motor Transit suspended that mail service.

[fol. 1684] Mr. Howland: I think you may cross examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No cross examination.

Exam. Carpenter: You will be excused.

(Witness excused.)

Exam. Carpenter: We will take a recess at this time.

(Recess.)

Exam. Carpenter: You may proceed.

Mr. Nolan: Mr. Smith, please.

THOMAS H. SMITH was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Please state your name, your address and your occupation, please.

A. Thomas H. Smith, Clinton, Iowa; Traffic Manager, Clinton Foods, Inc.

Q. How long have you been so engaged?

A. For 29 years.

Q. What is the general nature and character of your company?

A. We are known as wet processors of corn. In other words, the corn is steeped and it is manufactured into corn sugar, corn starch, dextrone and by-products of animal feed.

Q. Does your company have national distribution?

A. We do.

Q. What other allied companies are connected with [fol. 1685] Clinton Foods, Inc.?

A. We are known as Clinton Foods, Inc., the juice industry, which I don't really think enters into this question, but I will mention it. It includes the juice industries throughout Florida and the Snow Crop marketeers which

produce products at point of production all over the United States; they are frozen under this Snow Crop label.

Q. You speak of the juice industry. I assume you refer to citrus and grape juices?

A. That is right.

Q. Are any of those juices shipped to Clinton in quantity and recanned there?

A. That is right.

Q. Then you distribute them out of Clinton?

A. That is right.

Q. Are these corn products distributed out of Clinton?

A. They are.

Q. So far as this case is concerned, you understand this involves the operations of the Rock Island Motor Transit Company out of Clinton for such points as Omaha, Kansas City, Lincoln, Nebraska, the west and southwest territories?

A. That is right.

Q. And also from Clinton to Chicago and other points east?

A. Yes, sir.

Q. You have appeared at these hearings many times, [fol. 1686] Mr. Smith, in the past?

A. I have.

Q. Just state for the record the interest of your company and allied industries in these proceedings.

A. Well, as far as the Rock Island Motor Transit is concerned, I don't believe there is a day we don't have less than six l. t. l. lots going over the route in question for points beyond Kansas City and Omaha and into Arkansas. In addition to those products we also refine from corn *corn* and soy bean oil, and we produce cooking and salad oil in 5-gallon tins and in 55-gallon drum lots.

We also manufacture from corn sugar what is known as electic acid which is used in ice cream factories and drugstores of which we move at least three shipments a week to Houston, Texas, and which is handled by the Rock Island Motor Transit through Kansas City.

In addition to that we also have steeped water, which is the water left after the corn has been softened, and that moves to various points, even as far as Berkeley;

California, and San Francisco, in not too many truckloads but in l. t. l., trucklots and l. c. l. rail.

We have a continual flow of pumps and pump parts from San Francisco, which has moved I would say for 5 years and which has been handled by the motor carrier known as P. I. E. to Kansas City and the Rock Island Motor Transport beyond.

[fol. 1687] We also ship seed in lots of 3,000 to 5,000 pounds to points like Kansas City, Omaha and Lincoln, which is handled direct by the Rock Island Motor Transit. In return there is a continual flow of empty drums from points in the south and southwest daily which also comes in via the Rock Island Motor Transit Company.

Q. What are these High Sea products?

A. That is print jade which goes out 100 percent by truck. It is a concentrate shipped in from Florida in refrigerator cars.

Q. In bulk?

A. In 55-gallon drums, and that is thrown into vats with sugar and stuff added and is made into candy for kids.

Q. Is that canned in commercial-sized cans?

A. In 12 ounce and 46 ounce cans.

Q. Now, your company has been using the Rock Island Motor Transit Company, has it not, since it first started to serve Clinton?

A. Yes, sir, and its predecessor.

Q. Who was its predecessor?

A. The White Truck Line.

Q. What has been the character of the service of the Rock Island Motor Transit Company as being satisfactory or otherwise?

A. Good.

Q. And you say you have a regular flow out of Clinton by the Rock Island Motor Transit Company to the territory it serves in interstate commerce?

A. That is right.

[fol. 1688] Q. And you also use the Rock Island Motor Transit Company for shipments to Iowa interstate points—I should have said to Iowa intrastate points?

A. Extensively.

Q. Would you tell us the population and general industrial and business character of Clinton, Iowa?

A. It has a population of about 32,000; it has many varied industries, DuPont getting a new plant there; and there is Dairypac, Curtis, and many other small manufacturing plants.

Q. Doesn't Pillsbury have a large manufacturing plant there?

A. That is right.

Q. You have barge service from both the Twin Cities and the Gulf, do you not?

A. They don't use barge service yet.

Q. Do you have a dock?

A. Yes.

Q. What would be the effect on your company's business if the Rock Island Motor Transit Company service was abandoned or substantially curtailed in the regularity of its service?

A. Well, it would be very destructive to us and many of our customers.

Q. Do you know of any other transportation facilities that could give you the same quality of service the Rock Island Motor Transit renders to the south and southwest?

A. I presume there are others.

[fol. 1689] Q. Have you been offered equivalent service to that of the Rock Island Motor Transit through the Kansas City gateway to the west and southwest?

A. I have.

Q. Was that service as comparable as that of the Rock Island Motor Transit Company?

A. There was an additional hauler interlined with the Rock Island Motor Transit Company.

Q. But I am asking, from an all-over service, from your experience you have had, has any other company offered you the same direct service that the Rock Island Motor Transit has?

A. There are a few, but they are not dependable.

Q. From the standpoint of rates, routings and claims, has the Rock Island Motor Transit service been satisfactory?

A. It has.

Q. Do you have any shipments in excess of 5,000 pounds?

A. We do.

Q. Are you familiar with the fact the Rock Island Motor Transit is presently restricted to 5,000-pound shipments?

A. No, I am not.

Q. That is on shipments out of the state.

A. No, I am not.

Q. That hasn't been called to your attention?

A. No.

Q. If such a restriction were to continue on, what effect [fol. 1690] would it have on your business?

A. If we couldn't find anyone else to take its place it would, no doubt, cripple our business. We have a new juice about a year and a half old and business in its sale and distribution is growing.

Q. I believe you stated you have a regular flow of traffic out of your plant at Clinton to those points in the west and southwest moving by the Rock Island Motor Transit Company.

A. That is right.

Mr. Nolan: You may cross examine.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Mr. Smith, would you give the names of those other carriers you use to the west and southwest out of Clinton?

A. Oh, I have used Dorn in connection with Watson, Burlington Transportation in connection with any line between Clinton and the Tri-Cities, Western Transportation, Carstensen through Cedar Rapids and down. We have had as high as 800 trucks in and out of our plant in a month. I keep a very close check on that, not that we mistrust them.

Q. The Rock Island Motor Transit, in other words, does not now handle all of your west-bound traffic, does it?

A. No, sir.

Q. Who handles your shipments of over 5,000 pounds to the west?

[fol.1691] A. Well, Southwest comes in there and they have the rights, and then there is Dorn in connection with other lines through St. Louis. We just had one the other day to Memphis that went Dorn strictly. We have a lot of contract trucks in there hauling for our customers. Poole is in there in contract. There is Moore and Green.

Q. I believe you stated you were not aware there was such a restriction on interstate commerce on the Rock Island Motor Transit as a 5,000-pound maximum limitation.

A. I didn't pay any attention to it.

Q. So it has not bothered you to date?

A. No. I would hate to offer them over 5,000 pounds, but perhaps I would learn something.

Q. Of course, you are aware, are you not, there is plenty of transportation between Clinton and Chicago?

A. Plenty.

Q. And you have no problem between the Twin Cities and Clinton?

A. No.

Q. Do you use Keeshin?

A. Between Clinton and the Twin Cities?

Q. Yes.

A. No. We use the H. & W. mostly; we have used the Rock Island Motor Transit.

Q. Do you use any rail service?

A. No l. c. l. to speak of.

[fol. 1692] Q. Well, all these carriers you have mentioned since I have been talking to you, do you use them on l. t. l. as well as truckload?

A. We aim to hold our l. t. l. truck business to the lines that maintain terminals in Clinton, Iowa.

Q. And what lines are those?

A. Carstensen, Dorn, Rock Island Motor Transit, Western Transportation. I believe that is all.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. You made a statement that you attempt to have the carriers which maintain terminals in Clinton handle your less-than-truckload shipments.

A. That is right.

Q. Would you state why you do that?

A. Because that means ready service, they are there; we don't have to go out of the way to get hold of them; we get them on the phone and the truck is there immediately to pick the merchandise up.

Q. How about tracing outbound shipments and the handling of claims on the lost and damaged shipments?

A. I believe it is much more beneficial to us.

Q. In other words, do you find, where you have an agency terminal right there in Clinton, that you get better service on routings and claims and tracing and things of that character?

[fol. 1693] A. We do.

Q. How many employees do you have at your Clinton plant?

A. About 1,300.

Q. You are the traffic manager and I assume you have several employees working under you?

A. That is right.

Q. How many?

A. Thirteen.

Q. And they do the detail work?

A. Yes, sir.

Q. You are just the traffic manager?

A. That is right; I am just there.

Mr. Nolan: That is all.

Mr. Bradshaw: That is all.

Exam. Carpenter: That is all. You will be excused.

(Witness excused.)

Mr. Nolan: Mr. Shaw, please.

A. C. SHAW was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. You are Mr. A. C. Shaw?
A. Yes, sir.
Q. And you live at Clinton, Iowa?
A. Yes, sir.
Q. And you are the traffic manager of Curtis Company, Inc.?
[fol. 1694] A. Yes, sir.
Q. How long have you been so engaged?
A. Six years.
Q. What traffic experience have you had?
A. I have been in traffic work since 1922; as a railroad agent and operator for the Burlington Railroad, was with the Western Weighing and Inspection Bureau, with the Farm Crops Processing Corporation in Omaha.
Q. And you have been with Curtis Company, Inc., for the last 6 years?
A. That is right.
Q. What is the general nature of the business of the Curtis Company?
A. Manufacturer of building wood-work house frames of all types.
Q. Is that ordinarily referred to as sash and door?
A. That is right.
Q. What is the size of the Curtis Company with regard to the number of employees engaged in the business at Clinton?
A. At Clinton we have about 575 employees.
Q. Does your company have other plants than at Clinton?
A. We have eight other branches.
Q. Where are they located?
A. Topeka, Kansas; Lincoln, Nebraska; Sioux City, Iowa; Minneapolis, Minnesota; Wausau, Wisconsin; New London and Oconto, Wisconsin; and Chicago, Illinois.
[fol. 1695] Q. Mr. Shaw, does your company have occa-

sion to make outbound shipments in l. c. l. or l. t. l. quantities?

A. Yes, sir.

Q. Has your company used the services of the Rock Island Motor Transit Company since you have been at Clinton?

A. Yes, sir.

Q. Has that been a regular use of that service?

A. Regular service. They are our major hauler to the southwest and west.

Q. You say the Rock Island Motor Transit Company is your major hauler of shipments to the southwest and west?

A. Yes, sir.

Q. To what particular territories have you used the services of the Rock Island Motor Transit Company?

A. To all points in the southwestern part of the United States through Kansas City, and to all points west of the Missouri River through Omaha.

Q. State what would be the ordinary size of the shipments which you regularly have transported over the Rock Island Motor Transit Company lines to those territories you mentioned.

A. Most of them would be under 5,000 pounds.

Q. Do you have occasion to make shipments in excess of 5,000 pounds?

A. Very seldom.

Q. Are you familiar with the weight limitation the Rock [fol. 1696] Island Motor Transit Company is now working under?

A. Yes, sir.

Q. Has that interfered with your use of the services of the Rock Island Motor Transit Company since that restriction of maximum weight limitation has been in effect?

A. None whatsoever.

Q. If the Rock Island Motor Transit Company had authority to handle shipments in excess of 5,000 pounds, would there be occasions then your company would use that service?

A. It might be possible. I don't know though. At the

present time I doubt it. At the present time we are in the process of making a survey to determine the practicability of making shipments in 10,000-pound lots.

Q. If you do establish such shipments, would you, if it is made possible, use the service of the Rock Island Motor Transit into the territories you described?

A. Yes.

Q. Has the service of the Rock Island Motor Transit Company out of Clinton been a daily service?

A. I would say it is daily. We forward approximately 300,000 pounds a month by motor freight. There is hardly a day passes that they don't pick up at our plant.

Q. That is Rock Island Motor Transit freight?

A. That is right.

Q. Do you know of any other carrier that is giving the [fol. 1697] same character of service to the territories you described as through the Omaha and Kansas City gateways that the Rock Island Motor Transit gives?

A. No.

Q. And you do have a number of truck lines operating in and through Clinton, Iowa, do you not?

A. Any other service would be joined with that of another carrier.

Q. It would have to be an interline operation?

A. That is right.

Q. What would be the effect on your company's business with respect to shipments through the Omaha and Kansas City gateways if the services of the Rock Island Motor *Company* Transit Company were abandoned or substantially curtailed?

A. Well, for one thing it would delay our shipments, probably cause more damage because of transfer, and our shipments would be more difficult to trace. Our customers would be dissatisfied with the service.

Q. Have you had occasion to make shipments between your plants, such as the one at Lincoln, Nebraska, and Clinton?

A. Yes, sir.

Q. How about between Minneapolis and Clinton? Do you use the Rock Island Motor Transit from Minneapolis?

A. We don't use it very often; there are only just occa-

sional shipments and most of that is handled by H. & W.
[fol. 1698] Q. Evidently that service is satisfactory or you would not use it?

A. That is right; it is very satisfactory.

Q. Now, the fact that the Rock Island Motor Transit Company maintains a terminal and agent and rate information and routing information and so on and so forth at Clinton, is that a service that is available to your company?

A. That is very decidedly a service. It makes it much easier to handle claims, trace shipments, order trucks in, arrange for pickup and delivery. When a company has no terminal or office in a town it is very difficult to use it. In fact, we don't use them.

Q. Do you have any inbound shipments coming in by motor truck?

A. Yes, sir.

Q. Are those handled by the Rock Island Motor Transit?

A. We have some handled by the Rock Island Motor Transit that come in from the east through Chicago.

Q. How about a shipment, say, from Lincoln, Nebraska, to Clinton?

A. Shipments from Lincoln would normally come Rock Island Motor Transit; and we have irregular shipments from some of our dealers who might be returning some material for some reason.

Q. You have dealers such as lumber yards?

A. Lumber companies.

Q. Throughout the entire midwest territory?

A. The entire United States.

[fol. 1699] Q. Do you use the services of the Rock Island Motor Transit Company on shipments to your dealers in the Iowa territory?

A. Yes, we do.

Q. Is it essential to the proper distribution of your merchandise to have that service to Iowa points as well as to interstate points?

A. It is as essential as it is beyond; that is especially true in the southern part of the state.

Mr. Nolan: You may cross examine.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Mr. Shaw, you have available in Muscatine the same motor carrier services as Mr. Smith testified to here?

A. Yes, sir, that is right.

Q. And that applies to carriers going to the west as well as such cities as Chicago?

A. That is right. We also use Union Freightways, which was not mentioned.

Q. Do you know of any other carriers besides Union Freightways, Carstensen, Rock Island Motor Transit, Western, and Dorn that have terminals in Clinton?

A. I don't know whether Keeshin maintains a terminal there or not, but they maintain an office, they have a telephone and a girl; but other than that there are no others.

Q. What territory does Keeshin serve out of Clinton?

[fol. 1700] A. They serve many points in Iowa; they serve all points in the east. We don't use them. I might qualify that statement——

Mr. Bradshaw: Just a moment. I believe that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Nolan:

Q. There is a statement you said you wanted to qualify. What was that, Mr. Shaw?

A. I said we didn't use Keeshin. That is because some of the motor carriers are very difficult to deal with regarding claims, and we have not been successful in handling claims with them favorably, so we just don't use them.

Q. You mean you don't like their service?

A. That is right. Their service is not satisfactory.

Mr. Nolan: That is all.

Mr. Bradstreet: Nothing further.

Exam. Carpenter: That is all.

(Witness excused.)

Mr. Nolan: Mr. Tolman, please.

G. Robert Tolman was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Your name is G. Robert Tolman?
A. Yes.
Q. You live at Clinton, Iowa?
A. Yes, that is right.
[fol. 1701] Q. And you are connected with the Eclipse Lumber Company?
A. Right.
Q. How many yards does your company have in the State of Iowa?
A. They have about 35 yards here in Iowa.
Q. What is your position with the company?
A. Well, I am not termed as the traffic manager; I more or less set up a traffic department for them. Even though we are shown in the lumber business as a wholesaler, we set up a small traffic department for them. We have a complete file of tariffs. I have worked with some of the industries on routings and rates where we found we could be of assistance. We audit all our own bills and claims.
Q. What is your title or capacity with the Eclipse Lumber Company?
A. It is along the same line of work as that of a traffic manager, although I am not called a traffic manager.
Q. How long have you been connected with the company?
A. Three years.
Q. Do you understand, in general, the nature of this application?
A. Yes.
Q. Does your company use the services of the Rock Island Motor Transit Company into and out of Clinton?
A. Yes, we use it into and out of Clinton, and we use it to perhaps one-fourth of our 35 yards in Iowa.
Q. Do you have yards at any of the points between [fol. 1702] Davenport and Omaha, Nebraska?

A. Directly on Highway 6?

Q. Yes.

A. Actually on Highway 6 we only have one yard.

Q. Where is that located?

A. That is at Adel, west of Des Moines.

Q. How about points which are adjacent to or off of Highway 6 served by the Rock Island Motor Transit?

A. We have several points such as Columbus Junction, Washington, Lone Tree, Fairfield, Kalona which are served by the Rock Island Motor Transit Company.

Q. Those are line yard companies?

A. That is right.

Q. You say you have a yard at Lone Tree?

A. Yes, sir.

Q. Do you have one at Kalona?

A. Yes. We have a yard at Dixon, Dow City, Lenox, Winterset.

Q. Do you have yards at points such as Exira or Audubon?

A. No.

Q. Or is that the S. Hansen Lumber Company yards?

A. I believe that's right.

Q. Insofar as this case is concerned, where you have these yards at points such as Lone Tree, Kalona, Fairfield, Columbus Junction, Washington, Dixon, Dow City, Lenox, does your company use the services of the Rock Island Motor Transit to those points?

[fol. 1703] A. Yes, we do.

Q. What products do you handle at these yards you have mentioned that would move via the Rock Island Motor Transit rather than by rail car?

A. Well, the smaller shipments such as paint, millwork, special orders of millwork, small items of steel, fencing, all merchandise like that. The only things that would not move by motor truck would be mostly carload shipments of lumber and shingles and cement, more or less larger items shipped in carload lots.

Q. Do you have a daily flow of traffic into these yards?

A. Yes. I would say roughly there must probably be 200,000 pounds at least of truckload shipments alone go into these yards.

Mr. Bradshaw: Are you talking about interstate or intrastate commerce?

Mr. Nolan: I was going to develop that.

By Mr. Nolan:

Q. What is the fact as to whether or not a large amount of these shipments are shipments that come from out-of-state points to these local yards?

A. Shipments that would come from Chicago and points east would come to Clinton via the Rock Island Motor Transit; also a lot of shipments going down through the southwest, southwest from St. Louis, would probably move by Dorn to Davenport and then via the Rock Island Motor Transit to points in southwestern Iowa as well as to the southwest. Shipments moving through Kansas City and Omaha to the southwest and west would be interstate movements.

[fol. 1704] Q. Let's take one of your typical yards, say, for instance, at Kalona, Iowa, and there is a shipment of hardware supplies and building supplies moving in less-than-truckload quantities, do they move out of Clinton to such a point as Kalona or do they move from point of supply?

A. From the shipper's place of business.

Q. And those shipments coming from outside of the state may go to any yard owned by your company? Is that right?

A. That is right.

Q. So there are interstate shipments to all those yards in the various towns you referred to? Is that right?

A. Right.

Q. In regard to shipments in and out of Clinton, do you have any traffic moving in interstate commerce over the Rock Island line?

A. Yes, we have shipments that come from the west into Clinton that would probably move via Rock Island line and from the south through St. Louis, also from Chicago; although a lot of our busi- from Chicago and east does come through Carstensen and Rock Island Motor Transit Company.

Q. Where your company is most vitally interested and where it would be very drastically effected, if there was a

termination of the services of the Rock Island Motor Transit, would be in these small towns, wouldn't it?

A. That is right.

[fol. 1705] Q. You are appearing here primarily in the interest of the continuation of the service of the Rock Island Motor Transit to these points like Kalona, Columbus Junction and Adel and points where you have lumber yards, are you not?

A. Yes, to have the Rock Island Motor Transit service continued to all those points which it serves. To abandon or curtail that service would affect us because we would not be able to get the shipments as quickly as we get them now.

Q. Does your company, not only at Clinton but at these other line yard places, have shipments moving in in excess of 5,000 pounds?

A. Not as a rule, although we do have a fair amount of truckload shipments in; but the major share of the truck shipments are l. t. l.

Q. Has your company used the Rock Island Motor Transit Company for small shipments as well as truckload shipments in the past?

A. Yes.

Q. And if the Rock Island Motor Transit rights are restored where they can handle your truckload shipments, will your company have occasion to use that service in the future?

A. There is a possibility of it.

Q. Would that depend on the source of the freight and so on?

A. That is right, the source of the merchandise, the points of origin.

Q. Do you know of any other service than that of the Rock Island Motor Transit which is available to such points as [fol. 1706] Kalona and Columbus Junction and points like that?

A. Well, for instance, down at Columbus Junction the Rock Island is the only carrier that serves that yard—the same is true at Lone Tree—and I don't believe they have been solicited by anyone else, and their service has always been satisfactory both from a claim angle and as far as arrival time of the merchandise is concerned.

Q. When you say "their service" you are referring to the Rock Island Motor Transit service?

A. Right.

Q. Does the fact the Rock Island Motor Transit has an agency at Clinton assist you in your traffic problems?

A. Yes. We always find it better to use a carrier with an office and terminal right in the same town.

Q. Does your company have occasion to make shipments out of Clinton to Iowa points?

A. Yes, we do. There are also some intrastate shipments from Clinton to Iowa destinations which might be interstate in character.

Q. Do you use the Rock Island Motor Transit service for those Iowa shipments out of Clinton?

Mr. Bradshaw: Just a moment.

A. Sometimes, yes.

Exam. Carpenter: Strike the answer.

Mr. Bradshaw: That is objected to on the ground it is [fol. 1707] irrelevant.

Exam. Carpenter: Objection sustained.

Mr. *Norton*: The intervenors represented by me propose to show by the witness, if permitted to answer the question, that shipments are handled by the Rock Island Motor Transit out of Clinton to line yard points which are interstate in character, and that the Rock Island Motor Transit service is the only service available at certain points where this company has yards.

Mr. Bradshaw: I object to Mr. Nolan's testimony.

Exam. Carpenter: That is an offer of proof, Mr. Bradshaw.

Mr. Nolan: That is all.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. As I understand it, you are satisfied with the service of the Rock Island Motor Transit Company?

A. Yes.

Q. Into these small-town lumber yards along Highway 6 and adjacent thereto?

A. Right.

Q. And you have had no occasion to seek out any other carriers who can perform this service?

A. No, we really haven't.

Q. And you haven't done so?

A. No. There have been times when we have gone outside and gotten other carriers to haul truckload shipments [fol. 1708] such as Certainteed products and U. S. Gypsum products; we have gone outside and used contract carriers who can haul it at jobber's rates.

Q. Have you had occasion to use any other carriers into towns such as Adel, Columbus Junction, Fairfield and Kalona?

A. Yes; the Burlington performs some service in there too.

Q. Any other carriers?

A. None I would say right offhand.

Q. Do you know of any you could use?

A. No.

Q. In other words, you haven't familiarized yourself with that?

A. Well, there might be some local contract carriers. They would not be common carriers.

Q. Have you had occasion to use the services of the Iowa-Nebraska Transportation Company?

A. Very seldom.

Q. But you have used them?

A. We have used them, yes, from the southwest, but very seldom.

Q. Now, your shipments in excess of 5,000 pounds in weight into these towns such as Adel, Columbus Junction, Fairfield and Kalona, are rather rare, aren't they?

A. Yes.

Q. However, you have gotten them in when you have had shipments in excess of 5,000 pounds, haven't you?

A. Most of those shipments would be truckload shipments which in most cases are by contract carriers between shipper and consignee.

[fol. 1709] Q. Do you use a considerable contract carrier service in your business?

A. A fair amount; however, not a great deal.
Q. Do you maintain any trucks of your own?
A. Yes, we do. They haul between our own yards where we have been trying to cut down large inventories. It has worked out pretty successful.

Mr. Bradshaw: I believe that is all.
Exam. Carpenter: Redirect.
Mr. Nolan: That is all.
Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Howland: Mr. Stolley, please.

HAROLD STOLLEY was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name?
A. Harold Stolley.
Q. Your home is where?
A. In Clinton, Iowa.
Q. Your business is what?
A. Terminal Agent for the Rock Island Motor Transit.
Q. The Rock Island Motor Transit Company has what facilities in Clinton in the way of pickup and delivery service, and how many pickup and delivery trucks do you have? [fol. 1710] A. We have one pickup and delivery truck there at all times; and we get trailers and tractors out of Davenport, we have one that comes up regularly every day.
Q. Davenport is a sort of center of the operations as far as the eastern part of the state is concerned, is it not?
A. What we call the hub.
Q. And there are units of equipment available at Clinton?
A. That is right.
Q. How far is Clinton from Davenport?
A. Approximately 40 miles.
Q. How many people do you have working for the Rock Island Motor Transit at Clinton?

A. I have an office girl and myself, and the driver comes up daily from Davenport and goes back at night.

Q. Your pickup and delivery driver does not live in Clinton?

A. No, sir.

Q. He performs the pickup and delivery service and then takes the road unit back to Davenport? Is that right?

A. That is correct.

Q. About what time does the truck destined from Davenport to Clinton leave Davenport?

A. 7 o'clock.

Q. 7 a. m.?

A. Yes, sir.

Q. And arrives there somewhere a little after 8 a. m.? [fol. 1711] A. Between 8 and 10 depending on how much stuff he peddles between Davenport and Clinton.

Q. Now, the Rock Island Motor Transit facilities there, are they located in the same building as the Rock Island Railroad freight house?

A. They have a joint freight house, the Burlington and the Rock Island; we have the back end of the freight house for our office and dock.

Q. But the freight house itself is owned by the C. B. & Q. Railroad?

A. That is correct.

Q. About what time does your over-the-road unit leave Clinton for Davenport?

A. He is scheduled to leave at 4 o'clock but sometimes he leaves as late as 5 depending on the volume of freight to be picked up that day.

Q. And if you need additional units of equipment to handle your business, I take it, you could and do get those out of Davenport?

A. That is right.

Q. Now, the service out of Davenport to points east is the service to Chicago. Do you perform next day delivery to Chicago?

A. Next morning.

Q. Does your man who comes up from Davenport perform any pickup and delivery service for the railroad at Clinton?

A. Yes.

[fol. 1712] Q. What other rail carriers are there in Clinton besides the Burlington Railroad and the Rock Island?

A. The Milwaukee and the Northwestern.

Q. And the Milwaukee operates from the Twin Cities down through Clinton and thence to Kansas City. Is that right?

A. That is right.

Q. And that is the main line of the Northwestern east and west?

A. Yes.

Q. Is there a unit of equipment there which you operate part of the time?

A. Oh, yes, we perform frequent pickup and delivery service.

Q. You handle pickup and delivery services as the occasion requires?

A. That is correct.

Q. And this pickup and delivery unit which you operate, it stays right there in Clinton all the time?

A. That is right.

Q. And the over-the-road man takes it back but he performs pickup and delivery service from about 9 o'clock until 4 in the afternoon?

A. That is right.

Mr. Howland: That is all.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Now, Mr. Stolley, as I understand it, you have a [fol. 1713] pickup and delivery truck that you operate out of your office that stays in Clinton all the time?

A. That is right.

Q. And you pick up both rail freight and truck freight on that same truck?

A. That is right.

Q. And then a man comes up from Davenport with a bigger truck, the Rock Island Motor Transit truck?

A. That is right.

Q. And you load that rail and motor freight on to his truck and he then takes it to Davenport?

A. That is right.
Q. You don't pick up any rail freight for the Burlington?
A. No.
Q. Or the Northwestern?
A. No.
Q. Just for the Rock Island Railroad?
A. That is right.
Q. I suppose they sometimes will send up more than one truck?
A. As the business warrants.
Q. Do you yourself operate that truck in Clinton?
A. Yes.
Q. You drive it yourself?
A. That is right.

Mr. Bradshaw: I believe that is all.

[fol. 1714] Redirect examination.

By Exam. Carpenter:

Q. Is the truck that is maintained at Clinton the only truck that is used for pickup and delivery service?
A. Well, the one that comes up from Davenport is used too.
Q. You use the over-the-road truck also for pickup and delivery service?
A. Yes.

Exam. Carpenter: Any redirect?
Mr. Howland: That is all.
Exam. Carpenter: The witness is excused.

(Witness excused.)

Exam. Carpenter: We will recess for lunch until 1:30 p. m.

(Whereupon, at 12 Noon, a recess was taken, the hearing reconvening at 1:30 p. m., as follows:)

Afternoon Session 1:30 p. m.

Exam. Carpenter: We are reconvened. You may proceed.
Mr. Howland: I will call Mr. Triggs.

FRED TRIGGS was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. You may state your name; and in giving your answers please speak out so we can all hear you, Mr. Triggs.

A. All right. Fred Triggs is my name.

Q. Spell it.

A. T-r-i-g-g-s. I live in Des Moines, Iowa, my office is at [fol. 1715] 200 Plymouth Building, Des Moines.

Q. You live in Des Moines and you- office in Des Moines?

A. Yes, sir. I have lived here since 1919.

Q. What is your business?

A. I operate as a manufacturers' agent.

Q. Just what type and character of business generally have you been conducting in recent years?

A. To be very brief, a few years ago the factories used to have one man represent them in a large territory; the last few years several companies used one man to represent related lines in a smaller territory.

Q. What particular commodities do you sell?

A. Heating and plumbing equipment.

Q. Heating and plumbing equipment has been the principal items of merchandise?

A. Yes, sir. Most of it is from Chicago and Hartford, Connecticut, and Waukegan, Illinois.

Q. In the last few years have you been operating in particular where the shipments have been made direct from the factory with which you are associated to the purchaser or wholesaler?

A. Most cases are that way. About 5 or 10 percent of it comes to me and I handle it for emergency or to try to even up an uneven flow of material.

Q. Generally speaking, what type and character of transportation have you used in connection with these shipments [fol. 1716] direct from the manufacturer to your wholesaler or customer?

A. Until I was sort of halfway stopped doing it, I was using the trucking system mostly.

Q. And that was the truck line of the Rock Island Motor Transit?

A. I used them mostly.

Q. And were those shipments made in truckload lots for the most part?

A. I would say for the most part, no. I would have probably one-third of them truckload, and the rest was what, I believe, you would call l. c. l., small shipments.

Q. And would some of those shipments range above 5,000 pounds?

A. In 5,000-pound lots, and also in quantity shipments of more than 5,000 pounds. Practically all boilers are above 5,000 pounds.

Q. So your shipments might range from 100 pounds up to——

A. To 20,000 and 30,000 pounds.

Q. Up to a full truckload?

A. Yes, sir.

Q. And those shipments were made, you say, from those points of origin outside of the State of Iowa which you have detailed?

A. Everything is from outside of the State of Iowa except what small amount I ship from my own emergency stock.

Q. And that would be a relatively small amount?

A. Yes, sir.

Q. Now, effective in August of 1951, you are aware, of [fol. 1717] course I take it, that the Rock Island Motor Transit Company since that date has been operating subject to certain weight limitations?

A. I found that out, sir.

Q. Has that weight limitation had any effect on your business operations?

A. I would say it has caused me considerable inconvenience and a little extra expense.

Q. Just explain why that has been true.

A. Well, I would ship a load in by railroad and in the end it consumed a lot of extra time and was an added expense for me.

Q. About how much difference in time is there on a shipment from, say, Waukegan, Illinois, by railroad as compared with the service you had previously by truckload?

A. Strange as it may seem on one occasion I had several boilers shipped from Waukegan to Des Moines which arrived here between 2 and 3 weeks after shipment; one took 2 weeks; I had one a year ago from Waukegan to near Des Moines which took pretty nearly 3 weeks. I don't think that should be necessary. It seems that is what I have to contend with.

Q. That is the experience you have had in making rail shipments?

A. Yes, sir.

Q. In other words, most of those rail shipments that you have made is mostly merchandise already sold?

A. Yes, sir, and I am waiting for it; once in a while it is very urgent. For instance, there was one boiler that broke [fol. 1718] down and they ordered a new one and I called the factory. Sometimes a few hours make a great deal of difference in the delivery; I mean the damage to the property due to lack of heat.

Q. Well, in some instances, I take it, you have had these shipments made to a wholesale house as a matter of putting the shipments in stock, and in other instances the shipments are made on what we call an advance sale or when they have, in fact, already been sold and it is a matter of immediate delivery.

A. That is right. Some they are in no hurry for and others are strictly emergency.

Q. How have you been handling these shipments you formerly made in quantities in excess of 5,000 pounds, Mr. Triggs?

A. I beg your pardon. I didn't get that.

Q. How have you been making these shipments in excess of 5,000 pounds that you formerly made by the line of the Rock Island Motor Transit Company?

A. I hunted around and found some other carrier that will handle it. There was one exception and that was where I tried carload shipment by rail.

Q. And you have had unfavorable experience in attempting to get shipments in by rail?

A. I don't like to say anything against another trucking line. My experience was very satisfactory with the Rock Island Motor Transit and I use them for that reason.

Q. Has it been quite as satisfactory when you have been [fol. 1719] dealing with other trucking concerns, without naming any names?

A. It doesn't seem so to me, sir. I would like to not explain some of those sad experiences I have had.

Q. Well, Mr. Triggs, based on your experience and on your business, do you feel that there is a need for the type and character of service on your heavier shipments that were formerly handled for you by the Rock Island Motor Transit Company?

A. If you will let me answer it in my own way I would say, "Please let me ship the way it was before the restriction went in and I will be happy about it". I would like to have the privilege of shipping full truckloads via the Rock Island Motor Transit Company.

Q. And you have not found any other service that is satisfactory?

A. In all cases, no, sir. In some cases, far from it.

Q. Now, these shipments that you have from eastern points such as Hartford, Connecticut, is that type and character of merchandise customarily stocked by any dealer here in the City of Des Moines?

A. It is stocked by wholesale houses to a certain extent but, of course, they cannot carry the complete line.

Q. Are there certain items on which you, as the manufacturer's agent or representative, are the source of supply for these contractors and dealers as well as the wholesalers?

A. I don't hardly catch just what you mean.

Exam. Carpenter: Read the question.

[fol. 1720] (Question read.)

A. Part of the equipment I sell goes into the jobber stock, and a large part of it that is already sold by the wholesale house is shipped direct to the dealer and delivered direct to the job.

By Mr. Howland:

Q. I take it you make sales direct to the contractors where the new buildings are under construction?

A. I had the invoice through the wholesale house. The shipment goes direct to the contractor.

Mr. Howland: You may cross examine.
Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Did all this traffic come into Des Moines?
A. No, sir, not all; all my business don't.
Q. Are you familiar with this application of the Rock Island Motor Transit Company?
A. I am not trying to evade the question. I understand they are trying to get the privilege of hauling a full load.
Q. I mean, do you understand the territory involved here.
A. Not in detail, no, sir. I am not in the transportation business only as a user.
Q. Well, maybe we can get at it in this way: What points other than Des Moines along Highway 6 between Davenport and Omaha do you serve?
A. Iowa City, Cedar Rapids, Grinnell, Newton, Des Moines; some west but not in such a large volume on No. 6.
[fol. 1721] Q. That is where the wholesale houses are?
A. No; that is the cities where the jobs are. The wholesale houses are at Moline, Davenport, Iowa City, Cedar Rapids and Des Moines. Possibly one-half to two-thirds of my shipments go to the job rather than into the jobbers' stocks.
Q. You recently, then, had jobs at Iowa City, Grinnell and Newton?
A. Within the last year at all of them.
Q. How about within the last 6 months?
A. Most of them.
Q. At those points?
A. Yes, I have had some into every one of those points.
Q. Within the last 6 months?
A. Yes.
Q. Have you had any shipments over 5,000 pounds to any one of those points in the last 6 months?
A. Not in those points outside of Des Moines.
Q. Des Moines is the only point where you have had

shipments heavier than 5,000 pounds within the last 6 months?

A. May I qualify that statement?

Q. Certainly.

A. Part of it I couldn't get delivery on that quantity.

Q. Where was the point you couldn't get delivery on?

A. I mean I couldn't get shipments from the factory over 5,000 pounds.

[fol. 1722] Q. It was not a transportation problem?

A. No. The reason I didn't have over 5,000 pounds was the fact they wouldn't release larger shipments at that time. Since that time I have been able to get larger shipments.

Q. Well, then, it has only been since the restriction was put on that you have had occasion to look for transportation on shipments over 5,000 pounds into Des Moines. Is that right?

A. On the Hartford connection that is correct; on the Wa-kegan connection I have a shipment now coming into Newton.

Q. How is that coming?

A. It is over 5,000 pounds and I want to use a truck.

Q. Who is bringing it in?

A. I haven't decided yet.

Q. Have you made any investigation to see who could bring it in?

A. Not yet.

Q. You are not very much concerned about it?

A. I will find out before I have it shipped.

Q. You don't have any trouble finding a shipper to bring a shipment from Waukegan into Des Moines, do you?

A. No.

Q. Who did you use on those shipments?

A. In the past?

Q. In the past 6 months.

A. Well, I guess I haven't had any between here and there in the last 6 months.

[fol. 1723] Q. How about between Hartford and Des Moines?

By Exam. Carpenter:

Q. You said between here and there. You mean——

A. Between here and the Tri-Cities; that is the limit of my territory.

Exam. Carpenter: Please read the question.

(Question read.)

A. I haven't had a shipment of over 5,000 pounds from Hartford except to Des Moines.

By Mr. Bradshaw:

Q. Who carried that shipment for you?

A. That came in on the Rock Island Railroad.

Q. Did you attempt to get trucker shipment on that?

A. No, sir.

Q. Do you know what the truck service is between Hartford and Des Moines?

A. Some of them; I don't know them all, sir, just a few of them.

Q. Could you name a few of them?

A. As much as I could I used Spector to Chicago, Rock Island Motor Transit to Des Moines.

Q. Let's go back, now. If you were looking for a carrier that could carry a shipment over 5,000 pounds in weight to Des Moines from Hartford, do you have any in mind you could use?

A. Why, I guess Des Moines Transit, Watson, Western——

Q. In other words, there are a number of them, aren't there?

A. There are some more, yes.

[fol. 1724] By Exam. Carpenter:

Q. Out of Chicago?

A. Yes. I had such an experience the other day. I didn't look around until I had to.

By Mr. Bradshaw:

Q. That is what I am getting at. You have been satisfied with the Rock Island Motor Transit service and haven't had occasion to look around for other service.

A. That is right.

Q. And you are not here saying service is not available?

A. I will add I have had a little unfavorable experience.

Q. But you are not here saying service is not available?

A. No, sir.

Q. By that I mean, there is service available from all the points from where you ship into Des Moines?

A. Of some kind, you mean?

Q. Yes.

A. I would call up the Rock Island and they would tell me who could handle it.

Q. Just a moment.

A. I don't know sir.

Q. In other words, you depend on the Rock Island to tell you who to ship by?

A. There are towns to which I don't know the service and I call them up and ask them who to ship by.

Q. I take it from your testimony that on your l. t. l. shipments you use the Rock Island exclusively.

[fol. 1725] A. As much as I can.

Q. And by the same token you have had no occasion to look for other transportation?

A. That is right, sir.

Q. But you are aware there are other carriers operating between Waukegan and Iowa City that could carry your line of merchandise?

A. Yes.

Q. And between Waukegan and Grinnell?

A. Yes.

Q. And between Waukegan and Newton?

A. Yes.

Q. You mentioned that you had a 3-week delay on a boiler a year ago. Is that correct?

A. I didn't mean to state it quite that way, because I haven't used that service for a long time.

Q. Just a minute. Answer my question. Is it correct that you had a 3-week delay on a boiler a year ago?

A. Maybe it was longer than that, sir.

By Exam. Carpenter:

Q. Was it a 3-week delay or did it take 3 weeks to get the service?

A. It took 3 weeks to get it from Waukegan to Des Moines. That is what I meant to say.

By Mr. Bradshaw:

Q. Now, you complained that on these emergency shipments there was some damage due to lack of heat. Can you [fol. 1726] give me a specific instance?

A. I didn't mean to say it quite that way. I meant to say in the winter time, when the heating plant breaks down, delivery is extremely important. In most cases they avoid damages by making temporary provision to heat some way, sometimes at a great deal of expense. I couldn't set out any special case where they suffered damage.

Q. In other words, you have been able to get your goods into this territory one way or another?

A. Do you want me to answer that my way?

Q. I want you to answer it yes or no.

Mr. Howland: Go ahead and answer it your own way.

Exam. Carpenter: Go ahead and answer it to suit yourself.

A. This last winter I didn't have an emergency I couldn't take care of from the factory because I had it in Des Moines.

By Mr. Bradshaw:

Q. In other words, you were well stocked?

A. There was one occasion when I had the emergency call at 9 o'clock in the morning and at 11 o'clock the Rock Island was taking it to Grinnell. I appreciate that kind of service.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Mr. Triggs, without naming the particular carriers you say you have had some difficulties in shipping with, describe what those difficulties have been, by example if you [fol. 1727] care to or in general terms.

Mr. Bradshaw: Just a moment. I want to object to that unless it is limited as to time.

Mr. Howland: I am speaking of within the last 7 months, since August of 1951.

A. I haven't had any trouble in the last 6 months.

By Mr. Howland:

Q. Well, did you have difficulties prior to that with other companies in the transportation field?

Mr. Bradshaw: Objection on the ground the questions calls for something too remote in time to the issue here; it is irrelevant.

Exam. Carpenter: I think it should be limited to some time.

By Mr. Howland:

Q. Well, within the period of the last two years have you had difficulties with other transportation companies?

Exam. Carpenter: The objection is overruled.

By Mr. Howland:

Q. You referred to some instance, as I recall. I am not asking you to name the carrier, but just tell us what your experience has been in getting service on these less-than-truckload quantities from other carriers.

A. The worst experience I had was a matter of 5 pieces weighing a total of about 1,000 pounds. I carry my stock on certain items at my home in a double garage. They billed five pieces. My wife signed the freight bill for four pieces and they delivered three. I contacted the people; they said, "Our record shows three pieces". I said, "Why [fol. 1728] did you have my wife sign for four pieces?" The next day they brought one piece and asked my wife to sign the receipt. The next day they brought the fifth piece, but they didn't ask for my wife's signature on the receipt. Those pieces evidently must have got separated, which could happen.

Mr. Howland: I think that is all.

Exam. Carpenter: Any recross?
Mr. Bradshaw: No recross.
Exam. Carpenter: You will be excused.

(Witness excused.)

Mr. Howland: Mr. Louberto, please.

LOUIE LOUBERTO was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Please state your name.
A. Louie Louberto.
Q. Where do you live?
A. Des Moines, Iowa.
Q. What is your business, Mr. Louberto?
A. Traffic manager for Brown-Camp Hardware.
Q. How long have you worked for that concern?
A. Since 1929.
Q. The Brown-Camp Company is the wholesale house right across the Des Moines River from the Federal Building and you can see the warehouse and store from this location, can you not?
[fol. 1729] A. That is right.
Q. Mr. Louberto, what is the business of the Brown-Camp Company?
A. We deal in wholesale hardware. Our transportation covers the entire State of Iowa and a few points in Missouri.
Q. And that is the general line of hardware and some appliances?
A. That is right.
Q. You have a line of gas stoves, I believe?
A. Yes, we do.
Q. And paints?
A. That is right.
Q. You have your shipments coming into your wholesale house here from what general territory?

A. Well, mostly from the eastern part of the United States.

Q. I take it that your business consists in selling to dealers in the territory that you generally described?

A. That is right.

Q. So that you are interested in both your inbound business from your points of supply to Des Moines, Iowa, and in the transportation from Des Moines to the dealers' locations?

A. That is right.

Q. Who generally controls the routing on your inbound shipments?

A. We do.

Q. You specify the type and character of shipping that you desire?

A. That is right.

[fol. 1730] Q. And who is it that controls the routing on your outbound shipments from your plant here?

A. Well, it is generally the dealer.

Q. And as a matter of service to the dealers you respect their routings?

A. That is right.

Q. Do you have accounts in the territory between Davenport on the easterly border of the State of Iowa through to Omaha, Nebraska, at points on and adjacent to U. S. Highway No. 6?

A. Yes, we do.

Q. What type and character of transportation service do you use for getting your inbound shipments in?

A. Well, the greater precentage of our inbound shipments come in in carload lots; however, in recent years we have gone to truckload shipping.

Q. Is that true from points like Chicago and farther east?

A. That is right.

Q. You understand, Mr. Louberto, that in this application the Rock Island Motor Transit Company seeks permanent authority to render service in interstate commerce to points located between Davenport, Iowa, and Omaha, Nebraska, most of which are on or adjacent to U. S. Highway No. 6 such as Muscatine, Cedar Rapids and certain other off-route points, do you not?

A. Yes, I understand that.

Q. All right. In what way are you interested in this application?

[fol. 1731] A. Well, from our distribution standpoint on shipments from Des Moines to our dealers in the territory between East Moline, Illinois, and Omaha, Nebraska. We have dealers in both of those towns you mentioned as well as the other intrastate movements from Des Moines.

Mr. Bradshaw: Just a minute. You are getting into intrastate commerce. I want to move the answer be stricken insofar as it pertains to intrastate movements.

Exam. Carpenter: It may be stricken.

By Mr. Howland:

Q. Mr. Louberto, you now have the service of the Rock Island Motor Transit Company available to you both for inbound movements to Des Moines and outbound movements into the general dealer territory. That is true, is it not?

A. That is right.

Q. And in the event the Rock Island Motor Transit interstate service is restricted and limitations are imposed upon that operation, will that have any effect, in your judgment, on the over-all service which the Rock Island Motor Transit Company may be able to render you in both interstate and intrastate transportation?

A. Yes, I believe it would.

Q. Why is that so?

A. Well, if that restriction is placed on their service, I don't believe they will be able to render the service that we are enjoying now, or rather did enjoy when they didn't [fol. 1732] have the restriction on l. t. l. shipments.

Q. You are aware there is a 5,000-pound restriction?

A. But I am speaking of shipments below 5,000 pounds on our outbound shipments.

Q. All of your outbound shipments are less than 5,000 pounds each?

A. That is right.

Q. But on your inbound shipments what is the fact?

A. Some are full truckloads, others are 10,000 or 12,000 pounds depending on the commodity.

Q. And with respect to your inbound shipments are you affected by that 5,000-pound restriction?

A. Well, not necessarily; although it would be inconvenient sometimes where we have established a regular movement.

Q. Well, prior to August 1951 did you have any instances that you have in mind where you had established a regular movement from point of origin to Des Moines, Iowa, over this route?

A. Yes, we had some that were regularly established routes.

Q. What did you do in order to get that business handled?

A. We had to give it to another carrier.

Q. Well, did that have any effect with respect to the operation of your business down here?

A. Well, not necessarily to our business. So far as the Rock Island Motor Transit was concerned it had some effect on their business.

[fol. 1733] Q. What do you mean by that answer? Explain that in a little more detail.

A. Well, if they were restricted to handling shipments of less than 5,000 pounds, which would reduce their tonnage and their business as far as we are concerned on the interstate movement, there is a possibility the intrastate service would be curtailed on account of the loss of the interstate business; therefore, we would be at a loss to make the usual good service to our dealers on Highway No. 6 and towns adjacent to Highway 6 in Iowa.

Q. Now, Mr. Louberto, do you have occasion to make what sometimes is referred to, I believe, as overhead shipments where a dealer places an order with your concern here in Des Moines and the shipment is made direct from the manufacturer or the factory to the dealer's establishment, say, at Oskaloosa or Muscatine or Davenport or Atlantic Iowa?

A. Yes, we have occasion for direct service on direct shipments as we call them.

Q. About how frequently does that occur?

A. Well, it depends. I can't tell you how frequently it might be; it depends on the availability of the merchandise. Sometimes we can't carry enough merchandise in

our own stock in Des Moines and we wire or call the factory and they can make a shipment directly to our dealer.

Q. Is that the usual and ordinary method of handling your business on larger orders?

[fol. 1734] A. Well, in our case it depends on the commodity.

Q. Well, in the case of certain types of merchandise?

A. That is right.

Q. On shipments of that character, which you have referred to as direct shipments destined to points on or adjacent to Highway 6 across the State of Iowa, what carrier or carriers do you specify?

A. On the direct shipments to those points?

Q. Yes.

A. Usually the Rock Island Motor Transit because they are the direct carrier and can give the best service.

Q. You have followed that practice in the past?

A. That is right.

Mr. Howland: I think that is all I have.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Let's see if I have this picture right, Mr. Louberto. On inbound it is mostly carload or truckload?

A. That is right.

Q. And you are getting service on that at this time?

A. Well, yes, we are getting service, but in some cases——

Mr. Bradshaw: Just a minute.

Mr. Howland: Just a minute. I insist the witness be permitted to answer.

Mr. Bradshaw: He did answer. I didn't ask him to make a speech. I am asking him to answer the question.

[fol. 1735] Mr. Nolan: Let him explain his answer.

Exam. Carpenter: Read the question and the answer.

(Question and answer read.)

Exam. Carpenter: Let it stand the way it is.

By Mr. Bradshaw:

Q. What carriers are you using on your inbound truckload shipments from the east?

A. You want the specific carriers?

Q. Yes.

A. Well, since we haven't been able to use the Rock Island Motor Transit Company, we are using Des Moines Transportation Company.

Q. Is that the only one?

A. That is the principal one.

Q. What are the others?

A. We don't like to use the others if we can use——

Q. What are the others?

A. Occasionally we have used Western Transportation Company; but we don't like to use those carriers.

Q. I would appreciate it, Mr. Louberto, if you would just answer my questions and not comment on them.

A. O. K.

Q. Now, we have as an answer to my last question that you use the Des Moines Transportation and the Western Transportation companies. Do you use any other carriers on your inbound shipments from the east?

A. We don't specify it. Occasional-y the shipper will [fol. 1736] use a route——

Mr. Bradshaw: Read the question.

(Question read.)

Exam. Carpenter: The answer to it is "No".

A. No, we don't specify the route.

By Mr. Bradshaw:

Q. All right: Do any other carriers bring your inbound shipments to the Brown-Camp Hardware Company here in Des Moines from the east?

A. Yes, they do.

Q. What are the names of those carriers?

A. Well, at one time or another probably all of them that operate into Des Moines.

Q. And that is quite a number?

A. Well, there are quite a few. Possibly not every one of them but probably the majority of them.

Q. What are the points you ship to out of Des Moines in interstate commerce?

A. Moline and Omaha.

Q. Those shipments, as I understand it, are all l. t. l.?

A. That is right.

Q. And less than 5,000 pounds?

A. Yes.

Q. Are they less than 3,000 pounds?

A. Well, sometimes they might run over 3,000 pounds.

Q. Approximately what percentage runs over 3,000 pounds?

[fol. 1737] A. Oh, probably— Maybe 25 percent.

Q. What percentage runs over 2,000 pounds?

A. Well, I couldn't very well say without making a detailed study on that.

Q. Are there any points you ship to in interstate commerce?

A. Well, no, as far as this application here is concerned. Occasionally we will send a shipment back to one of our factories.

Q. That would be in the east?

A. Yes, Chicago and east.

Q. And you would have the same transportation facilities going back as you have coming? Is that right?

A. That is right.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Mr. Louberto, you started to say that in some cases shipments had come in by other lines than the Des Moines Transportation Company. What was it that you desired to add to that answer?

A. I don't remember now just what the question was.

Q. Well, the question was, as I recall, what transportation companies perform service other than the Des Moines

Transportation Company to the Brown-Camp Company from points east of the Mississippi River; and you started to make some answer with respect to the routing or something of that sort. Do you recall what that was?

[fol. 1738] A. Well, in some cases the factory don't follow our routing instructions and they give it to a different carrier in Chicago.

Q. What reason is there for not using these other carriers you referred to other than the Des Moines Transportation Company?

A. Because they do not have intrastate service to help us out on our intrastate shipments.

Q. Is it true, then, you have followed the policy of patronizing the carriers with your truckload shipments in interstate commerce where the carrier also has intrastate transportation availal e?

A. That has been our policy for the last 10 years.

Mr. Howland: I think that is all.

Exam. Carpenter: Recross.

Mr. Bradshaw: No recross.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Howland: Mr. Shartnack, please.

Leo Shartnack was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Leo Shartnack.

Q. Do you live here in the City of Des Moines, Mr. Shartnack?

A. I live in West Des Moines.

[fol. 1739] Q. Your business is what?

A. Well, I work as a clerk for the Des Moines Drug Company at the present time.

Q. In what business is the Des Moines Drug Company engaged?

A. It is in the wholesale distribution business of drugs, chemicals, turpentines, linseed oils and numerous sundry items.

Q. What, if anything, do you have to do with respect to the distribution of the shipments of the Des Moines Drug Company, Mr. Shartnack?

A. You mean what have I to do in connection with them?

Q. Yes; what is your part of the work?

A. Well, at the present time I more or less engage in the work of routing those orders, outbound orders. Prior to the 1st of February I was shipping clerk.

Q. Now, the Des Moines Drug Company is engaged generally in the wholesale drug business in the lines you have told us about?

A. Yes, sir.

Q. You have, of course, both an inbound transportation service and an outbound service for the distribution of your products, do you not?

A. That is right.

Q. Have you had anything to do with the inbound movement of shipments into Des Moines?

A. I have done no actual routing of those shipments, no. I have worked in the capacity where I have seen the service rendered and the way the merchandise does come.

[fol. 1740] Q. How is that merchandise handled inbound to the Des Moines Drug Company? By what transportation agencies?

A. Well, we us the truck lines and the railroads.

Q. You have a warehouse and distribution center located on Fourth Street in Des Moines?

A. That is right.

Q. Do you have occasion to have truckload shipments of merchandise come into your plant?

A. We have several— Well, I wouldn't say we have complete truckloads, but three or four shipments a month which may run to a truckload. Most of the time they are less than a truckload. Other than that it is mostly all l. t. l. by truck.

Q. Do some of those shipments exceed 5,000 pounds in weight?

A. Yes, sir.

Q. Prior to August 1951 what carriers handled those shipments into the Des Moines Drug Company plant?

A. Well, from the east we have used Rock Island and Des Moines Transportation Company, Western, and several other lines which I can't recall right now.

Q. If the Rock Island Motor Transit Company were able to handle shipments in excess of 5,000 pounds from points outside of the State of Iowa, would your company use that service?

A. Yes, sir, I believe they would.

Q. Generally speaking, how has the service on such shipments prior to August 1951 compared with the service [fol. 1741] rendered by other truck companies? Has it been satisfactory or otherwise?

A. As far as I know it has been satisfactory. However, I am not in a position to know the exact date of the orders nor the date those shipments were forwarded, having not done the ordering. I receive the merchandise but I could not tell the exact elapsed time.

Q. You have what is sometimes referred to as direct shipments from the manufacturer to a particular dealer located in a town in Iowa, do you not?

A. We do have, yes, but none that would exceed the 5,000-pound limit.

Q. Now, the Des Moines Drug Company sells generally to dealers engaged in the drug business at retail in the State of Iowa and to some extent outside of the State of Iowa direct, I take it. Is that true?

A. Well, most of it is in the boundaries of the state.

Q. Does that include the territory between Des Moines and Davenport and between Des Moines and Omaha, the towns located on or near U. S. Highway No. 6?

A. Yes, it does.

Q. Are there occasions when those direct shipments may be made from out-state points of origin to dealers located on that highway and in the manner you have described?

A. I don't quite understand that.

[fol. 1742] Exam. Carpenter: Read the question.

(Question read.)

By Mr. Howland:

Q. Do you have occasion to make these direct shipments from an out-state manufacturer direct to a dealer in this territory that is covered by this application?

A. Well, on direct shipments I would say no, very seldom. I would say occasionally.

Q. You don't have many direct shipments from the factory to the dealer?

A. No.

Mr. Howland: You may cross examine.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Mr. Shartnack, who in the firm of the Des Moines Drug Company specifies the carriers?

A. The buyers usually in ordering. I understand that would be on inbound merchandise.

Q. On inbound, yes.

A. Our buyers would do the specifying of the carrier.

Q. Prior to coming up here have you discussed this matter with the buyers?

A. No, sir, I haven't.

Q. That was your answer to Mr. Howland's question as to the use of the Rock Island Motor Transit Company, in case the restriction was lifted, purely speculation on your part?

[fol. 1743] A. That is, it has been used in the past.

Q. In other words, you gave that as a statement of an employee as an observation and that is all?

A. Yes, that is true.

Q. You would not have any say as to policy in regard to that, would you?

A. No, sir, I do not have.

Q. The fact of the matter is that the policy might be laid down even by the buyers' head, mightn't it?

A. Yes, that is right.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Mr. Howland: Nothing further.

Exam. Carpenter: That is all. You will be excused.

(Witness excused.)

Mr. Howland: Mr. Brody, please.

LEON BRODY was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Please state your name.

A. Leon Brody.

Q. Mr. Brody, you live here in Des Moines and have for many years?

A. Yes, sir.

Q. You are connected with the Brody Manufacturing concern on Court Avenue?

[fol. 1744] A. Yes, sir.

Q. In what capacity are you connected with that concern?

A. Oh, buyer, seller, everything.

Q. I believe it is being operated at this time by a cousin of yours, Mr. Julian Brody, isn't it?

A. Yes, sir.

Q. What business is carried on there?

A. We buy merchandise, get it in and then distribute it.

Q. Do you have many manufacturing operations there now?

A. No, we don't.

Q. What types of business do you deal in?

A. Mainly men's wares, underwa*re*, hosiery, shirts, all outer garments, clothing, no men's suits.

Q. Do you handle a line of work clothing?

A. Yes, sir.

Q. Are you familiar with the shipping?

A. Somewhat.

Q. Particularly on inbound shipments of merchandise?

A. Well, yes, inbound and outbound both.

Q. Where are your principal suppliers of merchandise that you handle there located?

A. Throughout the country. It might be any place south, east.

Q. How are those shipments customarily made to your place of business from the points of origin?

A. Well, railroads, trucking companies, carloading companies.

[fol. 1745] Q. In what quantities do those shipments customarily move?

A. Oh, I would say they run from 100 pounds up to 1,000 pounds on an average.

Q. Do you ever have full truckload shipments of merchandise?

A. Very rarely.

Q. It would be a rather rare occasion when you did have them?

A. Yes.

Q. Have you in the past used the services of the Rock Island Motor Transit Company on inbound shipments?

A. On inbound, yes, sir.

Q. How has that service been with respect to being satisfactory or otherwise?

A. Well, it has been quite satisfactory because we have quite a little personal contact with them and keep after them.

Q. What about your outbound movements? In what territory do you sell your merchandise?

A. Throughout Iowa, Nebraska, the Dakotas, Missouri and Minnesota.

Q. Do you have dealers handling your merchandise lines in eastern Nebraska?

A. Yes.

Q. I take it you do have occasion to make shipments from your place of business here in Des Moines through what we refer to as the Omaha gateway?

A. Yes, sir.

[fol. 1746] Q. What lines have handled that business for you and are now handling it?

A. Oh, I don't know; we used to have direct shipping to Lincoln, also to Omaha. The Rock Island said they would

give us overnight service, and all at once they cut off our overnight service to those two points so we had to find someone else. It is very important to have quick shipping if you can get it.

Q. When was that overnight service discontinued?

A. About 6 months ago was when we had our trouble.

Q. And if that overnight service were available to Omaha and Lincoln, would you patronize the Rock Island Motor Transit Company?

A. Yes.

Q. I take it you have no shipments into that territory, generally, where they are large volume shipments in excess of 5,000 pounds?

A. No, we don't have.

Q. About how frequently did you use this service prior to the time you used the overnight service which was discontinued?

A. Well, the orders came rather indefinitely; sometimes it would be once a month, maybe once a week.

Q. Your need for service was dependent, of course, on the flow of orders, but there was a continuing business in that territory?

A. Yes, we have business in that territory.

Mr. Howland: That is all.

Exam. Carpenter: Cross examine.

[fol. 1747] Cross examination.

By Mr. Bradshaw:

Q. Mr. Brody, do you know the name of the carrier that is handling those Nebraska shipments right now?

A. I think it is the Watsons.

Mr. Bradshaw: That is all.

Mr. Howland: That is all. Thank you, Mr. Brody.

Exam. Carpenter: You will be excused, Mr. Broday.

(Witness excused:)

Mr. Nolan: Mr. Griffith, please.

R. M. GRIFFITH was sworn and testified as follows:

Direct examination.

By Mr. Nolan:

Q. Give us your name, place of residence and occupation, please.

A. R. M. Griffith. I work for Luthe Hardware Company; the address is 1450 East Aurora, Des Moines.

Q. What is your position with the company, Mr. Griffith?

A. Traffic Manager.

Q. How long have you been associated with the company?

A. For 24 years.

Q. I understand the Luthe Hardware Company is a wholesale dealer in hardware and allied supplies. Is that correct?

A. Yes, sir.

Q. It is one of the oldest establishments here in Des Moines, isn't it?

[fol. 1748] A. Yes, sir.

Q. I believe your company serves throughout the State of Iowa and the midwest here supplying local dealers. Is that true?

A. Outbound to most of the State of Iowa, not all.

Q. Where is your source of supply of the most of your incoming shipments?

A. Well, Chicago and east mostly.

Q. How do those shipments come in?

A. Carload quantities, truckload quantities. On small shipments it counts up to truck and carload.

Q. Are you acquainted with the operations of the Rock Island Motor Transit Company both local and interstate?

A. Yes, sir.

Q. Has your company been using the services of the Rock Island Motor Transit Company since it started in business about 13 years ago?

A. Yes, sir.

Q. What has been the quality of the service of the Rock Island Motor Transit to your company?

A. Satisfactory.

Q. On your inbound service have you been using the Rock Island Motor Transit Company?

A. Yes, sir.

Q. Are you acquainted with the fact there is a maximum limitation of 5,000 pounds per shipment imposed on the [fol. 1749] operations of the Rock Island Motor Transit Company?

A. Yes, sir.

Q. And that such limitation has existed since last fall?

A. Right.

Q. Has that caused you to make any change in your method of transportation of your inbound shipments?

A. Well, where we used their service prior to that time, we found other means of getting it in.

Q. I will ask you if the service formerly rendered by the Rock Island Motor Transit Company was of the same quality or of a higher quality than the service you have since been getting?

A. Their service was satisfactory.

Q. Did you have any difficulty getting any placement of service in excess of 5,000 pounds per shipment?

A. No. There is such service available.

Q. What is your primary interest in this proceeding, Mr. Griffith?

A. Our primary interest is to be able to use the Rock Island Motor Transit Company on inbound shipments, and we feel we should patronize them because we depend on outbound service on our distribution in the state. We feel if they are curtailed in their interstate operation it would result in a curtailment in their outbound service.

Q. Now, on occasion do you have so-called direct shipments from factory to your dealers out in the state?

A. Yes, sir.

[fol. 1750] Q. That would be where you get an order at your place here in Des Moines and you can't fill it and you would have it sent out from the factory.

A. Maybe we could fill it here, but it would be more advantageous to ship it direct.

Q. Do you have dealers all along Highway 6 in Iowa whe-ver there is a hardware store?

A. Yes, sir.

Q. In the small towns as well as in the large towns?

A. Right.

Q. Do you go as far east as West Liberty, Iowa?

A. We have accounts in Rock Island, Davenport and, I believe, in East Moline.

Q. Has it ever occurred where you had a shipment direct from Chicago to Davenport rather than shipping it into Des Moines and back?

A. That could be, yes, sir.

Q. Has the Rock Island Motor Transit Company handled those so-called direct shipments for you in the past?

A. I think so, yes, sir.

Q. Have you had any direct shipments to small points like West Liberty or Marengo?

A. I couldn't give specific instances, but I know in the past we have had shipments direct from the factories to points along Highway 6.

[fol. 1751] Q. Have those shipments been handled by the Rock Island Motor Transit Company?

A. Yes, sir.

Q. Do you want to retain, if possible, the complete service of the Rock Island Motor Transit Company?

A. Yes, sir.

Q. As you had it before there were any restrictions or limitations on its operations?

A. Yes, sir.

Mr. Nolan: You may cross examine.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. As I understand your testimony, Mr. Griffith, your main reason for wanting to retain the service of the Rock Island Motor Transit is to take advantage of their intrastate service. Is that correct?

A. That is important to us, yes, sir.

Mr. Bradshaw: I believe that is all.

Redirect examination.

By Mr. Nolan:

Q. Following along with what Mr. Bradshaw said about Rock Island Motor Transit intrastate service, are there many points serviced by any other carriers out of Des Moines?

A. I would say so, yes, sir.

Mr. Nolan: That is all.

Mr. Bradshaw: No further questions.

[fol. 1752] Exam. Carpenter: That is all. You are excused.

(Witness excused.)

Mr. Howland: Mr. Hansen, please.

Carl A. Hansen was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please?

A. Carl A. Hansen.

Q. Do you live here in the City of Des Moines, Mr. Hansen?

A. I do.

Q. Your present occupation is what?

A. Traffic Manager of the Des Moines Chamber of Commerce.

Q. How long have you occupied that position?

A. Approximately 14 years.

Q. What was your occupation prior to that time?

A. I was in the rate department of the Iowa State Commerce Commission for a period of 17 years.

Q. I take it, then, in your employment with the rate department of the Iowa State Commerce Commission, you came in contact with traffic and rate matters?

A. Yes, sir.

Q. So, for the past 31 years, you have been interested

in and directly connected with transportation matters in the Iowa territory and in the City of Des Moines?

A. That is correct.

[fol. 1753] Q. The City of Des Moines has a population of approximately 180,000 according to the 1950 census. Is that right?

A. Something in excess of that; I think around 186,000.

By Mr. Nolan:

Q. That is the Chamber of Commerce figure, isn't it?

A. No; that is official.

By Mr. Howland:

Q. Mr. Hansen, what type and character of business in industries are located in the City of Des Moines?

A. Oh, there are various types; manufacturers and wholesalers.

Q. What is the membership of your Chamber of Commerce? How many concerns?

A. I think it is approximately 600 concerns interested in shipping.

Q. Do those range from light and heavy manufacturing industries down to wholesalers of practically all types and character?

A. That is correct.

Q. In general, where is the trade territory in which the Des Moines wholesalers do business?

A. Well, the wholesalers do business in the State of Iowa and some in the immediate surrounding states.

Q. And do the manufacturers generally do business in a somewhat larger area?

A. Throughout the country oftentimes.

Q. Now, I will ask you, Mr. Hanson, whether there are concerns here in Des Moines that utilize the services of the traffic department or traffic bureau of the Chamber of [fol. 1754] Commerce with respect to the routing of shipments, rates and service which is available?

A. Yes.

Q. And I take it you are generally familiar with the transportation service and the service problems of these concerns?

A. I am.

Q. In what way are the concerns that are located here and doing business in Des Moines affected by interstate transportation which is available to the City of Des Moines?

A. I don't believe I get your question.

Q. Well, I will ask it this way: Are the wholesalers and manufacturers who are members of your organization interested or do they have any interest in the present application?

A. Yes, sir.

Q. Why is that true?

A. Well, it is a daily proposition, I know, with our members throughout the city who make direct shipments from Chicago and other interstate points to small towns along Highway 6 of Iowa.

Q. Is the making of those direct shipments from Chicago and eastern points a matter of almost daily occurrence?

A. Yes.

Q. Now, you are familiar with both rail and truck transportation, are you not?

A. Quite generally.

Q. What have you observed with respect to the trans- [fol. 1755] portation service that is available to communities in the state of Iowa in this general territory which are located intermediate between the larger centers of transportation? I have in mind places like Victor, Ladora and Brooklyn and communities of that character.

A. I know numerous carriers have interstate rights to serve those points, but I know of none who are serving on the smaller shipments except the Rock Island Motor Transit.

Q. What has been the general policy of the motor common carriers with respect to service to these smaller intermediate communities of the type and character I have referred to? Are they increasing that service or restricting it?

A. Well, I don't know about the recent situation but I haven't heard of any increase in that type of service. The fact of the matter is the trend seems to be, on the part of our motor carriers, to do away with peddle service and operate from terminal to terminal.

Q. Is this peddle service, which is being rendered by the Rock Island Motor Traffic Company, for the handling of both intra and interstate shipments, a matter of concern to the shippers and receivers of freight who are members of your bureau here in Des Moines?

A. It is.

Q. I believe you said you knew of no concern that was rendering any peddler service to these small intermediate communities on U. S. Highway 6 other then the Rock Island Motor Transit Company.

[fol. 1756] A. Well, not generally across there. There may be a few exceptions to that statement, but generally that is true.

Q. Are you familiar with the fact that the Rock Island Motor Transit Company since the month of August 1951 has been operating under certain maximum weight restrictions?

A. Yes, sir.

Q. In your opinion do those maximum weight restrictions affect in any manner the ability of the Rock Island Motor Transit Company to render a full and complete service to communities that it serves including the City of Des Moines?

A. Well, that would seem obvious inasmuch as I know of no such restrictions imposed on any other carriers I have run into.

Q. Are there concerns in the City of Des Moines using transportation service by motor truck who have occasion to make shipments to points both east and west of the boundaries of the State of Iowa in truckload quantities or in volume quantities in excess of 5,000 pounds?

A. Oh, yes.

Q. You are familiar also with the situation of the intrastate transportation service available on U. S. Highway 6 across the State of Iowa, are you not?

A. I am.

Q. In the event the Rock Island Motor Transit Company is compelled to abandon interstate service or to eliminate the interstate service, in your opinion would that affect [fol. 1757] the quality of the service that would be available

for intrastate transportation in this territory covered by this application?

A. Well, it obviously would because Des Moines is an interchange point for considerable traffic and the volume, of course, tendered to the carrier makes the service and, of course, obviously, if it was just local shipments out of Des Moines, it would no doubt impair the distribution service.

Q. In other words, your opinion is that a carrier could not maintain complete intrastate transportation service to the same degree as though it had both intrastate and interstate volume available?

A. The lesser tonnage available, of course you couldn't expect the same service and distribution.

Mr. Howland: That is right. I think you may cross examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No cross examination.

Exam. Carpenter: All right. That is all.

(Witness excused.)

Mr. Howland. Mr. Rasmussen, please.

ORMO RASMUSSEN was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Your name is Ormo Rasmussen?

A. That is right.

Q. I believe you live at Brayton, Iowa, do you not?

[fol. 1758] A. Yes, sir.

Q. Brayton is located where?

A. It is 14 miles north of Atlantic, Iowa.

Q. You are located on what highway?

A. Highway 71.

Q. You are on the highway between Audubon and Atlantic, Iowa, are you not?

A. That is right.

Q. In what business are you engaged at Brayton?

A. Retail lumber business.

Q. Are you the owner of a retail lumber business there?

A. Partly. My father and I have the retail lumber yard there.

Q. Are you interested in any business located at any other point?

A. No, we are not.

Q. Just the one yard?

A. That is right.

Q. About what is the population of Brayton?

A. About 250 people.

Q. It is located on the branch line of the Rock Island Railroad which extends between Atlantic and Audubon, Iowa?

A. That is right.

Q. What business establishments are located in Brayton?

A. Well, we have a grocery store, we have a garage, we have two filling stations and two beer joints. That is about it.

[fol. 1759] Q. Mr. Rasmussen, what truck transportation service do you have at Brayton?

A. Rock Island Motor Transit.

Q. Is there any other regular service to the town?

A. There is not.

Q. Except that of the Rock Island Motor Transit Company?

A. That is all.

Q. Do you have occasion to get in shipments for your business from points outside of the State of Iowa on occasion?

A. Yes, we do.

Q. And those generally come from what general territory?

A. We get quite a bit of our stuff from Omaha; we get some stuff from Rock Island, Illinois, some from Chicago and some from Michigan.

Q. What general lines of merchandise do you handle?

A. Well, we have a retail lumber yard and we handle fence, barbed wire, steel pieces, millwork and general hardware.

Q. How has the service of the Rock Island Motor Transit Company to your place of business been?

A. It has been exceptionally good; we get overnight service. We can call in for stuff from either Omaha or Des Moines and they have it out there the next day.

Q. Is that a daily or daily-except-Saturday service?

A. That is right; it is daily.

Q. Six days a week?

[fol. 1760] A. Six days a week.

Q. Mr. Rasmussen, would the elimination of this Rock Island Motor Transit service from interstate points such as Omaha or Rock Island or Chicago, St. Louis or the other points from which you have connecting line service, affect your business there?

A. You mean the discontinuation of it?

Q. Yes, or the substantial reduction of it so it was cut down to, say, twice a week or something like that. Would that affect your business?

A. That would handicap us.

Q. In what respect?

A. We would have to wait longer for our merchandise.

Q. I take it you are in competition with dealers in similar lines of merchandise both at Audubon and Atlantic and other nearby towns?

A. Yes, sir.

Q. Do you have any other service you could get to replace that of the Rock Island Motor Transit?

A. There is none.

Q. There is no other service there?

A. That is right.

Mr. Howland: You may cross examine.

Exam. Carpenter: Cross examine.

Mr. Bradshaw: No cross examination.

Exam. Carpenter: You may be excused.

(Witness excused.)

[fol. 1761] Mr. Howland: Mr. Wheatley, please.

V. O. WHEATLEY was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Your name is V. O. Wheatley?
A. That is right.
Q. You live, I believe, at Marne, Iowa?
A. That is right.
Q. What is your business?
A. I am in the general merchandise business.
Q. How long have you been engaged in business at Marne?
A. Well, the business has been there about 60 years. I have been there only about 3 years.
Q. Prior to that time was it conducted by other members of your family?
A. By my father, yes.
Q. Where is Marne located?
A. On the Rock Island 6 miles west of Atlantic.
Q. About what size community in population is it?
A. Well, the town or community?
Q. The town itself.
A. There are about 350 people there.
Q. What business establishments are located there?
A. We have an elevator and a couple of filling stations, a garage and a sort of semi-implement place.
[fol. 1762] Q. Now, Marne is on that part of the line of the Rock Island Railroad that the Interstate Commerce Commission has authorized to be abandoned, I believe. Is that correct?
A. That is right.
Q. And there is some construction at the present time going on for a new line of railroad that will be located some miles south of the town of Marne, isn't there?
A. That is right.
Q. And when that line is completed and the present route through Marne is abandoned, then you will be off of the railroad and the nearest point will be Atlantic, Iowa. Is that right?
A. That is right.

Q. Have you been getting in some of your merchandise from points outside of the State of Iowa?

A. Yes, we get quite a bit from outside of the state.

Q. What general lines of merchandise has that been true of?

A. Drygoods, feeds. You see, our general merchandise consists of quite a few things. We buy feeds and clothing and drygoods mostly, and we handle some groceries; we have a full line of groceries.

Q. With respect to those grocery lines, some of your suppliers maintain a delivery service, do they not?

A. That is right.

Q. Are there any Omaha concerns that have a delivery service out there?

[fol. 1763] A. No.

Q. But you do have delivery service out there from Des Moines, do you not?

A. That is right.

Q. How have you been getting in your shipments other than the ones delivered to you by the Grocers Wholesale Co-op?

A. By motor freight only.

Q. What company is it that has been serving Marne?

A. Well, the Rock Island.

Q. Do you have any other regular motor truck service via common carrier truck into Marne?

A. Well, Iowa-Nebraska comes in there.

Q. Is that a regular daily service?

A. I wouldn't know. I would not say for sure whether it is or not.

Q. Does the Rock Island Motor Transit maintain a regular daily service there?

A. Yes, they come in daily.

Q. How has the service of the Rock Island Motor Transit been, generally, as to being satisfactory or otherwise?

A. It has been good.

Q. And with the prospect of the removal of the rail line from Marne, is there a need for the continuation of the Rock Island Motor Transit service to the town of Marne?

A. Yes, we need it.

[fol. 1764] Q. What effect would it have on your business

if that service were eliminated entirely or substantially reduced down to, say, a twice-a-week basis?

A. Well, we would have to buy stuff more often. We used to buy carloads of stuff; now we buy it from day to day. We like to get our merchandise in as quick as possible because we don't like to hold over and buy in larger quantities.

Q. Do you ordinarily have any occasion to make shipments of more than 5,000 pounds inbound?

A. By motor freight?

Q. Yes.

A. No. It has been coming by rail.

Q. When the rail service is discontinued in this town will you still ask for those volume shipments coming in?

A. Well, yes. I don't know how we are going to work it. I haven't given it a thought yet as to how we will do it.

Q. But you will require that transportation service after the railroad is abandoned there?

A. Yes.

Q. Do you know of any other service you could get to replace the service of the Rock Island Motor Transit Company?

A. No. Of course, we have more or less relied on the Rock Island Motor Transit.

Q. For your smaller shipments?

A. Yes.

[fol. 1765] Mr. Howland: I think you may cross examine.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Where does your feed come from?

A. Our feed is from Gooch out of Lincoln, Nebraska, and then we get oyster shell shipped in from New Orleans.

Q. Does your oyster shell come in in over 5,000 pound shipments?

A. Yes.

Q. Does that come through Des Moines?

A. No, it don't come out of Des Moines.

Q. I mean, does it come through Des Moines?

A. I am not sure.

Q. You don't know the routing on that?

A. No, I don't.

Q. Is the Iowa-Nebraska the only other carrier, you know of, that comes in there?

A. Yes.

Mr. Bradshaw: That is all.

Exam. Carpenter: Redirect.

Mr. Howland: Nothing further.

Exam. Carpenter: That is all. You will be excused.

(Witness excused.)

Exam. Carpenter: We will have a short recess.

(Recess.)

Exam. Carpenter: You may proceed.

[fol. 1766] Mr. Howland: Mr. Blumer, please.

LEONARD H. BLUMER was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you give your name to the reporter, please?

A. Leonard H. Blumer.

Q. Where do you live, Mr. Blumer?

A. I live at 114 South 38th Avenue, Omaha, Nebraska. I am with the Rock Island Motor Transit Company, Commercial Agent.

Q. As I understand it, you live in Omaha, Nebraska.

A. That is right, sir.

Q. And you are presently the Commercial Agent for the Rock Island Motor Transit Company at Omaha?

A. That is right.

Q. How long have you worked for the Rock Island Motor Transit Company?

A. Well, it will be 14 years next month.

Q. I take it, then, that you went to work for the Rock Island Motor Transit Company about the time it took over the White Line?

A. Yes. I was with the White Line at the time the Rock Island took it over.

Q. Where were you located then?

A. At Omaha.

Q. At what points have you worked for the Rock Island [fol. 1767] Motor Transit Company and the predecessor company, the White Line, and in what capacities?

A. I started out in January of 1936 with the White Line as a helper, and I was a driver at the time of the purchase by the Rock Island Motor Transit. After that I drove a truck until I became foreman, of course this is all in Omaha. I was foreman for about [illegible] years. Then they transferred me to Muscatine, Iowa. June 1944 as terminal agent. I worked there until March 1, 1945. Then I was transferred back to Omaha, and operated the terminal there from March 1, 1946 until October 31 of the same year I was transferred from there to Ottumwa, Iowa, and operated a terminal there until June of 1946.

Then I asked for a transfer back to Omaha and they put me on the rate and dispatching job and I was on that from June of 1946 until January 15th of this year.

Q. And you have been Commercial Agent since January 15th, 1952, down to the present time?

A. That is right.

Q. As commercial agent, what does your job involve?

A. Well, I have charge of sales and solicitation within the City of Omaha and the western part of Iowa.

Q. Does the Rock Island Motor Transit Company have a regular terminal in Omaha?

A. Yes, sir.

Q. Where is it located?

[fol. 1768] A. It is adjoining the railroad freight house there.

Q. Is it in a portion of the Rock Island freight house?

A. Yes; we have the south half.

Q. About how many feet of dock space, or how many doors as they sometimes refer to it?

A. Well, in the original Motor Transit terminal there are eight doors and on the other part that has been closed in since it was originally set up there are four doors, so there are 12 doors on the west side; on the east side, of

course, there is trackage; there were four doors but there is only three now.

Q. What does the Rock Island Motor Transit have in the way of pickup and delivery trucks in Omaha?

A. Well, it has four Chevrolet cab-over trucks with 15 foot beds that work in the city. Then, there are five K International straight jobs; then we have what they call shuttle trailers, a 15-foot job, which we use for handling connecting rail line freight; then there is extra road-unit equipment we use for picking up large shipments.

Q. You referred to some units you use in connection with rail freight. What do you mean by that?

A. That is freight that goes to the different lines like the I. C., North Western, Milwaukee, Burlington, Union Pacific.

Q. Does the Rock Island Motor Transit perform a pickup and delivery service on freight shipments for the railroad in Omaha?

A. Yes.

[fol. 1769] Q. And this transfer service involves the handling of freight from one freight house to the other?

A. That is right. Of course, we just deliver the rail freight. We don't pick up any connecting line freight; they deliver that themselves.

Q. What do you have in the way of personnel of the Rock Island Motor Transit Company at Omaha?

A. At the present time there are about 12 men working the city on pickup and delivery service; there are three employees in the office and the agent and myself. That is not counting the road drivers.

Q. Does that include your dock men?

A. Yes.

Q. And the pickup drivers?

A. That is right.

Q. There are about 12 of them, you say?

A. Right at the present time. We have had as high as 24.

Q. There has been a reduction in that personnel in the past 6 months, of course?

A. Very much so.

Q. Were you familiar with the number of trucks dis-

patched out of Omaha prior to the month of August 1951 or that passed through Omaha on regular runs?

A. Yes. Prior to this restriction we were loading out for Des Moines about three trailerloads a night; it varied from two to three. Then, we had an east peddle run which [fol. 1770] peddled all points from Omaha on Highway 6 up to Des Moines.

Q. Is that the run where the semitrailers were exchanged at Anita?

A. That is right. At that time we used to run them clear through, one each way, but they changed that and now run it to Anita and change trailers and each driver goes back to his terminal.

Q. Did you say there were usually three trucks dispatched to Des Moines each night?

A. Yes, as a general rule there were three; there were never less than two. Then, of course, they had the east peddler; and they had the truck going up 64 Highway that took care of Harlan and all those points on 64. The east peddler took care of towns like Treynor, Carson, Griswold and Lewis on Highway 100.

Q. How did that peddle run get to Harlan?

A. Well, I think at that particular time he was running to Oakland, over to Hancock, up to Avoca, to Harlan, down to Corley, Shelby, Neola, Minden, Underwood, Weston and back into Council Bluffs.

Q. Was that the run that served Walnut and Marne, or was that some other run?

A. Yes, I believe he did have Walnut and Marne on there at that time too.

Q. And then he went on into Atlantic?

A. That is right.

[fol. 1771] Q. Now, at that time was there also a regularly established run to the Tri-Cities?

A. Yes. Before the war we had an overnight service from Omaha to the Tri-Cities.

Q. Well, I am referring particularly to the service you had in, say, June and July of 1951. Did you have a truck dispatched from Omaha to the Tri-Cities area?

A. No. At that time we had a truck loaded with nothing but Tri-Cities freight, however it was relayed through

Des Moines; they would have to change drivers and take it on in from there. Of course, prior to the war we had a through run Omaha to Rock Island, one each way each night.

Q. That is, the service was set up where the truck applied exclusively between Omaha and Rock Island eastbound and between Rock Island and Omaha westbound?

A. That is right.

Q. And later that business was handled by one of these units you referred to as the three Des Moines units?

A. That is right.

Q. And that was the situation that existed in June and July 1951?

A. Well, I said at that time there were two and three trucks at night. There were times when we had as high as six trucks out at night to Des Moines. We were always sure of not less than two to three trucks every night going east.

Q. You also handled eastbound business from Omaha to [fol. 1772] Chicago as well as westbound business Chicago to Omaha?

A. That is right, sir.

Q. Now, I take it you are also familiar with the service that has been performed there since August 1951 when the changes in the authority became effective?

A. Yes, sir.

Q. Did you also have a run prior to July or August of 1951 that operated on a daily basis through Omaha from Des Moines to Lincoln?

A. You mean prior to that date?

Q. Yes.

A. Yes.

Q. What service was that? Tell us how that operated?

A. Well, that particular run didn't come into the terminal at Omaha. It was a through run from Des Moines to Lincoln.

Q. That didn't have Omaha freight on it?

A. No.

Q. It was freight for Lincoln and points west?

A. That is right.

Q. And that operated through Omaha but did not change

drivers at the terminal and was not dispatched from the Omaha terminal?

A. That is right.

Q. Under the present operations was that Des Moines-Lincoln run eliminated?

A. Yes.

[fol. 1773] Q. What service is being currently performed from Omaha east, and how is it being handled?

A. To any particular points?

Q. Well, first, Omaha to Atlantic, and then Omaha to Des Moines.

A. Well, the Omaha-to-Atlantic freight is being handled on the back end of our Des Moines unit.

Q. How many units do you run out of Omaha to Des Moines?

A. Normally it has only been one a day.

Q. That leaves in the evening?

A. That is right.

Q. And that single truck handles both the Atlantic proper freight and the Audubon freight and the Des Moines freight? Is that right?

A. That is right.

Q. How is your peddler service presently handled out of Omaha?

A. Well that is handled on another one of those Chevrolet straight jobs. We used to have a trailer to handle it, but now that is being handled on a 16-foot van body.

Q. And that is an enclosed truck?

A. Yes.

Q. How does it operate? Tell us about that run out of Omaha.

A. Well, at the present time that is operating down through Lewis, Treynor and Carson, then he goes over to Oakland and up to Hancock, then to Avoca, then back down to those other towns on 64 Highway.

[fol. 1774] Q. Do you mean Highway 64 or Highway 83?

A. Highway 64. You have Shelby and Neola and Minden and Underwood and Weston.

Q. How do you serve Marne and Walnut presently out of Omaha.

A. That is loaded to Atlantic and they run that out from Atlantic.

Q. You mean the truck handles from Atlantic out to Walnut and Marne?

A. And then over to Harlan.

Q. Does this Chevrolet truck you refer to go into Harlan?

A. The one out of Omaha?

Q. Yes.

A. No; that goes up to Avoca.

Q. And then returns to Omaha over U. S. 64?

A. That is right.

Q. And any Harlan freight out of Omaha is handled how?

A. Well, that is loaded into Atlantic, put in with your Atlantic peddle off of the Des Moines truck. That is unloaded at Atlantic on to a peddle truck out the next morning.

Q. And that truck comes out on Iowa Highway 83 over to Marne, Walnut and Avoca and then north to Harlan?

A. That is right.

Q. Are you familiar with the way in which any shipments originating out of the Tri-Cities or points east of the Tri-Cities destined to Omaha or beyond are now handled? [fol. 1775] A. Well, shipments out of the Tri-Cities or east come under the restricted rights into Omaha.

Q. You mean the key-point restriction between the Tri-Cities and Omaha?

A. I don't know whether it is the key-point restriction or the restriction the Interstate Commerce Commission put on us; I don't know which.

Q. Well, as a matter of fact, I think the Interstate Commerce Commission was responsible for the key-point restriction, but the restriction you refer to is the one that prevents the handling of shipments from the Tri-Cities area into Omaha or beyond. Is that what you refer to?

A. Well, you know, before we used to haul freight into there, see, when we had key-point restrictions. We have had key-point restrictions since we have been in business.

Q. Not from Omaha to the Tri-Cities subsequent to August 1951.

A. I know, after we were restricted, there was a bulletin issued that we were restricted through or out of any one of the said points, which named Omaha and the Tri-Cities.

Q. What I want to get at, Mr. Blume, since the restriction was put on which prohibits the Rock Island Motor Transit Company from handling freight picked up at the Tri-Cities or originate east of the Tri-Cities into Omaha or beyond Omaha, how do you handle that business from Des Moines?

A. Well, if it is out of the Tri-Cities or east thereof it [fol. 1776] will have to be interlined out of Des Moines into Omaha or on to destination whichever the case may be.

Q. So you don't have any shipments now picked up originating at the Tri-Cities and handled for delivery at Omaha proper?

A. No, we can't deliver it in Omaha.

Q. Nor can you make a shipment from Omaha proper destined to the Tri-Cities area?

A. No, not without using a connection.

Q. And that interchange is made at Des Moines?

A. That is right. It also is true with Clinton.

Q. Because that has to go through the Tri-Cities?

A. That is right.

Q. How have you been handling shipments moving from Omaha to Clinton?

A. Well, we have been sending them into Des Moines and interlining from Des Moines.

Q. Interchange at Des Moines with connecting carrier for delivery at Clinton? Is that the fact?

A. Yes.

Q. The Rock Island Motor Transit Company has authority to serve Clinton itself?

A. That is right.

Q. Now, we have been talking about trucks dispatched from Omaha east. Do you also dispatch some trucks from Omaha west?

A. Yes.

[fol. 1777] Q. To Lincoln and beyond?

A. Yes.

Q. Are you familiar with the operating authority of the

Rock Island Motor Transit out in that west territory, out beyond Belleville, Kansas?

A. Well, I know how they operate it, yes.

Q. Well, you know they do operate into that territory?

A. Yes, sir.

Q. How is it handled from Omaha?

A. Well, we load two trucks going west each night.

Q. Out of Omaha?

A. Out of Omaha going west; and there are two loaded coming back from Belleville. Those are destined to Belleville, Kansas, out of Omaha. They have a trailer that stops at Lincoln, Beatrice, Fairbury, and then into Belleville. Then, we have a straight job which——

Q. You mean a straight truck?

A. A straight truck, yes. It starts out at Omaha and goes to Albright, a suburb of South Omaha, then to Richfield, there is a little town in between there but he goes to Richfield, then down to Louisville, from Louisville to South Bend, from South Bend he goes to Murdock, from Murdock, to Alvo, from Alvo to Prairie Home, from Prairie Home to University Place, which is a suburb of Lincoln, then down into Lincoln proper.

Then beyond Lincoln you have Howell, then Martel, from [fol. 1778] Martel to Clatonia, Clatonia to De Witt, from De Witt to Beatrice, Beatrice to Plymouth, Plymouth to Harbine, from Harbine to Ellis, Ellis to Jansen, Jansen to Fairbury, from Fairbury to Ruskin, Ruskin to Deshler, from Deshler to Hebron, and from thereon into Belleville.

Q. Well, that run handles both intrastate and interstate freight out of Omaha to those points west and south of Omaha that you have named, does it not?

A. They are not all interstate, no.

Q. Well, I say you handle both interstate and intrastate traffic.

A. On the whole run, yes.

Q. And you have authority to handle those shipments?

A. That is right.

Q. Now, if you had a shipment out of Chicago destined to Lincoln, Nebraska, under the present setup and with the present restrictions you could not pass through the Tri-Cities and Omaha. Is that correct?

A. No.

Q. They could not?

A. No, they could not.

Q. And that necessitates the interlining therefore at Des Moines?

A. That is right.

Q. So, if a shipment is picked up on either motor carrier or rail billing at Chicago destined to Lincoln, you could not handle it on the Motor Transit runs?

[fol. 1779] A. No, sir.

Q. Now, we have been talking about westbound service out of Omaha to Beatrice and the Nebraska points. How would a shipment from Beatrice, Nebraska into western Iowa be handled under your present schedules?

A. From Beatrice to western Iowa?

Q: Yes.

A. Well, we could handle that direct. Of course, we would have the restriction of 5,000 pounds per shipment.

Q. I understand; but what would be the physical movement of that shipment?

A. Well, the shipment would be picked up on the Belleville truck coming into Omaha and we would load it to whatever the point of destination is out of Omaha.

Q. On which truck it would be loaded would depend on the destination, whether destined to Atlantic or east of Atlantic or some point west of Atlantic?

A. That is right.

Q. Is there a movement of traffic from that eastern and south-eastern territory, such as Fairbury and Beatrice and Lincoln to western Iowa points?

A. Yes. Of course, there isn't now, but we used to haul a lot of pumps, we used to haul truckloads of pumps out of Fairbury and also out of Dempster Mill at Beatrice; we used to haul a lot of castings out of Kensington, Kansas.

[fol. 1780] Q. Of course, the restriction of 5,000 pounds applies only with respect to the territory in the original White Line authority, and Fredericks; you understand that?

A. Yes, sir.

Q. That is from Omaha to the Tri-Cities and out to that territory around Harlan.

A. I think that would still apply to a point out there that is not restricted, which would not give you any leeway anyhow.

Q. That is right. Were you familiar with that operation while you were stationed at Omaha as terminal agent there for a while and also while you were doing billing and matters of that sort?

A. You mean as to this restriction?

Q. No. As to this operation you told us about out into Iowa from Nebraska.

A. Yes, sir.

Q. You do have traffic moving from that Beatrice, Lincoln, Fairbury area of less than 5,000 pounds per shipment into western Iowa on occasion, I take it?

A. Yes.

Q. Mr. Blumer, you told us about the fact there are two trucks dispatched west out of Omaha, one that makes these intermediate points and the other that goes direct to Belleville. Are there also two trucks from that area coming back into Omaha?

A. There is a trailer and a 16-foot straight truck that go back and forth each night. In other words, they meet, they alternate.

[fol. 1781] Q. Well, there are two trucks that go out and two trucks come back?

A. That is right.

Q. I don't believe we have had anyone testify in this record about the character of the industries at Omaha although Mr. Hartnett was on the witness stand. Will you tell us something about the character of the business establishments there in Omaha as to the types and kinds of businesses there are?

A. Well, there are a number of different businesses in Omaha. There is the Grant Battery Company that manufactures batteries; there is the National Lead Company that makes lead dust and shot; the National Lead also make the regular ingots and different lead materials, whatever it might be.

There are the biscuit companies, the Sunshine Biscuit Company, the Merchants Biscuit Company, the Independent Biscuit Company; Schuze-Birch Biscuit Company

have taken over the Independent Biscuit Company. The Socony Vacuum Oil Company has their plant out on the river where they get oil on the barges and ship out to all their stations throughout the country.

There are a number of distribution companies, not so much in the manufacturing end of it.

Q. Well, Omaha is a very large wholesale distribution center, is it not?

A. That is right.

Q. In all lines of merchandise, drygoods, floor coverings and groceries?

[fol. 1782] A. That is right. It has exceptionally, I think, big packing houses which manufacture packing-house products.

Q. Are there any other general lines they handle there?

A. Well, there is the Bemis Brothers Bag Company, the Frontier Bag Company. They have practically all the different agricultural manufacturing companies that have distribution of implements out of Omaha.

Q. Does that include practically all the farm implement houses such as International Harvester, John Deere Company, J. I. Case and Allis-Chalmers?

A. Yes. And then they have the auto parts places such as General Motors; of course, that is just a distribution; they have the Ford Storage, Central Storage, the Beacon Van Storage.

Q. You are familiar with what is known as pool car distribution, aren't you?

A. Yes.

Q. Is Omaha a center from which pool car shipments are made?

A. Well, not too much. They do have some cars that come in there that are handled by different local concerns; I don't know of any companies that do too much of that.

Mr. Howland: I think you may cross examine.

Exam. Carpenter: Cross examine.

Cross examination.

By Mr. Bradshaw:

Q. Among the businesses that you have in Omaha, do [fol. 1783] you have some other trucking business there other than the Rock Island Motor Transit Company?

A. Oh, yes.

Q. Could you give us some idea of the extent of that?

A. Well, of course, that runs into quite a thing. We have a number of carriers. A lot of them, of course, are local carriers. In other words, they probably operate out of one particular point. There may be some of them have a half a dozen points they serve.

As far as the big lines are concerned we have quite a few of them.

Q. What are the big-line terminals there?

A. Well, there is Watson Brothers, Union Freightways, On Time, Red Ball, Merchants, Prucka; I imagine that is what you would call the big lines.

Q. And there are a lot of smaller lines you can't think of?

A. Oh, yes, there are quite a lot of smaller lines.

Q. Do you have any lines there among these smaller lines, that you know of, that operate out of Omaha and into some of these towns along Highway 6 in the western part of Iowa and also along the branch lines of the Rock Island Railroad in western Iowa?

A. Of course, we do have competition from Iowa-Nebraska in territories up on 64 and there are some on Highway 6.

Q. Does Iowa-Nebraska have a terminal in Omaha?

A. No, they do not have a terminal of their own; they [fol. 1784] lease a part of the terminal of Neylon Brothers.

Q. I believe you mentioned, when these restrictions went on a few months ago, you lost some business from Clinton to Omaha. Is that right?

A. I would say we would not be able to handle it.

Q. Were you handling it before?

A. Yes, sir.

Q. Who got that business?

A. That I don't know.

Q. Do you know how that business is being handled?

A. Well, I am quite sure we handle quite a bit of merchandise out of Clinton, Iowa, going west. We don't know what shipments they do have because we never get to see the merchandise.

Q. There isn't so much competition on your western movement out of Omaha, is there?

A. No. We don't really have too much competition anywhere; as far as I can see——

Q. Well, on this truck——

Mr. Howland: Wait a minute. Let the witness finish his answer, please.

A. Of course, if you want to run into competition there are a number of lines.

By Mr. Bradshaw:

Q. To shorten this, you are pretty familiar with what operators are out there that you are competing with?

A. Yes, sir.

[fol. 1785] Q. Can you tell us what line or lines handle the truckload shipments out of Fairbury you claim to have lost?

A. I think the biggest majority of it went to the Fairbury Motor, which originally was a Canning line.

Q. And they operate where?

A. From Fairbury to Omaha. As a matter of fact, Beatrice Motor Freight bought them out. Canning went bankrupt.

Q. Are there some truckload shipments out of Beatrice?

A. Yes.

Q. Who is handling those?

A. Beatrice Motor Freight.

Q. Isn't that the same as the Fairbury Motor Freight?

A. That is right. They operate as the Peatrice-Fairbury Motor Freight. The Fairbury Motor Freight is, of course, still in the hands of a receiver, and until they get it settled they may operate it as the Beatrice-Fairbury Motor Freight.

Q. Anyway, the respective carriers under both headings come into Omaha from western Nebraska.

A. That is right. The trustee of that particular deal is a Fairbury Motor Freight man.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Redirect.

Mr. Howland: That is all.

Exam. Carpenter: That is all. You will be excused.

(Witness excused.)

[fol. 1786] Mr. Howland: Mr. Tiedemann, please.

VIRGIL A. TIEDEMANN was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Your name is Virgil A. Tiedemann?

A. That is right.

Q. And you are the Rock Island Motor Transit agent in the City of Des Moines?

A. That is correct.

Q. How long have you worked for the Rock Island Motor Transit Company?

A. Since 1938.

Q. And did you work for the White Line?

A. Yes; I started for the White Line in 1936.

Q. In what capacities have you worked for the Rock Island Motor Transit Company?

A. Truck driver, dock foreman, driver supervisor and terminal agent.

Q. At what points have you worked for the Rock Island Motor Transit Company?

A. Principally in Des Moines but, as truck supervisor, I have travelled.

Q. You are familiar, of course, with the regularly assigned runs that are dispatched from the Des Moines terminal of the Rock Island Motor Transit Company?

[fol. 1787] A. Yes, sir.

Q. First, I wish you would tell us what runs the Rock Island Motor Transit Company has out of Des Moines east which you would call peddler runs.

A. As far as I am concerned they are all peddle runs. We have a trip from Des Moines to Colfax, which takes in Altoona, Mitchellville and Colfax and return.

Q. When does it customarily leave Des Moines?

A. Around 7 o'clock in the morning.

Q. And shipments destined to points like Altoona, Mitchellville and Colfax, are they handled on that run?

A. Yes.

Q. Suppose you had a shipment from Rock Island, Illinois, to Colfax, Iowa, would that be handled on that run?

A. Yes.

Q. That would come into Des Moines?

A. That is right.

Q. About what time does that Colfax peddle run customarily get back into Des Moines?

A. It arrives between 6 and 7 in the evening.

Q. And it performs what type of service in the way of picking up and bringing in freight?

A. It picks up at Colfax, Mitchellville and Altoona and returns to Des Moines.

Q. Can you tell us about what the usual tonnage is that [fol. 1788] is handled on that peddler run?

A. Well, at the present time outbound it runs between 3,000 and 5,000 pounds; 5,000 pounds is a big load on the outbound. That is due to this restriction. On the return it runs 7,000 to 8,000 pounds.

Q. What is the principal point at which it picks up freight?

A. At Colfax.

Q. And you say that the restriction has affected the tonnage handled by that run outbound from Des Moines?

A. Yes, sir.

Q. What particular type and character of shipments were handled previously on that run that can't be handled now?

A. Well, we used to have truckload volume out of and into Mitchellville and also into and out of Colfax which we can't handle now.

Q. Where did that truckload volume come from?

A. From implement dealers and oil companies. There was the Pott Company we used to haul for, and such as that.

Q. And has that 5,000-pound limitation affected the business on that run?

A. Yes, sir.

Q. Now, you also have a turn-around peddler run that operates, I believe, to Newton. Is that right?

A. We have a truck to Newton and we have a peddler run that operates to Grinnell.

[fol. 1789] Q. Is that a daily run that operates to Newton?

A. Yes.

Q. What time does that customarily leave Des Moines?

A. Between 8 and 10 in the evening.

Q. Where does that go?

A. It is a drop-off trailer and the tractor changes trailers at Newton and goes on to Chicago.

Q. Do I understand, then, that tractor would start out of Des Moines for Newton with a trailer of freight destined Newton?

A. That is correct.

Q. And at Newton it drops the semitrailer?

A. That is right.

Q. And the tractor continues on east?

A. He picks up another trailer there and makes pickups at Grinnell and Iowa City and goes on into Chicago. That is, for freight destined Chicago.

Q. How does that Newton unit return to Des Moines? Does it come back to Des Moines westbound?

A. The same method it goes to Chicago. They drop off the trailer out of Chicago at Newton and he picks up a trailer and comes to Des Moines.

Q. You mean each night there is a tractor that drops a trailer off at Newton and picks up the trailer there for Des Moines westbound?

A. That is right.

[fol. 1790] Q. Now, you said something about a run that goes out to Grinnell.

A. That is right.

Q. Tell us about that run.

A. Well, that run handles Kellogg and Grinnell proper.

Q. What time does that leave Des Moines?

A. Around 10 o'clock in the evening.

Q. Does that perform any pickup or delivery service at Newton?

A. No.

Q. What is the first stop it makes?

A. The first stop is Kellogg.

Q. Does that handle merchandise for Kellogg and also handle shipments to Midwest Metal Stamping Company and the One Minute Washer?

A. That is right.

Q. That run goes on to Grinnell?

A. That is right.

Q. It peddles the freight for both Kellogg and Grinnell, and does it pick up any freight at Grinnell?

A. Yes. You see, that runs at night. He puts the freight in the freight house, then he loads up at Grinnell and at Kellogg and returns to Des Moines.

Q. What time does that truck customarily get back into Des Moines?

A. Between 4 and 5 o'clock in the morning.

Q. With respect to these runs you have told us about, your Colfax peddler, your Grinnell peddler and this New- [fol. 1791] ton run where they drop the trailer at Newton, do you handle any rail freight on those runs?

A. Yes.

Q. Do you get that rail freight at the railroad freight house in Des Moines?

A. That is right.

Q. Could you tell us about what proportion on those runs would normally be railroad billed freight and what proportion would be Motor Transit billed freight?

A. I would say about 10 to 15 percent would be rail and the balance motor.

Q. That is by weight?

A. Yes.

Q. All right. Now, you have told us about this service out of Des Moines east. How frequently are these runs operated you have told us about? On what schedules?

A. Daily.

Q. Does that include 5 or 6 days a week?

A. With the exception of Colfax it is 6 days a week, and we operate the Colfax run 6 days a week on return.

If the shippers have anything on that line they want picked up on the 6th day, or Saturday, we usually pick it up.

Q. Now, is there a run out of Des Moines that handles shipments beyond Grinnell?

A. Oh, yes; we have one that runs into Davenport and [fol. 1792] Muscatine that peddles Brooklyn, Marengo, Iowa City, Lone Tree, Nichols and Muscatine, and he changes trailers there and goes into Davenport.

Q. You mean that trailer leaves Des Moines and peddles those towns and winds up at Muscatine, that semitrailer?

A. That is right.

Q. And at Muscatine he picks up another semitrailer—that is right—and goes on into the terminal at Davenport?

A. That is right.

Q. Then, I suppose there is a corresponding movement westward to balance that?

A. That is right.

Q. Now, that serves these towns of Brooklyn and Marengo and Ladora and Victor and these towns out of Des Moines, does it?

A. Well, Victor, Ladora, Homestead and Tiffin are served out of Iowa City.

Q. So anything for those towns on that run would be handled via Iowa City?

A. That is right.

Q. All of these runs you have told us about so far, do they handle both interstate and intrastate freight?

A. That is right.

Q. And they also handle both rail billed freight and motor billed freight?

A. Yes.

[fol. 1793] Q. Your run that winds up at Muscatine, where there is an interchange of semitrailers, that operates in the same manner?

A. That is right.

Q. What about your service into Chicago? I take it that your movement between Chicago and Des Moines on your motor billed freight is somewhat heavier than your movement on your motor billed freight from Des Moines east. Is that right?

A. It is.

Q. How many trucks do you customarily get into Des

Moines from Chicago, or that handles Chicago freight? And do you turn around and return back to Chicago?

A. Between four and five.

Q. How are those returns dispatched from Des Moines?

A. Usually dispatched empty.

Q. Do you handle any rail billed freight between Des Moines and Chicago at the present?

A. No, sir.

Q. Now, prior to the restriction which was imposed and became effective in August 1951, what is the fact as to whether you were dispatching those trucks eastbound out of Des Moines and handling railroad freight destined to Chicago in those units?

A. We were handling from one to two loads to Chicago.

Q. From Des Moines to Chicago?

A. That is right.

Q. And those units which were formerly handling rail [fol. 1794] billed freight out of Des Moines, what kind of freight do they handle now?

A. None.

Q. From Des Moines east?

A. That is right.

Q. They run empty from Des Moines clear back to Chicago?

A. That is right.

Q. Now, prior to the month of August 1951 did you on occasion have truckload motor billed freight out of Des Moines to Chicago or points east of Chicago?

A. Yes; we averaged from one to two truckloads a day.

Q. And did that service balance your movement and get your equipment back to Chicago?

A. That is right. Along with the rail freight we were able to get the equipment back to Chicago and from Chicago to Des Moines.

Q. And now, without any truckload freight out of Des Moines, you are unable to load those trucks on the return movement from Des Moines to Chicago?

A. That is right.

Q. A moment ago you referred to trucks moving between Chicago and Des Moines. Were you referring to shipments moving from Chicago to Des Moines proper or also shipments from Chicago to Des Moines and for distribution on west?

A. Well, shipments moving from Chicago to Des Moines on west through the Omaha gateway, we interline those shipments here at Des Moines.

[fol. 1795] Q. That is, you are at the present time?

A. Since the restriction, yes.

Q. So, if you have a shipment that is picked up in the Tri-Cities area destined to Omaha, Nebraska, or if you have a shipment from Chicago destined to Omaha, Nebraska, what do you do with it here?

A. We interline here at Des Moines.

Q. Who gets the haul from Des Moines to Omaha on that?

A. Roberts.

Q. You customarily have been interlining with Roberts?

A. Yes.

Q. Would there be also shipments from Chicago to points north of Des Moines that would come in on those trucks as well as shipments destined to points on the Kansas City line and beyond?

A. That is right.

Q. How frequently have you found it necessary to refuse or turn down requests for shipments in excess of 5,000 pounds or truckload shipments?

A. Well, I had to turn down a regular movement of truckload freight from Des Moines to Chicago and on into the east to be interlined at Chicago and the same movement from the east to Des Moines this last week.

Q. You mean this present week?

A. Yes.

[fol. 1796] Q. Who was the shipper that tendered that business or inquired about it?

A. John Deere Des Moines Works.

Q. The Des Moines Works of the John Deere Company where they make cornpickers and parts and agricultural implements?

A. That is right.

Q. Now, you say that prior to the restriction you had about how many trucks coming into Des Moines daily from Chicago and points east?

A. Before the restriction?

Q. Before the restriction.

A. Oh, it varied; five, six to seven.

Q. About how has that been running since the restrictions were imposed?

A. Five at the most.

Q. Five is the most you have had?

A. Yes.

Q. With respect to service west out of Des Moines, I wish you would tell us what service you operate west out of Des Moines.

A. Peddlers?

Q. Yes.

A. We have a peddler that makes Dexter, Stuart, Menlo, Casey, Anita, Adair, and returns to Des Moines.

Q. Is that operation as far west as Adair?

A. Anita.

[fol. 1797] Q. Does that then turn around or exchange trailers?

A. It turns around there now under the present operations.

Q. Anita is how far from Des Moines?

A. Well, I would say around 55 miles.

Q. Well, it is 86 miles to Atlantic approximately, and Anita is about 70 miles, isn't it?

A. That is right.

Q. Is that a daily run or daily except Saturday?

A. It operates Saturday.

Q. Saturdays also?

A. Yes.

Q. Now, do you have a run out here that has its terminus at Audubon?

A. Yes.

Q. What time does that run customarily leave Des Moines?

A. Around 3 a. m. in the morning.

Q. Is that daily except Sunday or daily except Saturday?

A. Daily except Sunday. He makes Atlantic, Brayton, Exira, Hamlin and Audubon and returns to Des Moines.

Q. What time of day does this peddler run which goes to Anita leave Des Moines?

A. Around 7 a. m.

Q. What time does it generally get back?

A. Between 3 and 4.

Q. How has that run been with respect to tonnage?

[fol. 1798] A. Well, that tonnage has dropped since this restriction. He has been leaving Des Moines with around 10,000 to 12,000 pounds and most generally returns empty.

Q. You say that out of Des Moines there is about 10,000 to 12,000 pounds?

A. Yes.

Q. When you were running that trailer through and interchanging at Anita with the Omaha run, how was the weight then?

A. It run between 16,000 and 20,000 pounds daily.

Q. What other peddler service do you operate daily out of Des Moines west?

A. Well we have a truck from Des Moines to Omaha which peddles Oakland.

Q. What time does that leave Des Moines?

A. Around 10 o'clock in the evening, and he drops off Oakland shipments and goes on into Omaha.

Q. Do you have any other Omaha service you dispatch out of Des Moines now?

A. That is all.

Q. What trucks did you operate out of Des Moines towards Omaha prior to the imposition of these restrictions?

A. We usually operated two to three.

Q. That is west from Des Moines with Omaha freight and including Chicago-Omaha freight?

A. Chicago and Tri-Cities.

[fol. 1799] Q. And now?

A. We are operating one.

Q. There is one semitrailer that operates between Des Moines and Omaha?

A. That is correct.

Q. What service do you operate between Omaha and Des Moines?

A. One.

Q. You have that unit coming back?

A. Yes.

Q. What time does it customarily leave Omaha for Des Moines?

A. Around 7 or 8 in the evening.

Q. And gets into Des Moines around midnight or a little later?

A. Yes.

Q. Do you have any other service west out of Des Moines than what you have already told us about? Is there an Atlantic run now from Des Moines to Atlantic, or is that the Audubon run?

A. That is the Audubon run.

Q. He handles Atlantic freight but also handles Audubon freight and freight for points on the Audubon line?

A. Yes.

Q. You don't operate any peddler run to Griswold from Des Moines now, do you?

A. Not now; we used to.

Q. At the time you had that run, how was that operated?

A. The same trip I described to Anita, then on to Walnut, [fol. 1800] Griswold and Lewis and returned to Des Moines.

Q. That was all on one day's run?

A. That is right.

Q. How do you handle Lewis and Griswold freight?

A. That goes on the Atlantic truck.

Q. On this truck from Atlantic to Audubon?

A. Yes.

Q. This Audubon truck leaving Des Moines with Atlantic and Audubon and other freight, about what is the usual load on that truck?

A. It runs around between 10,000 and 15,000 pounds.

Q. Do you get any business out of Audubon in return movement?

A. Very little.

Q. And out of Audubon there is very little return shipment?

A. That is right.

Q. What about this Anita peddler? I believe you said that came back practically empty.

A. It arrives in Des Moines practically empty.

Q. So those operations are unbalanced operations? That is the Audubon run and the Anita peddler run practically empty on the return trip?

A. That is right.

Q. What about your Cedar Rapids service from Des Moines?

A. We have two trucks to Cedar Rapids.

Q. How do they operate? Tell us about their schedules. [fol. 1801] A. They are turn-around operations. The drivers go to Cedar Rapids, change trailers. They peddle freight also at Brooklyn and Grinnell.

Q. Let's get that in a little more detail. You have a truck that leaves Des Moines for Cedar Rapids?

A. Yes.

Q. About what time?

A. Around 9 o'clock in the evening.

Q. What time normally does that truck arrive in Cedar Rapids?

A. Around midnight.

Q. That is a distance of approximately, I believe, 118 or '19 miles to Cedar Rapids.

A. Something like that.

Q. Does the tractor pick up a semi-trailer at Cedar Rapids destined to Des Moines?

A. Yes.

Q. Do both the eastbound and westbound runs serve any intermediate points?

A. Yes. They serve Marengo, Brooklyn, Grinnell and Newton on the return trip.

Q. Normally there is not much peddling done on the eastbound trip out of Des Moines, is there?

A. No.

Q. Now, you say you have two trucks to Cedar Rapids from Des Moines. Where does the other truck run?

[fol. 1802] A. They both leave around the same time.

Q. Oh, there is enough business between Cedar Rapids and Des Moines to require more than one truck?

A. Yes.

Q. And is that a fairly well balanced load in both directions, or is it heavier one way?

A. It is heavier from Des Moines to Cedar Rapids than from Cedar Rapids to Des Moines.

Q. But you do have two units operating each night between Cedar Rapids and Des Moines?

A. That is right.

Q. Now, what service do you have into Muscatine? Let's say from Omaha to Muscatine. Is that handled on this run you spoke about that goes down from Iowa City through Lone Tree and Nichols and where the semitrailer is dropped at Muscatine?

A. That is right.

Q. Do you have any other service between Cedar Rapids and Des Moines other than the two units you have told us about?

A. From Cedar Rapids to Des Moines?

Q. Either way. Do you have a unit out of Cedar Rapids for Des Moines other than these two you have told me about?

A. Yes, they operate one trailer out of Cedar Rapids to Des Moines and return back to Cedar Rapids.

Q. What type of freight does that trailer carry?

A. That is usually rail freight.

[Vol. 1803] Q. Is that operated almost entirely for rail freight?

Q. I suppose if there was an overflow or more than the other trucks could handle, you would use that also for motor billed freight?

A. That is right.

Q. Do you solicit business for the Rock Island Railroad here?

A. I do not.

Q. Who is your immediate superior in the organization of the Rock Island Motor Transit Company?

A. Mr. Carl Bergen.

Q. Now, you have general supervision, I take it, over the movement of the trucks which operate over routes that terminate here in Des Moines, do you not?

A. Yes.

Q. Now, there is a route down by way of Prairie City, Pella, Oskaloosa and Ottumwa, thence over to Fairfield, over into Davenport. Do you dispatch the trucks over that line?

A. Yes.

Q. How many runs do you have on that route?

A. We have one truck from Des Moines to Ottumwa, and one from Oskaloosa to Des Moines and return, and one from Fairfield to Des Moines and return, and the one you described and which we call the south peddler. He hauls all the way to Davenport.

Q. And that makes these smaller intermediate towns?

[fol. 1804] A. Yes.

Q. How would a shipment from Omaha destined to Prairie City or Oskaloosa be handled?

A. It would be handled through Des Moines. We transfer it at Oskaloosa to the Oskaloosa trailer.

By Mr. Fowler:

Q. The next?

A. Princeton, Washington, and Wellman.

Q. Now, I assume that you determined that fact by a check of the available motor carrier guides, is that correct?

A. That is correct, sir.

Q. Now you, of course, have a service available to those points by Rock Island Railroad?

A. That is correct, sir.

Q. So that any shipment moving to those points under rail billing could be handled by the Rock Island Railroad?

A. That is right.

Q. Either by rail car or by motor truck?

A. Correct.

Q. And if, of course, handled on motor truck, it would have to be handled on rail billing?

A. Correct.

Q. What objection would there be to such a service, assuming that the Commission should deny this present application? What is wrong with that kind of service? In other words, let's take a shipment moving from Omaha to Durant, we will say. As I understand, it could be [fol. 1828] tendered to the Rock Island Railroad on rail billing and then would be transported from Omaha to Durant by truck.

Mr. Howland: Well, partly by truck and partly by railroad.

Mr. Fowler: You can get through Des Moines, can't you?

Mr. Howland: No, we have a key point at Des Moines.

Mr. Fowler: Then a shipment moving from Omaha to Durant, Iowa, under the permanent authority which the railroad has, would require that the shipment be handled from Omaha to Des Moines on truck or rail, and from Des Moines to the destination at Durant by the converse of that truck or rail, is that correct?

Mr. Howland: That is correct.

Mr. Nolan: This is off the record.

(Discussion off the record.)

Q. And that would require a transfer here at Des Moines?

A. That is right.

Q. Do you also dispatch trucks out of Des Moines for the north towards Minneapolis?

A. Yes.

Q. What runs do you have there?

A. We have a peddle run from Des Moines to Mason City and return.

Q. What time does it customarily get out of Des Moines?

A. Around 7 o'clock in the morning.

Q. And that goes north over U. S. Highway 65?

A. That is right.

Q. Up through Iowa Falls to Mason City and return? That is, it returns to Des Moines.

A. Yes, and peddles all intermediate points.

Q. All right. What other runs?

A. We have two trucks to St. Paul. Usually one of those is full straight through; the other one peddles Mason City, Albert Lea and Owatonna.

Q. There are no other runs dispatched out of Des Moines [fol. 1805] than those you have told us about-- Wait a minute. There is one to Kansas City, is there not?

A. That is right.

Q. What trucks are dispatched from Des Moines towards Kansas City?

A. Usually two a night, and they leave around 9 or 10 at night. One of them usually peddles Indianola.

Q. Is that the only intermediate point you serve between Des Moines and Kansas City?

A. Yes.

Q. Now, you have both inter and intrastate freight on all the runs out of Des Moines on U. S. Highway 6 between Omaha and Davenport, do you not?

A. Yes, with the exception of Dexter, Stuart and Menlo.

Q. From Des Moines that is restricted on interstate freight?

A. That is right.

Q. A shipment originating from Davenport for Dexter, Stuart or Menlo, you can handle?

A. That is right.

Q. So you have inter and intrastate freight on all these runs?

A. That is right.

Q. And you can handle, for instance, from Cedar Rapids to those towns to which you referred?

A. Yes.

Q. Now, you have inter and intrastate rights on Harlan [fol. 1806] and those points located on what was known as the Fredrickson route?

A. That is right.

Q. Now on the route down by way of Ottumwa and over through Fairfield and back up to Davenport you have both inter and intrastate freight without restrictions, do you not?

A. That is right.

Q. And that covers the whole of that line?

A. That is right.

Q. Now, on the Kansas City line you have only interstate freight, I believe.

A. That is right.

Q. What about the operation north towards Mason City?

A. Between Des Moines and Mason City we only have interstate rights for freight on those peddle runs.

Q. Now you do have intrastate freight on your Mason City run, do you not?

A. Yes.

Q. And do you handle it?

A. Yes.

Q. How about the St. Paul run you referred to?

A. We have both intra and interstate rights in Minnesota to St. Paul.

Q. You handle both intra and interstate freight in Minnesota on that run?

A. That is right.

[fol. 1807] Q. Now, is there any other service out of Des Moines other than we have discussed here?

A. No, sir.

Mr. Howland: I believe you can cross examine.

Exam. Carpenter: Cross examine.

Mr. Fowler: I have been, just been informed by counsel that under the permanent authority held by the railroad, a shipment moving from Omaha to Durant, Iowa, for example, would have to be handled by rail car to Des Moines, and by truck from Des Moines to Durant.

Mr. Howland: That is correct.

By Mr. Fowler:

Q. Now, of course, a shipment moving from Omaha—withdraw that.

By Mr. Fowler:

Q. A shipment tendered to the Rock Island Railroad at Omaha destined to any point west of Des Moines on U. S. [fol. 1829] Highway 6 would be handled by truck even though it was moving under rail billing, is that your understanding of it?

A. That is my understanding.

Q. All right, now. Let me ask you what is wrong with that type of service?

A. First of all the interchange of traffic, from my experience.

Q. Just a moment, please. I didn't say anything about interchange. I took a shipment originating at Omaha, moving to one of these points.

Mr. Howland: There is an interchange between the rail and truck lines.

A. Yes, sir. That is what I had in mind.

Mr. Fowler: I apologize. I am sorry.

A. The interchange of traffic from the rail to the truck, in my opinion, would cause a delay.

By Mr. Fowler:

Q. Now, what process do they have to go through at Omaha to accomplish that?

A. First of all would be the loading of the car at Omaha, then to Des Moines, and then to the truck here, truck at Des Moines.

Cross examination.

By Mr. Bradshaw:

Q. Mr. Tiedemann, you testified that approximately 10 to 15 percent of the freight going out of Des Moines was rail freight.

A. On peddle runs, yes.

Q. Is that on all peddle runs?

A. Yes.

Q. Can you make an estimate of the amount of rail freight coming into Des Moines on these same peddle runs?

A. Well, it is very light.

Q. But there is some?

A. There is some, yes.

Q. You mentioned that the freight into Cedar Rapids from Des Moines was heavier going into Cedar Rapids and lighter coming back. That has been a normal situation right along, hasn't it?

A. Just since the restrictions.

Q. How did the restrictions affect that?

A. On account of the 5,000-pound restriction. Before the restriction we used to handle for several firms having shipments over 5,000 pounds.

[fol. 1808] Q. Who is handling that now?

A. I don't know.

Q. With the exception of the run to Chicago from Des Moines you handle both rail and motor freight on all these trucks, do you not?

A. No, sir. We do not handle any rail freight from Des Moines to Omaha or Kansas City or Davenport or the Tri-Cities.

Mr. Bradshaw: That is all.

Redirect examination.

By Mr. Nolan:

Q. Mr. Tiedemann, how many employees did you have under your supervision at the dock here in the Des Moines terminal prior to the restrictions?

A. Sixty-two.

Q. Well, now, doesn't the Rock Island Transit Company start a truck operating on rail billed freight from Omaha eastbound to those points?

A. Yes, sir.

Mr. Howland: What points?

Mr. Fowler: Points west of Des Moines on U. S. Highway 6.

[fol. 1830] By Mr. Fowler:

Q. Why would that require an interchange?

A. Would you mind repeating the question? If my understanding is correct, it would require an interchange at Des Moines.

Q. Well, let's assume for the purposes of my question, that the Rock Island Railroad now has permanent authority to transport a shipment originating at Omaha under the motor carrier authority, hauled by its affiliate directly from Omaha to points west of Des Moines on U. S. Highway 6 by truck?

A. Yes, sir.

Q. Now, the evidence in this record shows that rail shipments and motor carrier shipments are handled by the same pick-up truck in Omaha?

A. That is correct, sir.

Q. So let's assume further, for the purpose of this question, that a shipper tenders a five hundred pound shipment to the Rock Island Railroad under rail billing. It would be picked up by a Rock Island pick-up truck, and would be delivered to the freight depot, where both of them have their freight dock?

A. Right, sir.

Q. And that shipment would be transported then by truck from Omaha to the destination point on rail billing?

A. Yes.

Exam. Carpenter: When you have spoken of "truck" you meant the Rock Island Motor Transit?

Mr. Fowler: That is right.

[fol. 1831] By Mr. Fowler:

Q. Now, what do you see wrong with that kind of service?

Q. How many did you have after the restrictions were imposed? At the time of the other hearing?

A. Forty-three.

Q. And how many do you have at this time?

A. Twenty-seven.

Mr. Nolan: That is all.

Mr. Howland: That is all.

Mr. Bradshaw: Nothing further.

Exam. Carpenter: You will be excused.

(Witness excused.)

Mr. Landau: I would like to enter my appearance. My name is William A. Landau; my address is 1307 East [fol. 1809] Walnut Street, Des Moines, Iowa. I am admitted to practice before this Commission. Am appearing on behalf of Eldon Miller, Inc., intervenor in opposition.

Exam. Carpenter: We will adjourn until 9:30 a. m., March 31, 1952, to this same place.

(Whereupon, at 5:07 p. m., March 28, 1952, an adjournment was taken in this matter until 9:30 a. m., March 31, 1952.)

[fol. 1809a] TRANSCRIPT OF PROCEEDINGS OF MARCH 31, 1952

APPEARANCES: (Additional)

R. H. HEINECAMP, Manager of the Transportation Department, Omaha Chamber of Commerce, Omaha, Nebraska, 108 South 18th Street, Elks Club Building, Omaha, Nebraska, appearing for the Omaha Chamber of Commerce, intervenor in support.

[fol. 1810] Exam. Carpenter: You may proceed whenever you are ready.

Mr. Howland: We will ask Mr. Heinecamp to be sworn.

A. No, I can't.
Q. Now——

Exam. Carpenter: I don't think there is an answer. Read that question and read the answer. You haven't answered the question.

(Question and Answer read.)

Mr. Fowler: There is nothing wrong with the service. That is his answer.

By Mr. Fowler:

Q. Now, Mr. Heinecamp, as I understand it, there are some differences in the tariff requirements as to packing, freighting, etc., between rail billing and motor carrier billing?

A. That is correct.

Q. Now, without going into too much detail, will you explain to me the advantages to a shipper with respect to those particular factors on motor carrier billing over rail billing?

A. I can only speak in very broad, general terms as a motor carrier versus railroad. From an over-all classification point of view as to packing, is that what you have in mind?

Q. Yes. O. K.

A. Generally speaking there is more liberality with a motor carrier than there is with a railroad. The railroad has more restrictions than a motor carrier in so far as the packing of the goods is concerned.

[fol. 1832] Q. Then there is some benefit to a shipper who tenders his shipments under motor carrier billing than would be true under rail billing wherever the question of packaging and freighting is involved?

A. That is correct.

Mr. Fowler: I believe that is all I have.

R. H. Heinecamp was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Will you state your name, please, so we can all get it?

A. R. H. Heinecamp, Manager of the Transportation Department of the Omaha Chamber of Commerce, Omaha, Nebraska.

Q. How long have you been the Manager of the Transportation Department of the Omaha Chamber of Commerce?

A. Approximately four and one-half years.

Q. And your employment immediately before that time was what?

A. Immediately before that I was employed as Manager of the La Crosse-Winona Traffic Bureau for approximately fourteen months. Prior to that time I was nineteen years with the Chicago and North Western Railway Company, in Chicago, Illinois, in their Traffic Department.

Q. Now, I take it in connection with your position with the Chamber of Commerce you have had occasion to familiarize yourself with the traffic and transportation problems of the Omaha community?

A. I have.

Q. What generally is the nature of the business enter- [fol. 1811] prises located at Omaha that require transportation?

A. It is, Omaha is quite a wholesale center as well as a retail center, but our interest here is more from the wholesale point of view.

Q. In the matter of distribution of goods?

A. That is right, distribution.

Q. From Omaha to points in the territory?

A. That is correct, sir.

Q. Now, Mr. Heinecamp, how many members do you serve in your Transportation Department of the Chamber of Commerce?

A. The membership of the Chamber of Commerce is approximately thirty-five hundred, and that includes wholesalers, retailers, and everybody.

Q. That includes the whole membership?

Redirect examination.

By Mr. Howland:

Q. Mr. Heinecamp, counsel has asked you certain questions about your understanding of the situation of the Rock Island Motor Transit Company, and its ability to render transportation service between Minneapolis and St. Paul and Omaha; and between Kansas City and Omaha. Is it your understanding that at present the Rock Island Motor Transit Company can render service from Omaha or to Omaha from these points in excess of five thousand pounds?

A. My understanding, based upon my understanding they can not.

Q. That is to Omaha?

A. That is right. I am talking about Omaha, nothing else.

Mr. Fowler: Can I bother you a minute? Off the record again.

Exam. Carpenter: Yes.

(Discussion off the record.)

By Mr. Howland:

Q. Now, Mr. Heinecamp, counsel has been talking about shipments moving on rail billing from Omaha to certain [fol. 1833] destinations. Now, it might be possible under the present authority of the Rock Island Motor Transit Company for a shipment to be moved on rail billing from Omaha to a point between Omaha and Des Moines. You said, I believe, you saw nothing wrong with that particular service, is that right?

A. That is correct, sir.

Q. Would that service enable the interline motor carrier service to be performed to destinations between Des Moines and Omaha?

A. I believe it would.

Mr. Howland: Under the present situation.

Mr. Fowler: Let's go off the record again.

(Discussion off the record.)

Mr. Howland: Strike the answer out and read the question.

(Question read.)

A. No, it would not.

By Mr. Howland:

Q. Now, that would be true with respect to the intermediate points between Des Moines and Omaha?

A. Yes.

Q. Now, of course, if the shipment counsel has asked you about were moving from Omaha to a point east of Des Moines on U. S. Highway 6, is it your understanding that the present authority would require movement from Omaha to Des Moines by a boxcar and a transfer there to motor truck, and by motor truck would be handled?

A. That is my understanding, sir.

[fol. 1834] Q. Are there any disadvantages in connection with such a movement as that?

A. Except that the interchange of freight, would be subject to more handling and subject to more damage, and create a greater liability among the carriers, I mean the shipper, damage to his freight.

Q. What about the delay?

A. And the delay, yes, sir.

Q. Now, counsel has asked you about the service of the other truck lines operating between Omaha and Chicago. Is the Burlington Transportation Company, or Burlington Truck Lines I believe is the present name, is that a subsidiary of the C. B. & Q. Railroad?

A. That is my understanding that it is.

Q. Does that company have any maximum weight restriction or key point restriction at present to your knowledge?

A. No.

Q. Now, you referred to the truck line which you described as "Sante Fe" operating between Kansas City and Omaha. Is that truck line a subsidiary of the Atchison, Topeka and Santa Fe Railroad?

A. It is my understanding it is such.

Q. And that operates as a motor carrier?

A. Yes, sir.

Q. The professionals and others. About how many people, that is how many different concerns, firms or corporations do you service and aid in your traffic work?

A. Our actual count on that is two hundred eighty-three. That is based upon, every week we disseminate transportation facts regarding rates, changes in classification, and any changes pertaining to transportation that may affect the City of Omaha as a whole, and that generally goes out to the shippers and receivers of freight.

Q. And you have about two hundred eighty-three you say?

[fol. 1812] A. Approximately two hundred eighty-three.

Q. At the last count?

A. That is correct, sir.

Q. Now, what are the lines of business that make shipments by motor carrier from Omaha into the Iowa territory and into Illinois points?

A. The only way I could answer your question would be from a general knowledge, and that is the wholesale and retail industries of Omaha speaking from a civic point of view. That would be Paxton & Gallagher, and Eggerss-O'Flyng, Carpenter Paper Company, Brandeis, Paxton & Vierling Iron Works, Gate City Steel, etc. We have a cross-section of the various commodities.

Q. Are a substantial number of those shippers interested in transportation in truckload quantities?

A. Yes, they are because I make that statement, at our Transportat*uib* Committee meeting, which is held once a month, any problems that would affect the City of Omaha is brought up before this Transportation Committee. Now, this Transportation Committee is composed of shippers, railroads, and motor carriers, and anything that would affect either one of them is brought up for a general discussion at our Transportation Committee meeting.

Q. You are familiar with the fact, I take it, that the Rock Island Motor Transit Company is operating under a restriction of five thousand pounds maximum weight on any one shipment?

A. I am, sir.

[fol. 1813] Q. Is that, as you have observed, affecting in

any manner the ability of the Rock Island Motor Transit Company to render a comprehensive transportation service to shippers or receivers of freight in the Omaha vicinity?

A. In my opinion the five thousand pounds has impaired us to a certain extent in rendering service, I mean for the Rock Island to render service to the shippers of Omaha, the shippers and receivers of Omaha.

Q. Can you tell us in what respect that has been evident, on what you base your answer?

A. I can only give you an opinion, and that is based upon the fact at different times at our Transportation Committee meeting, when the subject was more or less discussed, that if a shipper, for instance, Paxton & Gallagher was to offer a shipment over five thousand pounds, it would have impaired them. If the Carpenter Paper Company would offer a shipment of over five thousand pounds, it would impair them.

Q. In your judgment is it necessary for a motor carrier, in order to have a sound dependable operation, is it necessary that motor carrier have authority to handle truckload as well as volume shipments in excess of five thousand pounds?

A. In my opinion, the answer is yes because just recently in looking at the financial statement of the Rock Island, why I would say the answer definitely is yes.

Mr. Fowler: I think I will move to strike the last state-[fol. 1814] ment, with reference to the voluntary statement based on purely hearsay.

Mr. Howland: I think probably that should go out. That is you mean the statement based on the financial statement of the Rock Island.

Exam. Carpenter: That portion of the answer is stricken.

By Mr. Howland:

Q. Now, Mr. Heinecamp, are there shippers in the Omaha territory, to your knowledge, who would use the service of the Rock Island Motor Transit Company in making volume shipments into the Iowa territory, particularly points on or adjacent to U. S. Highway 6 if the Rock Island Motor Transit's restriction were removed, or the maximum weight limits substantially increased?

A. That is right, common carrier.

Q. Between Kansas City and Omaha. Now, does that line [fol. 1835] have any restrictions, either with respect to weights of commodities transported, or with respect to key points?

A. No, sir.

Q. Counsel has asked you about the daily merchandise car service available via rail lines. Do you know what the total time in transit by merchandise car service is as compared with truck service?

A. I would say that based upon a recent survey that I made, that there would be, that the motor carriers do offer superior service over the rails by at least from twelve to twenty-four hours.

Q. Now, you have in giving a list of some fifteen or sixteen points that are in Iowa that are affected by this matter on hearing, you have checked the points which have no common motor carrier service except by the Rock Island Motor Transit?

A. That is correct.

Q. And I believe you listed some points on U. S. Highway 6 such as Coralville, Durant, and one or two others, as well as points off of Highway 6?

A. That is correct.

Q. Now, have you checked to determine what the actual transportation service that may be available by other lines to some of these points on U. S. 6, as compared with the service of the Rock Island Motor Transit Company which is being performed?

A. No, I have not.

[fol. 1836] Q. In other words, you have taken merely the service—I will withdraw that. Strike it out.

Q. In other words, you have taken your routing guide and if, for instance, the routing guide shows that West Liberty is a point served by a particular motor carrier, irrespective of the frequency of the service to it, why, you would not have included that in your list of points?

A. That is correct, sir.

Q. And, of course, it is true that to all of these points which are sought to be served by the Rock Island Motor Transit Company between Davenport, Iowa, and Omaha,

Nebraska, that under present conditions there could be no interline motor carrier service into those towns on rail billing?

A. That is correct, sir.

Mr. Nolan: I have got some questions.

Mr. Howland: All right.

By Mr. Nolan:

Q. Mr. Heinecamp, you mentioned the loss of certain payroll and personnel in Omaha upon the cessation or elimination of the Rock Island Motor Transit Company as a motor truck operator independent of the rail connection. Now, I will ask you whether or not, from your observation and contact with the Rock Island Motor Transit Company, if the Rock Island Motor Transit Company, in so far as its personnel is concerned, has been operating independent of the Rock Island Railroad and under a separate setup of its own?

[fol. 1837] A. The Rock Island Motor Transit has been operating separate and distinct from the Rock Island Railroad.

Q. Now, you have been in Omaha a little over four years?

A. Four and one-half years.

Q. And throughout that time up until the restriction, what is the fact as to whether or not the Rock Island Motor Transit Company has been operating during that time, so far as your personal knowledge, as a motor carrier with its own personnel and independent of the Rock Island Railroad?

A. That is correct, sir. They have been operating independent of the Rock Island Railroad.

Q. Now, what is the fact as to whether or not the continuation of the Rock Island Motor Transit Company's service as it existed at the time you came to Omaha and up until the time of the restrictions, would be the addition of a new carrier, or would be merely the continuation of the service and an operation that existed there for at least your duration in Omaha?

Mr. Fowler: That is objected to as leading and suggestive, merely the repetition of an obvious fact. I object to it as immaterial.

A. I believe they would, definitely.

Q. Mr. Heinecamp, are you aware of any truck line operating in the Omaha territory that presently operates with a weight restriction on the maximum weight for any particular shipment?

A. There isn't any to the best of my knowledge.

Q. Now, we have been discussing principally shipments outbound from Omaha to points in the Iowa and Illinois territory on the routes of the Rock Island Motor Transit Company. What about shipments from, to and from Chicago, Illinois, by the Rock Island Motor Transit Company?

A. I don't believe I understand your question, sir.

Q. Well, what I want to get at is, are you aware that [fol. 1815] the Rock Island Motor Transit Company is unable to perform service between Chicago, Illinois, and Omaha, Nebraska?

A. Fully aware of that, sir.

Q. And also in the opposite direction?

A. That is correct, sir.

Q. What has been, as you have observed it, the effect of that restriction?

A. Any competing industries of Omaha, I don't mean industries, wholesale and retail companies, competing with Des Moines, as an example, or Chicago, they are restricted in so far as the volume shipments are concerned.

Q. Now, I take it that there is a substantial amount of transportation service by other carriers, both rail and motor, between Chicago and Omaha. Does it, as you have observed it, the restriction eliminating business of a through character, affect the ability of the Rock Island Motor Transit Company to render a dependable service?

A. That is correct.

Q. And why is that true? How does that work as you have observed it?

A. It works because of the fact that the restriction of the Rock Island Motor Transit, as compared to other carriers.

Q. Do you mean that by that answer, that the Rock Island Motor Transit Company is impaired in rendering a comprehensive, overall service?

[fol. 1816] A. That is correct, sir.

Q. To all shippers?

A. That is correct, sir.

Q. And have you ever had occasion to observe, in your experience, whether the imposition of restrictions of a territorial character, what effect such restrictions have on the ability of the carrier to perform service generally? By that I mean this, have you ever observed whether the shippers of freight generally will be inclined to turn their business over to carriers that have no restrictions on their operation as to territory and anything of that sort?

A. In my opinion the answer would be that they would turn it over to other carriers because of the impaired restrictions.

Q. Omaha has a population of about how many persons?

A. Two hundred fifty thousand.

Q. And we have been talking about the general character of the Omaha industry as a distributing center. Do Omaha concerns have contracts involving National Defense?

A. There are several out there that do.

Q. Can you tell us in what general lines those encompass?

A. It is generally on iron and steel articles, without naming the companies, which I can do if you want.

Q. Processing of various types?

A. That is correct.

Q. And kinds?

[fol. 1817] A. Eaton Metal Products is one that does have a Defense contract.

Q. Do either the materials which are used, or the finished product, move from or to the territory involved in this application?

A. I would say they would move both ways, both inbound and outbound. It is fabricated at Omaha and then shipped out again.

Q. And are those movements in volume quantities, that is above five thousand pounds?

A. Yes, sir.

Q. As well as truckloads?

A. Yes, sir.

Mr. Howland: I think you may cross-examine.

Exam. Carpenter: Mr. Fowler.

Exam. Carpenter: The objection overruled.

A. That the continuation of the Rock Island Motor Transit would be construed, so far as the Chamber of Commerce is concerned, as a new industry, let's put it that way, because we are vitally concerned with the acquirement of new industries.

[fol. 1838] Exam. Carpenter: Read the question.

A. I am sorry if I misunderstood it, Mr. Examiner.

Mr. Fowler: Now, just a moment. You may read the question.

Exam. Carpenter: Read the question.

(Question read.)

A. My answer would be, that would be a new company.

By Mr. Nolan:

Q. Why do you say it would be a new company?

Exam. Carpenter: That is the same answer as you made before.

A. I am sorry.

Mr. Fowler: It is all right. Leave it there. It is all right.

By Mr. Nolan:

Q. I will put it this way. Mr. Heinecamp, the Rock Island Motor Transit Company was doing an unlimited and unrestricted motor carrier business at the time you came to Omaha?

A. That is correct, sir.

Q. And I will ask you whether or not it is your purpose to seek the continuation of the same type of service that the Rock Island Motor Transit Company was affording at the time you came to Omaha?

A. Yes, sir.

Mr. Fowler: That is objected to as leading and suggestive.

Exam. Carpenter: We will let it stand, Mr. Fowler.

By Mr. Nolan:

Q. And whether or not it is a new service or a continuation of an old service, state whether or not you want it to continue.

[fol. 1839] Mr. Fowler: That is objected to as leading and suggestive, immaterial and repetition.

Exam. Carpenter: We will permit him to answer.

A. We are here to see that the Rock Island Motor Transit continues to operate as it previously has.

By Mr. Nolan:

Q. All right. Now, state whether or not the Rock Island Motor Transit Company belongs as a motor transit company to the Chamber of Commerce, independent of the Rock Island Railroad belonging to the Chamber of Commerce of Omaha.

Exam. Carpenter: Read the question.

(Question read.)

Mr. Nolan: I will withdraw that.

By Mr. Nolan:

Q. State whether or not the Rock Island Motor Transit Company is a member of the Chamber of Commerce of Omaha?

A. They are.

Q. State whether or not the Rock Island Railroad is also a member of the Chamber of Commerce?

A. They are.

Q. In other words, they have separate memberships, do they not?

A. Yes, sir.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Mr. Nolan: I want to ask Mr. Heinecamp a couple more questions.

Cross-examination.

By Mr. Fowler:

Q. With respect to this key point restriction, which is intended to prohibit a rail-owned subsidiary from conducting a through motor carrier service between such points as Chicago and Omaha, now, will you please tell me the names of the carriers, and I am speaking now about established motor carriers, that have a service from Chicago to Omaha?

A. I will say the Watson Bros., Merchants Motor Freight, Prucka, Iowa-Nebraska, I believe the Des Moines Transportation, On-Time, Union, Union Freightways, Burlington-Truck Lines, Independent Truckers. That is about all of them.

Q. So at the present time you have a service by established, independent motor carriers operating between Omaha and Chicago by the carriers you have just named? [fol. 1818] A. Yes, sir.

Q. And that is regular established service, is it not?

A. Yes, sir.

Q. And these carriers, all that you have named are substantial carriers?

A. Yes, sir.

Q. Now, do you have any idea that you need any more motor carrier service between Chicago and Omaha?

A. I will say this, that certain shippers may have a preference for the Rock Island Motor Transit. I would say that there are fifteen towns that would not be served except by the Rock Island Motor Transit.

Q. Now, Mr. Heinecamp, my question, will you read my question to the witness, please?

Exam. Carpenter: Read the question.

(Question read.)

A. I would say yes from a selfish standpoint. If I may qualify that answer, I would be glad to.

By Mr. Fowler:

Q. I think you better.

A. Because, if the Rock Island Motor Transit is not

granted a certificate of convenience and necessity in so far as Omaha, I am speaking of Omaha as a specific point of interest, it would mean the loss of a payroll to the City of Omaha of approximately around seventy-five thousand dollars. It would also mean the curtailment of, laying off [fol. 1819] certain employees. I think in the previous hearing I testified approximately to the same statement.

By Mr. Fowler:

Q. Where do you get all of this information about the financial condition of the Rock Island Motor Transit, and how it is going to affect its employees? Do you work for the Rock Island Railroad?

A. No, sir.

Q. Where do you get all of this inside information you seem to have about this company?

A. Because of checking, sir, with the Rock Island Motor Transit.

Q. Do you claim that you have personal knowledge, and are qualified to state?

A. No, sir.

Q. That if this key point restriction was left on there would be a reduction in payroll at the Omaha terminal of the Rock Island Motor Transit Company of seventy-five thousand dollars a year?

A. No, sir, I do not have the personal knowledge to that effect.

Q. All right. Now, let me ask you again, you are the Manager of the Transportation Department of the Omaha Chamber of Commerce, and I am assuming, for the purpose of this question, you have some knowledge of the service available?

A. Yes, sir.

Q. To the members of your Association. Now, I want you to give me your opinion as to whether or not based on public convenience and necessity, there is any need for any addi- [fol. 1820] tional motor carrier service between Omaha and Chicago.

Mr. Nolan: Just a minute. That is objected to as argumentative, not proper cross-examination because under the

[fol. 1840] Exam. Carpenter: Mr. Nolan.

By Mr. Nolan:

Q. Mr. Heinecamp, as I understand your answers now, you have no personal knowledge as to the physical handling of freight tendered to either the Rock Island Railroad, which may move part way by truck, or the physical handling of freight which is tendered the Rock Island Motor Transit Company?

A. That is correct.

Q. You have never been down there?

A. No, sir.

Q. Have not handled or followed any shipments for either company, isn't that true?

A. That is true, sir.

Q. And isn't it also true you don't know what factors that may cause one shipment to be expedited and another shipment delayed?

A. That is correct, sir.

Q. And you don't know the physical handling or requirements of a shipment tendered to the Rock Island Railroad, which leaves out of Omaha on motor truck on rail billing, isn't that true?

Mr. Fowler: That is objected to as immaterial, not proper redirect examination, an attempt to argue and impeach his own witness.

Mr. Nolan: This isn't my witness. I appear here as an intervenor.

Mr. Fowler: I think he is your witness.

Exam. Carpenter: Go ahead.

[fol. 1841] A. Will you repeat the question again, please?

Exam. Carpenter: Read the question.

(Question read.)

A. That is correct.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

record made here the Rock Island Motor Transit Company has been in business for many years serving the City of Omaha, and I think that the question of additional motor service there would be the question of whether or not there is need for the continuation of the service of the Rock Island Motor Transit Company, and the question is wholly impartial and argumentative.

Mr. Fowler: I move to strike the objection of counsel on the grounds it is more of an observation, and merely the statement of counsel. Further, the lawyer that made that objection is not presumed to be examining the witness.

Mr. Howland: I will make the objection in that case.

Exam. Carpenter: All of the objections are overruled. Go ahead and answer the question.

Mr. Fowler: Read the question to the witness.

(Question read.)

A. My answer is yes.

By Mr. Fowler:

Q. For the reason?

A. For the reason, if I may develop my analogy, you have half a dozen railroads, or more, serving Omaha and Chicago, the North Western, the Burlington, the Milwaukee, the Great Western, and other towns, plying between Omaha and Chicago, and I think competition is a helpful commodity for everybody concerned, sir.

[fol. 1821] Q. Now, are you talking about competition between railroads?

A. No, I am developing my analogy, sir.

Q. Will you explain that to me, please? I don't get it.

A. Because of the fact there are a certain number of common motor carriers operating between Omaha and Chicago there with the Rock Island Railroad, serving the same points between Omaha and Chicago. It is my analogy that the railroads who are serving the same towns are in competition with other railroads.

Q. Well, now, do these other railroads have a motor carrier service in addition to their rail service between Chicago and Omaha?

A. I think the Burlington Railroad does.

Exam. Carpenter: Are there any further appearances at this time? Are there any further appearances at this time?

Mr. Heinecamp: R. H. Heinecamp, Manager of the Transportation Department, Omaha Chamber of Commerce, 108 South 18th Street, Elks Club Building, Omaha, Nebraska, as an intervenor in support of the application.

Mr. Howland: I will call Mr. W. F. Peterson.

Exam. Carpenter: How would you like to take a five minute recess?

Mr. Howland: I think it might be a very good time.

(Short recess.)

W. F. PETERSON was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. State your name, please.

A. W. F. Peterson.

Q. And you live in Des Moines, Mr. Peterson?

[fol. 1842] A. I do, yes.

Q. And I believe you are General Manager of the Rock Island Motor Transit Company, the applicant here?

A. I am.

Q. How long have you been connected with the Rock Island Motor Transit Company?

A. Since February, since January 20, 1937.

Q. And prior to that time what had been your business?

A. Since 1928 until that time I had owned and operated a truck line since 1928.

Q. And that truck line was located?

A. Located in Hutchinson, Kansas.

Q. And served an area extending west and northwest?

A. It extended from Wichita, Kansas, west to, all of the area in southwestern Kansas and part of the time to Pueblo and Denver.

Q. You are familiar with the application which is filed in this case?

Q. Do any of the others?

A. The Chicago Great Western has a certain agreement with Watson Bros. hauling their commodities between Chicago and Omaha on flat cars.

Q. Well, that is, is just the regular tariff rate where the motor carrier uses rail flat car service. That is all that is.

A. It is a question of divisional arrangement, so much per car and so much per mile.

Q. Then that arrangement is, Watson loads on flat cars at Omaha or Chicago its freight, and it is hauled by rail on flat cars at the tariff arranged?

A. That is right, sir.

Q. There is no other railroad you know of, outside of [fol. 1822] the Rock Island Railroad, and perhaps the C. B. & Q., that has any motor service in addition to its rail service between Chicago and Omaha?

A. That is correct.

Q. Now, what is your opinion as to whether or not the fact that the Rock Island Railroad has this truck affiliate gives it a great, definite advantage over the other railroads serving Omaha?

Mr. Howland: That is objected to as argumentative in form, and is not proper cross-examination.

Exam. Carpenter: The objection sustained.

Mr. Fowler: Well, now, if the Examiner please, I am not going to quibble with you about it, but it is an issue in this proceeding as to what effect this competition has with other railroads, and if you don't want me to develop it, I won't, but it is an issue in this proceeding.

Exam. Carpenter: Objection sustained.

By Mr. Fowler:

Q. Now, with respect, you understand that the Rock Island Motor Transit Company also has a motor carrier service between such points as Minneapolis, St. Paul and Omaha?

A. Yes, sir.

Q. And do you understand there is any restriction on its service between those two points at the present time?

A. No, I don't.

A. I am, yes.

Q. And I don't believe the record ought to show your age, Mr. Peterson.

A. I am fifty-four years old.

Q. Mr. Peterson, I believe that the White Line Motor Freight Company was the first of the motor carrier operations that was undertaken by the Rock Island Motor Tran- [fol. 1843] sit Company. I am correct in that?

A. You are correct in that.

Q. Now, the Rock Island Motor Transit Company generally operates between what points? Just give us the general picture of the operation.

A. The System?

Q. Of the Rock Island Motor Transit Company, with respect to the points be een which it operates, and the type and character of the operating authority which it holds in various places.

A. It operates from Chicago, Illinois, on the northeast, through Davenport, and it operates down into Peoria, Illinois, through Joliet, La Salle, Peoria, Geneseo, through Wyoming, and on the various lines of the Rock Island Railroad in Illinois. It operates in Iowa from Davenport to Council Bluffs along Highway 6. It parallels the railroad from Davenport through Muscatine, Columbus Junction, Eldon, Ottumwa, along the main line clear down to the Missouri-Iowa line at a point near Lineville, Iowa. It operates north paralleling the railroad from Des Moines to all points to the Iowa-Minnesota State line. It operates up to Cedar Rapids and up what is known as the Decorah branch.

Q. Well, let's first get the operations in which you have unrestricted motor carrier authority.

A. We have unrestricted motor carrier authority on?

Q. Well, on the lines you have enumerated up to date you have unrestricted motor carrier authority, do you not? [fol. 1844] A. No, not in all cases. We do not have on the segment from Peoria to Rock Island, on the Wyoming, what is known as the Rip Track of the Rock Island.

Q. Rip Line?

A. Rip Line.

Q. Of the Rock Island.

Q. So far as you know there is no restriction on that [fol. 1823] service between those points at the present time?

A. That is correct.

Q. Now, what established motor carriers are now serving the Twin Cities and Omaha?

A. We have Watson, Merchants Motor Freight, Union, Union Freightways. I believe that is all to the best of my knowledge. There may be more. I don't know.

Q. Those are all established carriers?

A. Yes, sir.

Q. Substantial carriers?

A. Yes, sir.

Q. And members of your Association use them regularly, do they not?

A. Yes, sir.

Q. In the transportation between those points?

A. Yes, sir.

Q. Now, you are also aware, I assume, that the Rock Island Motor Transit Company has some authority and is seeking authority to have a motor truck service between Kansas City and Omaha, is that your understanding?

A. That is my understanding, sir.

Q. And is it your understanding there was any restriction at any time on that service?

A. Not to the best of my knowledge.

Q. Now, what are the established carriers that operate [fol. 1824] between Kansas City and Omaha?

A. Watson Bros. and Union.

Q. Merchants have any?

A. I believe Merchants. Now, I don't know.

By Mr. Howland:

Q. That is Merchants via Des Moines?

A. That is right, sir.

Q. Does the Santa Fe operate there?

A. Yes, the Santa Fe does operate. Thank you.

By Mr. Fowler:

Q. That is a regularly established service?

A. Yes, sir.

A. In Iowa, other than the White Line we have, which is known as the White Line operation from Des Moines, from Davenport through Des Moines to Council Bluffs and up to Cedar Rapids, that is the only restriction that we have on interstate traffic is the five thousand pound restriction on that particular line. Now, in Minnesota.

Q. Well, now, wait a minute. You have some operations that you acquired out in western Iowa, extending between Atlantic, Council Bluffs and Audubon, Omaha and Harlan and certain of the intermediate points. When were those acquired?

A. Those were acquired under what is known as the Frederickson authority and the Atlantic Motor Freight authority.

Q. And those, all of those rights at the time of the acquisition were without restriction, I believe, that you refer to?

A. That is correct.

Q. Insofar as interstate commerce is concerned?

A. That is correct.

Q. You omitted, I believe, to refer to the line via U. S. Highway No. 163 and 63, between Ottumwa, Iowa, and Des [fol. 1845] Moines, Iowa. That was subsequent, that was an acquisition subsequent to the original White Line acquisition, was it not?

A. That is correct, and it was unrestricted.

Q. It was unrestricted. Now, from Des Moines toward Kansas City on U. S. Highway 69, did the Rock Island Motor Transit Company acquire any authority in there?

A. They acquired what is known as the Clark Truck Line, with operating rights from Kansas City to Des Moines. That had authority into Indianola as the only intermediate point that had in interstate authority between Kansas City and Des Moines.

Q. Now, with respect to the line north of Des Moines, I believe that was the Bell acquisition, acquired in 1938, was it not?

A. That is correct, and it had operating rights between Des Moines and Minneapolis and St. Paul, and practically all intermediate points, except we did pick up some off-line points at a later date.

Q. Now, referring now to the restriction which has been placed upon the volume shipments which the Rock Island Motor Transit Company is permitted to handle in its motor carrier operations under the authority which is now in effect, if I am not mistaken, the original restriction was two thousand pounds, and was later increased to five thousand pounds. It became effective some time in the fall of 1951. Now, I am asking you for matters of which you have personal knowledge. Have there been any instances where any shipper in Omaha has been unable to get service on a shipment in excess of five thousand pounds?

A. The only way I could answer your question would be just through general hearsay, what I have heard.

Q. Then, you don't have any personal knowledge?

A. Actual personal knowledge, no.

Q. Now, is there a merchandise car service available at [fol. 1825] Omaha on rail shipments moving from Chicago?

A. Yes, there is.

Q. In other words, the Rock Island Railroad maintains a daily merchandise car service between Chicago and Omaha?

A. Yes, sir.

Q. Do you know whether that freight physically moves by truck or by rail car?

A. That I do not know.

Q. Now, likewise is there a merchandise car service available on shipments originating at Omaha and destined to Chicago, in other words, in the reverse direction?

A. Yes, sir.

Q. Now, what is the situation with respect to merchandise car service from a point such as Kansas City?

Mr. Howland: To Omaha?

Mr. Fowler: To Omaha.

A. I believe that there is merchandise service between those two points.

By Mr. Fowler:

Q. And I think this record shows the same thing is true between the Twin Cities and Omaha?

Q. But the Bell operation did not include any intrastate authority over that route?

A. No, it did not.

Q. Neither did the Clark?

A. No.

Q. Now, at the time of the acquisition of the White Line Motor Freight, did that acquisition involve all operating authority that the White Line possessed in intrastate commerce?

A. It did, yes.

[fol. 1846] Q. And there were certain portions of the White Line Motor Freight authority which were restricted, as I recall, in the eastern part of the State. Was there some subsequent acquisition there between Wilton Junction, Durant, Stockton and Walcott into Davenport?

A. Yes. That was covered by the purchase of what was known as the Otto Freight Line, Truck Line.

Q. That acquisition of the White Line Motor Freight Company's line originally became effective on or about the 5th of April, 1938?

A. That is correct.

Q. And until August 30, or August, approximately the latter part of August, 1951, was that operation of the White Line Motor Freight continued without restriction so far as interstate commerce is concerned?

A. Yes.

Q. Now, what operations does the Rock Island Motor Transit Company have west of Omaha in a general way, confining your answer now to interstate authority?

A. We have interstate authority from Omaha west paralleling the Rock Island Railroad as far as Goodland, Kansas.

Q. And the principal intermediate points are what?

A. The principal intermediate points are such points as South Bend, Fairbury, Belleville, Phillipsburg, Smith Center, Norton and Goodland.

[fol. 1847] Q. I think you omitted the last one, which happens to be Lincoln.

A. Lincoln, that is right. Then, going southwest we have interstate authority paralleling the entire railroad in Kansas, except that segment from Goodlands to the Colorado line and from Wichita south to the Oklahoma State

A. Yes, sir.

Mr. Howland: You don't mean over the line of the Rock Island Railroad?

Mr. Fowler: No, not yet.

Mr. Howland: All right.

[fol. 1826] By Mr. Fowler:

Q. Now, I don't assume you are aware how that merchandise is physically transported, whether it is by truck or by rail car?

A. That is correct, sir.

Q. Now, you didn't, this wasn't gone into on direct, but you mentioned it aside. I believe you made the statement there are certain points that are not served by any other carrier than the Rock Island Motor Transit involved in this application. Did you make that statement?

A. That is correct.

Q. Will you give me those points, please?

A. Yes, sure. Buffalo, Iowa.

Q. Buffalo. Is Buffalo involved in this application?

A. Yes, sir.

Mr. Fowler: Off the record.

(Statement off the record.)

By Mr. Fowler:

Q. All right. The next one.

A. Columbia Junction, Iowa.

Q. That was Columbus Junction, I believe?

A. That is right.

Q. The next one?

A. Coralville.

Q. The next one?

A. Durant, Earlham, Eddyville, Eldon.

Q. Yes.

[fol. 1827] A. Hancock, Kalona.

Q. Hancock, Kalona.

A. Libertyville.

Mr. Fowler: Libertyville. Off the record.

(Statement off the record.)

line. We cover the entire railroad in Kansas other than those two small segments, which are less than one hundred miles.

Q. Now, on some of that do you hold intrastate authority also?

A. We hold intrastate authority on all of the operations in Kansas without any restrictions.

Q. Now, do you also have some authority, I believe, east and west through Oklahoma City, and to points through there?

A. We have authority from Oklahoma City paralleling the Rock Island Railroad all of the way to Memphis, Tennessee.

Q. And how far west?

A. That is approximately six hundred miles I would judge off hand.

Q. Now, how far west of Oklahoma City, Oklahoma?

A. We do not go west from Oklahoma City, Oklahoma. We have a segment in Texas from Fort Worth to Dallas. We operate in Missouri from St. Louis to Kansas City and from Trenton.

Q. I want to get the points in which you have motor carrier authority as we go along.

A. O. K.

Q. As I understand it you have interstate and intrastate [fol. 1848] operating rights in Nebraska and Kansas over these routes that you have told us about?

A. We have interstate authority in Nebraska and Kansas. There are one or two small segments that are restricted to rail billing in that area.

Q. Now, on your operation east and west from Oklahoma City to Memphis, Tennessee, what is the character of your authority there?

A. We have intrastate authority on truck billing from Oklahoma City to McAlester. It is on rail billing from McAlester to the State line, Oklahoma-Arkansas State line. We have truck billing and rail billing from the Oklahoma-Arkansas State line to Memphis, Tennessee.

Q. That is both inter and intrastate?

A. That is both inter and intrastate.

Q. Now, what about your Dallas-Fort Worth operation?

A. That is strictly a rail billing operation between Fort Worth and Dallas.

Q. And that is separated physically from the other portions of your operation?

A. That is correct.

Q. Now, do you have operating authority between Kansas City and Oklahoma City?

A. We do not.

Q. So that the operation from Memphis, Tennessee, west [fol. 1849] to Oklahoma City is an entirely separate, independent operation?

A. Yes, sir.

Q. And your Dallas-Fort Worth is a separate, distinct segment of operation?

A. Yes.

Q. Now, you started a moment ago to refer to some authority that you have out of Cedar Rapids. I wish you would tell what authority you have there.

A. The authority we have out of Cedar Rapids, north on the branch of the Rock Island which is known as the Decorah branch, is restricted to rail billing, both inter and intrastate. It is an application which we acquired in both intra and interstate commerce by application. It was not a purchase.

Q. Now, in addition to the original White Line authority, I believe at the time, I believe what was actually covered in the White Line Motor Freight authority was the route between Silvis, Illinois, and Omaha, Nebraska, substantially paralleling U. S. Highway No. 6 across the State of Iowa, and with service to Cedar Rapids, Iowa, and Muscatine, Iowa. Do you recall that later, that authority was secured in connection with the White Line authority between Chicago and Silvis for interstate operation?

A. That is right.

Q. At the time of the acquisition, the White Line Motor Freight Company had the grand-father application pending at that time, but there had been a break in that service [fol. 1850] due to the fact there had been a joint operation for a time with the Keeshin Motor Express.

A. That is right.

Q. Now, later in Iowa do you recall there was an acquisition, or acquisitions in the vicinity of Iowa City, Iowa?

A. That was a purchase of a little line that centered around Iowa City. I don't recall the name of it, and then there was an application for authority to cover the branch down to Wellman and Kalona, which was an application there, and that was secured unrestricted, both by truck and rail billings.

Q. That later was extended, I believe, as far as the little town of West Chester.

A. Yes, that is right.

Q. Now, you recall an acquisition of operating authority between Muscatine, Iowa, and Clinton, Iowa, by way of Davenport?

A. Yes. That was what is known as the C. D. & M.

Q. Clinton, Davenport and Muscatine?

A. Yes. That was a suburban and truck certificate owned by the Suburban Transit Company.

Q. By the electric?

A. The electric line.

Q. —line out of Davenport?

A. Yes.

Q. And in conjunction—strike that.

Q. The original authority between Davenport and Ot- [fol. 1851] tumwa and between Ottumwa and Des Moines was acquired at one time by application to both the Interstate and the Iowa State Commerce Commissions, was it not?

A. Part of that was purchased and part of it was by application. It was purchased from here to Ottumwa.

Q. Now, wait a minute. Don't you remember the Burlington purchased it and we couldn't buy it from the Burlington?

A. Yes, that is right. You are right. That was by application, I beg your pardon. It slipped my mind.

Q. That was the subject of separate litigation, wasn't it?

A. That is right. We attempted to purchase it, and then we couldn't get together with them.

Q. All right. Now, Mr. Peterson, you have some rights over in Illinois, between Chicago and Davenport via U. S.

Highway 6, I believe, but can you perform any interstate operation over that route?

A. Only——

Q. I mean beyond Davenport.

A. Only in broken up segments, as there is a key point at Chicago, Joliet, La Salle, the combined Tri-Cities, and Peoria.

Q. Now, Mr. Peterson, is the operation over the so-called Frederickson and White Line routes that are involved in this application, what type and character of territory is involved there, so far as the Rock Island Motor Transit Company's service is concerned, as conducted in the past? [fol. 1852] A. That has been the very heart of the Rock Island Motor Transit Company. The heart of it is from Chicago, the Tri-Cities, Des Moines, and north and south to Kansas City, Minneapolis. That is the heart of the operation, and the whole operation is swung around that particular operation.

Q. Now, of course, Chicago is the eastern terminus, and is not only the point of origin of an immense quantity of traffic, but is also a point of interchange with carriers from the east, north and south, in addition to the originating tonnage in Chicago.

A. Chicago probably has more originating tonnage and more interline traffic than any two points or three points on our entire System.

Q. Well, or for that matter anywhere in the United States almost, isn't it?

A. I think you could go so far as to say it is greater than any place in the United States.

Q. Now, what—a moment ago in referring to the operations of the motor transit company, you referred to the fact that the heart of your operation was to Des Moines and thence north and south. How about the operation into Omaha?

A. Well, if I left Omaha out, I left it out by mistake because the heart of the operation is from Chicago, through the Tri-Cities, Des Moines, to Omaha, and that is really the heart of the operation, period.

[fol. 1853] Q. Now, Mr. Peterson, we have had evidence in this record with respect to what has been referred to as

peddle service, or peddler service by truck. In connection with this operation which you have been conducting what, if anything, has been done in the way of establishing services to the smaller intermediate points as compared with the service rendered by the White Line Motor Freight Company in this territory?

A. The Rock Island Motor Transit Company on the territory involved in this application serves every town which it was authority to serve daily in both directions.

Q. And some of that service you say daily. Is it daily except Saturday and Sunday?

A. Daily except Sunday in some cases and daily except Saturday in some cases.

Q. And have you endeavored to perform a complete transportation service, rendering transportation service to every community on the routes on a daily basis?

A. That has been our policy, and it has been, our physical has been to render a daily service to all of the points we operate in regardless of the size.

Q. And for that purpose have you established these peddler runs out of the Tri-Cities, out of Iowa City, out of Des Moines, and out of Omaha that we have had in evidence concerned here in this record?

A. Yes, sir, that is right.

[fol. 1854] Q. Now, generally with respect to peddler service where you have what might be referred to as a turn-around service, for instance, you take this operation from Davenport west to Atalissa, Iowa, on U. S. Highway 6, where the operation goes out and the truck turns and comes back; now, what is the fact as to the comparative revenues to be derived from service of that character compared with a point-to-point service?

A. Well, that is your typical short peddler operation. You may start out today with what you would call a normal full load anywhere from fifteen to seventeen thousand. Tomorrow you might drop down to five or ten thousand. This truck, when it starts out from Davenport, if it is full loaded, out about not to exceed ten miles would be Walcott. You start to unload, and by the time you got half-way to Atalissa you are probably at least half unloaded, maybe more, and by the time you got to Atalissa you would be

practically unloaded, so you are actually driving, an average peddle operation, you are actually driving from approximately sixty-six per cent of your total mileage empty so far as revenue purposes is concerned.

Q. Now, on these peddler runs which you have established, what type and character of freight do you handle on these peddler runs across the State of Iowa?

A. Well, you can just look at it this way. The average town, the average little town such as Atalissa, West Liberty, any of those average towns population-wise, they will take [fol. 1855] just so much furniture, mattresses, enameled ware, population-wise, as the City of Des Moines will take. However, they don't get it in sufficient volume so they can get it in carloads, and consequently these little peddler runs get a large proportion of the bulk freight which doesn't move by truck into the large centers, that moves by carloads into the larger centers to a great extent, so you get your bulk with a certain amount of depreciated freight, and in a normal load you just can not get the tonnage into those loads because you don't have the space to get it in.

Q. Well, in other words, the service that you perform to these smaller, intermediate points involve not only the handling of abstract quantities of freight, which is less desirable from the revenue producing standpoint, but you also are unable to operate more than about one-third of the way with anything like a full load?

A. Like a full pay load, that is correct.

Q. Now, in connection with this operation, the operation of these peddler runs, what have you done with respect to the type and character of billing of freight that is included? You handle motor truck freight, as I understand it, moving on motor truck billing, and you also handle some other types of freight, don't you?

A. We handle the combination on these peddler runs, the motor billed freight and the rail billed freight.

Q. And you also put on those runs the intrastate traffic? [fol. 1856] A. Yes, we have both the intrastate and the interstate authority in this area, and if you didn't have the combination of the interstate, the intrastate, the truck billing, and the rail billing, you just couldn't even begin to get started to maintain the cost of operation.

Q. Now, is that service that you have told us about out of

Davenport on the run to Atalissa and return, duplicated at these other points such as Iowa City to Victor, to some extent by your peddler service out of Des Moines both east and west, and by your peddler service out of Omaha?

A. Yes, there is a series of peddler services on Highway 6.

Q. Now, why don't you perform that service with trucks that are going all of the way through, or practically through, from Davenport or Rock Island to Des Moines, and from Des Moines to Omaha? Why is it necessary to run these peddle runs?

A. Over a period of years the Rock Island Motor Transit Company has been giving excellent service to the communities on Highway 6. Consequently the merchants on Highway 6, the customers of the merchants on Highway 6 have come to realize they can go into any small store in any town on Highway 6; they can buy their merchandise there just as readily as they can at Des Moines, Iowa City, or the larger points. They have been building up a trade. These towns are good towns today because of the fact they have good transportation. There is a considerable amount of volume over the period of years. The volume has been such [fol. 1857] to these little towns that you will have a full truckload just going from Davenport out to Atalissa. Now, I merely make this observation. We are performing that service. We are performing the service at a loss, but we are still performing it, and yet it is of necessity that we have all of these peddler runs to provide this service. The tonnage is there to these little towns but they are all short peddler runs, and the results are the same on all of them. If we didn't have the combination of rail, the intrastate and the interstate, we couldn't even get started, but at that they all show a loss in operations.

Q. Now, would you be able to perform peddler service to these towns off of your through trucks?

A. No, you can not. That just isn't feasible.

Q. There isn't enough. That is you couldn't, if you have a through truck, why you have got enough of a load there. You couldn't put on all of these little towns?

A. No. Our through truck service is the only thing that makes us any money and helps us carry the load on these peddlers.

Q. All right. Now, I want to ask you a little bit about the method of handling a shipment, we will say, that is destined on—first, let me ask you this. Strike that out. Let me ask you this. On these small towns located on and adjacent to Highway No. 6, what is the fact as to whether other motor carriers who may have authority to operate in this territory render a service comparable in any respect with that of the Rock Island Motor Transit Company?

[fol. 1858] A. There isn't any other truck line on Highway 6 that even begins to render any service even resembling a comparable service of the Rock Island Motor Transit Company.

Q. To these——

A. To these towns on Highway 6 between Davenport and Council Bluffs.

Q. Now, if this service were to be discontinued by the Rock Island Motor Transit Company, what service would be available on motor carrier billing to serve these intermediate towns such as Victor, Ladora, Atalissa, Durant, and Wilton?

A. There is no carrier that has authority to serve all of those towns. There are carriers that have authority to serve some of them but do not serve it.

Q. They do not render any regular service?

A. They do not render any regular service whatsoever.

Q. What, in your judgment, would happen to those towns so far as having a motor carrier service in the event that the Rock Island Motor Transit Company was denied authority to operate on motor carrier billing?

A. Well, I don't believe that these towns would ever get any regular motor carrier service again. I don't think any truck line is going to take on the responsibility of giving peddler service with the high costs that they are faced with today. It just wouldn't be good business for them to [fol. 1859] do it. If they did do it they would be draining their line-haul operation to sustain their peddler operation.

Q. You referred to the costs that are being incurred today. Has there been any recent change in that cost picture?

A. Effective February 1st the over-the-road, the new over-the-road contract went into effect. This contract will increase the labor costs on over-the-road, just for that one

over-the-road contact, to the best of my ability to judge, approximately sixteen per cent on the over-all picture.

Q. And that increase, I believe, has been approved by the Wage Stabilization Board?

A. The contract has been approved by the Wage Stabilization Board.

Q. Now, with respect to other labor costs, are there increases in wages pending by other classes of employees?

A. Yes.

Q. Such as your mechanics?

A. The mechanics' contract goes into effect tonight with an increase, a very sizable increase. The Kansas City contract went into effect as of, I think, the first of March, and that was settled Saturday night, and that has a far greater increase than the over-the-road contract.

Q. That was the local Kansas City?

A. That was the local Kansas City contract.

Q. Now, what about your Des Moines?

[fol. 1860] A. The Des Moines local went into effect, I think, February 1st, as I recall, or February 15th, I believe, and all of these labor contracts on the over-the-road, the dockmen, pick-up and deliverymen, have gone into effect around February 1st and later, and the increases have been terrific.

Q. Now, even some of those contracts are to continue in effect for some period of time with some further increases, are they not?

A. Yes. In most cases they are three year contracts, with increases proportionately at the end of the first year, and at the end of the second year.

Q. What is the fact as to the ability of, in your judgment, of the motor carriers to continue to operate under those contracts in this territory under present rates?

A. Well, if the operators don't get some very sizable increases in revenue in the immediate future, it is my best judgment there is going to be a lot of them drop by the wayside before the first of next year.

Q. Now, Mr. Peterson, prior to the imposition of the five thousand pound restriction in, I believe, the latter part of August, 1951, on the White Line and Frederickson routes across the State of Iowa that are involved in this hearing,

did the Rock Island Motor Transit Company have any maximum weight restriction?

A. We did not.

Q. And prior to that time had you been handling some [fol. 1861] truckload business?

A. We had, yes. We had wide-open authority, and could handle both truckloads and volume shipments.

Q. Now, do you have some figures available on the number of truckload shipments handled on the Rock Island Motor Transit System as a whole during different parts of the year 1951?

A. I do, yes.

Q. Will you give us those figures, please?

A. In the first quarter of 1951 we handled seven hundred fifty-eight truckloads. In the second quarter we handled six hundred forty-four.

Mr. Fowler: How much?

Mr. Howland: Six hundred forty-four.

A. In the third quarter we handled four hundred fifty-two.

By Mr. Howland:

Q. Now, the third quarter includes the months of July, August and September?

A. Yes, and in the fourth quarter it dropped to two hundred sixty-four, two hundred sixty-four.

Q. Now, that is the operation over your entire System as I understand it?

A. Yes, sir.

Q. And is there any particular explanation for that drop between the second quarter, the volume in the second quarter and the volume in the fourth quarter?

A. Yes. That was due entirely, in my opinion, to the [fol. 1862] restrictions, in fact it was due entirely to the restrictions that were imposed under the White Line authority and under the temporary authority.

Q. In this territory generally what is the fact as to whether the fall months are heavy traffic movement months, both less than truckloads and truckloads?

A. September and October generally are our two best months.

Q. Now, Mr. Peterson, has the elimination of the shipments above five thousand pounds and the elimination of truckload movements affected the operations of the Rock Island Motor Transit Company in this territory?

A. It has affected it to a very great extent. It has just even the restrictions as are, has cut the heart out of it and as due to these restrictions, has just made it impossible to operate at a profit.

Q. Well, now, I wish you would take a shipment, say of five hundred pounds, and tell us the differences in the handling which must be given a shipment of five hundred pounds say moving from Moline, Illinois, moving into Des Moines, Iowa, as compared to a shipment of ten thousand pounds, or a truckload shipment. Just let's take our five hundred pound shipment from Moline, Illinois, to Des Moines, Iowa, and just give us the physical operation, the way that would be handled.

A. Well, a shipment of five hundred pounds originating at Moline, Illinois, would first be put on a pick-up truck.

[fol. 1863] Q. That is at the consignor's place of business?

A. That is at the consignor's place of business, and would move on a pick-up truck to our dock at Davenport. At our dock at Davenport it would be checked off of the pick-up truck and then it would be checked on to a line-haul truck at Davenport.

Q. First, it would have to be taken from the pick-up truck and unloaded on the dock, and then it would have to be placed in with the freight for loading to Des Moines?

A. That is correct. Your pick-up truck naturally would be unloaded and placed on the dock, and then checked as it is unloaded. It would have to be checked back on to the line-haul truck as it was loaded back. And at Des Moines, it would come into Des Moines. The truck would be unloaded here. It would be loaded on the dock, on the floor of the dock and be checked and loaded into a pick-up truck from the dock and taken to the consignee's place of business, where it would be rehandled again. You would have one, two, three, four, six handlings in that type of a ship-

ment. Now, if that was a ten thousand pound shipment, in all probability, in fact it would be bad business if it wasn't handled on a line-haul truck, picked up at the consignor's place of business, checked there, taken past——

Q. Now, wait a minute. In other words, if it was a ten thousand pound shipment you would take the line-haul truck with a pick-up and delivery driver direct to the consignor's place of business?

[fol. 1864] A. Yes, sir, your line-haul truck would be taken right to the consignor's place of business. It would be loaded right in the line-haul truck, bypass the Davenport terminal altogether as far as handling or checking. It would be taken, bypass the Des Moines terminal altogether for any handling or checking, and taken right to the consignee's place of business in the line-haul truck and unloaded.

Q. In other words, you would eliminate a very substantial part of your pick-up and delivery expense per one hundred pounds?

A. You would eliminate at least twenty-five to fifty per cent of your cost of picking up at both ends. You would eliminate one hundred per cent of your terminal costs at both terminals.

Q. And is the cost of handling freight across the dock one of the substantial items that enters into the operating costs of a motor carrier operation that is handling smaller volume shipments?

A. Yes. Your cost across the dock in some instances is as much as your pick-up and delivery costs.

Q. And, in some instances, the combined pick-up and delivery cost plus your cost of handling across the dock at both ends, practically equals or exceeds the revenue from your shipment, does it not?

A. On your short haul traffic it exceeds the revenue on your shipments in lots of instances.

Q. Now, Mr. Peterson, as I understand it, when you have [fol. 1865] a shipment of ten thousand pounds, or a truckload, you send a line haul truck to the point of origin, and with a pick-up and delivery driver, and the vehicle is loaded?

A. That is correct.

Q. The semi-trailer is loaded, but you have a tractor unit on it?

A. That is correct.

Q. And when that loading is completed, if it is less than a truckload, the pick-up driver brings it back to the dock at the point from which it is to depart, and in the Moline shipment it would move over to the dock at Davenport?

A. The dock at Davenport, and if we have any additional freight there for loading for Des Moines, it would be placed on this truck to bring it up to its maximum loading capacity.

Q. But you wouldn't unload that shipment from Moline?

A. Oh, no.

Q. From the truck if it was, say, ten thousand pounds?

A. No, we would not.

Q. Now, about what is the average cost of handling a shipment, what is the average cost per one hundred pounds of handling these small volume shipments across the dock at Des Moines or at the Tri-Cities?

A. Our average cost last year for a twelve month period at Des Moines was 13.96 cents per hundred.

Q. And that would be merely the dock handling cost?

A. Merely the dock handling cost. At Davenport it was 10.44 per hundred.

[fol. 1866] Mr. Fowler: 13.96 and what was the other?

Mr. Howland: 10.44.

A. 10.44.

By Mr. Howland:

Q. And I take it the larger volume of small shipments that have to be handled across the dock, the larger proportion your dock handling expense would be to the expense of operation?

A. That is correct, and you have another factor in there which is of very vital importance. If you have a group of peddler runs this freight on all peddler runs has to be assembled on the dock and stay there until it all gets in. Then it has to be dug out and loaded in station order, and that is one of the factors that enter into your dock handling costs in most of our places because we have peddler runs running out from practically all of our major points.

Q. Now, in addition to the cost of handling across the dock, what is the fact as to whether the handling of small shipments of say five hundred to one thousand pounds, the

pick-up and delivery cost on those shipments compared with the pick-up and delivery costs on a shipment of say ten thousand pounds or a truckload?

A. My best judgment is your pick-up and delivery costs on any shipment under one thousand pounds would be probably twice as great as it is on truckloads, and possibly on volume shipments in the category between one thousand and a truckload.

[fol. 1867] Q. About what have your pick-up and delivery costs been running at Des Moines and at Davenport?

A. The twelve month average of pick-up and delivery costs at Des Moines was 12.54, at Davenport was 10.43, and at Chicago was 19.48.

Q. That is merely your pick-up and delivery cost?

A. That is merely our pick-up and delivery cost.

Q. And doesn't include the handling across the dock?

A. That is correct.

Q. Loading and checking?

A. And this doesn't include the terrific increases which have come into play this year.

Q. Those are 1951 figures?

A. These are 1951 figures sizingly increased when these wage increases come into effect.

Q. Now, Mr. Peterson, with these increased costs, and with the restriction of five thousand pound maximum on the Rock Island Motor Transit Company, in your judgment as a truck operator, will it be possible to continue anything like the present volume, will it be possible to continue anything like the present service that you are rendering if the restrictions remain?

A. It will not.

Q. Now, the figures of the operation of the Rock Island Motor Transit Company, as put in by Mr. Cole, show some very substantial deficits, and I believe those figures have [fol. 1868] not included all of the increases that you have told us about that have come into the picture since February 1, 1952, is that right?

A. That is correct.

Q. And would, in your judgment, any increase that the carriers are likely to receive, or that would be within reason, change that picture as to the ability of the Rock

Island Motor Transit Company to continue to give this level of service?

A. No, it would not for this reason, that these restrictions cut the heart out of our operation. The overhead operation has been helping carry the load on the peddlers, and if we can not continue to get the volume shipments, the truckload shipments, to help balance our operation and help carry the load, we just could not stand to continue to give all of the peddler service we are giving. We would have to reappraise our operation and cut it to the minimum. We just couldn't take the loss that we are taking, and I can see no possibility of, in any way, to cut that loss, except cut the operation into the quick.

Q. Now, we were talking a bit ago about, about your short haul service where you have traffic of the type and character of these smaller volume shipments, say five hundred to one thousand pounds, what is the fact on your short haul, whether it be interstate or intrastate, as to the cost equalling or exceeding the revenue that you get from the transportation service, say on a shipment, say take for example, a shipment moving a distance of thirty-five or forty miles, a five hundred pound shipment, about what [fol. 1869] would be the average revenue for such a shipment?

Mr. Fowler: Well, now, wait a minute. Are you, Mr. Howland, including in your question the influence of the intrastate movement as well as the interstate?

Mr. Howland: I am speaking about an interstate movement of approximately forty miles in length, if he knows what the revenue would be he would get out of such a shipment for the purpose of illustration.

Mr. Fowler: Well, Mr. Examiner, I am not going to object to the line of testimony. I just want to note for the record that if it includes the influence of the intrastate operations it could develop an entirely different picture than if it was, that was confined to the influence of the interstate operation.

Exam. Carpenter: I think he confined it to the interstate operation.

Mr. Howland: I am confining it now to the interstate operation.

By Mr. Howland:

Q. Do you know about what the average revenue you would get on traffic moving interstate, say from Rock Island down to a point like Atalissa, or West Liberty, a distance of thirty-five or forty miles?

A. The interstate movement, if it was of any distance on the mileage basis, would be less than the intrastate revenue, and on that short of an operation your pick-up, your terminal costs, and your pick up and delivery costs in ninety [fol. 1870] per cent of the instances would exceed your total revenue, and you do your line-haul work for nothing on so many of these peddler runs, and on your short peddler runs, we have peddler run after peddler run on the short segments where the pick-up and delivery cost at both ends exceed the gross revenue, and you haul it in your truck from origin to destination free of charge, and in some places, you even pay for that extra.

Q. That is in the event you have a low rated freight that takes a low rate. Your pick-up and delivery costs per one hundred pounds is just as much for that as it is for any other type or character of freight, is it not?

A. That is correct.

Q. And if you have a shipment where your pick-up and delivery cost at each end approximates twelve to fourteen cents per one hundred pounds, and your cost of handling across the dock at each end approximates twelve to fourteen cents per one hundred pounds, you don't have much left out of your charge, your rate, to pay for the line-haul, the actual line-haul transportation?

A. On the short hauls you don't have anything left.

Q. Now, Mr. Peterson, I want to make inquiries with respect to the relations between your company and the Rock Island Railroad. The officers of the Rock Island Motor Transit Company, the President is Mr. J. D. Farrington?

A. That is correct.

Q. The Vice President of the Rock Island Motor Transit [fol. 1871] Company is also a railroad officer, is he not?

A. Yes, Oscar Swanson is one of the Vice Presidents.

Q. And you are General Manager for the Motor Transit Company?

A. Yes.

Q. Do you have anything to do with the operation of the railroad service?

A. I do not.

Q. And do your traffic forces solicit any business for the Rock Island Railroad?

A. They do not.

Q. And, so far as you have been advised, have you ever found that the traffic forces, soliciting forces, of the Rock Island Railroad are getting any business for the Rock Island Motor Transit Company?

A. They do no soliciting for the Rock Island Motor Transit Company.

Q. Now, all of the capital for the Rock Island Motor Transit Company has been provided by the railroad, either by purchase of common stock, or in the way of advancements by loans or otherwise?

A. That is correct.

Q. And I believe you have a loan made by one of the Chicago banks, the Rock Island Motor Transit Company has at the present time?

A. Yes.

Q. Now, while it is true—I will withdraw that.

[fol. 1872] Q. You occupy the facilities of the Rock Island Railroad, owned by the Rock Island Railroad, in the City of Chicago? I believe I am correct in that.

A. Yes; we do.

Q. And that freight house is located down near Twelfth Street or Roosevelt Road, I believe?

A. It is known as the Wells Street Freight House, right near Roosevelt Road.

Q. Do you happen to know immediately before the Rock Island Motor Transit Company took over that building, it was used by the Rock Island Railroad, or was used by somebody else?

A. Well, when we took it over it was used by the Keeshin Truck Lines.

Q. Now, you have certain facilities in Davenport, I believe, that are owned by the Rock Island Railroad?

A. Yes, we occupy the east end of the Davenport Freight House. We also occupy a garage building which was pur-

chased by the Rock Island Railroad, which we lease from the Rock Island Railroad.

Q. And do you know whether before the Rock Island Motor Transit Company took over that Davenport Freight House, whether all of that freight house was in fact occupied by the Rock Island Railroad for its own operations?

A. Well, when we took it over there was only about one-fifth of the building was being occupied by the Rock Island Railroad. The rest of it was just standing empty, accumulating dirt and filth.

[fol. 1873] Q. Down here at Des Moines you have a building that is owned by the Rock Island Railroad, I believe?

A. Yes.

Q. Now, before the Rock Island Motor Transit Company, when you started there, what is the fact as to whether that building was leased out and occupied by concerns other than the railroad?

A. Well, the part that we took over right to begin with was empty. There was nothing in it. The part adjacent to us was occupied and rented at least by the Miller Flour and Feed, and the part adjacent to that toward the east was occupied by the Universal Carloading Company. However, the part we took over was empty and was not in use by anybody.

Q. And what is the fact out at Omaha?

A. We use the south end of the Rock Island Railroad Freight House, which was empty and unoccupied at the time we took it over.

Q. Now, generally where you occupy and use facilities owned by the railroad company, on what basis has the rental been fixed?

A. To the best of my knowledge, it is my understanding that any rental is based——

Mr. Fowler: Now, just a minute. I am going to object to that. May I inquire of the witness?

Exam. Carpenter: You may.

By Mr. Fowler:

Q. Are these leases in writing?

A. These leases are in writing.

[fol. 1874] Mr. Fowler: I am going to object on the ground it is not the best evidence.

Mr. Howland: The question calls for the basis on which the rental was fixed.

Mr. Fowler: And the objection goes to the competency of oral testimony when it appears the documents are in writing.

Exam. Carpenter: Are the leases available?

A. They are. I think they are in the Chicago Office. However, there might be some here in the Des Moines Office. I am not sure.

Mr. Fowler: Mr. Examiner, that becomes a very important issue in this case so far as the protestants are concerned.

Mr. Nolan: Mr. Examiner, that doesn't go to the basis of the leases, the fact they are in writing. That doesn't go to the question.

Mr. Fowler: Mr. Nolan, the facts about which you are concerned are in writing and in contract form. You are supposed to produce the documents instead of trying to show what is in them by oral evidence.

Mr. Nolan: That can be shown by oral evidence.

Mr. Howland: I will withdraw that and ask this question.

By Mr. Howland:

Q. What has been the practice and custom which has been followed in arrival at the rentals in all of the leases or contracts that you have between the Rock Island Motor Transit Company and the Rock Island Railroad?

[fol. 1875] Mr. Fowler: That is objected to for the reason that it calls, it is not the best evidence, the leases being in writing, are the best evidence of what they contain.

Mr. Howland: Now, we might be required to produce those leases, and I don't think we will have any objection to doing so, if the Examiner please, but it has never been my understanding that is the rule with respect to the best evidence.

Mr. Fowler: Now, Mr. Howland, if you are going to produce the leases, I have no quarrel with you at all.

Mr. Howland: Well, we will probably produce them in the end.

Mr. Fowler: The record is all right for me. I shall ask for the leases, and unless they are produced I certainly will object against this type of testimony, and I would like to have the record show that I do object to them unless the leases are produced.

Exam. Carpenter: I will permit the witness to answer.

A. It is based, to the best of my knowledge on six per cent on the depreciated value of the property involved.

By Mr. Howland:

Q. Now, in one or two instances you have buildings, I believe, that were erected or modernized for the use of the Rock Island Motor Transit Company?

A. For terminals, only one at Kansas City. For a garage, only one, and that was at Des Moines, and we own, the motor subsidiary owns the garage at Des Moines but it stands on railroad land.

Q. Now, outside of the use of these freight buildings, or [fol. 1876] freight house buildings and warehouses of the Rock Island Railroad, what has been the fact as to whether the facilities that you use in your transportation business are purchased and owned or leased by the Motor Transit Company as any other commercial enterprise?

A. Other than the freight docks and the one garage, all of the other facilities are leased from outside individuals.

Q. Now, you have your own shop and shop equipment, have you not?

A. We have maintained shops at Chicago, Davenport, Des Moines and Hutchinson.

Q. And those are entirely independent of any railroad shops?

A. That is correct.

Q. And you have your own traffic and tariff department, which is independent of the railroad traffic and tariff department?

A. The Rock Island Motor Transit Company is entirely independent and separate from the railroad in every respect except, I, in between myself and Mr. Farrington, as President of the Railroad, I run the motor transit exactly like a truck line.

Q. And in that respect I wish you would tell us what the policies of the Rock Island Motor Transit Company have been with respect to rates, with respect to negotiations for labor contracts, and matters of that sort. Have you cooperated with the motor carrier industry in such matters?

A. The policy of the Rock Island Motor Transit Company [fol. 1877] has been to maintain and create a healthy truck industry. We have cooperated with them in every way. We have cooperated with them in rates. We have cooperated with them in labor contracts. We have taken every strike right down the line. I have just finished one of three weeks in Kansas with the truck operators. Our policy has been to cooperate in every way we could cooperate with the truck industry.

Q. And certain officers of the motor transit company have devoted time and effort to motor carrier matters in an organization way?

A. We have devoted time. Mr. Hitchen has spent an enormous amount of time in the motor carrier industry.

Q. What services?

A. He has been President of the Midwest Freight Bureau at Kansas City. When the Manager was off, he run it for several months, I don't remember how many months, but he run it for the motor carrier industry for several months, and not only he, but the entire organization has gone out of their way to cooperate and help out.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Now, has there been any time when the Rock Island Motor Transit Company has endeavored to put the other motor carriers in this territory out of business?

A. There has never been a time, at any time.

[fol. 1878] Mr. Fowler: Just a moment. Just a moment. That is objected to as immaterial to any issue involved in a convenience and necessity case.

Exam. Carpenter: I will overrule it.

A. There has never been a time when the Rock Island Motor Transit Company did not go out of its way to help the truck industry, help the truck operators that operate right down Highway 6. We have cooperated with them in every conceivable way we can cooperate with them, and we have never made one move to put anybody out of business.

By Mr. Howland:

Q. I take it you have been in competition with these other motor carriers that are serving the same general territory?

A. We have been in competition with them, but the Rock Island Motor Transit Company has been clean competition.

Q. And have you, with one or two exceptions, been active in the membership of the Iowa Motor Truck Association and transportation bureaus?

A. Mr. Fowler: That is objected to on the ground it is immaterial to any issue in this proceeding. If I understand this correctly we are trying a certificate of convenience and necessity case. I can't control the scope that the Examiner is going to allow the record to take, but this is certainly immaterial to any issue before the Commission in this proceeding, and objected to for that reason, it is immaterial.

[fol. 1879] Exam. Carpenter: Overruled.

A. Yes, we belong to the Iowa Motor Carrier Association. We belong to all of the tariff groups that cover the territory in which we operate. The Midwest Bureau at Kansas City is the main bureau.

Mr. Howland: I think that is a good breaking point.

Exam. Carpenter: All right, we will adjourn for lunch until 1:45 p. m.

(Whereupon at 12:10 p. m. a recess was taken until 1:45 p. m. of the same day.)

1:45 p. m.

AFTERNOON SESSION

Exam. Carpenter: We will proceed.

W. F. PETERSON resumed his testimony as follows:

Direct examination (continued).

By Mr. Howland:

Q. Mr. Peterson, did you at the noon hour go through your files to see if you had the lease agreements between the Rock Island Motor Transit Company and the Rock Island Railroad?

A. Yes, I did.

Q. And have you produced here the contracts, copies of which are in your possession?

A. That is the copies there. The signed document is in the Chicago Office, but that is an exact duplicate copy of [fol. 1880] the original signed document in every instance.

Q. And Des Moines, Davenport, Chicago, and Atlantic, Iowa?

A. If there are any missing it is just because they haven't returned it to me. They are supposed to be there, and I believe they are all there.

Q. But you haven't checked over definitely to make sure?

A. No, I haven't checked definitely.

Q. To see that is the situation. All right, Mr. Peterson, I was about to discuss with you, ask you some questions concerning the points at which the Rock Island Motor Transit Company performs the pick-up and delivery service for the Rock Island Railroad. Do you perform pick-up and delivery service for the Rock Island Railroad at certain points?

A. We do, yes.

Q. And do you have a contract with the Rock Island Railroad for the performance of that pick-up and delivery service in most instances?

A. I would say that if there isn't a contract on file, it

has just been overlooked because they won't pay us for performing the service unless we have a contract on file.

Q. And you have produced here a volume of documents which are indexed from A to W inclusive. Is that your file of contracts between the Rock Island Motor Transit and the Rock Island Railroad Company covering pick-up and delivery service at various points?

[fol. 1881] A. Yes, that is the file on it, and if they aren't all there, one or two might be in the records some place and not be in it. They should all be there, and I believe they are all there.

Q. Now, those contracts are, of course, in writing, and what is the fact as to whether they are in the form customarily used by the Rock Island Railroad for the performance of pick-up and delivery service with cartage concerns at various stations?

A. It is the same form that the railroad uses for all of their cartage companies.

Q. Now, you do perform pick-up and delivery service in Des Moines, I believe?

A. We do, yes.

Q. For the railroad, but you don't do it in Chicago?

A. We do not.

Q. You do it at Omaha?

A. Yes, we do it at Omaha.

Q. And some other points?

A. We do it. We have contracts at one hundred four different points.

Q. And have those contracts at the major points been revised from time to time as changes have occurred in the cost of performing that service?

A. At the major points, yes. At some of the small points where there isn't enough volume to make any difference, why we just let them stand. At all of the major points [fol. 1882] they have been revised from time to time.

Q. Now, generally, in connection with services which are performed by the Rock Island Motor Transit Company for the Rock Island Railroad, the transportation generally on those territories on which the motor transit company has only authority to transport shipments on rail billing,

what has been the basis on which the Rock Island Motor Transit Company has been compensated?

A. Where we only have rail billing there, the motor subsidiary is paid on a mileage basis. That is they pay us for the operating mile.

Q. And how is the mileage figure arrived at in those instances?

A. Well, they were arrived at on as nearly a cost basis as we could arrive at. They would give us a slight profit, but it is usually just a little bit over cost.

Q. And in this White Line and Frederickson territory, which is the subject of this application, what basis of compensation does the Rock Island Motor Transit Company receive for handling shipments for the railroad?

A. It is based on the one hundred pound basis.

Q. And is that a uniform basis irrespective of the distance the shipment is transported?

A. Yes. That is just an average revenue, an average rate.

Q. And the figure at the current rate on that is what?

A. Fifty-five cents a hundred.

Q. Now, generally where you perform service for the [fol. 1883] Rock Island Motor Transit Company in the nature of pick-up and delivery service, what is the basis on which the arrangement has been made?

A. In the origin, at the time we took it over, in every instance we took it over at the rate that the contractor was getting at that particular point. That has been revised at various places upward as labor, wage rates, and costs went up, but we always took it over at the rate that the railroad was paying at that particular time.

Q. And this arrangement of fifty-five cents per one hundred pounds, does that, is that based on costs, or is that a figure used as an average figure?

A. Well, it is a figure based more or less on costs, but it is based, it is figured on the basis of taking care of, to an extent, peddler operations, and it is plenty high.

Q. That is on short haul particularly?

A. Short haul traffic. It is in fact too high.

Q. All right now, with respect to the, I don't believe the record shows the number of items of equipment that

the Rock Island Motor Transit Company currently owns and uses in its operations. Can you give us that for the record?

A. We have two hundred twenty-eight tractors, one hundred fifty-two trucks, three hundred three trailers, four service trucks, and four busses, a total of six hundred ninety-one units of equipment.

Q. Now, Mr. Peterson, prior to the effective date of the [fol. 1884] present restrictions, what railroad billed freight was the Rock Island Motor Transit Company handling out of Chicago?

A. We were handling all of the rail billed freight out of Chicago to all of the points in Illinois that we could serve without running into the key point restrictions.

Q. And were you handling any rail billed freight westbound from Chicago to Davenport, Iowa City, or those points?

A. At times we did and at times we did not westbound. It would depend to a great extent, the availability of cars.

Q. Now, what about your eastbound traffic out of Des Moines on rail billed freight?

A. We handled all of the rail freight moving eastbound from Denver, Minneapolis and Omaha. All of that freight was assembled at Des Moines, Omaha, and Rock Island, all of these places, and we hauled it back to Chicago.

Q. That is the less than carload freight?

A. Less than carload freight, yes.

Q. And what is the fact as to the general movement of your motor carrier freight? Was it heavier out of Chicago westbound than it was eastbound?

A. Yes. The flow of traffic out of Chicago, as far as this territory is concerned, is definitely westbound. You will have, you will have far more traffic moving westbound than you do eastbound unless you go into exempt commodities. Exempt are packing house products and items of [fol. 1885] that nature, of truckloads of poultry, various things of that kind.

Q. Is it desirable in the motor carrier business to balance your operations as far as possible?

A. It is not only desirable. It is an absolute necessity to balance your operation. You haven't got a chance if

you can't balance your operation. You just can't have a profitable operation without it. Your operation must be as nearly balanced as it is possible to do.

Q. Now, as I understand it, prior to the effective date of these restrictions you were handling the less than carload freight traffic for the railroad between Omaha and Des Moines into Chicago?

A. We were, yes.

Q. And due to the key point restrictions was any change made in that at the time the restrictions became effective?

A. We had to discontinue that operation.

Q. And that is now being handled in boxcar service by the Rock Island on eastbound L. C. L. freight?

A. That is correct.

Q. And what has been the result of that operation so far as the Rock Island Transit's business is concerned?

A. Well, there would be a certain amount of that eastbound movement of L. C. L. on the railroad. It is far lighter than you would imagine. It would never run over two trucks a day. Eastbound out of Des Moines it would [fol. 1886] probably run a truck and a half. The bulk of our eastbound movement was truckload freight we were able to scare up to balance our operation.

Q. Now, with no truckload freight and without being able to handle this less than carload freight on rail billing moving east from Des Moines, what has been the result as to running trucks empty eastbound out of Des Moines?

A. Well, we have run anywhere from three to five times as many empty trucks eastbound since October 1st last year as we ever did before.

Q. And is that one of the factors that contributes to the operating deficit that has been shown in recent months?

A. It is very definitely one of the factors.

Q. And if you had unrestricted motor carrier billing, and the key points were removed at the Tri-Cities and at Des Moines, would that have any effect on your ability to perform the motor carrier service in this territory?

A. It would place us in the same position we were in before our authority was restricted, and we would then be on an equal basis with our competitors; and I am sure on an equal basis that we can hold our own. We don't ask for any advantage. All we ask is to be on an equal basis.

Q. Now, you have had approximately seven months, including the month of March, 1952, of operating under the restricted authority, under which you are now operating, I believe?

A. That is right.

[fol. 1887] Q. Now, with the increased costs that you have told us about that are being incurred, and with the present operation, in your judgment can you continue that operation indefinitely in the future subject to the restrictions that are presently in effect?

A. It is my best judgment that we can not.

Mr. Howland: Now, I will ask Mr. Nolan to examine the witness with respect to certain phases in which he is primarily interested for the intervenors which he represents.

By Mr. Nolan:

Q. Now, Mr. Peterson, there has been testimony in the record that at certain shipping points such as Iowa City, Grinnell, Newton and Atlantic, leaving out the larger points such as Des Moines and Davenport, that it was essential to the shipping interests there, because of the smaller nature of the businesses located in those points, that facilities be available for rate information, routing shipments, for loss and damage claims and tracing shipments. Now, in the event that your company was not authorized to restore and regain the opportunity to conduct the services they were giving prior to any restrictions, would those facilities, including the personnel available in those cities and towns, remain?

A. It was my thought at the time that these restrictions were imposed, and at the time of the temporary hearing, that we might be able to maintain certain facilities at some of these points. I am convinced today that the bulk of these smaller points, so far as the motor subsidiary is concerned, will be closed up.

[fol. 1888] Q. By that do I understand that in those points I have named, including, well, Muscatine and Washington, where there was testimony that the terminal facilities that your company has included rate information, routing in-

formation, for tracing shipments, and loss and damage claims, that they were a valuable service, and the only service of that kind available in those communities by any common motor carriers, that your company would terminate those facilities and that service to those communities?

A. It is my best judgment that would happen.

Q. And, as I understand, you would no longer maintain the facilities and keep the personnel there?

A. That is correct.

Q. And your personnel would then be reduced to that extent in those particular communities?

A. Yes, that is right.

Q. Now, I understand that here in Des Moines, the home office of the Rock Island Motor Transit Company, that you have a complete office force independent of the railroad, which is available and which does aid in serving the community served by the Rock Island Motor Transit Company. Now, in the event that your company did not have its original operating rights restored, what would be the effect upon the facilities and personnel which you have here in Des Moines, which has been used by the Rock Island Motor Transit Company in serving the public in the territory involved in this case?

[fol. 1889] A. Well, of course, Des Moines would be the hardest hit of any of them. It is our general office here, and if we are forced to go into an operation such as we would have to go in under the White Line order, all I would maintain here would be cost accounting and payroll. That means that beyond that it would probably be reduced to, probably just wiped out except cost accounting and payroll.

Q. How many employees did your company have at the time of the effective date of the order in the White Line case last July 31st, which were being used to serve the public in the territory covered by your company?

A. Well, it run on the regular payroll about seven hundred fifty, and your extras aren't on there. Our peak was eight hundred eighty-three last year.

Q. How many employees does your company now have?

A. It would run between seven and eight hundred.

Q. How many employees would your company have if

you were required to go to a strictly rail billing service in connection with the White Line Motor Truck Line?

A. Well, it would be far less than I anticipated at the time this order was made effective. At that time I figured two hundred twenty-two would be laid off, but they would be far more than that because I can see the results of what happened under this restrictive order, and if that is carried out, why it will be reduced far below the two hundred [fol. 1890] twenty-two that I have figured would be laid off.

Q. Well, now, do I understand that, for instance, in Newton you have a terminal agent there, you have pick-up and delivery drivers, and in these other places where you have terminals, that you have the terminal agent, pick-up and delivery drivers, and personnel of that kind, would your company if required to go to a strictly rail billing, would the personnel in those communities be eliminated or materially reduced in number?

A. They would be materially reduced, and they might be entirely eliminated because if there wouldn't be sufficient traffic to warrant the pick-up and delivery, we would put the pick-up and delivery up for bid, and some local contractor could do it cheaper than we could do it under the restricted operation.

Q. Now, you testified it required the intrastate, interstate and rail billed freight to even substantially sustain your peddler local operations, isn't that correct?

A. You have to have all of it to even begin to sustain a peddler operation.

Q. State whether or not if your company was required to go to a strictly rail billing on the White Line route, whether that would necessarily result in a curtailment of the local service on intrastate freight to the communities along the White Line System?

A. It definitely would.

Q. Now, one of the parties appearing in this proceedings [fol. 1891] in support of the application was the H & W Motor Express Company of Dubuque, Iowa. State whether or not the H & W Motor Express Company of Dubuque, Iowa, is a competitor of your company in interstate traffic?

A. They are.

Q. And between what principal points?

A. Between Chicago and Des Moines, principal points, Chicago and Davenport, and I believe Davenport and Des Moines, and Des Moines and Cedar Rapids on interstate traffic.

Q. How about between Chicago and Cedar Rapids?

A. Chicago and Cedar Rapids.

Q. How about between Chicago and the Tri-City area?

A. Yes.

Q. Tri-City area and Cedar Rapids?

A. Yes.

Q. How about between the Tri-City area and the Twin Cities?

A. Yes.

Q. And Des Moines and the Twin Cities?

A. Yes.

Q. Now, Mr. Peterson, I believe I understood you to testify, and also Mr. Hitchen, that your company participates in all of the motor tariff bureaus in the territory in which it operates?

A. We do.

Q. And by that do I understand you charge the same rate for motor truck traffic as all others who participate in those tariffs?

[fol. 1892] A. That is correct.

Q. And, as I understand it, where you are in competition with a company like the H & W Motor Express Company, you are competing with them on the same rates they charge?

A. Our rates are exactly the same.

Q. Now, what advantage from a competitive standpoint would your company have between the points such as Chicago and Des Moines, Chicago and the Tri-Cities, Chicago and Cedar Rapids, or any other points where you are in competition with a company like the H & W Express Company if you operated strictly upon a rail billing as compared with operating upon a motor truck tariff?

A. Well, in some instances we would probably have a rate advantage if we operated on rail billing. As far as the movement of freight operating on rail billing, they would have a terrific advantage over us on the movement of freight. The freight, in the movement of freight, so far

as the railroad is concerned on rail billing, it doesn't move through the terminals as near as expeditiously as it does on a truck line.

Q. Assuming, Mr. Peterson, that your company could not move freight from Chicago to Cedar Rapids on truck billing, isn't it a fact that in competition with a motor carrier such as the H & W Motor Express Company, that your rail rate is substantially less than your truck rate, and you would have a very substantial advantage on your competitor, particularly a company like the H & W Motor Express Company, which has to operate as a motor car-
[fol. 1893] rier of freight?

A. On the rate basis we would have an advantage over the truck lines if we were operating strictly on a railroad basis, on a railroad billing basis.

Q. And isn't it also true if you could pick your freight between key points and with that rate advantage, you would be able to secure traffic you would not otherwise be able to get?

A. That is very possible, and I think that is right.

Q. Isn't it also true, Mr. Peterson, there is a certain amount of traffic, freight that would be available to a railroad, I mean would be available to a truck line charging rail rates where that traffic doesn't have to move as expeditiously as other traffic, even though the time element would not be so important?

A. That's right.

Q. Have you ever had expressed to you by motor carriers who are operating on motor truck billing, that they would sooner have your company, or any other railroad subsidiary, operate as a motor carrier on account of the preferential rate that the railroad subsidiary might charge.

Mr. Fowler: That is objected to as immaterial to any issue.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Now, you testified about your pick-up and delivery costs, and your dock charges. You made a statement in some instances particularly, in all instances particularly

[fol. 1894] on short hauls, that the pick-up and delivery charges and dock charges exceed the line-haul revenues.

A. It does on the short hauls, yes.

Q. Can you give us a typical example of that so we will understand just exactly what you mean? Can you give us, for instance, between a point like Des Moines and Newton or Grinnell? Well, let's take, would Des Moines and Grinnell be a typical situation, or Des Moines and Newton?

A. Des Moines and Grinnell is a reasonably typical example.

Q. Well, now, as I understood your testimony, the dock charge at Des Moines is 13.96 cents per hundredweight. That is your dock charge alone?

A. The dock charge at Des Moines is 13.96. The pick-up and delivery is 12.54, and your office and spotter which comes into Des Moines brings that total up to 32.11 cents is your over-all cost at Des Moines, including dock, pick-up and delivery, office, office billing and your spotter.

By Exam. Carpenter:

Q. What is the spotter service, Mr. Peterson?

A. Spotter service is the pick-up driver that sets your trailers up to the house and takes them out, or sets another one, and pulls out a trailer for a customer to come in. The spotter service is just, it is service that a terminal, a company like ours that is operating in congested quarters like we are here, have to stand because we just can not [fol. 1895] operate any other way. We don't have sufficient room. We are operating in a freight house that was built fifty or seventy-five years ago. At Grinnell our total costs is 19.03, or a total——

By Mr. Nolan:

Q. What is your cost at Grinnell?

A. 19.03.

Q. I mean what makes up that cost?

A. That includes the pick-up and delivery, the freight house, the dock costs and billing costs, totals 19.03.

Q. I figure that you would have costs then at Des Moines and Grinnell which would total 51.3 per hundred.

A. It would be a total of 51.64. No, I figured it wrong. That is 3 and that is 4, 51.14.

Q. 51.1 cents a hundred?

A. Yes.

Q. For your costs at Des Moines and Newton, or I mean Des Moines and Grinnell?

A. Yeah.

Q. All right. What is the average class and revenue on shipments moving between Des Moines and Grinnell per hundredweight?

A. Well, I had that here, but I seem to have lost it off of the record.

Mr. Fowler: I will take your guess on it.

A. It is here. It is 61 cents on a one hundred pound basis from Des Moines to Grinnell, averaged 61 cents for the year 1951. That is the L. C. L. rate out of Des Moines [fol. 1896] to Grinnell, which is higher than the proportion of any interstate rate could possibly be on the mileage basis, so that we had a cost there of 51.5.

Exam. Carpenter: 51.1.

Mr. Fowler: And revenue of approximately 60.

A. 61, and we have to haul it over there and pay all of the motor transit overhead for ten cents, which is just fantastic. It is completely out of the picture.

By Mr. Nolan:

Q. That is your local rate you charge from Des Moines to Grinnell?

A. That is right.

Q. What about the division of through revenue on interline?

A. It would be far less than that.

Q. Now, we will take the situation between Des Moines and Newton. Your revenue would be less than 61 cents, but I will ask you if your dock and pick-up and delivery charges in Des Moines and Newton would be substantially the same as where Grinnell was involved?

A. Well, Des Moines and Newton, it would be 32.11 and Newton 17.95, 49.06. That is the total of the Des Moines and Newton, our terminal costs is 49.06.

Q. And what would be your average revenue on a shipment between Des Moines and Newton?

A. It would be less than between Des Moines and Grinnell, in my best judgment, unless the zone just happened [fol. 1897] to break just right there. I would say the revenue would be less than between Des Moines and Grinnell.

Q. On a through line division of revenue your proportion would be less?

A. It would be less, yes, sir, that is right.

Q. Now, Mr. Peterson, you testified in connection with your rail billed freight that you were able to balance your eastbound operations, that is to load your trucks back from Des Moines to Chicago because the normal movement of truck freight is from Chicago westbound.

A. We get some. We did get some before this restriction went in. We did get some eastbound freight from the railroad which would run about, never over two trucks a day eastbound.

Q. I say you were able to get it?

A. Yes, we were able to help balance, and that was the only advantage there.

Q. I say you have that arrangement with the railroad to handle some rail billed freight here in Des Moines, to load up some of your empty trucks going back to Chicago?

A. It is our policy to move the rail freight eastbound wherever possible. That is one of the savings we can do to the railroad because whenever they move a car eastbound, they have to move it back to get the load back, so, consequently they want their L. C. L., they want us to move their L. C. L. eastbound wherever possible.

[fol. 1898] Q. The point I am trying to get at now, with this arrangement with the Rock Island Railroad to balance their operation, you take their freight when it is convenient for them to turn it over to you, and tends to balance your operation.

A. That is right.

Q. I will ask you if, with any independent motor carrier such as the H & W, you have entered into arrangements

with that company, or other companies, for points of interchange where they by turning over freight to you helps balance your operation in one direction, and you turning over freight to them will help balance their operation in another direction?

A. Yes, we have worked that out with various truck lines, and with the H & W particularly. We will balance their movement at Cedar Rapids some times, and balance it at Davenport where we have no movement. We will switch those movements where it is to the best advantage to them to have it, where they have empty equipment and can use i' dvantage. That is common practice.

Q. The point I am trying to make is this. Is there any difference in your operation with the Rock Island Railroad Company at points where freight is turned over to your company, your motor truck company, to balance your operation than it is with independent motor truck companies where you work out arrangements with these independent motor truck companies to turn over freight at certain points and receive freight at certain points to balance the operations of the independent motor truck com-
[fol. 1899] panies and your company?

A. There is no difference.

Q. You say that you have worked out such arrangements with companies like the H & W Motor Express Company, is that right?

A. That is right.

Q. And, as I understand it, instead of delivering certain freight at Davenport for the H & W moving into the northeastern Iowa territory, you might turn it over to them at Cedar Rapids?

A. That is right.

Q. Is that on a prearranged basis in a conference between members of your company and the H & W?

A. That is right. It is on a prearranged basis.

Q. And does that same thing apply, too, throughout your System, and has it been followed throughout your entire area?

A. Yes, those arrangements have been made with various truck lines at various other places. I can think of one

or two, particularly PIE. We have worked out arrangements with them for the handling of freight of that kind.

Q. And isn't it also true you have had freight turned over to you by truck companies that had authority to serve local points, and turned it over to you at an interline point?

A. That is definitely true.

Q. And isn't it true that your company interlines, turns over freight at Omaha for the Nebraska territory? They turn it over at Omaha rather than carry it on to Lincoln? [fol. 1900] A. Yes. We would rather interline at Omaha than we do at Lincoln, even though we would get more revenue to our company by turning it over at Lincoln, but we still prefer rather to turn it over to them at Omaha because the service is better.

Q. You have empty trucks coming back from Lincoln, too?

A. That is one thing, and the customer wouldn't get the service he would get through the Omaha gateway.

Mr. Nolan: I believe that is all.

Mr. Howland: There are matters I wanted to inquire about before Mr. Fowler examines. May I see the exhibits?

By Mr. Howland:

Q. Mr. Peterson, I had certain exhibits I want to call to your attention that have already been identified by Mr. Cole, and I want to particularly call your attention to Exhibit No. 10, which is the graph that shows the average load in tons, 1944 and 1950, comparison of average load in tons at representative midwest truck companies and the Rock Island Motor Transit Company, all freight handled. Now, that shows, as I understand it, that beginning with 1944 a decline in the average load in tons of the Rock Island Motor Transit Company, whereas it shows generally an increase in the average load in tons of these midwest motor trucking companies. Is there any explanation that you can give us for that?

A. Yes, there is only one.

Mr. Fowler: Just a moment. That is objected to as immaterial. Objected to as calling for hearsay. Objected to as [fol. 1901] calling for an incompetent conclusion of the witness.

Exam. Carpenter: Objection overruled.

A. There is only one answer to that, and that is the fact that we are a predominantly peddler operator, and the large part of our equipment is used in peddler service. In peddler service your equipment runs from fifty to, from fifty to sixty-six per cent empty miles, and while the truck lines involved here are predominantly key point operators and truckload operators, and do some peddling, but not in any degree to the amount of peddling that we do.

By Mr. Howland:

Q. Now, Mr. Peterson, I will hand you at this time a document in graph form which I will ask be marked for identification as Exhibit No. 22.

(The graph referred to was marked as "Applicant's Exhibit No. 22, Witness Peterson," for identification.)

Exam. Carpenter: It will be marked for identification as Exhibit No. 22.

By Mr. Howland:

Q. It is headed "Tons Transported in Intercity Service—1946-1950—Class 1 Motor Carriers of Property as Compared to LCL (originated) Tonnage of Class 1 Railroads." Now, what figures, what is shown by the document marked for identification as Exhibit 22?

A. This document shows the tonnage of the Class 1 truck operators' figures as furnished by the A. T. A. service, which they secured from the Interstate Commerce Commis- [fol. 1902] sion on the blue line. This indicates that the Class 1 truck operators in 1946 handled a total of 104,700,000 tons of traffic. In 1950 this jumped to over 200,000,000 with 12.2, 12.2% of the carriers in the Class 1 group not reporting. So actually in place of 200,000,000 it should be well up over 220,000,000 tons. The red line indicates the Class 1 railroads. Now, I want to go back to the Class 1 truck operators. I don't believe that the Class 1 truck operators represent anywheres near even a semblance of being near the total volume handled by the truck industry, as the

Class 1 truck operators represent not anywheres near the total number of trucks operated; while the Class 1 railroads represent at least ninety-eight to ninety-nine per cent of all railroad tonnage.

Q. Let me ask you this question. Are the figures which are shown here nation-wide figures?

A. They are nation-wide figures, yes. The Class 1 railroads come out of Railroad Facts in 1950, which was published by the Western Railways. In 1946 they handled 24,300,000 tons of less than carload business. In 1950 that had dropped to 10,900,000 tons.

Q. Now, of course, the graph marked for identification as Exhibit 22 contains both truckload and less than truckload quantities for Class 1 truck lines?

A. That is correct.

Q. And it would include, as I understand it, both contract [fol. 1903] carriers in the Class 1 classification and the common carriers?

A. Yes.

OFFERS IN EVIDENCE

Mr. Howland: At this time I will offer and introduce in evidence the document marked for identification as Exhibit 22.

Mr. Fowler: That is objected to as immaterial.

Exam. Carpenter: Objection overruled, and the document is received in evidence.

(Applicant's Exhibit No. 22, Witness Peterson, was received in evidence.)

Mr. Howland: At this time I will present to you a graph here headed "Indices of Tons transported in Intercity Service—Years 1938—1949—1941 equals 100%," and ask that be marked for identification as Exhibit 23.

Exam. Carpenter: It may be so marked.

(The graph referred to was marked as "Applicant's Exhibit No. 23, Witness Peterson," for identification.)

By Mr. Howland:

Q. Now, Mr. Peterson, I will ask you if you are familiar with the graph, the exhibit which has been marked for identification as Exhibit 23.

A. I am, yes.

Q. Will you explain that graph, please?

A. This graph, in my mind, is very important for this reason. It is a graph based on, actually based on tonnage. The statistics as furnished by the American Trucking Association and by the statistics as furnished by the Bureau [fol. 1904] of Transport Economics and Statistics of Class I Railroads, this here shows the steady incline from 1938 of the truck industry, and the terrific drop right after the war of the railroad industry, and it is, in my opinion it is important for this reason. In 1938 when the policy of the Commission was established to cut the truck industry from the railroads, that there was some justification for it. Today, with the facts such as they are, I am wondering whether there is or not.

Q. Well, let's find out what the blue line shows.

A. The blue line shows the steady increase of the truck industry.

Q. How is it made up? It starts with the year 1938, and it starts down at 50%?

A. Yes.

Q. Does that indicate that the blue line, does that indicate that the motor carrier tonnage in 1938 was below the rail carrier tonnage and below the 1941 average as a median?

A. They are both based on a tonnage figure, but it doesn't necessarily, as I understand it, mean the tonnage of both of them were equal. It shows that the tonnage of the truck lines in 1938 was 50% less than it was in 1941, and that the steady increase went up almost 230%, and almost 200% over the 1938 average figures.

Q. Whereas, the rail tonnage, L. C. L. tonnage, moved upward to the end of 1946, and then has dropped back to a level——

[fol. 1905] A. To a level below the 1938 figure.

Q. Otherwise, the graph speaks for itself?

A. That is correct.

Mr. Howland: I will offer and introduce in evidence at this time the graph which heretofore has been marked for identification as Exhibit 23.

Mr. Fowler: I object to it as immaterial.

Exam. Carpenter: Objection overruled. The document will be received in evidence as Exhibit No. 23.

(Applicant's Exhibit No. 23, Witness Peterson, was received in evidence.)

By Mr. Howland:

Q. Mr. Peterson, do you have any exhibit or information which you can offer for the consideration of the Examiner and the Commission with respect to the originating tonnage of rail carriers in the years 1925 to 1930 compared with the 1949 or 1950 figures?

A. Yes, I have.

Mr. Fowler: That is objected to as immaterial.

Exam. Carpenter: The objection overruled.

A. These are, in my opinion, very important figures. The five year average from 1926 to 1930, this is the Class I Railroads, taken from Railroad Facts of 1950, 1949 being the last available figures. In the 1926 to 1930 average, the railroads originated 1,279,196,826 tons. In 1949 they originated 1,224,001,369 tons, or over 55,000,000 less tons of freight handled by the railroads in 1949 than there was in [fol. 1906] the 1926-1930 average.

By Mr. Howland:

Q. Now, do you have any information with respect to the total production by agriculture, manufacturing, by mining or other industries in that comparable period?

A. We know——

Mr. Fowler: Just a moment, Mr. Examiner, I am going to object to this line of inquiry as immaterial. He read statistics on a nation-wide scope. We are involved in an application here between Chicago, Illinois, and Omaha, Nebraska. I can not see what materiality all of this has as to this proceeding. I object to it on the ground as being immaterial. It is certainly encumbering on the record,

has no bearing on any issues in this case, and too remote to be of any possible issue in this case.

Exam. Carpenter: The objection is overruled.

A. We know from statements agriculture has gone up well over forty per cent in this same period. Manufacturing has gone up over one hundred five per cent in this period, so that it is very evident from these figures that this traffic is moving other than by railroad, and that the railroad's subsidiary and the railroads are certainly not hurting the truck industry.

Mr. Fowler: I move to strike the answer of the witness on the grounds it is just a voluntary statement based upon hearsay, incompetent, and an opinion and conclusion of the witness.

Mr. Howland: I will agree the statement "It is very evident the railroads are not hurting the truck industry" [fol. 1907] may be eliminated as argumentative, not within the scope of the interrogatory asked.

Exam. Carpenter: It may be stricken. Now, what have you got there, Mr. Reporter?

Mr. Fowler: It is all right just as it is.

Exam. Carpenter: I think it is all right the way it is.

Mr. Howland: I think I will let Mr. Fowler examine you.

Exam. Carpenter: Cross-examine.

Mr. Fowler: Just sit back. You are going to have quite a rest.

Mr. Howland: I would like to have the record show at this time we have produced a file of leases, and we have also produced a file of pick-up and delivery contracts, and those are available for examination and cross-examination.

Cross-examination.

By Mr. Fowler:

Q. Mr. Peterson, first I would like to attempt to develop and define the issues which are involved in this proceeding. I hold in my hand a Certificate of Public Convenience and Necessity, Docket No. MC-29130, issued to the Rock

Island Motor Transit Company, a corporation, Chicago, Illinois, on September 11, 1951. Did you receive a copy of such certificate from the Commission?

A. Yes, I imagine we did. I am not exactly familiar with the numbers, off hand.

Q. Well, will you examine this document and tell me [fol. 1908] whether or not you did receive a copy of that?

A. Yes, I imagine I have it.

Q. Now, as I understand it, this document is supposed to describe the operating authority which the Rock Island Motor Transit Company had as of the 11th of September, 1951, on a permanent basis?

A. I think that is correct.

Q. And this certificate, of course, gives influence to the Commission's order and the proceedings in the United States Supreme Court, in which certain restrictions were imposed upon the operating authority of your company?

A. I am not clear as to that.

Q. Well, at least this certificate does impose certain restrictions upon your operating authority between Chicago and Omaha?

A. That is correct.

Q. Now, on Sheet 2 of the certificate, the route description appears, "Between Des Moines and Omaha, Nebraska," and then you have another segment, of course, which hooks up with that, which would be from Chicago to Des Moines. In other words, you hold operating authority over a route from Chicago to Omaha, Nebraska, passing through Davenport, Moline, Rock Island and Des Moines.

A. Yes.

Q. Now, on the bottom of Sheet 2 of that certificate there are set forth there certain conditions, reading as follows: [fol. 1909] "The service to be performed by said carrier shall be limited to service which is auxiliary to, or supplemental of, rail service of the Chicago, Rock Island & Pacific Railroad. Said carrier shall not render any service to or from any point not a station on a rail line of the Chicago, Rock Island & Pacific Railroad." Now, involved in this application, as I understand it, is a request to serve certain stations along the route involved that are not located on a rail line of the Chicago, Rock Island & Pacific Railroad, is that correct?

A. Griswold, a point that used to be on the Rock Island, but the branch line was abandoned, and the town, the first town west of Iowa City.

Q. Coralville?

A. Coralville, which also used to be on the Rock Island Railroad. If I recall correctly, they are the only two.

By Mr. Howland:

Q. What about Lewis?

A. Lewis is right. Lewis is the other one.

By Mr. Fowler:

Q. L-e-w-i-s?

A. Yes, Lewis.

Q. So the only request that you are making here for additional points, other than those which are presently served by the Chicago, Rock Island & Pacific Railroad, are the towns of Coralville, Griswold, and Lewis, Iowa?

A. I believe that is right.

Q. Now, as I understand it, the effect of that restriction, [fol. 1910] namely, "a service which is auxiliary to, or supplemental of, rail service" means that traffic handled by you on trucks is limited to that which moves on rail billing?

Mr. Howland: That is objected to as argumentative in form, calling for an opinion and conclusion of the witness as to the meaning of the certificate, and not proper cross-examination.

Exam. Carpenter: The objection is overruled.

A. To me that doesn't mean rail, it is restricted to rail billing. It is restricted to rail billing only if and when the Commission so states.

By Mr. Fowler:

Q. Was the present application, which is now before the Commission in Docket MC-29130, Sub. No. 70, prepared by you, or under your supervision or direction?

A. Yes, sir.

Q. Attached to your application is an exhibit bearing heading, "Statement of Proposed Authority," and I direct your attention to this language: "By the order of the Commission dated April 11, 1949, in the consolidated dockets above referred to and MC-29130, the certificates were modified by providing, in substance, that applicant should handle only shipments moving on rail billing and at rail rates and subject to the imposition of the so-called 'key point restrictions' at Omaha, Nebraska, Des Moines, Iowa, and collectively, Davenport and Bettendorf, Iowa, Rock Island, Moline and East Moline, Illinois." Was that information in the application when you authorized it to be [fol. 1911] filed?

A. Yes, sir.

Q. So at least at the time you filed the application, you were of the opinion that the effect of the restriction which confines your service to that which is auxiliary to, or supplemental of, rail service of the Rock Island Railroad, would require that all traffic moving by truck would be on rail billing and at rail rates?

A. No.

Mr. Howland: The same objections last urged.

Exam. Carpenter: The objection is overruled.

A. No, sir.

By Mr. Fowler:

Q. Now, traffic which you are permitted to handle under your permanent authority would also be subject to the provisions of the railroad tariffs with respect to packaging and crating requirements, would it not?

A. I think, yes, that should be right.

Q. And you will admit, I assume, that the requirements of the motor carrier tariffs in that respect are much more favorable to the shipper than the railroad tariffs?

A. I will not admit that. The railroad accepts shipment for moving that we, as a motor transit, will not accept. The railroad is far more lenient in accepting packing requirements than any truck line I have ever seen. They are far more lenient than their subsidiary, the Rock Island Motor Transit, on accepting packing requirements, and

[fol. 1912] you can go down to our terminal, they are setting right together, and look it over.

Q. Then, some of the shipper witnesses that appeared here before you and testified to the contrary, they were in error?

A. Well, I am just stating what I see.

Q. You don't argue with the statement that has been made by certain shippers here that the converse of what you stated is true?

A. I wouldn't argue, except I am talking about what I have seen with my own eyes at the terminal, setting right together.

Q. Then, as I understand it, you are willing to state that the tariff requirements of a railroad shipment with respect to packing and crating, etc., are much less stringent than similar requirements under the motor carrier tariffs?

A. No, apply them less stringently. They are less strict in their application than the motor transit is in its application. I have to put it that way because we will not accept shipments in packing, in packages that I have seen the railroad accept. Now, I am talking from a practical application. I am not familiar with the tariff on packing requirements. I am talking now from the practical application right on the operation.

Q. Well, then, what you are trying to say is, there may be a difference in the two tariffs, but they are not policed or enforced? Is that what you are trying to say?

A. I imagine that is about what I am trying to say.

Q. Now, the next condition appearing on Sheet 3 is to [fol. 1913] the effect that "No shipments shall be transported by said carrier as a common carrier by motor vehicle between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., and Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline and East Moline, Ill." Now, just so we may have illustrations in this record as you may interpret that certificate, let's take a shipment moving from Chicago to Omaha, Nebraska. How would that be handled by your company?

Mr. Howland: You mean under this certificate?

Mr. Fowler: Under the permanent authority, under this certificate.

A. Under the permanent authority, that could move from Chicago only on rail billing in a boxcar.

By Mr. Fowler:

Q. In other words, then——

Exam. Carpenter: You don't want the carloads in there?

By Mr. Fowler:

Q. In other words, then, a shipment moving from Chicago to Omaha could not be transported throughout the entire route by truck?

A. That is correct.

Q. But would be transported throughout the entire route in rail boxcars?

A. Right.

Q. Now, a shipment moving from Chicago to Des Moines, Iowa, what effect would that restriction have on such a [fol. 1914] shipment, and in what manner would that move?

A. It would have to move the entire distance in a boxcar.

Q. Without any truck movement from origin to destination?

A. That is correct.

Q. Now, of course, you do interpret that to authorize you to transport truck shipments from Chicago to Colfax, Iowa, do you not?

A. On rail billing.

Q. On rail billing?

A. Yes.

Q. In other words, you could move traffic from Chicago to any point in Iowa east of Des Moines, Iowa, by truck?

A. That is correct.

Q. On rail billing. Now, this restriction would have no effect upon a shipment moving from Chicago to the Tri-City area?

A. No.

Q. In other words, under your permanent authority rail freight moving on rail billing could be transported from

Chicago to destination, namely, from Chicago to the Tri-City area entirely by truck?

A. Yes.

Q. Now, what effect does the key point restriction have on interstate shipments originating at the Tri-City area and destined to Omaha?

A. It would have to move all of the way by boxcar.

[fol. 1915] Q. For the reason that you can't pass through the key point of Des Moines, Iowa?

A. That is correct.

Q. Again, would such shipments be moved to any point west of Des Moines from the Tri-City area?

A. No.

Q. Now, taking it in the reverse direction, a shipment moving from Omaha to Chicago would have to be handled entirely on rail billing and in boxcars?

A. That is correct.

Q. A shipment moving from Atlantic, Iowa, to Chicago would be handled in what manner under your permanent authority?

A. It would either be loaded in a boxcar at Atlantic, or moved to Des Moines by truck and placed in a boxcar at Des Moines and moved to Chicago.

Q. In other words, it would take the combination of the boxcar and truck movement?

A. It could.

Q. Now, with respect to shipments moving from Omaha to any point west of Des Moines on U. S. Highway 6, could be handled either by boxcar or by truck?

A. That is correct.

Q. Now, the next condition is that "All contractual arrangements between said carrier and the Rock Island Railroad shall be reported to the Commission and shall be subject to revision, if and as the Commission finds it to [fol. 1916] be necessary, in order that such arrangements shall be fair and equitable to the parties." Now, is it your practice to file with the Commission copies of leases you have between the Rock Island Transit and the Rock Island Railroad covering terminal facilities which you use?

A. The Law Department in Chicago handles all of the matters with the Interstate Commerce Commission. I do

not believe that these leases, in fact I don't know whether they are filed or not. There are sufficient copies to be filed or signed and sent in, but whether they are actually filed with the Commission I could not tell you. That is handled by the Law Department in Chicago.

Q. Those matters are handled by the Law Department of the Rock Island Railroad in Chicago?

A. That is correct.

Q. And, so far as your knowledge goes, you don't know whether they have been filed or not?

A. I know they filed contracts with them. I know that has been filed because I have seen them in the office being prepared to go in, but I can't definitely say just what.

Q. Do you know whether copies of your pick-up and delivery contracts have been filed with the Interstate Commerce Commission?

A. That I do not know for sure.

Q. Do you know whether the contracts between the railroad company and its truck subsidiary with respect to the [fol. 1917] handling of interline freight between railroads, have been filed with the Commission?

A. Yes, that has been filed with the Commission.

Q. Those have been filed?

A. Yes, I know that.

Q. What other contractual arrangements exist between the Rock Island Railroad and the Rock Island Motor Transit Company other than those which I have mentioned?

A. The only contractual arrangements that are made, so far as I know, is the pick-up and the delivery, the leasing, and the employees paid for performing services.

Q. Now, do you have a written contract between the Rock Island Motor Transit Company and the Rock Island Railroad covering the line haul which the Rock Island Motor Transit Company does for the railroad on railroad freight?

A. I understand there is.

Q. Well, do you know whether that has been filed with the Commission?

A. It has been filed with the Commission. Now, I will put it this way. I have been told it has been filed with the Commission by the Law Department.

Q. And, other than those I have mentioned, you do not now recall any other contractual arrangements you have between the two companies?

A. That is correct.

[fol. 1918] Q. Does the Rock Island Motor Transit Company pay any portion of the salary of J. D. Farrington, its President?

A. We do not.

Q. Does the Rock Island Motor Transit Company pay any salary of the Treasurer?

A. We do not.

Q. And what is the Treasurer's name?

A. Gibson.

Q. Does the Rock Island Motor Transit Company pay any part of the salary of your Vice President, Mr. Swanson?

A. We do, yes, sir.

Q. And what proportion?

A. He is on the payroll of the Motor Transit at $208.00 a month.

Q. That is his total compensation?

A. From the Motor Transit, that is all, so far as to the best of my knowledge that is the arrangement, and, in fact, that is the only thing the Motor Transit pays him. What the railroad pays him I don't know.

Q. The point I am making, Mr. Peterson, Mr. Swanson gets more than $208.00 a month.

A. That is all. He gets the rest of his salary from the Rock Island Railroad.

Q. Does the Rock Island Railroad pay any part of your salary?

A. Yes, sir.

Q. What proportion? I am not trying to find out your [fol. 1919] monthly salary.

A. They pay one-third of my salary.

Q. Also do they pay a proportionate share of your expenses while you are on the road?

A. No.

Q. What other officer of the Rock Island Motor Transit Company receives all, or a portion of, his salary from the Rock Island Railroad?

A. Walter Hitchen receives about one-fifth of his salary from the Rock Island Railroad.

Q. And Mr. Hitchen is the Traffic Manager of the Rock Island Motor Transit Company. Is there any other officer?

A. There is no other officer, to my knowledge, that receives any monies from the Rock Island Railroad.

Q. Now, Mr. Peterson, referring again to Certificate No. 29130, issued under date of September 11, 1951. Do you interpret that certificate to apply any restrictions to your operations between the Twin Cities, Minnesota, and Omaha, Nebraska?

A. Yes.

Q. In other words, the key point restriction at Des Moines has the effect of prohibiting a through truck operation on rail billed freight from the Twin Cities to Omaha?

A. Yes, sir.

Q. What is the effect of the present certificate with respect to a shipment moving from Cedar Rapids to Omaha, Nebraska?

[fol. 1920] A. Well, it could be moved by truck from Cedar Rapids to Des Moines, and then would have to go into a boxcar at Des Moines to move to Omaha.

Q. In other words, speaking generally, then, the effect of the Des Moines key point restriction requires you to use a combination truck and boxcar service on shipments originating east of Des Moines destined to Omaha?

A. That is correct, and in every instance it slows up the traffic.

Q. Now, is there any such restriction on rail billed freight moving by truck from Kansas City, Missouri, to Omaha, Nebraska?

A. Yes, the same restriction applies there.

Q. Is that because of a key point restriction?

A. Yes, sir.

Q. Where is that key point?

A. Des Moines, Omaha.

Mr. Fowler: This is off the record.

(Statements off the record.)

By Mr. Fowler:

Q. On a shipment originating at Kansas City, that is handled through Des Moines, Iowa, in its physical operation?

A. Yes, sir.

Q. Now, do you transport rail shipments by truck on rail billed freight from St. Louis, Missouri, to Omaha, Nebraska?

A. We do not. Wait a minute. Read that off.

[fol. 1921] Exam. Carpenter: Read the question.

(Question read.)

A. No, we do not.

By Mr. Fowler:

Q. Does the Rock Island Motor Transit Company at the present time have operating authority to St. Louis, Missouri?

A. Yes.

Q. And briefly what is the extent of that operation?

A. The extent of that operation is paralleling the Rock Island Railroad between Kansas City and St. Louis, serving all of the towns on the railroad.

By Mr. Howland:

Q. Any restriction or key points?

A. Yes, a restriction, a key point at St. Louis, a key point at Eldon, and a key point at Kansas City.

By Mr. Fowler:

Q. So, under your present permanent authority you are unable to handle a shipment, St. Louis to Kansas City, all truck?

A. That is right. That is a certificate we acquired by application, and it is restricted in that way in the original certificate.

Q. Now, under your permanent authority, it would also be true that a shipment originating at Ottumwa, destined to Omaha, could not move through the Des Moines key point throughout by truck?

A. That is right.

[fol. 1922] Q. Now, at the present time under your permanent authority, you have no weight restriction on the volume of freight which you can transport by truck on rail billed freight?

A. That is right.

Q. Now, as I understand the instant application as it was originally filed, you sought a certificate of convenience and necessity between Chicago, Illinois, and Omaha, Nebraska, over the route therein described with service to and from the intermediate points which are therein described. Do you care to look at this? That is the first leg of the application, is that correct?

A. That is correct.

Q. Insofar as the route authority is concerned, you now hold permanent authority authorizing operation over those routes?

A. I think that is correct.

Q. And, as far as the points are concerned, you now have permanent authority to serve the points involved?

A. I think that is substantially correct.

Q. Now, the second leg of the application, as it was originally filed, also sought authority between Iowa City, Iowa, and Cedar Rapids, Iowa. You now hold permanent authority to operate over that?

A. Yes.

Q. The next leg of the application, as originally filed, was between Harlan, Iowa, and Omaha, Nebraska, serving [fol. 1923] the intermediate points specified, and the off-route point of Shelby. Am I correct in my understanding you now hold permanent authority for the route which is involved there?

A. I think that is right.

Q. And there has been no enlargement in the scope of the points to be served?

A. No.

Mr. Howland: Except as to Shelby.

A. Shelby was left out in error in the original application.

By Mr. Fowler:

Q. Then, there is involved in this application the additional point of Shelby?

A. I think that is right.

Q. And Shelby is a point located on the Rock Island Railroad?

A. On the Rock Island right west of Avoca.

Q The next leg of the application is between Avoca and Atlantic. I assume that you now hold permanent authority to operate over that?

A. Yes.

Q. And there are no additional points involved there?

A. No.

Q. Now, the application as originally filed volunteered a restriction that no shipment shall exceed five thousand pounds, and that no shipment shall be transported between any of the following points, or through, or to, or from more than one of said points, namely: Omaha, Nebraska, and [fol. 1924] collectively Davenport and Bettendorf, Iowa, Rock Island, Moline, and East Moline, Illinois, but by an amendment filed with the Commission on March 7th all of those restrictions were withdrawn from the application.

A. Yes.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Fowler:

Q. All right. Now, as the application presently stands and the one that is before the Commission for consideration now seeks a certificate of public convenience and necessity to operate over the routes specified in the original application, serving the points specified in the original application as an all out motor carrier, moving freight at motor carrier rates and subject to motor carrier tariffs, is that correct?

A. The application we have on file here is to restore the same rights we had under the old White Line order.

Mr. Fowler: Now, will you read my question, please?

Exam. Carpenter: Read the question.

(Question read.)

A. Well, I have answered it in the best way I can.

By Mr. Fowler:

Q. You don't find anything wrong with the statement I made in the question, do you?

A. Well, we are seeking to restore the same rights we had in the old White Line order which we operated under.

Q. All right. Are you seeking authority to conduct a [fol. 1925] general operation as a common carrier by motor vehicle?

A. That is right.

Q. And are you seeking permission to transport traffic at the established motor carrier rates?

A. That is right.

Q. And are you seeking to transport that traffic subject to the usual established motor carrier tariffs?

A. That is right.

Q. Now, that involves the right of the Rock Island Motor Transit Company to interchange with any other established common carrier by motor vehicle under a through rate or joint rate agreement?

A. That is right.

Q. Now, at the present time, as I understand it, the eastern terminus of the operation of the Rock Island Motor Transit Company is at Chicago, Illinois?

A. That is right. Actually it is in Indiana.

Q. In the Chicago area?

A. In the Chicago area.

Q. And the northerly terminus would be the Twin Cities in Minnesota?

A. That is correct.

Q. Your southerly terminus would be St. Louis, Missouri, and Kansas City, Missouri, generally speaking?

A. Well, yes.

[fol. 1926] Q. And the southwesterly terminus would be, we will get back to Memphis in a minute, the southwesterly terminus?

A. Dalhart, Texas, and Goodland, Kansas.

Q. And I believe you also said this morning you do have

a motor carrier operation down in Memphis, Tennessee, along in there?

A. Yes, sir.

Q. And is that a service auxiliary to, or supplemental of, the Rock Island Railroad?

A. It is an operation which we operate both in handling rail freight and in handling truck billed freight.

Q. Now, if you are granted this application, you would be free to interline with any other established motor carrier that you wanted to enter into an arrangement with, wouldn't you?

A. That is correct.

Q. And that would involve the exchange of trailers which is customary in the industry at the present time?

A. Yes, sir.

Q. Would that enable you by reason of interchange with other carriers to transport traffic moving from Chicago to the West Coast?

A. No. We could not operate any further than we did under the old White Line authority which we had previously.

Q. Assuming that this application was granted, could you enter into an interchange agreement with a carrier operating from Kansas City, Missouri, to Los Angeles, [fol. 1927] California, whereby you would have a through service on a through or joint rate from Chicago to Los Angeles?

A. Yes, it would enable us to do that.

Q. And would that be generally true, in other words, at any point of interchange with other established carriers, the Rock Island Motor Transit Company could enter into through rate arrangements?

A. Yes, we have them.

Q. Which would enable it to conduct an operation from Chicago, Illinois, to Los Angeles, California, San Francisco, California, Portland, Oregon, Dallas, Texas, etc.?

A. Just like any other motor carrier would.

Q. Now, the operations of the Rock Island Motor Transit Company, under the application which you have pending here, would parallel the rail lines of the Rock Island Railroad in each instance?

A. Yes, I think that is substantially correct.

Q. With a very few departures. Now, I believe you will recall, Mr. Peterson, it is many, many years ago when the Rock Island Railroad first ventured into the motor truck business, that the argument advanced in support of a request for operating authority was to the effect that by reason of the use of trucks, that the Rock Island Railroad, first, would be able to improve its rail service, and, second, it would be able to substitute trucks for way freight service?

A. No.

[fol. 1928] Q. Do I have a correct recollection of the testimony that you used to give them in those hearings?

A. You are not correct in that statement.

Q. In other words, when I say to you the reasons which you advanced originally in support of requests for operating authority of this type was, first, you wanted to use trucks to improve rail service, and second, you wanted to substitute trucks for way freight service, I am not correct?

A. No. We substituted trucks for boxcars, and was able to eliminate the boxcars and save some time, over-time on way freights. I don't know of any instance where we were able to eliminate, actually eliminate way freights that would be taking care of it, but it didn't materialize.

Q. If I am correct in my recollection of the reasons originally advanced by you in support of similar requests, namely, that motor trucks were to be used merely in substitution of way freight cars in handling railroad freight, then the present application you have pending here is a far cry from that original premise, is it not?

A. No. In every instance we asked for motor carrier rights, in every instance where we applied for any authority, and when we purchased certificates, such as the White Line, we were very specific, and we had to go back and get our motor carrier authority. We weren't going to accept it if we didn't get it, and Commissioner Rogers' objections to our, he came right out and stated if we re-
[fol. 1929] ceived motor carrier authority in the White Line——

Mr. Fowler: I am going to move to strike the answer of the witness as not being responsive to the question, and

for the reason that he is attempting to recite what is in his primary order and court proceedings, and probably they are the best evidence of what is in it, and I seriously make the motion.

Exam. Carpenter: The motion is sustained.

Mr. Howland: Is the whole answer stricken, the Examiner, please?

Exam. Carpenter: Read the question.

Mr. Fowler: Read the question.

(Question read.)

Exam. Carpenter: Let him go ahead and answer it now. Keep this on the record. The only part of the answer was the back part of it that was wrong.

Mr. Howland: The part about Commissioner Rogers.

Mr. Fowler: He can agree with what I said.

A. Well, I don't agree with your statement at all.

By Mr. Fowler:

Q. All right, now, the fact is, of course, that you are substituting—withdraw that. The fact is that the Rock Island Motor Transit is now performing a transportation service for the railroad that was previously performed in their general way freight operations?

A. Yes.

Q. And there is no question in your mind but what that [fol. 1930] has resulted in a substantial savings to the Rock Island?

A. Not the substantial savings that they expected to make.

Q. Well, again, let me ask you if you haven't testified in answer to questions I have propounded to you over the past fifteen years many, many times, one of the things that was involved in this was the savings the railroad would realize by virtue of the substitution of trucks for this way car service on the small branch lines.

A. I will agree with you to the extent that was what we expected to do, and we have been able to realize a saving in boxcar miles and in over-time on way freights. Beyond that it just hasn't materialized to the extent I thought it was, or any other railroad official thought it would.

Q. Now, I think your testimony shows that the Rock Island Railroad is presently affording to the public a merchandise boxcar service from Chicago to such points as Iowa City, Ottumwa, Des Moines, Omaha and the Twin Cities. Is that your understanding of the situation?

A. They do have some boxcar service to those points.

Q. And the record also shows, as I recall it, that the freight which moves to the various destination points by merchandise car is handled by the Rock Island Transit truck if the destination is beyond the break of the merchandise car?

A. That is true in some instances.

Q. Well, I will recall that your terminal man from Iowa [fol. 1931] City testified that Iowa City had a merchandise car in which Chicago merchandise was loaded. It was broken at Iowa City and then was distributed on your peddler operation out of the various towns contiguous to Iowa City.

A. That is generally the pattern.

Q. Now, in your direct testimony you referred to a situation which arose by reason of the fact that a substantial volume of traffic moves into the Iowa territory from Chicago, whereas the corresponding traffic moving eastward from Iowa to Chicago is extremely light. In other words, it was an unbalanced situation.

A. There is an unbalanced situation except in the truckload business. You will probably have more truckload business moving eastbound than you will westbound.

Q. All right. What you refer to, I presume, are packing house products and agricultural products.

A. Poultry and eggs, packing house products, and certain manufacturing such as——

Q. But the operation which you seek authority to conduct here would permit you to transport rail billed freight on the return trip from Des Moines to Chicago by truck rather than by boxcar?

A. Yes.

Q. In other words, in other words, the railroad company could load its westbound freight on boxcars to its heart's content and then to compensate for the unbalance, the [fol. 1932] return freight which is railroad billed, would

be moved back to Chicago by trucks of the Rock Island Transit.

A. The railroad's freight it would move east is the assembling of such little L. C. L. freight in the area north of Kansas City, east of Denver, south of Minneapolis, which would be concentrated at Des Moines, which, to my knowledge, has never exceeded, has never quite made two truckloads a day.

Exam. Carpenter: Read the question.

(Question read.)

Mr. Fowler: He answered that. Do you want the answer?

Exam. Carpenter: Yes, read the answer.

(Answer read.)

Exam. Carpenter: All right, Mr. Fowler, go ahead.

By Mr. Fowler:

Q. I believe you testified, and I believe Mr. Farrington testified, one of the reasons they would like, the Rock Island Railroad and its affiliate would like to obtain this authority was to overcome that unbalanced move and free some boxcars for general use. Is that your conception of this application?

A. That is the general idea.

Q. If the authority you are now seeking here were granted by the Commission, you could at any terminal point move your traffic either by rail car or by truck in any direction, is that correct?

A. In this immediate area, yes.

[fol. 1933] Q. Now, I presume that this unbalanced movement of traffic is an experience which any other motor carrier has to face?

A. He doesn't have to face it like we do with these restrictions.

Q. No, but traffic which any other motor carrier handles is subject to that same unbalance?

A. Yes, they are subject to it. However, they are free to get this truckload business back east.

Q. In other words, then, a carrier who is not affiliated with the railroad must find some traffic to move eastward to Chicago on the return movement or send his truck back empty?

A. Yes.

Q. Don't you think that gives the Rock Island Railroad an extremely significant competitive advantage over an ordinary independent motor carrier?

A. You mean the Rock Island Railroad or the Rock Island Transit?

Q. I use them one and the same for the question.

A. No, that doesn't. In fact we are at a very serious handicap being an affiliate of the Rock Island Railroad.

Q. In other words, the fact you can interchangeably load your freight on a rail car or on a truck moving in any direction doesn't impress you as being an advantage you have over your competitors?

A. No.

Q. In the motor carrier field.

A. I want to cite you an example here.

[fol. 1934] Q. Just a minute. I want you to answer my questions, and Mr. Howland will take care of you. Now, there was a lot of testimony on direct about the great reduction in employee personnel, and I don't think I would mention it except for the fact counsel went over such a wide range. Now, when you mentioned the number of employees you have and the number you are going to have, and all that sort of thing, I assume you are giving system figures?

A. No, that is the figures involved in this immediate territory.

Q. What do you mean by this "immediate territory"?

A. I mean the territory from Omaha to Chicago and the affected territory.

Q. In other words——

A. The only two points that are not on this line would be Minneapolis and Kansas City, which are vitally affected by the White Line order.

Q. Then, when you gave us the figures which you gave us, you included the Chicago setup?

A. Yes.

Q. The Tri-City setup?

A. Yes, sir.

Q. The Des Moines setup?

A. Yes, sir.

Q. The Omaha setup?

A. Yes, sir.

[fol. 1935] Q. The Kansas City setup?

A. Yes.

Q. And the Twin City setup?

A. Yes, included with Newton, Iowa City, Cedar Rapids and Muscatine.

Q. Yes.

A. It is the immediate involved territory. Kansas City and Minneapolis are very seriously involved in this particular operation.

Q. Now, if I understood your testimony correctly, you were attempting to develop the fact that you would have to make a serious reduction in personnel out in this territory in the event no relief came by first, the weight restriction, and second, the key point restriction, is that correct?

A. Under this application, yes, sir.

Q. Now, let's assume first that the Commission should see fit to retain the key point restrictions which are presently contained in your permanent authority. How would that affect your employee personnel situation?

A. Well, it would affect it very little different than it would affect on the regular White Line order as set out that we now have. If it does, it just wipes the heart out of our operation, and I would probably have to lay off anywhere from two hundred fifty to three hundred fifty employees.

Mr. Fowler: I move to strike the answer as not respon-
[fol. 1936] sive to the question.

A. I think I answered the question.

Exam. Carpenter: I think it was responsive.

A. I think I answered the question.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: That is responsive.

Mr. Fowler: All right.

By Mr. Fowler:

Q. As I understand your estimate, the key point restriction, if it is retained in the order which you finally got out of this proceeding, you will have to lay off two hundred fifty men?

A. The key point is just as destructive. I would have to lay off——

Mr. Fowler: Just listen to the question. I move to strike the answer.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: All right, answer it. Strike the answer and go ahead.

A. The key point is just as destructive to the operation as restricted to rail billing, and would make very little difference in our operation. It is my best judgment that we would lay off anywhere from two hundred to three hundred fifty people in that kind of an operation.

Q. Are you basing that estimate on an assumption that [fol. 1937] in the final certificates issued to the Rock Island Motor Transit Company, that it will contain the present key point restrictions as well as the weight restriction?

Mr. Nolan: Off the record a minute.

(Discussion off the record.)

Exam. Carpenter: Read the question.

(Question read.)

By Mr. Fowler:

Q. Let me withdraw that. What I am trying to get at, Mr. Peterson, is this. You are apparently attempting to leave the impression there is going to be a substantial curtailment of personnel of the Rock Island Motor Transit Company unless this instant application is granted to you in the form in which you have requested it.

A. I am not attempting.

Q. Just a moment. You follow me up to that point?

A. Yes, I follow you.

Q. Now, you have testified you are going to have a reduction in personnel of some two hundred or two hundred fifty men if something doesn't happen. Now, what is it that you are talking about that might happen that will cause a reduction in personnel of two hundred fifty men in this part of your system operation?

A. If the White Line order as it now stands is all we will have when this thing is through, then we will lay off a minimum of two hundred fifty to three hundred fifty employees of the Rock Island Motor Transit Company.

[fol. 1938] Q. Now, when you refer to the "White Line order" you refer to the order of the Commission which was involved in the appeal to the United States Supreme Court?

A. I mean the order we have at the present time, that the key points of Davenport, Des Moines and Omaha are restricted to rail billing.

Q. All right, let me suggest this to you. You now have in permanent form all of the authority you are seeking here now with two exceptions, as I understand it, and that is the elimination of the three key point restrictions, and the imposition of a weight restriction.

A. I made my answer on the basis of the order of the, what is now our order of permanent authority between Davenport, Des Moines and Omaha, and my figures stand on that.

Q. All right, now, let me ask you what it is that you are seeking here that you do not now have in your permanent certificate?

A. We are seeking to regain back the same authority we had in the White Line order before it was restricted. That is exactly what we are seeking here.

Q. And what does that involve when you break it down?

A. That involves open authority from Omaha through Des Moines to Chicago as we formerly had it.

Q. As an all out motor carrier?

A. As an all out motor carrier, that is right.

Q. Now, I think you testified that reduction in personnel [fol. 1939] would come about in several ways. First, if you don't obtain the authority you are now seeking, you would close up or reduce the personnel at many of your terminal points that now afford this tariff service that Mr. Nolan was talking about?

A. It would not only close up, it would eliminate an enormous amount of road drivers, and just general personnel, just closing down.

Q. Do you think that would amount to two hundred fifty people?

A. It would amount to over two hundred fifty people.

Q. Road drivers and terminal help?

A. Yes, sir.

Q. Just because you had to switch back to an all out rail operation?

A. We couldn't switch back to an all out rail operation and even have any semblance of this kind of traffic.

Q. Well, let me see if that is correct. You now transport rail billed freight by motor truck throughout this general territory, do you not?

A. Yes.

Q. And no matter what happens to this application you are going to continue to do that, I assume?

A. In its minor way, the way it is now being handled.

Q. You will continue to conduct the motor truck, the auxiliary service, etc.?

A. In a very minor way compared as it is today.

[fol. 1940] Q. You will perform whatever service the railroad is required to perform, will you not?

A. I will be required to materially reduce it.

Q. But the railroad will perform whatever service it is required to perform under its obligation, wouldn't it?

A. It is certainly going to cut it.

Q. The fact still remains, the railroad has an obligation to serve the public, and I assume it will continue to do that?

A. No type of service we are giving there.

Q. We will come to that in a minute. The fact remains no matter what the outcome of this instand application, the Rock Island Motor Transit Company will continue to conduct a truck operation as auxiliary to, and supplemental of, the rail service?

A. I am not too sure about that.

Q. You want to say that service will not be continued in the event this application is not granted?

A. No, I can not say that. I can only say it is going to have to be reappraised and see what we can do with it when the final order is out.

Q. Now, you said on direct examination—I will withdraw that. You maintain a terminal force and terminal facilities at such points as Iowa City, Grinnell, Newton, Atlantic, Washington, Iowa, Muscatine, and at some other points which are comparable to those I have mentioned in size, etc. [fol. 1941] Now, your force at those points consists of a terminal manager, or I believe you call them terminal agent, and in addition to that you maintain your pick-up and delivery drivers, and in addition to that you maintain a billing clerk, and the testimony here is you have tariff information available at all of those points for the convenience of your shippers?

A. That is right.

Q. Now, as I understand it, with respect to those particular points, none of the competitive motor carriers have facilities of that character?

A. I don't think to the extent that we have no.

Q. Well, the testimony here is that there were no terminal facilities or comparable personnel at any of the towns I have mentioned except as were owned and conducted by the Rock Island Motor Transit Company?

A. I don't believe there is.

Q. Yes. Now, I presume the reason for providing such facilities is to give a better service to the public?

A. That has been our reason for providing it.

Q. And it is by far and away a better service than is afforded by any of the competitive motor carriers at the present time?

A. Well, I don't, it might be a better service to the public, but it is certainly a far more expensive service than I would like to maintain at any of those places if I was operating a private truck line. I would never maintain the [fol. 1942] service we are maintaining at the small towns. They are too costly. They are too expensive.

Q. Now, I believe you have testified that you are operating this motor carrier operation at the present time at a loss?

A. We are.

Q. And have been for some time?

A. Since the last several months.

Q. I think you also stated you were going to have to have

interstate, unrestricted interstate authority coupled with your intrastate revenue, coupled with the elimination of any weight restrictions if you were going to continue that type of service.

A. I didn't say we would have to. I said that if, to give that type of service and maintain it, it is necessary to have volume shipments and truckload shipments to help balance your operation, and help pick up the losses we are sustaining on the peddler operation we were able to do when we had the White Line authority, but, in view of that restriction, it has cut us down to where we are taking such terrific losses. In my best judgment we can not continue to perform the type of such service we are now performing with the restrictions we have imposed at the present time.

Q. What is your opinion as to whether or not any of the established motor carriers who have authority to operate over U. S. Highway 6 could maintain the type of service which you maintain on the available traffic and revenue? [fol. 1943] A. There was a time when you could make money on peddler operations, but your costs have been going up so high in the last few years that I don't see much chance of doing any more than even remotely breaking even, or even then on any kind of a peddler operation.

Q. Then do we find ourselves in this position, that the Rock Island Motor Transit Company is affording a service which is probably not justified by the available revenues by reason of the subsidization from the Rock Island Railroad?

A. I doubt it.

Q. Well, the fact remains, your operating losses are now secured or guaranteed by the parent corporation, as a practical matter?

A. I imagine as a practical matter.

Q. Now, how long would the Rock Island Motor Transit Company be able to perform the type of service which has been described in this proceeding if it weren't for the fact they had the financial backing of the Rock Island Railroad?

A. Under the present restriction I don't think it would be too long.

Q. You mean by that it couldn't continue to perform that service?

A. Not under the present restrictions.

Exam. Carpenter: We will take a five minute recess.

(Short recess.)

[fol. 1944] Exam. Carpenter: We will proceed.

By Mr. Fowler:

Q. Could it be, Mr. Peterson, that under present conditions, due to the increased costs, etc., that the available revenue and traffic from these small communities will not justify the type of service which the Rock Island Motor Transit Company is now affording?

A. Well, we have been able to perform this service and make a little money up until these restrictions hit us, and from the time those restrictions hit us, it has been pretty rough.

Q. Well, there were no restrictions on for the first seven months of 1950, were there?

A. The restrictions, the business started dropping off in about June when the effective date of this order started hitting us, the business started dropping off.

Q. Let me ask you again, there were no restrictions applicable to your operation for the first seven months of 1950?

A. There were no actual restrictions but there might just as well been a restriction because the results were the same.

Q. As I understand it the Commission's orders which imposed these restrictions became effective in the fall of 1951.

A. The Commission's order became effective, but the thing has been hanging over our head for the last year or so, and we just haven't been getting the business because they were looking for other outlets, and the result has been the same as if the restriction had been in.

[fol. 1945] Q. I hold in my hand a copy of your Exhibit No. 14 and it showed that you lost money every month for the first seven months of 1950. Now, I ask you, there were no restrictions in effect at that time?

A. No. The effect of it didn't come in too much until last year.

Q. Well, you were conducting up through the entire year of 1950, you were operating under the old so-called White Line certificate, weren't you?

A. Yes.

Q. So, if you lost money the first seven months of 1950, that had nothing to do with these restrictions, did it?

A. Well, we made money in 1950.

Q. Did you make any money the first seven months of 1950?

A. I don't remember just exactly, but taking the year as a whole we did.

Q. Didn't you make any money during the first three months of 1951?

A. No.

Q. The restrictions were in effect during the month of October, 1951?

A. They were supposed to have gone into effect in July, I think it was of 1951, I don't recall. I think either July 1 or July 30.

Q. According to your Exhibit 14 you made $12,000 in [fol. 1946] 1951, and you made $5,800 in October. The restrictions were on then, were they not?

A. But those were wonderful months in the trucking business.

Q. Well, the fact remains, there are two months out of the last four months of 1951 when you say these restrictions were in effect, you show an operating profit.

A. If you can't make a profit in September and October in the trucking business, then you better get out.

Q. The fact does remain, however, according to your own exhibit you made money in two of the last four months of the year 1951?

A. That is right.

Q. And that was during the time the restrictions were in effect?

A. I will agree with you.

Q. So that would indicate that at least for the month of August and the month of October, 1951, when the restrictions were in effect, you, nevertheless, were able to develop an operating profit?

A. We should have made ten times that much.

Q. But you did develop an operating profit?

A. Yes, I will agree with you.

Q. Now, by the same token, during the first four months of 1951, there were no restrictions in effect, were there?

A. No, there were no restrictions in effect.

Q. And your Exhibit No. 14 shows you consistently lost money in 1951?

[fol. 1947] A. Yes.

Mr. Howland: You mean throughout the year?

Mr. Fowler: The first four months of 1951, you showed an operating deficit each and every month.

A. Yes. It was to a great extent the boomeranging of this whole thing that has had an over-all effect on the entire operation for the last couple of years.

By Mr. Fowler:

Q. The fact remains you are making the statement here that you have got to have these restrictions off in order to operate at a profit and continue to perform the service which you are now performing?

A. That is right.

Q. But the fact remains that in the month of January, 1951, February of 1951, March of 1951 and April of 1951 when there were no restrictions of any character on your operation, you, nevertheless, showed a consistent operating deficit for those months.

A. I am not concerned——

Q. Tell me what effect——

Exam. Carpenter: Give him a chance to answer.

A. I am not concerned about any one particular month. I am concerned about the picture at the end of the year. If I was to worry about making money every month, I had better not be running this operation.

Q. Well, the fact remains while the restrictions have [fol. 1948] been in effect, namely, since the fall of 1951, you have shown an operating profit during two months.

A. Yes, when we should have shown ten times as much.

Q. And the fact remains while the restrictions were not on you lost money consistently for four months of 1951?

A. There is no question about it.

Q. Now, at many of these small towns where the Rock Island Motor Transit Company doesn't maintain any agent or terminal facilities, the pick-up and delivery is done from the over-the-road trucks?

A. That is right.

Q. And that is precisely the manner in which the competitive carriers handle pick-up and delivery in those small communities?

A. Yes.

Q. However, in those towns the Rock Island Railroad, in many instances, maintains a rail agent, is that correct?

A. In some of them, yes.

Q. And the Rock Island Motor Transit Company does the pick-up and delivery work for the railroad in those small towns?

A. Yes.

Q. And that is in place of the former drayage arrangement which they had?

A. That is only in those small towns because the railroad couldn't get a drayman to do the work, and we certainly, we don't want to do any pick-up and delivery of [fol. 1949] our own in these small towns. We would far rather hire a drayman, but we can not get them, nor can the railroad.

Q. You wouldn't have much occasion for a drayman where you are hauling railroad freight in on your own truck.

A. Our own motor billed freight, we would far rather turn that over to a drayman in these little towns because it is cheaper to pay him than pay the wages to the line-haul driver.

Q. That would be precisely the case with your competitors, too, would it not?

A. Yes, there isn't any question about that.

Q. There has been some testimony given by some of the witnesses here that the rail agent in these small towns where the Rock Island Transit doesn't maintain any agent, handles transactions for the Rock Island Transit as well as for the Rock Island Railroad, isn't that correct?

A. If there are any I don't know it.

Q. A witness testified that he paid the Rock Island Motor Transit transportation charges to a rail agent. What do you have to say about that?

A. I don't know of it if it is. It might be the driver might have left a bill and the shipment down there that he couldn't get rid of, and made that arrangement himself, but if there are any arrangements like that, I don't know of it.

Q. The fact remains that in many of these small towns involved in this application the Rock Island Motor Transit [fol. 1950] Company doesn't maintain any permanent representation?

A. That is right.

Q. And that the Rock Island Railroad does have an agent?

A. Yes, in some of them.

Q. And, in at least some instances, the agent of the Rock Island Railroad is contacted by shippers who are using the services of the Rock Island Motor Transit Company with respect to the payment of charges and the transportation of shipments, and so on?

A. No, I will not concede that because if he is doing that he is not doing it with any authority from the Motor Transit Company.

Q. If it is true that the Rock Island agent in these smaller towns is performing service for the Rock Island Motor Transit Company, it affords you some competitive advantage over your competitors, doesn't it?

A. No, I don't think so.

Q. Isn't it pretty difficult to separate the colored necktie which your man wears in these small towns, whether he is the Rock Island Railroad, or the Rock Island Motor Transit Company?

A. No, there isn't the slightest difference because there is too much jealously between the Rock Island Railroad employees in these small towns and the Rock Island Transit employees. They are very careful to bring that out.

Q. A witness by the name of Graham Godfrey; Dexter, Iowa, he is an implement dealer there, he testified in this [fol. 1951] hearing he filed claims he has against the Rock Island Motor Transit Company with the railroad, rail

freight agent at Dexter, and he pays the Rock Island Rail agent for freight charges he owes the Rock Island Motor Transit Company.

A. He is in error.

Q. Does that situation exist generally throughout this operation?

A. It doesn't, and that man is in error. He never filed any claim with the Rock Island Railroad for any claim of the Rock Island Motor Transit. I assure you of that.

Q. All right. What is this deal you have got with the H & W Motor Express Company, Inc. that Mr. Nolan is inquiring about?

A. Well, there is no deal except to this extent, that we have made arrangements with them that they wish certain freight delivered at Cedar Rapids for a certain period of time because they have more active equipment there, and maybe for the next period of time we will deliver the same freight to them at Davenport. It is an arrangement we have worked out if we had movements of freight so that we won't be getting freight into a place where they don't have the empty trailers. It is a convenience operation. It is something we worked out.

Q. Let's be specific about it. Is this arrangement only applicable at Cedar Rapids?

A. With the H & W Motor Express Company, it is between Cedar Rapids and Davenport. That is where we interchange freight with them.

[fol. 1952] Q. In other words the H & W have a substantial amount of traffic moving to Cedar Rapids, and you happen to have a piece of empty equipment. Do they turn it over to you for delivery at Cedar Rapids?

A. No. The interchange freight we have that comes up clear from the south, from Oklahoma, or Texas, or interline at Kansas City. It is an interline arrangement. It is a convenience. We don't pick up freight where we don't have equipment, and they don't pick up freight where they don't have equipment.

Q. Let me see if I understand it correctly. The H & W have authority to serve Cedar Rapids from the Tri-Cities and so do you?

A. Yes, sir.

Q. But instead of taking it up on their own equipment, they turn it over to you and you take it up on your own equipment?

A. Not necessarily through Davenport. This is more the Des Moines gateway through Cedar Rapids.

Q. Let's find out about that, what kind of a situation exists there. Do the H & W have authority to serve Des Moines?

A. Yes.

Q. They have authority to serve Cedar Rapids?

A. Yes, sir.

Q. And so does your company?

A. That is right.

[fol. 1953] Q. Am I correct in this, that freight which the H & W has destined to Cedar Rapids, we will say, in interstate commerce, they turn over to you for physical transportation rather than take it up on their own equipment, is that it?

A. No, that isn't it at all.

Q. Well, I don't understand it yet.

A. We will take freight coming up from Kansas City and points beyond, points they don't make, destined to some point on their line like Dubuque, or some point beyond that. We are certainly not going to turn it over to them at Des Moines. We will haul it to Cedar Rapids, or haul it to Davenport. We are going to get the long haul on it. We will make arrangements with them whichever place they want it, at Davenport or Cedar Rapids, whichever place they are going to have empty equipment, and more than quite often it is an advantage to have it at Cedar Rapids than Davenport because they will have empty equipment at Cedar Rapids. It is a mutual agreement that was worked out with them and with other truck lines at various points.

Q. What it amounts to is a mutual arrangement between your company and the H & W Motor Express Company as to the point at which you will deliver interline freight destined to a certain point?

A. That is right.

Q. And what controls that is the convenience of their own operation as to which point they will take it. Is that what

[fol. 1954] you had reference to when you were talking about the H & W?

A. To a great extent.

Q. I presume you have that kind of an arrangement with every carrier you interline with?

A. We have it with a lot of them.

Q. Now, at the present time, whether it is applicable in this territory, but speaking now of your system operations, you have many operations where you transport by truck rail freight under rail billing where you don't have any concurrent motor carrier authority, is that correct?

A. Read that, please.

Exam. Carpenter: Will you read it?

(Question read.)

A. We have one segment from Kansas City to St. Louis which is restricted to rail billing. We have one segment from McAlester, Oklahoma, to the State line at Arkansas. We have a little segment between Fort Worth and Dallas, and we have the segment between Cedar Rapids and Decorah, are the only segments that I can name where we have no motor carrier billing on the entire system, on the six thousand miles of operations.

Q. Now, your counsel has produced a file which apparently contains copies of your pick-up and delivery contracts between the Rock Island Motor Transit Company and the Rock Island Railroad. Now, looking in this file under "D" I find a copy of a contract entered into on July 18, 1949, which apparently provides that the Rock Island Motor [fol. 1955] Transit Company will pick up and deliver Rock Island Railroad freight in that area on the basis of sixteen cents per hundredweight.

A. Is that Des Moines, yes.

Q. Now that applies irrespective, that is a unit figure, irrespective of the tonnage volume or the miles which the pick-up and delivery truck has to operate?

A. That is sixteen cents a hundred, not minimum. That is a contract, it was in effect, as I recall, by the carrier that had it at the time we took it over.

Q. And the contract has been in effect since July 18, 1949, without any modification upward?

A. There has been no necessity in that because it is costing us around twelve something to perform that service.

Q. In other words, the Rock Island Motor Transit Company, then, according to your judgment, is making a profit of four cents on each one hundred pounds?

A. Not quite four cents, but three and one-half cents if I recall correctly.

Q. In other words, your pick-up and delivery contract at Des Moines develops for you a profit from the Rock Island Railroad?

A. That is right.

Q. But the basic rate has not been changed since the contract was entered into on July 18, 1949?

A. That is right.

[fol. 1956] Q. Do you feel that the fact that the Rock Island Motor Transit Company can develop a profit in that manner on pick-up and delivery service for the Rock Island Railroad, that it has some competitive advantage over other carriers in this territory that don't have such arrangements?

A. Oh, I don't believe so.

Q. It does produce for you a revenue, does it not?

A. There are several other little places where we lose a little money on it.

Q. Now, do you have a pick-up and delivery contract at Davenport?

A. Yes.

Q. I have been unable to find a copy of the pick-up and delivery contract which exists between the Rock Island Motor Transit Company and the Rock Island Railroad in the Tri-City area. Do you have such a written contract?

A. We have, yes.

Q. And will you undertake to locate it some time?

A. I will be glad to furnish the contract. The rate is eighteen cents on pick-up and delivery and ten and one-half cents on shuttle, and should be in that file because this is an abstract of that file.

Q. Now, when you refer to "shuttle service", what do you have reference to?

A. Shuttle the railroad freight between the five terminals there.

Q. As I understand it you also have contracts with the [fol. 1957] Rock Island Railroad whereby your equipment and your personnel is used in transporting freight for the railroad to and between other railroads?

A. In some places, yes.

Q. I think you have such an arrangement in Omaha?

A. Yes.

Q. And such an arrangement at Davenport?

A. Yes.

Q. I think you just said, is that true in Des Moines?

A. Yes. We just took it over in Des Moines just the first of this month because the people that were having it wanted to abandon it.

Q. And at Minneapolis, do you have it there?

A. No, we do not.

Q. How about at Kansas City?

A. We do at Kansas City.

Q. Now, I notice in this file a contract covering Council Bluffs pick-up and delivery service, which was entered into on the 18th day of July, 1949, and apparently provides for a charge of ten cents per hundredweight, is that correct?

A. The Omaha contract is fourteen cents a hundred.

Q. This is Council Bluffs, Mr. Peterson.

A. I don't have Council Bluffs listed on my abstract. I have Omaha and the Council Bluffs—Omaha shuttle, which is nine cents. We do the picking up and delivery. I should [fol. 1958] have it on here because we have a contract on it.

Q. I have called your attention to the file you handed me which contains a copy of contract made July 18, 1949, covering Council Bluffs pick-up and delivery at the rate of ten cents a hundred, and the shuttle contract between Council Bluffs and Omaha, seven cents per hundredweight.

A. Well, the shuttle service contract should be nine cents, the shuttle there. There must be another local down below it or above it. There must be.

Q. You have a separate contract for Omaha?

A. Yes. That is fourteen cents on Omaha.

Q. I notice in this same file a contract dated December

1, 1949, apparently covering pick-up and delivery service at Omaha and Council Bluffs.

A. That is probably it.

Q. Which provides for fourteen cents per hundredweight pick-up and delivery at Omaha, Nebraska, proper?

A. Yes, sir.

Q. And pick-up and delivery to and from the Omaha freight house as applied to Council Bluffs is seventeen cents per hundred?

A. I think that is correct.

Q. Have any of those charges been increased since this contract was made in 1949?

A. Not that one. That is the last contract.

Q. Now, you also perform the intra-rail service to the [fol. 1959] Rock Island Railroad in Omaha and Council Bluffs?

A. Yes.

Q. On the basis of nine cents per hundredweight?

A. Nine cents on that, right.

Q. Now what, in your opinion, as to whether or not those develop a profit to the Rock Island Transit, or develop a loss?

A. Well, I haven't checked them. I could not tell you at the moment whether they do or they don't. They were taken over at that time, when they were originally taken over at the time they were taken over, they were taken at the rate the contractor was using, was getting at that particular time.

Q. I assume you readily agree with me, the cost of pick-up and delivery operation has increased substantially since 1949?

A. Not so substantial as it will effective February 1, 1952.

Q. But you have, your cost of operation in pick-up and delivery has certainly increased from 1949?

A. Oh, yes, it has increased some.

Q. Your counsel has handed me copies of a number of contracts which apparently cover the leasing of railroad facilities by the Rock Island Motor Transit Company, which, of course, I have not had an adequate chance to examine in detail. Now, I believe you testified this morning that the

basis for the rental of these premises was upon a six per cent return on the value of the property, six per cent it appeared on the books of the railroad company.

[fol. 1960] A. I don't know whether that is the value that appeared on the books of the railroad company. However, in every instance when I have argued with them on getting a better lease, they say, "We have to charge on the basis of six per cent."

Q. Who fixes these rents, the Transit Company?

A. No, the Real Estate and Tax Department of the railroad fixes the rent.

Q. In other words the Real Estate and Tax Agent of the Chicago, Rock Island & Pacific Railroad is the one that designates the amount which the Rock Island Transit should pay for these rents?

A. Unless I can take him out of it, and taking it down to—I love the guy.

Q. He is the final guy?

A. He is the final guy. I have to argue with him on all of them.

Q. So you, as General Manager of the Rock Island Motor Transit Company, don't have the veto power on the rental price which the Real Estate and Tax Agent of the railroad fixes?

A. No, I don't have veto power. I can only argue with him.

Q. You have a right to argue, but if he doesn't agree with you, that is the end of your argument?

A. That is about right in that case unless I want to take it over his head, which I haven't had to do so far.

Q. Now, I believe you stated that you have a contract with the Rock Island Railroad which provides that the Rock [fol. 1961] Island Motor Transit Company will handle, will haul rail freight on your over-the-road trucks on a basic price of fifty-five cents per hundredweight?

A. There is.

Q. Irrespective of the distance travelled?

A. Yes.

Q. The type of traffic provided?

A. Yes.

Q. What else was there? Mr. Peterson, the witness who

appeared here by the name of Louis C. Willenbrock, from Mitchellville, Iowa, testified that when he wants to avail himself of the services of the Rock Island Motor Transit Company, he merely goes and tells his Rock Island agent and he sends the truck around. Is that the general situation over your system?

A. No, it is not.

Q. Now, since this restriction became effective with respect to key points, how have you been handling your freight from Chicago destined to Omaha?

A. We have handled some freight destined to Omaha, brought into Des Moines and turned it over to the Roberts Transfer here at Des Moines.

Q. Is the Roberts Transfer a common carrier operating between Des Moines and Omaha?

A. Yes.

Q. Has it been turned over to him on a contract basis or a [fol. 1962] joint rate basis?

A. On a joint rate basis.

Q. In other words, that is rail billed freight?

A. No, that would be truck billed freight.

Q. Truck billed freight.

A. And we have no authority to haul it to Omaha. We can haul it as far as Council Bluffs, or turn it over to him at Des Moines. There is very little of it but we do get caught with some of it.

Q. But there has been some rail billed freight that has gotten over on Roberts' truck for Omaha?

A. If it has that has been an accident.

Q. How does that happen?

A. It is turned back if it is caught. It isn't even handled at all.

Q. Is there any joint rate agreement between the Rock Island Railroad Company and the Roberts Transfer?

A. No.

Q. The only agreement which is in existence is an interline joint rate agreement between the Rock Island Motor Transit Company and the Roberts Transfer?

A. That is right, just the regular tariff interline rate agreements.

Q. Do I understand, then, since this restriction has been effective the Rock Island Motor Transit Company has been [fol. 1963] handling motor billed freight at Chicago, destined to Omaha, and turning it over to the Roberts Transfer Company at Des Moines?

A. Yes, we can do that under the order. We are restricted not to haul any Chicago freight to Omaha.

Q. Then, the restriction doesn't amount to very much, does it?

A. Oh, yes, it does.

Q. If you can originate freight at Chicago destined to Omaha and bring it to Des Moines and turn it over to another carrier, all you lose is the revenue on the haul from Des Moines to Omaha, isn't it?

A. Well, we get caught with some, and we certainly don't want it at all.

Q. Well, then, you have circumvented the effect of the restriction by that arrangement?

A. No, I don't think so.

Q. The fact remains, does it not, you have accepted freight originating in Chicago and destined to Omaha, and you have transported it on your equipment to Des Moines, Iowa, where you have turned it over to the Roberts Transfer?

A. Yes, we have.

Q. Let me ask you one more question about the effect of this restriction which you have on your permanent certificate authority as applied to interstate shipments moving from the Twin Cities in Minnesota, to a point such as Iowa City, Iowa?

A. Moving out of the Twin Cities on truck billing or rail billing?

[fol. 1964] Q. Well, first on rail billing?

A. We are restricted to five thousand pounds on any shipment moving out of the Twin Cities to Iowa City whether it is truck or rail. No, the rail is not. The rail is not restricted. The rail is twenty thousand pounds, I beg your pardon, but on truck billing, it is restricted to five thousand.

Q. All right, let's take a rail billed shipment under your permanent certificate, moving from the Twin Cities in

Minnesota to Iowa City, Iowa. Can you handle that through on the truck operation?

A. We could, yes.

Q. In other words, the key point restriction wouldn't affect that type of shipment?

A. Not to Iowa City.

Q. But would affect it to Omaha?

A. Yes, sir.

Q. And would affect it to the Tri-City area?

A. Yes, sir.

Mr. Howland: Mr. Fowler, Mr. Morrison has located the copy of the agreement dated June 18, 1951, between the Railroad Company and the Motor Transit Company, covering pick-up and delivery service at Davenport, Iowa, Rock Island and Moline, Illinois. It is in the file. It seems to have been filed under the designation of the letter "U" instead of the letter "T."

[fol. 1965] By Mr. Fowler:

Q. The contract you have just referred to apparently provides for an eighteen cent per hundredweight charge, no minimum charge.

A. Yes, that is what I have, my records.

Q. And that is in the Tri-City area, is it?

A. Yes, sir.

Q. I suppose these agreements which you have produced here also cover situations—I will withdraw that. I am sure it does. Off the record.

(Discussion off the record.)

Mr. Fowler: Well, that is all I will ask. Probably not all I should have had.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. All right, Mr. Peterson, counsel has asked you concerning the losses from operations in the certain periods of the year, both in the year 1950 and in the year 1951,

being the early months of the year. What is the fact generally in this territory, in your experience, as to whether the months of January and February, the motor carriers, or at least the Rock Island Motor Transit Company, has been able to make any profit usually in those months?

A. Generally speaking, January and February are your two lowest months in the year. Your upturn starts in March, and you have March, April and May.

[fol. 1966] Q. Do you recall in the year 1950 that there was rather an abnormal situation existed in that there were certain wage increases that were granted, and there was a lag in the picking up of the rate increase to take care of the increased costs?

A. I don't recall exactly what that situation was there, but there was some rate increases, although they were slow in getting in, and the situation is going to be the same now.

Q. Now, the fact of the matter is that for the years 1950-1949, your year figures did show some profit to the Rock Island Transit from the operation of the business, isn't that a fact?

Mr. Fowler: I am going to object to that on the grounds it is not the best evidence. The books and records are the best evidence he has had a profit in the operation.

Exam. Carpenter: He is speaking from the records. They are already a part of the record, Mr. Howland?

Mr. Howland: Yes. This exhibit doesn't cover 1949. It doesn't cover 1949.

Exam. Carpenter: The objection sustained.

Mr. Howland: All right, go ahead.

By Mr. Nolan:

Q. Mr. Heinecamp testified here today in response to a question by Mr. Fowler in regard to the expeditiousness of rail freight moving out of Omaha on rail billing, and you were last asked by Mr. Fowler in regard to a shipment from Minneapolis to Iowa City. Now, what is the fact as to whether or not a shipment from the Twin Cities [fol. 1967] to Iowa City by rail billing has no restrictions other than the rail billing under your permanent authority? There is no five thousand pound restriction?

A. No, there is no weight restriction there.

Q. Now, in order to clarify the record I am going to introduce some situations here on behalf of the Chamber of Commerce of Iowa City, one of the intervenors represented by me. What would be the time of movement on rail billing from Minneapolis to Iowa City via the Rock Island Motor Transit Company?

A. The movement from Minneapolis to Iowa City by the Rock Island Motor Transit Company, it would be picked up at the consignor's place of business today. It would be out of Minneapolis tonight, would be in Des Moines in the morning, would be worked here in Des Moines, and would be delivered to Iowa City the second morning.

Q. Is that on rail billing?

A. That is on truck billing.

Q. On truck billing you have second morning delivery from Minneapolis to Iowa City?

A. Yes, sir.

Q. Were you present during the hearing when it was testified there is a considerable amount of traffic moving from Minneapolis to Iowa City?

Mr. Fowler: That is objected to as assuming a fact not established in this record.

[fol. 1968] Mr. Nolan: You were not here during that testimony.

Exam. Carpenter: Wait a moment until we get this straightened out.

(Discussion off the record.)

Exam. Carpenter: The objection sustained.

Mr. Nolan: That there isn't a volume of traffic moving from Minneapolis to Iowa City?

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Nolan:

Q. I will ask if you were present, Mr. Peterson, during the time that Mr. Wagner Miller of Iowa City, and Mr. Slager of the Slager Hardware Company, testified that

they had a regular volume of traffic from Minneapolis to Iowa City? Were you present during that testimony?

Mr. Fowler: Is that your question, "Were you present during that testimony"?

Mr. Nolan: Yes.

A. Yes.

Mr. Fowler: Now, just a moment. All right, go ahead. Why don't you ask him what the difference is, and the time it takes by rail?

By Mr. Nolan:

Q. Now, you have told us on a truck billed shipment from Minneapolis to Iowa City it is second morning delivery?

A. Yes.

[fol. 1969] Q. What is the physical handling of a shipment from Minneapolis to Iowa City where it is on rail billing and handled all by motor truck? Now, give us the physical handling of that shipment, who picks it up, how it is worked, handled and transported.

A. To the best of my ability to tell you, the transfer company would pick up that shipment today.

Q. Let me interpose.

A. At Minneapolis.

Q. What do you mean by the "transfer company"?

A. The transfer company that picks up the freight for the railroad.

Q. An independent transfer company?

A. An independent transfer company.

Q. Not picked up by the Rock Island Motor Transit Company?

A. Not in the initial, the transfer company would take that shipment to their dock today, Monday. They would assemble those shipments at the railroad freight house, and take those shipments to the Rock Island Railroad in Minneapolis tomorrow. Tomorrow that shipment would move in the shuttle service from Minneapolis to St. Paul. If it was delivered before dinner, before noon, it would probably get in in time to get out, to get in the cars at St. Paul

the second day. If it was delivered in the afternoon it probably wouldn't, so it will be at least forty-eight hours getting out of the Twin Cities. Then it would move in a boxcar from the Twin Cities to Des Moines, and it would [fol. 1970] lose one full day at Des Moines.

Q. Why?

A. Because it would get into the East Des Moines yards and it wouldn't be set to the freight house, if it got into Des Moines in time to get on the midnight switch, it would be set; if it didn't get in in time for the midnight switch, it would lose one full twenty-four hours, which in ninety-nine per cent of the cases it does from St. Paul. So you actually have, it would be worked at the freight house and turned over to us the following day, and you would have fourth or fifth morning service from Minneapolis to Iowa City on rail billing using the boxcars.

Q. All right. Now, assuming that shipment would move entirely from Minneapolis to Iowa City by motor truck but on freight billing, what would be the physical operations in that respect?

A. The only difference would be that in place of being put in a boxcar at St. Paul it would be put in a truck at St. Paul, and you would probably save one day in Des Moines in the handling. That is your only difference.

Q. And that would be fourth morning?

A. About fourth morning delivery to Iowa City out of Minneapolis.

Q. All right. Now, going to Omaha, Mr. Heinecamp was asked if rail billed freight out of Omaha to points such as Atlantic wouldn't be just as expeditious as motor truck billed freight out of Omaha when all handled by a truck.

[fol. 1971] Mr. Fowler: Just a moment. I am going to object to that. It assumes testimony not in the record.

Exam. Carpenter: Read the question.

(Question read.)

By Mr. Nolan:

Q. What is the fact in that respect?

Exam. Carpenter: I don't believe that is exactly what was asked him if my recollection is correct.

Mr. Nolan: I made a particular note of that.
Exam. Carpenter: So I will sustain the objection.

By Mr. Nolan:

Q. I will put it this way. Mr. Peterson, will a shipment, a less than carload shipment moving from Omaha to Atlantic, Iowa, on rail billed freight when handled by a truck move as expeditiously as a similar shipment on motor truck billing, handled by the same truck on the Rock Island Motor Line?

A. In some instances it would. In the bulk of the instances it would not.

Q. And why wouldn't it?

A. In some instances if they got that freight over to the Rock Island freight depot in time for them to check it and bill it and get it over to us before five o'clock that evening, it would get the same service, but, unfortunately, the railroad has a habit of working slowly, and they do not get that freight over to us in all instances the same day it is brought in to them, and consequently it loses twenty-four hours at Omaha. When it gets to Atlantic the delay is only in waiting for them to get their expense bills. They ex- [fol. 1972] pense these at the points of destination and there is some delay there, but that generally is not over an hour or two or three, but in so many instances there is a twenty-four hour delay at the point of origin in getting that freight through the railroad freight house and getting it over to us.

Q. Now, do I understand all rail billed freight, whether it is going by boxcar or motor truck, is all billed and checked by the railroad employees, is that right?

A. That is correct.

Q. And then it is turned over to the railroad employees at the freight depot, the rail depot, and they do the checking and billing, is that correct?

A. That is correct.

Q. And then it is turned back over to your company if you are going to handle it by truck to destination?

A. That is correct.

Q. Then, when taking that same hypothetical situation at Atlantic, that freight is then delivered to the rail depot to the rail agent, or his employees at Atlantic, for checking and expensing?

A. Yes.

Q. What do you mean by expensing a shipment?

A. Well, the railroad has the forms which they use, and they make out a bill of lading that follows the freight. That [fol. 1973] bill of lading doesn't have any revenue accounting on it, as I understand it. If it does, they do not deliver on that. They make out what they call an expense bill, and deliver the merchandise on and get their receipts on.

By Exam. Carpenter:

Q. Otherwise known as a freight bill.

A. Otherwise known as a freight bill. They call it an expense bill.

By Mr. Nolan:

Q. Now, just one more situation with respect to a shipment moving from Chicago to Iowa City; one on rail billing but by motor truck from Chicago to Iowa City, and the other on motor truck billing, moving by truck, from Chicago to Iowa City. What is the difference in those two shipments, and tell us why.

A. One on rail billing and one on truck billing?

Q. Yes, but moving all of the way by truck.

A. If it is a rail billed truck, a rail billed freight movement, it would be picked up by one of the four hundred cartage companies in Chicago——

Q. Just let me interrupt there. The Rock Island Transit doesn't do any picking up in Chicago for the Rock Island Railroad?

A. We do not, and we never want to. That is picked up by one of the four hundred cartage companies in Chicago, and, as is the practice by cartage companies in Chicago, they take that to their terminal today and tomorrow they are working it and assembling it, and bring it to the [fol. 1794] railroad freight house on the second day. Then that will go to the Taylor Street freight house at Chicago on the Rock Island. Then that will move from the Taylor Street freight house to the Wells Street freight house, where we live, where we operate, either in a pickup truck or shuttle truck, but in our trucks, and if it is down there

in the morning and we get it before five o'clock, it will go out to Iowa City that night and be in Iowa City the next morning. The next morning it will be delivered to the Rock Island Railroad freight house. They will check it and move it across the imaginary line to the motor subsidiary, and they will deliver it. Now, the only difference if it is on Motor Transit bill of lading is if we pick it up today, at least ninety per cent of our freight moves out every night as an average out of Chicago, and it will be, it won't have any further delay at Chicago. It will move direct to Iowa City and be delivered the following morning to the consignee.

Q. Now, then, as I understand you, a shipment picked up on rail billing in Chicago today, would be picked up by one of the four hundred independent cartage companies, is that right?

A. That is correct.

Q. And, assuming that shipment is moving from some of the large wholesale houses in Chicago, what is the fact as to whether or not that one cartage company may not pick up shipments for all of the various railroads coming into Chicago?

A. They generally do.

[fol. 1975] Q. So that shipment is picked up today and taken then to the cartage company's warehouse tonight, is that right?

A. That is right.

Q. And it is worked generally in the cartage company's warehouse tomorrow, is that correct?

A. Either that first afternoon or the second morning.

Q. And, after it is worked and the Rock Island freight set off in one place, the Illinois Central freight in another, and the New York Central in another, it is delivered the third day, is that correct?

A. It is generally delivered the second day.

Q. The second day.

A. You lose twenty-four hours on any pick-up and delivery made by any transfer company in Chicago, and there is going to be times when it is forty-eight and seventy-two hours, but the general rule is twenty-four hours definite loss.

Q. Is it fair to say a shipment moving from Chicago to Iowa City on Motor Transit billing will arrive in Iowa City the next day, whereas if it moves on rail billing it will arrive on the third or fourth day after it is picked up originally, is that right?

A. That is correct.

Q. Now, Mr. Peterson, assuming that the same shipment, instead of moving either on, by Motor Transit billing or rail billing by Motor Transit truck, moves from Chicago [fol. 1976] part way by rail and the rest of the way by motor truck to Iowa City on rail billing, what would be the physical handling of that?

A. Well, your first two steps is the same, picked up by the transfer company, moved to the transfer company's dock, and there worked, and the second day taken over to the Rock Island Railroad freight house, which is the Taylor Street freight house, and if it got there early enough that day, it would get into the shuttle service which operates from Taylor Street to Burr Oak, which is the assembling yards of the Rock Island Railroad freight for all of the Chicago industrial and all interline traffic. There it would have to be put in a boxcar that had been moved in from the Blue Island yards, which is adjacent to Burr Oak. It would then be worked there on the third day and get out of there the third night for the fourth day's movement to Silvis. With luck it might get through the Silvis yards that night, but probably wouldn't, with luck it would get through the Silvis yards that night. It would probably be set in Iowa City on the fifth day. That is about the way it would work out. Be set and unloaded at Iowa City on the fifty day, and you would lose an extra day by going through the Burr Oak freight house, which is the assembling plant for the Chicago and suburban area.

Q. When you said the first two steps are the same on a rail billed shipment, part by rail and part by truck, or all the way through by rail, you meant, did you not, the first [fol. 1977] two steps taken by the cartage company warehouse before delivery to the rail?

A. That is right.

Q. It is the same as rail billed freight handled by truck and not on the Motor Transit freight?

A. That is correct.

Q. Now, do the same delays occur in all rail billed freight whether moving by rail by rail boxcar or by motor truck occur in the other centers of, shipping centers such as Kansas City, Des Moines, the Tri-Cities?

A. Not quite so severe. You have one step in Kansas City and Des Moines. You have one step in Chicago, which is the movement from the Taylor Street to Burr Oak, which you do not have at any other point on the Rock Island System except the movement between Minneapolis and St. Paul. You have a direct make-up at Kansas City and Des Moines which you do not have at Chicago.

Q. Now, let's take a shipment moving under your present permanent authority from Chicago, Illinois, to say Adair, Iowa. Now, as I understand it, your present authority there was to move by rail to Des Moines, be picked up at Des Moines by motor truck and taken to Adair?

A. Yes.

Q. It could not move through, even on rail billing, on motor truck transportation?

[fol. 1978] A. It could not.

Q. On account of your key point restriction at the Tri-Cities and Des Moines. Now, first taking your motor truck billing and authority, under the authority you had before there was any limitations on your authority, what would be the time from Chicago to Adair, Iowa, on a shipment?

A. It would be picked up in Chicago today, be out of Chicago tonight, be in Des Moines in the morning, would be unloaded, checked and put on the peddler truck leaving Des Moines early the following *moring*, and would get to Adair, would be delivered there around nine o'clock the second morning out of Chicago on truck billing. If that same shipment moved on rail billing, it would be picked up in Chicago by one of the four hundred cartage companies today, taken to his transfer house today and delivered to the Rock Island tomorrow. It would then be worked at the Rock Island freight house, put in the shuttle truck, and would be worked at the Burr Oak yard on the third day, getting out of Burr Oak some time the third night or the following morning. Would go to the Silvis

yards and if it got through the Silvis yards, it would be in Des Moines on the fourth morning. In Des Moines it would be worked here at Des Moines. If it got through the East Des Moines yards on the fourth morning, it would be worked here on the fourth day and get out and be delivered on the fifth day to Adair.

Q. Adair, yes.

[fol. 1979] A. With perfect luck it would be the 5th day. The chances are it would be the sixth or seventh.

Q. Now, in regard to rail billed freight, what is the source of most of that rail billed freight moving out of the Chicago area? Is that freight originated from the eastern seaboard and in the southeastern territory?

A. The Chicago freight origin that the Rock Island Railroad receives at Chicago is very predominantly freight coming from Rochester, New York, Maine, the southeast, Florida, the Carolinas. It is assembled all over the country by the other railroads. You can very easily appreciate the railroad is not going to get much Chicago business because it takes three or four days to get it out here, while trucks bring it out overnight, so the bulk of the freight moving from the Chicago gateway is coming from all over.

Q. Very little of the truck billed freight handled out of Chicago by the Rock Island Motor Transit Company originates at Chicago proper, is that right?

A. Not the truck billed freight.

Q. The rail billed freight?

A. Very little originates in Chicago.

Q. It is all interlined from some other railroad?

A. The large proportion is interlined from some other railroad.

Q. Now, a couple of other matters here. I will ask you whether or not the number of employees presently engaged by the—strike that. State whether or not the number [fol. 1980] of employees which were engaged by the Rock Island Motor Transit Company at the time of the imposition of the limitation on your operations was greater, or substantially the same, or less than the number of employees that were taken over by the Rock Island Motor Transit Company from the White Line Motor Freight Company in regard to this operation of the White Line Motor Freight Company.

A. You mean in the area of the White Line Motor?

Q. Yes.

A. Oh, there is not a great many more employees today on the actual White Line operation than there was at the time we took it over. The most of the employees we have been adding here are the result of other expansions, other than the White Line operation.

Q. And, as I understand it, when the Rock Island Transit took over the White Line operation, they took over the employees?

A. Yes, we took over all of the employees.

Q. And state whether or not you still have on the payroll of the Rock Island Transit many of those employees?

A. Oh, yes, we have a lot of them.

Q. And do many of them hold positions of, so-called executive positions, like administrative positions?

A. Yes, they do. We took over a lot of the old drivers, there were good ones, from the White Line days.

Q. Is it fair to say many of those drivers are terminal agents, and managers?

[fol. 1981] A. Most of them are still on driving jobs. They like it.

Q. Many are terminal agents?

A. Yes. Some of them are foremen down here.

Q. Now, there is one other question. What would you say was the percentage of tonnage that rail billed freight makes up in this White Line territory?

A. What percentage of the total tonnage is rail billed freight?

Q. Yes.

A. I thought I had the figures here. My figures are system-wide, the percentage. Now, just in this particular area, I would have to guess.

Q. Could you give us your best judgment on that?

A. Oh, I would say it would be somewhere between, somewhere between thirty and forty per cent of the traffic is rail billed freight.

Q. Was that prior to the limitations or since the limitations?

A. Well, the rail billed freight that we have handled has dropped since this limitation went into effect.

Q. Would that thirty or forty per cent be now, the present time, or would Mr. Cole have those figures?

A. Mr. Cole, I believe, could give you those figures.

By Mr. Howland:

Q. Mr. Peterson, you have referred to a situation that exists up at Chicago, and you say there is some four hundred odd cartage or drayage firms that have pick-up and delivery contracts with the railroad in the Chicago commercial area?

[fol. 1982] A. That is correct.

Q. Now, what is the situation up there because of the congestion, what is the practice with respect to certain of the, in fact, the majority of the shippers of freight limiting the cartage or drayage concerns with which they will do business?

A. Well, in the City of Chicago you have so many of these big industries that were built long before trucks were really in the picture, and their truck facilities is very restricted, very limited. They may have a lot of space for boxcar movement, but they don't have very much space for trucks; so, consequently, they have one cartage company doing all of their work for them, pick up all of their freight at their place, and, of course, to the various freight houses and truck lines; and also pick up their freight from these various truck lines in some cases and the rail lines, and bring it to them. They do not have the facilities to do it correctly, so consequently you have so many cartage companies and so many of them will only work for one particular company.

Q. In other words, the shippers, because of the physical limitations, limit the cartage companies that they will have perform their pick-up and delivery service for them?

A. That is correct.

Q. And is that a factor both in the pick-up and delivery service of rail freight as well as motor billed freight?

[fol. 1983] A. Yes, that is a factor in both of them.

(Discussion off the record.)

Exam. Carpenter: Now, on the record.

By Mr. Howland:

Q. Mr. Peterson, now, as I understand it, in this territory of the White Line and Frederickson routes, the compensation which the Rock Island Motor Transit Company receives from the Rock Island Railroad for performing line-haul service in the transportation of rail billed shipments is fifty-five cents per one hundred pounds?

A. That is correct.

Q. And in the cases in which, outside of this territory, generally where the Rock Island Motor Transit Company is operating with the authority limited to handling rail billed freight, you say that you are paid on a mileage basis?

A. Yes, sir.

Q. And what is the current figure per truck mile?

A. Thirty-one cents.

Q. Those have been the current rates for approximately how long?

A. Since the first of last year I believe it was.

Q. Now, of course, on any shipments that you handle on rail billed freight, you incur no expense for soliciting the freight in the first instance?

A. No.

Q. Do you have to bill that freight, or do you handle that entirely on rail billing?

[fol. 1984] A. Handle it entirely on the rail bill, and they do the pick-up and delivery. All we do is handle it, station to station. If we pick-up and deliver it, they pay us extra for that.

Q. What is the situation with respect to any claims for loss or damage to rail billed freight while handled on the trucks?

A. We pay the railroad for all damage that occurs during the transportation on our trucks.

Q. You don't participate in anything that has occurred prior, while it is in the hands of the railroad?

A. No.

Q. Counsel was asking you early in his cross-examination about an unbalanced movement of traffic, and I am not sure that I understood your answer. When you were talking about the unbalanced movement of traffic, how does that unbalance come about? By reason of the inability to

handle railroad freight, railroad billed freight out of Des Moines?

Mr. Fowler: I am going to object to that as repetition. Not proper redirect, and could just as well be answered in the morning.

Exam. Carpenter: The objection is overruled.

A. Well, if I understand your question correctly, that is brought about by this restriction. That is to state we can not handle any of the rail billed freight eastbound. We can not handle any shipments over five thousand pounds. Consequently we can not get any truckload business eastbound. We can not even get any volume shipments.

[fol. 1985] Q. Less than truckload quantities?

A. Less than truckload quantities to help balance the operation.

Q. Just one further question, Mr. Peterson. If the White Line order that you refer to, originally dated in 1949, stands up, as I understand it, the Rock Island Motor Transit Company in this territory will be confined to a peddler service on rail billed freight between Davenport and Altoona, Iowa, between Des Moines on east bound L. C. L. freight and Walcott, Iowa, between Des Moines and Council Bluffs, and between Omaha and West Des Moines?

A. That is correct.

Mr. Fowler: That is objected to as it is not a correct statement of the facts.

A. That is a correct statement of the facts.

Exam. Carpenter: The objection is overruled.

Mr. Howland: That is all I think I have tonight.

Exam. Carpenter: The hearing is adjourned until 9:30 tomorrow morning.

(At 5:10 p. m., March 31, 1952, hearing adjourned to 9:30 a. m., April 1, 1952.)

[fol. 1986] TRANSCRIPT OF PROCEEDINGS—April 1, 1952

Exam. Carpenter: You may proceed whenever you are ready.

Mr. Howland: I think we are ready for Mr. Fowler.

Mr. Fowler: Go ahead. I want to finish it up.

Mr. Howland: There are just a few things I want to ask Mr. Peterson to sort of clear up.

W. F. PETERSON resumed his testimony as follows:

Redirect examination.

By Mr. Howland:

Q. Mr. Peterson, the Rock Island Motor Transit Company performs interline service as well as originating service on traffic which it originates, does it not?

A. That it does, yes.

Q. And is that at all points of interchange with connecting carriers?

A. Yes.

Q. Now, you have that pick-up and delivery service at all points on your Rock Island Transit where you have motor carrier authority?

A. Yes.

Q. That is subject to the existing tariffs, the rate, and the minimum with respect to which the pick-up and delivery [fol. 1987] service should be performed?

A. Yes.

Q. And you have been, and are, subject to the weight limitations in handling all commodities that are tendered to you for transportation?

A. Yes.

Q. Now, does this proposal, the removal of these restrictions involve any substantial increase in the quantity of vehicles moving over the highways?

A. Not any more than it formerly did.

Q. And can you in many instances handle this increased traffic on the trucks that you are now running if the restriction is removed?

A. We always did.

Q. And that would be true in the future except for extremely large shipments or truckload quantities?

A. It would be true in all cases.

Q. Now, you have these units of equipment that you testified to yesterday, and they are available to perform the service that is covered by this application?

A. Yes, that is correct.

Mr. Howland: I am not sure that the record shows exactly the intrastate authority that the Rock Island Motor Transit Company has at the present time, and I would like to be sure.

Mr. Fowler: I do know that is objected to on the grounds [fol. 1988] it is immaterial.

Exam. Carpenter: The objection overruled. I think it is in the record, however.

Mr. Howland: I want to be certain it is covered.

By Mr. Howland:

Q. The Rock Island Motor Transit Company has intrastate authority on this route between Davenport and Des Moines without restriction, is that correct?

A. Intrastate authority from Davenport to Des Moines without exception to every point on the Rock Island Railroad, yes.

Q. And to every point that is covered, that is like Coralville?

A. Yes.

Q. Malcom, and those points?

A. Yes.

Q. Malcom, of course, is on the Rock Island Railroad, and Coralville is adjacent, but the spur into Coralville has been disconnected, as I understand?

A. The railroad is less than a half a mile from Coralville.

Exam. Carpenter: Do you have an exception out of Des Moines?

Mr. Howland: Yes. I will cover that next.

By Mr. Howland:

Q. West out of Des Moines you have some exceptions on your intrastate authority, Mr. Peterson?

A. We do not have intrastate authority to the three or four little towns between Dexter and Des Moines.

Q. Stuart?

A. We are restricted as to Dexter, Stuart and Menlo as far as Des Moines proper is concerned, but all other intra-
[fol. 1989] state points is covered to those three particular towns. All other towns on the railroad between Omaha and Des Moines are covered with intrastate authority without exception.

Q. And that is true also to Lewis and to Griswold?

A. Yes, sir.

Q. Which were formerly stations on the railroad?

A. Yes.

Q. That is true as to Treynor, is it not?

A. Yes.

Q. Now, on the Audubon branch do you have intrastate authority to serve all points between Atlantic and Audubon?

A. Yes.

Q. And on the Frederickson routes which involve Marne, Walnut, Avoca, Harlan, Corley, Shelby, Minden, Underwood and Weston, you have intrastate authority into that territory?

A. Yes.

Q. Mr. Peterson, has the Rock Island Motor Transit Company recently received any communication during the pendency of this hearing from the operator of the Roberts Transfer?

A. Yes.

Q. I will, I request at this time——

Mr. Fowler: Why don't you just read it into the record?

Mr. Howland: O. K.

By Mr. Howland:

Q. Mr. Peterson, this letter bears a "Received Stamp" R. I. M. T., from your office, March 22, 1952. It is ad-
[fol. 1990] dressed to Mr. Jenkins, Rock Island Motor Transit, 919 Walnut Street, Des Moines, Iowa. Dear Sir: And reads as follows:

"Owing to some labor difficulties and the increased labor costs, it has become necessary to rearrange our operations, and, in doing so, it will be necessary for us to discontinue the service we are rendering your line from Des Moines to Omaha, Nebraska. This will be effective March 28, 1952. Roberts Transfer. (Signed) A. W. Liston." And the letterhead indicates A. W. Liston is the owner of the Roberts Transfer. Is Mr. Jenkins the Superintendent of Operations of the Rock Island Motor Transit Company?

A. Yes.

Q. And this letter was received on or about the date it bears?

A. Yes.

Q. Now, has there been some discussion about postponing this change that Mr. Liston set out would be effective March 28, 1952?

A. He was in here to see me last week, at which time I got him to postpone the cut off until after this hearing was over, so I could go into it with him and talk it over. He can not, he claims, afford to handle even volume shipments even on a distance between Des Moines and Omaha. He claims if he has to pay the Union scale, he can not afford to handle them. He definitely told me he is going to discontinue, and he even goes so far as to say he is planning on abandoning his operation between Des Moines [fol. 1991] and Audubon because he just can not afford to do the peddling, so he has been handling our volume shipments coming up from Kansas City and coming down from Minneapolis over five thousand pounds. He has been taking and hauling those to Omaha because we can't haul over five thousand pounds west, and he has been hauling some assembled shipments from the east, but he says he can not make any money on the interline traffic, and wants to abandon. That is just exactly the position. He called yesterday and he wants to come in today. I didn't talk to him. He talked to my Secretary. He wants to come in today and make arrangements for the abandonment of the operation.

Mr. Howland: Well, I think that is all I have.

Exam. Carpenter: Cross-examine.

Recross-examination.

By Mr. Fowler:

Q. Can you give me an estimate of the volume of your interline traffic in your operation, Chicago to Omaha, in comparison to the total?

A. Do you mean from Chicago proper to Omaha proper?

Q. Along this route, take this area from Chicago, Tri-Cities, Des Moines and Omaha, with respect to the total traffic moving, what per cent would you say is received from other carriers through interline?

A. Well, at Chicago, as I recal', on our interline traffic, was approximately thirty per cent for the entire territory, but it sometimes run up as high as forty per cent. How-
[fol. 1992] ever, I think thirty per cent would be a better average, but that is the highest point for interline traffic, is Chicago.

Q. What would be your guess it was at Davenport?

A. Oh, I would say at Davenport, run down to approximately ten per cent, would be my guess, probably less than that.

Q. And Des Moines?

A. And what?

Q. And Des Moines?

A. I couldn't give you even an intelligent estimate at Des Moines.

Q. What about Omaha, do you want to make a guess on that?

A. Omaha would be less than any of them. I wouldn't even, I don't think it is even, I don't think our interline at Omaha would be five per cent.

Q. And Kansas City, is it heavy at Kansas City?

A. Kansas City would be heavier than Omaha, or any other point except Des Moines and Chicago.

Q. Would Des Moines run as high as twenty-five per cent on interstate commerce?

A. I don't believe so.

Q. And is that a fair guess? You don't have any idea?

A. I don't have any. I couldn't even give you an intelligent guess on that interline.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

[fol. 1993] Mr. Howland: Mr. Millett, will you come forward, please?

FRED J. MILLETT was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Your name is Fred J. Millett, and that is spelled M-i-l-l-e-t-t?

A. That is right.

Q. You live in Des Moines, and your position with the Rock Island Motor Transit Company is what?

A. Assistant to the General Freight Agent.

Q. And you have been continuously employed by both the Rock Island Motor Transit Company and the White Line Motor Freight Company for about how many years?

A. Sixteen years.

Mr. Howland: At this time I request that the document consisting of eight sheets, nine sheets, be marked for identification as Exhibit 24.

Exam. Carpenter: It may be so marked.

(The document referred to was marked as "Applicant's Exhibit No. 24, Witness Millett," for identification.)

By Mr. Howland:

Q. Mr. Millett, that is a copy of an affidavit that was made by you and filed with the original temporary authority application in this case last summer, it is not?

A. That is right.

[fol. 1994] Q. And are all of the facts and statements set forth there true?

A. They are. The bills are still on hand in our general office.

Q. Now, you were here when Mr. Cole testified with reference to, well, first——

OFFER IN EVIDENCE

Mr. Howland: I will offer and introduce at this time the document marked for identification as Exhibit 24 in lieu of having the witness testify in detail as to the facts therein set forth, and, under the concession made by counsel to shorten the hearing, that the exhibit might be offered in evidence subject to objections as to materiality and relevancy.

Mr. Fowler: I am willing to waive the verification of the facts set out in Exhibit 24. I object to it only on the grounds of immateriality.

Exam. Carpenter: The objection is overruled, and the document is received in evidence as Exhibit No. 24.

(Applicant's Exhibit No. 24, Witness Millett, was received in evidence.)

By Mr. Howland:

Q. Mr. Millett, Exhibit No. 16 is a tabulation and summary of the interstate shipments received by the Rock Island Motor Transit Company from connecting line carriers at Chicago, Illinois, Davenport, Cedar Rapids, Iowa, Des Moines, Iowa, and Omaha, Nebraska, with destinations at points covered by the application during the months of November and December, 1950 and 1951. You are familiar with that exhibit in a general way, are you not?

[fol. 1995] A. I am.

Q. And I notice that according to this exhibit, which relates only to shipments less than five thousand pounds, that in the two months of 1950 there were 2140 interline shipments received at Chicago, and only 1492 received in November and December, 1951, with a drop in tonnage of 1,094,920 pounds to 662,186 pounds; whereas at Des Moines there was a drop from 456 shipments to 182 shipments in the comparable period of 1951. Have you observed in connection with the traffic of the Rock Island Motor Transit Company any continued, or any change in

the traffic from interline carriers between January 1st and the present day?

A. At Chicago I don't believe there has been much of an increase. At Des Moines, formerly some of that traffic was no doubt given to our competitors, and since January it has started coming back again.

Q. Do you have any definite figures on that?

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: Back on the record.

A. In November, 1950, at Des Moines we received 456 interline shipments, 134,593.

By Mr. Howland:

Q. That is November and December, 1950?

A. That is right, November and December, 1950. In November and December, 1951, there was 282 shipments, [fol. 1996] 45,286. During that period the biggest reduction was from Watson Bros., in 1950 we received 167 shipments, and in 1951, 8. In 1950 we received 61 shipments from Merchants, and none in the period of 1951. From Keeshin we received 12 shipments in 1950 and none in 1951. From the Des Moines Trans. we received 22 in 1950 and in 1951, 11. From Bruce we received 83 in 1950 and 18 in 1951. From Bos Freight Lines we received 17 in 1950 and 43 in 1951. That was the only increase.

Q. Now, you have, since January 1, 1952, there has been some increase in shipments received from certain of these interline carriers?

A. That is right.

Q. Over the months of November and December, 1951?

A. That is right.

Q. And about what has that represented as you have observed it?

A. Well, as near as I can tell from the bills that we have, the first two months of this year, the shipments no doubt they were given to other carriers for these peddle points. They have either embargoed them or told them

they didn't want them, and, naturally they had to give them back to us.

Mr. Fowler: Just a minute. What was the question and the answer?

Exam. Carpenter: Read the question and the answer.

(Question and Answer read.)

Mr. Fowler: I move to strike the answer as not re-
[fol. 1997] sponsive, calling for hearsay, and calling for an incompetent conclusion.

Mr. Howland: That part, I will agree that part with respect to "They either didn't want them or embargoed them so they had to give them back to us", you can strike that.

Exam. Carpenter: The portion may be stricken.

By Mr. Howland:

Q. The question, Mr. Millett, was with respect to, about the number of shipments that have been handled in interchange since the first of January compared with that period immediately before January 1st that was covered in the exhibit. That is, can you tell us anything about the number of those shipments that can be coming back since the first of January, 1952?

A. I haven't had a chance to run the complete totals. I take these from the Auditor of our bills, and the only thing we can do is count the shipments that were interlined from our interline records.

Q. You don't have the number, then, but you do know there are certain of the carriers, there has been an increase in interline shipments?

A. That is right.

Q. Back to the Rock Island Motor Transit Company. What principal carriers have you observed that has been true with respect to?

A. I believe Bruce has been giving us a few more shipments, and Watson, and some Brady.

[fol. 1998] Q. What was the last?

Exam. Carpenter: Bruce, Watson and Brady.

By Mr. Howland:

Q. And how about the Merchants Motor Freight?

A. I haven't observed too much of Merchants.

Q. Mr. Millett, are there in the Tri-City area, in Des Moines and Omaha plants of various types and kinds that are engaged in the production of Government materials in connection with the Defense Program?

A. Yes, there is, and Newton, Iowa, too.

Q. And Newton, Iowa. Does the Rock Island Motor Transit Company serve the Rock Island Arsenal at Moline, Illinois?

A. They do.

Q. I believe that Arsenal is at Rock Island, Illinois.

A. At Rock Island, Illinois.

Q. Are there other plants in the Tri-City area, both on the Iowa and Illinois side that are engaged in the construction of military orders and producing military goods?

A. There are several in Davenport. I believe one that has a big Navy contract, that is in Bettendorf, or a little bit north of Davenport, towards Clinton. Of course, in Rock Island, Moline and East Moline there are several large contracts. There is a large contract at Newton. I believe there is three concerns in Newton that are on Defense contracts now. At Des Moines there are several large ones and several small ones. At Omaha there is several, one large one, I think, and several small ones, [fol. 1999] Defense contracts.

Q. And during the period of World War 2, did the Rock Island Motor Transit Company handle the movement of Defense materials and finished goods to and from this general area?

A. Yes, they did.

Q. And was that a substantial volume?

A. That was a very large volume.

Q. And, generally speaking, do those movements of Defense materials and war orders move in quantities in excess of five thousand pounds?

A. They do, and also on a Government bill of lading.

Mr. Howland: This is an exhibit to the application.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Howland: At this time we request that the map of the State of Iowa bearing certain legend be marked for identification as Exhibit 25.

Exam. Carpenter: It may be so marked.

(The map referred to was marked as "Applicant's Exhibit No. 25, Witness Millett," for identification.)

By Mr. Howland:

Q. Mr. Millett, did you have anything to do with making up the map now marked for identification as Exhibit 25?

A. I did.

Q. And that shows in general the lines of the Rock Island [fol. 2000] Motor Transit Company in red?

A. That is right.

Q. Across the State of Iowa, and it shows the routes of certain connecting carriers in other colors?

A. That is right.

Q. And it shows the principal points of interchange within the State of Iowa between the Rock Island Motor Transit Company and the connecting lines?

A. That is right.

OFFER IN EVIDENCE

Mr. Howland: We offer and introduce in evidence Exhibit 25.

Exam. Carpenter: The document identified as Exhibit 25 is received in evidence.

(Applicant's Exhibit No. 25, Witness Millett, was received in evidence.)

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Mr. Millett, you handle matters of divisions of interline rates with connecting lines for the Motor Transit Company, and have for many years?

A. I have.

Q. What is the usual basis on interline divisions between connecting line carriers in this territory?

A. In this territory and practically throughout our entire system, with maybe a very few exceptions, it is all based on what we call the first class prorate. In other words, a [fol. 2001] shipment coming from Cleveland to Chicago, we will say, the first class rate would be prorated as the basis of 1740, which I believe was $1.03 to Chicago and $1.24 from Chicago to Des Moines, and adding those two together would produce $2.27, of which we will get 124/227ths.

Q. In other words, the usual division is on the mileage prorate basis on the first class rate?

A. Not on a mileage prorate. It is on a first class prorate.

Q. A first class prorate, but the first class prorate involves the comparison of the two rates, so that each carrier gets its proportion?

A. That is right.

Q. Now, you were familiar with the business conducted by the White Line Motor Freight Company prior to the time it was taken over by the Rock Island Motor Transit Company, I take it?

A. Yes, sir.

Q. What was the fact as to the proportion of truckload and volume shipments handled by the White Line Motor Freight Company compared with that handled by the Rock Island Motor Transit Company after the Rock Island Motor Transit Company took over the operation up to the summer of 1951?

Mr. Fowler: I object to it as immaterial and calling for hearsay evidence, no foundation laid, purely conjectural and speculative.

Exam. Carpenter: The objection overruled.

[fol. 2002] A. While I was with the White Line we handled considerable truckload traffic. When the Rock Island took over we retained a portion of it, not all of it, and even after the Rock Island took over we still continued to handle a substantial volume of truckload traffic. I can not recall

just the per cent of the truckload over less than truckload. We have made studies of it continuously.

Q. During the White Line days, as I understand it, the proportion of truckload traffic was greater than during the period of operation by the Rock Island Motor Transit Company prior to the imposition of these restrictions?

Mr. Fowler: That is objected to as immaterial and for the reasons urged with respect to the previous question.

Exam. Carpenter: The objection overruled.

A. Will you read the question?

Exam. Carpenter: Read the question.

(Question read.)

A. Well, in the White Line days, part of it was before regulation, and after regulation I believe to a certain extent your volume traffic continued as it has continued all through, but prior to regulation it was just a question of whether you could get a few back-hauls especially that was true. After regulation when the regular rates went in, they handled considerable back-haul traffic on truckload at volume rates. Upon acquisition by the Rock Island Transit, we [fol. 2003] continued to handle a large portion of that; although some of it, I would presume, either went to other carriers or may have been extinct. In comparison to the volume we don't have, have never handled between Chicago and Des Moines the volume of truckload traffic we handled under the White Line authority.

By Exam. Carpenter:

Q. What about the rest of the White Line rights?

A. The rest of it has possibly held its own.

By Mr Howland:

Q. Well, the local service of the Rock Island Motor Transit Company has been increased over the White Line operation, has it not?

A. Considerable.

Q. So far as serving the intermediate points?

A. That is right.

Q. And that traffic, what is the fact as to whether that traffic has increased considerably over the volume handled by the White Line?

Mr. Fowler: That is objected to as immaterial.

Exam. Carpenter: The objection overruled.

A. We have handled considerable less than truckload, shipments less than ten thousand pounds, we have on the Rock Island Motor, more than we ever handled on the White Line.

Mr. Howland: Off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

[fol. 2004] Mr. Howland: At this time I request that the letter written on the letterhead of the Keeshin Motor Express Co., Inc., dated March 18, 1952, Subject "Receiving freight from connecting lines at Cedar Rapids, Iowa," be marked for identification as Exhibit 26.

Exam. Carpenter: It will be so marked.

(The letter referred to was marked as "Applicant's Exhibit No. 26, Witness Millett," for identification.)

By Mr. Howland:

Q. Now, Mr. Millett, the Keeshin Motor Express Co. is a carrier doing business at Cedar Rapids, at Des Moines, and at the Tri-Cities, is it not?

A. Yes, sir.

Q. And has the Rock Island Motor Transit Company within the last two weeks received the letter marked for identification as Exhibit 26?

A. We have.

Q. And do you know what has been done with respect to putting this embargo on interline shipments at Cedar Rapids as of Monday, March 24, 1952?

A. It applies only on interstate commerce, and they will interchange now only at the Tri-Cities or Des Moines for all points on their line in the State of Iowa.

Q. And they are not receiving any interstate shipments in interline service at Cedar Rapids, Iowa, except from the H & W Motor Express and A. W. Schmidt?
[fol. 2005] A. That is right.

OFFER IN EVIDENCE

Mr. Howland: We offer and introduce in evidence Exhibit 26.

Exam. Carpenter: Any objection?

Mr. Fowler: It is objected to as immaterial.

Exam. Carpenter: The objection overruled. The document is received in evidence as Exhibit No. 26.

(Applicant's Exhibit No. 26, Witness Millett, was received in evidence.)

A. That also covers the National Freight Lines, which is a subsidiary of Keeshin, too.

By Mr. Howland:

Q. The Keeshin Motor Express and the National Freight Lines are two affiliated carriers?

A. That is right.

Q. And has that embargo been incorporated in a tariff published by the Keeshin Motor Express?

A. That was embraced in Middlewest Tariff No. 201, MF-I.C.C. 209.

Q. That is effective when?

A. The original effective date was February 7th, and reissued on March 26th.

By Exam. Carpenter:

Q. Was it published as an embargo?

A. No, it is not an embargo. It is a routing, junction points, interchange points.

By Mr. Howland:

Q. Will you read into the record the statement as it appears in the tariff which you have with respect to the [fol. 2006] interchange at Cedar Rapids?

A. Section 3.

Mr. Fowler: Dictate into the record your interpretation of the tariff.

A. Section 3 of Middlewest Tariff 201 covers the name of the carriers, the points they will interchange, and the connecting carriers that they will interchange with, which is known as the routing section for all Middlewest Tariffs.

By Mr. Howland:

Q. And what does it say with respect to Cedar Rapids, Iowa?

A. Cedar Rapids, Iowa, the interchange point of Cedar Rapids, Iowa. The connecting line is the H & W Motor Express Company and Schmidt Transfer Company, are the only two carriers they will interchange with at Cedar Rapids.

Q. To whom do you refer when you say "They will interchange"?

A. Keeshin Motor Express Co., Inc., and their affiliated companies, including the National Freight Lines, Inc.

By Exam. Carpenter:

Q. Does that only include the interchange point of Cedar Rapids, does it not?

A. That is right.

Q. Did you not mention an interchange point of Des Moines in your testimony?

A. They will interchange with us at Des Moines and Moline.

Exam. Carpenter: That is all. Proceed.

Mr. Howland: You may cross-examine.

[fol. 2007] Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Fowler:

Q. The interchange restriction at Cedar Rapids could arise from an operating, change in operating conditions, could it not?

A. It could.

Q. As a matter of fact motor carriers designate the points at which they will receive and interchange freight, do they not?

A. Usually any place they maintain terminals they show their present interchange.

Q. Isn't it the fact many carriers, either by tariff or by arrangements with you, select the point they prefer to have interchange?

A. Not necessarily.

Q. You have such an arrangement with the H & W now, don't you?

A. We interchange with them at Des Moines, Cedar Rapids or Davenport, the three connections we have with them.

Q. You heard Mr. Peterson testify they select an interchange point that suited their operating convenience?

A. That is right.

Q. And that is true with many carriers, isn't it?

A. I don't believe it does.

Q. Well, isn't it true, or are you aware of the fact that due to a change in the operating setup of Keeshin, they prefer to interchange at Des Moines and the Tri-Cities [fol. 2008] rather than at Cedar Rapids? Are you aware of that?

A. I am.

Q. So what they have done, have said by that change in the tariff, they have said we prefer to interchange with the Rock Island Motor Transit at Des Moines and the Tri-Cities instead of Cedar Rapids, isn't that correct?

A. They have restricted it to Des Moines and Moline.

Q. You say they have or they have not?

A. They have restricted it to Des Moines and Moline.

Q. In other words, they will accept interchange traffic with you at the points of Des Moines and the Tri-Cities?

A. That is right.

Q. And they have said to you they don't want to interchange with you any more at Cedar Rapids?

A. That is right.

Q. But they will continue to interline with the H & W and this other carrier at Cedar Rapids?

A. That is right.

Q. Now, I ask you whether that isn't a general thing among the motor carrier industry, and is influenced entirely by operating conditions?

A. I wouldn't say so.

Q. All right. Now, you were talking about the interchange situation at Des Moines. The originating carrier, if a routing instruction is given to him as to the interline car-
[fol. 2009] rier, is required to deliver it to the specified carrier, is he not?

A. That is correct.

Q. And if these shipments are directed to be delivered to the Rock Island Transit by the shipper, it is the obligation of the originating carrier to turn them over to the Rock Island, isn't that true?

Q. Yes, sir. Have you been making any special drive

A. It is their obligation.

lately to obtain those routing instructions?

A. No.

Q. Have you been making any contact with shipments to obtain routing instructions within the last sixty days?

A. Yes, we are continually.

Q. You continually solicit routing instructions from shippers?

A. Sure.

Mr. Fowler: That is all I have.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Howland:

Q. Mr. Millett, is it your understanding that the originating carrier is required to follow the routing instructions on motor carrier billing and make delivery only over the route specified?

A. There is no ruling in the Motor Carrier Section of the Act that requires a carrier to deliver to the routing shown on the bill of lading.

[fol. 2010] Q. And there are instances that more or less freqently arise where the routing instructions set forth on the original billing is disregarded, isn't that true?

A. Very true.

Q. The tariff restriction at Cedar Rapids with respect to Keeshin applies to interchange at that point on interstate traffic with all carriers except the H & W and Schmidt?

A. That is right.

Q. As I understand it, it isn't confined to the Rock Island Transit?

A. No, all carriers except those two.

Q. Mr. Millett, are you familiar with the tariff provisions with respect to the handling of freight by motor carriers which is sometimes referred to as the Kipp's Tariff provision, by which motor carriers may transport certain rail billed freight?

A. I am.

Q. And you have that tariff provision here?

A. I don't have the tariff here.

Q. Can you give us the substance of that tariff provision and the manner in which it operates?

A. In Kipp's Substituted Tariff, I believe it is 1-I, I am not sure of the number on that, and throughout the tariff will list the carrier, the rail carrier, the towns or territories served, and the motor carrier with which they may substitute motor carrier service for rail service.

[fol. 2011] Q. And what is the situation with respect to the motor carrier who desires to become a party to that tariff? What does he have to do?

A. He must file his power of attorney for approval with the Commission, and if it is approved, it is filed.

Q. And does he become a party to that arrangement?

A. Yes, he has to become a party to that effect.

Q. Well, what is the effect of that, how does it operate?

A. Well, the operation of that is, we will take any point or any certain railroad that would originate a shipment on rail billing, moving to, take as an example, from, the shipment originates, we will say, in South Bend, Indiana. It is moved by rail to Chicago, and from Chicago it is transferred to any of the Western Lines, and we will say it goes to Ames, Iowa, and any carrier that is a party to this, it shows it would be interchanged at Ames, or maybe any town beyond on their motor line, will substitute motor carrier service for rail carrier service into that town.

Q. Those participating in the tariff?

A. That is right. They have to become a participant.

By Exam. Carpenter:

Q. That is motor carrier service from Chicago to Ames, or any point beyond?

A. It could become any carrier.

Mr. Fowler: You didn't pay attention to what he asked.

A. You say motor carrier service?

[fol. 2012] By Exam. Carpenter:

Q. Motor carrier service from Chicago?

A. I don't know of any motor carrier service from Chicago.

Q. Where are you getting the motor carrier service from?

A. It would be like from Ames to the destination of the shipment.

Q. In other words, it is rail service from South Bend to Ames?

A. That is right.

Q. And motor carrier service from Ames to a destination beyond?

A. Yes, or it could be Des Moines, or any place.

By Mr. Howland:

Q. Now, the Merchants Motor Freight, or Des Moines Transportation, or Watson could become a party to that tariff as well as the Rock Island Motor Transit Company?

A. That is right.

Q. And so, as I understand it, if any motor carrier was participating in this tariff, it could perform the substituted service in lieu of the rail carrier, is that correct?

A. They can, and I believe, if it hasn't been changed, there was an Omaha carrier used to haul rail freight from Omaha to Chicago for the North Western Railroad, or for one of the railroads. It seems to me it was the North Western.

Q. And that shipment would move on rail billing?

A. It would move on rail billing. I am not sure but I think the line was the On-Time.

Q. Well, the Rock Island Motor Transit Company, as I understand, is a participating carrier in this Kipp's tariff [fol. 2013] that you referred to?

A. That is right.

Q. And that same arrangement could be made by other motor carriers who become parties to that tariff and who make the arrangements with the rail carriers?

A. Yes, and there are carriers in that tariff in this territory.

Q. And could you name some of them?

A. I believe Brady's substitution of the M. & St. L. is handled in that same manner, the Commercial Cartage Company, though.

Q. The Commercial Cartage Company.

A. I can't say it is Brady, but it goes under the head of Commercial Cartage.

Mr. Howland: That is all I have.

Exam. Carpenter: Cross-examine.

Recross-examination.

By Mr. Fowler:

Q. As a matter of fact the setup between the Commercial Cartage Company and the M. & St. L. is to be a contract operation, so much a mile?

A. I don't know the contract agreement.

Q. If I tell you that is what it is you won't doubt my word?

A. I wouldn't. They are a party, I am pretty sure, to the same tariff.

Q. The tariff you are talking about, is that by joint arrangement?

A. By substitution only, no joint arrangement.

[fol. 2014] Q. What is the fact, the rail rate applies on your typical shipment from South Bend to Ames?

A. That is right.

Q. And is it put on motor truck billing at Ames?

A. No.

Q. Then, is the rate a through rate or a joint rate?

A. It is a through rate.

Q. It is a joint rate in which the carriers participate?

A. There are no rates in this tariff. This is only a substituted service.

Q. I understand that. The effect of it, the participating carriers, rail and motor, would participate in the revenue.

A. Under a contract basis.

Q. On a contract basis. In other words, the railroad hires the motor carrier to handle the freight from Ames to the destination point rather than to take it there by way freight?

A. That is right.

Redirect examination.

By Mr. Howland:

Q. It is not a joint through rate?

A. The substituted tariff does not cover rates, just the substituted service. The tariff would name the rate.

By Exam. Carpenter:

Q. It is a through all rail rate?

A. It is a through all rail rate, yes.

By Mr. Nolan:

Q. Now, Mr. Millett, as I understand, the purpose of the Kipp's Tariff is to provide an exception for the motor car-[fol. 2015] rier to charge a different rate to the rail company where it is peddling and handling rail billed traffic, isn't that true. It is an exception to the motor carrier's published rate, isn't that true?

A. Well, I wouldn't say it is an exception. It is an agreement.

Q. Well, I mean it permits the motor carrier to enter into a separate transaction or agreement with the railroad company to perform substituted motor truck service?

A. That is right.

Q. And where the motor carrier and the rail carrier may enter into, as to the charges and cost of handling that service, that is between the parties?

A. That is right.

Q. The Kipp's exception permits a motor carrier to not charge his regular rates in that particular area for that particular service?

A. That is right. If he wasn't a party he would have to pay the combination of local rates.

Q. That is right. If he wasn't a party to that Kipp's Tariff, he would have to charge his local rate for the service the motor carrier performed for the railroad?

A. That is right.

Mr. Nolan: That is all.

Recross-examination.

By Mr. Fowler:

Q. That shipment moves on a rail billing throughout? [fol. 2016] Correct?

A. That is right.

Q. And the truck operator who handles the shipment at the tail end gets paid by the railroad?

A. That is right.

Q. On a contract basis?

A. On a contract or division basis, whatever they use.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

Mr. Howland: That is all, Mr. Millett.

(Witness excused.)

Exam. Carpenter: Is that all?

Mr. Howland: Well, maybe. Just a moment to confer over here.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: We will take a five minute recess.

(Short recess.)

Exam. Carpenter: You may proceed.

Mr. Howland: I think that concludes the applicant's case in chief, if the Examiner please. We will rest our case at this time.

Mr. Fowler: At this time the protestants request that this hearing be recessed for at least thirty days, at which time they will go forward with their evidence.

[fol. 2017] TRANSCRIPT OF PROCEEDINGS—
MAY 20, 1952

Exam. Carpenter: The Interstate Commerce Commission has assigned this time and place for continued hearing in Docket No. MC-29130 Sub-No. 70, Rock Island Motor Transit Company application for permanent general commodity authority, with exceptions, over designated routes as specified in the application.

Are there any additional appearances?

Mr. Huston: Walter V. Huston, 4105 Main Street, Kansas City 2, Missouri, appearing for Knaus Truck Lines, Inc., protestant. I am an attorney and registered practitioner.

* * * * * * *

[fol. 2024] ———

C. A. GRACEY was sworn and testified as follows:

Direct examination.

By Mr. Cohn:

Q. Will you state your name and place of residence?

A. C. A. Gracey, Avoca, Iowa.

Q. What is your business or occupation?

A. Vice President, Iowa-Nebraska Transportation Company, Inc.

Q. How long have you been associated with Iowa-Nebraska Transportation Company?

A. Since November, 1942.

Q. And you have been continuously associated with the company since 1942. Is that correct?

A. Yes, sir.

Q. And you have devoted your full time to business of the company?

A. Right.

Q. Are you thoroughly conversant with operations of the company?

A. Yes, sir.

Q. What are your general duties with the company?

A. Mostly assisting the president and general managing [fol. 2025] of operations.

Q. What is the business of the Iowa-Nebraska Transportation Company?

A. Transportation of general commodities and specific commodities.

Q. And are operations conducted pursuant to Certificate of Public Convenience and Necessity issued by the Interstate Commerce Commission?

A. Yes, sir.

Q. And have you caused to be made for purposes of this hearing true and correct copies of Certificate issued your company by the Commission?

A. Yes, sir.

Q. And do you have copies of that?

A. I do have.

Mr. Cohn: I would like to ask that this document consisting of three pages be identified in the record.

Exam. Carpenter: The document may be identified as Exhibit 27.

(The document referred to was marked as "Intervenor's Exhibit No. 27, Witness Gracey," for identification.)

By Mr. Cohn:

Q. I will ask you to refer to Exhibit 27, for identification, and ask whether that is a true and correct copy of Certificate of Public Convenience and Necessity No. MC-[fol. 2026] 47619 issued to your company by the Interstate Commerce Commission?

A. It is.

Q. And is that Certificate still in full force and effect, to your knowledge?

A. Yes, sir.

Q. Where is the principal office of the Iowa-Nebraska Transportation Company located at the present time?

A. Avoca, Iowa.

Q. What facilities are maintained at Avoca by your company? Do you have a terminal and office?

A. Terminal and office space. Yes.

Q. Do you also maintain terminals and offices at other points on your system?

A. Yes, sir.

Q. What are the points?

A. New York, New York, Chicago, at Des Moines and Omaha, Nebraska.

Q. Now, at those points does your company maintain full-time employees?

A. Yes, sir.

Q. Do you provide pick-up and delivery service?

A. Yes, sir.

Q. Now, in addition to the terminals and offices maintained at points you named, do you also maintain agents [fol. 2027] at points on your system?

A. Yes, sir.

Q. At what points?

A. We maintain one at Davenport, Iowa City, Cedar Rapids, Marshalltown, Sioux City, Ames, Nevada, Boone—I believe that's all.

Q. What is the nature of the agents you maintain at these latter points?

A. They are cartage companies for final delivery.

Q. Independent cartage companies at those points named?

A. Right.

Q. And do they handle pick-up and delivery at those points?

A. Right.

Q. How many motor vehicles does your company own?

A. 8 straight jobs or trucks, 22 tractors, 23 trailers.

Q. Now, in addition to the motor vehicle equipment your company owns are there other motor vehicles your company leases on a long-term lease arrangement?

A. Yes, sir.

Q. How many of those?

A. 42 complete units.

Q. 42 additional tractors and 42 additional trailers?

A. Right.

Q. Are they under long-term lease?

A. Under trip lease.

[fol. 2028] Q. Now, are the books and records of the company kept under your supervision and control?

A. At Avoca, yes, sir.

Q. Have you caused to be prepared from the books and records of your company certain financial data reflecting

the present financial status of your company and also results of recent operations of your company?

A. I have.

Q. Do you have those documents here?

A. Yes.

Mr. Cohn: I ask that this document consisting of one page, entitled "Financial Statement as of March 31, 1952," be marked for identification.

Exam. Carpenter: It may be identified as Exhibit 28.

(The document referred to was marked as "Intervenor's Exhibit No. 28, Witness Gracey," for identification.)

By Mr. Cohn:

Q. Exhibit 28 for identification was prepared by you or under your supervision, was it not?

A. Yes, sir.

Q. Does that statement correctly reflect the financial condition of Iowa-Nebraska Transportation Company as taken from the books and records of the company as of March 31, 1952?

A. It does.

Q. You have also caused to be prepared for purposes of this hearing an operating statement for the three month [fol. 2029] period ended March 31, 1952, have you not?

A. Yes, sir.

Mr. Cohn: I would like to ask that this document containing one page and entitled "Operating Statement as of March 31, 1952," be marked for identification.

Exam. Carpenter: It may be identified as Exhibt 29.

(The document referred to was marked as "Intervenor's Exhibit No. 29, Witness Gracey," for identification.)

By Mr. Cohn:

Q. And was Exhibit 29 for identification likewise prepared by you or under your supervision?

A. Yes, sir.

Q. And the source is books and records of your company?

A. Yes, sir.

Q. Does that correctly reflect the operating statement of your company for the three months' period ended March 31, 1952?

A. It does.

Q. And indicates a net operating income after deduction of normal operating expenses, $4,395.01, based on total revenue of $255,606.35. Is that correct?

A. It does.

Q. That indicates an operating ratio of approximately what?

A. Approximately 98%.

Q. You are familiar with the scope of the application which is being considered in this proceeding, are you not?

[fol. 2030] A. Yes, sir.

Q. So far as the territory involved in this application is concerned your company is presently engaged in serving a number of the communities for which authority is requested by the applicant?

A. Communities on Highway 6.

Q. You are presently serving all points located in the State of Iowa located on U. S. Highway 6?

A. Correct.

Q. And also Omaha, Nebraska?

A. Right.

Q. Your company also conducts an operation over Iowa Highways 83 and 64 between Atlantic and Omaha, serving all intermediate points, does it not?

A. Yes, sir.

Q. And also conducts an operation between Cedar Rapids and Iowa City, Iowa, over U. S. Highway 218?

A. Right.

Q. Now, Mr. Gracey, I would like to ask you to refer to the official docket of the Commission, particularly to Item 3 and exhibit attached to the application, which is a list of points to which service is sought to be per..ned by the applicant, and I will ask you to refer to the points shown in that item and state for the record only the points which you are not now presently serving that are shown on that list.

[fol. 2031] A. I am not certain where Moscow, Iowa, is located.

Mr. Fowler: It is east of Wilton Junction.

By Mr. Cohn:

Q. I will ask you to refer to the official map of the State of Iowa and locate the Town of Moscow?

A. It is located on Highway 6.

Q. Is your company presently serving all points on U. S. Highway 6?

A. On Highway 6.

Q. Will you refer to the item attached to the application and state to which points you are not now rendering service?

A. Shelby, we do not render service there; South Amana, Muscatine, Iowa, East Moline, Illinois.

Q. Is East Moline listed on that exhibit?

A. Yes, sir. Moline, Rock Island, Silvis, Audubon, Brayton, Iowa, Carson, Iowa, Exira, Iowa, Griswold, Hamlin, Lewis, Hancock and I don't know where Lorah is.

Mr. Howland: It is intermediate between Atlantic and Audubon.

A. We do not make that one to the best of my knowledge. We serve all other points other than I have named.

By Mr. Cohn:

Q. You don't serve Stockton and Walcott which are off-route points?

A. No. I think I mentioned that.

Q. And Walcott is an off-route point you do not serve.

Now, Mr. Gracey, in connection with service that your [fol. 2032] company is presently providing to the points involved in this application lying along U. S. Highway 6 and over Iowa Highways 83 and 64, is service being provided to those points under peddler service?

A. Right.

Q. Is your company also providing peddler service with respect to Cedar Rapids and Iowa City on U. S. Highway 218?

A. Yes, sir.

Q. Now, the communities that you are presently serv-

ing over these highways 6, 83, 64 and 218, are you providing both pick-up and delivery service to the communities?

A. Delivery service yes and pick-up where traffic demands it.

Q. Do you handle interline freight that is picked up and delivered at these points?

A. Yes, sir.

Q. What are the points at which you receive freight delivering it to these points on your system?

A. Chicago, Des Moines and Omaha, Nebraska.

Q. And likewise you turn over to connecting lines at the three points you have named freight that is destined to points beyond your line which is picked up in these communities?

A. Yes, sir.

Q. Now, can you advise the Commission as to the method you employ in connection with peddle runs you operate in the territory involved in this application? First Omaha. [fol. 2033] Do you have peddle runs originating in Omaha?

A. Yes, sir.

Q. Explain how you conduct that?

A. We have two methods of conducting business out of Omaha. One is direct pick-up from Omaha shippers and it is sent out the same night to towns in Iowa of Harlan, Avoca, Atlantic, Walnut, Marne and Oakland and any towns intermediate on Highway 63—83, I should say, between Avoca and Atlantic; also traffic is loaded on truck and goes on Highway 6, taken to Des Moines, which is an overnight run, and peddled back the next morning.

Q. A daily operation?

A. Yes, sir.

Q. How many trucks are regularly employed in peddle-run service?

A. Five.

By Exam. Carpenter:

Q. That is on both runs?

A. Right.

By Mr. Cohn:

Q. How many days a week is service performed?

A. Six.

Q. Now, do you also deliver to any points between Des Moines and Omaha on highway equipment?

A. Yes, sir.

Q. What would be the occasion for the use of highway equipment in serving any of the points?

[fol. 2034] A. The main service to points on Highway 6 between Omaha and Atlantic is served out of the Des Moines terminal on over-the-road equipment each and every day.

Q. Do you also operate any peddle service at Des Moines?

A. Yes, sir.

Q. Will you explain your method of operation of peddler service at Des Moines?

A. We operate three peddler runs out of Des Moines each day, one north covering Ames, Boone and Highway 30 to Jefferson, and one east to Tama and Cedar Rapids.

Q. And how many trucks are ordinarily employed in connection with that peddler service?

A. One for the north run and one for the east and a third truck, as already mentioned, goes west to Atlantic.

Q. How many days a week is that service offered?

A. Six days a week if traffic demands it and five days for sure.

Q. Where demand justifies it is offered six days a week?

A. Right.

Q. Does your company provide service to communities on Highway 6 lying west of Davenport?

A. Yes, sir.

Q. What method is employed by your company in serving those communities?

A. Out of Chicago.

Q. By highway truck?

[fol. 2035] A. Yes.

Q. How frequently is your truck operated between Chicago and those communities?

A. Whenever traffic demands.

Q. Is that both truckload and less than truckload service?

A. Yes, sir.

Q. Has the traffic demanded daily service into those communities during the current operation?

A. Yes, sir.

Q. And you are operating then a daily service into the communities west of Davenport, Iowa?

A. Yes, sir.

Mr. Cohn: If the Commission please, we have prepared a summary of the witnesses who have appeared previously in this proceeding on behalf of the applicant which we would like to have identified in the record at this time.

Mr. Howland: What is the object of this?

Mr. Cohn: We would like to present this abstract of the shipper witnesses for identification for purposes of reference by this witness in connection with his direct testimony.

Exam. Carpenter: It may be identified as Exhibit 30.

(The document referred to was marked as "Intervenor's Exhibit No. 30, Witness Gracey," for identification.)

By Mr. Cohn:

Q. Mr. Gracey, I would like to ask you to refer to Ex-
[fol. 2036] hibit 30, for identification, a listing of the shipper witnesses who appeared in support of the application in this proceeding, and ask you to state whether at the present time your company is rendering service at the points shown in the exhibit?

A. At the towns shown?

Q. Yes, sir.

A. We serve Adair, Iowa, Altoona, Iowa, Anita, Atlantic, Iowa, Casey, Iowa, Cedar Rapids, Colfax, Coralville, Council Bluffs, Davenport, Des Moines, Dexter, Durant, Grinnell, Harlan, Iowa City, Ladora, Marne, Marengo, Menlo, Minden, Mitchellville, Newton, Neola, Omaha, Nebraska, Oakland, Iowa, Stuart, Iowa, Tiffin, Underwood, Walnut, Wilton Junction.

Q. And do you recognize as you go through the list familiar names in the listing of shippers at these various points—that is shippers whom you are presently serving at these points?

A. They are consignees rather than shippers we have served.

Q. And are you presently serving a great number of these shippers that are shown on this list?

A. Yes, sir.

By Exam. Carpenter:

Q. Those are actually shippers or are they served as inbound consignees?

A. I mentioned that they were consignees.

By Mr. Cohn:

Q. That is you are making deliveries at these points to a number of consignees who are shown on this list as ship- [fol. 2037] per witnesses?

A. Right.

Q. Is that on less than truckload shipments in most cases?

A. In most cases it is less truckload shipments.

Q. Now, your company participated as intervenor in opposition to request for temporary authority filed by this applicant. Is that right?

A. Yes, sir.

Q. And in those proceedings your company presented certain data in connection with operations conducted in the territory, showing representative shipments and points of service?

A. We did, yes, sir.

Q. Have you caused to be prepared for purposes of this proceeding certain representative shipments in abstract form indicating the services that have been performed since the date of information furnished at the hearing on temporary authority?

A. Yes, sir

Q. And prepared from what source?

A. Actual delivery sheet records.

Q. And do you have the underlying delivery sheet information present for inspection by interested parties?

A. Yes, sir.

Mr. Cohn: I would like to have identified in the record at this time this exhibit consisting of seven pages.

Exam. Carpenter: It may be identified as Exhibit 31.

[fol. 2038] (The document referred to was marked as "Intervenor's Exhibit No. 31, Witness Gracey," for identification.)

By Mr. Cohn:

Q. Mr. Gracey, I will ask you to refer to the exhibit which has been identified as Exhibit 31 and ask you to identify that exhibit if you will?

A. This is an exhibit of the actual delivery receipts as contained in the exhibit.

Q Each of the Pro Numbers as listed on that exhibit shows the prefix "OM."

A. Yes, sir.

Q. What is the significance of that?

A. It means billed at Omaha terminal.

Q. All of the shipments shown on that particular exhibit were billed out of the Omaha terminal?

A. Correct.

Mr. Cohn: I would like to have this document consisting of four pages identified.

Exam. Carpenter: It may be identified Exhibit 32.

(The document referred to was marked as "Intervenor's Exhibit No. 32, Witness Gracey," for identification.)

By Mr. Cohn:

Q. Now, referring to Exhibit 32, for identification, the Pro Numbers listed there are preceded by the prefix "DM."

A. Which means billed out of the Des Moines terminal.

[fol. 2039] Q. And all of the shipments thereon listed would be billed out of the Des Moines terminal?

A. Yes, sir.

Mr. Cohn: I would like to have identified in the record this document consisting of four pages.

Exam. Carpenter: It may be identified Exhibit 33.

(The document referred to was marked as "Intervenor's Exhibit No. 33, Witness Gracey," for identification.)

By Mr. Cohn:

Q. Exhibit 33 was similarly prepared—in the same manner as Exhibits 31 and 32, for identification. Is that correct?

A. Yes, sir.

Q. And all shipments shown thereon have the prefix "CH" with respect to the Pro Numbers. Will you explain that?

A. The prefix "CH" means billed out of the Chicago terminal.

Q. Were all shipments that are shown on your Exhibits 31, 32 and 33 actually transported over your line between points you are authorized to serve under your Certificate?

A. Yes, sir.

Q. Now, a number of shipments are connecting line shipments which originated from points on other lines and that were brought to you and others were given to connecting lines for points beyond your line. Is that correct?

A. That is right.

[fol. 2040] Q. Now, are the shipments shown on the Exhibits 31; 32 and 33 all of the shipments transported during the period represented by the exhibits?

A. No, sir.

Q. They are representative of the type of shipments and points served. Correct?

A. That is correct.

Q. And I notice that each of the exhibits starts with the date "9/27/51." That is the date you started the exhibit to bring it up to date for purposes of this proceeding?

A. Yes, sir.

Q. And you carried on to about the middle of April, 1952?

A. Correct.

Q. And has your company continued to conduct operations and provide service similar to that of shipments shown in the exhibits?

A. Yes, sir.

Q. Now, in connection with Exhibit 31, for identification, the Pro Number is self-explanatory. Now, will you explain each of the other columns as shown on the exhibit? Is the date the billing date?

A: It is the billing date. Under "Origin" is the town at which we originated the shipment or in case of interline, the town from which the shipment was originated.

Q. Where not originated on your line from what point was it received?

[fol. 2041] A. In Exhibit 31 it would be Omaha, Nebraska.

Q. And "Destination" is the point in the State of Iowa to which shipment was destined?

A. Correct.

Q. And "Commodity" and "Weight" are both self-explanatory?

A. Yes, sir.

Q. In connection with Exhibit 32, for identification, the explanation you made with respect to the column "Pro No." is already a matter of record.

"Date" is the date of billing?

A Right

Q. "Origin" is either point of origin on your line or origin through connecting line source?

A. Correct

Q. And where freight was transferred to your line at which point did your company receive shipments shown on Exhibit 32?

A. Des Moines, Iowa.

Q. And points of destination are points in the State of Iowa, except where otherwise indicated by reference to another State?

A. Right

Q. And the exhibit lists both shipments that were delivered in the State of Iowa to points involved in this application or in some cases shipments originated at points involved in this application and handled on your line?

A. That is correct.

[fol. 2042] Q. With reference to Exhibit 33 we also have the case of certain shipments that originated at points which are not on your line and at what points have those shipments been transferred to your line?

A. At Chicago

Q. Now, in connection with operations which your company is presently performing in territory involved in this application, is your equipment being utilized in all cases to full capacity or do you have additional——

A. In the greater majority of cases it is used to full capacity.

Q. Are there some cases where you are not operating to full capacity at the present time?

A. Very few.

Q. In event that additional equipment should be necessary to handle any increased demands for service in the territory is your company in position to add such equipment?

A. Yes, sir.

Q. And will you do so?

A. Yes, sir

Q. Have there been any occasions to your knowledge where freight was destined to or originated at any points involved in this application which you are presently serving where you have refused or otherwise neglected to pick up the shipment?

A. No, sir. Not if we could handle the shipment.

Mr. Fowler: May we have a little recess?

[fol. 2043] Exam Carpenter: Five-minute recess.

(Short recess.)

Exam. Carpenter: Proceed.

OFFERS IN EVIDENCE

Mr. Cohn: I would like to offer in evidence at this time Exhibits 27 to 33, inclusive, which have been identified.

Exam. Carpenter: Objections?

Mr. Howland: Yes. Exhibit 27 is objected to as immaterial and irrelevant. I would like to defer objections to Exhibits 28 and 29 until I have an opportunity to cross-examine the witness.

Exhibit 30 is objected to as immaterial and irrelevant and having no bearing on any issue before the Commission, being merely a list of witnesses who have testified—whose testimony has already been heard in this proceeding, and I would like to defer objections on Exhibits 31, 32 and 33 until after cross-examination, if the Examiner please.

Mr. Nolan: Let the record show I join in objections and requests made by counsel for applicant.

Exam. Carpenter: As to Exhibits 27 and 30, objections are overruled and they will be received in evidence. The receipt of the other exhibits in evidence will be deferred until after cross-examination.

(Exhibits Nos. 27 and 30, Witness Gracey, were received in evidence.)

Mr. Cohn: That completes my examination.

[fol. 2044] Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Howland:

Q. With reference to Exhibit 28 which is balance sheet or financial statement as of March 31, 1952, I notice under liabilities that you have accounts payable of $42,826.40. Are those trade accounts of various types and kinds?

A. That includes trade accounts as well as taxes accrued such as transportation tax, withholding tax, social security tax, etc.

Q. Have all items of that character, both interline accounts and tax accounts and matters of that sort, all been put in that one item?

A. All except interline accounts. They are included in accounts receivable.

Q. Included in accounts receivable?

A. Yes.

Q. Well, amounts due to connecting lines for interline, does the accounts receivable include that item?

A. That is correct.

Q. And is the item of accounts receivable balanced against interline accounts payable?

A. We have a separate account for interline account. It is either debit or credit. They may owe us or we owe them.

Q. In accounts receivable is net of receivables over payables included?

[fol. 2045] A. In interline accounts, but accounts receivables also includes general accounts.

Q. How much of accounts receivable as shown on Exhibit 28 represents accounts receivable from connecting lines?

A. That I can't tell you.

Q. You can't tell about that?

A. In percentage, no.

Q. And you can't tell us what the amount of accounts payable to interline carriers was on this date?

A. No.

Q. Now, I notice on this Exhibit 28 you have an item Drafts Payable, $29,940.29. What is represented by that?

A. That is drafts outstanding. We use draft method rather than check.

Q. In other words, you draw drafts on what type of people with whom you do business?

A. We draw everything on drafts.

Q. And call them drafts instead of checks?

A. Right. It is practically the same thing.

Q. Uh-huh, and so you had cash on hand and in the bank, $15,180.57, but you had, of course, twice that amount of checks or drafts outstanding?

A. That is correct.

Q. Do the item of accounts payable include any items on which drafts are outstanding?

[fol. 2046] A. No. Well, there is a slight possibility—no, the first answer is correct.

Q. Now, notes payable, $42,234.00, represents what?

A. Notes that are due. Notes outstanding, that is.

Q. How much of those are for money borrowed and how much for installment payments on equipment?

A. Well, it all represents notes payable on borrowed money for equipment.

Q. What I want to get at is the difference, if you can tell us, between the case in which the company has gone to the bank and borrowed money and installments of the purchase price of equipment outstanding?

A. I don't know if I understand you correctly.

Exam. Carpenter: Read the question.

(Question read.)

By Mr. Howland:

Q. In other words, I suppose that in some instances, Mr. Gracey, your company has had occasion to buy trucks,

trailers or tractors on conditional bill of sale or on the installment plan?

A. No. That particular figure in notes payable represents loans against equipment which we have purchased and paid back on the installment plan.

Q. Is that borrowing all from banks or is it from the manufacturer or vendor of equipment?

A. From banks.

[fol. 2047] Q. Now, I believe you said you owned how many pieces of equipment?

A. Eight trucks or straight jobs, 22 tractors and 23 trailers.

Q. All right. What are the size of the 8 trucks in capacity?

A. You mean in capacity load?

Q. Yes.

A. They differ. They are different size jobs. I can't state an answer sure on that.

Q. How many pick-up and delivery trucks do you have in the City of Omaha, Nebraska?

A. Two.

Q. How many pick-up and delivery trucks do you have in Des Moines?

A. One pick-up and delivery t. .k. Pardon me, there is two.

Q. Two in Des Moines.

Do you have a terminal in Chicago?

A. Yes, sir.

Q. How many pick-up and delivery trucks do you have in Chicago?

A. One.

Q. And now, that gives you five pick-up and delivery units. Do you have any pick-up and delivery at Avoca?

A. Yes. There is three in Avoca—three straight truck jobs.

Q. So you have in the City of Chicago one pick-up and delivery truck——

A. Company owned.

[fol. 2048] Q. —two in Omaha, two in Des Moines and three in Avoca?

A. Right.

Q. Now, you say you have 22 tractors and 23 semi-trailers. How many tractors do you constantly operate between Des Moines and Omaha and Omaha and Avoca and Des Moines?

A. That is varied according to the traffic. I would say an average of three—that is tractor-trailer units.

Q. You mean a tractor and trailer constitutes one unit?

A. That is right.

Q. Now, as I understand your service that you are rendering at the present time out of Omaha to the east you have a unit that operates over the highway to Avoca. Is that correct?

A. Yes.

Q. How would a shipment moving from Omaha, Nebraska, to Atlantic, Iowa, be handled by your company?

A. It would be put on the trailer which leaves Omaha each night and dropped off at Atlantic enroute to Des Moines.

Q. And about what is your scheduled time of departure for that unit?

A. That again varies. It would average between 10:00 and 12:00 p. m.

Q. Does that truck operate via Avoca or direct over Highway 6?

A. Directly over Highway 6.

Q. What other service do you have—say a shipment moving from Omaha to Harlan—what service do you provide on that?

[fol. 2049] A. Leaving Omaha in the evening and delivered to Harlan the next morning—Highway 64 to Avoca and 59 to Harlan.

Q. And there would be a transfer at Avoca on that?

A. No. It is domiciled at Avoca. All trucks on peddle are held all night there, but it would be on the same one to Harlan the next morning.

Q. Now, with respect to your service west from Des Moines in a westerly direction. What is your usual practice with respect to that?

A. Leaves Des Moines each morning and peddles west as far as Atlantic—not to Atlantic, but Wiota because

Atlantic is served by another trailer—the one I mentioned just a moment ago.

Q. A moment ago you said you had a truck leaving Omaha, Nebraska, between 10:00 p. m. and midnight—on a five-day week basis, I take it?

A. Right.

Q. And that truck goes through to Des Moines?

A. Yes.

Q. Now, what service does that render to intermediate points?

A. Atlantic only on that particular trailer.

Q. Now, what other traffic is loaded in that particular truck?

A. Traffic to Des Moines, east of Des Moines or west of Des Moines, to Anita.

Q. Do you mean points intermediate to Anita and Des Moines?

A. That is correct.

[fol. 2050] Q. All right. Now, what happens to that truck at Des Moines.

A. That truck is stripped at Des Moines and put on the respective peddle trucks.

Q. Does that truck go on east at Des Moines?

A. No.

Q. In other words, it is unloaded?

A. Right.

Q. Where does it go then?

A. It stays in Des Moines and is reloaded for Omaha to go back again that night.

Q. And what time does it leave Des Moines?

A. Approximately 5:00 to 7:00, depending on the time the trailer is loaded.

Q. Now, does that truck then peddle out of Des Moines?

A. No.

Q. And what time does that truck get back to Omaha?

A. As stated a while ago, depending on the time it leaves Des Moines and normal means of transportation between Des Moines and Omaha.

Q. What time does it get back to Omaha?

A. Between 10:00 and 12:00 p. m.

Q. 10:00 and 12:00 p. m.?

A. Right.

Q. I understood it left Des Moines sometimes between 5:00 and 7:00 a. m.?

[fol. 2051] A. No. P. M.

Q. I am all mixed up. Let's get this straight.

This truck that serves only Atlantic and has Des Moines freight from Omaha leaves from 10:00 to 12:00 p. m.?

A. From Omaha, but it originally leaves from Des Moines. That is our starting point for it.

Q. What time does it leave Des Moines?

A. Between 5:00 and 7:00.

Q. P. M.?

A. P. M.

Q. It is a turn-around between Des Moines and Omaha then?

A. That is correct.

Q. And on the eastward movement the truck comes to Des Moines, unloads and gets in here at somewhere between 5:00 and 7:00 a. m. and stays here until some time between 5:00 and 7:00 p. m.?

A. That is right.

Q. All right. Now, when was that service inaugurated on that schedule?

A. I can't give you the exact date on that.

Q. Approximately?

A. Approximately in February some time.

Q. February, 1952?

A. Yes, sir.

Q. What was your service prior to that time between Omaha and Des Moines?

[fol. 2052] A. It came to Avoca and moved to Des Moines the next morning.

Q. In other words, shipments moving Omaha to Des Moines prior to February of this year moved out of Omaha to Avoca and were there reloaded through there into a truck for Des Moines?

A. Not reloaded. The same truck would go to Des Moines peddling, I believe, on the way down. That is peddling on 6.

Q. Coming through Atlantic?

A. Right.

Q. Now, when was it that service was inaugurated to any points east of Des Moines on a peddler basis by the Iowa-Nebraska Transportation Company?

Mr. Cohn: Object to that question as having no relevancy or materiality. What we are interested in is present service being afforded in the territory.

Exam. Carpenter: Overruled.

A. To my best knowledge service was inaugurated the latter part of January, 1949.

By Mr. Howland:

Q. Do you have the trip logs of your drivers on that peddle run?

A. For 1949?

Q. 1949, 1950 and 1951?

A. I don't believe they would be on record. It is not required.

Q. How far back do you have them?

A. For one year.

Q. Don't you preserve your logs for a longer period of [fol. 2053] time normally?

A. One year is all that is required.

Q. I am asking if normally you do preserve them for a longer time?

A. Not normally. No.

Q. As I understand it you have what you refer to as a peddler run east out of Des Moines and that serves certain points located to the east of Des Moines and you have a peddle run you refer to as the north peddle run?

A. Right.

Q. Where does the north peddle run operate?

A. It leaves Des Moines and operates north to Nevada, Ames, Boone and on Highway 30 as far as Jefferson.

Q. How does it return to Des Moines?

A. Over the same route.

Q. Does it go back to Nevada?

A. Not if it makes Nevada on the way up.

Q. Now, what type unit do you have on that run?

A. Tractor and semi-trailer.

Q. What is the length of the semi?

A. From 26 to 28 feet.

Q. All right. You say you have what you refer to as the east peddler. That customarily leaves Des Moines at what time?

A. Approximately 8:00 o'clock.

Q. A. M. or p. m.?

[fol. 2054] A. A. M.

Q. And describe the movement of that peddler run as you have it set up at the present time in recent months?

A. That run would vary according to traffic demands. Normally it would start out from Des Moines and go over Highway 6 to Colfax, Mitchellville and Newton. May I see a map? Then on to Grinnell and as far as Marengo and with traffic demands it will continue on to Cedar Rapids.

Q. Then where does it go from Marengo if it is not going on to Cedar Rapids?

A. It will come back to Des Moines.

Q. Over what route?

A. Over the same route.

Q. As a turnaround service?

A. Well, as I said, when the truck originally starts it is depending on the traffic we have. There is one route the truck will take. Another time it may go directly out of Des Moines on 64 to Marshalltown and then take towns on Highway 30 to Cedar Rapids and then return to Des Moines.

Q. As I understand it then, you don't have a regularly scheduled route east of Des Moines? It may go up 64 to Marshalltown and east on Highway 30 to Cedar Rapids and back to Des Moines over U. S. Highway 6. Is that right?

A. That would be a daily service whichever way we go—if we have traffic going out on 6 and coming back on 30 or [fol. 2055] if demanded it will go out on 30 and back on Highway 6.

Q. Does that unit departing Des Moines at 8:00 a. m. daily serve both points on U. S. Highways 30 and 6?

A. Correct.

Q. Then it would not normally operate from Des Moines to Marengo and return over U. S. Highway 6?

A. Normally, no.

Q. That would be an unusual situation for that to exist?

A. Right.

Q. Now, Mr. Gracey, what is the distance between Des Moines and Cedar Rapids?

A. I don't know the exact distance. I just would judge 126 miles.

Exam. Carpenter: Over which route?

Mr. Howland: Route via Marengo and 149 or via Marshalltown and Highway 30.

By Mr. Howland:

Q. Is there much difference between the length of those routes?

A. I couldn't state definitely, but by the looks of the map there would be.

Q. And in either event the minimum distance between Des Moines and Cedar Rapids is something like 122 miles, is it not?

A. Quite close to that distance. Correct.

Q. So you would have a run of 245 miles if you made the round trip to Cedar Rapids in peddler service?

[fol. 2056] A. If we go to Cedar Rapids that is correct.

Q. If you go to Marengo and thence to Belle Plaine and back to Des Moines you would have a peddler route of something like 225 or 230 miles, would you not, in the one day?

A. It is possible. Yes, sir.

Q. When was that type of service inaugurated?

A. To the best of my knowledge sometime in January, 1949.

Q. And are you familiar with the exhibits and testimony given by Mr. Petersen in the temporary application for authority of the Rock Island Motor Transit Company in September, 1951?

A. Not too familiar.

Exam. Carpenter: Are you referring to the Rock Island's Peterson?

Mr. Howland: That is Mr. E. S. Petersen. Rock Island's is Peterson.

By Mr. Howland:

Q. Do you have any bills showing transportation of any commodities in any peddler service to points east of Des Moines prior to the month of July, 1951?

Mr. Cohn: Do you mean here in the hearing room at this time?

Mr. Howland: Anywhere.

Mr. Cohn: I am going to object to that as not being relevant to issues in this proceeding and going beyond the scope of direct examination.

Exam. Carpenter: That was July, 1951?

Mr. Howland: Yes.

[fol. 2057] Mr. Cohn: Those were in the temporary phase of the case and presented at that time. It was explained by the witnesses that these bills were for bringing it up-to-date which start with September, 1951.

Mr. Howland: I understand that.

Mr. Cohn: Of course, the exhibits in the temporary proceeding are not a part of the record in this proceeding and are not relevant in this proceeding. We are bringing in services performed by this particular carrier at this time. Anything before that would be in the temporary phase of the case and is in that case.

Mr. Howland: I am asking if the witness does have any record of any bills prior to the month of July, 1951.

Exam. Carpenter: I will sustain the objection.

By Mr. Howland:

Q. Referring now to Exhibits 31, 32 and 33, are your abstracts of shipments, as I understand it, for which you have here the supporting bills for inspection of parties for the items referred to therein?

A. Yes, sir.

Q. Now, I notice on Exhibit 32, that is the statement where the Pro Number bears the prefix "DM" which indicates as I understand that your company first got the shipment at Des Moines?

A. Right.

Q. Now, you have billed in the Des Moines shipments originating in some instances at points near Des Moines

[fol. 2058] such as Mitchellville and one or two other items of that character. Does that mean that the actual billing was handled at Des Moines?

A. The actual freight bill was cut at Des Moines. Yes.

Q. I notice on Exhibit 32 that on shipments originating at points like LaCrosse, Wisconsin, or Chicago and destined to points such as Grinnell, Newton, Colfax and Brooklyn and some other points that you apparently received the shipment at Des Moines. Is that true?

A. That is correct.

Q. In other words, on a shipment destined from Chicago, Illinois, to Grinnell, Colfax, Marengo and Victor and some other places on the list, you got that shipment at Des Moines?

A. Only shipments billed on this Exhibit 32 were billed at Des Moines and received at Des Moines.

Q. I take it they were received from connecting line at Des Moines where point of origin would be Chicago and destination would be Marengo or Victor or some place of that kind?

A. Correct.

Q. And referring to the first shipment at the top of the page on Exhibit 32, Pro No. 19965, that is a shipment of shoes from LaCrosse, Wisconsin, to Grinnell, Iowa, and you received it at Des Moines?

A. Right.

Q. Do you know what carrier handled that shipment?

A. I do from the records, yes. Watson Bros.

[fol. 2059] Q. That was the carrier from which you received it?

A. Yes.

Q. Do you know whether Watson Bros. Transportation Co., Inc. has authority to serve Grinnell, Iowa?

A. I couldn't say.

Q. The next shipment, groceries from Chicago, Illinois, to Colfax, Iowa, Pro No. 19970. Tell what carrier handled that shipment?

A. Watson Bros. to Des Moines.

Q. And you handled it back to Colfax. The dates of those shipments, September 27, 1951, that is your billing date?

A. Right.

Q. What time and place did Watson Bros. get those shipments, if you know? Do you have any information?

A. No.

Q. I observe also under Pro No. 19976 on September 27, 1951, there is a shipment from Stanley, Wisconsin, to Victor, Iowa, 70 lbs. Who handled that shipment to Des Moines?

A. Watson Bros.

Q. Let's drop down to a shipment bearing Pro No. 20013 on September 28, 1951, originating Kansas City, Missouri, destined Stuart, Iowa. From what carrier did you get that shipment at Des Moines?

A. Watson Bros.

Q. Look also at Pro No. 20020, Kansas City, Missouri, [fol. 2060] to Dexter, Iowa, storm sash, same date. What carrier did you get that from?

A. That is from Watson.

Q. Well, all of the shipments— What is the fact as to whether all of the shipments bearing point of origin of Chicago or eastern points that is received by you at Des Moines and destined to points intermediate between Des Moines and Davenport were in fact brought into Des Moines by other carriers and delivered to you at Des Moines for delivery on to destination to these small intermediate points?

A. Well, I can't say as to the reason for it. They were tendered to us. We made the towns so we accepted them.

Q. Will you look on the second page of Exhibit 32, Pro No. 20549, October 8, 1951, origin Joliet, Illinois, destination Anita, Iowa. You got that shipment at Des Moines from what carrier?

A. Watson Bros.

Q. Do you get any shipments from any carriers at Des Moines other than Watson Bros.?

A. It is possible.

Q. What are the principal ones you have in your list?

A. I couldn't tell you that unless I go through it.

Q. We will undertake to go through it if you are not familiar with it. Just one further shipment. Look at ship-

ment moved on Pro No. 23534, December 8, 1951, shipment from Peoria, Illinois, to West Liberty. Can you tell us from what carrier you got that shipment?

[fol. 2061] A. Watson.

Q. That is from Watson too.

Now, on Exhibit 31, that is shipments received by your company at Omaha, Nebraska, on which you performed transportation service, as I understand it. Is that right?

A. Yes, sir.

Q. Now that exhibit under Pro No. 51132, date of September 29, 1951, you got a shipment originated at Chicago and was destined to Oakland, Iowa, and you received it at Omaha. Is that also a Watson Bros. shipment?

A. That was received from Watson.

Q. That was a Watson shipment.

Q. That would mean, of course, that it was brought in by Watson Bros. from Chicago, carried through to Omaha and you handled it back from Omaha to Oakland, Iowa?

A. That is correct.

Q. Now, has there been any increase in the number of your units during the first three months of 1952?

A. Not of company owned equipment.

Q. Not of company owned equipment.

Does your company make annual reports to the A. T. A. with respect to equipment owned and operated in intercity revenue service?

A. To A. T. A.?

[fol. 2062] Q. Yes.

A. We are not required to.

Mr. Cohn: Do you mean to the Interstate Commerce Commission?

Mr. Howland: I mean to the Interstate Commerce Commission.

A. Yes, sir.

By Mr. Howland:

Q. And what is the fact as to whether on December 31, 1951, as of that date you reported the ownership of 17

trucks and tractors in intercity revenue service as company owned?

A. Could be. I don't know. I don't have a copy of my report.

Q. Well, would you say that your company may not have reported as of December 31, 1951, to the Interstate Commerce Commission that trucks and tractors in intercity revenue service on December 31 amounted to 17 units?

Mr. Cohn: Objection. The records speak for themselves.

Exam. Carpenter: Overruled.

A. I would not state the amount put down unless I have the record.

By Mr. Howland:

Q. Who is it makes the reports which the Iowa-Nebraska Transportation Company files with the Iowa State Commerce Commission and the Interstate Commerce Commission? Do you have charge of that?

A. I supervise it.

Q. And are those reports signed when they are filed by an officer of the company?

[fol. 2063] A. Yes, sir.

Q. Do you customarily sign those reports?

A. Quarterly reports I do; annual reports are signed by both the president and myself.

Q. Now, your company has engaged rather extensively in the transportation of dairy products, meats and packinghouse products, has it not?

A. Dairy products.

Q. And you have also been principally over the years a hauler of truckload quantities, have you not, rather than a peddle service operator?

A. We have operated both.

Q. About what percentage of your mileage or your tonnage rather, would you say in the last two years has been represented by truckload business as compared with your less than truckload business?

A. You are speaking tonnagewise now?

Q. Tonnagewise, yes.

A. I don't know the exact figure. I would estimate about 65% of these specific commodities.

Q. Is it not true that you have reported to the Interstate Commerce Commission for the years 1950 and 1949 that your tonnage in truckload quantities represented 80% or in excess of 80% of your total transportation performed?

A. I don't know the exact figure. Somewhere around there.

Q. You don't deny that your company has so represented?

[fol. 2064] A. No.

Q. Now, referring to Exhibit 29. As I understand it that is the operating statement for the period January 1, to March 31, 1952. Am I correct in that?

A. January 1?

Q. January 1, 1952, to March 31, 1952?

A. Right.

Q. What was the results of operation of your company during the year 1951?

A. In comparison with this statement?

Q. What were the results—did you show an operating profit or loss?

A. Operating profit.

Q. And how large was that figure for 1951?

A. For the first three months?

Q. No. I am speaking of the year 1951.

A. I don't remember the exact amount.

Q. Do you have anything here—information from which you can refresh your recollection?

A. Let me go back to the first here. Do you mean for the year?

Q. The calendar year of 1951. What is your company's operating profit for that year?

A. Before or after collection of income tax.

Q. Of course, if you had any income tax liability you would have a profit.

[fol. 2065] A. A slight profit.

Q. About how much?

A. I can't tell you.

Q. Can you get that figure and give it to us?

A. Yes, sir. Certainly.

Q. I don't want to ask what your income taxes are. If you can give us the figure after income taxes that will be satisfactory.

Now, in your operating statement, Exhibit 29, in which of these items do you carry your loss and damage claims?

A. In 4500 which is sales, tariff and advertising. Beg pardon. Insurance and safety.

Q. You carry loss and damage under insurance and safety?

A. Correct.

Q. Is that in accord with the Interstate Commerce Commission accounting practices?

A. It has never been denied.

Q. How much were your loss and damage claims in the first three months of 1952? Can you give us that figure?

A. I can't give it to you now. I can get it.

Q. How many claims do you have undisposed of on your books at this time? Can you tell us anything that—loss and damage claims?

A. I can't give the exact figure.

Q. Can you give us any idea about it?

A. Not without checking the records.

[fol. 2066] Q. Now, I notice you have on Exhibit 29 an item of terminal expenses of only $3453.41. What is included in that figure?

A. Terminal expenses would include salaries for manager as well as terminal employees, incidental office expenses and dock expenses.

Q. Now, as I understand it, you have an office at Omaha, Nebraska; one at Avoca; one at Des Moines and one at Chicago where you maintain terminals?

A. Right.

Q. And how many employees do you have at Omaha?

A. At the present time there is three.

Q. Three employees at Omaha, Nebraska?

A. Right.

Q. One man is the terminal agent or manager?

A. Right.

Q. And you have how many truck drivers?

A. Two.

Q. Don't you have any dockmen there?

A. No.

Q. Do your drivers load your over-the-road units?

A. Right.

Q. Then at Des Moines you have how many employees?

A. Approximately eight at the present time.

Q. Eight employees? And who does your billing at Omaha?

A. The office man.

[fol. 2067] Q. He handles all that detail?

A. Yes, sir.

Q. Now, your eight employees at Des Moines includes the terminal agent or manager. Right?

A. Right.

Q. How many pick-up and delivery drivers?

A. There would be three. They alternate between dockmen and pick-up and delivery men in the City.

Q. Do you have any office force here?

A. Just one at the present time.

Q. Just the one man. And besides your pick-up and delivery drivers and dockmen of whom there are three and the terminal manager, what is the personnel of the other four in Des Moines?

A. They alternate too. Three on peddle and one alternates between dock and peddle.

Q. And in Chicago you have how many people?

A. An average of four to five depending on traffic on the dock—one manager, one traffic manager and two terminal employees.

Q. Do you mean to say you can carry all of those people and that there is only $1000.00 a month terminal expense? Isn't something wrong with that?

A. City drivers come under transportation expense—salaries of pick-up drivers.

Q. You carry those under transportation expense?

A. Right.

[fol. 2068] Q. What is put in terminal expense?

A. Terminal managers, office managers, if any, and incidental terminal expenses.

Q. Are dockhands carried as terminal employees?

A. Yes.

Q. And your company's expenses have only been $1000.00

a month for terminal expenses for the first three months of 1952?

A. If it shows there, yes. A little better than $1000.00.

Mr. Howland: Mr. Examiner, looking at the time I don't believe I can finish in any little time.

Exam. Carpenter: We will adjourn for lunch until 1:30.

(Whereupon at 12:00 o'clock noon, a recess was taken until 1:30 of the same day.)

AFTERNOON SESSION 1:30 p. m.

Exam. Carpenter: We will proceed.

C. A. GRACEY resumed his testimony as follows:

Cross-examination (Continued).

By Mr. Howland:

Q. Your terminal expenses as shown on Exhibit 29 are listed there for a three month's period as $3453.41. Is that setup in the method prescribed by the Interstate Commerce Commission for keeping accounts for motor carriers?

A. Yes, sir.

Q. Well, now, did you not report to the Interstate Com- [fol. 2069] merce Commission for the year 1951 that you had terminal expenses of $104,208.?

A. I couldn't check that figure without seeing a copy of my report.

Q. Well, you include, do you not, in terminal expenses as you keep your records, the salaries of supervisory employees—that is your terminal agent or terminal manager and the salaries of platform employees who are handling your freight? That is included, is it not?

A. That is right.

Q. Do you know of any reason that would cause such a marked reduction in terminal expenses for the first three months of 1952 as compared with the prior year's period?

A. I can't answer that unless I check the records.

Q. Do you have that record of the 1951 report to the Interstate Commerce Commission available in Des Moines?

A. No, sir.

Q. You would have to get it from Avoca then?

A. Yes, sir.

Q. Can you do that?

A. I can if so requested.

Q. I wish you would investigate that and ascertain what your report to the Interstate Commerce Commission as to terminal expenses was for the year 1951 and then see if your figures for January 1, 1952, to March 31, 1952, are [fol. 2070] kept on the same basis and if there is any change let us know what that is. Would you be available for that purpose?

A. Yes.

Q. Will you produce for our inspection that copy of the annual 1951 report?

Mr. Cohn: Can't we stipulate that that be part of the record?

Exam. Carpenter: No, sir.

Mr. Cohn: I don't see that it is relevant and material in this proceeding—the producing. If applicant thinks it is relevant and material they should offer it. I don't want to bring this witness back and forth from Avoca for matters not relevant to matters in this proceeding.

Exam. Carpenter: The witness agreed to furnish it.

Mr. Cohn: We will send it in as a late filed exhibit. I don't think it necessary to ask this witness to come back at the whim of applicant for matters which have no bearing on this proceeding.

Exam. Carpenter: It might have an important bearing.

Mr. Cohn: I fail to see the materiality of the 1951 annual report of this carrier in this proceeding.

Exam. Your witness setup these figures. They are testing the accuracy of them. If you want to take them out——

Mr. Cohn: He says they are accurate.

Exam. Carpenter: There certainly is a vast difference be- [fol. 2071] tween the 1951 and 1952 figures.

Mr. Cohn: I don't see the 1951 figures in the record.

Mr. Howland: That is what we are asking for.

Mr. Cohn: I say they are not relevant and material. 1952 figures for three months is what we put in the record and we are willing to discuss those figures.

Exam. Carpenter: They are discussing them and asking what is the difference between those for 1951 and for 1952.

Mr. Cohn: I don't think it is material and relevant what the difference is.

Exam. Carpenter: Do you want to wait for the figures or have them late filed?

Mr. Howland: I want to cross-examine, if the Examiner please, because of what appears to me from material I have available—what appears to be a discrepancy in the figures shown on Exhibit 29 and information available to us as to the operations of the carrier.

Exam. Carpenter: We will find out what he is going to do.

You are still objecting to furnishing them, Mr. Cohn?

Mr. Cohn: That is correct.

Exam. Carpenter: I am going to overrule your objection.

Witness Gracey: May I say something?

Exam. Carpenter: Yes, sir.

Witness Gracey: Your payroll is the first item on the statement. That payroll will include supervisors and office [fol. 2072] managers of terminals. The statement is not made up according to Interstate Commerce Commission regulations. That is what it is. Payroll includes supervisory and terminal office employees.

By Mr. Howland:

Q. Well, that includes all salaries except transportation expenses—that is over-the-road drivers?

A. Correct. It includes payroll of all kinds.

Q. But not over-the-road drivers?

A. It includes all payroll.

Q. Your transportation expense shown as $124,520.55 on Exhibit 29. Isn't that the principal item—wages of drivers?

A. The transportation expense, that also includes your equipment leased to operators on a commission basis and delivery payments.

Q. Does it not include wages of over-the-road drivers?

A. No, sir. That is included in payroll. On the Interstate

Commerce Commission report there it is broken down into proper categories for terminal expenses.

Q. Well, Exhibit 29 then is not prepared in accordance with Interstate Commerce Commission accounting methods?

A. No, sir. That is not required.

Mr. Howland: That is all I have, I think. Mr. Nolan, I think, has some questions.

Exam. Carpenter: You are not asking for any information to be furnished on 1951 then? You are satisfied, are you?

Mr. Howland: If this is not in accordance with Inter-
[fol. 2073] state Commerce Commission regulations we will waive that.

By Mr. Nolan:

Q. You have been with Iowa-Nebraska Transportation Company since 1942?

A. Correct.

Q. And during that time have you been familiar with operations of the company?

A. That's right.

Q. And you are presently vice president and assistant to the president and general manager of the company?

A. Vice President and office manager is my title.

Q. And you have in your possession and under your jurisdiction the books and records of the company?

A. Right.

Q. Now, I believe you testified that the method of conducting present operations had been continuous since around the forepart of 1949. Is that correct?

A. January, 1949, on peddle runs. Yes, sir.

May I make another statement? That pertains to Des Moines peddle runs.

Q. How about other operations?

A. They have been the same since I have been with the company from Omaha.

Q. You identified in the record here Exhibit 27 which appears to be a Certificate issued by the Interstate Commerce Commission to your company, No. MC-47619. Correct?

[fol. 2074] A. I suppose that is the number. I don't have it here.

TRANSCRIPT OF RECORD

Supreme Court of the United States

OCTOBER TERM, 1956

No. ~~101~~ 6

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., APPELLANTS,

vs.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, ET AL.

No. ~~110~~ 8

RAILWAY LABOR EXECUTIVES' ASSOCIATION, ET AL., APPELLANTS,

vs.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, ET AL.

APPEALS FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

NO. 101 FILED MAY 22, 1956
NO. 110 FILED MAY 24, 1956
PROBABLE JURISDICTION NOTED OCTOBER 8, 1956

Q. Whatever the number is you identified Certificate issued by the Interstate Commerce Commission to your company for interstate operations. Is that true?

A. True.

Q. Now you are familiar with authority possessed by your company in interstate commerce?

A. True.

Q. What is the fact whether or not operations of your company, with possible exception of Omaha-Des Moines peddle run, have been substantially the same throughout the time you have been with the company?

A. No. They have changed.

Q. Have there been any changes since October, 1951?

A. Slight changes, yes.

Q. Will you tell me what changes, if any, have taken place in the method of operating any routes your company presently have since October, 1951?

A. I don't believe I understood that.

Exam. Carpenter: Read the question.

(Question read.)

A. The only operation that is changed is the Des Moines to Omaha and return peddle.

Q. In what respect has that changed?

A. Formerly it was picked up in Omaha, put on a trailer [fol. 2075] at Omaha and brought to Avoca where it remained overnight and then carried on Route 6 between Avoca and Des Moines and return. Now it originates in Des Moines, goes directly to Omaha, with exception of one drop-off at Atlantic, and returns from Omaha to Des Moines with the same exception of one drop-off at Atlantic.

Q. That is the only change made in your company's interstate routes between Chicago and Omaha since 1951?

A. To my knowledge it is right now.

Q. You are general office manager. You would know if there were any other changes, would you not?

A. I don't recall any.

Q. I believe you testified either on direct examination or with Mr. Howland, on your operation eastbound on so-called peddle operation that that is performed by one truck one day going up to Marshalltown and Cedar Rapids and the other day on the other run?

A. Correct.

Q. And did you say that is the same as during the month of October, 1951?

A. I didn't say.

Q. Is it or isn't it?

A. I didn't say. I said it would depend on traffic at the particular time.

Q. Then your company does not operate one truck between Des Moines and Marshalltown daily?

[fol. 2076] A. Depending on traffic.

Q. That isn't my question. Do you or do you not operate between Des Moines and Marshalltown daily irrespective of the volume of traffic?

A. I still say if the traffic demands it we will operate it.

Q. Who is President, General Manager and executive officer of your company?

A. Mr. Petersen.

Q. E. S. Petersen?

A. Yes.

Q. And he was in that same capacity during October, 1951, during temporary hearing in this proceeding?

A. Yes.

Q. And he appeared as a witness in this case, did he not?

A. I think he did. I wasn't here.

OFFER IN EVIDENCE AND OBJECTION THERETO

Mr. Nolan: In connection with the cross-examination of the witness the intervenors whom I represent offer into evidence the cross-examination of E. S. Petersen, the President and General Manager of Iowa-Nebraska Transportation Company, which was given during the hearing upon the temporary authority application in this proceeding on the second day of October, 1951. Just the cross-examination of Mr. Petersen. The same appears on pages 1214 to 1286—the first half of page 1286, inclusive, and pages 1287 to 1293, inclusive, of the official transcript of the [fol. 2077] record of said proceeding.

Exam. Carpenter: Are there any objections?

Mr. Cohn: Yes. We object to any piecemeal offering of testimony of proceeding where the issues before the Commission differ materially to those before this Commission

in the instant proceeding. I am certainly going to object to any offer of any partial testimony of any witness in this proceeding as not having any bearing or materiality in this proceeding.

Mr. Howland: Applicant desires to join in the offer.

Exam. Carpenter: Sustained.

Mr. Nolan: In connection with the offer of intervenors the record shows that said witness testified that operations are the same as they were in 1951 with exception of the Des Moines-Omaha peddle run and the offer of testimony of Mr. Petersen is offered for purposes of impeachment of the Witness Gracey.

By Mr. Nolan:

Q. Now, Mr. Gracey, your company holds interstate operating authority to operate between Omaha and Cedar Rapids, does it not, by use of U. S. Highway 30 and also U. S. Highways 6 and 218?

A. Right.

Q. And your company also holds authority to serve all intermediate points on all those routes?

A. Right.

Q. And your company also has authority to serve Cedar Rapids from Omaha, Nebraska, by use of U. S. Highway 34 to Mount Pleasant and from Mount Pleasant, Iowa, by [fol. 2078] use of U. S. Highway 218. Right?

A. I believe that is right, sir.

Q. And authority to serve all intermediate points?

A. Right.

Q. Does your company serve regularly intermediate points on all three of those routes between Omaha, Nebraska, and Cedar Rapids?

A. Serve regularly?

Q Yes.

A. Yes.

Q. Do you serve all intermediate points regularly between Omaha and Cedar Rapids on the three routes I have described?

A. When traffic demands it, yes.

Q. Will you produce for me your company's freight bills

showing when the last time was that your company handled a shipment to North Liberty?

Mr. Cohn: I am going to object to any production of any additional exhibit. We are presenting our case as we feel it should be presented before the Commission. We have presented exhibit of representative shipments of this carrier and we will stand on the record as made. This witness has testified as to the type of service to points served. I object to any additional documentary evidence in this proceeding on behalf of Iowa-Nebraska Transportation Company.

Exam. Carpenter: Sustained.

[fol. 2079] Mr. Nolan: Let the record show that intervenors represented by me request that this witness produce here for examination, freight bills or delivery sheets showing the last time any shipment was handled by its company in interstate commerce to the Town of North Liberty, Iowa, which is a point on U. S. Highway 218 between Cedar Rapids and Iowa City, Iowa.

By Mr. Nolan:

Q. Will you produce, Mr. Gracey, for examination, all the freight bills or copies thereof showing shipments handled by your company to the Town of Crawfordsville, Iowa, which is a point on U. S. Highway 218 between Iowa City and Mount Pleasant, Iowa?

Mr. Cohn: Same objection.

Exam. Carpenter: Same ruling.

Mr. Nolan: Let the record show that intervenors represented by me request such freight bills for examination.

By Mr. Nolan:

Q. Now, Mr. Gracey, will you produce for examination a full and complete list of all unpaid and all unsettled loss and damage claims now pending against your company?

Mr. Cohn: I object to the production of any such documentary evidence as requested by intervenors as having no materiality or relevancy in this proceeding.

Exam. Carpenter: Objection sustained.

Mr. Nolan: The intervenors represented by me request that Mr. Gracey or some other executive officer of his company produce not later than sufficient time to examine such [fol. 2080] documents before this hearing is adjourned, a full and complete itemized list of all loss and damage claims now pending and unsettled against his company together with the dates said claims were filed and in connection with this request intervenors represented by me respectfully call the Commission's attention to testimony by various witnesses appearing here in connection with applicant's case that they had difficulty in getting collection from this carrier.

Mr. Cohn: I object to statement of counsel as not being sustained by the record. Further if there are any such specific matters in the record to which counsel for intervenors alludes those specific items may be relevant by being brought to the attention of this witness while here. It is not necessary to have any more documents or this witness appear at any later date.

Exam. Carpenter: The record speaks for itself.

By Mr. Nolan:

Q. Do you recall whether you have matters pending with Edward J. Delaney of Stuart, Iowa?

A. I don't recall him.

Q. Will you produce a full, complete and itemized list of balance due and owing your company and due and owing by your company to other carriers for interline shipments where your company has completed the shipment or have turned over shipments to other carriers?

Mr. Cohn: I object to that which has no relevancy or [fol. 2081] materiality in this case.

Exam. Carpenter: Sustained.

Mr. Nolan: Let the record show that intervenors represented by me request that this witness or some other executive of the Iowa-Nebraska Transportation Company file in this proceeding for examination by the intervenors represented by me, a full and complete and itemized list of all balances owing by his company to other motor carriers for interline shipments and a list of balances owing by such carriers to the Iowa-Nebraska Transportation Company.

By Mr. Nolan:

Q. Now, Mr. Gracey, you testified that Exhibits 31, 32 and 33 were representative shipments handled by your company during the period from September 27, 1951, to April 19, 1952, between so-called origin points Omaha, Nebraska, Des Moines, Iowa, and Chicago, Illinois, to destination points on U. S. Highway 6 involved in this proceeding. Correct?

A. Yes, sir.

Q. Will you produce not later than noon tomorrow all of the freight bills or copies of freight bills or delivery receipts showing all of the freight and shipments handled by your company from so-called origin points, Omaha, Nebraska, Des Moines, Iowa, and Chicago, Illinois, to destination points along U. S. Highway 6 involved in this proceeding for the months of April, 1952, November, 1951, and August, 1951, for examination and inspection?

[fol. 2082] Mr. Cohn: I object to that as unduly accumulative and for reason that in the presentation of our position in the case as intervenors in opposition we are allowed and entitled to a certain amount of latitude and we are standing on the record as made.

Exam. Carpenter: Sustained.

Mr. Rosenbaum: We are buying this record. Are we going to have this speach of Mr. Nolan's every time?

Exam. Carpenter: I think Mr. Nolan may go ahead.

Mr. Nolan: Let the record show that intervenors represented by me formally request that this Witness Gracey or some other representative of the Iowa-Nebraska Transportation Company produce and submit for inspection and examination, not later than noon tomorrow, a true copy of freight bills or delivery receipts of shipments handled by said Iowa-Nebraska Transportation Company from Origin points, Chicago, Illinois, Des Moines, Iowa, and Omaha, Nebraska, to destination points on U. S. Highway 6 involved in this proceeding, of which it is claimed Exhibits 31, 32 and 33 show representative shipments thereof, all said freight bills for the months of April, 1952, November, 1951, and August, 1951.

Mr. Howland: Let the record show that applicant joins in request for production of freight bills or delivery receipts.

By Mr. Nolan:

Q. Now, Mr. Gracey, your company has a manifest of each truck load that goes out from each of its terminals, [fol. 2083] does it not?

A. Yes, sir.

Q. Showing the shipper, point of origin, consignee, destination, weight of shipment. Is that true?

A. Yes, along with a few other details.

Q. What other details?

A. Pro number, number of pieces, weight, connecting line revenue, if any, and net revenue and whether shipped prepaid or collect.

Q. And those records are kept, are they not, for at least a year's time?

A. Yes, sir.

Q. And they are under your supervision as General Office Manager of the Company?

A. Yes.

Q. Will you produce for inspection and examination, not later than noon tomorrow, all of the truck manifests—not later than before this hearing adjourns, all of the manifests for shipments—truck shipments out of the Des Moines terminal for the months of April, 1952, November, 1951, and August, 1951?

Mr. Cohn: To which objection is made for reason that the production of such documents would be unduly accumulative in the record and serve no useful purpose in determination of this proceeding.

Mr. Nolan: I mean manifest of all shipments going out by truck from the Des Moines terminal.

[fol. 2084] Exam. Carpenter: Your other question was for freight bills for the same period—the question preceding that?

Mr. Nolan: That's right.

Exam. Carpenter: And now you want the manifests?

Mr. Nolan: Right.

Exam. Carpenter: Objection sustained.

Mr. Nolan: Let the record show that intervenors represented by me request the Witness Gracey or some other representative of Iowa-Nebraska Transportation Company produce for examination and inspection of intervenors represented by me, all manifests of shipments moving out of the Des Moines terminal of the Iowa-Nebraska Transportation Company for the months April, 1952, November, 1951, and August, 1951, said production being not later than on the morning of May 22, 1952—at the time this hearing reconvenes that morning.

Mr. Howland: Let the record show that applicant joins in the request.

Exam. Carpenter: The record may so show.

By Mr. Nolan:

Q. Now, Mr. Gracey, your company, I assume, keeps logs or the drivers keep logs of working hours and operations, do they not?

A. Yes, sir.

Q. And what information is shown on those logs kept by your drivers?

A. Time they start to work; time they start driving; [fol. 2085] towns they peddle to; origin points and destination points.

Q. And those logs are kept in regular course of business of your company as permanent records, are they not?

A. For a year's period, yes.

Q. And those records are under your supervision and available to you, are they not?

A. They are available to me, yes.

Q. Will you produce for examination and inspection by intervenors represented by me, the drivers' logs of your company who operated these so-called peddler operations out of Des Moines, both eastbound and westbound, during the months of April, 1952, November, 1951, and August, 1951?

Mr. Cohn: Objection is made to production of logs on the grounds they have no basis of relevancy or materiality in this proceeding.

Exam. Carpenter: Objection sustained.

Mr. Nolan: Let the record show that intervenors represented by me request that this witness or some other representative of Iowa-Nebraska Transportation Company produce for inspection and examination by intervenors represented by me, the logs of drivers of the Iowa-Nebraska Company employed in driving trucks for said company out of the Des Moines terminal of said company on so-called peddler runs, for the months of April, 1952, November, 1951, and August, 1951.

Exam. Carpenter: It may so show.

[fol. 2086] Mr. Howland: Applicant desires to join in that request just referred to by Mr. Nolan.

Exam. Carpenter: Read the statement.

(Statement read.)

Mr. Howland: Applicant desires to join in the request for production of drivers' logs.

By Mr. Nolan:

Q. Now, Mr. Gracey, how many compensation tax plates did your company obtain from the Iowa State Commerce Commission during the year 1951?

Mr. Cohn: That is objected to as not having any bearing on the issues in this proceeding, immaterial and irrelevant.

Mr. Nolan: I will withdraw that question for the time being. I want to lay a better foundation.

By Mr. Nolan:

Q. You say you have been with your company since 1942 and are familiar with the operations of the company, its authority and operating rights?

A. Yes, sir.

Q. Are you familiar with Law of the State of Iowa that requires a compensation tax plate on all motor vehicles used in the transportation of freight for compensation over regular routes?

A. I am familiar with the law, yes.

Q. And whether an operator is engaged in intrastate

or interstate commerce, you are familiar with that requirement of the Iowa Law?

A. Yes, sir.

[fol. 2087] Q. How many compensation tax plates did your company procure from the Iowa State Commerce Commission during the year 1951?

Mr. Cohn: I object to that as having no bearing on issues in this case.

Exam. Carpenter: Objection overruled.

A. I don't know.

By Mr. Nolan:

Q. How many compensation plates did your company procure from the Iowa State Commerce Commission for the year 1952?

Mr. Cohn: Same objection.

Exam. Carpenter: Overruled.

By Mr. Nolan:

Q. How many compensation tax plates does your company now have from the Iowa State Commerce Commission?

A. That I don't know.

Q. Will you produce for examination and inspection your records showing the amount your company paid for Iowa compensation tax plates during the years 1950, 1951 and thus far in 1952?

Mr. Cohn: I object to the production of any records as a part of our case.

Exam. Carpenter: Objection sustained.

Mr. Nolan: Let the record show that intervenors represented by me request that this witness or some other executive of the Iowa-Nebraska Transportation Company produce the records of said company showing the amount said company paid the Iowa State Commerce Commission for compensation tax plates under the Motor Carrier Law of [fol. 2088] the State of Iowa for the years 1950, 1951 and thus far in 1952.

Mr. Howland: We would like to join in that request, if the Examiner please.

By Mr. Nolan:

Q. Now, Mr. Gracey, there seems to be some dispute as to how many trucks your company actually owned and operated during the year 1951 and will you produce the registration certificates of all trucks licensed by your company during the year 1951 for examination by intervenors represented by me?

Mr. Cohn: I would like to make observation that the witness during the noon recess ascertained the true situation regarding vehicles owned and can give that without bringing in any additional documentary evidence. Is that right?

Witness Gracey: Right.

Mr. Nolan: We have a right to go beyond what the witness wants to give us. I have asked a question.

Exam. Carpenter: Read the question.

(Question read.)

Mr. Cohn: We object to production of the registration statements—certificates, as a part of our case.

Exam. Carpenter: Objection sustained.

Go ahead and ask the witness regarding that matter.

Mr. Nolan: Let the record show that intervenors represented by me request that this witness or some other repre-
[fol. 2089] sentative of the Iowa-Nebraska Transportation Company produce for inspection the registration certificates of all trucks licensed by said company for the year 1951.

By Mr. Nolan:

Q. Now, Mr. Gracey, how many trucks and what kind were they that your company operated during the year 1951?

A. How many trucks and what kind were they?

Q. Yes.

A. We operated 22 tractors.

Q. 22 tractors?

A. Right.

Q. Where were those licensed?

A. In the State of Iowa.

Q. In what county?

A. Pottawattamie county.

Q. And what other motor vehicles did your company own?

A. Straight trucks and trailers.

Q. All right. How many trailers?

A. 23.

Q. And how many straight trucks?

A. 8.

Q. How many trucks does your company own today?

A. It is the same amount.

Q. Now, was your operation of pick-up trucks the same in October, 1951, as they are today?

A. Do you mean as to the number of trucks?

[fol. 2090] Q. The number and kind, yes.

A. Not exactly the same.

Q. What changes have there been?

A. One truck added to Omaha. There have been some changes in Des Moines, but I don't know what they are.

Q. How do you account for the fact that you reported only 17 tractors to the Interstate Commerce Commission at the end of 1951?

A. Due to the fact we have five tractors in the company name that are, however, leased to operators that are purchasing them.

Q. They have been sold to operators?

A. Yes.

Q. And sold on a conditional sales contract?

A. Yes.

Q. Whose name are they licensed in?

A. Iowa-Nebraska Transportation Company.

Q. Who carries the insurance on them?

A. Iowa-Nebraska Transportation Company.

Q. Name those so-called owner operators?

Mr. Cohn: I object to that as not material to this case.

Exam. Carpenter: Overruled.

A. Ralph Bessey, Council Bluffs; Gordon Elkins, Council Bluffs; Lyle Smyth, Avoca; Bruno Tincani, Omaha; and Raymond Williams, Avoca.

By Mr. Nolan:

Q. Now, are those owner operators engaged by your [fol. 2091] company in the transportation of merchandise?

A. Yes, sir.

Q. As a matter of fact those five trucks or tractors are used exclusively for the handling of dairy products, are they not?

A. Not exclusively, no, sir.

Q. What other commodity do they handle?

A. They handle dairy products east, but general commodities on the backhaul.

Q. They handle exclusively dairy products going east?

A. In most cases, yes.

Q. They are not engaged in over-the-road transportation of freight except for the westbound movement out of Chicago?

A. And westbound movement out of New York to Chicago.

Q. But not used in local operation in the State of Iowa, are they?

A. Not out of Des Moines or Omaha, but they are out of Chicago.

Q. So then you have 17 tractors which are owned and operated by your company?

A. Right.

Q. Excluding these five trucks sold to so-called owner-operators and which are engaged, so far as this area is concerned, exclusively engaged in the handling of dairy products from the Omaha area to Chicago and east?

A. On the east run, yes.

Q. Now, your company is engaged in the transportation [fol. 2092] of dairy products from a territory approximately of one hundred miles radius around Omaha, Nebraska. Is that true?

A. Yes, sir.

Q. And that includes butter, eggs and dressed poultry for eastern markets in Philadelphia and New York?

A. Philadelphia, New York and Boston.

Q. And that is a regular operation?

A. Yes, sir.

Q. And your company uses its trucks in the handling of some of that merchandise? You have some of your company owned trucks handling dairy products to eastern markets. True?

A. Yes, sir.

Q. How many of your trucks are exclusively engaged in handling dairy products from origin territory in Nebraska to eastern markets?

A. Are you referring to tractors only?

Q. I am referring to tractors and trailers.

A. Of company owned I don't know the exact amount. I would say nine.

Q. You would say that nine tractors and trailers are devoted almost exclusively to the handling of dairy products from the Omaha territory to eastern markets?

A. That would be my opinion, yes, sir.

Q. Now, the trailers which are used in the handling of dairy products are trailers equipped for perishable com- [fol. 2093] modities, are they not?

A. Yes, sir.

Q. They are refrigerated equipment?

A. Right.

Q. So then out of the 17 tractors which you have left after you sold these five, nine of those tractors are engaged practically exclusively in the handling of dairy products from western Iowa to eastern market and, therefore, you have eight tractors left for over-the-road operations between Chicago and Omaha. Is that true?

A. Not between Chicago and Omaha. The nine going east goes—they all go to Chicago and bring freight back.

Q. How about going from Omaha to Chicago eastbound?

A. All dairy products.

Q. No general freight?

A. That would be handled mostly by vans.

Q. What do you mean by vans?

A. We have some van trailers.

Q. You only have eight left. You sold five of them and use nine of them to handle butter, eggs and dressed poultry.

A. From Omaha to Chicago it is mostly dairy products.

Q. You told the Examiner that you are performing a daily scheduled regular operation from Omaha to Chicago

and from Chicago to Omaha handling freight. What equipment handles freight you carry from Omaha to Chicago?
[fol. 2094] A. We don't handle much from Omaha to Chicago.

Q. Do you handle any?

A. Some.

Q. When was the last time you handled f. t from Omaha to Chicago?

A. I can't tell without checking the records.

Q. Will you check your records and give us an itemized statement of all shipments handled between Omaha and Chicago by your company in the last thirty days' time?

Mr. Cohn: I object to that as not having any materiality.

Exam. Carpenter: Sustained.

Mr. Nolan: Let the record show that intervenors represented by me request that this witness or some other representative of the Iowa-Nebraska Transportation Company produce for inspection a record of all shipments handled by said company between Omaha and Chicago during the last thirty days' time.

By Mr. Nolan:

Q. Now, these trucks which you said you operate on a trip-lease basis, those are trucks either handling truck loads of dairy products originating in western Iowa for eastern markets or for merchandise coming out of Chicago. Is that correct?

A. Or merchandise out of New York, yes.

Q. And those are so-called angels that go to New York with dairy products and bring back a load of something else?

Mr. Cohn: I object to the characterization and think he [fol. 2095] should be more specific.

Exam. Carpenter: Overruled.

By Mr. Nolan:

Q. You do not use these trip-lease operators in the handling of local freight?

A. Not ordinarily, no.

Q. It is only when you have a load either from the dairy product territory going east or from New York or Chicago coming west in truckload quantities that you get this trip-lease equipment?

A. You mean——

Q. I am saying that the only time you use this trip-lease equipment is when you have eggs, butter or some dairy product from the origin territory from western Iowa or eastern Nebraska destined to the eastern seaboard, New York, Boston or Philadelphia, or have a load coming out of New York or Chicago destined to some point in Iowa. Is that true?

A. We use it on backhauls.

Q. That is the only time you use this trip-lease equipment when you have a load of dairy products from the west end of your territory or a load from the east coast coming back.

A. They could be used for returns either from New York, Boston or Chicago.

Q. You do not use this trip-lease equipment on any local so-called merchandise operation. Is that true?

A. On peddle runs?

Q. Yes.

[fol. 2096] A. No, sir.

Q. Now, did you say that you engage nine of your own trucks exclusively in the handling of these dairy products which we have been talking about and do you occasionally use others of your own trucks for handling such merchandise?

A. Not very often, sir.

Q. With what frequency would you say you do?

A. It would be very slight and then only on refrigerated equipment.

Q. How many refrigerated trucks does your company have?

A. I believe it is 20. I think 3 vans.

Q. Then 20 of the 23 trailers owned by your company are refrigerated equipment for the handling of perishable products, especially dairy products?

A. True.

Q. At least 65% of your company's tonnage is truckload tonnage and are you familiar with the records of your company for the past several years that 80% of your tonnage is truckload?

Mr. Cohn: I object. It is repetitious. It is all in the record.

Exam. Carpenter: It is, as I recall, Mr. Nolan.

By Mr. Nolan:

Q. Does your company keep a record of the truckloads of dairy products which it dispatches from origin territory weekly?

A. Not weekly, no, sir.

[fol. 2097] Q. Monthly?

A. Daily.

Q. Daily.

Are those records under your supervision?

A. They are available to me.

Q. And do those records show whether or not those shipments of dairy products are handled by your company owned trucks or by the trucks which you have claimed to have sold to these owner-operators or trip-lease operators?

A. Yes, the records will show that.

Q. And will you produce for examination by me and the intervenors represented by me the daily records of your company showing the shipment of dairy products and all truckload quantities of merchandise originating in territory in which your company has authority to handle such products, showing whether such truckload shipments were handled by your company on company owned trucks or by so-called owner operator trucks or by trip-lease operators for the months of April, 1952, November, 1951, and August, 1951?

Mr. Cohn: Before I object to the request I would like to have the record clarified as to what intervenors Mr. Nolan is speaking for.

Mr. Nolan: The record shows that. I can restate it.

Exam. Carpenter: Restate it for benefit of Mr. Cohn.

Mr. Nolan: I appear as intervenor on behalf of the Em-

[fol. 2098] ployees' Association of the Rock Island Motor Transit Company and specified shippers shown by my original appearance.

Mr. Cohn: I am going to object to production of records specified by Mr. Nolan in behalf of intervenors he represents as a part of our case on the ground they are not relevant or material in this case.

Mr. Howland: Let the record show that applicant joins in this request made by Mr. Nolan.

Mr. Nolan: In behalf of my request, if your Honor please, we have now developed that of the 22 tractors which are owned and operated by this company, that five of those are owned by so-called owner-operators who use them exclusively in the handling of truckload shipments of dairy products from origin territory in Iowa and Nebraska to eastern points such as New York, Boston and Philadelphia and we have further developed that nine of the remaining 17 company owned tractors are used exclusively in rendering service on dairy products from origin territory in Iowa, which this company has authority to operate, to eastern destination points, thus leaving eight which may or may not be available for the operation of this regular motor carrier service which they claim they are operating daily and we feel we are entitled to know whether or not any more of these eight trucks are being used exclusively in a service not connected with the instant application and not available for rendering this service they claim they are rendering daily. That [fol. 2099] is the purpose of this request. We have felt all along that when we get down into the nub of this thing we are going to show that this objector has not been giving service and is not capable of giving the service. Certainly this is germane and important.

Mr. Cohn: You have a right to prove your case in any way you desire, but we are presenting our case in the manner we see fit. The witness is here under oath to answer the questions.

Mr. Nolan: Further in connection with these requests, we are not required to take an unsupported statement of this witness or any witness even though under oath

if there is documentary evidence to contradict these statements. These requests will either support his testimony or contradict it and impeach him. The cross-examination of any witness is to determine the truth of his testimony; whether he is wilfully telling a wrong story; whether he is not fully informed; or his memory is not good. We submit that wherever there is documentary proof supporting or disproving the testimony of a witness it should be made available to test the veracity of the testimony. The mere fact that this witness is under oath—if there is documentary evidence that will prove or disprove the veracity of testimony we are requesting the production of it. There are only eight trucks left, part of which may be used for the handling of dairy products—half or two-thirds of them—which goes to the very ability of this company to perform the service they say they are performing. [fol. 2100] Mr. Cohn: We certainly have a right to present our portion of the case in a manner we deem to be in the best interests of our clients. We have developed facts we think are relevant and I think it is poor taste to impugn the veracity of this witness.

Mr. Nolan: I am not questioning the veracity of this witness. I am merely trying to determine whether he is telling the truth or maybe mistaken or does not recall the facts or deliberately lying. I am not saying he is doing any of those things.

By Exam. Carpenter:

Q. Are you familiar with how these other eight trucks are used at the present time?

A. Yes, sir.

Exam. Carpenter: Objection sustained.

Find out how they are being used.

By Mr. Nolan:

Q. Of the 23 trailers your company has you say 20 are refrigerated?

A. That is my statement.

Q. That is your best recollection?

A. Yes, sir.

Q. Do you have documentary records to support that?
A. Yes, sir.
Q. You don't have any hesitation to getting documentary proof?

Mr. Cohn: I am going to object to this witness producing any documents on behalf of this intervenor not presented in the orderly presentation made of our case.
[fol. 2101] Exam. Carpenter: There has been a ruling before sustaining your objection, but not sustaining everything that might come up.

By Mr. Nolan:

Q. Isn't it fair to say that what you are testifying to is from your best recollection?
A. Correct.
Q. You are giving us the best of your recollection?
A. Yes.
Q. You may be mistaken as you were about the ownership of your trucks where you had to review your records. True?
A. Yes.
Q. And in regard to all of these things you have testified to you may be mistaken and in order to determine whether accurate or inaccurate you have to go to your records?
A. Not all statements.
Q. Well, you might to most of them?
A. I wouldn't say that either.
Q. Do you say to the best of your recollection that there are 20 refrigerated trailers?
A. Right.
Q. All equipped to handle perishable products?

Mr. Cohn: Objection. It is merely repetitious.
Exam. Carpenter: It is repetitious.

By Mr. Nolan:

Q. Now, all the tractors your company owns are equipped to handle these refrigerated trailers, are they not?
A. Yes.
[fol. 2102] Q. You testified you didn't know how many

compensation plates your company had on this equipment at the present time?

A. Correct.

Q. Would you say that none of these eight remaining tractors or trailers have ever been used within the last thirty days for handling truckloads of dairy products from origin territory in western Iowa where your company has authority to operate to the eastern seaboard?

A. Other than the nine—the remaining eight are what you refer to?

Q. Yes.

A. They have not gone to the east coast.

Q. Have they gone to any points outside the State of Iowa with truckload quantities of dairy products?

A. No, sir.

Q. Of packinghouse products?

A. No, sir.

Q. With truckload quantities of any kind or character of merchandise or freight?

A. They have moved from Omaha into the State of Iowa with truckloads of dry freight and sometimes less truckloads.

Q. Have any of these eight remaining trucks been engaged by your company in handling truckload quantities of merchandise, irrespective of the character of merchandise, for points other than points on the record on routes [fol. 2103] involved in this application during the past thirty days?

A. To my knowledge I don't recall any instances. It could be.

Q. Now, these five trucks which you claim your company sold to these truck owner-operators, they have been specified by make and number and motor number and serial number, have they?

A. We have that information. Yes, sir.

Q. They were set-up on the sales contract when sold?

A. We have that information.

Q. Now, these nine trucks which you say have been used in handling dairy products in truckload quantities, are they special so far as make, license number, etc. or are they nine trucks taken out of the pool?

A. I don't get what you mean.

Mr. Nolan: I don't think it was too clear.

Exam. Carpenter: Read the question.

(Question read.)

Mr. Nolan: I will withdraw that.

By Mr. Nolan:

Q. We got down to the point where you say you have nine trucks dedicated for the use of transporting dairy products in truckload quantities from the eastern part of Nebraska and western Iowa to the east coast. Are those nine specific trucks or are they nine trucks pulled out of the truck pool of the company?

A. No, they are used specifically for those runs going east. However, they are used for dry freight coming back. [fol. 2104] Q. I appreciate that.

Tell us what kind they are?

A. Either White or International.

Q. And they are carried by license number, serial number, etc. on your books?

A. Right.

Q. And do you have special drivers to drive those so-called long distance trucks?

A. Yes. They sometimes change.

Q. So getting back to the eight trucks which are left, you told us this morning, I believe, that your company uses five trucks in regular operation between Omaha and Des Moines. Is that correct?

A. Including the two pick-up trucks in Omaha.

Q. No, as I understood your testimony your company used five trucks on peddler operations between Des Moines and Omaha.

Mr. Cohn: I believe the witness should be able to state what the fact is with respect to those five trucks.

Witness Gracey: He is asking two questions.

By Mr. Nolan:

Q. Including Avoca.

Exam. Carpenter: Are you including everything between Omaha and Des Moines?

Mr. Nolan: Right.

A. The answer is correct. Five units, but also two pick-up units in Omaha, but not the pick-up units in Des Moines.

[fol. 2105] By Mr. Nolan:

Q. I understand your testimony now to be that there are three over-the-road trucks used between Des Moines and Omaha and intermediate——

A. No. Only one trailer unit between Des Moines and Omaha.

By Exam. Carpenter:

Q. What about the truck around Avoca?

A. I included that and in the Town of Omaha which makes five.

Exam. Carpenter: I am lost.

Mr. Fowler: I am not lost. It is perfectly plain.

By Mr. Nolan:

Q. Mr. Gracey, will you describe again for us your company's operations between Des Moines and Omaha including all points served including Avoca and Harlan?

A. That is restricted between Des Moines and Omaha?

Q. No. Everything from Des Moines west.

A. We operate five units, one of which is operated between Des Moines and Omaha.

Q. One truck between Des Moines and Omaha. Where is the origin point?

A. Des Moines is the origin point.

Q. When does that leave Des Moines?

A. Between 5:00 and 7:00 o'clock.

Q. A.M. or P.M.?

A. P.M.

Q. Does that go direct to Omaha?

A. With one exception—a stop-off at Atlantic if freight demands it.

[fol. 2106] Q. What time does that truck get to Omaha?

A. It varies. Between 10:00 to approximately 12:00 p.m.

Q. All right. What is your next operation?

That is a tractor-trailer unit?

A. Yes, sir.

That man when he arrives in Omaha drops the trailer from Des Moines, picks up a trailer and comes back to Des Moines with the same stop at Atlantic.

Q. That is one tractor and two trailers. Right?

A. Yes, sir.

Q. By the way, on these five trucks you sold to these dairy product operators, does that also include your trailers?

A. We have some trailers on there. Some have their own.

Q. How many of these five owner-operators have their own trailers?

A. To the best of my knowledge right now only one is pulling our trailers.

Q. What is the fact?

A. I don't know the fact.

Q. Would your records show?

A. Yes, sir.

Q. Will you produce your records on that subject?

Mr. Cohn: To which we object as a part of our case.

Exam. Carpenter: Sustained.

By. Mr. Nolan:

Q. All right, now, we have one tractor and two trailers [fol. 2107] on the operation between Des Moines and Omaha. Correct?

A. Yes, sir.

Q. Now what other operations do you have from Omaha into Iowa territory?

A. There is two units, one straight job and one tractor-trailer unit.

Q. That is Omaha to where?

A. Avoca, Harlan, Oakland, Harlan and points on Highway 64 between Council Bluffs and Avoca.

Q. That is one tractor-trailer and one straight job. Right?

A. Right.

Q. And they serve from Omaha to Avoca to Harlan and to where from Harlan?

A. I mentioned the towns served. The towns mentioned are Oakland, Harlan, Walnut and the towns on Highway 64 between Council Bluffs and Avoca.

Q. So then that serves everything north of Highway 6. Correct?

A. Everything north?

Q. Yes.

A. No.

Q. Well, you said it serves Avoca and Harlan.

A. The towns are not all north of Highway 6. Wait a minute. I am confused.

Exam. Carpenter: We will take a short recess.

(Short recess.)

[fol. 2108] Exam. Carpenter: We will proceed, gentlemen.

By Mr. Nolan:

Q. As I understand it your answer is that your company engages one tractor-trailer unit and one straight truck from Omaha to Avoca and Harlan?

A. That is right—out of Omaha.

Q. On a daily operation.

Do you have any other operation out of Omaha into Iowa territory?

A. On dairy products and that wouldn't be into Iowa, but to the east coast.

Q. That is included in the other group.

Do you have any other truck operation between Omaha and Des Moines other than the Omaha-Des Moines turnaround?

A. No, sir.

Q. How do you serve such points as Hamlin and Guthrie Center on Highway 64?

A. Guthrie Center is handled out of Des Moines westbound.

Q. Now, will you tell us about that operation out of Des Moines westbound?

A. The freight destined out of Omaha to any point on Highway 6 west of Atlantic and including Atlantic to Des Moines or any point on Highway 64 west of Des Moines to Guthrie Center is put on the Omaha peddle truck and carried to Des Moines where it is then taken off the trailer and put on the peddle truck. That should be east of Omaha on Highway 6.

[fol. 2109] Q. Any freight originating Omaha destined to points intermediate between Omaha and Des Moines and points beyond Des Moines would be put on the turnaround truck, Des Moines to Omaha?

A. And goes only to Des Moines.

Q. And you have another tractor-trailer unit that peddles out of Des Moines westbound?

A. Yes, sir.

Q. What territory does that peddle?

A. It covers Highway 6 to Anita and Highway 64 to Guthrie Center.

Q. And Highway 64 to Guthrie Center?

A. Yes, sir.

Q. How do you serve Hamlin?

A. That is taken off the peddle truck that runs from Avoca to as far as Glidden on Highway 30 and return.

Q. You have a peddle truck there. That is a tractor-trailer unit?

A. In some cases it is.

Q. Ordinarily the tractor-trailer unit out of Des Moines is for peddle to all points on U. S. Highway 6 as far west as Anita?

A. Yes, sir.

Q. And is that a daily operation?

A. Yes, sir.

Q. Where does it go when it gets to Anita?

A. Depending on how the traffic warrants. It may go out 64 to Guthrie Center and drop down to Anita.

[fol. 2110] Q. How does that truck get from Guthrie Center to Anita? What would be the route it travels?

A. There are two alternates—either 25 Highway or 71.

Q. How does your company handle freight to the Town of Wiota? That is between Anita and Atlantic.

A. If there is freight for Wiota it is handled off the Des Moines peddle truck.

Q. How?

A. Out of Des Moines.

Q. You mean the truck that leaves Des Moines and goes to Anita?

A. Goes west to Anita and is sometimes handled on the Avoca peddle truck.

Q. Is that a scheduled operation?

A. Yes, sir.

Q. Either out of Avoca or out of Des Moines?

A. Yes, sir.

Q. Assuming we have a shipment in Chicago destined to Wiota and leaving Chicago today. How would that shipment be delivered to Wiota?

A. It would arrive in Des Moines tomorrow morning, taken off and put on the westbound unit.

Q. You said that ordinarily that truck only goes to Anita.

A. Right. However, if traffic warrants we will go to Wiota.

Q. How do you serve points west of Atlantic between Atlantic and Council Bluffs?

[fol. 2111] A. That is peddled out of Avoca.

Q. By what unit?

A. Well, it varies. Sometimes on the unit that comes out of Omaha and sometimes on a straight job kept in Avoca.

Q. Now, you testified this morning that you had a regular scheduled operation from Des Moines to Nevada and west on Highway 30 to Denison.

A. To Jefferson.

Q. That is a daily operation?

A. Yes, sir.

Q. And is that a tractor-trailer unit?

A. In most cases it is although there is a straight job available.

Q. Where?

A. In Des Moines.

Q. Is that your pick-up truck in Des Moines?

A. We may use a tractor-trailer.

Q. But you have a tractor-trailer unit on the Des Moines-Jefferson operation?

A. We have one available.

Q. And you have an operation Des Moines to Marshalltown?

A. Yes, sir.

Q. And that is a tractor-trailer operation?

A. There again if traffic warrants a tractor-trailer unit. [fol. 2112] Q. And you have another operation Des Moines to Marengo?

A. No. We have that operation, but the same truck handles both.

Q. Are you familiar with the testimony Mr. E. S. Petersen gave at the time of the hearing on the temporary application?

A. No, sir, I am not.

Q. If he testified that your company operates a truck Des Moines to Marshalltown and Des Moines to Marengo and Belle Plaine daily, would you say he was mistaken?

A. I wouldn't say.

Q. How do you serve points east of Marengo on U. S. Highway 6?

A. That is taken care of on the Chicago truck.

Q. Chicago to where?

A. The Chicago truck usually ends up at Des Moines or Omaha.

Q. And is that a tractor-trailer operation?

A. That would be, yes, sir.

Q. Assuming that your truck got empty at West Liberty, Iowa, what would you do then? Deadhead on into Avoca?

A. That doesn't happen very often. I wouldn't want to state what would happen unless the circumstance arose.

Q. Are you familiar with testimony of Mr. Petersen in regard to what he said your operations were from Omaha to Cedar Rapids and Chicago to Cedar Rapids?

A. No, sir.

Q. If he said you had daily operations there would you disagree with him?

[fol. 2113] A. I couldn't answer unless I knew what he said.

Q. How do you say your company serves Cedar Rapids from both the west and east?

A. It would be handled out of Chicago direct to Cedar Rapids and there is a possibility of less truckload traffic being taken off at Cedar Rapids on the way to Chicago.

Q. Then you have trucks operating between Des Moines and Chicago?

A. Right.

Q. How many scheduled operations are there?

A. No set schedule.

Q. How many did you have last week operating between Des Moines and Chicago?

A. I don't know.

Q. Do you ever have over three trucks operating between Des Moines and Chicago at any one time?

A. That I can't answer. It is depending on traffic.

Q. Now, you testified that your company operates, if traffic demands, or regularly as a matter of fact, on U. S. Highway 34 between Council Bluffs and Mount Pleasant and then on U. S. Highway 218 to Cedar Rapids. How frequently would you say that operation is?

A. I don't believe I made any statements as to U. S. Highway 34.

Q. I believe you did.

A. I testified we had the rights.

[fol. 2114] Q. Does your company operate at all on U. S. Highway 34?

A. Yes, we do, but I can't tell you specific instances.

Q. What is your best judgment as to the frequency of operations of your company on U. S. Highway 34?

Mr. Cohn: I object to that question. U. S. Highway 34 is not involved in this application.

Exam. Carpenter: Overruled.

A. I can't answer the question.

By Mr. Nolan:

Q. You say your company has engaged as many as three trucks daily between Chicago and Des Moines and Des Moines and Chicago?

A. I didn't say that.

Mr. Cohn: I don't believe the witness made such statement.

By Mr. Nolan:

Q. Has your company ever operated over one truck daily between Des Moines and Chicago?

A. Yes, sir.

Q. Has your company ever operated two trucks daily between Des Moines and Chicago?

A. I would have to check the records.

Q. Would it be fair to say that your company averages two trucks daily between Des Moines and Chicago and Chicago and Des Moines?

A. Roundtrip?

Q. Yes.

A. Either originating out of Chicago——

Q. Originating out of Des Moines to Chicago and coming back?

[fol. 2115] A. I would have to check the records before I could answer.

Mr. Cohn: I believe the witness has answered and I am going to object to this as repetitious.

Exam. Carpenter: Sustained.

By Mr. Nolan:

Q. Do your records show how many trucks your company operates daily between Des Moines and Chicago and return?

A. Our records would show that. Yes.

Q. During the past thirty days' time?

A. Yes, it would show that.

Q. Now, your company operates on U. S. Highway 30, does it not—has rights to operate on U. S. Highway 30 between Chicago and Omaha?

A. Yes, sir.

Q. With what frequency is that operation conducted on U. S. Highway 30?

A. There again I would have to check the records to determine the number.

Q. Would that be a daily operation of one tractor-trailer unit?

A. I couldn't answer without checking the records.

Q. Would your records so show?

A. Yes.

Q. For purposes of approximation would you say that one tractor-trailer unit of your company is engaged there on a daily basis?

A. I wouldn't want to answer without seeing the actual records.

[fol. 2116] Q. Now, the trucks between Des Moines and Chicago are all tractor-trailer over-the-road units?

A. Yes, sir.

Q. And the same is true on U. S. Highway 30 between Chicago and Omaha?

A. Yes, sir.

Q. And whatever operation there is on U. S. Highway 34 would be by tractor-trailer units?

A. Yes, sir.

Q. Did I understand you to say that your company has some operations into Sioux City?

A. Yes, sir.

Q. Is that a scheduled operation?

A. Not regularly scheduled.

Q. Would it be a regular route operation?

A. Yes, sir.

Q. Handling general commodities?

A. Yes, sir.

Q. What route does your company operate on to Sioux City?

A. To Sioux City?

Q. Yes.

A. I can't answer that question, Mr. Nolan.

Q. What did you say?

A. I can't answer that question.

Q. You say you don't know what route you operate on there?

[fol. 2117] A. Not positively. It would be in the Certificate.

Q. Are you able to give us the frequency of that operation?

A. No, not positively.

Q. Do you advertise and hold yourself out to the public to perform a regularly scheduled service to Sioux City?

A. We advertise that we perform a service to Sioux City. We will accept freight destined Sioux City.

Q. Now, your company holds authority to operate between Iowa City and Cedar Rapids, Iowa. Is that a scheduled operation on a daily basis?

A. Between Iowa City and Cedar Rapids?

Q. Yes.

A. On interstate traffic?

Q. Yes.

A. Only out of Chicago.

Q. And if you had a substantial sized shipment or truckload of merchandise from Chicago to Cedar Rapids or vice versa, how would that be handled?

A. From Chicago to Cedar Rapids?

Q. Yes, and return if there are return operations.

A. That depends on how the tractor-trailer unit would be—we dispatch it directly to Cedar Rapids and return would be depending on the particular traffic and which terminal would need the tractor worse.

Q. Your company holds itself out to the public—adver-

[fol. 2118] tises daily freight service between Des Moines and Omaha and return—right?—and you engage one tractor and two trailers in that operation?

A. Des Moines to Omaha and return.

Q. And you advertise and hold yourself out to the public as performing a daily service between Omaha, Avoca and Harlan and points in that area and that requires one truck and trailer daily. Right?

A. Right.

Q. Your company holds itself out to the public to perform a service westbound between Des Moines—local serv-

ice as far west as Anita on a daily basis and that requires one tractor-trailer unit to handle it. Right?

A. That unit also handles Highway 64.

Q. And it gets over to Highway 64?

A. Yes, sir.

Q. Is that a daily operation on Highway 64?

A. Yes, sir.

Q. And you hold yourself out to the public to perform an operation between Des Moines via Nevada to Jefferson, Iowa, on a daily basis and that operation takes one tractor-trailer unit to handle it. Right?

A. Sometimes it does and sometimes it is a straight truck.

Q. But if you do have a tractor-trailer unit available you use it or if not there is another method and you use it?

[fol. 2119] A. Depending on traffic.

Q. And you have an operation between Chicago and Des Moines and hold yourself out to the public to handle all merchandise tendered your company on a daily basis?

A. Yes, sir.

Q. And that takes at least one and sometimes more tractor and trailer to handle?

A. Which in all cases are leased.

Q. When did you decide they are leased—just now?

A. No, it is a fact.

Q. You lease trucks Des Moines to Chicago?

A. On dry freight.

Q. What do you mean by that?

A. General commodities.

Q. When was the last time your company leased a truck to handle dry freight Des Moines to Chicago?

A. I could check the records and tell you.

Q. Would your records show that?

A. Yes.

Q. When was the last time your company transported on its own equipment freight Des Moines to Chicago?

A. I could check the records and tell you.

Q. Would your records so show?

A. Yes, sir.

Q. Will you show us those records?

[fol. 2120] Mr. Cohn: Same objection.

Exam. Carpenter: Sustained.

By Mr. Nolan:

Q. Your company not only has authority but will perform a general service on U. S. Highway 34 between Council Bluffs and Mount Pleasant and north on Highway 218 to U. S. Highway 6 and into Chicago. Is that right?

A. I believe it states that in the permit. Yes, sir.

Q. And I believe you testified your company does perform that service?

A. I don't believe I testified to that fact. No.

Q. Well, if your company did it would take one tractor-trailer unit to do that, would it not?

A. If they did perform it.

Q. You testified your company has authority and holds itself out to serve the public in general commodities between Chicago and Omaha by the use of U. S. Highway 30 direct, did you not?

A. Between what town and Omaha?

Q. Chicago and Omaha over U. S. Highway 30?

A. Right.

Q. Do you perform that service?

A. Out of Chicago, yes, sir.

Q. And from Omaha in the reverse direction?

A. As far as Glidden.

Q. Do you have another truck out of Omaha that goes to Glidden and returns?

[fol. 2121] A. That has already been mentioned.

Q. No, I didn't hear that. I don't believe you mentioned that before.

A. I did.

Q. What other points does that Glidden truck serve?

A. It is loaded on at Avoca and goes on 64 serving Denison, Vail, Westside, Carroll and Glidden.

Q. Is that a tractor-trailer unit?

A. No, a straight job.

Q. Do you ever use a tractor-trailer there?

A. It might be.

Q. Have you ever loaded a tractor out of Omaha for Denison, Vail, Westside, Carroll and Glidden?

A. Yes, sir.

Q. If you have a truck load coming out of Omaha for those points? How is that handled?

A. Loaded at Omaha and taken directly to those points.

Q. Your company holds itself out to the public and has authority to serve Sioux City on a scheduled daily basis?

A. Right.

Q. And does it serve or purport to serve that?

A. If traffic demands it, yes.

Q. And you hold yourself out to the public and purport to render all that service which we have gone into now on eight tractor-trailer units?

[fol. 2122] A. Not necessarily eight. A lot of that out of Chicago is on over-the-road trucks on backhauls from New York and Chicago.

Q. Will you tell me how you get a backhaul from Sioux City out of Chicago to points east?

A. No, I say backhauls from dairy products.

Q. I am talking about all this authority. You say your company renders a daily scheduled operation direct by these eight tractor-trailer units if traffic demands.

Mr. Cohn: He didn't say that and the record will so show.

Mr. Fowler: I move to strike the answer of counsel.

Exam. Carpenter: Overruled.

Mr. Nolan: At this time I request that a subpoena duces tecum be issued by the Examiner directed to Mr. C. A. Gracey, Vice President, Iowa-Nebraska Transportation Company, Inc., to bring with him and produce into this hearing on or before 9:30 a.m. on May 22, 1952, the following records and documents of the Iowa-Nebraska Transportation Company, Inc.:

1. The full and complete statement of balances between Iowa-Nebraska Transportation Company and all other motor carriers with which said Iowa-Nebraska Transportation Company has interlined motor freight traffic during the past two years' time.

2. The full and complete itemized statement of all the records of Iowa-Nebraska Transportation Company showing the unpaid and unsettled loss and damage claims of shippers and receivers of freight now pending with Iowa-Nebraska Transportation Company.

[fol. 2123] 3. The manifest records of the Iowa-Nebraska Transportation Company showing the outbound shipments handled by said company from Des Moines, Iowa, during the months of April, 1952, November, 1951 and August, 1951.

4. The log records of said company of drivers operating trucks out of the Des Moines terminal of said company for the months April, 1952, November, 1951, and August, 1951.

5. All freight bills and delivery receipts of the Iowa-Nebraska Transportation Company for the period of time from September 27, 1951, to April 19, 1952, the freight originating and handled by said company at Omaha, Nebraska, Des Moines, Iowa, and Chicago, Illinois, destined to points involved in this proceedings. In other words, all the freight bills of which Exhibits Nos. 31, 32 and 33 are purported to be representative shipments thereof.

6. The records of said company showing the make, motor number and license number of trucks owned and operated by said company during the months April, 1952, November, 1951 and August, 1951, and further records of said company of use said trucks were used in during said period of time.

7. The records of said company showing the amount paid by it to the State of Iowa for Iowa compensation taxes required by the provisions of Laws of the State of Iowa for regular route motor carriers for the years 1950, 1951 and thus far to date in 1952.

Mr. Howland: Applicant will join in the request for [fol. 2124] issuance of subpoena for production of these records specified in Mr. Nolan's request.

Mr. Cohn: We previously objected on behalf of Iowa-Nebraska Transportation Company, Inc., intervenor in opposition to the application, to the production of each and every one of the general classifications of documents for which subpoena duces tecum is requested by intervenors and supported by the applicant for reason that none of the documents for which subpoena duces tecum is requested is relevant to this proceeding and further none of the documents of such nature must be introduced as part of

the case of intervenor in opposition as presented in this proceeding and object to the subpoena duces tecum being issued.

Exam. Carpenter: Could the documents be introduced by Mr. Nolan and specified——

Mr. Cohn: It would be impossible to comply with the request for documents within the time specified by Mr. Nolan and in which Mr. Howland joined.

Exam. Carpenter: How long would it take to produce them?

Off the record.

(Discussion off the record.)

Mr. Cohn: It would involve an inordinate amount of expenses to intervenor we represent and as not relevant would serve no useful purpose in the issues in this proceeding and we strenuously resist the presentation of any of the documents requested.

[fol. 2125] (Discussion off the record.)

Exam. Carpenter: I will deny the subpoena.

Mr. Nolan: The record shows what the request was, does it not?

Exam. Carpenter: Yes, it does.

By Mr. Nolan:

Q. Now, Mr. Gracey, do your company's records show the breakdown of revenue from truckload shipments as distinct from less truckload shipments?

A. Yes, sir.

Q. Do your company's records show revenue derived from interline shipments as distinct from origin and destination shipments of your company?

A. As far as our revenue is concerned?

Q. Yes.

A. No, sir.

Q. How do you report to the Interstate Commerce Commission that part of your company's revenue was from truckload as distinct from interline shipments?

A. It is broken down at the end of the year.

Q. Is that an approximation or based on actual records?

A. Actual records. I took your first question as to quarterly breakdown. It is just once a year.

Q. Do your records show the revenue that your company receives from the operation of so-called peddler run from Des Moines to Anita, Iowa?

[fol. 2126] A. We could break it down, but we don't.

Q. Can you break it down?

A. We could. We never made a practice of it.

Q. Do you keep any cost records on that operation?

A. Yes, sir.

Q. Do you know what it costs your company to operate per mile in over-the-road operation in peddler service?

A. No, sir.

Q. Have you any idea?

A. We have our own idea. Yes.

Q. What is your idea?

A. Our long-hauls make up for loss sustained on peddler operation.

Q. You are sustaining a loss on peddler operation and have been for some time?

A. That is my opinion. I don't have records to prove it.

Q. Would you be able to furnish us with records showing revenue from your peddler operations between Des Moines and Anita, Iowa, for the last thirty days' time?

A. I could with research work sure.

Q. Do you also have the same information for peddler operation between Des Moines and Marengo, Iowa?

A. Originating at any particular point?

Q. Your truck originating Des Moines and destined Marengo or Belle Plaine?

[fol. 2127] A. We have that record on freight bills. I could break it down by pulling the freight bills.

Q. Could you prepare an exhibit on revenue between Des Moines and Marengo for the past thirty days' time?

Mr. Cohn: Are you asking if it could be prepared in the form of a late filed exhibit or otherwise? If for purposes of this witness to testify in this case I am going to object.

Mr. Nolan: I certainly am not going to ask any witness to prepare such statement for a late filed exhibit without having the right of cross-examination.

Mr. Cohn: We are going to object to the production of records or preparation of further exhibits in connection with the matter of costs referred to.

Exam. Carpenter: Sustained.

By Mr. Nolan:

Q. Mr. Gracey, does your company have a record showing the revenue from these various peddler operations which you described on a monthly or annual basis?

A. Broken down by peddler runs?

Q. Yes.

A. No, sir.

Q. Do you have costs of operation on either an annual or monthly basis?

A. No, sir.

Q. It is your judgment that you are losing money on peddler runs. Right?

[fol. 2128] A. I said it was my opinion. Yes.

Q. But you don't know how much?

A. No.

Mr. Nolan: That is all at this time.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Cohn:

Q. Mr. Gracey, on cross-examination by Mr. Howland, you were requested to advise if possible as to whether or not your company under 1950 operations showed an operating profit after income tax.

A. 1950?

Q. 1951, excuse me.

A. It showed a profit before income tax.

Q. Could you show the amount of profit?

A. $126.00.

Q. That was based upon a volume of revenue of what amount gross? How much gross business did your company do?

A. Over a million dollars gross revenue.

Q. Now is that a figure before or after income tax?

A. Before.

Q. And did your company pay income tax for the year 1951?

A. Yes, sir.

Q. And after payment of income tax your company showed a loss?

A. Right.

Q. What was the operating ratio of your company after [fol. 2129] income tax? Excuse me. Let me say before income tax.

A. $99.69 before income tax.

Q. You made reference to the fact that your company owns and operates 20 refrigerated tractors. That is correct, is it?

A. That is correct so far as I can determine now.

Q. Does the fact that this equipment is refrigerated mean it can be used only for the transportation of freight requiring certain protection in transit?

A. No, sir. It can also be used for dry freight.

Q. In other words, the refrigerated truck is only one that is insulated. Is that correct?

A. Correct.

Q. And you do transport all types of general commodities in these refrigerated trailers?

A. Yes, sir.

Q. Now, in your Exhibit 31 for identification you indicate the shipments which are received by your company at Omaha, Nebraska, both in interline and through service. Is that correct?

A. Yes, sir.

Q. Where shipments are shown as originating Omaha, Nebraska, with destination as a point which you are authorized to serve, is it a fact that that entire shipment was transported over your line?

A. Yes, sir.

Q. Is it also true on your Exhibit 33 indicating ship- [fol. 2130] ments originating at Chicago on your line?

A. Yes, sir.

Q. Where the origin of shipment is Chicago and destination is a point you are authorized to serve the entire transportation service is performed over your line?

A. Yes, sir.

Q. Is that also true as to Exhibit 32 as to shipments originating your line at Des Moines?

A. Yes, sir, consigned to points on our line.

Q. They moved wholly on your own line?

A. Yes, sir.

Q. Now, these various services which you testified your company is performing and which Exhibits 31, 32 and 33 are representative of, are services which you are presently performing today. Is that right?

A. Yes, sir.

Mr. Howland: I object to counsel leading and suggesting.

Exam. Carpenter: Overruled.

Mr. Cohn: That is all.

Exam. Carpenter: Recross-examination.

Recross-examination.

Mr. Howland: One question which is really further cross-examination, if the Examiner please.

By Mr. Howland:

Q. The report to the Interstate Commerce Commission—in that report there is an item under Employees and Com-[fol. 2131] pensation, Item 206, Officers, Owners and Partners, two individuals, of course, that are not named. Do you mind——

A. What schedule is that.

Q. Account 206, Administration and General Expenses, under classification of Employees and compensation, it shows there was a certain amount of money paid to two officers.

A. Right.

Q. And those two individuals are Mr. Petersen and yourself?

A. Right.

Exam. Carpenter: Is that from annual report for 1951 to the Interstate Commerce Commission?

Mr. Howland: That is correct.

By Mr. Howland:

Q. And I take it then that you and Mr. Petersen are the principal stockholders of Iowa-Nebraska Transportation Company?

A. No. There is one other. He is inactive in the company and does not draw compensation.

Q. Yourself and Mr. E. S. Petersen are actively in management?

A. We are the only ones that draw compensation.

Mr. Nolan: Further in connection with the testimony of this witness I would like to know the units available for operating various routes and will the Commission take judicial notice of the mileage of the various routes or will I prove it by this witness?

Exam. Carpenter: No, we wont take judicial notice of it. [fol. 2132] Mr. Cohn: The witness testified he didn't know as to the mileages you requested before. I think the map will show it.

Mr. Nolan: We wont waive that item but will offer other proof on it.

Exam. Carpenter: Are you all through with this witness?

By Exam. Carpenter:

Q. Does Exhibit 27 include all the interstate authority you have?

A. I believe it does. All authority involved in this hearing.

Q. It doesn't include the authority you talked about to Sioux City.

You testified you were losing money on peddle runs. That was your opinion?

A. Yes, sir.

Q. Will you continue to operate peddle runs if you lose money on them?

A. It is based on traffic. If we receive sufficient traffic to warrant our operation we will so continue and give service.

Q. Are you giving more peddle service now than you did prior to August, 1951?

A. Yes, sir.

Exam. Carpenter: Is there anything further?

Mr. Cohn: Off the record.

(Discussion off the record.)

Mr. Cohn: Now, the operations testified to in connection with service at Sioux City are contained in Exhibit 27 [fol. 2133] under the regular route description shown on the first page of the Certificate which is identified as Exhibit 27 under general commodity classification under route between Chicago and Omaha and more specifically the first paragraph of that Certificate.

By Exam. Carpenter:

Q. Under routes involved under this exhibit you hold no authority except interstate?

A. Interstate only.

By Mr. Nolan:

Q. In respect to question by the Examiner you said you were giving more service now than in 1951. As a matter of fact you have less company owned equipment now than you had then. Isn't that right?

A. I wouldn't state it that way.

Q. Well, you sold five of these tractors, did you not?

A. Those tractors are in the name of Iowa-Nebraska Transportation Company. However, they are sold and operated by leased operators.

Q. When were they sold?

A. I don't know the exact dates.

Q. You don't have any more operating authority now than you had in 1951?

A. No.

Q. You don't have any more equipment?

A. I wouldn't want to answer that question until I could find out for sure.

Q. How do you know you are giving more service if you [fol. 2134] don't know if you have more equipment or anything else? You don't know, as a matter of fact, that you give more service than you did in August, 1951.

A. In my opinion we are giving better service.

Q. Giving better or more?

A. Both.

Q. Do you have more money in the bank than you had in August, 1951?

A. I wouldn't be able to state that either.

Mr. Nolan: That's all.

Exam. Carpenter: Excused.

(Witness excused.)

OFFERS IN EVIDENCE AND OBJECTIONS THERETO

Mr. Cohn: I would like to offer Exhibits 28, 29, 31, 32 and 33.

Mr. Howland: Exhibits 28 and 29 are objected to only on the ground that it affirmatively appears that these exhibits have not been prepared or set-up in accordance with Interstate Commerce Commission accounting practices and it is therefore impossible to determine by comparison with the Interstate Commerce Commission reports the pertinence of matters set forth.

Now, with respect to Exhibits 31, 32 and 33 we desire to object to them because the denial of request made by the Examiner has not enabled us to fully cross-examine with respect thereto and we have no further objections to those three exhibits. In other words, the objection we [fol. 2135] have is really an objection to denial of our request for production of further records and the issuance of subpoenas.

Exam. Carpenter: Objections overruled. Exhibits 28, 29, 30, 31, 32 and 33, for identification, are received in evidence.

(Intervenor's Exhibits Nos. 28, 29, 30, 31, 32 and 33, Witness Gracey, were received in evidence.)

Mr. Nolan: Let the record show that I join in the same objection as Mr. Howland and for further reason they are not properly identified and full and complete cross-examination has not been had because of denial of production of records and subpoena of the records in connection with them.

Exam. Carpenter: Proceed.
Mr. Fowler: Mr. Harlan.

E. W. HARLAN was sworn and testified as follows:

Direct examination.

By Mr. Fowler:

Q. Will you announce your name, please?
A. E. W. Harlan.
Q. Your address?
A. 1009 58th Street, Des Moines.
Q. The organization with which you are connected?
A. Bruce Motor Freight, Inc.
Q. Where is Bruce Motor Freight, Inc. located?
A. In Des Moines at 2011 Easton.
Q. What is your capacity?
[fol. 2136] A. President and General Manager.
Q. As such are you in charge of active management of the business of the company?
A. Yes, sir.
Q. And how long have you been so engaged?
A. Approximately 8½ years.
Q. Now, generally speaking what is the scope of operation of Bruce Motor Freight, Inc. in so far as it is limited to the territory immediately involved under the present application?
A. We have a north and south operation and the towns involved would be Pella and Oskaloosa.
Q. In connection with the immediate application you are authorized and do actually serve Pella and Oskaloosa, Iowa?
A. Yes, sir.
Q. Do you have an operation serving St. Louis?
A. Yes, sir.
Q. Kansas City?
A. Yes, sir.
Q. Des Moines, Iowa?
A. Yes, sir.

Q. What is generally described as the Twin Cities?

A. Right.

Q. In connection with service to the Town of Pella, Iowa, how do you presently serve Pella?

A. We peddle off the road truck on route between Des [fol. 2137] Moines and St. Louis. That is to an agent at Pella.

Q. In other words, you have a commission agent at Pella?

A. Yes, sir.

Q. And freight destined to consignees at Pella is delivered to the agent from your truck?

A. Yes, sir.

Q. What is it at Oskaloosa?

A. Same thing.

Q. Do you have a commission agent at Oskaloosa?

A. Yes, sir.

Q. And that service is performed on highway truck, I presume, between St. Louis and Des Moines?

A. Yes, sir.

Q. In both directions?

A. Right.

Q. Now, appearing here as a witness in this proceeding was a representative of the Rolscreen Company, Paul Farber. What is the fact whether or not you perform a service from the Rolscreen Company on wood products and how is it handled?

A. Our agent is used in Pella. We have worked out an agreement together where he brings it to Des Moines to our dock and we load it on our trucks going outbound from Des Moines.

Q. In other words, rather than to interrupt your over-the-road trucks at Pella you made an arrangement with the Rolscreen Company and your agent at Pella to bring it to Des Moines?

[fol. 2138] A. Right.

Q. What is your opinion as to whether that is an improvement over the other method?

A. It is an improvement. We can guarantee a load out on over the road the day it is brought in. Also some pieces at Pella we were not able to get in the truck because the truck was partially loaded when it got to Pella.

Q. With respect to Oskaloosa there appeared here as witnesses representatives of Ideal Manufacturing Company and Iowa Valve Company. Are you acquainted with those companies?

A. Yes, sir.

Q. Do you perform services for them?

A. Yes, sir.

Q. Have you ever had a request to serve those two organizations that you have not complied with?

A. Not to my knowledge.

Q. Now with respect to other operations. Kansas City. Do you have tendered to you at Kansas City, on occasion, shipments destined to points located on U. S. Highway 6 either east or west of Des Moines?

A. Yes, sir.

Q. At what point do you transfer those to delivery carrier?

A. Des Moines.

Q. And what has been your experience as to your ability to interline freight at Des Moines with other carriers?

[fol. 2139] A. No problems.

Q. With what carriers do you interline?

A. Des Moines Transportation Company, Iowa-Nebraska Transportation Company, Roberts Transfer, Rock Island Motor Transit.

Q. Within the last six months has any complaint come to your attention with respect to service available for that type of shipment?

A. No, sir.

Q. Do you have any trouble getting rid of your interline at Des Moines, east or west, originating at Kansas City?

A. No.

Q. Take the operation from St. Louis. Do you have tendered to you at St. Louis, on occasion, shipments destined to the same points on U. S. Highway 6?

A. Yes, sir.

Q. Is the transfer point there Des Moines?

A. Yes, sir.

Q. What has been your experience with respect to interline with other carriers?

A. No problem.

Q. And is the same true in respect to your operation from Kansas City?

A. Yes, sir.

Q. With respect to your operation from the Twin Cities, do you have tendered to you, on occasion, shipments destined [fol. 2140] to the same points on U. S. Highway 6?

A. Yes, sir.

Q. What is the point of interchange?

A. Des Moines.

Q. What experience have you had with respect to your ability to interline that traffic with other carriers?

A. No problem.

Q. Have you had complaints with respect to service you have been able to afford on those shipments?

A. Not to my knowledge.

Q. Now you conduct an overhead service on general commodities from Kansas City to Des Moines?

A. Yes, sir.

Q. Des Moines to the Twin Cities?

A. Yes, sir.

Q. What is the situation with respect to balancing your movement at Kansas City?

A. Kansas City is pretty well balanced.

Q. What is the situation with respect to balancing your movement at the Twin Cities?

A. About 25% light southbound.

Q. Do you mean coming out of the Twin Cities?

A. Running 25% light out of the Twin Cities southbound.

Q. Do you know of your own knowledge within the last month you have had reason to return units from the Twin Cities to other points empty?

[fol. 2141] A. Yes, sir. Two weeks ago Monday and today. Two weeks ago last night we returned three empty to Des Moines and two weeks ago tonight one out empty.

Q. What is the situation with respect to balancing the movement in connection with St. Louis?

A. About 60-40. I mean 40% light into St. Louis.

Q. Do you find it necessary to run units to St. Louis empty or substantially so in order to have them available for outbound traffic?

A. Yes, sir.

Q. What is your competition between the Twin Cities and Des Moines and Kansas City by rail aside from the Rock Island Railroad and the Rock Island Motor Transit Company?

A. By rail?

Q. What is your railroad competition?

A. I can't give all of that.

Q. Are you familiar with railroad competition from Kansas City to Des Moines other than the Rock Island?

A. No other service.

Q. With respect to St. Louis to Des Moines, what is the railroad competition?

A. Wabash, but I don't know the service they give.

Q. You do know that there are railroads serving all of those points and between those points other than the Rock [fol. 2142] Island Railroad and the Rock Island Motor Transit Company?

A. Right.

Q. What is your motor carrier competition between the Twin Cities and Des Moines?

A. There are eight common carriers.

Q. Name them, please.

A. Our line, Bos Freight, Rock Island Motor Transit, Brady Transfer & Storage Company, Des Moines Transportation Company, Merchants and Watson Bros.

Q. Do you know of your own personal knowledge that they are actively and actually engaged in the operation in that area?

A. Yes, sir.

Q. What is your competition between Des Moines and Kansas City?

A. Merchants, Bos Freight, Brady Transfer & Storage, Knaus Truck Lines and Watson Bros.

By Mr. Howland:

Q. How about Burlington Transportation?

A. Yes, Burlington Transportation Company. Well, no.

By Mr. Nolan:

Q. Worden?

A. We don't consider them competitors.

By Mr. Fowler:

Q. You don't consider Burlington Transportation Company a competitor?

A. Not between Des Moines and Kansas City because they do not operate direct.

Q. And you don't consider Worden competition?

A. No.

[fol. 2143] Q. Do you know of your own personal knowledge whether those carriers are actively engaged at the present time in motor carrier service?

A. Yes, sir.

Q. With respect to St. Louis and Des Moines, what is your competition?

A. Merchants, Watson Bros., Brady Transfer & Storage, Gateway Transfer and again Burlington Truck does have authority from Des Moines to St. Louis, but it is via Quincy or Galesburg and we do not consider them competitors.

Q. Is Rock Island Motor Transit regarded as competitive with you between Des Moines and St. Louis?

A. Not at the present time.

Q. Are they between Des Moines and Kansas City?

A. Yes, sir.

Q. And competitive between Des Moines and the Twin Cities?

A. Yes, sir.

Q. For the record will you give us the Interstate Commerce Commission identification of your Certificate of Public Convenience and Necessity?

A. MC-52310.

Q. In addition to the operations just described do you perform a local service on interstate traffic out of Des Moines to Centerville, Iowa?

A. Yes, sir.

[fol. 2144] Q. And in addition to Des Moines and Centerville what points are served?

A. Do you mean out of Des Moines?

Q. Yes.

A. Indianola, Van Wert, Weldon, Leon, Humeston, Corydon, Promise City, Perry——

Q. Do you also have a local operation to Perry?

A. That's right, Perry and Madrid and Woodward.

Q. What is the Crooks Terminal Warehouse at Kansas City?

A. I am not too familiar with the Crooks Terminal Warehouse. They do general merchandise, I understand.

Q. Did you ever have any demand from them for service?

A. Not to my knowledge.

Q. Did you ever have any call that you did not perform?

A. No.

Q. Are you familiar with the Montgomery Ward installation at Kansas City?

A. Yes, sir.

Q. What is the fact whether or not you are now performing a service for them?

A. We are.

Q. Do you recall any incidents within a seasonable period wherein they complained about your service?

A. No.

Q. Are you acquainted with Mr. B. J. Kilmer of the [fol. 2145] Sinclair Oil Company?

A. No.

Q. Did you ever have a call from him that you have not performed?

A. Not to my knowledge.

Q. Are you familiar with Janney Semple Hill Company at Minneapolis?

A. Yes, sir.

Q. Are you performing service for them now?

A. Yes, sir.

Q. Have you had demands for service that you have not been able to perform from them?

A. Not to my knowledge.

Q. Do you know Mr. Lindberg of Minneapolis, Minnesota?

A. No. I know his company.

Q. What is the company?

A. Is it Minnesota Builders?

Q. Frankly I don't know.

A. I thought you meant Minnesota Builders. I don't know the gentleman anyway.

Q. Are you familiar with Brown Camp Hardware of Des Moines?

A. Yes, sir.

Q. Do you perform transportation service for them?

A. Yes, sir.

Q. From, to and between either St. Louis, Kansas City and the Twin Cities?

[fol. 2146] A. Wherever they have anything moved by our line.

Q. Are you familiar with Des Moines Drug Company?

A. Yes, sir.

Q. And do you perform transportation service for them?

A. Yes, sir.

Q. To and from the same points?

A. Yes, sir.

Q. Luthe Hardware?

A. Yes, sir.

Q. Have you ever had any call made to you from the Overalls Manufacturing Company in Des Moines?

A. Yes, sir.

Q. Have you ever at any time had any complaint from these shippers or any of them with respect to service you have given them either to Kansas City, St. Louis or the Twin Cities?

A. I remember no complaint.

Q. Now, you are also authorized to serve the City of Mason City, are you not?

A. Yes, sir.

Q. And at the present time on shipments tendered you how is that handled?

A. We bring it to Des Moines from St. Louis and Kansas City and turn it over to Des Moines Transportation Company.

Q. Does Des Moines Transportation Company conduct a service in interstate as well as intrastate commerce from Des Moines to Mason City?

[fol. 2147] A. Yes, sir.

Q. So with respect to shipments from Kansas City or St. Louis you interline with Des Moines Transportation Company and they handle it on local service to Mason City?

A. Right.

Q. Did you ever have any demand for service as regards Mason City that you refused to perform?

A. No, sir.

Q. Are you familiar, Mr. Harlan, in a general way with the application which is presently under review here?

A. Yes, sir.

Q. If it should appear that by reason of the grant of authority sought in this application that the Rock Island Motor Transit Company could conduct an all out motor carrier service between Kansas City, Des Moines and the Twin Cities, without any restrictions whatsoever, as well as to conduct an all out auxiliary and supplemental service to its train service, what effect do you think it would have on Bruce Motor Freight?

Mr. Howland: Now, I am going to object to that as accumulative in form, immaterial and irrelevant, calling for an opinion and conclusion of the witness on an immaterial issue and relating to a territory not directly involved in this application.

Exam. Carpenter: Objection overruled.

[fol. 2148] A. I think it would have a very serious effect on our company if such a situation existed because of so many advantages they could have over us by having a difference in rates. If their trucks were in the Twin Cities—say they have three there—and they have to get back to Des Moines with no freight they could go to the rail and get freight for them. They would have a very distinct advantage over our truck operation. In my opinion it would be a brand-new truck line starting up in business between the Twin Cities and Kansas City.

Mr. Howland: I move to strike the answer for reasons urged in my objection and for additional reason it is an argumentative reason of the witness.

Exam. Carpenter: It is the witness' opinion. Objection overruled.

By Mr. Fowler:

Q. At the present time the Rock Island Motor Transit Company holds authority to operate motor vehicles as auxiliary or supplemental to rail service or to their train service?

A. Yes, sir.

Q. Between Kansas City and Des Moines and between Des Moines and Minneapolis, but because of keypoint restrictions in their Certificate they cannot conduct an all-out rail-truck service between the Twin Cities and Kansas City?

Mr. Howland: You don't mean that, Mr. Fowler.

Mr. Fowler: Can you?

[fol. 2149] Mr. Howland: Sure.

Mr. Fowler: As I understand it the keypoint restriction at Des Moines does not prevent the handling of traffic on rail freight by truck from the Twin Cities to Kansas City.

Mr. Howland: That is correct, if we desire to do it. I don't think we are doing it.

Exam. Carpenter: That is because you can only move freight through one keypoint.

Mr. Howland: It is handled Omaha, Davenport or Chicago.

By Mr. Fowler:

Q. Well, Mr. Harlan, assuming that the authority of Rock Island Railroad remains as it now is, namely merely the authority to use motor vehicles for auxiliary and supplemental service to train service, would you regard that as seriously competitive in your opinion?

Mr. Nolan: Just a minute. In what respect?

Mr. Howland: I object for reasons urged in previous objection and further it is invading the province of the Commission.

Mr. Fowler: Let me withdraw the question.

By Mr. Fowler:

Q. Will you state your opinion, if you have one and care to express it, as to whether or not an operation by Rock Island Motor Transit Company which is limited strictly to auxiliary and supplemental train service would be competitive with Bruce Motor Freight?

Mr. Nolan: That is objected to as wholly irrelevant and immaterial to any issue in this case, particularly as to any [fol. 2150] operation of Rock Island Motor Transit Company between Des Moines and the Twin Cities or Des Moines and Kansas City, or in reverse order, because the company has no such restrictions in its operations and for further reason that these operations have been conducted for many years without such restrictions. The question is wholly immaterial and calls for a wholly immaterial answer. It seeks to go into a question and issue not involved in this proceeding.

Mr. Howland: I join in the objection that it is immaterial to any issue.

(Discussion off the record.)

Exam. Carpenter: Read the question.

(Question read.)

Mr. Fowler: That is the question.

Mr. Howland: We will stand on the objection.

Exam. Carpenter: I will sustain the objection then.

Mr. Fowler: You may examine.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Howland:

Q. Mr. Harlan, about how long is it you have been connected with Bruce Motor Freight?

A. 8½ years about.

Q. And that was an operation that was started by a man by the name of Bruce, I believe, wasn't it?

A. Yes, sir.

[fol. 2151] Q. And do you know about what the total number of ton miles of freight handled by Bruce Motor Freight was at the time you became connected with it?

A. No, sir.

Q. Is it not true that your business has grown very substantially in the last 8½ years?

A. I assure you it has. All businesses have.

Q. And about how many times over would you say the gross business—gross volume of business you are handling now is compared with the gross volume of business you were handling when you became connected with Bruce Motor Freight?

A. I wouldn't want to say. I don't know offhand. I don't know what it was when I took it over. There have been a lot of changes in everything.

Q. It has substantially increased?

A. It has grown.

Q. Of course, you don't have any operations on U. S. Highway 6 except to go across it?

A. Right.

Q. And you don't render any service to any point on U. S. Highway 6 between Silvis and Omaha except at Des Moines?

A. That is right, except by interline at Des Moines. We serve points on Highway 6 by interline carriers.

Q. You don't render any direct service?

A. No.

[fol. 2152] Q. You say carriers with which you interline at Des Moines for points on U. S. Highway 6. In recent years those have been what lines?

A. Des Moines Transportation Company, Iowa-Nebraska Transportation Company and Rock Island Motor Transit and Roberts Transfer.

Q. And what points located on U. S. Highway 6 does Des Moines Transportation Company have authority to serve?

A. The ones I am familiar with are Newton and Iowa City. That is where we interline freight.

Q. Has there been any change in your practice with respect to interline with Rock Island Motor Transit or other carriers in the last eight or ten months?

A. No material change. We have had routing come in showing Des Moines Transportation or Iowa-Nebraska Transportation and some still show Rock Island Motor Transit.

Q. You know that Des Moines Transportation Company

serves only a relatively few points on Highway 6, do you not?

A. I wouldn't say.

Q. They serve Iowa City, Davenport and Newton?

A. Yes, sir.

Q. Are you familiar with any other points they serve?

A. I am not sure of Grinnell.

Q. How about intermediate points?

A. Like——

Q. Ladora, Marengo——

[fol. 2153] A. I am not familiar with us having any shipments for those towns.

Q. Oxford, Tiffin, Stuart?

A. We have some shipments for Stuart. Offhand I can't tell you who we gave them to.

Q. Is it a fact that you have concentrated in your operation of Bruce Motor Freight in service to larger centers of population?

A. Not necessarily. We serve those points, but there is not much demand for our service because they get most of their merchandise from Des Moines. Salesmen call on them from Des Moines.

Q. You concentrate on places like Des Moines, Ottumwa, St. Louis, Kansas City, Des Moines, Mason City and the Twin Cities. Is that not true?

A. That is the main part of our business, but we still take care of shippers in small towns. If we have freight moving to small towns we certainly take care of it the same as if it was going to Des Moines.

Q. You have authority to serve Mason City as I understand it?

A. Right..

Q. And on business from St. Louis destined Mason City you are delivering it to Des Moines Transportation Company?

A. Most of it.

Q. You are not performing that yourself?

A. We are if we have enough so we can deliver it off the over-the-road trailer—five thousand pounds.

[fol. 2154] Q. If you get a shipment of five hundred

pounds you turn it over to Des Moines Transportation Company?

A. Right.

Q. Do you have any authority to serve the intermediate points between Des Moines and Mason City?

A. Yes, sir.

Q. Over what route do you operate?

A. 69 and 65.

Q. Do you have authority on both routes?

A. Yes, sir.

Q. And over which route do you customarily send your trucks?

A. 69.

Q. And do you have any regular service you perform on U. S. Highway 65—regularly scheduled service?

A. We have.

Q. I mean daily or five days a week service?

A. No.

Q. Your service goes north out of Des Moines to Ames, thence up through Jewell and up to Blairsburg and up to Garner and to Mason City?

A. From Garner up 69 and into Mason City.

Q. On Mason City could you use Highway 65?

A. Right.

Q. You don't have any authority on U. S. Highway 218 between Grinnell and Mason City?

[fol. 2155] A. No.

Q. Well, you serve Pella, as I understand it, and always have off your over-the-road units from St. Louis?

A. Right.

Q. What is your usual service between St. Louis and Des Moines? What service do you perform there?

A. Overnight daily.

Q. How many trucks do you customarily operate?

A. Five.

Q. Out of St. Louis to Des Moines?

A. That is on regular schedule.

Q. And if you have additional business you put on additional trucks.

A. Right.

Q. How many trucks do you have out of Kansas City to Des Moines?

A. From four to six.

Q. How many trucks do you have regularly out of the Twin Cities and Des Moines?

A. Five and up.

Q. A minimum of five in each direction?

A. Right.

Q. Now, even though you have five trucks operating between St. Louis and Des Moines and Des Moines to St. Louis on a daily basis you do not have any peddle service to the towns intermediate between Des Moines and Pella on U. S. Highway 163?

[fol. 2156] A. No.

Q. You perform no service at those points?

A. No we don't.

Q. Do you perform any service to points between Oskaloosa and Ottumwa?

A. No. Not to my knowledge at least, we just never have requests for that service on interstate. Those little towns are all served out of Des Moines on intrastate carriers.

Q. What route do you take out of Ottumwa in going to St. Louis?

A. 34 to Mount Pleasant.

Q. And then south?

A. South through Donnellson.

Q. Do you serve Fairfield?

A. No.

Q. Do you serve Mount Pleasant?

A. No.

Q. Your truck goes right through those towns?

A. Right.

Q. And you don't stop there at all?

A. We have no requests. If we have a shipment for Mount Pleasant or Fairfield it might be a hundred or a hundred and fifty pounds once a week.

Q. You don't have an agent in those towns?

A. No. We don't have the business to keep an agent.

Q. Now, down at Pella this arrangement you say was [fol. 2157] worked out to have the local drayman down

there bring shipments into Des Moines, was that an arrangement made sometime about in July or August, 1951?

A. I would say sometime last summer.

Q. As a matter of fact was that not made at the time the 2000 lb. minimum limitation was imposed on the Rock Island Motor Transit operation?

A. Not to my knowledge. The way I made the deal with the transfer company was they wanted to handle it that way at that time. They said it would be more satisfactory to them and they knew they could get it there overnight. And sometimes we didn't have room for it due to bulkiness.

Q. As I understand it what you are doing is this. You are picking up shipments at Pella destined both south and north and the drayman is bringing it into Des Moines to your dock and you are loading them here?

A. Right.

Q. So a shipment destined St. Louis out of the Rolscreen Company would have to be delivered by your drayman to your dock here and your employees put it in the over-the-road truck?

A. Right. In other words, it is an overnight service that way from Pella to St. Louis.

Q. And I take it you also handle shipments destined to the Twin Cities in the same manner, of course?

A. That's right.

[fol. 2158] Q. Does this transfer company that you have down at Pella have any motor carrier authority from the Interstate Commerce Commission?

A. Yes, sir.

Q. What is their number, do you know?

A. I don't know.

Q. What is the name of the carrier?

A. Andeweg Transfer.

Q. On what basis is this carrier compensated?

Mr. Fowler: Object to that as immaterial.

By Mr. Howland:

Q. Does the Andeweg Transfer participate in your traffic or do you pay him by private arrangement?

Mr. Fowler: Object to that as immaterial.
Exam. Carpenter: Overruled.

A. Through rate is charged from Pella to St. Louis. We pay them prorate for their share for bringing it to Des Moines.

Q. Are they parties to tariff of the Middlewest Motor Freight Bureau?

A. It is my understanding they are.

Q. Now at the time you became interested in the Bruce Motor Freight did you make some financial investment in the enterprise?

Mr. Fowler: Object to that as immaterial. After all this is a convenience and necessity case.

Exam. Carpenter: Sustained.

[fol. 2159] Witness Harlan: I would like to correct one thing regarding the tariff. We bill the shipper or consignee, whoever pays the freight, the actual freight—our rate from Pella to St. Louis and we pay him as a drayage rate. I am not sure whether he is in the tariff or not.

By Mr. Howland:

Q. At least you don't pay him as an interline carrier?

A. I take it from actions here he is not.

Q. At the time you became associated with Bruce Motor Freight and interested as one of the owners of it, what was the fact as to whether the Rock Island Motor Transit Company had unrestricted motor carrier authority on U. S. Highway 6?

Mr. Fowler: Object to that as immaterial to any issue in this case, calling for opinion and conclusion of the witness and not the best evidence.

Exam. Carpenter: Objection overruled.

A. I can't tell you. That is too far back. I don't know what the situation was on Highway 6.

By Mr. Howland:

Q. As a matter of fact you know that all during the time you were associated with Rock Island Motor Transit and up until the end of August, 1951, that the Rock Island Motor Transit Company was operating as a carrier in interstate commerce without any restrictions as to size of shipments handled?

Mr. Fowler: Object to that as incompetent and imma- [fol. 2160] terial, calling for an opinion and conclusion of the witness and not the best evidence.

Exam. Carpenter: Objection overruled.

A. I never did check into the authority they had. The only connection I had with them was when freight we had come here routed over their line and turned over at Des Moines.

By Mr. Howland:

Q. And you were not particularly interested in what their authority was so long as they would take your interline shipments?

Mr. Fowler: Immaterial.

Exam. Carpenter: Overruled.

A. I was interested in their operations Des Moines-Twin Cities and Kansas City because for years when railroad rates were five or six cents below us we lost these accounts going to Kansas City. They took it on their trucks and billed it rail. They could get the same service into Kansas City that we could give them and at cheaper rates.

By Mr. Howland:

Q. Has there always been a little separation between rail and freight rates?

A. Not always.

Q. Do I understand, Mr. Harlan, that you contend that the Rock Island Motor Transit Company has at any time

hauled freight by truck on rail billing between Kansas City and Des Moines?

A. Between the Twin Cities and Kansas City. We were told the reason by the traffic managers and it was because the Rock Island Motor Transit Company gave second [fol. 2161] morning service by truck on rail billing.

Q. Do you have any knowledge to the effect that Rock Island Motor Transit Company has hauled any rail freight between Kansas City and Des Moines?

A. Not personal knowledge. That is only what I have been told as the reason we lost the business.

Q. Now, at Oskaloosa—you serve Oskaloosa, as I understand it, with your over-the-road units?

A. Yes, sir.

Q. You have no peddle service between Ottumwa and Oskaloosa or Oskaloosa and Des Moines?

A. No.

Q. And those units go through Oskaloosa at about what time?

A. It varies. It is during the night—after the ordinary working day.

Q. During the night both ways?

A. Yes, sir.

Q. Sometime around 4:30 or 5:00 in the morning on the northbound and 11:30 or 12:00 on the southbound?

A. In that neighborhood.

Q. Are you familiar with the so-called substituted tariff or motor carrier—motor service on rail billing?

A. No.

Q. Have you ever sought to handle any of that business [fol. 2162] between Kansas City and Des Moines—hauling rail freight on trucks?

A. No.

Q. And you are not familiar with the provisions of that tariff?

A. Very slightly. Not enough to go into it.

Mr. Nolan: I want to ask some questions to lay the foundation for request for some documents.

By Mr. Nolan:

Q. Mr. Harlan, on all shipments which your company turns over to interline carriers you have a record, do you not, of the shipment and the date it is turned over?

A. Yes, sir.

Q. And that is carried on pro number?

A. Yes, sir.

Q. Do you have any record of when that shipment is delivered to destination?

A. By connecting line?

Q. Yes.

A. No.

Q. Now, all of your freight bills and records within the past year's time are available, are they not, for inspection by properly constituted authority? And also available to you as President of Bruce Motor Freight? True?

A. Yes, sir.

Q. Has there been any change in turning over shipments by your company to the Iowa-Nebraska Transportation Company in the past thirty days' time?

[fol. 2163] A. Not to my knowledge.

Q. Did your company turn over any shipments to Iowa-Nebraska Transportation Company prior to 1951?

A. I assume so. I can't tell you exactly. We have done business with Iowa-Nebraska for some time.

Q. Would you say the service rendered by Iowa-Nebraska Transportation Company has been satisfactory?

A. I have no personal knowledge of any complaints ever given them.

Q. Would you say a shipment turned over to Iowa-Nebraska Transportation Company at Des Moines some time prior to November 20, 1951, and delivered in Iowa City on November 27, 1951, was satisfactory?

Mr. Fowler: Object to that as immaterial—too remote in period of time.

Exam. Carpenter: Overruled.

A. I would say a lot of things would have to be taken into consideration. There were snow storms and blocked roads and a lot of things that could happen.

By Mr. Nolan:

Q. Would you say a shipment turned over by your company to Iowa-Nebraska Transportation Company on December 28, 1951, and delivered January 3, 1952, was satisfactory?

A. I would say that was in part due to holidays. There were delays of all kinds and sometimes shippers were closed up.

Q. Will you produce your freight bills for the following [fol. 2164] Pro Numbers?

Mr. Nolan: At this time intervenors represented by me request Mr. Harlan to produce freight bills of his company with the following Pro Numbers: S-87012——

(Discussion off the record.)

Mr. Nolan: —K-122092; S-91666; S-120523; S-81733; K-79763; S-76421; K-76555; S-74356; K-108650; S-75038; 72889; S-11848; S-118927; S-73394; S-73588; S-73767; S-73768; S-119050.

At this time intervenors represented by me move the Examiner to require the Witness Harlan to produce the freight bills which have been enumerated above with respective Pro Numbers for inspection by me and parties represented by me in connection with cross-examination of Mr. Harlan.

Mr. Fowler: And upon condition of this record the request is wholly unjustified. It is purely a fishing expedition—an attempt to get clerical work done for them rather than to make their own investigation. It is to determine whether convenience and necessity in this case requires the granting of the application and Mr. Harlan or any other witness is not required to do a lot of physical work to satisfy the whim of some attorney.

Mr. Nolan: This is to the operations of Iowa-Nebraska Transportation Company and these Pro Numbers will refer to freight bills tendered by Mr. Gracey of the Iowa-Nebraska Transportation Company and the request for production of said freight bills is to determine the expe- [fol. 2165] ditiousness or lengthiness of time from the time of shipment by Bruce Motor Freight to Iowa-Nebraska

Transportation to point of destination and is certainly material and relevant as to whether or not there is adequate service available in the territory involved.

By Exam. Carpenter:

Q. Do your freight bills show the time shipments were turned over to the Iowa-Nebraska Transportation Company?

A. I am not sure. He picked out a couple of dates where we had bad weather. I don't think that is unreasonable service. I can't tell if those particular ones do.

Exam. Carpenter: You said date and then you said time. Are you talking about the date or the actual time?

Mr. Nolan: I meant the date when they were turned over to Iowa-Nebraska.

Exam. Carpenter: How many bills are there?

Mr. Nolan: 18.

Witness Harlan: I might add this for the Examiner. I know we are behind in our work. We are short of help and it is vacation time and any additional work like this will put us further behind.

By Exam. Carpenter:

Q. How long would it take you to produce 18 bills?

A. Not very long if the work was all done up.

Exam. Carpenter: I require you to produce them.

[fol. 2166] Mr. Fowler: When does he have to produce them?

Mr. Howland: The bills would be here in Des Moines if the interchange is here.

Exam. Carpenter: He should be able to produce them by tomorrow afternoon.

Mr. Fowler: Mr. Examiner, at the present time it is my inclination to decline to accede to your order. I do, however, wish to reserve my final decision until tomorrow morning.

Exam. Carpenter: You may do so.

By Mr. Nolan:

Q. Mr. Harlan, will you state the volume in percentage of your company's business on interline operations?

A. About 60-40.

Q. 60% direct on your line?

A. 40% direct and 60% interline.

Q. And Des Moines is one of your principal interline points?

A. No, I would say it is not.

Q. Is it a substantial interline point?

A. Yes. Kansas City is the largest. We only have four.

Q. Does your company have a record of all freight bills showing interline operations with Iowa-Nebraska Transportation Company?

A. We have all bills for the past year.

Q. Would they show shipments interlined with various shippers including Iowa-Nebraska?

A. Delivery and received date.

Q. You keep those as permanent records of your company?

[fol. 2167] A. Right, but they would be by Pro Number, not by carriers.

Q. How frequently would you say your company turns a shipment over to Iowa-Nebraska Transportation Company for delivery to destinations on U. S. Highway 6 between Omaha, Nebraska, on the one hand, and the Tri Cities on the other?

A. I would say daily.

Q. Then will you produce for examination by me and the parties I represent delivery receipts or freight bills showing all of the shipments which have been transferred by your company to Iowa-Nebraska Transportation Company at Des Moines for delivery to destination by Iowa-Nebraska Transportation Company to points on U. S. Highway 6 between Omaha, Nebraska, on the one hand, and Davenport, Iowa, on the other, for the months of April, 1952, November, 1951, and August, 1951? Will you produce those?

Mr. Fowler: I will instruct Mr. Harlan to refuse to produce the documents.

A. We cut about 800 bills a day and we would have to go through all of the bills to find which delivery receipts were given to Iowa-Nebraska.

Mr. Nolan: I move to strike the answer as not responsive to the question. It is argumentative.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: Motion to strike is overruled.

Mr. Fowler: May I interpose a question or two to Mr. [fol. 2168] Harlan as basis for an objection?

Exam. Carpenter: You may.

By Mr. Fowler:

Q. How much labor will it entail to be able to respond to that request?

Mr. Nolan: We object to any interrogation of this witness as wholly immaterial on such points as that it might be difficult to produce as a valid objection. They come here and say they give a service that is daily and we have a right to determine whether that is true or untrue from documentary records. The fact they are difficult to produce is no reason why they should not produce records here in Des Moines.

Witness Harlan: I have had no direct complaints that I know of on interline on U. S. Highway 6 and if they were serious I would know of it. I can assure you of that.

By Mr. Fowler:

Q. I asked you a question. Describe the amount of labor it would entail to respond to the request made by Mr. Nolan and he interrupted me.

Mr. Nolan: I make the same objection.

Exam. Carpenter: Go ahead.

A. It would be pretty hard to state due to sorting through all of the freight bills you would have to. It might take a couple of girls a week or a week and a half. They would have to go through 800 bills a day.

Mr. Nolan: At this time the intervenors represented by me request that a subpoena issue to Mr. Harlan, the

[fol. 2169] man on the witness stand, directing him to produce and bring with him into this hearing on or before noon of the 22nd day of May, 1952, all freight bills and delivery bills of his company showing shipments transferred by him to the Iowa-Nebraska Transportation Company at Des Moines for delivery by said Iowa-Nebraska Transportation Company to points on U. S. Highway 6 between Omaha, Nebraska, on the one hand, and Davenport, Iowa, on the other, for the month of August, 1951.

Exam. Carpenter: I will reserve my judgment on that until tomorrow morning.

Mr. Cohn: For the record I would like to join in Mr. Fowler's objection to the subpoena.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Nolan: Let the record show that I request that Mr. C. A. Gracey who was on the witness stand today representing the Iowa-Nebraska Transportation Company be present at the hearing tomorrow for further cross-examination with respect to freight bills which were tendered in connection with Exhibits 31, 32 and 33 because I did not have an opportunity to examine them until after he got off the witness stand today.

Mr. Cohn: Intervenors in support of the application had ample opportunity while Mr. Gracey was still on the stand to request that Mr. Gracey be continued in his appearance here. Mr. Gracey was excused. This afternoon he came [fol. 2170] here prepared to spend the day in this proceeding in behalf of Iowa-Nebraska Transportation Company. He has an engagement in Chicago tomorrow morning and is unable to stay over here for further cross-examination. I am also unable to stay over.

Mr. Howland: May the record show that Mr. Gracey is still present in the hearing room.

Mr. Cohn: We will accede to that at this time. I am unable to be here tomorrow and Mr. Gracey is unable to be here tomorrow.

Exam. Carpenter: Denied. Mr. Gracey has been excused. We will adjourn until 9:30 tomorrow morning.

(At 6:00 p.m., May 20, 1952, hearing adjourned to 9:30 a.m., May 21, 1952.)

COLLOQUY

Exam. Carpenter: You may proceed, gentlemen. Mr. Fowler.

Mr. Fowler: Mr. Examiner, at the conclusion of the hearing yesterday there were two questions which were under consideration; first, the request of counsel for the intervenor that Mr. Harlan produce, I think, it was sixteen specifically identified freight bills, and, second, a request that a subpoena duces tecum issue to Mr. Harlan for some voluminous documents.

With respect to the second question, the Rules of Practice, Section 1.56, specifically provides that unless directed by the Commission upon its own motion, a subpoena to compel a witness to produce documentary evidence will be issued only upon petition which must specify particularly the books, papers and documents desired, and the facts expected to be proved thereby. In view of that fact there isn't any question but what the procedure made for the issuing of a subpoena duces tecum is entirely out of order.

Now, secondly, with respect to the request for this witness to go back to his office and produce freight bills to a greater or lesser degree, our position is this. If we produce a witness in a hearing, we offer his testimony. If the testimony he attempts to offer is not competent, it is subject to objections on the ground it is not competent and not the best evidence. Secondly, the witness is subject to cross-examination, and the facts may be developed which [fol. 2172] go to the weight of his testimony, in which event it is for the Commission to determine as to the weight to be given the testimony, and we shall decline at this time to furnish any documentary proof responsive to requests which have been made from counsel for the intervenor, and which, perhaps, will continue to be made of future witnesses, not because such documentary evidence would not support the witness' testimony but only for the reason we are not going to be put in a position of going back and forth to hunt up proof which the other side, for their pure

whim, might feel they want, and declining to produce these sixteen freight bills, we must, of course prepare ourselves to take the consequences.

Exam. Carpenter: I think it was eighteen freight bills, Mr. Fowler.

Mr. Fowler: All right.

Exam. Carpenter: I shall deny the request for the subpoena made by Mr. Nolan last evening.

Mr. Howland: I would like to inquire as to what the further conduct of the hearing may be. Under the circumstances we have a situation here where the witness is on the stand and testifies the service of the Iowa-Nebraska is satisfactory, and gives his reasons for entertaining that opinion, and it develops that he has a record of interline shipments which will definitely disclose the time of the delivery of those shipments by his line to the Iowa-Nebraska. We asked then that the witness produce eighteen specified freight bills, giving Pro Numbers so that they [fol. 2173] can be readily located by any one familiar with the filing system to see what the situation is, and, as I understand, it was the order of the Examiner that those bills should be produced as a part of and in connection with the cross-examination. Now, if counsel for the objectors refuses to comply with the order of the Examiner in connection with such matters, now that poses the question, of course, raises distinctly the question, whose direction is to prevail in this hearing? We ask that the Examiner formally direct the production of the eighteen specified documents, and, in default of that, we move that all of the testimony of the witness be stricken from the record, both on direct and cross-examination.

Exam. Carpenter: The motion is denied, Mr. Howland. Go ahead and make the record, and then you have recourse to the Commission, to file a petition with the Commission to issue a subpoena. If we have got to have another hearing on this, we will have to have another hearing as far as I can see.

Mr. Howland: You will proceed?

E. W. HARLAN resumed his testimony as follows:

Cross-examination.

By Mr. Nolan:

Q. Now, Mr. Harlan, you testified yesterday that your company had a great deal of freight bills daily, some eight hundred, is that right?

A. Yes, sir.

[fol. 2174] Exam. Carpenter: That is eight hundred a month?

Mr. Howland: Eight hundred a day.

Exam. Carpenter: Eight hundred a day.

By Mr. Nolan:

Q. You do not personally make up those bills or even personally inspect them, do you?

A. No, sir, not all of them.

Q. Well, do you inspect any of them?

A. Occasionally I look at them.

Q. Now, when you say your company turns over freight practically every day to the Iowa-Nebraska Transportation Company, you do not know that of your own personal knowledge from an inspection of the records of your company, do you?

A. Not from an inspection of the records, I do not.

Q. So it is merely conjectural on your part your company turns over at Des Moines freight daily to the Iowa-Nebraska Transportation Company, isn't that true?

A. That is right.

Mr. Nolan: Now, in connection with the testimony of this witness the intervenors I represent move to strike the testimony of this witness as to the regularity and the frequency of the turning over freight, of interline freight from his company to the Iowa-Nebraska as it now appears such testimony appears conjectural, speculative, and not based on any personal knowledge, in fact none by this witness, and for the further reason for the refusal of his company, himself, and his counsel to produce the specified

[fol. 2175] documents requested in connection with the cross-examination of this witness.

Exam. Carpenter: The motion goes to the weight of the testimony of the witness, and for that reason it is overruled. The motion is overruled.

By Mr. Nolan:

Q. Now, Mr. Harlan, you testified that your company turns over certain shipments to the Rock Island Motor for delivery at the destination along U. S. Highway No. 6?

A. Yes, sir.

Q. And are those a special kind and special type of shipments that your company turns over to the Rock Island Motor Transit Company?

A. No.

Q. Is it a fact your company turns over to the Rock Island Motor Transit Company for delivery at destination along U. S. Highway No. 6 and points served by it all of your company's C. O. D. shipments?

A. No, I wouldn't say so.

Q. Well, isn't it a fact you turn over the majority of your C. O. D. shipments?

A. There would be no reason for us doing it.

Q. Well, isn't it a fact you turn over to the Rock Island Motor Transit Company because of the reliability and responsibility of that company as compared with other connecting line carriers serving that territory?

[fol. 2176] A. Absolutely not.

Q. You are sure of that?

A. Yes, sir. The Des Moines Transportation, Iowa-Nebraska, Roberts Transfer, we have never had any trouble collecting C. O. D. money or interline settlements from any of those companies.

Q. Do you personally know of the interline balance existing between your company and the Iowa-Nebraska Transportation Company?

A. Not exactly, no, sir.

Q. Is it in your company's favor or the Iowa-Nebraska Transportation Company's favor?

A. That varies from day to day. Most of those are set-

tled the day the shipments are tendered to the company by cash. What we owe them we pay them. If they owe us they pay us.

Q. You have the Iowa-Nebraska on a current cash basis?

A. No, sir. That is the way we want to operate. We are doing that with all lines, not only the Iowa-Nebraska, all lines we interline with at Des Moines. That is the way we work together at Des Moines, on which settlements are on a cash basis.

Q. Isn't that a new arrangement because of difficulties your company found with the other carriers, particularly the Iowa-Nebraska, on getting settlements?

A. No, sir, absolutely not.

Q. Are you sure of that?

A. Yes, sir.

[fol. 2177] Q. Are you willing to produce for inspection the interline record of your company with the Iowa-Nebraska Transportation Company for the past two years' time?

Mr. Fowler: I will instruct the witness to refuse to do so.

Mr. Nolan: I am asking him to furnish the information.

Mr. Fowler: I have told you he wont.

Mr. Nolan: This witness has got some rights here.

Mr. Fowler: I am telling you he wont.

By Mr. Nolan:

Q. Will you, irrespective of the counsel's statement, and in connection with your examination produce such records for inspection and examination?

A. No.

Q. All right. Now, do you personally know of the record of the Iowa-Nebraska Transportation Company in so far as shipments interlined from your company to that company on the settlement of loss and damage claims?

A. To my knowledge we have never had any trouble with them.

Q. Are you willing to produce your records on that subject?

A. No.

Q. Now, Mr. Harlan, you testified here yesterday that

the continuation of the Rock Island Motor Transit Company's service would be detrimental to your company. Will you tell me in what particular or particulars the continuation, I mean the granting of this application would be different, would provide or afford the Rock Island Motor Transit Company to provide service that would [fol. 2178] be any different than the service it has been giving for the past thirteen years as you understand it?

A. In what territory? Anywhere in their territory.

Mr. Nolan: No, you didn't pay attention.

Exam. Carpenter: Read the question.

Mr. Fowler: He paid attention. Read the question.

Mr. Howland: I move the exclusion of the statement of counsel, "He paid attention."

Exam. Carpenter: It may be stricken.

Mr. Fowler: The statement of Mr. Nolan, "He didn't pay attention" may be stricken.

Exam. Carpenter: It may be stricken, too. Read the question or do you withdraw it?

By Mr. Nolan:

Q. Mr. Harlan, will you state your understanding of how in any way the granting of the application on hearing here would change or enlarge the services of the Rock Island Motor Transit Company in the territory involved as compared with the service and operations of that company prior to any action of the Interstate Commerce Commission in connection with their operating authority?

A. Well, as I understand it, it will give the Rock Island Motor Transit Company an all out motor truck service which, in my opinion, is definitely a new motor truck service that has not been available complete to the shipping public, it just appears to me. That is my, only my personal opinion.

[fol. 2179] Mr. Fowler: Just a minute. Strike that and let the witness answer.

A. It is my personal opinion that the same thing could be true if the Interstate Commerce Commission would let this authority be granted, that we should have the same

right to start a railroad line between the Twin Cities and Kansas City.

Mr. Nolan: Now, I move to strike the answer as not responsive to the question.

Exam. Carpenter: I think the answer was responsive. The motion is denied.

Mr. Howland: I move the discussion of that answer following the words "It is my personal opinion" and with respect to the construction of a railroad line between Minneapolis and Kansas City, as a mere argumentative statement, an opinion and conclusion of the witness.

By Mr. Nolan:

Q. Now, Mr. Harlan——

Exam. Carpenter: Just a minute. Mr. Nolan asked for his opinion and he gave it. The motion is denied.

By Mr. Nolan:

Q. Mr. Harlan, I think my question asked you in what way, if this application were granted, would the service of the Rock Island Motor Transit Company be any different than it was prior to August, 1951.

A. Well, there would be, as I understand, it would be taking off any restrictions whatsoever, and again I say you would have an all out motor carrier service which was [fol. 2180] not the case in the past, it is my understanding it was not.

Q. All right, Mr. Harlan, what was your understanding of the operating authority of the Rock Island Motor Transit Company during the year 1950 in so far as this territory involved is concerned?

Mr. Fowler: For the record, I am going to object to this on the ground it is immaterial to any issue in this case. It is a public convenience and necessity case, and the question which is under review here is whether or not the future and present public convenience and necessity require the operation sought by this application, and the facts that are now being attempted, the facts that are now

being developed relate to a period back in 1950, and aren't material to any issue in the case.

Exam. Carpenter: The motion is overruled. You may answer the question. Do you remember what the question was?

A. Read the question.

(Question read.)

A. It has been my understanding the Rock Island Motor Transit Company had to have a subsequent rail movement and truck movement from one point to another. At least they have never been, so far as our company is concerned, competitive to us in a motor truck service between the points that we serve, and I am sure if the application was granted that they would be a very definite factor, a very new competition that we have not had in the past. They [fol. 2181] would be able to balance their movement.

Exam. Carpenter: Off the record.

(Remarks off the record.)

Mr. Nolan: I move to strike the answer as not responsive to the question as to what they might do in the future for the sole purpose of the record.

Exam. Carpenter: Let the answer stand.

By Mr. Nolan:

Q. Now, Mr. Harlan, if it be a fact, which it is a fact, that the Rock Island Motor Transit Company in this proceedings proposes to do only that which it had been doing for the past thirteen years up to August, 1951, would that change your opinion any as to what the effect of the granting of this application would be?

Mr. Fowler: Just a moment. That is objected to on the ground it assumes facts not established in the record, and secondly, it calls for evidence which is not material to a convenience and necessity application.

Exam. Carpenter: The motion is overruled.

A. Will you read the question, please?

(Question read.)

A. It would not.

Mr. Robinson: Just a moment, Mr. Examiner. I object to the question because counsel for the applicant seeks to answer the question propounded to the witness.

[fol. 2182] Exam. Carpenter: The motion is overruled.

A. It would not change my feeling at all about what the future operations of the Rock Island Motor Transit Company will be if this application is granted. It will be competitively much greater than we have ever had.

Mr. Fowler: Read what Mr. Harlan said. I would like to have it.

(Answer read.)

By Exam. Carpenter:

Q. That is your opinion?

A. Yes, sir.

By Mr. Nolan:

Q. But you did state just a minute ago, did you not, that up to the present time, that the Rock Island Motor Transit Company has not been a competitive factor in your company's business?

A. Not as great as I think it would be if this application is granted due to the fact there has always been this range of these restrictions being put on. That is my understanding.

Q. Who told you to say that?

A. Nobody.

Q. Didn't you say just a minute ago the Rock Island Motor Transit Company hadn't been any competitive factor in your company's business?

A. I didn't say "any". It would be a greater competitive factor.

Exam. Carpenter: Read his answer to the question.

[fol. 2183] (Answer read.)

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Nolan:

Q. Mr. Harlan, have you given any consideration to the fact that if the Rock Island Motor Transit Company were restricted to rail billed freight, that that would produce a much more competitive condition than if they were engaged in motor carrier operations?

A. Well, I said my feeling on that is that they definitely should not be granted any motor carrier operation, operating authority by motor truck due to the fact of the facilities which they have, that the independent carriers like ourselves have no way to get except through our own efforts, of our own arrangements of our motor trucking companies, where they can definitely get all of the relief and finances, and everything else from their parent company, the railroad, which they need, which causes them to be a much greater competitive carrier than they would be if they had to have a subsequent rail movement before moved by motor truck.

Mr. Nolan: I move to strike the answer as not responsive, and I ask the witness to answer the question and not make a speech.

Exam. Carpenter. Just answer the question in the future, please.

A. That is all I intended to do here.

By Mr. Nolan:

Q. Now, will you please respond to the question. You [fol. 2184] don't need to show off everything that is asked you.

Mr. Fowler: I move to strike the comment of counsel——

By Mr. Nolan:

Q. Now, Mr. Harlan——

Mr. Fowler: —as improper.

By Mr. Nolan:

Q. Have you considered the fact that an operation conducted by the Rock Island Motor Transit Company solely as a rail carrier operation on rail billing, would be, or would not be more competitive, than the Rock Island Motor Transit Company's operation as a motor carrier? Have you considered that phase of the case?

A. Oh, yes.

Q. And if so, what have you taken into consideration with respect to it?

A. Certainly I have considered it. I don't feel it would be as competitive as it would be if an all out motor truck service was granted.

Q. Have you talked to any other carrier, such a the representative of the H & W Motor Express Company in regard to whether or not it was their judgment it would be more competitive if the Rock Island Motor Transit Company was operating solely on rail billing than on motor carrier billing.

Mr. Fowler: Now, just a moment. That obviously calls for hearsay.

Exam. Carpenter: Let him answer.

A. There is a different opinion among the H & W Motor [fol. 2185] Express as to exactly what it does mean. I talked to them.

Q. You know their attitude on this subject?

A. I do very well right now.

Q. Now, Mr. Harlan, isn't it a fact that there is a differential between rail rates and motor carrier rates?

A. In some cases. Those things vary from month to month.

Q. And isn't it a fact that rates are an important factor in whether or not you get business or don't get business?

A. I would say it is a factor.

Q. And isn't it a fact that if the Rock Island Motor Transit Company was operating solely on rail billing, that they would have the benefit of a lower rate than if they were operating on a motor carrier billing under present conditions and under conditions which existed in the past?

A. Not necessarily.

Q. Now, you have been active in the motor carrier industry here in the Midwest, have you not?

A. To some extent.

Q. Are you acquainted with Mr. Walter Hitchen of the Rock Island Motor Transit Company?

A. Yes, sir.

Q. You participated in the different tariff meetings, rate meetings, and so on and so forth for your company?

Mr. Fowler: Just a moment. I am going to object to this line of questioning. It is immaterial to any issue involved in this case, and it is not proper cross-examination.

[fol. 2186] Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Well, Mr. Harlan, the Rock Island Motor Transit Company has participated as a motor carrier, has it not, of the Midwest Tariff Bureau, of which your company is a member?

A. Yes, sir.

Q. It has had its representatives at the traffic meetings or other meetings of that Bureau?

A. Yes, sir.

Q. Representatives of that company have been officers for your Motor Carrier Rate Bureau of the Midwest group?

Mr. Fowler: That is objected to as immaterial, not proper cross-examination. There isn't any dispute in the record that they are members of the Middlewest Motor Freight Bureau. Mr. Hitchen testified as to such. It is not proper cross-examination.

Exam. Carpenter: I will overrule the objection. Read the question to him.

(Question read.)

By Mr. Nolan:

Q. Or whatever this Kansas City group is.

A. Middlewest Motor Freight Bureau. Yes.

Q. And the Rock Island Motor Transit Company have

participated in the industry of the motor carriers as any other motor carrier in the group has participated?

Mr. Fowler: Objected to as immaterial.

[fol. 2187] Exam. Carpenter: Objection overruled.

A. They have participated in it.

By Mr. Nolan:

Q. Now, Mr. Harlan, a couple more questions. Are you able to tell us what percentage of the total volume of your company's business is represented by the business that your company interlines at Des Moines for delivery to destinations along U. S. Highway No. 6 between Council Bluffs and Davenport, Iowa?

A. I could not give you any figure on that.

Q. Before you came over here to testify did you attempt to prepare yourself on that subject and inspect your records for that purpose?

A. I didn't inspect our records at all.

Q. Are you able to give us any idea as to what per cent of your company's business is represented by business that you interline at Des Moines for destination at points on U. S. Highway No. 6 between Council Bluffs, Iowa, and Davenport, Iowa?

Mr. Fowler: This line of interrogation is objected to as immaterial to any issue in the case.

Exam. Carpenter: Objection overruled.

A. It wouldn't mean anything. I could not give you an accurate enough estimate of what it would be.

By Mr. Nolan:

Q. You can not give us any idea at all?

A. I can give you an idea, but I say, I don't think it will mean anything. Between five and ten per cent of our business.

[fol. 2188] Q. And is that business that is interlined from other carriers to your company at Des Moines?

A. That is right.

Q. And would it be fair to say that half of whatever per-

cent of your business that is interlined at Des Moines is interlined for destinations along U. S. Highway No. 6?

A. No.

Q. It would be for other points, is that right?

A. Yes, that is right.

Q. Now, Mr. Harlan, did I understand you to say yesterday your company doesn't stop any where between Des Moines and St. Louis, Missouri, in opefating its line from Des Moines to St. Louis, Missouri?

Mr. Fowler: That is objected to as repetition.

By Mr. Nolan:

Q. Except Oskaloosa, Iowa?

Exam. Carpenter: I overrule the objection.

A. And Pella.

By Mr. Nolan:

Q. Did I understand you yesterday to say you have an arrangement whereby you have some drayman at Pella bring up merchandise from Pella each day and load it on your truck at Des Moines so you will not have to stop at Pella?

Mr. Fowler: That is objected to as repetition.

Exam. Carpenter: The objection overruled.

A. That is only for these large window frames. We do make stops in Pella at the Andeweg dock, and we do make [fol. 2189] deliveries there every night at Pella, as well as at Oskaloosa, but on these large window frames, and the type of freight, we are not sure can be loaded at Pella on our southbound truck, due to the fact we do not know what those sized shipments would be until we get there, those are loaded in Des Moines on our trailer that night.

By Mr. Nolan:

Q. Do you stop your line trucks at Pella to pick up and drop this freight?

A. Yes, sir.

Q. Daily?

A. Yes, sir.

Q. Now, will you state for the record what points are on the route between Des Moines and St. Louis other than Oskaloosa and Pella?

Mr. Fowler: Objected to as immaterial.

By Mr. Nolan:

Q. Where you have rights to serve.

Exam. Carpenter: The objection overruled.

A. May I have an Iowa map and a Missouri map?

Exam. Carpenter: I can give you an Iowa. I don't know about Missouri.

A. Do you want me to read every point?

By Mr. Nolan:

Q. Yes, of this line, get the record complete.

A. Prairie City, Iowa, Monroe, Iowa, Otley, Iowa, Pella, Iowa, and Oskaloosa, Iowa.

Q. Now, I am asking you to name the points on that [fol. 2190] route that you have authority to serve, but you do not serve, you do not make stops, you say you stop at Pella and Oskaloosa?

A. We have authority to all points on our route between Des Moines and St. Louis.

Q. All right, give us all of the points, then. Go right on.

Exam. Carpenter: Now, wait a minute. You have got the witness confused, I think, by those questions. What do you want, Mr. Nolan, all of the points he serves, or those on the route he doesn't serve?

Mr. Nolan: I want all of the points on the route between Des Moines and St. Louis his company has authority to serve.

Exam. Carpenter: That is what he was giving to start out with, I think.

A. That is right.

Mr. Nolan: All right.

A. Is that what you want?

Exam. Carpenter: You have withdrawn your question?

Mr. Nolan: My question provided with the exception of Pella and Oskaloosa. We will go it the other way now and have him give all of the points.

Exam. Carpenter: All right, go ahead from where he stopped.

A. Fremont, Iowa, Ottumwa, Iowa, Fairfield, Iowa, Agency, Iowa, Batavia, Iowa, Lockridge, Iowa, Mount Pleasant, Iowa, Donnellson, Iowa, Charleston, Keokuk, Iowa.

By Mr. Nolan:

Q. And for shortening the record up, at all points on the [fol. 2191] route between Keokuk, Iowa, and St. Louis?

A. All points.

Q. What route do you follow?

A. What is it?

Exam. Carpenter: 61.

A. 61 I think it is. 61, U. S. 61.

By Mr. Nolan:

Q. And you have authority to serve all points intermediate between Keokuk and St. Louis?

A. Yes, sir.

Q. On Highway 61?

A. Yes, sir.

Q. And on that certain route, then, as I understand your testimony, your company serves only the points of Pella and Oskaloosa, Iowa?

A. We serve them all, either direct or through connecting line service.

Q. But your company doesn't give direct local service out of your own truck?

A. Not on all shipments, no.

Q. You will give delivery and pick up if it is a volume shipment, isn't that true?

A. Not necessarily. If it was a volume of business, even

L. T. L. shipments from the towns we serve so we could set up our own agency and have an agency setup in those towns, we would start serving those towns.

[fol. 2192] Q. Isn't it true, Mr. Harlan, if there was enough business in any of these points for your company to set up its own terminal, or sufficient volume of business so there would be a truckload movement in or out, you would give local service to those points?

A. We would give direct service to those points.

Q. But you do not give service where you have to drop it there from a line truck, isn't that true?

A. We would if there would be a volume of business so we could install an agent or a drayman in those towns to take care of the business for us. We have never had enough business in any of those towns offered to us. It is a very occasional shipment, and the ones that are carrying those shipments are carriers that have the intrastate authority, and have a volume of business so they can setup an agency in those towns.

Q. Does your company have intrastate authority along that route?

A. No, sir.

Q. What is your answer, where there is a sufficient volume of business to make it profitable, to either setup your own agency or acquire an agency and then you will give local service to that point; where there isn't a volume of business, then you don't give local service?

A. We have never had any difficulty arranging it the way we are doing because freight for those towns is mostly coming from Des Moines, and that is all carried by the intrastate carriers. There is very little interstate business that we get for those towns.

[fol. 2193] Q. Irrespective of very little or a great deal, you don't provide a local service to those points along that route except Pella and Oskaloosa, isn't that true?

A. Except occasionally I would say when there is volume shipments going into those points.

Mr. Nolan: That is all.

Mr. Howland: I would like to ask just a few questions, the Examiner please, on further cross-examination.

By Mr. Howland:

Q. With respect to the operations of the Bruce Motor Freight Line, was it about the year 1943 that you became connected with the Bruce Motor Freight Line, Mr. Harlan?

A. February 1, 1944.

Q. February 1, 1944?

A. Yes, sir.

Q. All right. I will ask you if it is not true that your revenues for the calendar year 1944 of the Bruce Motor Freight Line were $409,031, or approximately that figure?

Mr. Fowler: Now, just a minute. That is objected to as not proper cross-examination, immaterial. The subject was not gone into at all on direct examination.

Exam. Carpenter: Overruled.

A. I wouldn't answer that without having the records, and I don't have the records with me.

By Mr. Howland:

Q. Well, can you tell me this without your records. Has [fol. 2194] the business of the Bruce Motor Freight Company since the year 1944 shown an increase each year?

Mr. Fowler: That is objected to as immaterial, not proper cross-examination.

Exam. Carpenter: Objection overruled.

A. I think so. I wouldn't be sure of that.

Q. And is it not true that the 1951 volume of revenue, gross revenue from the operations of the Bruce Motor Freight Company were approximately four times the revenues in 1944?

Mr. Fowler: Objected to as immaterial and not proper cross-examination.

Exam. Carpenter: Objection overruled.

A. I wouldn't go into that without my records.

By Mr. Howland:

Q. Well, do you know anything about the comparative tonnage that was handled in the years 1944 and in subsequent years?

Mr. Fowler: Objected to as immaterial, not proper cross-examination.

Exam. Carpenter: Objection over ruled.

A. I wouldn't go into it without my records.

By Mr. Howland:

Q. You wouldn't deny your 1944 tonnage was 47,453 tons and there has been an increase each year, and in 1951 your tonnage was 80,749 tons of freight handled?

Mr. Fowler: Objected to as not proper cross-examination, immaterial to any issue in this proceeding.

[fol. 2195] Exam. Carpenter: Objection overruled.

A. I could not answer that without my records.

By Mr. Howland:

Q. And what is the fact as to whether during this period there has been a substantial increase in the number of units of equipment owned by the Bruce Motor Freight?

Mr. Fowler: Objected to as not proper cross-examination, immaterial to any issue in the case.

Exam. Carpenter: Objection overruled.

A. I wouldn't say a substantial number, no.

By Mr. Howland:

Q. Well, what is the fact whether in 1944 you had a total of twenty-six units of equipment owned by your company, and you now have thirty-six units of equipment at the end of 1951?

Mr. Fowler: Objected to as not proper cross-examination and immaterial to any issue in this case.

Exam. Carpenter: Objection overruled.

A. I don't know what we have now without checking the records.

By Mr. Howland:

Q. What did you have at the end of the year?

A. 1951 we had approximately thirty units, that is tractors-trailers, and pick-up equipment.

Q. That would be a tractor and semi as one unit?

A. No, a tractor is one unit and a trailer is another unit. That is two units.

Q. Do you use leased equipment on the trip lease basis in your operations?

[fol. 2196] A. Yes, sir.

Mr. Howland: I think that is all I have.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Well, just for the record I will ask you, Mr. Harlan, if you are willing to produce the following figures for the years 1944 to 1950 for the Bruce Motor Freight Line, namely, the gross volume of tonnage handled, the gross revenue, and the net profit in each of the years?

A. No.

Mr. Howland: That is all I have, if the Examiner please.

Redirect examination.

By Mr. Fowler:

Q. Mr. Harlan, do you want to tell Mr. Nolan the conversation you had with the different partners of the H & W Motor Express Co., about this case.

Mr. Nolan: That is objected to.

Exam. Carpenter: Overruled.

A. Yes, sir.

By Mr. Fowler:

Q. All right, tell him what the difference of opinion is between the partners.

A. Well, the partner I talked to was Cyril Wissel, and he told me he didn't understand all of the things that were involved in this Rock Island application, and it was his

opinion that he should probably come in and take an opposite position than Mr. Vic Grice, who is the General Manager, had taken in the case, due to the reason he didn't [fol. 2197] understand all of the things that were involved in this application.

Mr. Nolan: I move to strike that answer as mere hearsay and incompetent.

Exam. Carpenter: Off the record.

(Statements off the record.)

Recross-examination.

By Mr. Nolan:

Q. Mr. Harlan, what is your capacity with the Bruce Motor Freight Company?

A. President and General Manager.

Q. And is that a corporation?

A. Yes, sir.

Q. Organized under what laws?

A. Missouri.

Q. And who are the officers of the corporation?

A. Myself, my wife, L. M. Smith, Office Manager, and Dale Nunnelley of Kansas City.

Q. Why is your company organized under the laws of Missouri when your principal place of business is here at Des Moines?

A. It was organized back some years ago before I came into the company, and they haven't changed it. For what reason it was organized in Missouri at that time I don't know.

Mr. Nolan: That is all.

Mr. Fowler: That is all.

Exam. Carpenter: You are excused. Thank you.

[fol. 2198] (Witness excused.)

Exam. Carpenter: A five minute recess.

(Short recess.)

Mr. Bradshaw: Mr. Pasch.

J. F. Pasch was sworn and testified as follows:

Direct examination.

By Mr. Bradshaw:

Q. State your name and your address.
A. J. F. Pasch, P-a-s-c-h.
Q. Where do you live, Mr. Pasch?
A. Grinnell, Iowa.
Q. What business are you in?
A. I am in the transfer and storage business.
Q. And does that transfer and storage business have a name?
A. Pasch Transfer.
Q. It is located in Grinnell?
A. That is right.
Q. How long have you had this business in Grinnell?
A. About twenty-one years.
Q. And are you the owner and operator of that business?
A. That is right.
Q. What sort of facilities have you got?
A. You mean for storage?
Q. In the way of warehouse.
A. Well, I have a warehouse. I have storage. I have [fol. 2199] a dock there, of course, where they back up. Of course, I do my own work.
Q. And do you handle freight in and out of Grinnell, that is in interstate commerce?
A. That is right.
Q. And you handle freight from Chicago?
A. That is right.
Q. From Omaha?
A. Right.
Q. You don't haul that freight yourself?
A. What do you mean, into Grinnell?
Q. That is right.
A. No.
Q. Or out?
A. No, sir.
Q. In other words you are more of a drayman?
A. A cartage company.

Q. You call it?
A. That is right.
Q. What transportation companies come into your dock?
A. Well, I have the Des Moines Transportation, the Van Wyk, Western, and I also have the M. & St. L. Railroad and their truck line.
Q. Do you have freight coming in and out of Grinnell through your dock daily from Chicago?
[fol. 2200] A. That is right.
Q. And points east?
A. That is right.
Q. And about the same from the west?
A. Yes, sir.
Q. Do you solicit freight for these companies you mentioned in Grinnell?
A. Yes, sir.
Q. Are you acquainted with the Firestone Store, Arthur Wee?
A. I am.
Q. And do you have occasion to pick up freight from Mr. Wee?
A. That's right.

Mr. Howland: You mean deliver freight.

A. I deliver and pick up also. I pick up for the various companies.

By Mr. Bradshaw:

Q. And how about a hardware dealer by the name of M. F. Zimmerman?
A. Yes. He isn't really a hardware dealer. You would call him an accessory, I guess.
Q. You pick up and deliver there?
A. That is right.
Q. And a drug store there Earl Mathews runs?
A. Yes, sir.
Q. You pick up and deliver freight there?
A. I do.
[fol. 2201] Q. And another hardware dealer by the name of Ritter. Do you know him?
A. Yes, sir.

Q. You pick up and deliver there?
A. That is right.
Q. How about Walter McCann Variety Store?
A. I do.
Q. And do you deliver to the shoe manufacturer there by the name of Paul Brink?
A. Yes, sir.
Q. But you do not pick up at that point?
A. No, I do not. I did once a long time ago but we don't get very much out of there.
Q. Do you know why you don't get much out of there?
A. No, I can't answer that question.
Q. Did you bring a few freight bills in with you?
A. Yes, I brought quite a few.
Q. Will you just go through and give us three or four typical examples of freight coming in to your dock?
A. The name and wherefrom, is that the idea?
Q. That is right.
A. Well, I have got the College Book Store.
Q. What is the Pro Number of that?
A. The Pro is 647507.

Mr. Howland: Just a minute now, if the Examiner [fol. 2202] please. I don't know the object or purpose of the evidence which is being offered. I am not aware that we have taken, the applicant has taken the position there is no other service at Grinnell, and I want to point out at this time that if we are going into the question of the service rendered by the other carriers at Grinnell, then we feel that if the matter is opened up, that the door is open for cross-examination for the production of records which may refute or put a different construction upon the evidence given by the witness.

Mr. Bradshaw: Well, if Mr. Howland wants to concede there is adequate service other than the Rock Island Motor Transit Company's service at Grinnell——

Mr. Howland: We don't concede it is adequate. We admit there are other carriers into Grinnell, and our evidence so shows. We don't believe it is adequate.

Mr. Fowler: Go ahead.

Mr. Nolan: The intervenors represented by me object to this witness referring to any freight bills unless all freight

bills of shipments handled by this witness at Grinnell be produced for inspection.

Mr. Bradshaw: Just——

Exam. Carpenter: All freight bills over what period of time, Mr. Nolan?

Mr. Nolan: At least the last year's time for the purpose of determining the frequency, regularity and other quali- [fol. 2203] fications and character of service of the companies servicing Grinnell. Now, certainly they shouldn't be permitted to go in here and offer only what they want to and not produce the whole record at least over a reasonable period of time to show what the going picture is.

Mr. Howland: We join in that objection. That was the subject of my statement.

Mr. Bradshaw: Why not let me ask a couple of questions to show what he brought in?

By Mr. Bradshaw:

Q. Mr. Pasch, you brought some freight bills in to the hearing?

A. That is right.

Q. And what period of time and what companies do those freight bills cover?

A. I have some for 1951, and I have some of the recent ones.

Q. And what period of time during 1951 do you have freight bills for that are here for examination by any one in the room?

A. These run from January, 1951, I see, to a part of February, 1951, and the others are just the recent freight bills.

By Mr. Howland:

Q. Those are not all of your freight bills?

A. Oh, no, sir.

By Mr. Bradshaw:

Q. You procured some for 1952?

A. Yes, Maybe not that many, about the same amount. About a month and a half of each.

Q. Would you just read some of the examples, telling us——

[fol. 2204] A. This is, what do you want, 1951?

Exam. Carpenter: Maybe you better tell me, what is the purpose of it? What are you producing these for, Mr. Bradshaw?

Mr. Bradshaw: To show the service of these companies coming into his dock.

Exam. Carpenter: The service he renders?

Mr. Bradshaw: He renders.

Exam. Carpenter: He renders at his dock. Go ahead.

Mr. Howland: We make the objections on the ground previously urged, that it is not a proper procedure to show service by the introduction of a limited number of bills, or receipted bills, or delivery receipts, without according the interested parties the right to examine for a period of time all of the freight bills in the custody of the witness.

Exam. Carpenter: The objection overruled.

Mr. Bradshaw: What was the question now?

(Question read.)

By Mr. Bradshaw:

Q. Mr. Pasch, just from your own personal knowledge will you, using your freight bills to refresh your memory, tell us of some of the shipments that have come into your dock in the past two months?

A. Well, some of them I deliver for nearly every store in town pretty near every day.

Q. Are those L. T. L. or truckload shipments?

A. All L. T. L., most of them.

[fol. 2205] Q. And can you give us an example of some of those shipments as to weight?

A. Of course, they vary. Some of your shipments are small shipments, minimum shipments. Others run up, one thousand, twelve hundred, fifteen hundred pounds.

Q. And who are some of these various customers that you are talking about?

A. You could name every one in town because I make——

Q. Just give us their name.

A. Mathews Drug Store, Rexall Drug Store, George Payton, appliances.

Q. You deliver to the College all right?

A. Yes, I was at the College yesterday.

Q. What did you deliver there?

A. I took thirty-five pails of adhesive paste there. They are building a new science building and they went there.

Q. Do you know where that came from?

A. I think it came from Ohio, unless I am mistaken. I can be wrong on that.

Q. And have you been carrying out this general service for several years?

A. For about twenty-one years I have represented more or less all of the truck lines at some time or other.

Q. And I believe you testified that you can through these carriers give daily service from Omaha to Grinnell? [fol. 2206] A. That is right.

Q. And from Chicago to Grinnell?

A. Yes, sir.

Q. And do you get anything out of Kansas City?

A. Occasionally, yes, sir.

Q. And how about the Tri-Cities?

A. The Tri-Cities, yes, sir.

Q. The Tri-Cities?

A. We get freight out of there.

Q. The Twin Cities?

A. That is right.

Q. And those are mostly L. T. L. shipments?

A. They are, the biggest share of them are, yes, sir.

Mr. Bradshaw: I believe that is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Howland:

Q. Mr. Pasch.

A. Yes, sir.

Q. You do a general cartage business, as I understand it, in Grinnell?

A. That is right.

Q. And that includes doing local distribution for the merchants or businessmen, or individuals in town?

A. Mmmmhuh.

Q. Is that right?

[fol. 2207] A. I was confused just a wee bit by him coming over. Your question was?

Q. You do a general drayage business?

A. That is right.

Q. And storage business?

A. That is right.

Q. In the town. Now——

A. Excuse me just a minute, if you please.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Howland:

Q. Now, Mr. Pasch, with respect to the Des Moines Transportation, the trucks come in to your place of business at what time of day?

A. Well, there is usually one in the morning. Oh, he would be in there shortly after 8:00. I would say any time from 8:15 to 8:45. As a rule he is in there at that time. In the evening they will vary. They will run from around 4:00 until 5:00. Sometimes, earlier.

Q. Now, do you have any information with respect to rate or tariffs?

A. No, sir.

Q. Or anything of that sort?

A. No, sir.

Q. And what is the situation in the event a shipment comes in and is delivered, and it is discovered there is [fol. 2208] some damage in connection with it?

A. They call me and I go over and make an inspection on it, and make out an inspection report, and send it in to the company.

Q. You follow that as a general policy, do you?

A. Yes, sir.

Q. You do that for all of the carriers?

A. That is right.

Q. The Des Moines Trans., Van Wyk, and Western?

A. Yes, sir.

Q. And the M. & St. L. Railroad?

A. The M. & St. L. agent is right there and he takes care of that himself. I tell him about it and he takes care of that himself.

Q. Do you have any way of communicating with the officers of the company?

A. Yes, by telephone only.

Q. By telephone only?

A. That is right.

Q. And you don't have any advance information with respect to changes in schedules, and things of that sort, do you?

A. No, I don't. If there are any changes made they usually write me or call me.

Q. Now, you handle shipments at Grinnell for the Des Moines Transportation from Davenport, Iowa, destined to Grinnell, Iowa?

A. Davenport, Iowa?

[fol. 2209] Q. Yes.

A. I don't think they can pick up in Iowa, can they?

Q. The question is, do you handle anything originating at Davenport and destined to Grinnell?

A. They don't pick up anything in Davenport.

Q. That isn't my question. Just answer my question.

Mr. Rosenbaum: Do you mean intrastate or interstate?

Mr. Howland: I am asking him.

A. I answered the question. They can not pick up in the State of Iowa.

Exam. Carpenter: Answer the question.

A. I don't know, then.

By Mr. Howland:

Q. You don't? All right. Now, do you perform all of the pickup and delivery service for all of the carriers that come into Grinnell other than the Rock Island Motor Transit Company?

A. No, sir, I do not.

Q. What other carriers are there?

A. There is the Iowa-Nebraska. That is Watson Bros., and I think Bos comes down there occasionally.

Q. Bos?

A. Out of Marshalltown.

Q. Out of Marshalltown?

A. That is right.

Q. Do you do pickup and delivery work for the Rock Island Railroad?

[fol. 2210] A. No, sir.

Q. There are other carriers, competitors of yours, that do that work in Grinnell?

A. Yes, I imagine. The Iowa-Nebraska makes their own pick-ups, and I don't know of any one else that does.

Q. Now, the Rock Island Railroad has company-owned pick-up and delivery trucks in Grinnell?

A. That is right.

Q. Or there is on the street there?

A. That is right.

Q. And they have their own local agent at Grinnell, is that right?

A. Mmmmhuh, that is right.

Q. Now, do you know anything about the frequency of the Iowa-Nebraska service into Grinnell from the east?

A. No, I don't. They are in every day, I know that. I see their truck every day.

Q. You see a truck in there about every day?

A. That is right.

Q. You don't know whether that service is from the east?

A. That is right, sir.

Q. Which way is that truck headed when you see it?

A. It is in the alley.

Q. Don't you see it out on the highway?

[fol. 2211] A. I don't go out on the highway.

Q. I mean in town on the streets, Highway No. 6.

A. I can't exactly say I have seen it on No. 6 highway. It might have been there.

Q. Do you know what the service of the Western Transportation Company is to Grinnell?

A. What time they come in, do you mean?

Q. Yes, what time do they have trucks there?

A. Well, they have one there every afternoon. It will vary anywhere from 2:00 to 4:00 o'clock.

Q. And which way is that truck headed?

A. And in the morning shortly after 8:00.

Q. Which way is this truck headed that comes in from 2:00 to 4:00 o'clock.

A. That is the one occasionally going east.

Q. Going east?

A. Yes. The morning truck that gets in there about 8:00, going west.

Q. Now, the one that comes in around 2:00 to 4:00 o'clock in the afternoon is headed east?

A. Is headed east.

Q. Is headed east. What type of shipments, and from what points?

A. As a rule that truck picks up.

Q. As a rule that truck picks up?

[fol. 2212] A. That is right.

Q. Does it make any delivery?

A. As a rule my freight all comes mostly from the east.

Q. And that you say, there is a truck there about how often?

A. Every day.

Q. The Western operate on a daily schedule at that point?

A. Well, they come into my place every day.

Q. Does the Des Moines Trans. come into your place every day?

A. Not every day. Occasionally they will miss, but almost every day.

Q. Now, Van Wyk comes in from the south, does he not?

A. He comes in from Sully, yes, sir.

Q. And Van Wyk doesn't handle any freight from points outside of the State of Iowa, does he?

A. Why, no, he just interlines with some one, I imagine.

Q. Does he handle any interstate freight as a matter of fact?

A. Why, yes.

Q. He does?

A. I am sure he does.

Q. From what interstate points have you handled?

A. Freight going out of the State?

Q. Coming from outside of the State of Iowa.

A. Coming into the State?

Q. Yes.

A. That is an interline haul. He doesn't go out of the [fol. 2213] State to bring it in.

Q. I understand that. Does he have any certificate authorizing him to transport freight from interstate points?

A. I do not know. I can not answer that question.

Q. But you have handled freight, delivered freight for him that he has brought in to Grinnell from points outside of the State of Iowa, that originated outside of the State?

A. I think so, but I don't look at every freight bill to see where the freight come from.

Q. Would any of your freight bills here show that?

A. I think they would. I don't know. No, maybe I am wrong on that question. These are an in Iowa. Maybe I could be wrong on that one.

Q. Shipments entirely within the State of Iowa, as far as the bills?

A. As far as these bills show, they are all in the State of Iowa.

Q. Now, the M. & St. L. truck freight service comes into Grinnell from what points?

A. Well, I guess they originate really out of Des Moines, go down to Marshalltown, and into Grinnell.

Q. Who brings them to your dock?

A. They don't bring them to my dock. I have to go to the M. & St. L. freight house and pick up that freight.

Q. You get that at the M. & St. L. freight house?

A. That is right.

[fol. 2214] Q. Does that come in to Grinnell by truck?

A. That is right.

Q. Or by freight car?

A. All by truck.

Q. You are not familiar with the route it travels?

A. No, I am not. I am positive it comes out of Des Moines, and to Marshalltown, and down 146 to Grinnell.

Mr. Howland: That is all I have.

Mr. Bradshaw: That is all.

Exam. Carpenter: Mr. Nolan?

Mr. Nolan: No cross-examination.

Exam. Carpenter: You are excused. Thank you.

(Witness excused.)

Mr. Robinson: The Examiner please, before I start with this witness I desire to add to my appearance, an appearance for G. H. Wolter, doing business as P. & W. Truck Line, Albia, Iowa, intervenor in opposition.

Joe Bos was sworn and testified as follows:

Direct examination.

By Mr. Robinson:

Q. Will you state your name, sir?
A. Joe Bos.
Q. And where do you live, Mr. Bos?
A. Marshalltown, Iowa.
Q. And what company are you associated with?
[fol. 2215] A. Bos Truck Lines, Inc.
Q. And what capacity are you with that company?
A. President.
Q. Is the Bos Truck Lines, Inc. a corporation?
A. Yes.
Q. And does the company have a certificate issued by the Interstate Commerce Commission?
A. Yes.
Q. Does it have more than one certificate?
A. Yes.
Q. And is your Certificate No. MC-44055?
A. Yes.
Q. And Sub Numbers thereto?
A. Yes.
Q. And there has been presented to you, which has been marked for identification as Exhibit No. 34?

Exam. Carpenter: It may be marked for identification Exhibit No. 34.

(The statement referred to was marked as "Intervenor's Exhibit No. 34, Witness Bos," for identification.)

By Mr. Robinson:

Q. And does that consist of seven sheets?
A. Yes.

Exam. Carpenter: How many sheets?

By Mr. Robinson:

Q. And does that include a copy——

Exam. Carpenter: How many sheets?

[fol. 2216] Mr. Robinson: Seven.

Exam. Carpenter: I have got four.

Mr. Robinson: Back to back.

Exam. Carpenter: It is four sheets.

Mr. Robinson: Four sheets, all right.

By Mr. Robinson:

Q. And does that include a copy of your Certificate of February 17, 1948?

A. Yes.

Q. And one of December 2, 1948, Sub. 24?

A. Yes.

Q. And Sub. 25 of December 2, 1948?

A. Yes.

Q. June 2, 1950, Sub. 27?

A. Yes.

Q. October 13, 1949, Sub. 28?

A. Yes.

Q. October 13, 1949, Sub. 29?

A. Yes.

Q. And November 10, 1949, Sub. 30?

A. Yes.

Q. Is that correct?

A. Yes.

Q. And May 28, 1951, Sub. 32?

A. Yes.

Q. August 24, 1951, Sub. 34?

[fol. 2217] A. Yes.

Q. Now, in the certificate issued February 17, 1948, which is your main certificate, do you have authority to operate between Chicago and Omaha over U. S. Highway No. 6 in the State of Iowa?

A. Yes.

Q. And does your certificate authorize you to serve all intermediate points located on U. S. Highway No. 6 in the State of Iowa?

A. Yes.

Q. Now, what equipment does your company have?

A. We have sixty trailers, forty tractors, and seventeen straight trucks, and we do a lot of leasing.

Q. How many terminals do you have?

A. Four.

Q. And where are those terminals located?

A. Chicago, Marshalltown, Des Moines, and Omaha.

Q. Now, your equipment, is that company-owned?

A. Yes.

Q. Now, your terminals, are they company-owned or are individually owned?

A. I own them individually and rent them to the company.

Q. About how many employees do you have?

A. A little over one hundred.

Q. About how frequently do you operate trucks between [fol. 2218] Chicago and Omaha?

A. Daily service.

Q. And you operate more than one truck a day?

A. Yes.

Q. About how many trucks do you operate a day?

A. We will probably have on No. 6, we always have one to two out of Omaha to Des Moines every day, and two to three out of Chicago to Des Moines every day.

Q. And, in addition to your operation on No. 6 between Chicago and Omaha, do you operate also across the State of Iowa on No. 30?

A. Yes.

Q. Serving Chicago and Omaha?

A. Yes.

Q. And how many trucks do you operate daily on No. 30?

A. It will run about six to seven in and out of Chicago, and out of Marshalltown.

Q. Is your equipment that you operate on U. S. Highway No. 6 always utilized? By that I mean are you always loaded to capacity?

A. Yes.

Q. Could you haul more freight than you are now hauling with the same equipment?

A. Oh, yes. Our business is off the first three months to

what it was three months a year ago over $10,000, so we [fol. 2219] know we can do that.

Q. You say your business in the first three months of 1952 is less than the first three months of 1951 by $10,000?

A. Yes.

By Exam. Carpenter:

Q. That is for the total entire System?

A. Yes.

By Mr. Robinson:

Q. Do you have, in addition to your terminal, do you use draymen or cartage men located on the highway in Iowa?

A. Yes, we do.

Q. And where are they located?

A. We have one in Atlantic, one in Newton.

Q. You have one in Mitcheliville, Iowa?

A. No, we deliver that direct. We have a truck that runs out of Des Moines as far as Grinnell two or three times a week.

Q. And how many trucks do you have located in Des Moines that make pick-up and delivery service?

A. We have about eight pick-up and delivery trucks in Des Moines.

Q. That are stationed in Des Moines all of the time?

A. Yes, and about, I would say about seven to ten semi-trailers we keep here all of the time.

Q. And about how many trucks do you have at Mashalltown you use for pick-up and delivery service for points nearby Marshalltown?

[fol. 2220] A. Oh, we keep about eight pick-up trucks in the City of Marshalltown, and we have probably twenty-five or thirty available equipment at all times in Marshalltown.

Q. How many trucks do you have at Omaha you can use for pick-up and delivery service?

A. We have about six pick-up trailers in Omaha, besides we have three or four semi-trailers there all of the time.

Q. Now, you are operating and rendering service on U. S. Highway No. 6 at the present time?

A. Yes.

Q. Have you ever refused to render any service on No. 6?
A. No.
Q. What method do you use to keep in touch with your various terminals?
A. We have a teletype system we are working constantly during the day.
Q. Teletype service with your various terminals?
A. Yes.
Q. And, of course, you also use the telephone and other means of communication?
A. That is right, but it is mostly teletype between the terminals.
Q. Do you interline freight with other carriers?
A. Yes, very much.
Q. Do you interline freight with other carriers at Des [fol. 2221] Moines, Iowa?
A. Yes.
Q. At Omaha, Nebraska?
A. Yes.
Q. Chicago, Illinois?
A. Yes.
Q. At the Tri-Cities, Rock Island and Moline?
A. Yes.
Q. Do you interline freight at a number of points on your line with other carriers?
A. Yes.
Q. In addition to the freight that you now handle, are you in a position to haul more freight if it was tendered to you?
A. Yes.
Q. Do you solicit business?
A. Sure.
Q. And do you advertise for business?
A. Sure.
Q. Are you continuously and constantly seeking to haul more freight?
A. Yes.
Q. Have you ever refused to render any service to any account, to any of your customers on U. S. Highway No. 6?
A. No.
Q. I hand you what has been marked for identification [fol. 2222] Exhibit 35.

Exam. Carpenter: It may be so marked.

(The statement referred to was marked as "Intervenor's Exhibit No. 35, Witness Bos," for identification.)

By Mr. Robinson:

Q. Is that exhibit the balance sheet for the period ending March 31, 1952 and operating statement for the period ending March 31, 1952?

A. Yes.

Q. And was that prepared under your direction?

A. Yes.

Q. And was it taken from the books and records of your company?

A. Yes.

Q. Now, if additional equipment is necessary to serve the public, are you in a position, or do you have an opinion whether or not you are in a position financially to purchase additional equipment?

A. Yes, we will purchase it.

Q. And will you purchase additional equipment?

A. Yes.

Q. You mentioned you are now leasing certain units. Are those units on a long time basis, that is part of them, and part of them on a short term basis?

A. Both ways.

Q. Now, the employees that you mentioned, have they been under your employ a considerable period of time?

[fol. 2223] A. I have had some of them as high as twenty, twenty-two years. Some of them five, ten.

Q. If this application of the applicant is granted, do you have an opinion as to whether or not it would have an adverse effect on your business?

A. Yes.

Q. And what is your opinion?

A. Well, we have got, as I say, the first three months of this year, we have had enough shortage the past year. If we have any more it just won't be a good healthy condition, that is all.

Q. In other words, you feel you can not stand additional competition?

A. No.

Q. Do you make daily runs from Chicago to Des Moines?

A. Yes.

Q. And do you make daily runs from Des Moines to Omaha?

A. Yes.

Q. Do you make daily runs from Omaha to Des Moines?

A. Yes.

Q. Do you make daily runs from Des Moines to Chicago?

A. Yes.

Q. And do you make daily runs in addition to those you just mentioned that do not stop in Des Moines? That is between Chicago and Omaha?

[fol. 2224] A. That is right. We load meal, we have out of Fremont, Nebraska, and goes right on into Chicago.

Q. But you do have a certain run that makes various stops on Highway 6?

A. Yes.

Q. And you have certain runs that do not stop to make deliveries?

A. That is right.

Q. Are you the only carrier that operates between Chicago and Omaha on U. S. Highway No. 6?

A. No.

Q. And are there a number of other carriers that operate between these points on this highway?

A. Yes.

Q. And are they your competitors now?

A. Yes, very much.

Q. Have you had any complaint with reference to your service you are now rendering the public on U. S. Highway No. 6, either from Chicago, or Omaha, or intermediate points?

A. No, I have had no complaint.

Q. And if a complaint is registered, do you try to make that correction and improvement?

A. Yes, we do.

Q. And will you do so in the future?

A. Yes, sir.

Mr. Robinson: You may cross-examine.

[fol. 2225] Exam. Carpenter: Cross-examine.

Mr. Fowler: Mr. Examiner, I have a few questions I would like to ask Mr. Bos if I might do so. I might have asked him before.

Exam. Carpenter: Proceed.

By Mr. Fowler:

Q. As I understand it, Mr. Bos, you have authority to serve every one of these points on U. S. Highway 6?

A. Yes, from Davenport to Council Bluffs.

Q. And you do actually have over-the-road units operating over that highway daily?

A. Absolutely.

Q. And I believe you stated in addition to that you do have a peddle service twice or three times a week from Des Moines as far east as Newton?

A. Newton and Grinnell.

Q. East as far as Newton and Grinnell. Is that a regular established service?

A. That is right.

Q. Now, as I understand it, you don't serve St. Louis?

A. No.

Q. Or Kansas City?

A. No.

Q. Or the Twin Cities. Now, with respect to—I will withdraw that. Let me ask you whether or not you have had any call for service on L. T. L. shipments within the last [fol. 2226] six months to such points as Amana, Iowa?

A. No.

Q. Adair, Iowa?

A. No.

Q. Altoona you do serve direct on your own line by reason of this peddle operation?

A. That is right.

Q. Have you had any call for service you haven't performed on L. T. L. shipments to Anita?

A. We have trucks in Anita ourselves, our own peddle trucks that deliver there.

Q. What is that regularity?

A. It works out of Des Moines. That is all brought into Des Moines, and peddled out of Des Moines here.

Q. Is that a daily operation or a semi-weekly?

A. I think we run that about three times a week.

Q. And what towns now would that serve?

A. Well, we start at Redfield.

Q. You can refer to this Iowa map.

A. Well, that is all right. We peddle to a lot of towns out of Des Moines. We will stop in Redfield, sometimes leaves Des Moines. I could have my manager that works out of there would be better.

Q. Give us the information to your best ability.

A. Well, we serve a lot of them. Start at Redfield and [fol. 2227] go to Anita. You work to Perry, Madrid, Templeton, Manning, Coon Rapids, and just how they work that I don't know, but I know we service all of those towns out of Des Moines.

Q. I assume, perhaps, in that operation the only point located on U. S. Highway 6 is probably Anita?

A. That is right.

Q. So you do have at least twice a week and sometimes three times a week peddle service to Anita, Iowa?

A. That is right.

Q. Would that be true of shipments originating on your own System, or would it include interline?

A. We take interline freight.

Q. At Des Moines?

A. At Des Moines.

Q. Destined to those points?

A. That is right.

Q. Now, returning to my original question, I will ask you whether you had any call for service within the last six months which you have not performed on L. T. L. shipments to Atalissa, Iowa?

A. No, not to my knowledge.

Q. Now, I believe you said you do serve Atlantic with substantial periodicity, is that correct?

A. We have a truck in Atlantic every day. That is daily.

Q. Are you sufficiently familiar with the consignees or shippers there that you would know whether you had per- [fol. 2228] formed any transportation service for the local hardware dealers there or the wholesale grocer there?

A. That is right. We have daily shipments. We have a drayman there, Smiley and Wallace. They do our dray

work, and I have bills here, a copy of our load sheets with us. We can show just what shipments we have been delivering there.

Q. So you do have a daily service into Atlantic from Omaha as well as from Chicago?

A. That is right.

Q. As well as from other points on your System?

A. Yes.

Q. Including shipments originating on your System, as well as interline shipments from other carriers?

A. Yes, sir.

Q. Now, do you serve Audubon, Iowa?

A. Yes. No, Audubon, I think that is handled into Omaha and transferred out of Omaha.

Mr. Fowler: Is Audubon located on U. S. Highway 6?

Mr. Howland: No, it is on 71.

Mr. Fowler: I see. Off the record.

(Statements off the record.)

By Mr. Fowler:

Q. You do have authority to serve Audubon, Iowa?

A. Yes, but as a rule we bring that into Omaha and it is transferred out of Omaha. However, if we have a whole load going in there or a 10,000 pound shipment of that size, we deliver it direct.

[fol. 2229] Q. Then Audubon is served on a peddle operation out of Omaha two or three times a week on L. T. L., and on volume shipments, as the traffic requires it, is that correct?

A. Yes.

Q. And that would include shipments originating on your own System as well as interline shipments.

Mr. Nolan: I object to this as leading the direct examination of this witness.

By Mr. Fowler:

Q. Now, with respect to Brooklyn, Iowa, do you serve Brooklyn, Iowa?

A. Yes, we serve Brooklyn, Iowa.

Q. Do you have any peddle service into Brooklyn?

A. It varies. If they have a shipment we deliver it.

Q. Would you have, would you describe it as call and demand service?

A. That is right.

Q. Have you ever had a request for service on L. T. L. shipments to Brooklyn which you have not performed?

A. No. We have serviced Brooklyn for many years out of Omaha, meat and packing house products twice a week.

Q. And you are available for L. T. L. general commodity shipments if they are tendered to you?

Mr. Howland: Objected to as leading and suggestive.

By Mr. Fowler:

Q. What is the fact as to whether or not you would [fol. 2230] handle a shipment originating at Omaha destined to Brooklyn if it was tendered to you, an L. T. L. shipment?

A. Yes, we would handle it. We do.

Q. Do you serve Casey, Iowa, with any degree of frequency?

A. Yes.

Q. And do you have a peddle operation on that, or is that from the over-the-highway truck?

A. That is a peddle operation, comes into Des Moines and worked out of Des Moines.

Q. That is on this peddle service you described twice or three times a week?

A. Yes.

Q. How about Carson, Iowa? Have you ever had any request for L. T. L. service from Carson, Iowa, you have not performed?

A. No.

Q. Colfax, Iowa?

A. We have trucks three times a week in Colfax.

Q. Well, that is available on L. T. L. shipments?

A. And truckloads.

Q. And truckloads and available, is it available on shipments originating on your own System as well as interline shipments?

A. Yes.

Q. Have you ever had any request for service from the

small community at Coralville, Iowa, that you have not performed?

A. No.

[fol. 2231] Q. Do you serve Council Bluffs, Iowa?

A. Yes, sir.

Q. How frequently would you say you have transportation service available to the consignees and shippers of Council Bluffs?

A. Daily. We have from one to two trucks in Council Bluffs every day. That is daily.

Q. Now, with respect to Davenport, Iowa, do you serve Davenport?

A. Yes, sir.

Q. I believe you have terminal facilities at the Tri-Cities?

A. We work through the Dohrn Transfer.

Q. Now, what is the fact as to whether or not you conduct an operation from the Tri-City area to Omaha, Nebraska?

A. Yes, we haul. However, we don't have our own terminal there, but we could build a terminal there if the business is there for it, a tonnage there to be moved. We do haul a lot of tractors out of Moline to Newton and Grinnell on No. 6 Highway, and we also have quite a movement into St. Louis. We work into St. Louis through Dohrn Transfer at Rock Island. Then, we haul a lot of full loads in to the Western Grocer Company at Davenport.

Q. Now, have you ever had a call for L. T. L. service at the town of Dexter, Iowa, which you refused to perform?

A. No, not to my knowledge I have never.

Q. Dexter, would you catch Dexter on this peddle route [fol. 2232] you have just described?

A. I think so. That would be handled out of Des Moines.

Q. The next town I have reference to is Durant, Iowa, which is a small community over in the eastern part of Iowa. Have you ever had any call for a service on L. T. L. shipments to Durant you refused to perform?

A. I think Durrant is handled out of Cedar Rapids. We unload that in Cedar Rapids, and it is worked out of there. I think we have a peddle meat run, we serve Durant on a peddle meat run.

Q. But on ordinary merchandise shipments in small volume?

A. We would bring it to Cedar Rapids, and the intrastate carrier would take care of that. If it is a small shipment the intrastate carrier would take care of that, or if it is a full load, we will handle it ourselves, but I think that is how it is worked. I would have to look up our records. I think we have almost thirty days' records with us for the amount of bills, I think.

Q. Without prolonging this examination, let me ask you with respect to all of these smaller communities located on U. S. Highway 6, have you within the last six months had any calls for service on L. T. L. shipments of ordinary merchandise destined to merchants in these small towns that you have refused to handle?

A. No, handled by all of them. In fact we have our guides out, our solicitors soliciting the business.

[fol. 2233] Q. Now, let me ask you this question. Assume that there should be a partial curtailment, or an abandonment of the existing transportation service over U. S. Highway 6 for any reason, and assuming for the purposes of this question that a sufficient volume of freight was tendered to you to warrant the institution of the operation, are you willing to establish a daily service to all points which you are authorized to serve on U. S. Highway 6 providing a service on L. T. L. as well as volume shipments?

A. Yes.

Q. Now, with respect to traffic moving from Chicago to the Tri-Cities, to Des Moines, and to Omaha. First, let me ask you the name of the substantial carriers that are now performing the service between those points in competition with you.

A. We have Watson Bros., Des Moines Transportation, Iowa-Nebraska, Carstensen Freight Line. I think they run to the Tri-Cities and to Cedar Rapids.

Q. There are some others.

A. There are some others, but I can't think of them now.

Q. Now, for the purpose of this question, let me ask you if you understand the permanent authority which the Rock Island Motor Transit Company now holds is subject to key point restrictions applicable to the Tri-Cities and Des

Moines, which prohibits an all motor service from Chicago to Des Moines and from Chicago to Omaha. Were you aware of that?

[fol. 2234] A. Yes.

Q. Now, assume that that restriction was removed so that the Rock Island Motor Transit Company could conduct an all out motor truck service between Chicago to all points I have mentioned, to Omaha. Will you please tell us what in your opinion, if you have one and care to express it, what effect it would have on your business competitive-wise?

A. It would have a big effect on our business. It is bound to. We have enough competition there now. We are just about hanging on as it is. However, no one knows how much actually that would do until there would be an operation, but I know that we have got a lot of competition.

Q. Now, I believe, do you serve Cedar Rapids?

A. Yes.

Q. And do you afford a transportation service from Cedar Rapids to Omaha?

A. Yes.

Q. And do you serve Waterloo?

A. Yes.

Q. You serve Waterloo?

A. Yes.

Q. Do you have a terminal?

A. No, my brother has a terminal in Waterloo, and I work through him.

Q. But your company has the Cedar Rapids authority?

[fol. 2235] A. Yes, and so does Bos Freight Line. They have a terminal in Cedar Rapids. I work through the Cedar Rapids Transfer and Storage. They are our agent in Cedar Rapids.

Q. Let me ask you this question. Does the Bos Truck Lines have authority to serve Cedar Rapids and Omaha?

A. Yes.

Q. And do you conduct an operation between Cedar Rapids and Omaha?

A. Yes.

Q. Now, at which points, with respect to the Iowa terri-

tory, at which points is your interchange principally accomplished with other carriers?

A. With, it is at Marshalltown, Iowa, we have the Keeshin Motor Freight. We transfer with them. We transfer here in Des Moines. We also transfer in Cedar Rapids to different towns, not only on our own in that territory, and then we transfer again at Omaha. We bring freight in there for the whole State of Nebraska, and all of that goes to Omaha.

Q. Now, assuming that a shipment, fifty pound minimum shipment was tendered to the Bos Truck Lines for any small community located on Highway 6, which you do not reach in your regular peddle service, would you interline that with any other carrier serving U. S. Highway 6?

A. Yes.

Q. The Rock Island Motor Transit Company, or the Iowa-Nebraska?

[fol. 2236] A. Yes, we would.

Q. And what has been your practice with respect to those shipments?

A. We transfer with the Iowa-Nebraska. We transfer with any line that is giving service. If we can't have enough to make a load, make a peddle run ourselves, that is what we do, give it to the line. So do the Iowa-Nebraska. So do the Merchants. They give us, the reason we interchange.

Q. Take, for example, a carrier like Merchants and Watson and Brady, and the others, do they interline with you at Des Moines on traffic moving into these smaller communities that you serve on your peddle run?

A. Yes.

Q. Have you within the last six months, have you had any difficulty in disposing of an interline shipment destined to one of these smaller communities you don't handle on your regular peddle basis?

A. No, sir.

Q. And do you interline with the Rock Island Motor Transit Company?

A. Yes.

Q. And with the Iowa-Nebraska?

A. Yes.

Q. And with the Des Moines Transportation?

A. Yes.

[fol. 2237] Q. With Roberts Transfer?

A. Yes.

Mr. Fowler: That is all.

Exam. Carpenter: Cross-examine.

Cross-examination.

By Mr. Nolan:

Q. Mr. Bos, is it fair to say that your operation on Highway No. 6 are primarily volume shipments?

A. It is volume.

Q. And between the principal points such as between Chicago and Des Moines, Chicago and Omaha, Omaha and Des Moines?

A. It is at the present time. However, we take any shipment that is offered to us on our line out of Chicago, and we transfer it either out of Des Moines, or Cedar Rapids, or we transfer it out of Marshalltown.

Q. You will take a shipment, say, for instance, from Chicago say to Marengo, Iowa, and you will either bring that to Davenport for interline with some carrier making Marengo, or bring it to Des Moines and interline with some carrier making Marengo, isn't that what you do?

A. That is right, unless it is a ten thousand pound shipment, we handle it ourselves.

Q. Is it fair to say, Mr. Bos, your company will handle any sized shipment from terminal to terminal, and if it is destined to a small point and it is a small shipment, you will interline that at a terminal with a carrier who makes [fol. 2238] the destination point?

A. We cover a lot of it ourselves even to Des Moines. We run as far as Grinnell on a peddle truck. We run as far as Atlantic on a peddle truck, and as far as Coon Rapids in that territory, are on the equipment out of Des Moines, but it is all brought into Des Moines.

Q. Isn't it true, Mr. Bos, that these so-called peddle runs that you have out of Des Moines westbound and eastbound, that the regularity of that peddle service depends on the volume of freight you have? In other words you work,

send out a peddle truck when you get a load of freight to be peddled out in the territory where that truck goes?

A. No, we make them three times a week, three to four times a week the truck comes through Grinnell and comes to Marshalltown. It is always worked back and forth.

Q. Peddles every point on the highway available?

A. Mitchellville, Colfax, Newton, Kellogg, all of those towns to Grinnell.

Q. Do you have any freight bills showing that service?

A. Yes.

Q. During the past year's time?

A. Yes, I have the last thirty days.

Q. Do you have them here with you?

A. I have a copy of our load sheets.

Q. Will you produce those for inspection?

[fol. 2239] Mr. Robinson: We don't have the supporting data.

By Mr. Nolan:

Q. What do you mean by your "load sheets"?

A. That is what we handled on No. 6 or No. 30. No. 6 as a rule, out of Des Moines, into Des Moines, out of Omaha and into Omaha on No. 6.

Q. Does that show your operation from Des Moines to Grinnell, Iowa, and on to Marshalltown? Does that include any freight originating at Des Moines?

A. No, not freight originating at Des Moines. We don't haul within the State of Iowa.

Q. When did you quit doing that?

A. We still haul, we have a Truck Operator permit. We haul full loads. We haul Caterpillar "Cats" all over the whole State of Iowa, and Western Grocer Company over all of the State of Iowa for the Marshall Canning Company.

Q. These two or three points you say you handle two or three times a week out of Des Moines, any shipments destined east of Grinnell for delivery, originating on your System, would be interlined to some other carrier if it is a small shipment?

A. If it is small shipments, yes.

Q. For instance, are you familiar with the shipment the

other day that was destined for Grinnell, Iowa, you interlined with the Rock Island Motor Transit for delivery?

A. Probably was a hurry for it and we didn't have anything going that day and gave it to them.

[fol. 2240] Q. Your company has, ever since the Rock Island Motor Transit Company has been in business, interlined shipments either at the Tri-Cities, Cedar Rapids, or Des Moines, or some, Omaha or some other mutual terminal points, interlined shipments with the Rock Island Motor Transit Company for the Rock Island Motor Transit Company to deliver to destination, isn't that true?

A. I think the Rock Island Motor Transit Company gives us freight. We work back and forth I think.

Q. Now, you are familiar with the fact, are you not, that for many years the Rock Island Motor Transit Company operated as a motor carrier without restrictions within this territory?

A. I think so.

Q. Isn't that true?

A. Yes.

Q. And during that period of time I assume your business has grown like some of the other carriers, you have increased the volume of your business?

A. Yes.

Q. And you understand, do you not, that the proposal made here is simply the restoring of the prior rights of the Rock Island Motor Transit Company? Do you understand that to be the nature and extent of this hearing?

A. Yes.

Q. Now, you say you have had some loss in gross revenue during the first three months of this year. That is typical [fol. 2241] of the industry as a whole, is it not?

A. Yes.

Q. I mean your business isn't any different than it is in the industry?

A. Well, it is.

Q. May not be as bad as other carriers, may be worse than others?

A. That is right.

Q. But you do know, as a matter of common knowledge,

in the motor truck industry there has been a decline in volume and revenue?

A. That is right.

Q. During the past, since the first of the year, isn't that true, Mr. Bos?

A. Yes.

Q. You say you have interlined with the Rock Island Motor Transit Company for delivery to destinations along this route here particularly on the smaller shipments where it didn't warrant your company making delivery. What was the fact as to whether or not your relations with the Rock Island Motor Transit Company and your company have always been friendly, cordial and cooperative?

A. Yes.

Q. Now, you do a considerable volume of truck business, or truckload business, do you not, Mr. Bos?

A. It is mostly L. T. L. We used to have a truckload [fol. 2242] business but it has changed. The contract carriers have most of the truckload business.

Q. You haul a lot of special commodities like packing house products?

A. We haul packing house products.

Q. And dairy products?

A. Yes.

Q. And canned goods and grocery supplies?

A. That is right.

Q. And you haul also farm machinery?

A. Yes.

Q. Now, do I understand, Mr. Bos, that your company operates all of the various authorities set forth in your certificate here giving specialized types of service and the general commodity types of service as set forth in your certificate?

A. Yes.

Q. And that includes both interstate and intrastate operations. You have some Iowa intrastate authority?

A. That is right, in the whole State of Iowa.

Q. What did you say?

A. In the State of Iowa, like the Marshall Canning Company. They just have their plants, one at Mason City, one at Ottumwa, and one at Davenport.

Q. What I am talking about, you have certain regular route intrastate authority in Iowa, do you not?
[fol. 2243] A. No.

Mr. Robinson: They have a Truck Operator permit.

A. Truck Operator only.

By Mr. Nolan:

Q. You don't have any regular route authority?
A. No. That is my brother. He runs to Des Moines, Waterloo and Cedar Rapids.
Q. Then, as I understand your testimony, Mr. Bos, that although you have authority to operate on Highway No. 6 between Chicago and Omaha, Nebraska, you do not purport to serve any points regularly east of Grinnell, Iowa, or west of Atlantic, Iowa, except on volume shipments directly?
A. If the tonnage will support it, we will give daily service.
Q. I said on volume or substantial tonnage shipments.
A. Oh, no, we will accept any kind of a shipment from fifty pounds on up.
Q. You mean you will handle it, but interline it with some one else?
A. We will interline it or deliver direct. It depends on the volume.
Q. I say you do not hold out to serve the points east of Grinnell or west of Atlantic on U. S. Highway No. 6 unless there is a sufficient tonnage or volume to warrant the operation of the truck into that particular point?
A. At the present time.
Q. And isn't that true, Mr. Bos, the practice of your [fol. 2244] company over the past twenty years?
A. No, we service all of the towns on No. 30 and No. 6. That isn't true on No. 30, we don't service through the night.
Q. That is where you have a volume shipment?
A. No, L. T. L. shipment, a truckload, a five or ten thousand pound shipment.
Q. On a five or ten thousand pound shipment and truckload?
A. On L. T. L., any sized shipment they have.

Q. Now, I thought you just told me, Mr. Bos——

A. We handle it. We transfer it. If we have got enough volume, we deliver direct.

Q. That is right. In other words, on a small shipment to a point east of Grinnell or a point west of Atlantic on U. S. Highway No. 6, you will interline that with some carrier making those destination points, isn't that true, on a small shipment?

A. At the present time we are, and we are hauling it from Chicago. If it goes beyond, we deliver Atlantic direct. If it is beyond there, we deliver it to Omaha. We give it to Roberts Transfer, and they deliver.

Q. Maybe give it to the Rock Island Motor Transit Company?

A. Maybe we give it to them.

Q. If it is a volume shipment or truckload shipment, you will deliver it direct?

A. That is correct.

[fol. 2245] Q. To any point?

A. To any point, all full loads direct.

Mr. Nolan: That is all.

Exam. Carpenter: Mr. Howland.

By Mr. Howland:

Q. Mr. Bos, there is a concern known as the Bos Truck Lines, of which you are President?

A. That is correct.

Q. There is a concern known as Bos Freight Lines?

A. Yes.

Mr. Howland: And those are separate and distinct organizations.

Mr. Robinson: Mr. Howland, maybe we better get the record straight. It is Bos Truck Lines, Incorporated, and Bos Freight Lines, Incorporated.

Mr. Howland: All right.

By Mr. Howland:

Q. Bos Freight Lines is operated by a brother of yours?

A. Yes.

Q. And the businesses are separate and distinct?

A. Yes.

Q. Separate corporations are they?

A. Yes.

Q. Do you know about what the situation has been with respect to the gross revenues of your company during the period say from the end of the war up through the year [fol. 2246] 1951? Has that business shown an increase each year?

A. Yes.

Q. And about what has been, percentage-wise what has that increase been?

A. I wouldn't know. I would have to look my records over.

Q. Is it fair to say your business, your 1951 gross business was two to two and one-half or three times what your business was in 1945?

A. Oh, no, not that much.

Q. Not that much. It would be twice, would it?

A. No. Maybe one hundred thirty, one hundred forty, one hundred fifty thousand more than the previous year. I can not give you the exact figure on it but I do have the records at home.

Q. Well, now, are you familiar with the tonnage handled by your company in the year 1950?

A. Yes.

Q. Would it be correct, approximately 63,300 tons handled that year?

A. I couldn't say. That is approximate. It is in the neighborhood, but I would have to look it up, to refresh my memory. I haven't looked that up.

Q. But it is true until the year 1952 at least, you have shown an increase each year since the end of the war?

A. Yes.

[fol. 2247] Q. How many employees do you have in your terminal in Des Moines all told?

A. We have about fifteen or twenty.

Q. And in Marshalltown, of course, is the center of your operations, that is right, isn't it?

A. I imagine we have, to do labor or office work—do you want just drivers?

Q. No, the total number of your employees.

A. It runs a little over one hundred. It varies.

Q. I understand that. I wanted to get the breakdown. You say fifteen to twenty in Des Moines?

A. That is right.

Q. How many in Marshalltown?

A. I just could not say. I don't know. It is hard to figure it out. We have Omaha drivers or Chicago drivers. We have trucks that go from Chicago to Clinton. They go back every night. We have drivers from there that go to Carroll every night, go to Des Moines every night, and drivers from Marshalltown, go to Clinton and back every night. This labor situation we have had in February, we are trying to stop layovers and call time, and all lines get that, and I don't know where I am at since February.

Q. Can you give us any breakdown on the location of these one hundred employees, at what points they are located?

A. No. I can get the record in a matter of minutes. All I [fol. 2248] have to do is call the office up and I can get it exactly. It would only be a guess.

Q. You don't recall now as to that?

A. No.

Q. Now, your estimate of fifteen or twenty people in Des Moines would include the drivers of trucks in from both directions?

A. Yes. We have over-the-road drivers start right here. I think we have four or five over-the-road drivers, and I think we have the peddle drivers, and also have the dockmen, etc.

Q. Well, you have a terminal agent in Des Moines?

A. Yes, Mr. Hayes, Ross Hayes.

Q. How many dockmen do you normally have in Des Moines?

A. We have sixteen. However, our dockmen take our city deliveries, too.

Q. They work on the dock?

A. And also deliver. We have one foreman, takes care of the dock, and they load up such loads and go out delivering. I think that is the system they have.

Q. Now, you don't do any business to or from Kansas City or the Twin Cities, as I understand it?

A. No. The Bos Freight handles that. Well, I will take it back. We do haul business for the Bos Freight Lines out of Minneapolis into Omaha. They bring it to us in Marshalltown.

Q. That is an interline proposition?

A. That is an interline proposition. They also bring [fol. 2249] stuff from Kansas City to Carroll and Newton and different places that we serve.

Q. Well, I am referring about your having local shipments on your line originate at those points.

A. No.

Q. You interline with any carrier as well as your brother, your brother's company. You probably have a closer relationship with your brother's company than most of the other carriers you interline with.

A. Not exactly. It don't work that way.

Mr. Robinson: Well, they are brothers any way.

By Mr. Howland:

Q. In any event you interline with the Bos Freight Lines?

A. I even started him up about twenty years ago.

Mr. Howland: I think that is all.

Redirect examination.

By Mr. Robinson:

Q. Mr. Bos, the business of the Bos Freight Lines, Incorporated, is primarily north and south, is it not?

A. Yes.

Q. And that company has authority to transport general commodities?

A. Yes.

Q. Between Kansas City and Minneapolis via Des Moines?

A. Yes.

Q. Serving the intermediate points located on primary [fol. 2250] U. S. Highway No. 69?

A. Yes.

Q. And in your operation, as far as the general commodity operation, is primarily east and west, between Chicago and Omaha and certain other points in Nebraska?

A. Yes.

Q. In addition to your authority to haul general commodities which is shown by your exhibit, you have authority to transport a number of special commodities?

A. Yes.

Q. Now, since 1945, which has been mentioned in cross-examination, or since the war, you have extended your business by procuring a number of additional certificates?

A. Yes.

Q. As shown by your exhibit. These were in 1948 and the various years as shown in the exhibit?

A. Yes.

Q. And isn't it true that to a large extent accounts for any increase or growth of your business?

A. Yes.

Q. Now, you were asked, you testified on cross-examination that there has been a change in the nature of your business due to the fact the contract carriers now are taking the truckload business, and you are by that very nature of things, changing the nature of your business to less truckload lots?

[fol. 2251] A. That is right. The steel transportation, the Midwest Transportation, they have practically got all of the loads there. Their rates is under ten or fifteen per cent.

By Exam. Carpenter:

Q. Ten to fifteen per cent?

A. The rates are cheaper than ours.

By Mr. Robinson:

Q. The less truck business is growing and developing constantly?

A. Yes.

Mr. Robinson: That is all.

Exam. Carpenter: Any recross?
Mr. Nolan: Just a minute.

Recross-examination.

By Mr. Nolan:

Q. Mr. Bos, the dates appearing on your Exhibit No. 34, for instance, the date of February 17, 1948——

Mr. Robinson: I may shorten your questions on that. The primary certificate, of course, wasn't first issued on February 17, 1948. That is a recopy of certain other certificates, but the dates as shown for Sub. 24, etc., are the actual dates those certificates were issued, but the master certificate was first issued prior to February 17, 1948.

Mr. Nolan: This is off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Robinson: We offer in evidence as a part of the examination of this witness——

[fol. 2252] Exam. Carpenter: Have you finished?

Mr. Nolan: No, I wanted to clarify the record there.

By Mr. Nolan:

Q. As I understand it, Mr. Bos, that you have been in the motor carrier business for some twenty-five or more years?

A. Twenty-eight years.

Q. And you did possess and operate for many years the authority as shown on this Certificate, Exhibit No. 34, prior to the issuance of Sub. No. 24, before the date appearing on the certificate of February 17, 1948.

Mr. Robinson: Read the question.

(Question read.)

Mr. Robinson: That question can not be answered by "yes" or "no" in its present form.

By Mr. Nolan:

Q. What I am getting at, Mr. Bos, is the date appearing on your certificate as February 17, 1948, doesn't mean that you started to operate the authority possessed by you contained in your certificate as of that date.

A. Oh, we operated since 1935 on general commodities.

Q. That is right.

A. And prior to that, we have always, all general commodities.

Q. So, then, the date appearing here of February 17, 1948, has no relation to when your company started operating as a motor carrier of freight under your certificate. That is the point I am trying to get at.

[fol. 2253] Mr. Robinson: That is true.

By Mr. Nolan:

Q. Is that right?

Exam. Carpenter: The answer is "yes".

A. Yes.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused, Mr. Bos.

(Witness excused.)

OFFERS IN EVIDENCE

Mr. Robinson: We offer in evidence as a part of the testimony of this witness Exhibits 34 and 35.

Exam. Carpenter: Any objection? (No response.) The documents marked for identification as Exhibits Nos. 34 and 35 are received in evidence.

(Intervenor's Exhibits Nos. 34 and 35, Witness Bos, were received in evidence.)

Exam. Carpenter: We will recess for lunch until 2:00 o'clock.

(Whereupon at 12:15 p. m. a recess was taken until 2:00 p. m. of the same day.)

AFTERNOON SESSION

2:00 p. m.

Exam. Carpenter: You may proceed.
Mr. Fowler: Mr. Hobbs, you may be sworn.

A. W. HOBBS was sworn and testified as follows:

Direct examination.

By Mr. Fowler:

Q. Will you announce your name, please?
[fol. 2254] A. A. W. Hobbs, H-o-b-b-s.
Q. And your residence?
A. 3105 45th, Des Moines, Iowa.
Q. And with what organization are you connected?
A. The Des Moines Transportation Company, Inc.
Q. And where are its headquarters located?
A. Des Moines, Iowa.
Q. And in what business is it engaged?
A. Motor carrier.
Q. And in what capacity are you associated with the company?
A. I am Vice President of Operations.
Q. And how long have you been connected with the company?
A. '32, 1932.
Q. And do you have direct and detailed charge of the operations of the company?
A. Yes.
Q. I will ask at this time to have the certificate of public convenience and necessity, MC-53980 marked for identification.

Exam. Carpenter: Marked for identification as Exhibit No. 36.

(The statement referred to was marked as "Intervenor's Exhibit No. 36, Witness Hobbs," for identification.)

By Mr. Fowler:

Q. Directing your attention now to the document which has just been marked as Exhibit 36, I will ask you whether

or not that is a copy of the certificate which you presently [fol. 2255] hold?

A. It is.

Q. And its number is MC-53980?

A. That is right.

Exam. Carpenter: The document identified as Exhibit No. 36 consists of six pages.

By Mr. Fowler:

Q. Six pages. Now, approximately how many tractor-trailer units does your company presently operate?

A. Approximately three hundred.

Q. And at what points do you presently maintain terminal facilities?

A. Des Moines, Omaha, Mason City, Twin Cities, St. Paul, Chicago, Illinois.

Q. Do you have a terminal setup at the Tri-Cities?

A. Davenport, Iowa.

Q. Before we get directly to the Highway 6 operations, is it a fact that you presently conduct a daily service between Chicago, the Tri-Cities, Des Moines, and Omaha?

A. Yes.

Q. In both directions?

A. That is right.

Q. And with respect to the Twin Cities—Des Moines, do you conduct a daily operation between those two points?

A. Yes.

Q. Do you have interline arrangements at Des Moines [fol. 2256] with respect to shipments destined to Kansas City or St. Louis originating at the Twin Cities?

A. Yes.

Q. And are you at the present time handling any substantial volume of traffic of that kind?

A. Yes, we are.

Q. And with what carriers do you interline at Des Moines for Kansas City?

A. The principal carrier is Knaus.

Q. Is that the Knaus Freight Lines?

A. The Knaus Freight Lines.

Q. And with respect to St. Louis, Missouri?

A. We use various carriers there, some of it routed one way and some of it another. I don't believe there is any set carrier.

Q. In other words, you interline with all carriers?

A. That is right.

Q. At all of your terminals, I believe, you interline with other carriers?

A. That is right.

Q. Now, with respect to points on U. S. Highway 6, as I understand it from your certificate, Exhibit 36, you are presently authorized to serve the points of Davenport, Bettendorf, Iowa City, Marengo, Grinnell, Kellogg, Newton, Des Moines, Adel, Atlantic, and Council Bluffs, Iowa?

A. That is right.

[fol. 2257] Q. Now, I believe you have just testified you do have a terminal at Davenport, and of your own?

A. No, it is the Roederer Transfer & Storage, does our work there.

Q. You have a setup?

A. Yes.

Q. And that would be true as to Bettendorf traffic?

A. They handle the Tri-City area, yes.

Q. At Iowa City you have a Commission agent?

A. That is right.

Q. And his name?

A. Maher Brothers.

Q. And what distribution facilities do you have at Marengo?

A. No, we deliver there direct.

Q. From your highway trucks?

A. Road equipment.

Q. And what is the situation at Grinnell?

A. Pasch Transfer.

Q. Is that the gentleman who testified this morning?

A. That is right.

Q. And at Kellogg what arrangement?

A. Direct from our road equipment.

Q. And at Newton?

A. Merchants Transfer Company.

Q. That is a local cartage agent?

[fol. 2258] A. That is right.

Q. And at Des Moines, of course, you have your own terminal?

A. Yes.

Q. And at Atlantic what arrangements do you have?

A. Smiley Transfer.

Q. That is a local cartage that acts as your agent?

A. That is right.

Q. And at Council Bluffs I presume that is handled out of your own Omaha terminal?

A. That is handled out of the Omaha terminal.

Q. Now, referring again to your Exhibit No. 36, directing your attention to Exhibit No. 36 and particularly to the fourth page thereof, and to the authority which is described in the center of the page, reading as follows:

"Service is authorized to and from intermediate and off-route points in Greene, Carroll, Audubon, and Guthrie Counties, Iowa, not including the points of Jefferson, Guthrie Center, Manning, Lanesboro, and Panora."

Now, I would like to ask you whether, relating that authority to an actual map, whether you have authority to serve the following points:

Dexter, Stuart, Menlo and Casey, which are all located on Highway 6.

Mr. Howland: Just a minute. If there is that authority, is it not included in the certificate, Mr. Fowler?

[fol. 2259] Mr. Fowler: It is described as an area in the certificate authority without naming the points, Mr. Howland.

A. Sub. 9.

Mr. Howland: Dexter is not in Guthrie County. That is Dallas.

Mr. Fowler: If you will look at the fourth sheet, Mr. Howland, to the fourth sheet of Exhibit 36, just before the last section, it says, "General Commodities, Greene, Carroll, Audubon and Guthrie Counties, not including the points of Jefferson, Guthrie Center, Manning, Lanesboro, and Panora."

Mr. Howland: But Dexter is in Dallas County.

Exam. Carpenter: That is on Sheet 5, too, is it not?

Mr. Howland: That is on Sheet 5, the part Mr. Fowler was referring to. I desire to object because the question calls for the interpretation of the certificate of the Commission. Therefore, it calls for a mere opinion and conclusion as to the construction of the certificate itself.

Mr. Fowler: Well, I am willing to concede, Mr. Examiner, the certificate is the best evidence, and all these questions are intended to do is to develop the illustrative features of it, and if it is true that Dexter is not authorized to be served, we are mistaken.

Mr. Howland: What were the towns that were included in your question?

Mr. Fowler: We are under the opinion that under the authority just referred to, we would have authority to serve [fol. 2260] the following points situated on Highway 6: Dexter, Stuart, Menlo and Casey, which are located on Highway 6 in the southern part of Guthrie County. Well, apparently Dexter is in Dallas County, and the other points are within our authority.

By Mr. Fowler:

Q. As I interpret the certificate, that is irregular route authority?

A. That is right.

Q. Do you at the present time perform any regularly scheduled service to those points?

A. No.

Q. Has there been any demand made upon you for any service to those points?

A. Not to my knowledge.

Q. And if it should develop there is traffic for those points, are you willing to serve them within the scope of your authority?

A. Yes.

Q. Now, with respect to the actual operations over the highway, how frequently do you have over here trucks moving from Chicago through the Tri-Cities, through Des Moines, to Omaha, daily in a westerly direction?

A. We operate, it would be from Omaha to Chicago?

Q. No, from Chicago to Omaha.

A. From Chicago to Omaha, we operate trucks daily from Chicago to Omaha. There might be only one truck, [fol. 2261] or there might be more. It would depend on the tonnage.

Q. From Chicago to Des Moines?

A. We operate several trucks.

Q. From Chicago to the Tri-Cities?

A. Unless it is straight load traffic, the Tri-City freight would be loaded on a truck that its destination would be west of the Tri-Cities, Des Moines, or somewhere else.

Q. With respect to the eastbound movement from Omaha to Chicago, do you have a daily operation?

A. Yes, we do.

Q. From terminal to terminal, and a daily operation from Des Moines to Chicago eastbound?

A. That is right.

Q. And would that same unit service the Tri-City area on its eastbound operations except for truckload traffic?

A. We would load eastbound traffic, maybe, on several trucks. It could be, it could be one or several, depending on the availability of the truck and the trailer.

Q. Now, with respect to an L. T. L. shipment originating at Chicago, or delivered to you by another carrier at Chicago, destined to Iowa City, how would that be handled?

A. That would be loaded on a truck, on a road truck, and delivered to Maher Brothers at Iowa City.

Q. And is that a daily operation?

A. If the freight, yes, it would be.

[fol. 2262] Q. Now, with respect to a similar shipment——

Exam. Carpenter: Pardon me. Read the answer.

(Answer read.)

By Mr. Fowler:

Q. Is it a daily operation?

A. If there is freight to move to that point.

Q. You mean by that, if you have a shipment to deliver at Iowa City, it is a daily service?

A. That is right.

Q. Now, take the same type of a shipment originating at Chicago, or delivered to you by another carrier at Chicago, destined to Marengo. What is the physical handling of such a shipment?

A. That would be loaded on a road truck at Chicago, and delivered direct to the customer at Marengo.

Q. A similar shipment destined to Grinnell?

A. Would be delivered to Pasch Transfer at Grinnell for delivery.

Q. A similar shipment to Kellogg?

A. Would be delivered direct from the road trailer.

Q. A similar shipment to Newton?

A. Would be delivered to Merchants Transfer.

Q. A similar shipment to Atlantic?

A. It would be delivered to the Smiley Transfer Company.

Q. A similar shipment to Council Bluffs, Iowa?

A. That would be delivered out of our Omaha terminal.

Q. Now, do you originate traffic at Omaha, including any [fol. 2263] interchange traffic given to you at Omaha, destined to the points I have just referred to?

A. Yes.

Q. Is it a reasonably substantial volume of that traffic moving from Omaha eastbound?

A. We are not handling a substantial amount of traffic to a lot of those points.

Q. If a shipment was tendered to you at Omaha on any day destined to any of the points you serve on Highway 6, would you accept the shipment and handle it?

A. Yes.

Q. And would it make any difference whether it was a minimum or volume shipment to you?

A. No, it does not.

Q. Now, the physical operation of a shipment tendered to you at Omaha for delivery at Atlantic, how would that be handled?

A. It would be loaded on a truck at Omaha and delivered to Smiley at Atlantic, for delivery to the customer.

Q. Des Moines?

A. We would deliver that out of our terminal.

Q. Newton?

A. Merchants Transfer & Storage.

Q. Then, the disposition of it at these various points would be the same as you indicated with respect to the previous question?

A. Yes.

[fol. 2264] Q. Now, what is the fact as to whether or not traffic is tendered to you from other carriers at Des Moines for transportation and delivery to the points on U. S. Highway 6 that you are authorized to serve?

A. We would accept those shipments for delivery.

Q. Do you have such traffic tendered to you now?

A. Yes.

Q. From other carriers, and do you handle it?

A. Yes.

Q. Now, do you furnish any type of local, or sometimes referred to as peddle service, to points located on U. S. Highway 6, which you are authorized to serve between Des Moines and Davenport?

A. We operate a truck that peddles between here and the Davenport terminal.

Q. And when you use the term "here", you mean Des Moines?

A. Des Moines and Davenport.

Q. Is that a daily operation?

A. I believe so, yes.

Q. Do you accept and handle in that service shipments ranging from minimum to volume shipments?

A. Yes.

Q. And will you accept any shipment tendered to you, either by the original shipper or interlined at any of your interline points, destined to any of these points?

[fol. 2265] A. Yes.

Q. What sort of a record do you make in the nature of a manifest with respect to the traffic which is loaded on this local or peddle truck we have just been talking about?

A. We make up a manifest which shows the Pro Number, shipper, destination, weight, Trailer Number, date, driver's name.

Q. Have you at my request selected from your records manifests for the months of January and February, 1951, and for the similar period in 1952 for the purpose of devel-

oping the representative type of shipments you handle in that operation?

A. Yes, I have.

Q. Is that a turn-around operation? I mean by that, the truck originates at Des Moines, peddles to the points you are authorized to serve on U. S. Highway 6, to Davenport, and then does it return from Davenport to Des Moines?

A. Not always. Sometimes it is used to go to Chicago, and to run to Peoria. That might not necessarily be its destination. A portion of that freight could be destined to Chicago or beyond.

Mr. Fowler: This is off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Fowler: You can go back on the record.

Exam. Carpenter: Back on the record.

By Mr. Fowler:

Q. Mr. Hobbs, I am now handing you the manifest sheets [fol. 2266] which you have just described, and I will ask you at random to pick out two of the manifest sheets for the month of January, 1951, two for the month of February, 1951, two for the month of January, 1952, and two for the month of February, 1952, at random.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Fowler: Now, responsive to my request, Mr. Hobbs, you have selected four of these sheets at random from the manifests which we have been talking about, and the other manifest sheets I am now handing to counsel for the applicant for examination. I would like to have the four manifest sheets marked for identification.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Fowler: I will now ask the reporter to mark for identification a manifest sheet bearing the heading "Des

Moines Transportation Company, from Chicago, Illinois, to Des Moines, Iowa, date, January 9, 1951."

Exam. Carpenter: That may be identified as Exhibit No. 37.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 37, Witness Hobbs," for identification.)

Mr. Fowler: I will now ask the reporter to mark for identification as Exhibit No. 38 the sheet bearing the heading "Des Moines Transportation, Chicago to Des Moines, January 3, 1951."

[fol. 2267] Exam. Carpenter: It may be so marked.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 38, Witness Hobbs," for identification.)

Mr. Fowler: I will ask the reporter to identify as Exhibit 39 a similar manifest sheet bearing date, January 24, 1952.

Exam. Carpenter: It may be so marked.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 39, Witness Hobbs," for identification.)

Mr. Fowler: Also I will ask that a similar manifest sheet bearing date of February 21, 1952, be marked for identification as Exhibit 40.

Exam. Carpenter: It may be so marked.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 40, Witness Hobbs," for identification.)

Mr. Howland: Is that Chicago to Des Moines?

Mr. Fowler: This is headed, "Chicago to Davenport."

By Mr. Fowler:

Q. Now, I call your attention to the manifest sheets which have just been identified as Exhibits 37, 38, 39 and 40, and ask you to state whether or not those are typical of the type of shipments which are handled by your company from Chicago to points located on U. S. Highway 6 which you are authorized to serve.

A. Yes, they are.

Q. Now, I observe, referring to Exhibit 37, a column [fol. 2268] "Freight Bill Number", which I assume is your freight bill number?

A. It is our Pro Number.

Q. Yes, and under a column "Shipper", that is the original shipper?

A. That is right.

Q. And under the column "Consignee", that is what it means?

A. That is right.

Q. And "Destination" is what it means?

A. That is right.

Q. And the "Number of Pieces" and the "Weight"?

A. That is right.

Q. Now, are these shipments all shipments which originated on your line, or does it include shipments which were interlined to you at Chicago?

A. That includes shipments of all types, interlined or originated by our own line.

Q. Now, I notice in glancing at these exhibits that there are numerous shipments which are under five hundred pounds. Is it your practice to accept these small L. T. L. shipments for delivery at the points which you are authorized to serve?

A. It is. As a matter of fact our shipments, eighty-one per cent of the total of them average less than six hundred pounds.

Mr. Fowler: Read that.

(Answer read.)

A. That is less than truckload traffic.

[fol. 2269] Mr. Fowler: I will now tender to counsel the original documents, Exhibits 37, 38, 39 and 40, and I intend to offer them in evidence, and if they are received, I am going to ask permission to withdraw them and have photostats made of them.

Exam. Carpenter: How long will it take to get the photostats made?

Mr. Fowler: I think we can get them made before this hearing adjourns. I am sure we can.

Exam. Carpenter: This is off the record.

(Discussion off the record.)

By Mr. Fowler:

Q. Do you have with you similar original manifests referring to shipments handled by your company?

A. Between Des Moines and the Davenport terminal.

Q. And are those shipments on this so-called local or peddle truck, or are they handled on the highway?

A. They are handled on the highway truck but it peddles going across there.

Q. In other words, it is a truck moving from Des Moines eastward which peddles on the return trip?

A. That is right.

Mr. Fowler: Will you take those manifests and select four or five for the year 1951 and four or five for the year 1952 at random?

Exam. Carpenter: Still off the record.

[fol. 2270] (Discussion off the record.)

Exam. Carpenter: Back on the record.

By Mr. Fowler:

Q. In answer to the last question you used the term "peddle". Do you mean by that this truck performs a peddle service from Des Moines to points you are authorized to serve on U. S. Highway 6?

A. That is right.

Q. Have you now selected for me four of these manifest sheets, which you selected at random, from the records which we have just been talking about?

A. Yes.

Mr. Fowler: I am now handing the balance of these manifest sheets to counsel for the applicant for their inspection. I would like to have permission to have the reporter identify as Exhibit 41 the manifest sheet bearing the heading "Des Moines Transportation Company, from Des Moines to Davenport, January 10, 1951"; and as Exhibit 42 a

similar manifest sheet for the date, January 4, 1951; and as Exhibit 43 a similar manifest sheet bearing date February 3, 1952; and as Exhibit 44 a similar manifest sheet bearing date, February 19, 1952.

Exam. Carpenter: They may be marked accordingly.

(The manifest sheets referred to were marked as Intervenor's Exhibits Nos. 41, 42, 43 and 44, Witness Hobbs, for identification.)

By Mr. Fowler:

Q. Will you examine the documents which have now [fol. 2271] been identified as Exhibits 41, 42, 43 and 44 and tell me what they are?

A. Exhibit 41 is a manifest which moved freight to Davenport and Moline, Illinois.

Q. From where?

A. Des Moines.

Q. Now, does that include freight originating at Des Moines as well as freight tendered to you from other carriers at Des Moines?

A. We could not handle any freight of this type between Des Moines and Davenport because it would be an intrastate operation, because it would have to come from somewhere outside of the State, or go beyond the eastern border.

Q. So with respect to those exhibits which you are now examining, it would all relate to interstate traffic?

A. That is right.

Q. Which, of course, necessarily could originate at any point within the State?

A. That is right.

Q. Are those manifests typical of the operation which you have conducted in that territory in 1951 and 1952?

A. Well, these are typical of shipments moving to Davenport, that is right.

Q. Now, Mr. Hobbs, have you brought with you any other original manifest sheets that will display a typical opera- [fol. 2272] tion you conducted in 1951 and 1952 which might be helpful to this record?

A. There are supposed to be a package of manifests showing an operation on Highway 6 between Des Moines

and the river showing the peddle operation to Kellogg, Newton, Grinnell and Iowa City.

(Discussion off the record.)

By Mr. Fowler:

Q. Mr. Hobbs, will you select for me from the manifest records which you brought along with you four manifest sheets showing typical service to the points which you are authorized to serve on U. S. Highway 6?

Mr. Fowler: I now ask permission to have identified as Exhibit 45 a manifest sheet bearing the heading "Des Moines Transportation Company, Des Moines to Marengo, February 5, 1951."

Exam. Carpenter: It may be so identified.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 45, Witness Hobbs," for identification.)

Mr. Fowler: And as Exhibit 46 a similar manifest sheet bearing date of February 1, 1951.

Exam. Carpenter: It may be so identified.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 46, Witness Hobbs, for idetnification.)

Mr. Howland: Des Moines to Marengo?

Mr. Fowler: Des Moines to Kellogg, this one. And a similar sheet bearing date January 27, 1952, bearing the heading "Des Moines to Chicago Peddle."

[fol. 2273]] Exam. Carpenter: It may be so identified.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 47, Witness Hobbs," for identification.)

Mr. Fowler: And as Exhibit 48 a similar manifest sheet bearing date February 5, 1952, marked "Des Moines to Chicago Peddle."

Exam. Carpenter: It may be so identified.

(The manifest sheet referred to was marked as "Intervenor's Exhibit No. 48, Witness Hobbs," for identification.)

By Mr. Fowler:

Q. I now direct your attention to the manifest sheets which have been marked for identification as Exhibits 45, 46, 47 and 48, and ask you to state to which operation of yours those manifest sheets relate.

A. They are manifests on a truck that moved east on Highway 6 that had deliveries to the towns of Kellogg and Marengo.

By Exam. Carpenter:

Q. Moved east from where?

A. Des Moines, from Des Moines east.

By Mr. Fowler:

Q. If I have not already covered this before, and perhaps I had, you do perform a daily service on L. T. L. or volume shipments from Chicago to all points on U. S. Highway 6 which you are authorized to serve, and from Omaha to all points that you are authorized to serve?

A. That is right.

Q. And any interstate traffic that is tendered to you at any point on your system for delivery to destination at any of these points?

[fol. 2274] A. That is right.

Mr. Fowler: Now, off the record again, please.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Fowler: All right, back on the record.

Exam. Carpenter: Back on the record.

By Mr. Fowler:

Q. Mr. Hobbs, your pick-up and delivery service at Newton, Iowa, is performed by the Merchants Transfer Company of Newton?

A. That is right.

Q. Just a minute, and at Grinnell by the Pasch, P-a-s-c-h, Transfer?

A. That is right.

Q. And at Iowa City by Maher Brothers?

A. That is right.

Q. And at Atlantic by the Smiley Transfer and Storage?

A. That is right.

Q. Do you have here in the hearing room—I will withdraw that. What type of reports do you receive from these commission agents in the usual course of business with respect to the shipments they handle for you?

A. They aren't uniform. We settle on a statement, a monthly basis.

Q. And will those reports which you receive regularly [fol. 2275] in the usual course of business from these commission agents show the type and volume of shipments into these places?

A. It will show the date, the Pro Number, and the weight.

Q. Will you refer to those documents merely for the purpose of refreshing your recollection and tell me, if you can, from your own personal knowledge the general character of the shipments which were handled by these commission agents for your company at these points during the years of 1951 and 1952?

A. The first, Merchants Transfer and Storage at Newton, for the month of January, 1952, they handled 199 minimum shipments, 260,000 pounds of less truckload traffic; 202,000 pounds of truckload inbound.

Q. Now, take another typical one.

A. Well, let's finish this one. Outbound at Newton that month, 118, pardon me, 11,800 pounds of less truckload traffic and 86,000 pounds of truckload.

By Mr. Nolan:

Q. Where's that at?

A. Newton.

Mr. Fowler: Take another month at Newton, if you will.

A. How about 1952 or the next year?

Mr. Fowler: Pick out another.

A. 1951, January 51, 28 minimum shipments. 283,000

pounds of less truckload traffic; 785,000 pounds of truckload traffic.

By Mr. Fowler:

Q. Was that inbound?

A. Inbound, and the outbound, 12 minimum shipments. [fol. 2276] 33,000 pounds of less truckload traffic and 200,000 pounds of truckload traffic.

Q. Now, will you take the next point and give us the same type of information for that point.

A. Off the record.

(Discussion off the record.)

By Mr. Fowler:

Q. What point are you now reviewing?

A. Pasch at Grinnell.

Q. O. K.

A. These are in weekly statements. The week of January 2d to the 5th.

Q. What year?

A. 1951. January 2d to the 5th, we had nine shipments in that week to Grinnell.

Q. Inbound?

A. Inbound. The week of the 6th to the 12th, there were 12 shipments.

Q. Inbound?

A. Inbound. 1952, the week of the 20th to the 26th.

Q. Of January?

A. Yes, 11, the shipments.

Q. Inbound?

A. Inbound. This is January 27th to the 2d of February, seven shipments.

By Mr. Howland:

Q. What year was that?

[fol. 2277] A. 1952.

By Mr. Fowler:

Q. What do you say as to whether or not the information you have just given us is fairly representative of your operations there?

A. It would be. That came from our own accounting I. B. M. sheets. That is out of the office. I think, pardon me, in addition to that there are some collect shipments. These are the prepaid, but it again would be about the same.

Q. All right, take the Iowa City point unless you are not thru with Grinnell.

A. I have just now found apparently a statement from Pasch which covers the collect shipments.

Q. All right, tell us what that is.

A. He doesn't identify it as to a period of time. The statement is of February 20th, 1951, and lists the Pro Numbers, consignees, and the weight.

Exam. Carpenter: Strike that off the record, Pasch on the collect shipments.

Mr. Fowler: Strike that off the record.

Exam. Carpenter: Better strike it physically.

Mr. Fowler: Yes, strike it physically.

A. The next is Maher Brothers at Iowa City.

By Mr. Fowler:

Q. Well, give us information with respect to the inbound and outbound shipments and a breakdown for two typical periods in 1951 and two typical periods in 1952.

[fol. 2278] A. The week of February 24th to March 2d Maher Brothers at Iowa City——

By Exam. Carpenter:

Q. What year?

A. 1952. There are approximately twenty-five shipments handled for our company there.

By Mr. Fowler:

Q. Inbound shipments?

A. Yes.

Q. All right, go ahead.

A. February 10th to the 16th of the same year, there was approximately forty shipments without counting them individually.

Q. Inbound and outbound both?

A. I believe they are all inbound. February 3d to the 9th, 1951, approximately forty shipments I would guess from the Pro Numbers. They are all inbound. January 27th to February 2d, 1951, it looks like approximately fifty shipments, and I would say they are all inbound.

Q. Do you have some similar information there for Atlantic?

A. If I can find it. Atlantic, Iowa, Smiley Transfer statement of January 30th for 1952. He lists about four and one-half pages of Pro Numbers and shippers for which he picked up and delivered freight for us at Atlantic.

By Mr. Howland:

Q. Does that cover a period of one month?

A. One month.

By Mr. Fowler:

Q. Could you look through that document and see if that covers minimum shipments as well as volume shipments?

[fol. 2279] A. On the first sheet we have one hundred pounds, and on the top of the second sheet we have 33,745 pounds.

Q. Take the top of the third sheet if there is any.

A. One hundred sixty-seven pounds. January 2d through the 5th.

Q. January 2 to January 5, 1952?

A. Yes. These would be collect shipments handled by the Smiley Transfer at Atlantic. There is approximately twelve shipments which would be inbound, as they are collect. January 1st to the 26th, 1952, collect shipments, there was seven shipments. January 13th to the 19th, 1952, twelve shipments.

Q. Are those——

A. Collect shipments.

Q. Are those small shipments?

A. They are all small.

Q. I believe that is sufficient.

A. Well, I was going to identify the others.

Q. Proceed, then.

A. In addition there is a statement for the prepaid shipments of approximately a page and a half Pro Numbers for that month.

By Mr. Howland:

Q. That is February?

A. February.

By Exam. Carpenter:

Q. Approximately how many shipments?

A. Approximately twenty-five.

Mr. Fowler: Do you care to look at those?

Mr. Nolan: Yes, I want to look at them.

[fol. 2280] Mr. Fowler: We will try and keep them in the right set. Let the record show we are now handing to the counsel for the applicant for their inspection the cartage and commission agents' reports to which the witness has just referred.

By Mr. Fowler:

Q. It is true, then, is it not, Mr. Hobbs, that with respect to all of these points that you are authorized to serve on U. S. Highway 6, you are rendering a regular daily, or substantially daily, service to every point on every type of shipment irrespective of the type?

A. That would be true with the exception of Adel, and I don't remember a shipment going to Adel.

Q. Have you ever had a call for service at Adel?

A. I don't believe we have.

Q. Do you know of your own personal knowledge there is a carrier that serves Adel from Des Moines?

A. There are several carriers, I believe.

Q. That serve Adel from Des Moines?

A. Yes.

Q. Adel is located what distance from Des Moines, approximately?

A. Twenty-two miles west of Des Moines.

Q. Do you have some special setup at Kellogg, some special service arrangement at Kellogg?

A. Kellogg, we deliver from the road trailer at Kellogg, and the requirement, to be in there between business hours, 8:00 in the morning and 5:00 or so in the evening.

[fol. 2281] Q. Are you acquainted with Mr. Don Foster of the Midwest Stamping Company?

A. No, I am not.

Q. Are you acquainted with the Midwest Stamping Company?

A. I know of them, yes.

Q. Do you perform any transportation service for the Midwest Stamping Company?

A. Yes, we do.

Q. And state whether or not that has been infrequent periodic*ity* or substantially frequent?

A. It has been over the years it hasn't been large, but it has been constant.

Q. Have you ever had any requests for service from the Midwest Stamping Company you have been unable to handle for him?

A. I don't believe so.

Q. Are you acquainted with an institution located at Council Bluffs, Iowa, known as Gerald Ball that manufactures hammers for hammer mills?

A. No, I am not.

Q. Do you recall any request you have had for service from him you have been unable to perform?

A. No.

Q. Do you perform transportation over your System for Brown-Camp Hardware of Des Moines?

A. Yes, we do.

[fol. 2282] Q. Des Moines Drug Company of Des Moines?

A. Yes, we do.

Q. Luthe Hardware of Des Moines?

A. Yes.

Q. Are you acquainted with an institution at Grinnell, Iowa, known as Louis W. Phelps that manufacturers playground equipment?

A. No, I am not.

Q. Have you ever had any demand for service, or call for service, from that manufacturer you have been unable to perform?

A. Not to my knowledge.

Q. Are you acquainted with an institution at Minneapolis, Minnesota known as Janney-Semple-Hill?

A. Ye

Q. Do you perform any transportation service for them?

A. Yes, we do.

Q. Have you performed any transportation for them to points on U. S. Highway 6?

A. I wouldn't know whether we do or not.

Q. Do you recall any service being asked for of that type which you have been unable or unwilling to perform?

A. No.

Q. If shipments were tendered to you at Minneapolis destined to points on U. S. Highway 6 which you are authorized to serve, would you handle them?

A. Yes.

[fol. 2283] Q. Irrespective of the type of shipment, or its weight?

A. That is right.

Q. Now, Mr. Hobbs, assuming that future developments should bring about a curtailment of or abandonment of any of the existing transportation service which is available to the public to points located on U. S. Highway 6, what is the fact as to whether or not your company would be willing to seek authority to complete its authority to all points on U. S. Highway 6 in interstate commerce and provide a daily peddle service to all of those points?

A. It has been discussed by our people, and they would file an application for such authority.

Q. And if such authority was granted, will they perform it?

A. They would.

Q. If it should develop there is any curtailment in the service of the present carrier which is handling the intrastate traffic to these points, what is the fact as to whether or not you would be willing to file an application and then if authorized, to perform that service?

A. We would.

Q. Does your company presently serve the town of Peoria, Illinois?

A. Restricted commodities, liquor and meat.

Q. What is the fact as to whether or not your company is willing to accept interline freight at Davenport from [fol. 2284] other carriers destined to points on U. S. Highway 6 which you are authorized to serve?

A. We would.

Q. And is that true with respect to any type or weight of shipment?

A. That is right.

Q. What would be your present service on L. T. L. shipments originating at Minneapolis or St. Paul and destined to any points which you are authorized to serve on U. S. Highway 6?

Mr. Howland: What was that question?

Exam. Carpenter: Read the question.

(Question read.)

A. As an example, a shipment moving from the Twin Cities, picked up in the Twin Cities today, would arrive in Des Moines tomorrow and be delivered to Newton, for example, the next day.

By Mr. Fowler:

Q. And is that same thing true with respect to shipments which would be interlined to you at Des Moines and originate at Kansas City?

A. If we received an interline shipment today by 3:30, which is our cut-off time, that would be loaded out tonight for those points.

Q. What would be your normal service on an L. T. L. shipment originating or interlined to you at Chicago and destined to points you are authorized to serve on U. S. Highway 6, excluding from the question such points as the Tri-Cities and Des Moines?

[fol. 2285] A. If we received a shipment, for example, for Marengo?

Q. Marengo.

A. Today at Chicago, it would be loaded on a truck that would leave Chicago late tonight and peddle that shipment direct at Marengo tomorrow.

Q. Now, what is your present competition between Chicago and Omaha, motor carrier competition?

A. Merchants, Watson, Rock Island, Roberts. Oh, pardon me, I was thinking about Des Moines.

Q. From Chicago to Omaha.

A. There is a lot of them. On-Time, Watson, Red Ball, Merchants, Rock Island, I. T. I., Union.

Q. Well, is it fair to say there are ten substantial carriers at least?

A. Yes, it is.

Q. Now affording a motor carrier service between Chicago and Omaha?

A. Yes, it is.

Q. And is it fair to say an equal number are affording service from Chicago to Des Moines?

A. I don't know there are ten coming into Des Moines.

Q. All right. Is it fair to say there are five or six?

A. I believe so.

Q. And what is the situation with respect to Minneapolis, Minnesota, to Des Moines, would you say there are five established carriers?

[fol. 2286] A. Yes, there are more than five.

Q. Now, you are aware that the permanent authority which the Rock Island Motor Transit Company holds contains certain key point restrictions with respect to the movement of rail freight by truck, namely key point restrictions at the Tri-Cities and Des Moines which restrict an all-truck movement from Chicago to Des Moines or Omaha. Now, assume that by reason of this application those restrictions were removed. What is your opinion as to the effect of that additional competition upon your company's operations?

Mr. Howland: Objected to as calling for an opinion and conclusion on the matter to be determined by the Commission, argumentative in form and no proper foundation laid.

Exam. Carpenter: The objection overruled.

A. We consider the Rock Island Motor Transit Company

would be the very highest type competitors, and naturally would have an effect upon our business.

By Mr. Fowler:

Q. Would you regard an all out—I will withdraw that. Would you regard an operation by the Rock Island Motor Transit Company which was limited to rail freight moving on rail billing, merely as auxiliary and supplemental to its train service, with key point restrictions preventing through operation from Chicago to Des Moines and from Chicago to Omaha, as competitive as an operation which would per-
[fol. 2287] mit an all out motor carrier operation in relation to its effect on your company?

A. I don't believe it could be as competitive from an operational standpoint.

Mr. Fowler: You may examine.

Exam. Carpenter: Cross-examine.

Mr. Fowler: I will offer those exhibits later.

Cross-examination.

By Mr. Howland:

Q. All right. Mr. Hobbs, do I understand that you have been connected continuously since the year 1932 with the Des Moines Transportation Company?

A. And the company preceding them.

Q. The principal executive of that company is Mr. Birney Baker?

A. That is right.

Q. Now, in 1932 when you became connected with Mr. Baker, or his organization, between what points was Baker operating as a motor carrier at that time?

A. It was quite wide. It was between——

Q. Well, go ahead.

A. It was prior to any regulation.

Q. Prior to any regulation.

A. We operated from Omaha to New York.

Q. Now, initially, the Des Moines Transportation Company applied for and received certificates from the Inter-

state Commerce Commission after regulation became effective in 1935 between what points?

[fol. 2288] A. Des Moines and Chicago.

Q. So in 1935 the operation was confined to a transportation service between Chicago and Des Moines, is that right?

A. And that area, yes.

Q. And at that time did you receive the authority from the Interstate Commerce Commission to serve substantially the intermediate points that are embodied in the present certificates?

A. Yes.

Q. In other words your operating authority at that time was on U. S. Highway 6 as far as regular route operations were concerned, and generally between Chicago and Des Moines, is that right?

A. That's right.

Q. Now, that operation continued by the Des Moines Transportation limited to Chicago and Des Moines for a number of years, and then, I believe, was extended to Omaha?

A. That is right.

Q. And about what year was it that your service was extended to Omaha?

A. 1939 or 1940, I believe.

Q. And was that done by the acquisition of another carrier, or by application for a certificate?

A. Acquisition.

Q. And do you recall who the carrier was you purchased there?

A. Holdcroft Transportation, H-o-l-d-c-r-o-f-t.

Q. Holdcroft Transportation, H-o-l-d-c-r-o-f-t?

[fol. 2289] A. H-o-l I believe it is.

Mr. Fowler: H-o-l-d-c-r-o-f-t.

By Mr. Howland:

Q. So in 1939 or 1940 that operation was extended into Omaha and at that time you acquired all of the Holdcroft rights, whatever they were?

A. Between here and Omaha.

Q. Between Des Moines and Omaha?

A. That is right.

Q. And that, of course, included the intermediate points which are embodied in your present certificate which has been made an exhibit here?

A. With the exception of that irregular route authority.

Q. Up into Coon Rapids and that territory?

A. That is right.

Q. Now, at some time or other you also acquired some certificates up on U. S. Highway 30 north and west of Des Moines.

A. 1947, December 10th, acquisition of Ruan.

Q. And what were the terminal points of that operation which was acquired in 1947?

A. The Twin Cities and Des Moines. They had Des Moines and the Twin Cities with various routes in the State of Iowa.

Q. And did that include a route on U. S. Highway 30 extending up through Carroll to Denison, Iowa?

A. Yes, sir.

Q. And that you say was in 1947?

[fol. 2290] A. That is right.

Q. And as part of that acquisition your Des Moines to the Twin Cities of Minneapolis and St. Paul, Minnesota, was likewise acquired?

A. That is right.

Q. And you now have pending, I believe, some application before the Commission for the approval of the acquisition of the Kansas City-Des Moines operation, do you not?

A. The Worden transfer.

Q. And that matter has been heard, has it, or what is the status of that?

A. Yes, it has been heard. The hearing was a week ago last Monday.

Q. And no decision?

A. No decision.

Q. Rendered as yet. Now, about what is the total number of route miles operated by the Des Moines Transportation Company at the present time?

A. Frankly I could not tell you without adding them up. I never thought of them in that category.

Q. Well, in any event at the time the regulation became

effective under the Motor Carrier Act, was there a concern operating in Des Moines known as the White Line Motor Freight Company?

A. Oh, yes.

Q. And you were familiar with that operation, were you not?

[fol. 2291] A. To a certain extent.

Q. And that operation was a Chicago-Omaha operation with one segment extending from Iowa City to Cedar Rapids, and another line down to Muscatine?

A. That is right.

Q. With certain gaps or limitations in that authority?

A. I think that would be right.

Q. And that operation was subsequently acquired by the Rock Island Motor Transit Company, was it not?

A. That is right.

Q. Now, this operation extending up into western Iowa, the westerly terminus of that authority was Denison, Iowa, in Crawford County, was it not?

A. No, I believe that is Omaha.

Q. Does that extend through to Omaha on U. S. Highway 30?

A. Yes.

Q. What is the fact as to whether the Des Moines Transportation Company has continued to operate over that route to the present time?

A. We operate over that route from Omaha or from Mason City, to——

Q. And Mason City?

A. To Omaha.

Q. To Omaha?

A. That is right.

Q. Do you render any east and west service into Denison, [fol. 2292] Iowa, the points between Denison and Carroll at the present?

A. Some.

Q. Do you perform any local service of any kind in there?

A. No.

Q. And how frequently do you operate into Denison at present?

A. Denison?

Q. Yes.

A. Very irregularly.

Q. Very irregularly?

A. That is right. We had an Iowa intrastate authority there, and the Iowa Commission granted the Crouse Cartage Lines intrastate authority. He was a local carrier there, and there was no tonnage for the Des Moines Trans. after Crouse started operating.

Q. In any event that authority so far as service between Carroll and Denison and local points has practically been abandoned by the Des Moines Trans.?

A. Not between Carroll, we have no authority interstate as it is served, if that is what you are trying to say.

Q. Westside?

A. Westside.

Q. And those points?

A. Those three points.

Q. You have not served in recent months or years?

A. We have been in there. We were in Denison just recently.

[fol. 2293] Q. You don't render any regular local service?

A. Not daily, no.

Q. Now, with respect to these exhibits, which I believe began with Exhibit No. 37, these manifests.

Exam. Carpenter: 36. You mean just the manifests?

By Mr. Howland:

Q. Yes, that is these exhibits which began with 37 and extend through 48. Those are, as I understand, manifests showing the shipments transported on particular movements on the particular dates set forth?

A. To that particular point, that is right.

Q. And the point of origin of the run and the point of destination is as shown at the head?

A. At the top of the manifest.

Q. At the head of the exhibit in each case?

A. That is right.

Q. Now, for instance, Exhibit 37 is a manifest, the tractor number is not shown, but the trailer number is 346, and

that is a truck that moved from Chicago, Illinois, to Des Moines, Iowa?

A. That is right.

Q. And the total weight of the shipments handled in that movement was 27,801 pounds?

A. That is right.

Q. Now, apparently that truck went both to Iowa City and Cedar Rapids before it got over to Des Moines?

A. Its line of travel would be Chicago, Davenport, Cedar [fol. 2294] Rapids, Iowa City, Des Moines, Marengo and Newton.

Q. But that was a Chicago-Des Moines unit?

A. That is right.

Q. That was operating in regular service?

A. That is right.

Q. And the points served on that besides Des Moines, on that movement were Davenport, Iowa City, Cedar Rapids, Grinnell, Kellogg, Marengo and Newton?

A. That is right.

Q. Now——

A. Apparently its destination was Newton so far as the lading was concerned.

Q. Well, it is headed at least as a Des Moines shipment or Des Moines truck.

A. The movement of the truck was Des Moines.

Q. Yes.

A. But the freight was finished at Newton.

Q. Now, Exhibit 38 is a similar shipment, or similar movement, and with similar distributions, too, with the exception of two shipments, one to Mason City and one to Clear Lake, Iowa, which were also included on that run?

A. That is right.

Q. Now, I notice Exhibit 39 has a large rubber stamp at the bottom, and Exhibit 40 has a similar rubber stamp "PEDDLE". Is that put on for the purpose of determining [fol. 2295] the compensation that is paid to the driver for the service which has been rendered?

A. No. Your first group of manifests are 1951, and you will notice that all points are listed on one sheet. In 1952 the procedure was changed, and each town was sup-

posed to be manifested on a separate sheet, and the drivers were missing their deliveries. In other words, they were failing to stop at certain towns, so trying to call that to the driver's attention he is supposed to stop.

Q. Now, I notice on Exhibit 39, and also on Exhibit 40 there is some wording on each of the exhibits. In one instance is reads on Exhibit 39, this is another manifest on the same, "P. R. L. R. that carried frt. for Des Moines, Davenport, Iowa City, Cedar Rapids, Grinnell" with the total weight of 30,382 pounds. Do you know when that was added to the exhibit?

A. May I see it. This apparently is a supplemental manifest, too.

Q. The question is, do you know when that was added?

A. At Chicago, at the time it was made up, yes.

Q. And on Exhibit 40 there appears the entry, this is another manifest, what is the same "P. R. & L. R." That carried Cedar Rapids, Grinnell and Newton merchandise.

A. A supplemental manifest.

Q. Now, on all of these manifests is there anything to indicate the time of departure of the particular unit from Chicago?

A. May I look. Some of them are and some of them aren't.

[fol. 2296] Q. Well, look at Exhibit 37.

A. This would not indicate the departure time of the truck. This would indicate the time that this manifest was completed.

Q. That would be January 10th, or January 10th it is endorsed, 1:48 a. m., 1951.

A. That is right.

Q. That is the time of the completion of the manifest?

A. That is right.

Q. And the truck would depart at some time subsequent, and the time of departure and the time of arrival is not shown?

A. No, they would be shown on the driver's pay sheet he stamps out on another record.

Q. What pick-up service would be afforded on these runs by this truck and trailer unit shown in Exhibit 37?

Mr. Fowler: You will have to show him the exhibit.

A. May I have the question again?

Exam. Carpenter: Read the question.

(Question read.)

A. This would all have been accumulated at Chicago by interline delivery to our dock or by our own trucks picking it up over the city.

By Mr. Howland:

Q. In other words there is no pick-up service performed by this particular unit on its run between Chicago and Des Moines?

A. No.

[fol. 2297] Q. And, as a matter of fact, it isn't the practice on any of these runs from Chicago to Des Moines to perform a pick-up service at any intermediate point, is it?

A. At any intermediate point?

Q. Yes.

A. By the road driver?

Q. Yes.

A. Oh, yes.

Q. Well, in any event it is true, is it not, that all of these manifests identified as Exhibits 37 to 48 inclusive include only deliveries and indicate no pick-up service?

A. That is right, unless they haven't been entering that. I would like to see whether there is anything going east in those exhibits. Are they east or westbound?

Q. Some of them are east, and some of them are west, but in any event they indicate nothing but a one way movement in any instance I have so far observed. Did you observe anything but a one way movement?

A. A truck leaving Des Moines going to Newton would pick up if there was freight there, or Iowa City. I noticed on one of the manifests the driver asked for freight at Maher Brothers.

Q. At Maher Brothers at Iowa City?

A. That is right. The transfer company would accumulate the freight if it was not a truckload.

Q. Now, referring particularly to these eastward move-

[fol. 2298] ments, what is the fact as to whether the preponderance of your movement is in an east to west or west to east direction?

A. At the present time we are overbalanced. We are running heavier east. However, that is not a natural operation.

Q. That is not a normal situation in your operation?

A. But it has been so some share of the time this year.

Q. Is that due to the fact that you have had a substantial quantity of truckload business out of Des Moines?

A. I think we attribute it to two things. The Chicago tonnage has been down westward, and we have been able to increase our eastbound tonnage.

Q. That is out of Des Moines and Omaha?

A. Out of anywhere, from here.

Q. Have you increased the types of truckload business that you have been handling since about the first of January? Have you been taking on some commodities you didn't previously handle?

A. No, I don't believe so.

Q. Haven't you been handling some shipments of corn, seed corn and other shipments of corn?

A. We have handled very little corn this year. We handled some last fall. We handled a considerable amount.

Q. That was all an eastward movement?

A. That would all be eastward.

Q. And one of the things that is essential to a good operation of a truck line, it is to balance your loads, is it not, Mr. Hobbs?

[fol. 2299] A. It has to be.

Q. It has to be. Without a fairly balanced movement in each direction can any truck line, in your judgment, operate economically?

A. I will qualify that by saying any company that owned their own equipment.

Q. Any company that owned their own equipment?

A. That is right.

Q. Well, that is they have to have a balanced operation in order to really continue in business under the present day conditions in this territory, is that not true?

A. It is a necessity.

Q. Yes, sir. Now, going back again to these operations east from Des Moines, if you had a unit, tractor and semi-trailer unit that was going to go to Peoria to pick up a load of liquor for the Liquor Commission here at Des Moines, you would load that with anything that was available for the eastward movement, would you not?

A. We would if we could, we would terminate that truck, so far as that load is concerned, at Davenport.

Q. And I notice on Exhibit No. 45, which is a shipment Des Moines to Marengo, that that indicates the total load on that unit of five hundred nineteen pounds.

A. No, that indicates that was all for Marengo.

Q. On that unit at that time?

[fol. 2300] A. That is right.

Q. Now, do you have with you the other manifests for that same trip with Exhibit 45?

A. No, I do not.

Q. Those are in your possession?

A. That is right.

Q. At your office?

A. May I just, off the record.

Mr. Howland: Off the record.

(Discussion off the record.)

Exam. Carpenter: He did not answer the question.

Mr. Howland: Not completely, well, off the record.

Exam. Carpenter: No, it is on the record.

(Question read.)

A. Yes.

By Mr. Howland:

Q. Now, was it not true in 1951 it was the policy followed by your company to put a number of destinations all on one manifest?

A. That is true.

Q. And that policy was changed some time during the year 1951?

A. That is right.

Q. And separate sheets were made up?

A. That is right.

Q. Now, calling your attention to Exhibit 45, I notice that date is 2-5-51 as I read it, is that not correct?

[fol. 2301] A. That is right.

Q. So, as a matter of fact, if the usual policy was followed in that respect, in making up Exhibit 45, it is true that all of the shipments that were in the particular unit would be shown on the exhibit?

A. If that were true, yes.

Q. Well, that was the policy and practice that was being followed at that time?

A. They were supposed to follow that, that is right.

Q. And the same thing is true of Exhibit 46, which bears a date of 2-11-51, does it not?

A. That is right.

Q. Now, on Exhibit 47 I notice, which bears date of January 27, 1952, that you show both Kellogg and Marengo shipments on that same manifest.

A. That is right which indicates there is no rhyme or reason.

Q. Well, in any event it is true, is it not, that so far as the eastward movements from Des Moines are concerned, whether in '51 or in '52, that your relative eastward movements were light compared with your westward movements?

A. That is a true statement.

Q. And the equipment was being turned and sent back to Chicago, in any event it would have to go back to Chicago for further loading as a general proposition, would it not?

A. That is true. Our load average out of Chicago is in [fol. 2302] excess of twenty-eight thousand pounds per unit, and our load factor to Chicago is just in excess of twenty per cent, so we had ample space to haul any freight that was offered going east.

Q. You had a bunch of statements and bills from various transfer agencies at Iowa City, Grinnell, and I believe one or two from Davenport, and you have shown with respect to some of those, weights of individual shipments of thirty-three thousand pounds in one instance I recall.

A. I believe that would be true of Atlantic.

Q. That was a truckload shipment, wasn't it?

A. That would be.

Q. How come that gets on the local cartage man's statement? Do you pay him for tonnage that moves in regardless of whether he handles it?

A. That is strictly goodwill.

Q. In other words, if you have a shipment going to Atlantic, Iowa, of a truckload, the general practice will be for that truck to go direct, the semi and the tractor to go direct to the consignee's place of business and be unloaded by your employees, would it not?

A. Our employees could do that, but in order to get these people to handle our freight regularly they insist on participating in all of the traffic we handle in and out of their town, and whether they are on the truck or not, they expect to be paid for it.

Q. And you accede to that?

[fol. 2303] A. We do.

Q. Now, as a matter of fact, doesn't your company with respect to its truckload business follow the policy of sending the road unit direct to the consignor's place of business and have it loaded at that point?

A. Yes, whenever at all practicable or possible.

Q. In other words, you try to eliminate the handling of all of your volume shipments and your truckload shipments over the dock?

A. We certainly do.

Q. And why do you do that?

A. To save money.

Q. To save money. In other words, if you can eliminate the handling across the dock it is very definitely reflected in your cost of doing business?

A. That is true.

Q. Now, the Des Moines Transportation Company through the years has consistently solicited and handled a substantial volume of truckload or volume freight, has it not?

A. Yes.

Q. And can you tell us about what the percentage of your truckload freight would be to the total tonnage handled?

A. Fifty per cent.

Q. And what is the fact as to whether in later years, particularly since the termination of the war, that that [fol. 2304] percentage has increased?

A. The percentage of truckload business?

Q. Yes, percentage of truckload tonnage compared to the gross tonnage, the total tonnage.

A. I don't believe we had as good a record prior to the war as we do now, but we are handling, I believe, considerable less truckload business today than we did two or three years ago in percentage-wise. We are becoming a larger carrier of less truckload traffic by the year it seems like. It is forced on us.

Q. Of course, you prefer, when you can, to handle truckloads rather than L. T. L., don't you?

A. We are fighting to handle it.

Q. Yes, sir, and that is the most desirable type of, the truckload tonnage and the volume tonnage of six to ten thousand pounds and above is the desirable freight?

A. That is certainly so.

Q. Now, what is the fact as to whether in recent years, say from the year 1945 on, that the total tonnage handled by the Des Moines Transportation Company has shown an increase? Do you have the question in mind, Mr. Hobbs?

A. Yes, I believe so.

Q. O. K.

A. May I have the question.

Exam. Carpenter: Read the question, please.

[fol. 2305] (Question read.)

A. It has.

By Mr. Howland:

Q. Do you have, I notice you have some figures there before you which apparently was in an envelope. Do you have with you there the total over-all tonnage figures by years?

A. I have from 1944 through 1951.

Mr. Howland: And may I examine the sheet?

Exam. Carpenter: This is off the record.

(Discussion off the record.)

Mr. Howland: I will ask that the sheet headed "Analysis of Revenue, Profit, Tons handled, and Equipment by years", which has just been produced by the witness, be marked for identification as Exhibit 49.

Exam. Carpenter: Any objections, Mr. Fowler?

Mr. Fowler: No.

Exam. Carpenter: All right, mark it Hobbs' Exhibit No. 49.

(The statement referred to was marked as "Applicant's Exhibit No. 49, Witness Hobbs," for identification.)

Mr. Howland: Let's have another copy, if we may, for the Examiner. Do you have another one?

By Mr. Howland:

Q. Now, I call your attention to the sheet marked for identification as Exhibit 49, and ask you if that is the statement of "Analysis of Revenue, Profit, Tons handled, and Equipment by years" of the Des Moines Transporta-[fol. 2306] tion Company, Inc.?

A. That is. It was taken from the annual report, yes.

Q. And it shows beginning in 1944 that the tonnage handled, or tons handled, was 49,871, and it shows an increase in tons handled each year with a total in 1951 of 182,226?

A. That is right.

Q. It shows total revenue commencing in 1944 with $490,433 and increasing each year to a total revenue of $2,737,130 in 1951?

A. That is right.

Q. And also shows the number of units of trucks, tractors and trailers owned as of the year ending in each year?

A. That is right.

Exam. Carpenter: Further explain the figures shown in parenthesis as to 1944 and 1945. I suppose that is a deficit?

A. That is right.

By Mr. Fowler:

Q. That is a red figure?

A. That is a loss.

By Mr. Howland:

Q. The two years, 1944 and 1945 in parenthesis, would indicate normally a red figure or a loss figure?

A. That is true, an operating loss or a loss.

Q. And the black figures without parenthesis are as shown "Profit before Taxes" and "Profit after Taxes" in each of the years?

A. That is right.

Q. And in each of these years the figure of "Profit before Taxes is after payment of the executives' salary, and [fol. 2307] matters of that sort?

A. That is true.

Q. And is it not true that in the year 1951 that the officers, owners and partners in the Des Moines Transportation Company received in the year 1951 salaries totalling $61,799?

A. I would think that was right. That is the report, the annual, wasn't it?

Mr. Howland: That is the annual report to the I. C. C., evidently.

Exam. Carpenter: This would be a good place to stop to have a recess.

Mr. Howland: I believe it is.

(Short recess.)

Exam. Carpenter: You may proceed.

By Mr. Howland:

Q. Mr. Hobbs, as I understand it, your company-owned terminals are located at Chicago, Omaha, Twin Cities, Mason City and Des Moines?

A. They are not all company-owned. Company-operated.

Q. Company-operated.

A. Our own personnel, on our own payroll.

Q. With your own employees?

A. That is right.

Q. Now, you have local cartage or draymen at the other points which you refer to as your terminal points?

A. Our agency stations.

[fol. 2308] Q. Or agency stations. I believe you said on direct examination, at least I so understood, the Roederer Transfer and Storage Company was the local agency at Davenport?

A. That is right.

Q. Now, when was that arrangement first made?

A. Well, I believe it would have been during the war, 1943 or 1944. I believe that would be about when it was.

Q. And was there any change in the process of being effected there or in contemplation with your setup at Davenport?

A. There hadn't been up until the last thirty days. In the last thirty days we have stationed a salesman part time in that area.

Q. But you have not established a company-operated terminal?

A. No, we haven't. Roederer has always looked after our pick-up and delivery and any sales work.

Q. And before about thirty days ago you did not have a solicitor on the street in Davenport?

A. Not of our own, on our own payroll.

Q. But you have put that in sometime within the last thirty days?

A. That is right.

Q. And that solicitor, of course, operates in the entire Tri-City area for your company?

A. He was put in there primarily to try and develop overhead traffic to Omaha, the Twin Cities, and Des Moines.

[fol. 2309] Q. Now, you have no intrastate authority on U. S. Highway 6, I believe?

A. None.

Q. And what intrastate rights does the Des Moines Transportation hold in the State of Iowa?

A. Oh, we hold intrastate rights from here over Highway. it goes to Ames.

Q. 69.

A. 69 to Ames, over 30 to Denison, over 69 to Garner, Iowa, to Mason City, serving intermediate points; and we have other authority over Highway 3 in a general area to Eagle Grove and many little points in that area.

Q. What service do you perform on U. S. 69 north of Ames?

A. North of Ames?

Q. To Garner, up through Belmond, Blairsburg and those points?

A. We have a truck that leaves here about six o'clock in the morning and peddles, going up 69 to Mason City.

Q. Is that the old Leonard Line that you acquired up to Mason City?

A. There were several of them jointly, and we had that application cleaned up by the Commission, and there was about four leases in it.

Q. Leonard had some leased authority?

A. I think so.

Q. He operated under a lease, and you ultimately got [fol. 2310] the Leonard authority plus whatever leases he had?

A. That is right.

Q. You finally established your authority there, both interstate and intrastate?

A. That is right, and we have a truck that leaves Mason City about nine o'clock in the morning and peddles coming back.

Q. Southbound to Des Moines?

A. That is right. We have another truck that goes daily into, this goes into Eagle Grove and peddles that area up there. We have another one——

Q. What towns are served by that operation?

A. Eagle Grove?

Q. Yes.

A. I don't know as I can tell you all of them.

Q. Is that the Clarion operation?

A. That is the Clarion operation, Goldfield, Eagle Grove, Woolstock, Clarion.

Q. C-l-a-r-i-o-n.

A. It seems like there is more than that.

Q. Do you go into Webster City on that operation?

A. No, we have no authority into Webster City.

Mr. Howland: That is all that I have.

By Mr. Nolan:

Q. Mr. Hobbs, Mr. Birney B.ker is the President of your company and was during the month of October, 1951, I believe?

[fol. 2311] A. That is right.

Q. And he appeared as a witness on the application, on the hearing on the application for temporary authority in this case?

A. Yes.

Q. Now, is it the policy of your company to attempt to avoid a multiple interline of shipments, for instance, a shipment destined to Wellman, Iowa, say from, originating at a point east of Chicago, would your company refer that to a direct line carrier rather than interline it with some company in Chicago and take it to a point on your System and interline it again with some destination carrier, if possible?

A. I believe it would be the policy of our company, if it was just a shipment, to handle it, but if it was repeated, to some one, possibly suggest that was better service than we could offer.

Q. Would you agree with Mr. Baker's testimony on that subject when this question was asked of him and this answer was given? "Q. Mr. Baker, is it your company's policy, like other companies' policy, to attempt to avoid a multiple interline, do you not? The answer is "Very definitely." Following was this question. "Q. For instance, a shipment tendered to your company at Chicago by a carrier coming in from the east destined to a point like Kalona, Iowa, or Wellman, Iowa, to which point your company has no authority to serve, you would not solicit that type of freight?" Answer, "We attempt to get them to give it [fol. 2312] to a direct line carrier if possible."

A. That would be true, having the shipper's interest at heart.

Mr. Nolan: Yes, sir.

Mr. Fowler: Mr. Hobbs——

Mr. Howland: We desire to offer in connection with the cross-examination, Exhibit 49.

Redirect examination.

By Mr. Fowler:

Q. Mr. Hobbs, on cross-examination there was some discussion about your peddle operations, and to summarize it you do conduct peddle operations out of Des Moines north to Ames, west as far as Jefferson, continuing from Ames north to Mason City and Garner, and then east to Charles City and that area in there, and you do afford a daily peddle service in interstate and intrastate commerce in that territory?

A. We do. We operate a truck daily from Des Moines to Ames, on to Boone and Ogden, on to Grand Junction and those points west of there to Carroll, and on to the Eagle Grove area. From one to several to Mason City, serving those intermediate points, and we have a regular run to Charles City, which is an intrastate run only, plus the peddles that we run east and west.

Q. Now, with respect to the importance of interline traffic to a motor common carrier, can you tell us what per cent the total tonnage handled by your line is interline traffic?

A. Tonnage-wise it is fifty-one per cent at the last survey.

Q. And shipment-wise?

[fol. 2313] A. Forty-six, that is total.

Q. If you know can you tell us what per cent of the total shipments you handle are shipments which are handled from a point to a point on your system?

A. Read the question.

Q. I will withdraw that. If you know can you develop for us the relationship between shipments handled exclusively from origin to destination over your line in relation to interline traffic you give to other carriers and interline traffic given to you, shipment-wise?

A. I have a list of a four week trade survey made in August of 1950 under the supervision of Wolf & Company.

developed that the tonnage handled by the Des Moines Terminal during that period there was 968 shipments of 2,200,000 pounds that were on-line shipments, shipments originated by the Des Moines Transportation Company at Des Moines; and given to one connecting line carrier for that four week period was 2,046 shipments or 1,898,000 pounds. Shipments originated by a connecting line carrier and tendered to the Des Moines Transportation Company at Des Moines for that four week period were 1,203 shipments of 1,223,000 pounds. Shipments for that same period of which the Des Moines Transportation Company participated, but there were two or more connecting line carriers, were 360 shipments for 136,000 pounds.

Q. Now, with respect to your interline, interchange arrangements at Des Moines, do you have a mutual interline [fol. 2314] arrangement with the Iowa-Nebraska Transportation Company?

A. Iowa-Nebraska, and we interchange with other carriers, yes.

Q. And what is the fact as to whether their account with you is current or otherwise?

A. I couldn't answer for them individually. I have had no occasion to check it.

Q. Have you had any report made to you that they were not in a current position?

A. No.

Q. In connection with traffic that is handled by your company and the Iowa-Nebraska Transportation Company, have you had called to your attention any complaints about claims?

A. I have had no conversation with our people regarding the Iowa-Nebraska at all in so far as claims or accounts, either.

Q. Have you at any time ever had tendered to you shipments originating on the line of the Clipper Transfer Company for points destined on Highway 6?

A. Not to my knowledge.

Q. What is the fact the H & W Motor Express Company, have they tendered you shipments on U. S. Highway 6 served by you?

A. At what point?

Q. At Davenport, or any other point?

A. I would have no knowedge. We interline with the H & W. Whether they were destined on Highway 6 or not, I have no knowedge of it.

[fol. 2315] Q. Have you ever had tendered to you at Davenport by the Dohrn Transfer Company small shipments destined to points on Highway 6 served by you?

A. I don't know. We interline some with Dohrn. I wouldn't know.

Q. What is the situation to the same effect as to the Central Transfer Company?

A. I would have no knowledge of it.

Q. And the Knox Motor Service?

A. I wouldn't know.

Q. And the Atkins Transfer Company of Louisville, Kentucky?

A. I wouldn't know.

Q. If any of these carriers tendered to you interline shipments, small or large, at your Tri-City terminal, destined to points served by you on U. S. Highway 6, would you accept them and handle them?

A. Yes.

Mr. Fowler: Off the record.

(Discussion off the record.)

OFFER IN EVIDENCE

Mr. Howland: I will offer in connection with the cross-examination of Mr. Hobbs, Exhibit 49.

Exam. Carpenter: The document is received in evidence as Exhibit 49.

(Applicant's Exhibit No. 49, Witness Hobbs, was received in evidence.)

[fol. 2316] Exam. Carpenter: All right. Recross.

Mr. Fowler: Pardon me.

Recross-examination.

By Mr. Howland:

Q. You have never attempted to offer a peddle service to small towns having a population of fifteen hundred, more or less, except in those cases in which you had both interstate and intrastate rights, have you?

A. Not other than what was required.

Q. And what is the fact as to whether a peddle service such as you operate between Des Moines and Ames and Mason City is a more or less expensive type of service, and the operating cost of that service is proportioned to the total revenue than a point to point service such as Chicago to Des Moines?

Mr. Fowler: Now, wait just a minute. All right.

A. We recently made a survey on the operation to Carroll, Iowa, from Des Moines, which is a peddle operation and on which there is practically no return haul whatsoever. Over a period of a month that run developed sixty-eight cents per mile a round-trip for the two hundred eight miles. At that time our total operation had a break-even point of sixty-two cents.

By Mr. Howland:

Q. That is your over-all operation, and of course, your Chicago-Des Moines, or Chicago-Omaha per mile revenue would be higher than the sixty-eight cents in connection with the Des Moines to Carroll operation?

A. Yes, that is true.

[fol. 2317] Mr. Fowler: That is all.

Exam. Carpenter: You are excused.

Mr. Fowler: Do you have a man, Mr. Robinson?

(Witness excused.)

GEORGE H. WOLTER was sworn and testified as follows:

Direct examination.

By Mr. Robinson:

Q. Will you state your name?
A. George A. Wolter.
Q. Where do you live, Mr. Wolter?
A. Albia, Iowa.
Q. What company are you connected with?
A. The P. & W. Truck Line.
Q. Are you the owner of that company?
A. I am.
Q. And has there been issued to the P. & W. Truck Line a certificate by the Interstate Commerce Commission?
A. There has.
Q. And what is your certificate number?
A. MC–111154.
Q. And what is the date of that certificate?
A. The 25th day of November, 1949.

Mr. Robinson: And that has been marked for identification, Exhibit No. 50.

(The statement referred to was marked as "Intervenor's Exhibit No. 50, Witness Wolter," for identification.)

[fol. 2318] By Mr. Robinson:

Q. Is that a true and correct copy of your certificate, Mr. Wolter?
A. I think so.

Exam. Carpenter: You better get your number of pages on there.

Mr. Robinson: Consisting of eight pages.

By Mr. Robinson:

Q. That is a true and correct copy?
A. Yes.
Q. Now, has there also been issued to you Certificate No. MC–111154, Sub. 10?

A. That is correct.

Q. And what is the date of that certificate?

A. The 2d day of May, 1952.

Q. You don't have extra copies of Sub. 10 with you, do you?

A. No.

Q. Now, with reference to your main Certificate MC-111154, do you have authority to serve a number of points on U. S. Highway No. 6?

A. I do.

Q. And referring to particularly Sheet 4 of your certificate with reference to the transportation of emigrant Movables as set out, a certain territory in Iowa, and immediately under that Machinery and Farm Equipment and parts thereof from Chicago, East Moline, Rock Island, Illinois, to that Iowa territory, and also Binder Twine from Chicago, Illinois, to the Iowa territory, is that correct?

[fol. 2319] A. That is right.

Q. And, then, also on Sheet 6 you have authority to transport Iron and Steel products from Chicago, Illinois, and the Chicago, Illinois, Commercial Zone, to Omaha, Nebraska, and points and places in that part of southeastern Iowa on or enclosed by U. S. Highway 6 and on east of U. S. Highway 169, do you not?

A. That is right.

Q. Now, have you been hauling the commodities in the scope of your certificate to points and places on U. S. Highway No. 6?

A. Yes.

Q. Now, have you made a check, or did you make a check today of 1952 to determine how many loads you have made?

A. Yesterday afternoon about three o'clock I told one of the bookkeepers to get me the fold of bills on one week of hauling in 1952.

Q. And did you do that?

A. He pulled the freight bills out of the file.

Q. And do you have those freight bills with you?

A. I do.

Q. Now, for what period of time was that?

A. A six day period from February 4th through February 9th.

Q. Of what year?

A. Of 1952.

[fol. 2320] Q. Now, during that period in February, 1952, how many shipments did you transport out of Chicago and the Chicago Commercial Zone to that portion of Iowa where you have authority, and particularly those points on U. S. Highway 6 and south in your territory?

A. Personally I never counted.

Q. I beg your pardon?

A. Personally I never counted these shipments.

Q. According to your account and tabulation, according to your bills, there are eighty-eight shipments. Would you say that was correct, Mr. Wolter?

A. There is quite a few freight bills, but I personally never counted them.

Q. Now, did those shipments consist of whole truckloads and also small shipments?

A. I don't know. All I know that was for one week's period on these days, I instructed the man what to do.

Q. Now, you have the supporting file here, do you not?

A. I have the freight bills.

Q. Pro No. O-8102 of February 5, 1952, a shipment of one hundred eighty pounds. That is in there?

A. What was the last two figures.

Q. What was that?

A. What was the last two figures.

Q. 02.

[fol. 2321] A. That is for one hundred fifty-eight pounds.

Q. And the one immediately after that, O-8103, was for how many pounds?

A. Six hundred fifty-five pounds.

Q. And the other shipments in that bunch of bills range up to 30,000 pounds or more in some instances?

A. They go up to 34,000 would be my opinion.

Q. How many trucks do you have? First, take the straight trucks.

A. Seven.

Q. And how many tractors?

A. Fourteen.

Q. And how many semi-trailers do you have?

A. Twenty-two.

Q. Do you have any terminal at Albia, Iowa?

A. I do.

Q. Do you have one in Chicago, Illinois?

A. 702.

Q. You have one in Chicago, Illinois?

A. Not in town, not right in Chicago, 702 Hoffman, Hammond, Indiana.

Q. Do you have terminals at other points besides Albia, Iowa, and Hammond, Indiana?

A. Yes.

Q. And whereabouts?

[fol. 2322] A. I also have a terminal in St. Louis, we have a terminal of our own. We have one at Knox City, Missouri, and one at Quincy, Illinois, and then we have arrangements here in Des Moines with the Des Moines Storage——

Q. Des Moines Transfer Company.

A. The Des Moines Transfer Company on Tuttle Street.

Q. 9th and Tuttle?

A. Yes.

By Mr. Howland:

Q. What is the name of the man you do business with there?

A. Nick. Nick is his first name.

By Mr. Robinson:

Q. How many years have you been in the business, Mr. Wolter?

A. Since 1917.

Q. And with the business formerly known as O. E. Poe and G. H. Wolter, doing business as P. & W. Truck Line?

A. No, not at that time. I was in the trucking business myself before that.

Q. But previous to the issue of the certificate in 1949, wasn't the certificate in the name of O. E. Poe and G. H. Wolter, doing business as P. & W. Truck Line?

A. Yes.

Q. And later it was transferred over to you as an individual?

A. That is right.

Q. Have you ever refused to haul any of the commodities [fol. 2323] which you are authorized to transport within the scope of your certificates?

A. No, sir.

Q. And are you holding yourself out as ready and willing to transport and haul those particular commodities?

A. I am.

Q. Are you able to transport more freight than you are now hauling?

A. I think so.

Q. And are you willing and ready to do that?

A. That's right.

Q. Now, you recently purchased some additional authority which was formerly in the name of Werner S. Kemmer?

A. That is right.

Q. Doing business as the Kemmer Motor Freight Service?

A. That is right.

Q. And that certificate is now in your name under Docket MC–111154, Sub. 10?

A. That is right.

Q. As of May 2, 1952. Now, under that certificate are you authorized to transport general commodities from St. Louis, Missouri?

A. I am, irregular route.

By Exam. Carpenter:

Q. To what points?

By Mr. Robinson:

Q. To what points?

A. Any point in the State of Iowa.

[fol. 2324] Q. And that is set out in that particular certificate, is it not?

A. Yes.

Mr. Robinson: Pardon me, off the record, off the record.

(Discussion off the record.)

By Mr. Robinson:

Q. Mr. Wolter, under your Certificate Sub. 10, you do have authority to transport general commodities between points and places in Clark County, Missouri, on the one hand, and, on the other, points and places in Iowa and Illinois?

A. That is right.

Q. And under that same certificate do you have authority to transport general commodities between Kahoka, Missouri, and certain routes set out in such certificate in the State of Missouri?

A. I do.

Q. And are you rendering the service as authorized in Certificate Sub. 10? Are you rendering that service authorized in Sub. 10?

Exam. Carpenter: The answer is "yes".

A. Yes.

Exam. Carpenter: You will have to speak up so the reporter can hear you. He is not watching you shake your head.

By Mr. Robinson:

Q. Mr. Wolter, if this application is granted, will that be a benefit or a detriment to your business?

Mr. Nolan: Objected to as calling for an opinion and [fol. 2325] conclusion of the witness. There is no showing the witness knows what the application embraces, or what service is proposed here.

Exam. Carpenter: I will overrule the objection. Go ahead and give his opinion if he has one.

A. I believe I know it wouldn't help my business. If anything it would hurt it.

By Mr. Robinson:

Q. Do you have competition now in the State of Iowa from Illinois points?

A. Lots of competition.

Q. And you have competition from the State of Missouri to Iowa points where you have authority to serve?

A. I do.

Q. And do you want more competition?

Mr. Nolan: Oh, that is objected to.

Exam. Carpenter: Objection sustained.

Mr. Robinson: You may cross-examine.

Mr. Nolan: I would like to cross-examine. What time is it? I don't know whether I can get through before midnight or not.

Exam. Carpenter: If you don't get through before midnight I shouldn't let you start.

Cross-examination.

By Mr. Nolan:

Q. Mr. Wolter, you have testified that you directed one of your employees to present to you freight bills for a week, the week being February 4, 1952, to February 9, [fol. 2326] 1952, is that correct?

A. That is right.

Q. And there were some eighty-eight freight bills which he tendered to you?

A. I didn't say how many.

Exam. Carpenter: Approximately that.

By Mr. Nolan:

Q. Approximately that?

A. Yes.

Q. Now, Mr.——

Exam. Carpenter: Mr. Robinson testified there were eighty-eight.

Mr. Robinson: I counted them. If there is any doubt about it you can count them, Cliff.

By Mr. Nolan:

Q. Mr. Wolter, your operations westbound from Chicago primarily is the handling of what we call rough freight, steel, and things of that character?

A. I don't think so.

Q. Well, now, your eastbound operation, that is a livestock operation into the Chicago market, is it not?

A. Some. Some is junk. Some, household goods.

Q. You do operate as a livestock carrier from the territory in Iowa to the Chicago livestock market?

A. I operate as that as a part of my operation.

Q. Yes, and then you have authority to, and do solicit, the handling of what we call rough or bulky freight back [fol. 2327] on your livestock trucks, primarily steel and things of that character?

A. No, tractors, combines, and any machinery of any kind.

Q. Now, have you examined these freight bills, Mr. Wolter, to determine where you got the merchandise and where you delivered it?

A. I just asked him to get me examples of the freight bills for the week.

Q. What do you understand is proposed by the Rock Island Motor Transit Company in this case?

A. Well, I received a letter from the Interstate Commission at Washington telling me, they are from some Rock Island attorneys, they had filed papers for additional authority for some occasion.

Q. What do you understand that the Rock Island Motor Transit Company is asking for in this case?

A. For to move more than five thousand pound shipments.

Q. And what territory?

A. Between Chicago and Omaha.

Q. Any other points?

A. Well, I don't believe I read any more than that. I might have not looked close enough.

Q. Have you been familiar with the operations of the Rock Island Motor Transit Company for the past thirteen years' time?

A. I was hauling into Chicago when they started.

Q. You understand that the Rock Island Motor Transit [fol. 2328] Company is the successor to the old White Line Freight Company?

A. That is right.

Q. And what difference, do you understand, that the present application proposes in the way of service than the service that has been operated and performed by the Rock Island Motor Transit Company for the past thirteen years?

A. Please make the question a little clearer. I didn't get that.

Q. Well, I will put it this way. Do you understand there is any difference in what the Rock Island Motor Transit Company is trying to do now under this application than what they have done for several years prior to August, 1951, and by "prior" I mean before August, 1951?

A. Well, I understand they are trying to gain more authority than they have. That is my impression of it.

Q. Is it your understanding now the Rock Island Motor Transit Company is trying to get more authority than they have had before, is that right?

A. Their authority has been limited, and they were trying to get it, more authority.

Q. Well, more than they had, or to get restored to them the authority they did have?

A. More than they had.

Q. To get more authority than they had, is that right?

A. I believe so.

[fol. 2329] Q. That is your understanding?

A. At least more than they have at the present time.

Q. Is it your understanding they are seeking to get more authority than they had when they were operating without any restrictions, is that your understanding, or only trying to get restored to them the authority they formerly had? Now, which is your understanding of that?

A. Well, I was under the impression they were trying to broaden their authority.

Q. Now, Mr. Wolter, you have produced here in the hearing some eighty odd freight bills and from which you testified, in which you referred to representative shipments

you handled during the week of February 4th to February 9th, 1952, for shipments going into the territory involved in this case, is that right?

A. Along Highway 6.

Q. Along Highway 6.

A. 6, and I don't know whether there is any into Omaha. I tell you I didn't look at the freight bills. I picked out one week. I couldn't tell you. The freight bills are there for themselves.

Q. If, upon examination of these freight bills, approximately two-thirds of them should they represent shipments handled by your company from points in the Chicago Commercial Zone to Ottumwa, Iowa, then those shipments would not be to any points along Highway 6, would they?

A. No, that is right.

[fol. 2330] Q. Now, about how many different points would you say from your recollection you handled shipments to on Highway 6 during that particular week in February in 1952, to which we are referring to?

A. I couldn't tell you because I never made it up. I never went over and checked them. A fair example, I try to be fair in anything I do, and reached in and got a week of freight bills and there they are.

Q. I think I can shorten this up. Mr. Wolter, I will hand you freight bills which you presented to me in connection with your testimony, in regard to shipments handled by your company during the week of February 4, 1952, to February 9, 1952, and I will ask you if there are not fifty-four freight bills there which show that your company handled shipments from the Chicago Commercial Area to Ottumwa, Iowa? Do you want to take my word for it?

A. I will take it, O. K.

Q. What is the answer to that question?

A. I will say you are right.

Q. Those freight bills show freight shipments from the Chicago Commercial Zone to Ottumwa, Iowa, is that not right?

A. Yes.

Q. Now, I will hand you a group of fifteen freight bills covering the period from February 4, 1952, to February 9,

1952, which show, do they not, a freight originating in [fol. 2331] the Chicago Commercial Zone, including Gary, Indiana, to Des Moines, Iowa. Will you examine those and see if that is correct?

A. That is correct.

Q. Now, in connection with the merchandise handled by your truck line on these shipments from the Chicago Commercial Zone to Des Moines as represented by these fifteen freight bills, do they not show that every one of the shipments handled by you during that period of time from the Chicago Commercial Zone, including Gary, Indiana, represent either a truckload, or substantially a truckload of steel from the point of origin to the point of destination at Des Moines?

A. Were there any under-truckloads.

Q. The smallest I found was a ten thousand pound item.

A. I think they all do except one here. One was an L. T. L. item.

Q. What was the answer?

Exam. Carpenter: All except one was an L. T. L. shipment.

By Mr. Nolan:

Q. And this shows steel. By that you mean fencing material, or fabricated steel of some kind, is that correct?

A. It could have been, yes.

Q. And this shows, among other things, the commodity carried, the date on which it was transported, and also shows the rate, is that not right, forty-six cents a hundred from Gary, Indiana, to Des Moines, Iowa?

[fol. 2332] A. Yes, sir.

Q. Now, among the freight bills you handed me was there not one freight bill on February 5, 1952, showing a shipment from Hammond, Indiana, to Kellogg, Iowa, showing the transportation of steel on that date, representing a truckload quantity of steel handled by your company on that occasion?

A. That is right.

Q. And that shows a revenue of forty-two cents from Hammond, Indiana, to Kellogg, Iowa?

A. That is right.

Q. Now, I will hand you what you have referred to as freight bills covering the operations of your company from February 4, 1952, to February 9, 1952, for freight handled by your company, and I will ask you if those freight bills do not represent shipments from the Chicago Commercial Zone, including Gary, Indiana, to Newton, Iowa, for the transportation of steel in truckload quantities?

A. They do.

Q. Those fourteen or fifteen freight bills show the movement of steel in truckload quantities?

A. Is there any less in there?

Q. I didn't find any less in there. This is off the record.

(Statement off the record.)

By Mr. Nolan:

Q. That is correct, these fourteen or fifteen freight bills show transportation by your company during that [fol. 2333] period of time, which were part of the freight bills which you say your bookkeeper pulled out of your freight bills for merchandise handled by you into the Iowa territory involved in this case from the Chicago Commercial Zone of steel in truckload quantities to Newton, Iowa?

A. Over a five day period.

Q. Over a five day period, yes. Among the freight bills which you have tendered for inspection, appear to be four freight bills covering the period, included in the period February 4, 1952, to February 9, 1952, for the transportation of freight by your company, and referred to by you in your direct examination, which appear to cover shipments from the Chicago Commercial Zone, including Gary, Indiana, to Davenport and Bettendorf, Iowa, which are contiguous cities, are they not, Davenport and Bettendorf? State whether or not those freight bills do not show the movement of steel from Gary, Indiana, or other points in the Chicago Commercial Zone, to Davenport and Bettendorf, Iowa.

A. They do.

Q. And is it not true that those four freight bills show that there were at least three truckload quantities of steel handled by your company under those freight bills? They represent truckload shipments, do they not?

A. They do.

Q. And then the fourth one shows it was handled on the 6th day of February, 1952, and showing 8,770 pounds of [fol. 2334] steel from Gary, Indiana, to Davenport, Iowa, and may that have been handled on one of the other trucks handling substantially a truckload?

A. This was an overflow.

Q. That was an overflow.

A. You can see that. It went with that one.

Q. Pro No. CO8124 represents the main shipment, and Pro No. CO8125 represents——

A. This 8,770 pounds is an overflow of freight bill CO-8124.

Q. And how did this overflow move, and when did it move?

A. It moved the same day because the bills are made out the same day, and they have been signed by the same company.

Q. Now, I notice here now, this shipment, on the principal shipment on February 6, 1952, Pro No. CO-8124, that shows a shipment from Gary, Indiana, to J. I. Case Company at Bettendorf, Iowa, is that right?

A. Yes.

Q. And that shows that was paid on February 21, 1952, whereas this overflow freight bill shows it was paid on February 16, 1952. What is your explanation for that?

A. I would have no way of telling. That is out of my department.

Q. You are just the boss, that is all. Well, now, what I am trying to get at, Mr. Wolter, is it fair to say that your operations from the Chicago territory into the Iowa territory represent primarily truckload quantities of merchandise in the steel and farm implement classification? [fol. 2335] A. Not necessarily, no.

Q. Well, can you find any freight bills showing any other kind of merchandise in any other quantity of merchandise

in these eighty-eight freight bills you present here for inspection?

A. That is right, I can't, but at that time of year when I picked out the freight bills, that was all that was moving at that time. Of course, I don't have my livestock hauled in——

Q. I am talking about the westbound operation. Do you haul livestock from the Chicago market back into the Iowa territory?

A. I have, but not very often.

Q. Some feeder stock when somebody doesn't get what they want for their cattle, they haul them back home. You have done that, but so far as these eighty-eight freight bills, Mr. Wolter, they represent truckload quantities in practically every instance, except maybe an overflow of steel and steel products?

A. That is all on those five days.

Q. And some fifty odd bills were to Ottumwa, Iowa, and the rest of them were to points we referred to as Davenport, Bettendorf, Newton, Kellogg, and Des Moines, isn't that true?

A. Yes, sir.

Q. And I believe you told Mr. Robinson, your attorney, those represented typical shipments handled by your company in the operation of your business?

A. Seasonable.

Q. Typical of the season business?

[fol. 2336] A. At that time of the year, yes, sir.

Q. What are you hauling?

A. Binder twine, tractors, steel, household goods, rendering works equipment and machinery.

Q. If you are hauling any binder twine out of the Chicago area into the Iowa territory, that would move in truckload quantities, would it not, ordinarily?

A. It depends on the price. Sometimes the dealers don't have enough money to buy a full load of binder twine. It is a high priced product. It runs into quite a lot of money.

Q. It does come out in substantial quantities?

A. If it is going to the jobber or dealer, it does.

Q. Well, farm equipment comes out to the Iowa territory in substantial quantities?

A. No, I just had a one track tractor.

Q. What is that, a "cat"?

A. Yes.

Q. What did that weigh?

A. 11,120 pounds.

Q. That is a pretty fair load, isn't it?

A. Well, it is 12,000, the L. T. L. weight was that the Midwest Motor Freight was on it.

Q. And where did that move to?

A. The International dealer at Corydon, Iowa.

Q. Corydon, Iowa. That was not on No. 6, then, was it, [fol. 2337] Corydon?

A. The last one I hauled.

Mr. Nolan: Oh, that is all.

By Mr. Howland:

Q. Mr. Wolter, how far is Albia from Des Moines?

A. Sixty-eight miles.

Mr. Nolan: That is all.

Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Robinson:

Q. Mr. Wolter, under your certificate you have authority to haul farm machinery parts, do you not?

A. That is right.

Q. As well as the farm machinery?

A. I do.

Q. And do you haul farm machinery parts?

A. I do.

Q. And do you haul the various commodities at various times of the year within the scope of your certificate?

A. I think we do.

Mr. Robinson: That is all.

Exam. Carpenter: Recross.

Mr. Nolan: Just a minute.

By Exam. Carpenter:

Q. Mr. Wolter, in getting out of St. Louis for points in Iowa, you tack your irregular service from Clark County with your regular route authority into Iowa?
[fol. 2338] A. Yes.

OFFER IN EVIDENCE

Mr. Robinson: We offer in evidence Exhibit No. 50.
Exam. Carpenter: Any objection?
Mr. Nolan: No objection.
Exam. Carpenter: The document is received in evidence as Exhibit No. 50.

(Intervenor's Exhibit No. 50, Witness Wolter, was received in evidence.)

Exam. Carpenter: Anything further? (No response.) You are excused, Mr. Wolter.

(Witness excused.)

Exam. Carpenter: We will adjourn until tomorrow morning at 9:30 a. m.

(At 5:40 p. m., May 21, 1952, hearing adjourned to 9:30 a. m., May 22, 1952.)

[fol. 2339] TRANSCRIPT OF PROCEEDINGS OF MAY 22, 1952

Exam. Carpenter: We will proceed.
Mr. Fowler: Mr. Smiley.

DON SMILEY was sworn and testified as follows:

Direct examination.

By Mr. Fowler:

Q. Will you announce your name?
A. Don Smiley.
Q. What is your residence?

A. Atlantic.

Q. With what company are you connected?

A. Four freight lines.

Q. What is the name under which you operate?

A. Smiley Transfer and Storage.

Q. That is located in Atlantic?

A. Yes, sir.

Q. What we have under review here is application of Rock Island Motor Transit Company for certain operating authority and the subject I want to review with you is the character of motor transportation service which is now available to the public in and around the territory of Atlantic, Iowa.

Now, what is the character of the business you run there at Atlantic?

A. Drayage and storage and moving.

Q. And do you handle any freight for railroads?

[fol. 2340] A. No, sir.

Q. Do you handle any freight for the Rock Island Motor Transit Company?

A. No, sir.

Q. Or the Rock Island Railroad?

A. No.

Q. Did you at any time handle——

A. I have not handled rail freight for two years.

Q. You mean you did up until a couple of years ago?

A. Until the Rock Island Motor Freight put on their own trucks.

Q. So for some time, at least, you did handle cartage work for the Rock Island Motor Transit Company?

A. Not the Transit Company, but the Rock Island Railroad.

Q. Does the Rock Island Motor Transit Company have their own trucks at Atlantic for pick-up and delivery?

A. Yes, sir.

Q. And I believe we have been told that those trucks handle both the Rock Island Motor Transit and railroad freight. Is that your understanding?

A. Yes, sir.

Q. And the Rock Island Motor Transit and the rail dock are at the same building?

A. Yes.

Q. And do you act as commercial agent or local agent for some motor carriers?

[fol. 2341] A. Yes, sir.

Q. Name those, please?

A. Watson, Des Moines Transportation, Bos Truck Lines and Iowa-Nebraska.

Q. Now, when you speak of Watson you refer to Watson Bros. Transportation Co., Inc., I think it is?

A. Yes.

Q. And Iowa-Nebraska refers to Iowa-Nebraska Transportation Company, Inc., Mr. Petersen's operation?

A. Yes, sir.

Q. Now, what character of a dock do you have there?

A. I have a cement floored dock and tile building.

Q. And is freight delivered to you or docked by the carriers you mentioned during various hours of the day?

A. Yes, sir.

Q. And if it should be delivered at night is there an arrangement so that they can unload it at your dock?

A. Yes, sir.

Q. As well as pick up?

Q. Yes, sir.

Q. In addition to the carriers you named that you represent are there other carriers operating in and out of Atlantic?

A. Just contract carriers and Rock Island Motor Freight.

Q. What is the type of shipment you handle for these several carriers you represent? I mean by that, are they [fol. 2342] minimum shipments?

A. No, sir. They run all the way from minimum to truckloads.

Q. They are small shipments running up to truckloads?

A. Yes, sir.

Q. With respect to Iowa-Nebraska Transporation Company, how frequently do they appear at your dock with freight inbound and to take freight outbound?

A. Twice a day.

Q. And from what direction do those trucks come? I mean by that, does that include shipments coming from Omaha into Atlantic territory?

A. Yes, sir.

Q. As well as Des Moines into Atlantic territory?

A. Yes, sir. Don't get me wrong. We don't take any intrastate.

Q. I understand that. It is interstate interlined Iowa, Nebraska at Des Moines?

A. Yes, sir.

Q. What is the fact you do handle shipments by Iowa-Nebraska-interstate shipments but originating Des Moines so far as physical handling is concerned?

A. Yes, sir.

Q. Can you give us a general idea of the number of shipments you would handle for Iowa-Nebraska Transportation Company in an ordinary day? Better take a week.

A. I would say an average of 20 to 25 a day. It would [fol. 2343] run around 100 to 150 a week in and out.

Q. Are you familiar with Mr. Meredith at Atlantic who runs a hardware and implement store?

A. Mr. Meredith? Yes.

Q. Do any of the carriers you represent perform transportation service for him?

A. Occasionally.

Q. Do you pick up any for him?

A. Yes, sir.

Q. And deliver inbound shipments to him?

A. Yes, sir.

Q. Are you familiar with Robinson Retail Hardware Store?

A. Yes, sir.

Q. Do you pick up and deliver shipments to him?

A. We deliver shipments once in a while. Outbound, if we have any it is seldom.

Q. I presume shipments for hardware and implement stores in Atlantic are almost predominantly inbound?

A. And run minimum to four to five thousand.

Q. Are you acquainted with Mr. Marshall of Atlantic Wholesale Grocery?

A. Yes, sir.

Q. They have their own truck?

A. Yes, sir.

Q. Do you nevertheless have occasion to perform trans-
[fol. 2344] portation service to them for your carriers?

A. In more ways than one. I have freight for them and we work back and forth. If he is in a jam I help him and if I am in a pinch he helps me. I have known of lots and lots of times when he was too busy and I unload for him.

Q. Do they have any substantial amount of freight inbound less truckload?

A. Yes, sir.

Q. And you handle some of that for your carriers?

A. Yes, sir, and truckloads too.

Q. Do you handle outbound shipments for them?

A. Occasionally.

Q. Are you familiar with Linke Chevrolet Company?

A. Yes, sir.

Q. Do you perform transportation service for them?

A. Occasionally on interstate shipments.

Q. Now, in addition to Atlantic do your operations extend to any of the smaller towns around Atlantic?

A. No, sir.

Q. They are just confined to Atlantic?

A. Yes, sir.

Q. Now, with respect to Iowa-Nebraska Transporation Company, have you had any complaint about that company not paying claims?

A. On just one occasion. That was on a mirror and they didn't feel they were responsible. It split at the time [fol. 2345] it was crated. The mirror was still in the frame.

Q. Aside from that have you had any complaints?

A. No, sir.

Q. Have you had any complaints with respect to C.O.D. charges?

A. Well, no, I never had any complaints on C.O.D. charges because most of the time they know it comes C.O.D. They know that.

By Mr. Howland:

Q. You mean the shipper?

A. Yes. The shipper tells them that.

By Mr. Fowler:

Q. Now, with respect to Des Moines Transporation Company. How frequently are their trucks in Atlantic at your dock?

A. They average four days a week.

Q. From which direction?

A. Very little out of Omaha or west. It is mostly out of the east.

Q. What type shipment do you handle for Des Moines Transportation Company?

A. General merchandise.

Q. Do they range from minimum shipments to carloads?

A. Yes, sir.

Q. And I believe you mentioned the Bos Truck Lines?

A. Yes, sir.

Q. How frequently are they at your dock?

A. Every night except Friday.

Q. From what direction?

[fol. 2346] A. Both directions.

Q. In other words, Bos Truck Lines to Atlantic handles Omaha shipments to that territory as well as shipments moving from the east?

A. Yes, sir.

Q. In addition to that you handle shipments for Watson Bros. Transportation Co., Inc.?

A. Yes, sir.

Q. How frequently are they there?

A. On an average three or four times a day.

Q. Now, the shipments you handle for these various carriers, please tell me if you know whether or not those shipments are shipments which come from points outside the State such as Chicago, Kansas City, Minneapolis and St. Paul?

A. I would say 99%. About the only thing intrastate is from Shenandoah and that has to go through Omaha.

Q. Anything from the Shenandoah vicinity is handled through Omaha and that makes an interstate shipment of it?

A. Yes, sir.

Q. You have observed shipments delivered to your dock

from origin points Chicago, St. Louis, Kansas City and eastern points?

A. Eastern points and western points.

Q. Could you give me some idea of the aggregate figure on shipments you handle—that you deliver we will say for the various carriers you represent for a day's period [fol. 2347] or a week's period, which ever you choose?

A. It varies from day to day. All the way from 10 to 80 or 90 thousand a day.

Q. You are speaking of pounds?

A. Yes, sir.

Q. In a normal day?

A. Yes.

Q. If broken down into shipments what will that be?

A. That will vary too. We will average 50 to 60 stops a day.

By Mr. Howland:

Q. That is for all carriers?

A. Yes, sir.

By Mr. Fowler:

Q. Is there a great deal of freight outbound from Atlantic?

A. Not too much. Western Popcorn Company and Voss Manufacturing and Walnut Grove Products and repairs moving back and forth.

Q. Do you pick up from those shippers for the carriers you represent?

A. Yes.

Q. And generally speaking where are those shipments destined?

A. All over the country you might say.

Q. To points outside the State of Iowa?

A. Yes, sir.

Q. Do you have any difficulty handling that type shipment?

A. No, sir.

Mr. Fowler: You may examine.

[fol. 2348] Cross-examination.

By Mr. Howland:

Q. Mr. Smiley, how large a building do you have there?
A. Well, at present the room I have is 60x40.
Q. That is warehouse and office?
A. No, that is just the dock—where we dock freight.
Q. How many pick-up and delivery trucks do you customarily operate?
A. Two.
Q. And you drive one of those yourself?
A. Occasionally, yes.
Q. And how many regular drivers or dockmen do you have?
A. Two.
Q. Those are full-time employees of yours?
A. Yes, sir.
Q. Do you have any office force?
A. Just my wife. She and I take care of it.
Q. You have a telephone, of course, there?
A. Yes.
Q. And you and your wife take care of incoming calls?
A. Yes, sir.
Q. You have a family, I suppose?
A. Yes.
Q. How many children do you have?
A. Five.
[fol. 2349] Q. What are their ages?
A. The oldest is 12 and the youngest is 5 months.
Q. And what are these pick-up and delivery trucks you have?
A. One has an 8x12 box on it and the other 8x14.
Q. Are they Fords or Chevrolets or what?
A. Ford ton and a half.
Q. And you use that equipment in whatever service is necessary?
A. Yes, sir.
Q. For your local cartage business or pick up there?
A. Yes, sir.
Q. And delivery for these other carriers?
A. Yes, sir.

Q. In large shipments, say about 5000 pounds and always in truckload shipments, is it not true that the road unit goes directly to consignees' place of business.

A. Occasionally. I mean some places they can't get a trailer in.

Q. If it can be physically accomplished.

A. Not always on five thousand. I don't even see the drivers unless it is a truckload lot. It is handled by me.

Q. On truckloads you are paid on a tonnage or weight basis for shipments you handle?

A. Yes, sir.

Q. On truckload lots the road driver usually takes that to the consignee's place of business and unloads?

[fol. 2350] A. Yes.

Q. Do you furnish anybody to unload it?

A. Always one man and sometimes two, depending on the situation.

Q. If truckload that is taken into account in connection with your compensation. Is that right?

A. Yes, sir.

Q. And, of course, ordinarly you wouldn't have—What will your day's business run if you don't have any truckloads—if it is all handled by your trucks?

A. It will average out. Very seldom we count truckloads because that is paid on a different basis than less truckload.

Q. The compensation is different?

A. It is rated differently.

Q Do you perform any work in connection with claims?

A. Yes. I make all inspections.

Q. Do you have claim blanks for these carriers?

A. Yes, sir.

Q. And in the case of Watson Bros. you send it to Omaha; Iowa-Nebraska Transporation to Avoca; Des Moines Transportation Company to Des Moines and Bos Truck Lines to Marshalltown?

A. Yes, sir.

Q. You have no tariff or rate service of any kind?

A. No.

Q. When was it you performed pick-up and delivery service for the Rock Island Railroad?

[fol. 2351] A. It started in March, 1946, and I believe in the spring of 1948 they took over. I wouldn't say sure on the date.

Q. Do you recall that at the time when you said they took over you were asking for some additional increase in that compensation?

A. We had talked about it. Yes.

Q. In other words, you thought you should have more money than you were receiving from the railroad?

A. They led me to believe that if things went up they would.

Q. The Rock Island Motor Transit Company has how many trucks in Atlantic?

A. Two.

Q. Two pick-up and delivery trucks?

A. They have three there, but I understand one goes to Harlan.

Q. But they have two on the street.

You are acquainted with Mr. Rice, I suppose?

A. Yes, sir.

Q. He is local agent there?

A. Yes.

Q. Does he have any clerks or anyone in the office?

A. Yes, he has a billing clerk.

Q. Do you have occasions to obtain rate or tariff information from Mr. Rice?

A. Very seldom.

Q. You have on some occasions?

[fol. 2352] A. I have on some things when someone wishes a rate, especially in the last six or eight months when there has been some uncertainty about it.

Q. Mr. Rice, of course, has tariffs?

A. Yes, sir.

Q. And rates of carriers are the same. That is Rock Island Motor Transit rates, generally speaking, are the same rates as rates of Iowa-Nebraska Transportation Company?

A. Yes, sir.

Q. I mean from similar destinations or similar points of origin?

A. Yes, sir.

Q. When did you start your representation of Bos Truck Lines?

A. That was 1947.

Q. And that has continued from 1947 to date?

A. Yes.

Q. And when did you start with Des Moines Transportation Company?

A. I believe that was in the latter part of 1948.

Q. Now, the Des Moines Transportation Company business that you handle at Atlantic is preponderantly volume shipments or truckload shipments, is it not?

A. No, sir.

Q. Is it not true that Des Moines Trans has a larger volume of truckload business than the other carriers you represent?

A. No, sir.

[fol. 2353] Q. Which is the largest carrier so far as your business is concerned in truckload quantities?

A. Well, I would say they run pretty close to the same. If it isn't I think Watson is the biggest.

Q. You think Watson is the biggest?

A. Yes, sir.

Q. Now, you refer to frequency of service and what time does Des Moines Transportation Company normally come into Atlantic with its trucks from the west?

A. Usually before I am there. 6:30 to 7:00 o'clock in the morning.

Q. And you have an arrangement whereby that freight from trucks coming through in the night is put in your warehouse?

A. Yes, sir. We don't leave it open. We have a combination lock.

Q. The drivers have keys to your warehouse?

A. Yes.

Q. How about service from the east—Des Moines coming to Atlantic?

A. Anywhere from 4:00, 6:00 to 6:30.

Q. In the morning you mean?

A. Yes, sir.

Q. So generally shipments by Des Moines Transportation Company are delivered during the night hours. Is that right?

A. 1,293,818 pounds.

Q. Tell what the total outbound was?

A. 435,353 pounds.

Q. And total inbound and outbound?

A. 1,729,171 pounds.

Q. Now, with respect to the same period of 1952, namely January 1, 1952, to April 1, 1952. Total inbound tonnage handled was what?

A. 1,130,043 pounds.

A. Total outbound?

[fol. 2376] A. 467,669 pounds.

Q. And total tonnage inbound and outbound?

A. 1,597,712 pounds.

Q. Will you tell us, if you know, the approximate relationship percentagewise between less truckload and truckload volume that was handled by you?

A. I would say 95% of shipments were less truckload.

Q. What percent of the shipments would you say were less than 5000 pounds?

A. I would say 85%.

By Exam. Carpenter:

Q. What is your position with Maher Bros. Transfer?

A. Office Manager.

Mr. Fowler: Inquire.

Exam. Carpenter: Let's take a short recess.

(Short recess.)

Exam. Carpenter: We will proceed.

Mr. Fowler: One other question.

By Mr. Fowler:

Q. Are you able to tell us what points in Iowa Motor Cargo serve in addition to Iowa City?

A. From observing freight on their equipment in our place and from talking with their drivers I understand they leave freight at Iowa City, take the balance of the load to Cedar Rapids, drop that unit, pick up another and go back to the Tri-Cities.

Q. Do you have a Montgomery Ward Store in Iowa City?

[fol. 2377] A. Yes, sir.

A. They all are.

[fol. 2354] Q. All of them?

A. All of them.

Q. All carriers?

A. Yes, all carriers do it.

Q. That is true also of Iowa-Nebraska Transportation Company?

A. Yes, sir.

Q. And about what time would the Iowa-Nebraska Transportation Company's trucks from Omaha get out there?

A. Coming out of Omaha he gets there from 10:00 o'clock on, depending on what time he gets out of Des Moines. He makes a turnaround there.

By Exam. Carpenter:

Q. 10:00 in the morning or night?

A. Night.

By Mr. Howland:

Q. That is true also of the westbound movment into Omaha?

A. Yes, sir.

Q. I mean anything coming from Des Moines?

A. Yes, sir.

Q. How long have you been acting for Iowa-Nebraska?

A. I started with them the middle of April, 1950.

Q. Middle of April, 1950?

A. Yes, sir.

Q. And you have continued up to the present time?

A. Yes, sir.

Q. And how about Watson Bros., when did you start with them?

[fol. 2355] A. At the same time.

Q. At the same time you did with Iowa-Nebraska?

A. Yes, sir.

Q. What type and character of shipments is the business of Bos Truck Lines? Do they have one particular type of business that is heavier than anything else?

A. No. Just less truckload running from minimum on up.

Q. Do they deliver meat to your dock?

Q. Do you take loads there from Kansas City?
A. Yes, sir.

Mr. Fowler: Inquire.

Cross-examination.

By Mr. Nolan:

Q. This freight you see on Poole Transfer is Minneapolis Freight for West Liberty, isn't it?
A. I couldn't say.
Q. It would be on a southbound truck. You wouldn't see freight on Poole Transfer from the east marked West Liberty, would you?
A. This is again from observation and listening to what the drivers say that it wasn't a load so they left it on and went to Cedar Rapids and delivered the freight on the way back.
Q. You don't know where that freight came from?
A. I know it was destined West Liberty.
Q. But you don't know the point of origin?
A. No.
Q. How long has Motor Cargo been coming into Iowa City? It has been very recent hasn't it?
A. I would say since early fall of 1951.
Q. And their operations are exclusively from points east of Chicago?
A. Yes, sir.
Q. Now, I assume that these exhibits were prepared from freight bills in your possession?
[fol. 2378] A. Yes, sir.
Q. Are you willing to produce those freight bills for inspection and examination?

Mr. Fowler: Wait just a minute. I suppose you are my witness and I have to protect you.
Off the record.

(Discussion off the record.)

Mr. Fowler: May I inquire of the witness as foundation for an objection?
Exam. Carpenter: Yes, go ahead.

A. No, sir.

Q. Most of the freight handled by Bos Truck Lines, is that what is referred to as dry freight in the trade?

A. Yes, sir.

Q. Is that true also of all of the other carriers?

A. We have a little meat with Watson and some perishables with Iowa-Nebraska—frozen foods.

Q. Where does that come from?

A. Omaha.

Q. Now, these carriers that you act for and the Rock Island Motor Transit Company are the only carriers that deliver or pick up shipments in Atlantic that you are acquainted with. Is that right?

A. Yes.

Q. You do no business for Merchants Motor Freight?

A. No, sir.

Q. And so far as you know does Merchants Motor Freight [fol. 2356] make deliveries of shipments in Atlantic?

A. Not that I know of. They haven't in the last few years. They did a number of years ago when I worked for Atlantic Wholesale.

Q. Was that mostly truckload?

A. Yes. Sugar out of the west.

Q. Do you see Red Ball Transfer?

A. They go through but don't stop.

Q. And is that true of some other carriers, On-Time Transfer Company, Prucka Transportation and Union Transfer?

A. Yes, sir.

Q. Quite a number go through on the highway, but never go into town. Right?

A. Yes, sir.

Q. I am not sure whether the record show it, but what is the approximate population of Atlantic now?

A. They say around 7500.

Q. When you referred to C.O.D. claims you were referring to your part of the delivery and collection of C.O.D's.?

A. Yes, sir.

Q. And on what basis are the payments made to you for the service that you perform? Is that on a weekly basis or monthly basis?

By Mr. Fowler:

Q. How much trouble would it be for you to gather up the freight bills from which you developed Exhibits 51 and 52?

A. It wouldn't be much trouble to gather them up, but from that point on I don't know how to answer.

Q. How voluminous would it be?

A. I would say it would cover the top of this desk and the width of a freight bill.

Exam. Carpenter: That would be about six inches high —the top of an ordinary desk and about six inches deep on the desk.

Mr. Fowler: I am going to instruct this witness to refuse to present these freight bills and in doing so I am well aware that admissibility of these exhibits is subject to objection.

By Mr. Nolan:

Q. As I understand it, Bob, you refuse to submit the freight bills from which Exhibits 51, 52 and 53 were pre- [fol. 2379] pared for inspection and examination by me or someone under my direction?

A. Yes.

Q. Now, isn't it true that Watson Bros. have their own pick-up and delivery in Iowa City?

A. They did up until about three weeks ago.

Q. And that is the reason no Watson Bros. shipments are shown?

A. Right.

Q. Have they abandoned their own local pick-up and delivery service? Have they terminated it?

A. They have abandoned their local pick-up and delivery service.

Q. Have you had any merchants in Iowa City complain to you about settlements on loss and damage claims particularly from McCoy Truck Lines?

A. Yes.

Q. And Iowa-Nebraska Transportation Company?

A. Not Iowa-Nebraska. No.

Q. Primarily McCoy Truck Lines?

A. We remit weekly to the companies.

Q. That is on your collections?

[fol. 2357] A. Yes, sir. The following week out of Watson Bros. on Friday we get our check. The others we just deduct.

Q. That is true of Bos Truck Lines?

A. And Des Moines Trans. and Iowa-Nebraska.

Q. With Watson Bros. you remit to Omaha and they pay you the following week?

A. Yes, sir.

Q. Now, you refer to Bos Truck Lines being in Atlantic every night except Friday. Is Bos Truck Lines there on Saturday and Sunday too?

A. It comes in on Sunday.

Q. But not Friday or Saturday?

A. Normally. Once in a while it comes in Saturday night after sundown.

Mr. Fowler: He is a Seventh-Day Adventist and won't work on Saturday.

By Mr. Howland:

Q. You said Watson Bros. was in on a daily basis. Do you mean daily except Saturday and Sunday?

A. They are in every day.

Q. Including Saturday and Sunday?

A. Yes, sir.

Q. Now, these two units you have, do you perform your local moving service with those?

A. No. I have a regular van for that.

Q. You have a household van?

[fol. 2358] A. Yes, sir.

Q. Do you use that for over-the-road service for household goods?

A. Yes, sir.

Q. If anyone was moving from Atlantic to Des Moines, would you perform that service?

A. Yes, sir.

Q. Is that van equipment owned by you?

A. Yes, sir.

Q. And you are also the agent for one of the household goods movers?

A. That is what is brought to my mind now.

Q. Was one of those complaints from Mr. Wagmueller of Barron Motors?

A. Yes.

Q. Now, you were asked about Hedrick Motor Transfer Line. That is a Burlington to Cedar Rapids operation, is it not, primarily?

A. I can't answer that. I know he does operate out of Chicago.

[fol. 2380] Q. Chicago to Burlington and from Burlington north to Iowa City and Cedar Rapids?

A. Sure, that's it.

Q. He is successor to the old Rieke Motor Freight Line?

A. Yes.

Q. Now, under your arrangement with these carriers do you get credit and do your records show outbound truckload quantities or shipments?

A. Yes. There is a record of each shipment.

Q. For instance if the Economy Advertising Company there shipped out a truckload of binding material, it has college annuals which it specializes in, and they moved out by one of these carriers, would that reflect in your tonnage record?

A. Yes.

Q. And a truckload of printed material by Moore's Business Forms, would that also show in your tonnage records?

A. Yes.

I would like to correct my first answer. There would be no book shipments in volume from Economy Printing Company.

Q. If it did move out your records would show that tonnage in your over-all tonnage records?

A. I thought you meant show up on this tonnage record.

Q. That is a seasonable movement that goes out later in the year?

A. True.

[fol. 2381] Q. But any other volume shipments sent by Economy Advertising or Moore Printing would reflect in your records here?

A. The Economy shipments would not reflect in that record here.

A. Watson.
Q. Watson Bros. Household Goods Movers?
A. Yes, sir.
Q. That is a separate company, of course?
A. Yes, sir.

Mr. Howland: I think that is all.
Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Fowler:

Q. Can you recall whether or not you have handled any shipments destined to Atlantic consignees from Paxton-Gallagher Company in Omaha?
A. Yes, sir, we do a lot of that freight.
Q. Do you recall handling any shipments destined to hardware and implement stores in Atlantic from John [fol. 2359] Deere Implement in Moline?
A. Yes, sir.
Q. Do you recall whether you have handled any shipments destined to merchants in Atlantic from Janney Semple Hill & Company in Minneapolis?
A. Yes, sir, we have.
Q. And without being any more specific about it, what is the fact whether or not, generally speaking, you handle shipments from Omaha, Kansas City, St. Louis and Chicago jobbers coming into your dock for re-delivery in town?
A. Yes, sir.

Mr. Fowler: That's all.

Recross examination.

By Mr. Howland:

Q. Mr. Smiley, have there been some occasions in which shipments have been delivered to you for interline with Rock Island Motor Transit Company to points either east or west of Atlantic?
A. No. I have never had anything of that nature.
Q. That is there have never been instances where ship-

ments have been delivered to you for interline with other carriers?

A. No, sir. I have never had any of those.

Q. All of the shipments that you handle are either destined to Atlantic or picked up in Atlantic for further transportation?

A. Yes, sir.

Q. Do you know whether or not any of these concerns [fol. 2360] make deliveries to Rock Island Motor Transit Company at Atlantic?

A. How do you mean?

Q. Would there be cases of shipments destined to places like Wiota, Brayton, Exira or Audubon?

A. Yes, sir.

Q. Do you have?

A. No. I thought you meant merchants in town.

Q. You don't know if there is any other general practice of that sort by other carriers?

A. I could say there isn't.

By Mr. Nolan:

Q. Who is your Secretary of the Chamber of Commerce in Atlantic?

A. Walker, I believe.

Q. Has he been there the last year or two?

A. About a year and a half.

Q. Do you know if he operates a claim service for members of his Chamber of Commerce?

A. A claim service?

Q. Regarding following up claims and damages?

A. Not to my knowledge.

Q. Do you know if he contacts Iowa-Nebraska Transportation Company direct on loss claims and damage?

A. Not to my knowledge.

Mr. Nolan: That's all.

Exam. Carpenter: Are there further questions?

[fol. 2361] Exam. Carpenter: Excused.

(Witness excused.)

lations given by him with reference to Exhibit 53, inbound and outbound tonnage handled by his company for the [fol. 2384] various carriers in Iowa City for the period January 1, 1951, to April 1, 1951, and from January 1, 1952, to April 1, 1952, for reason of refusal of witness to produce the supporting data and records from which said record was tabulated for purposes of inspection and examination in connection with examination of such figures testified to by the witness. The record shows here tabulations of figures on Exhibits 51 and 52, said Exhibits 51 and 52 being prepared from freight bills in his custody and for reason the testimony is incompetent and immaterial when supporting data is not made available for inspection.

Mr. Howland: We join in the motion and also make grounds of that motion as objection to the offer of Exhibits 51, 52 and 53.

Exam. Carpenter: Your motion did not go to Exhibits 51 and 52, Mr. Nolan?

Mr. Nolan: It did by reference.

I understand he has not offered Exhibits 51, 52 and 53.

Exam. Carpenter: Right.

Mr. Nolan: We will make appropriate objection at that time. This is for purposes of striking the witness' testimony for the tabulation of figures.

Exam. Carpenter: I am asking if the motion goes to Exhibits 51 and 52. Mr. Howland included those. You did not.

Mr. Nolan: I did.

Exam. Carpenter: You mentioned Exhibit 53 only.

Mr. Nolan: I include Exhibits 51 and 52 in the motion. [fol. 2385] Any testimony of the witness regarding any figures shown with reference to Exhibits 51, 52 and 53 for reasons I stated that the witness refused to produce supporting data. It is wholly incompetent and prejudicial.

Mr. Fowler: No objection was interposed to any question to the witness giving tonnage on his own personal knowledge.

Mr. Nolan: Up to that time there had been no refusal to submit supporting data.

Mr. Fowler: I have not offered Exhibits 51, 52 and 53 and the discussion is wholly irrelevant.

ROBERT BOTHELL was sworn and testified as follows:

Direct examination.

By Mr. Fowler:

Q. Will you announce your name?
A. Robert Bothell.
Q. Your address?
A. Iowa City.
Q. With what organization are you connected?
A. Maher Brothers Transfer.
Q. And it is located at Iowa City?
A. Right.
Q. In what business is Maher Brothers Transfer engaged?
A. Local drayage, local moving and moving household goods interstate.
Q. How long have Maher Brothers been in business?
A. Since 1926.
Q. You do, as I understand it, general local cartage business in Iowa City?
A. Yes, sir.
Q. And in addition to that you act as agent on a commission basis for several other carriers?
A. Right.
Q. Do you act as cartage agent for any railroad at the [fol. 2362] present time?
A. No.
Q. Do the railroads in Iowa City have their own facilities for pick-up and delivery?
A. Crandic, that is the interurban, has its own and Rock Island Railroad is, as I understand it, delivered by the transit equipment.
Q. For what carriers do you act in the capacity of agent?
A. Poole Transfer, Watson Bros. Transportation Company, Inc., McCoy Truck Lines, Des Moines Transportation Company, Knaus Truck Lines, Iowa-Nebraska Transportation Company and Motor Cargo.
Q. Now, with respect to Poole Transfer, I believe that company has headquarters at Muscatine?
A. Muscatine, Iowa.

Exam. Carpenter: We will withhold ruling until the offer.

Redirect examination.

By Mr. Fowler:

Q. With respect to Moore Business Forms. What is that company?

A. That is a company that prints register tickets, bills of lading, sales tickets, etc..

Q. Is Economy-advertising connected with them or is it a separate institution?

A. Separate.

Q. Do you perform any transportation service for Moore Business Forms?

A. Yes.

Q. Inbound?

A. Yes, sir.

Q. And outbound both?

[fol. 2386] A. Definitely outbound.

Q. And carriers you represent do handle the business of Moore Business Forms inbound as well as outbound?

A. Yes.

Q. What does Economy Advertising make?

A. Calendars, novelties, highschool and university annuals.

Q. Do you handle shipments to them inbound?

A. Yes.

Q. Any outbound?

A. Only truckload shipments of annuals and yearbooks. We are not able to handle their less truckload shipments.

Q. Why?

A. Because a goodly share of them go intrastate. They do not care to split their tonnage with any other carriers.

Q. There is no reason why you couldn't handle them if tendered you on an interstate movement?

A. No.

Q. There is a substantial volume of intrastate movement?

A. Yes.

Mr. Fowler: At this time I offer in evidence——

Q. Can you tell us generally, if you know, the scope of their operation?

A. Chicago, Tri-Cities, Muscatine, Minneapolis and the Twin Cities with delivery to points enroute.

Q. Is it true, if you know, that their physical operation from Muscatine to the Twin Cities is through Muscatine and Cedar Rapids?

A. Yes, sir.

Q. What are the type of your facilities there? Do you have a dock?

[fol. 2363] A: We have a drive-in dock—inside under cover for unloading, open 24 hours a day, seven days a week.

Q. If shipments are delivered to your dock by carriers during the night are your facilities available to them?

A. We have a night man there.

Q. And that is true with respect to any freight to be picked up?

A. Right.

Q. What do you have in the way of motor equipment?

A. We have four furniture vans, two of them are semis and two are straight vans. We have five pick-up and delivery trucks, ton and a half type. We have three pick-up trucks of ton type. We have two truck tractors and flat bed semi-trailer.

Q. Now, do you perform—do you hold any operating authority from the Interstate Commerce Commission in your own name?

A. Only household goods.

Q. Do you do local cartage or drayage business to any of the surrounding towns to Iowa City?

A. We do not.

Q. Now, you do go to Coralville, do you not?

A. Yes we do. Coralville is within the legal mile limit that is limited from the post office of a town of a certain size.

Q. In other words, freight from your dock destined to merchants in Coralville would be delivered by you in cartage service?

A. Yes.

[fol. 2364] Q. Do you have some of that?

It has been suggested that I clear up the Watson situation. I think the impression was left from the testimony that they had discontinued pick-up and delivery service in Iowa City.

By Mr. Fowler:

Q. What is the situation with respect to that?

A. If I can explain it in history form from the time of [fol. 2387] their first starting to stop in Iowa City years ago. We had been their delivery agent up until two years ago. They put in their own terminal and break for drivers and thought they could handle pick-up and delivery and did up until three weeks ago. They then discontinued it with their own employees and equipment and have now turned the business of pick-up and delivery back to us.

Q. It is still being performed, but by your company rather than by them with their own employees?

A. Yes.

OFFERS IN EVIDENCE AND OBJECTIONS THERETO

Mr. Fowler: At this time I offer in evidence Exhibit 51 which bears the description "Tonnage On Motor Freight For 1-1-51 to 4-1-51"; Exhibit 52 with similar information developed for the period January 1, 1952, to April 1, 1952; and Exhibit 53 being a typewritten page, summary of information on Exhibits 51 and 52.

Mr. Nolan: To which Exhibits intervenors object as being wholly incompetent, hearsay, not the best evidence and for further reason of refusal on the part of the witness to produce the records and freight bills from which said exhibits were compiled for inspection and examination and for further reason that said exhibits without supporting data renders, at least the cross-examination of the witness, wholly irrelevant, immaterial and highly prejudicial.

Mr. Howland: We will join in the objection as made by Mr. Nolan.

[fol. 2388] Exam. Carpenter: I will overrule the motion and objections, but refusal of the witness to produce the data will be given consideration when determining what

A. Yes, sir.

Q. Is it quite substantial?

A. Yes.

Q. What is the general character of freight which is delivered to your dock by various motor carriers? I mean is it all small shipments, all truckload, or general run of motor freight?

A. It is predominantly less truckload. I mean shipments less than 5000 pounds.

Q. Does it consist of a substantial number of minimum shipments—small shipments?

A. It definitely does.

Q. Are you acquainted with Howard P. Jacobs who runs a plumbing company in Iowa City?

A. I am not personally acquainted with him.

Q. Are you familiar with the Nagle Lumber Supply in Iowa City?

A. Yes.

Q. Do you have occasion to deliver shipments to or pick-up shipments from them for your various carriers?

A. They bring more shipments to our dock to go outbound than we pick up. We deliver a lot of inbound shipments to them.

Q. Are you acquainted with Mr. Message who runs a wholesale plumbing and heating company in Iowa City?

A. I don't know him. I know the firm.

Q. You know the firm he is connected with?

[fol. 2365] A. I know the Plumbers Supply of Iowa City.

Q. Do you have occasion to pick up and deliver for them?

A. We have never picked up shipments outbound, but have delivered a great many inbound.

Q. Do you know the Slager Implement and Hardware of Iowa City?

A. Yes, sir.

Q. Do you have occasion to pick up or deliver to them?

A. I don't recall picking up, but we do deliver to them.

Q. Are you familiar with Barron Oil Company of Iowa City?

A. Yes, sir.

Q. What is the fact as to whether you have ever picked up there?

weight to give the exhibits. I will not receive them in evidence at present until we get photostatic copies.

Recross-examination.

By Mr. Nolan:

Q. These carriers for which you are agent at Iowa City, none of those carriers perform any intrastate service in there and out of Iowa City, do they?

A. No.

Mr. Nolan: That is all.

Exam. Carpenter: You are excused.

(Witness excused.)

JOSEPH E. LUDDEN was sworn and testified as follows:

Direct examination.

By Mr. Fowler:

Q. Will you announce your name?

A. Joseph E. Ludden, 2130 S Avenue, LaCrosse, Wisconsin.

Q. With what organization are you connected?

A. Gateway Transportation, Lacrosse, Wisconsin.

Q. In what capacity?

A. Assistant Secretary of that company.

Q. And how long have you been associated with the company?

A. Since September, 1948.

Q. Are you familiar with the scope of its business and operations?

[fol. 2389] A. It is one of my duties to care for authority and appear at Interstate Commerce Commission hearings and hearings before other regulatory bodies.

Q. Give the number of your operating authority?

A. MC-80430. I might also state in that connection that Gateway Transportation is a common carrier of general commodities with the usual exceptions operating over regular routes.

A. Never.

Q. What is the fact as to whether you have delivered inbound?

A. We have delivered a great number of shipments.

Q. Are you familiar with Mrs. Dan Fiesler who runs Dan's Wholesale Foods in Coralville?

A. Yes, sir.

Q. Have you ever picked up outbound shipments for her?

A. Never.

Q. What is the fact with respect to inbound?

A. We deliver considerable merchandise to them.

Q. What is the town immediately east from Iowa City on U. S. Highway 6?

A. West Liberty.

Q. Do you know anything about the availability of motor [fol. 2366] carrier service at the present time serving West Liberty other than the Rock Island Motor Transit Company?

A. The only one I know of is Poole Transfer and the reason I know that is they have freight on their trucks to deliver there and they deliver apparently direct.

Q. What is the next town immediately east from West Liberty?

Mr. Howland: On Highway 6?

Mr. Fowler: Yes.

Mr. Howland: That would be Atalissa.

By Mr. Fowler:

Q. Do you know if Poole Transfer serves Atalissa?

A. I do not.

Q. Do you know anything about motor carrier service at Durant, Stockton or Walcott?

A. No.

Q. So far as you know Poole Transfer does serve West Liberty because you see that freight on their trucks?

A. Yes, sir.

Q. How frequently does Poole's equipment arrive at your dock?

A. That would be at least three trailers a day.

Q. Coming in from all directions?

Q. Do you have with you a map which would depict the general scope of operations of your company?

A. I do.

Mr. Fowler: At this time I would like to have marked for identification advertising map headed "Gateway Transportation Company" and with typical markings showing operating authority.

Exam. Carpenter: It may be marked Exhibit 54 for identification.

(The map referred to was marked as "Intervenor's Exhibit No. 54, Witness Ludden," for identification.)

By Mr. Fowler:

Q. Will you examine Exhibit 54 and tell what it is?

A. It is what we call a point list map which portrays the points authorized in interstate commerce to Gateway Transportation Company. On the front side it shows some of the points authorized to be served along with terminal points in the upper right hand corner. On the reverse side [fol. 2390] it shows other points authorized to be served by Gateway Transportation Company.

Q. With respect to operations of Gateway Transportation Company which appears to be also known as Gateway City Transfer Company, Inc., and limiting inquiry to points located on Highway 6 in the State of Iowa, first does Gateway hold any authority to points located on U. S. Highway 6 in the State of Iowa?

A. Right, they do.

Q. Let us take the reverse side of the map, Exhibit 54, and I notice in the third column you have points listed in Iowa and if I am correct the Town of Altoona, is located on U. S. Highway 6; the Town of Colfax is on U. S. Highway 6; Des Moines is on U. S. Highway 6. Do you know of any other points?

Mr. Howland: Grinnell and Iowa City.

By Mr. Fowler:

Q. Grinnell, Iowa City——

A. Newton and Kellogg.

A. At least three trailers a day.

Q. That would be from Minneapolis?

A. Yes, sir.

Q. From Chicago?

[fol. 2367] A. From Chicago by way of Muscatine and the Tri-Cities and one out of the Tri-Cities.

Q. So Poole Transfer handles shipments moving from Minneapolis destined to the merchants in Iowa City?

A. Right.

Q. If you know can you tell us the elapsed time on shipments from Minneapolis to Iowa City?

A. Overnight and to my knowledge they are the only carrier giving overnight service from the Twin Cities into Iowa City.

Q. With respect to Chicago shipments handled by Poole Transfer, if you know give the elapsed time?

A. That will vary. It is usually next day's delivery—approximately 9:00 o'clock at our dock.

Q. With respect to shipments moving out of the Tri-Cities in interstate and those handled through Muscatine to Iowa City?

A. I can't say if routed that way.

Q. What is the elapsed time?

A. That is same evening.

Q. Does Poole Transfer handle all type shipments, minimum to *to* volume shipments?

A. Oh, yes, sir.

Q. I believe you also—just a moment. Do you recall ever handling any shipments originating at the Twin Cities from Janney Semple Hill & Company to Iowa City?

A. Yes, but not recently.

[fol. 2368] Q. Do you handle any shipments for your carriers from the John Deere firm?

A. Yes. Implement parts.

Q. You do?

A. Not John Deere, but McCormick.

Mr. Howland: That is International.

By Mr. Fowler:

Q. But you do handle implement parts originating in the Tri-Cities to Iowa City?

Q. Newton, Iowa. Is Kellogg on the list?
A. Yes.

By Mr. Nolan:

Q. Where?
A. No, it isn't.

By Mr. Fowler:

Q. With respect to——

Exam. Carpenter: The list of Iowa points starts in the middle of column 3 and continue on to column 4, do they not?

Mr. Fowler: Correct.

By Mr. Fowler:

Q. With respect to operations in interstate commerce in Iowa and particularly in the vicinity of Des Moines, how [fol. 2391] recently has your company established terminal facilities in Des Moines?

A. February 1, 1952, we took over the old Bruce terminal at Fifth and Elm in Des Moines. We now have a Des Moines terminal manager, a solicitor, two office employees, a garageman and two city drivers.

Q. So it is fair to say that your operations in interstate commerce in this immediate area are in process of development at the present time?

A. We have just engaged a drayman at Newton within the last three weeks. Hal Leonard doing business as Merchants Transfer. We anticipate in the very near future getting draymen at Ottumwa, Pella and possibly Grinnell, Iowa.

Q. Do you have any plans with respect to development of terminal facilities at Ottumwa, Iowa?

A. Drayman.

Q. Now, if I am correct, in this immediate area you have recently established a terminal at Des Moines?

A. Right.

Q. And you propose to establish commission agents at the points just mentioned?

A. Yes, sir.

Q. Take Des Moines Transportation Company next. How frequently is their equipment at your dock?

A. I would say twice a day.

Q. And do you recall or can you tell us whether or not you handle for that company shipments originating Omaha and destined Iowa City?

A. Yes, sir.

Q. And originating Chicago destined Iowa City?

A. Right.

Q. And do you know whether or not you handle for Des Moines Trans. any freight interlined connecting carriers' points originating at points east, north and west?

A. Yes, sir. I know we do.

Q. Is that minimum as well as volume shipments?

A. Right.

Q. The Iowa-Nebraska Transportation Company, how [fol. 2369] frequently are they at your dock?

A. I would say they average three times a week.

Q. And what type shipments do they handle?

A. Mostly all less than 5000 pound shipments—minimum to 5000.

Q. Can you tell us whether or not that is shipments originating Omaha destined Iowa City?

A. Yes.

Q. And Chicago destined Iowa City?

A. Yes.

Q. And interconnecting line traffic from other points out of the State?

A. Yes, sir.

Q. Now, take Motor Cargo. How often or how frequently is their equipment at your dock?

A. Approximately three times a week.

Q. And are those small shipments as well as volume shipments?

A. Yes, sir.

Q. And originating Chicago and eastern points?

A. Mostly eastern points. I don't recall one coming out of Chicago. Mostly eastern points.

Q. The traffic you handle then for Motor Cargo is almost entirely traffic originating in the eastern part of the country?

A. And other points we are authorized to serve over Highway 6 and 163 running south out of Des Moines, if traffic warrants that.

Q. In addition to the Iowa area about which we have been [fol. 2392] talking, do you have terminal facilities at the Twin Cities?

A. We do.

Q. At Chicago?

A. Yes, sir.

Q. St. Louis?

A. St. Louis.

Q. And do you serve Kansas City?

A. No.

Q. Omaha?

A. No. St. Louis is the southermost point and Des Moines, Chicago, St. Paul and Mankato.

Q. Are you authorized to serve Dubuque?

A. Yes and we have a terminal there.

Q. Clinton?

A. And Clinton.

Q. What is the situation at the Tri-Cities?

A. We operate through the Tri-Cities into Chicago, but have no authority there.

Q. Do you not serve the Tri-Cities?

A. We do not serve the Tri-Cities.

Q. What is the fact as to whether you would accept and perform a transportation service on traffic tendered to you at any point on your system destined to any point authorized to be served by you in this Iowa area which is involved directly or indirectly in this application as soon as you have facilities established?

[fol. 2393] A. We intend to. That is the point of opening them.

Q. That service will be available to the general public with respect to minimum as well as volume shipments?

A. Absolutely.

Q. Does your company operate any so-called local distribution or peddle facilities in other areas in which you operate?

A. Yes. I think we are probably one of the biggest peddle operators in this part of the country within our authority.

A. The eastern part of the country by-passing Chicago, yes.

Q. Now, McCoy Truck Lines. How frequently are they at your dock?

[fol. 2370] A. I would say four times a week.

Q. What kind of traffic do you handle for them?

A. Mostly shipments less than 5000 down to minimum.

Q. Are origin points for those shipments mostly Chicago?

A. Chicago and through Chicago.

Q. And eastern interline freight. Correct?

A. Yes, sir.

Q. Now, Watson Bros., how frequently are they at your dock?

A. I would say they would average at least three a day.

Q. And the type of traffic handled through you is similar to that we have been talking about?

A. Right.

Q. And origin points on those shipments, have you observed whether any originated in Kansas City?

A. Yes, sir.

Q. And connecting line carriers from Kansas City?

A. Right.

Q. From Omaha?

A. Yes, sir.

Q. Chicago?

A. None.

Q. From St. Louis?

A. Yes, sir.

Q. The Twin Cities?

A. Yes, sir.

[fol. 2371] Q. And in addition to shipments which originate at points on their line do they tender to you for delivery in Iowa City off-line shipments which have been tendered them by connecting carriers?

A. Yes, sir.

Q. And Knaus Truck Lines, Inc., how frequently is their equipment at your dock?

A. About four times a week. Let me correct that. The outbound and inbound will average—there will be four in picking up and four out.

Q. And in general is the traffic handled of the same description as the others?

We have peddle operations in southern Minnesota; we have out of LaCrosse, Wisconsin, Madison, Wisconsin, Janesville, Wisconsin, Waterloo, Iowa, and out of Chicago.

Q. And what is the fact whether or not you intend to perform such local distribution or peddle service to Iowa points when facilities are established?

A. We will do that and we did it in the past when we operated in Des Moines.

Q. Do you operate a motor carrier service from Chicago to Des Moines?

A. Not at the present time. We don't have that operation as yet.

Q. Do you have a Twin Cities operation?

A. Via LaCrosse.

By Mr. Howland:

Q. Twin Cities-Des Moines?

A. Yes, sir.

By Mr. Fowler:

Q. Do you have a St. Louis-Des Moines operation?

[fol. 2394] A. Daily and another operation out of Des Moines for Milwaukee-Wisconsin.

Q. What is the fact whether or not if traffic of a general character were tendered to you at St. Louis for destination to any point located on U. S. Highway 6 that you are authorized to serve, you would accept that shipment and perform the transportation service?

A. We would be very happy to. We are not operating to capacity from St. Louis to Des Moines.

Q. And with respect to any traffic tendered you by connecting carriers at St. Louis destined to points in Iowa on U. S. Highway 6, would that likewise be handled in the same manner?

A. Yes, it would.

Q. What is the situation with respect to similar question if directed to traffic at any point served by you in Minnesota and Wisconsin destined to any point in Iowa on U. S. Highway 6 that you are authorized to serve?

A. Yes, sir.

Q. And does it include freight originating on their line and freight tendered them by connecting carriers?

A. Yes, sir.

Q. In addition to the carriers which you have mentioned can you tell us whether or not there are any other motor carriers serving Iowa City besides the Rock Island Motor Transit Company having their own facilities there?

A. None have their own facilities.

Q. What arrangements do Keeshin Freight Lines have in Iowa City?

A. None to my knowledge.

Q. Are there any others?

A. Hedrick Motor Transfer and Western Transportation [fol. 2372] Company and Gateway Transportation Company.

Q. In other words, the Hedrick Motor Transfer is a carrier located at Burlington, Iowa?

A. Yes.

Q. Does it serve Iowa City?

A. Yes, sir.

Q. And Western Transportation Company is a Chicago operator and does serve Iowa City?

A. Yes, sir.

Q. And Gateway Transportation Company at LaCrosse, Wisconsin?

A. Yes, sir.

Q. And they have their own service there?

A. Not their own terminal, but they have service at a cartage terminal similar to us.

Q. What is that name?

A. Thompson Transfer.

By Mr. Howland:

Q. Do all of these concerns dock there?

A. Gateway and Western Transportation at Thompson's; Hedrick Motor Transfer at Iowa City Transfer. Merchants Motor Freight comes into Iowa City or at least receive freight in truckload lots.

A. We would take it. We have performed service to some of those points in the past.

Mr. Fowler: You may inquire.

Cross-examination.

By Mr. Nolan:

Q. How would your company handle a hundred pound shipment of hardware from Minneapolis, Minnesota, to [fol. 2395] Colfax, Iowa?

A. It would be handled in one of two ways. It would either come down on the Twin Cities-St. Louis run and break at Cedar Rapids and be handled Cedar Rapids to Des Moines or break at Waterloo and be handled from there to Des Moines.

Q. How would that shipment be delivered to destination?

A. Right now it could be interlined or handled direct.

Q. In all probability it would be interlined with some carrier making Colfax?

A. It probably would.

Q. Is the same thing true as to a shipment of that size destined Grinnell from Minneapolis?

A. From Minneapolis?

Q. Yes.

A. No, I don't think so. I think it would be handled direct out of Des Moines due to the fact we pick up from the drayman every day at Newton.

Q. Do you know where Grinnell is located?

A. East of Newton.

Q. How many miles?

A. I can't tell you exactly how many—maybe 25 or 26.

Q. You say you have a truck that goes to Newton every day?

A. A minimum of three times a week.

Q. If you had a hundred pound shipment from Minneapolis destined Grinnell that would be delivered by your [fol. 2396] truck that goes to Newton to pick up freight at Newton?

A. It could be that way or on the Des Moines-Milwaukee route and dropped off. That goes over Highway 6 to Iowa

By Mr. Fowler:

Q. As I understand it Western Transportation and Gateway have as cartage agent, Thompson, and Merchants Motor Freight and Hedrick Motor Transfer are associated with Iowa City Transfer?

[fol. 2373] A. Yes.

Q. The Motor Cargo is a concern with headquarters at Akron, Ohio?

A. Yes, sir.

Mr. Fowler: Off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

By Mr. Fowler:

Q. Mr. Bothell, did you prepare at our suggestion an exhibit to develop the inbound and outbound tonnage and the total tonnage handled by your company for these carriers you have mentioned for the period January 1, 1951, to April 1, 1951?

A. I did.

Q. And did you prepare a similar exhibit developing similar information for the period January 1, 1952, to April 1, 1952?

A. I did.

Mr. Fowler: I would like to have permission to have the document which bears the description "Tonnage On Motor Freight For 1-1-51 to 4-1-51" marked for identification.

Exam. Carpenter: It may be identified Exhibit 51.

(The document referred to was marked as "Intervenor's Exhibit No. 51, Witness Bothell," for identification.)

Mr. Fowler: I would like to have marked as Exhibit 52 a similar exhibit bearing the description "Tonnage On Motor [fol. 2374] Freight For 1-1-52 to 4-1-52."

Exam. Carpenter: It may be identified Exhibit 52.

(The document referred to was marked as "Intervenor's Exhibit No. 52 Witness Bothell," for identification.)

Mr. Fowler: I would like to have the document which appears to be on letterhead of Maher Bros. Transfer marked

City, thence to Cedar Rapids and over to Dubuque and into Wisconsin.

Q. Do you mean to tell the Commission that you would stop that truck at Grinnell to drop off a hundred pound shipment—that over-the-road truck to Milwaukee?

A. We do every day.

Q. When was the last time you have had any shipment to Newton of any size less than 10,000 pounds?

A. I can't answer.

Q. To Grinnell?

A. I can't answer that.

Q. Or Colfax?

A. I can't answer that.

Q. Now, how about some drop shipment destined Iowa City from some out of State point your company operates —for instance Milwaukee. How would that move to Iowa City?

A. It would move LaCrosse and on Des Moines-St. Louis run and be dropped off.

Q. It would be dropped from the line truck?

A. Undoubtedly.

Q. When was the last time you have had a shipment to Iowa City?

A. Of my own personal knowledge I can't answer that.

Q. Out of the forty some points between the Tri-Cities [fol. 2397] and Des Moines, Iowa, your company holds authority only for Altoona, Colfax, Des Moines, Grinnell, Iowa City and Newton. Is that right?

A. The points shown on the map. That's right.

Q. Now, how many years did your company have an embargo on service into Des Moines?

A. I can't tell you how many years, but I think we closed the terminal late in 1943 in Des Moines in compliance with general O.D.T. order requesting carriers to conserve wherever possible wherever there was duplication with other carriers—to conserve on personnel and equipment.

Q. You closed because you didn't have good business at Des Moines, didn't you?

A. They said there was good business here.

Q. Aren't you here trying to recapture the Des Moines-St. Louis business?

for identification. It apparently is a summary of the information which appears on Exhibits 51 and 52.

Exam. Carpenter: It may be marked for identification as Exhibit 53.

(The document referred to was marked as "Intervenor's Exhibit No. 53, Witness Bothell," for identification.)

By Mr. Fowler:

Q. Now, I direct your attention to the document marked Exhibit 51 and ask you to state whether or not that is an exhibit that you prepared about which you just testified?

A. I had it prepared.

Q. Was it prepared under your supervision?

A. Yes, sir.

Q. Can you tell us whether or not that correctly reflects the situation as it exists on your regular records?

A. Yes, sir.

By Mr. Howland:

Q. That is pounds of freight?

A. Yes.

By Mr. Fowler:

Q. Obviously where the description appears at the top [fol. 2375] of the exhibit "Poole" refers to Poole Transfer; "Des Moines" refers to Des Moines Transportation Company; "Knaus" to Knaus Truck Lines; "Ia-Nebr" to Iowa-Nebraska Transportation Company and "McCoy" to McCoy Truck Lines?

A. Yes, sir.

Q. Is Exhibit 52 a similar document for the same period of 1952?

A. To the best of my knowledge it was taken directly from our records.

Q. Is Exhibit 53 a summary of Exhibits 51 and 52?

A. Yes, sir.

Q. Now, merely for the record and from your own knowledge, will you tell us what the total inbound tonnage handled by you for these carriers was for the period January 1, 1951, to April 1, 1951?

A. No, I can't say that. We serve Des Moines and all points we are presently authorized to serve.

Q. Isn't it a fact you have come back to Des Moines to regain that business and particularly the St. Louis operation?

A. No. We want to serve Des Moines in connection with all other points we are authorized to serve.

Q. Do you still have in effect minimum 10,000 pound shipments on your operation on any point?

A. No.

[fol. 2398] Q. Sure of that?

A. No.

Q. You say you do some peddle out of Waterloo?

A. Right.

Q. It doesn't have any connection with points on U. S. Highway 6?

A. No. It goes to LaCrosse.

Q. Operation from Waterloo to LaCrosse?

A. Right.

Q. Don't you have any Iowa intrastate authority on U. S. Highway 6?

A. No. No Iowa intrastate authority at all.

Q. You say you do not operate out of Chicago?

A. Not at the present time, but we plan to.

Q. Did I understand you to say you have no interstate authority into or out of the Tri-Cities?

A. Right.

Q. I mean Davenport, Rock Island, Moline, East Moline, Silvis and Bettendorf.

Now, you say a hundred pound shipment from Minneapolis to Colfax, Iowa, you might deliver that yourself, but you would be more apt to give it to another carrier. Right?

A. It could be either way.

Q. And you have conducted interline with Rock Island Motor Transit Company over a number of years?

[fol. 2399] A. True.

Q. And still do?

A. Yes.

By Mr. Howland:

Q. Wasn't there a period of time following the war and continuing up to approximately a year ago when Gateway Transportation Company was embargoing shipments of less than 10,000 pounds to most Iowa points?

A. That embargo was released in August, 1950.

Q. About how long was it on prior to that time?

A. I can't answer that. I tried to find out before I came down here. I know there was an embargo prior to that that was virtually the same, but that was lifted when we opened the Dubuque terminal in 1949.

Q. But it is true that you didn't conduct any operations on U. S. Highway 6 within the State of Iowa for a period of approximately 8½ years?

A. No, that is not true. We came in here on volume shipments.

Q. But you didn't have a terminal in Des Moines?

A. No.

Q. You were handling truckload shipments and volume shipments—I take it you mean 10,000 pounds and above?

A. Right. It was very spasmodic, but it was done.

Q. There wasn't any pretense or effort—you didn't render a regular service into Iowa points on a scheduled operation?

A. You are talking about points——

[fol. 2400] Q. On Highway 6.

A. Right.

Q. And you are not rendering any scheduled operation between points on U. S. Highway 6 at the present time?

A. Well, Iowa City and Newton and Des Moines would be about all.

Q. But that service is from northern points?

A. Iowa City is served on the north-south operation.

Q. In other words, you don't have any east-west operation on Highway 6, do you?

A. Not yet and we won't until we open Chicago.

Q. What is your company's authority as far as points in Illinois—over what route do you operate out of Chicago?

A. To what point?

Q. To the Tri-Cities.

A. I think it is Highway 34.

Q. 34 and 92?

A. 34 and 92 to the Tri-Cities; 6 to Iowa City and thence to Des Moines.

Q. There never has been any time you have operated a peddle service on U. S. Highway 6 to Iowa points?

A. It is my understanding, and this is hearsay, but it seems they did peddle out of Des Moines—one south on 163 and east on 6.

Q. What points did they serve on 6?

A. Iowa City and back.

[fol. 2401] Q. And that was prior to your connection with Gateway?

A. Right.

Q. And you don't know on what basis of regularity that service was performed?

A. No, I don't know.

Q. Where was this peddle service down 163 and 63?

A. We had a break-point at Mount Pleasant—had a turn-around at Mount Pleasant between Des Moines and Mount Pleasant.

Q. According to your information how long was that service rendered?

A. From whenever they were in Des Moines until it closed in 1943. I don't know when it started.

Q. Now, your map which has been marked Exhibit 54, about when was that map made up?

A. In the lower right hand corner you will see the date. October, 1946. I might say for the record that there have been come corrections in terminal points.

Q. That indicates you had a terminal in Des Moines, as I interpret the map.

A. It was our intention to open a terminal, but we didn't find the property in Des Moines until——

Q. February, 1952?

A. Right.

Q. Do you have any information about a shipment—truckload shipment handled by your company from Winona, [fol. 2402] Minnesota, to Oxford, Iowa, sometime during the early part of the year 1952?

A. January 3, 1952, we entered into a lease with Iowa-

Nebraska Transportation Company covering a movement of Watkins Products consigned to Don Sheets at Oxford. They leased Gateway and we made delivery.

Q. Do you happen to have any information on that situation as to whether or not Iowa-Nebraska has operating authority to serve Oxford?

A. That was handled through the Cedar Rapids office.

Q. And that was an instance where Rock Island Motor Transit Company was the only carrier there and they were unable to handle it by reason of the 5000 pound limitation placed on its operation, was it not?

A. I didn't know they were the only one able to handle it, but I do know they had a restriction of 5000 pounds at that time.

By Mr. Nolan:

Q. Now your company is Gateway Transportation Company?

A. Right, as of January 1, 1949.

Q. That is an Illinois corporation?

A. Right. Originally in 1938 there were two companies—Gateway City Transfer Company, Inc. and Gateway Transportation Company. The Gateway City Transfer Company, Inc. merged with the Gateway Transportation Company in January, 1949.

Q. Is the Gateway Transportation Company the owner of over-the-road equipment?

[fol. 2403] A. 700 pieces of over-the-road equipment.

Q. By the way, when you said it was your understanding that you peddled at Iowa City, by that you meant you only peddle points where you have authority to, isn't that right?

A. Well, naturally.

Q. And that includes between Iowa City and Des Moines the points Altoona, Colfax, Grinnell and Newton. Correct?

A. Those points shown on the map. It doesn't show all of them.

By Exam. Carpenter:

Q. Shown on the map and listed on the back?

A. Yes.

Q. On other material?
A. No, because there is no volume shipments from them.
Q. How about calendars?
A. We don't serve them.

By Exam. Carpenter:

Q. When you refer to record do you mean Exhibits 51, 52 and 53?
A. Right.

By Mr. Nolan:

Q. Well, Economy and Moore are about the only two shippers of volume shipments we have in Iowa City. Right.
A. Kollman-Warner Seed Company.
Q. Is that for out of State points or mostly local?
A. Out of State.
Q. What other volume shipments do you have?
A. The Veteran's Hospital was there. It is not existent at present, but it was when they were getting equipment in to build the hospital.
Q. That is just a temporary situation there?
A. Yes.

Mr. Nolan: That's all.

Exam. Carpenter: Is there any redirect? Do you have any recross?

Mr. Howland: I don't believe I have any recross.

[fol. 2382] Mr. Nolan: The intervenors represented by me request the Examiner to direct the witness to produce for inspection the freight bills in his possession—under his custody from which Exhibits 51, 52 and 53 were compiled.

Mr. Fowler: Of course, our position with respect to that is——

Exam. Carpenter: Deny the request.

Mr. Howland: We will join in request for order for production of the bills.

I would like to ask one question on cross-examination.

By Mr. Howland:

Q. Merchants Motor Freight operates through Iowa City, does it not?

A. Yes.

Q. That is a Minneapolis to St. Louis operation?

A. I would say yes.

Q. Or perhaps Minneapolis-Chicago also?

A. I doubt that. Judging only from direction—the trailers go north and south through Iowa City and east and west presumably from Des Moines to the Tri-Cities.

Q. But do you know Merchants Motor Freight performs no carrier service at Iowa City?

A. It is my understanding they interline their Iowa City freight with Hedrick Motor Transfer at Cedar Rapids.

Q. And the only service rendered that you know of by Merchants Motor Freight to Iowa City or that vicinity is [fol. 2383] in connection with the movement of turkeys from Wellman?

A. Not confined to turkeys, but I would say perishable products.

Q. And are there other carriers like Red Ball, Prucka, Union and On-Time and numerous other carriers whose trucks pass through Iowa City on U. S. Highway 218 or U. S. Highway 6 and they perform no service to Iowa City?

Mr. Fowler: Object to that as not proper examination. No such subject was gone into on direct.

Mr. Howland: I think the general subject was opened.

Exam. Carpenter: Overruled.

A. I can only answer the question to the extent of U. S. Highway 6. I will say our place of business is on the highway and I see the names on equipment.

By Mr. Howland:

Q. You have never known that they performed any service—pick-up or delivery in Iowa City—the carriers I named?

A. No.

Q. There are probably a lot of other carriers in the same category?

A. I don't believe I can answer that.

Mr. Nolan: At this time intervenors move to strike from the record the testimony of the Witness Bothell, the tabu-

AFTERNOON SESSION 2:00 p. m.

Exam Carpenter: We will proceed.

OFFERS IN EVIDENCE AND OBJECTION THERETO

Mr. Fowler: At this time, Mr. Examiner, I would like to offer in evidence Exhibits 37 to 48 inclusive, being the manifest sheets which were identified by the Witness Hobbs [fol. 2406] and we have now obtained photostat copies and furnished them to counsel.

Exam. Carpenter: Any objections?

Mr. Fowler: I am informed that Mr. Hobbs has asked that the originals be returned for his files and in view of that I would like permission to offer the photostatic copies instead of the originals.

Mr. Howland: There won't be any objection to the substitution of photostats instead of originals.

Mr. Nolan: In connection with the offer of Exhibits 37 to 48, inclusive, the intervenors represented by me object to the introduction of said exhibits for reason same is wholly incompetent, irrelevant and immaterial; do not tend to prove or disprove any issue in this case; and for further reason there was no supporting data or records or freight bills produced or offered to be produced by the Des Moines Transportation Company for inspection to determine the veracity and correctness of said manifests or exhibits and by reason thereof same are hearsay, improper and prejudicial.

Mr. Howland: Applicant will join in the objection to the offer.

Mr. Fowler: I would merely like to point out, Mr. Examiner, in connection with these exhibits I believe you will recall and the record will show they are records kept in the ordinary course of business.

[fol. 2407] Exam. Carpenter: The objection is overruled and failure to produce the data will be given consideration when determining what weight to give the exhibits. The exhibits identified as Exhibits 37 through 48, both inclusive, are received in evidence.

(Intervenor's Exhibits 37 thru 48, Witness Hobbs, were received in evidence.)

Mr. Fowler: Mr. Examiner, there may be one or two interested carriers show up yet this afternoon, but for all substantial purposes that closes our evidence and if they do appear we will ask permission to produce them as witnesses.

Mr. Howland: If agreeable rebuttal evidence we wish to offer may be offered at this time and in case additional witnesses are introduced by objectors we may have additional opportunity to meet that.

Mr. Fowler: That is agreeable with me.

Mr. Howland: At this time the applicant requests that the transcript of testimony taken in Docket MC-29130 Sub-69 TA before the Interstate Commerce Commission commencing September 24, 1951, at Des Moines, Iowa, and continuing to and including October 3, 1951, be made Exhibit 55 and together with the exhibits which were incorporated in and identified as exhibits in the record. We ask leave to have the exhibit so marked and to withdraw same for the purpose of having same available in the preparation of any brief that may be filed in this proceeding.

[fol. 2408] Mr. Fowler: As I understand it, Mr. Howland, you are offering transcript in the temporary authority proceeding in its entirety as Exhibit 55 and you are asking that you introduce it and then withdraw it in the record?

Mr. Howland: On a temporary basis.

Mr. Fowler: And for what? For the purpose of making copies of it?

Mr. Howland: I will say this. There are certain portions of the evidence which we regard as material, particularly the testimony given by Mr. E. S. Petersen and which we shall probably desire to refer to.

Now, if there is any interested party who does not have a copy of the transcript we shall be glad to make the same available to that party on request, but the purpose of the offer is to incorporate in its entirety the transcript of the T.A. proceeding in the record here.

Mr. Fowler: I doubt the offer in form in which it is made meets the requirements of the rules of the Commission

with respect to such an offer. I will object to it later on some other grounds. On the other hand, I don't like to be unreasonable about it. It is rather a voluminous transcript. I assume the Commission has a copy of the transcript available to it.

Off the record.

(Discussion off the record.)

Mr. Howland: It is stipulated and agreed that the ap-
[fol. 2409] plicant and intervenors in support of the application may prepare from the transcript of the hearing held in Docket MC-29130 Sub 69 TA excerpts or portions of the testimony of witnesses and that copies thereof shall be furnished opposing counsel and that such excerpts may be designated and filed as an exhibit in this record as a late filed exhibit and that counsel for the protestants and objectors shall likewise have the right to supplement the statements so prepared by any portion of the record which they may refer to or have considered in evidence.

Mr. Fowler: I am willing to accept that stipulation solely to avoid voluminous incumbrance of the record. However, such productions are objected to by the objectors for reason it is incompetent, irrelevant, immaterial and not germane to this proceeding for the reason it is remote in time and developed in a proceeding in which the issues involved are other and different from the issues involved in this proceeding.

Exam. Carpenter: The objection is overruled and the—off the record.

(Discussion off the record.)

Exam. Carpenter: —material may be prepared and filed as a late filed exhibit on or before June 12, 1952.

Mr. Howland: At this time we withdraw the offer of Volumes 1 to 8 of the transcript of testimony and we will proceed as shown by the record.

(The material described to be furnished by applicant.)

[fol. 2410] Mr. Howland: Mr. Cole, will you come forward.

L. L. Cole was sworn and testified as follows:

Direct examination.

By Mr. Howland:

Q. Mr. Cole, you are the auditor for Rock Island Motor Transit Company?

A. That is correct.

Q. And you previously testified as a witness in this case—were on the stand on a number of occasions putting in your evidence during the later part of March this year?

A. Right.

Q. And I will ask you, Mr. Cole, if you have had access to the reports filed by certain carriers with the Iowa State Commerce Commission, which reports are copies or duplicate originals of reports made to the Interstate Commerce Commission for particular years by those carriers?

A. Right.

Q. What period of time was covered by your examination of those reports?

A. That varies by carriers. Some I have from 1938 to 1951—others from 1941 to 1951.

Q. Now, did you for the Bruce Motor Freight Company make an examination of reports so filed with the Iowa State Commerce Commission recently?

A. Yes, sir.

[fol. 2411] Q. And I wish you would state for the record, with respect to Bruce Motor Freight Company, the period of time covered by your examination?

Mr. Fowler: Off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Mr. Fowler: Mr. Howland, as I understand it you expect to introduce through Witness Cole certain information taken from Interstate Commerce Commission reports for various carriers who are involved in this proceeding, dating in some instances back as far as ten years, and it occurs to me that in order to save time of the Examiner and all of us that Mr. Cole should prepare a summary of the ma-

terial and file it with the Commission as a late filed exhibit with copies to us. Having taken a general glance at the proposed material we would object to the offer of any such material as incompetent, irrelevant and immaterial to any issue in the case. I do not object to it on the ground that it is not the best evidence nor his failure to be properly qualified for the offer.

Mr. Howland: I might say it is our intention to offer the figures as to tonnage handled; gross revenues earned; average load weight; average length of haul; for the following carriers: Des Moines Transportation Company, Inc., Bruce Motor Freight, Inc., Bos Truck Lines, Inc. and Iowa-Nebraska Transportation Company, Inc. The period to be covered by the tabulation will in the case of Bruce [fol. 2412] Motor Freight, Inc. be from 1944 to 1951, inclusive; for Des Moines Transportation Company, 1941 to 1951, both inclusive; the same for Bos Truck Lines, Inc. and the same for Iowa-Nebraska Transportation Company.

In addition to the items already referred to we shall desire to show where reports disclosed the percentage or proportion of truckload business to the total tonnage of the particular carrier for each of the years in question.

Mr. Fowler: As I understand it, Mr. Howland, this exhibit will be merely a restatement of material which is in the Interstate Commerce Commission reports without any additions by Mr. Cole.

Mr. Howland: Recitation of actual figures without any change or analysis of figures by the witness. I want to make sure that the average length of haul is disclosed right on the report.

Witness Cole: It won't be on for this period because the Interstate Commerce Commission didn't require it.

Mr. Howland: We will take whatever is on the face of the report.

Mr. Fowler: Just so I don't run into danger by reason of courtesy. If I thought I could get anything done I would object, but I am fearful you would overrule it. If I thought it might accomplish anything I would object on the ground that it is back too far for any materiality to issues in the case.

[fol. 2413] (Discussion off the record.)

Mr. Howland: We ask leave to file as a late filed exhibit the tabulation to be prepared by Mr. Cole and testified to by him which will contain the information referred to in previous statements as made by me and set forth in the record.

Mr. Fowler: And as I understand it it will be received subject to the objection as made.

Exam. Carpenter: I overrule your two objections and the data which you have referred to may be filed as a late filed exhibit on or before June 12, 1952.

(The material described to be furnished by applicant.)

Mr. Howland: It is further agreed that the annual report of the Iowa-Nebraska Transportation Company, Inc. of Avoca, Iowa, for the year 1951 as made and filed by the said carrier with the Interstate Commerce Commission will be offered as an exhibit in this case and we ask leave to have a copy of same incorporated in this record as a late filed exhibit to be filed at the same time as the other matters which have already been referred to by agreement between the parties hereto.

Mr. Fowler: I have no objection to the procedure suggested. I object to receipt in evidence of the exhibit on the ground that it is immaterial and irrelevant to any issue in this case.

Exam. Carpenter: Do you intend to submit as a late filed exhibit the entire report of Iowa-Nebraska?

[fol. 2414] Off the record.

(Discussion off the record.)

Mr. Howland: It is not our intention, Mr. Examiner, to include anything other than the balance sheet which I understand is known as Schedule 100 and is set forth on pages 6 and 7 showing assets and liabilities as of December 31, 1951; the income statement set forth on page 52, Schedule 2998-A, showing revenues and expenses and everything from page 52 thereof through and including page 60; Schedule 5300 and including items shown under Account 206, Administrative and General Salaries, Officer, Owners

and Partners; and also the operating statistics as shown on page 71, Schedule 9003; and trucks and tractors in intercity revenue service as shown on page 72, Schedule 9005.

By Mr. Fowler:

Q. It is your intention, Mr. Cole, in preparing this exhibit that you will merely copy information which is in the Interstate Commerce Commmission report?

A. Right.

Mr. Fowler: I have no objection to this order, but do renew my objection to its materiality.

Exam. Carpenter: Overruled. It may be filed as a late filed exhibit on or before June 12, 1952.

(The material described to be furnished by applicant.)

Exam. Carpenter: Off the record.

[fol. 2415] (Discussion off the record.)

By Mr. Howland:

Q. Mr. Cole, have you made some computation of the mileage in route miles between the points as to which, according to Exhibit 27, being a copy of Certificate of Public Convenience and Necessity issued to Iowa-Nebraska Transportation Company, Inc. for general commodities? Have you computed the route mileage by reference to road maps, etc.?

A. In a rough manner, yes, sir.

Q. Can you give us an approximate figure as to what that route mileage shown under Exhibit 27 under the designation "general route commodities" amounts to?

Mr. Fowler: What you are asking for, Mr. Howland, is Mr. Cole's rough estimate of route in that Certificate?

Mr. Howland: The total miles that are included in regular routes for general commodities by the Certificate, Exhibit 27, issued to Iowa-Nebraska.

Mr. Fowler: I object to that on the grounds it is incompetent, irrelevant and immaterial.

Exam. Carpenter: Should it be a rough estimate or actual calculation?

Mr. Howland: This was a calculation taken from Iowa Highway road map, but without an absolute check that it was accurate within a matter of 30 or 40 miles.

Exam. Carpenter: Overruled.

A. Approximately 1700 miles.

[fol. 2416] By Mr. Howland:

Q. And that was done by taking the terminal points as to which regular route authority is contained in Exhibit 27 and obtaining the mileage from a road map and the distance between Chicago and Omaha as 500 miles?

By Mr. Fowler:

Q. Do you agree it is a rough estimate?
A. That is correct.

Mr. Howland: I think that is all I have of Mr. Cole.
Exam. Carpenter: Any cross?
Mr. Fowler: No.
Exam Carpenter: You are excused, Mr. Cole.

(Witness excused.)

Exam. Carpenter: We will take a recess.

(Short recess.)

Mr. Fowler: Mr. Liston, will you come up here and take the stand.

If the examiner please, Mr. Liston is connected with Roberts Transfer.

JOHN LISTON was sworn and testified as follows:

Direct examination.

By Mr. Fowler:

Q. Will you announce your name?
A. John Liston.
Q. Where do you reside?
A. Audubon.

Q. With what company are you connected?

[fol. 2417] A. Roberts Transfer.

Q. With headquarters where?

A. Audubon.

Q. In what capacity are you connected with that company?

A. Manager.

Q. And how long have you been connected with that company?

A. 2½ years.

Q. In what business is Roberts Transfer engaged?

A. Freight business, general commodities.

Q. You say you have your headquarters at Audubon?

A. Yes, sir.

Q. Do you have any terminals from which you operate?

A. Yes, sir.

Q. Where are your terminals?

A. Omaha, Des Moines and Audubon. We have docks and telephones.

Q. How many pieces of power equipment do you own or operate?

A. Nine or ten I guess.

Q. How many trailers?

A. Five.

Q. Now, with respect to your operations in interstate commerce out of Des Moines. What points do you serve out of Des Moines in interstate commerce?

A. We have service to Guthrie Center, Panora, Audubon, Exira, Hamlin, Kimballton, Jacksonville, Avoca, Minden, Neola, Underwood, Council Bluffs and Oakland.

[fol. 2418] Q. Is the service you make available to the public in that operation a daily service?

A. Daily with the exception we run a five-day week. It is five days a week.

Q. Now, do you serve those same points from the Omaha terminal in interstate commerce?

A. There is the addition of Dallas Center out of Omaha. There is another town or two with Dallas Center—neighboring towns.

Q. Would you care to look at an Iowa map?

A. Grimes and Dallas Center.

Q. Just so I don't misunderstand you, you named certain towns you serve from Des Moines and then some you serve from Omaha. Are some of these points restricted for service out of Omaha?

A. Dallas Center and Grimes, as I understand it, are restricted for service out of Des Moines. They used to be known as a loop off Hiatt's permit. He sold that interstate right including up to Audubon.

Q. The towns restricted out of Des Moines are towns served by Hiatt?

A. Yes, sir.

Q. Do you interline with connecting carriers at Des Moines on interstate traffic destined to points which you serve?

A. Yes, sir.

Q. With what carriers do you interline? Give us a typical number of them?

[fol. 2419] A. Well—a typical number?

Q. A typical representation?

A. Burlington, Bruce, Rock Island Motor, Knaus, H & W, Des Moines Trans., Gateway, Bos Freight—those are the larger ones I would say. They give us the most interline.

Q. Through an interconnection with a carrier such as Bruce are you able to handle shipments originating St. Louis and destined to points you just mentioned in interstate commerce?

A. Yes.

Q. With respect to shipments received from connecting lines in Omaha you handle over your own line?

A. Yes, sir.

Q. With respect to shipments originating at Chicago and destined to points on your line, are those delivered to you by connecting carrier at Des Moines?

A. Yes, sir.

Q. And do you have a number of such shipments?

A. From which points?

Q. Chicago to points on your line?

A. Yes, sir.

Q. And do you have a number of such shipments from St. Louis to points on your line?

A. Yes, sir.

Q. And Kansas City to points on your line?

A. We have a few from Kansas City.

[fol. 2420] Q. And what about the Twin Cities?

A. We have quite a few from there.

Q. You do serve Audubon, Iowa, in interstate commerce?

A. Yes, sir.

Q. Are you familiar with the Five and Dollar store in Audubon?

A. Yes, sir.

Q. What is the fact you do perform transportation service for them?

A. Yes. On very few occasions.

Q. Have they ever asked for any service from you that you have been unable to perform? I mean have they asked you to handle a shipment and you refused?

A. No. They asked us on their store-door delivery to take it from the back door to the front door. Their warehouse is in the basement and we always deliver in the basement from the back door a matter of half a block. That is why we don't get along with him.

Q. Does the Rock Island Motor Transit Company handle most of their shipments?

A. Mostly. They specify them.

Q. As far as service you are in a position to render service to the Five and Dollar Store if requested to do so?

A. Yes, sir, and give eight o'clock delivery.

Q. In the morning out of Omaha?

A. Yes, sir.

[fol. 2421] Q. And how about Des Moines?

A. Yes, sir.

Q. Are you familiar with the Coast to Coast Store in Audubon?

A. Yes, sir.

Q. Do you perform any transportation service for them?

A. Yes, four or five times as much as for the Ben Franklin Store at Audubon.

Q. Is this service to them frequent service?

A. Yes, sir.

Q. How frequently in a week do you have a shipment for the Coast to Coast Store?

A. Once a day or more often. The average over a period of a year would be once a day.

Q. From what origin points do their shipments principally originate?

A. He gets them out of Minneapolis—the Coast to Coast organization in Minneapolis and he gets it Bruce to Des Moines and to Audubon by Roberts Transfer. From Omaha he gets quantities of oil and from Sioux City he gets twice weekly a shipment of oil.

Q. Did you include Casey, Iowa, in the points you mentioned?

A. No, sir.

Q. Did you include Anita?

A. No, sir.

Q. Did you include Adair?

A. No, sir.

[fol. 2422] Q. Did you include Carson?

A. No, sir.

Q. You did include Harlan?

A. Yes, sir.

Q. Do you perform transportation in interstate commerce to Harlan?

A. Yes, sir.

Q. Is that the daily service you have mentioned?

A. Yes, sir.

Q. Are you familiar with Brodersen Auto?

A. Yes.

Q. Do you perform any transportation service to him?

A. Yes. Both ingoing and outgoing. He sends parts to South Bend, Indiana—replacement parts.

Q. How do you handle an outgoing shipment for him to South Bend—to Des Moines and interchange with —

A. McCoy generally.

Q. Do you have a Mr. Frederickson in business in Harlan?

A. Yes. Wholesale candy and tobacco.

Q. Do you perform transportation service for him?

A. Once or twice a week inbound.

Q. Where does he get his shipments?

A. Chicago, St. Louis and Kansas City.

Q. Did you ever have a complaint from Frederickson or Brodersen of the character of service you perform?
[fol. 2423] A. Not face to face. I never heard him. We got a complaint from Brodersen on two other lines out of Omaha. They asked us about it.

Q. Brodersen has complained of your competitors and asked you how to get claims paid. Is that it?

A. Yes, sir. He asked what kind of a line they were.

Q. Did you mention Menlo?

A. No, sir.

Q. Minden?

A. Yes, sir.

Q. Are you acquainted with the Mowers Hardware Store there?

A. Yes, sir.

Q. Do you perform service to him?

A. Quite frequently, yes.

Q. From what origin points are his shipments?

A. The bulk of them from Des Moines.

Q. Do you have intrastate authority as well as interstate?

A. Yes, sir.

Q. Did you mention Neola?

A. Yes, sir.

Q. What service do you have to Neola?

A. Intrastate from Des Moines and we do serve interline in Des Moines for Neola and from Omaha—both ways.

Q. Are you familiar with Ericksen Implements?

A. That is a partnership, Petersen and Ericksen.
[fol. 2424] Q. Are you performing transportation service for them at present?

A. Yes, sir.

Q. Have you ever had complaint from them about your service?

A. No, sir.

Q. How about Oakland?

A. No, sir.

Q. Did you include Stuart?

A. No, sir.

Q. Now, as I understand it, you also have at the present time some arrangement with Rock Island Motor Transit

Company to handle some of their traffic Des Moines to Omaha?

A. Yes, sir.

Q. How long has that arrangement been in effect?

A. Since a year ago in March, or would it be October. My father is in California and I can't remember.

Q. Just what does that consist of? What is the volume? Is it truckload?

A. You mean individual shipments?

Q. Yes.

A. No, sir.

Q. Accumulatively does it amount to a truckload?

A. Over a period of a day or two, yes, it would.

Q. As I understand it you pick this traffic up at the dock of the railroad or the Rock Island Motor Transit?

[fol. 2425] A. Motor Transit.

Q. Is all of that traffic taken by you to Omaha or peddled on route to these towns?

A. With exception of once or twice it has all been to Omaha and beyond.

Q. Is that arrangement under a through rate agreement you have with them on traffic moving Chicago to Omaha—on division of through rate between Chicago and Omaha?

A. Yes, sir.

Q. I believe you also receive some Rock Island Motor Transit Company traffic destined to points you serve on your own route?

A. Yes, sir.

Q. Is that handled in a separate truck?

A. Yes, sir. We specify that. At first it wasn't, but we specified it later.

Q. In addition to operation described in local distribution and peddle service do you have any other operations in interstate commerce?

A. No.

Q. Is this equipment just described used in this operation just described for all your operations?

A. Power units are.

Q. What distinction do you make between power units and trailers?

A. We will pull Rock Island trailers.

By Mr. Nolan:

Q. As I understand the physical operation of your company so far as coming to Des Moines your truck comes from Cedar Rapids on Highway 30 west to 63 and on 63 to Highway 6 which is the junction east of Grinnell and into Des Moines?

A. It comes down 218 from Cedar Rapids.

Q. Don't you go west on 30 and south on 63 to 6 and then west?

A. No.

Q. Do you traverse Highway 6 from Iowa City to Des Moines?

A. We have two trucks a day going from Des Moines to Milwaukee and two in the reverse direction that travels Highway 6.

Q. I thought your physical operation was west on Highway 30 to Tama and south on 63 to Highway 6 and Highway 6 west to Des Moines?

A. If the operation is that way it is not to my knowledge. [fol. 2404] They are dispatched from Iowa City and Cedar Rapids.

Mr. Nolan: That's all.

Redirect examination.

By Mr. Fowler:

Q. This record shows that Iowa-Nebraska Transportation Company and Bos Truck Lines have authority to serve all points located on U. S. Highway 6 and that Des Moines Transportation Company has authority to serve certain points on U. S. Highway 6.

Now, what I want to ask you is, traffic originating St. Louis or delivered to you at St. Louis by connecting lines, destined to points on U. S. Highway 6 that you are not authorized to serve, would your company be willing to accept such shipment and interline with Iowa-Nebraska Transportation Company, Bos Truck Lines and Des Moines Transportation Company?

A. Yes.

Q. Would that interchange be likely to be at Des Moines on St. Louis interchange traffic?

A. Right.

Q. You have a terminal at Cedar Rapids?

A. Cedar Rapids, Waterloo and Dubuque.

Q. Do you have interconnecting line connections with carriers at those points?

A. At all points.

Q. What is the fact a shipment originating your territory on interline would be handled in the same way with carriers [fol. 2405] authorized to serve that territory?

A. Yes.

Q. Do you at the present time interchange with Iowa-Nebraska Transportation Company, Bos Truck Lines and carriers operating over U. S. Highway 6 now?

A. Yes.

Mr. Fowler: I believe that is all.

Exam. Carpenter: Is there any recross?

You are excused.

(Witness excused.)

OFFER IN EVIDENCE

Mr. Fowler: I would like to offer in evidence Exhibit 54, being system map of Gateway Transportation Company.

Exam. Carpenter: Any objection? If not it is received in evidence, Exhibit 54.

(Intervenor's Exhibit No. 54, Witness Ludden, was received in evidence.)

Mr. Fowler: Off the record.

(Discussion off the record.)

Exam. Carpenter: We will adjourn until 2:00 p. m.

(Whereupon at 12:00 noon a recess was taken until 2:00 p. m. of the same day.)

Q. Do you have some trailers of your own?

[fol. 2426] A. We have for our own business, but for pulling Rock Island freight we use their trailers.

Q. In your own operation, eliminating special service you have for Rock Island Motor Transit, how many tractors and trailers do you use in your own operation?

A. We use two of our five every day, one each way.

Q. Do you recall whether or not you have handled any shipments from implement companies in Moline or Rock Island destined to implement dealers in points you serve?

A. Would G. I. Case be Moline? I believe that is Rockford, Illinois. We have that to Audubon.

Q. How about John Deere?

A. I don't believe into Audubon, but we do for Petersen in Neola.

Q. But you are handling farm implements and parts originating in the Tri-City area to points in your area given to you at Des Moines by interconnection?

A. Yes, sir.

Q. And are doing it now?

A. Yes, sir.

Q. Do you recall whether you have handled any shipments originating in the Twin Cities from Janney Semple Hill & Company to merchants located in the points you serve?

A. Yes. Most every day we have a shipment. It comes through Omaha.

[fol. 2427] Q. Do you handle shipments from Paxton & Gallagher to points on your route?

A. Yes.

Q. Is that on regular daily occasions?

A. Yes. They have three different branches out there—groceries, hardware and floor tile. We haul one of them every day.

Q. Do you handle storage batteries out of Omaha?

A. Yes, sir. From Grant Storage Battery Company to Coast to Coast.

Q. Do you handle transportation for Grant Storage Battery Company out of Omaha to points you serve?

A. Yes, sir.

Q. Is that regular occasions?

A. Yes, sir, once a week or more often.

Mr. Fowler: You may examine.
Exam. Carpenter: Cross-examine.

Cross examination.

By Mr. Howland:

Q. Your age is what?
A. I am 24.
Q. And your father is the owner of Roberts Transfer?
A. Yes, sir.
Q. How long have you worked with that company—about 2½ years?
A. No. I worked from the time I got out of service in 1946 until 1949. Then I worked in Des Moines for approxi- [fol. 2428] mately a year and then I went back and have worked very since—about 2½ years ago.
Q. Now, the Roberts Transfer Company has no interstate operating authority—no Certificate on U. S. Highway 6?
A. No, sir.
Q. The authority that Roberts Transfer Company holds is for operation between Des Moines and Omaha via Iowa Highway 64?
A. Yes, sir, and several towns on 64. All the towns mentioned on 64. None on Highway 6.
Q. And the terminal points—that is your operation on the east begins at Des Moines and extends to Omaha?
A. Yes, sir.
Q. Over this route you have described as Iowa Highway 64?
A. Yes, sir.
Q. Now, you refer to shipments from Janney Semple Hill Company located in Minneapolis, Minnesota, to destinations on your line. Do I understand that your company gets those shipments at Omaha?
A. At Omaha. Very few, I would say, would come through Bruce at Des Moines. There are some, but 75% are through Omaha.

Q. What carrier handles those from whom-- You get them from some other carrier?

A. Yes. It varies. Union and Merchants at Omaha.

Q. Do you know over what route between Minneapolis and Omaha Merchants Motor Freight operates?

A. No. They offer 24-hour service.

[fol. 2429] Q. As a matter of fact Merchants Motor Freight operates between Minneapolis south to Des Moines and thence to Omaha from Des Moines.

A. I don't know. I know we have checked on the service to find who would give the best service and have written both Union and Merchants and they both said they offered 24-hour service from Minneapolis to Omaha.

Q. And if it be a fact that Merchants handles those Minneapolis-Omaha shipments through Des Moines, then you would be hauling them back on 64 from Omaha to destination to make delivery?

A. Yes. We could handle them either way. It depends on which way they route them. We will take them at either point.

By Mr. Fowler:

Q. You mean Des Moines or Omaha?

A. Yes, sir.

By Mr. Howland:

Q. Mr. Liston, has there not been some question in recent weeks as to whether the operations of Roberts Transfer between Des Moines and Audubon would be continued?

A. Well, there was. Matter of fact we lease that much of the run and it has been brought up and we have taken sort of and in the middle stand. We haven't said yes or no.

Q. Your father has as a matter of fact leased some Certificates between Audubon and Des Moines; or a Certificate?

A. Yes. Two interstate and intrastate.

Q. But the two Certificates cover the same route, of course?

[fol. 2430] A. Yes, sir.

Q. To whom were those Certificates originally issued?

A. Dolan N. Hiatt of Adel.

Q. Is it not true that your father sent a letter to the Rock Island Motor Transit Company along in the month of March, 1952, in which he indicated he expected to discontinue operation between Des Moines and Audubon?

A. It was to that effect—sort of advance notice so they could make their plans. We had a year on it. We just let them know.

Q. Has any final decision been arrived at with respect to that matter as to whether that operation will be continued by your father?

A. Nothing positive has been made.

Q. There is still a possibility that service between Des Moines and Audubon might be suspended or abandoned at least so far as your father is concerned?

A. So far as we are concerned I would say there would be that possibility, yes, but there is a possibility of many things.

Q. Your father, as a matter of fact, is holder of Certificate originally issued to him or acquired by him—that is he owns it outright—from Omaha to Audubon and the operation between Audubon and Des Moines is on a leased basis. Right?

A. Yes, that is the way it would be.

Q. And because of increased costs of operation due to certain wage adjustments and matters of that sort your [fol. 2431] father had considered the question as to whether he would desire to continue the Des Moines-Audubon part of his operation?

A. As I said it was taken in mind.

Q. Now, do you receive interline shipments at both Des Moines and Omaha from operators who themselves have any authority over Iowa Highway 64? There are certain carriers who operate on Highway 64, as I understand it.

A. Not recently. Rock Island Motor Transit used to give us some, but I think they must take it.

Q. What were the destinations for those?

A. Used to be Audubon and Harlan on a few occasions.

Q. How about other carriers who operate over 64 between Des Moines and Omaha, have you had instances where you dropped freight off for other carriers?

A. The only other is Iowa-Nebraska and they never interlined any freight at all with us.

Q. Have Iowa-Nebraska operated between Des Moines and Harlan?

A. They cover the same territory we do.

Q. And Iowa-Nebraska has no intrastate rights in that territory?

A. No.

Q. Mr. Fowler asked you about some instances of some claims for loss or damage with respect to some particular carrier with respect to a party who received freight and I don't recall just what it was you said in response to Mr. Fowler's question except as I understand it there had been [fol. 2432] some complaint about some particular claim situation growing out of loss and damage claims.

Mr. Fowler: Mr. Fowler didn't inquire about any such thing. I inquired about specific service Rock Island Motor Transit Company was giving.

Mr. Nolan: He was asked if they had had any complaint made by Mr. Frederickson and his partner in Harlan and Mr. Liston responded that they asked him about claims with one or two other carriers.

Witness Liston: That was Brodersen.

Mr. Nolan: At Harlan.

Witness Liston: Yes, sir.

Mr. Fowler: I would apologize. I didn't ask, but that did come out.

By Mr. Howland:

Q. What carriers did you have in mind when you answered that one or two carriers had had some difficulty on claims?

A. The main one was—I don't know whether it was a claim—I don't mean regular claim. Mr. Brodersen received parts—batteries, I think it was, from points unknown via Harlan Express and there was either loss or damage to one of the batteries. He claims he made claim to them and asked about the chances of collecting. It had gone six or eight months.

Q. Was there any other carriers you had in mind other than Harlan Express?

[fol. 2433] A. No.

Q. Now, this arrangement you referred to that you have with Rock Island Motor Transit consists of an arrangement, does it not, whereby freight originating at Davenport or points east of Davenport which Rock Island Motor Transit Company is unable to handle under present Certificates, that freight is turned over to Roberts Transfer at Des Moines for transportation to Omaha?

A. Yes, sir.

Q. And do you handle that in a separate trailer each night?

A. Yes, sir.

Q. How does that trailer get back to Des Moines?

A. It is brought back by our line empty.

Q. And is that handled on a division of the revenue on the shipment?

A. Yes. They divide it at Des Moines and then it is again divided at Omaha and we take what is in the middle.

Q. You take it proportionate to the mileage you have hauled it?

A. Yes, sir, percentage basis.

Q. About what amount, if you know, in pounds or tons of freight has that been running?

A. A month would be the only thing I have. I would say in a month, it is just from what my memory serves me, but about 150,000 pounds a month. That is just from memory and isn't exact.

Q. Has that been a regular daily service or certain days in the week?

[fol. 2434] A. At one time it was daily and now it is two or three times a week.

Q. And that was one of the things that was referred to in your letter your father sent to Rock Island Motor Transit?

A. That is the only service we perform for Rock Island Motor Transit.

Q. Other than interline transportation to points such as Panora or points like Kimballton, Elkhorn or some other points Rock Island does not serve?

A. Yes, sir.

Mr. Howland: I think that is all.
Exam. Carpenter: Redirect.

Redirect examination.

By Mr. Fowler:

Q. Mr. Liston, will you take that Iowa map and give me again a list of the points you serve in interstate commerce out of Des Moines?

A. The first point is Panora and then there is a little drop-off there at Panther Store.

Q. That is just a wide place in the road?

A. Oil station and store. Guthrie Center, Hamlin, Exira, Audubon, Kimballton, Elkhorn, Jacksonville, Harlan, Avoca, Minden, Neola, Underwood, Weston, Council Bluffs and Omaha.

Q. Are you authorized to serve all of those points from Omaha?

A. From Omaha? Yes.

[fol. 2435] Q. What points in addition to those are you authorized to serve?

A. Dallas Center and Grimes.

Q. Do you give a five-day week service to each of those points in interstate commerce through connecting carriers at Des Moines or originating at or through connecting carriers at Omaha?

A. Yes, sir.

Q. Now, under origin is considered your own traffic at Omaha?

A. Yes, sir.

Q. Now, you said there had been certain occasions when Rock Island Motor Transit had tendered you at Des Moines shipments to points served by you and also by them?

A. Yes, sir. I would say maybe three or four in the last several years.

Q. You think that was a mistake?

A. I think it was. We had quite a laugh about it.

Q. Did you say Des Moines Trans. has service on 64 that parallels yours?

A. Yes, sir, out of Chicago.

Q. And Omaha?

A. Yes, sir.

Q. Do they turn over to you anything?

A. They are our other competitor.

Q. With respect to abandoning the operation. If it could be continued at a profit do you intend to continue it?

A. The reason that was brought up, we got it on a five-
[fol. 2436] year lease with the Iowa Commission. The Interstate Commerce Commission approves the lease year to year and they have written that this next February the lease has to be turned back to the owner or purchased and the lease we have states the purchase price in it and we are first in line for purchase and several other points and it seems like it is pretty well binding.

Q. It has no effect on your operation out of Omaha to these points and you expect to continue that?

A. The permit out of Omaha stops at Audubon and the only reason we were going to give it up really was because of the fact the Interstate Commerce Commission didn't approve it.

Q. Let me ask this. Assume your lease arrangement doesn't work out and you apply to the Interstate Commerce Commission and get direct authority of your own. If you could accomplish that you would continue the operation?

A. Yes.

Q. So you have no intention of abandoning it if you get the lease straightened out?

A. Well, there was the labor proposition but, of course, who knows about labor. I think it can be handled.

Q. Let me ask you this. If it should appear that you can continue this operation at a profit is it your intention to continue it?

A. Yes, sir.

Q. If any appreciable quantity of that interconnecting
[fol. 2437] freight you now receive at Omaha and Des Moines was taken away from you what effect would it have on your operation?

A. It would drop off even more than it did because of the flood.

Mr. Fowler: Read the question.

(Question read.)

A. If a large quantity was taken away, well, we couldn't operate at a profit.

By Mr. Fowler:

Q. Do you regard the revenue which you receive through interconnecting carriers as an important part of your revenue to that part of your operation?

A. Definitely.

Q. If any appreciable part was taken away would it likely impair your operation?

A. Yes.

Mr. Fowler: I believe that is all.

Recross examination.

By Mr. Nolan:

Q. Is it a matter of fact your father, owner-operator of your company, definitely stated he was going to abandon service at Des Moines because of the cost of operation and there wasn't sufficient revenue to assist the operation?

A. The main reason was labor trouble and I believe 13 other carriers said if the unions want to move onto them they will abandon and they told the Iowa Commission so.

Q. Who was that?

A. Van Wyk.

[fol. 2438] Q. That transpired over a year ago your father saying he was going to abandon operations between Des Moines and Audubon because of the cost of operations?

A. He was going to abandon the first time he didn't make money.

Q. Your father definitely stated and wrote it in letter to the Rock Island Motor Transit that he had made up his mind he couldn't do business between Des Moines and Audubon on a profitable basis and he was going to confine his operations between Omaha and Audubon. Right?

Mr. Fowler: Object to that on grounds it is accumulative and repetitious having been asked and answered before.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Now, Mr. Liston, isn't it a fact that on the 28th day of March, 1952, your father advised the Rock Island Motor Transit Company that your company was going to cease doing business in Des Moines because of operating conditions in Des Moines which had existed for such a period of time he could no longer profitably operate between Audubon and Des Moines?

A. Somebody advised him to write that letter?

Q. Who?

A. Rock Island.

Q. Who told you that?

A. They said, "Give us a letter that you are going out of business because of labor trouble and we will see it is stopped." They said, "Give us a letter saying you are going [fol. 2439] to discontinue hauling our freight across. You don't even need to say why and we will take it to the Union and tell them to lay off." Mr. Jenkins said——

Q. He had no intention of abandoning services into Des Moines?

A. He said for three or four years. He has talked about it and decided against it.

Q. Is it not a fact that your father had this under consideration three or four years of terminating or abandoning service between Audubon and Des Moines on account of operating costs?

A. Do you mean——

Q. I asked you——

Mr. Fowler: I ask that the witness be permited to answer.

Exam. Carpenter: Read the question.

(Question read.)

A. The time element there is wrong. I would have to say no because of the time element.

By Mr. Nolan:

Q. For what period of time has your father been considering terminating operations between Audubon and Des Moines?

A. Just no reason.

Mr. Nolan: Will you read the question.

(Question read.)

A. Three or four years.

Mr. Nolan: That's all.

Exam. Carpenter: Redirect?

[fol. 2440] Mr. Fowler: That's all.

Exam. Carpenter: You are excused. Thank you.

(Witness excused.)

Mr. Fowler: If the Examiner please, I thought these were previously offered, objected to and ruled upon.

Exam. Carpenter: Everything was taken care of but receiving them.

Mr. Fowler: I offer in evidence Exhibits 51, 52 and 53, identified by Witness Bothell.

Exam. Carpenter: Documents identified as Exhibits 51, 52 and 53 are received in evidence.

(Intervenor's Exhibits Nos. 51, 52 and 53, Witness Bothell, were received in evidence.)

Mr. Fowler: I think that is all.

At this time, Mr. Examiner, I would like to enter my appearance, in addition to the carriers already designated, for Merchants Motor Freight and Roberts Transfer as intervenors in opposition. I would like to correct my appearance to read, A. W. Liston, doing business as Roberts Transfer, Audubon, Iowa.

We rest.

Mr. Howland: I have a little rebuttal evidence to the last witness if the Examiner please.

I would like to have Mr. Morrison sworn.

JOHN F. MORRISON was sworn and testified as follows:

[fol. 2441] Direct examination.

By Mr. Howland:

Q. Your name is John F. Morrison?

A. Correct.

Q. And your occupation?

A. Commercial Agent for Rock Island Motor Transit Company, Des Moines.

Q. And your home address?

A. 2315 Grand Avenue.

Q. And you have been employed by Rock Island Motor Transit how long?

A. Ten years approximately.

Q. Mr. Morrison, do you know Mr. John Liston who was on the witness stand a few moments ago?

A. I met him here at hearing we were having on March 18.

Q. March 18.

Are you also acquainted with A. W. Liston the owner-operator of Roberts Transfer?

A. I met him and his son at the same time.

Q. Was there some conversation between yourself, Mr. A. W. Liston and Mr. John Liston on that occasion?

A. Yes.

Q. And you participated in that conversation?

A. Well, there was Mr. Liston who was on the stand and his father.

Q. Anybody else?

[fol. 2442] A. Later we got into conversation with Mr. William F. Peterson, General Manager of Rock Island Motor Transit Company.

Q. What conversation did you have with Mr. A. W. Liston at that time? What did Mr. Liston say to you in connection with the subject of abandoning services between Des Moines and Audubon?

Mr. Fowler: I object to that as calling for pure hearsay, incompetent and immaterial. If intended to impeach the

witness who was just on the stand proper foundation has not been laid for such evidence.

Exam. Carpenter: Objection sustained.

Mr. Howland: May I ask if it is the thought of the Examiner that no proper foundation has been made for impeachment?

Exam. Carpenter: It is hearsay evidence.

Mr. Howland: We would like to make offer of proof at this time for purposes of the record and we state for the purpose of the record that the witness, if permitted to testify, would in substance testify to the following facts: That during the time of the hearing on the application for permanent authority of the Rock Island Motor Transit Company about the 24th or 25th of March, this witness was approached by Mr. A. W. Liston, accompanied by his son John Liston and that Mr. A. W. Liston stated that he was going to abandon service between Des Moines, Iowa, and Audubon, Iowa; that the operating costs had increased and the volume of business was such that he could not continue the operation; that this witness then asked Mr. Liston what [fol. 2443] his difficulties were and was advised that Mr. Liston feared that increased costs would be imposed on him by reason of certain demands that had been presented by a labor organization and that he, Liston, had made up his mind he would not continue the operation; that Witness Morrison then suggested, in substance, that the time for discontinuance be fixed at some date in the future so that some arrangements might be made with respect to handling of business and the Witness Morrison also suggested that if there was anything he or any other officer of the Rock Island Motor Transit Company could do to aid Mr. Liston in connection with the operation of his line that such officers of Rock Island Motor Transit Company would be willing to do it as the Rock Island Motor Transit Company desired Mr. Liston to continue his operation.

The witness would further testify that Mr. Liston sent a letter addressed to D. E. Jenkins, Superintendent of Operations for Rock Island Motor Transit Company, fixing the date of discontinuance of operations between Audubon, Iowa, and Des Moines, Iowa.

Exam. Carpenter: Let the record show that Mr. Liston

left the hearing room prior to Mr. Morrison being offered as a witness.

Off the record.

(Discussion off the record.)

Exam. Carpenter: Is there anything further of Mr. [fol. 2443-A] Morrison? If not, you are excused.

(Witness excused.)

Mr. Howland: That is all we have to offer.
Exam. Carpenter: You rest at this time?
Mr. Howland: We rest.
Exam. Carpenter: Briefs are due July 11, 1952.
Is there anything further?
Mr. Howland: I think of nothing further.
Exam. Carpenter: The hearing is closed.

(At 4:45 p.m., May 22, 1952, hearing closed.)

[fol. 2444] SECRETARY'S CERTIFICATE (omitted in printing).

Exhibit No. 1

The Chicago Association of Commerce and Industry

TRANSPORTATION COMMITTEE

BULLETIN No. 233

"WAY TO SHIP"

JANUARY 1952

Package Car Service From Chicago

Time Schedule in days as shown herein contemplates placement of cars for unloading at freight station at destination before 12 o'clock noon, except where schedule is suffixed with letter P, in which case cars are not due to be placed for unloading until the afternoon.
All cars that are scheduled to be placed for unloading before 12 o'clock noon and are not placed for unloading until the afternoon are considered as being one day late, and all cars that are scheduled to be placed for unloading in the afternoon and are not placed for unloading before 4 P. M. are also considered as being one day late.

MR. TRAFFIC MANAGER:

Do You Know That

THE INDUSTRIAL TRAFFIC COUNCIL

of

THE CHICAGO ASSOCIATION OF COMMERCE AND INDUSTRY

Composed of Traffic Managers of Over 400 Leading Chicago Industrial Firms,

is

Organized to improve and develop Chicago's transportation facilities and services; to protect the Chicago Market as a manufacturing and distributing center and to provide a greater degree of coordination between the Industrial traffic representatives and all transportation agencies.

Regular meetings are held monthly to consider current transportation matters.

General Letters and Bulletins are published from time to time keeping members constantly informed of general transportation matters affecting the Chicago Market.

The interests of your Company can best be served through membership in the Industrial Traffic Council. Contact the Secretary for full particulars.

WHY NOT JOIN NOW?

W. J. ROWLEY, Chairman, T. M., The Albert Dickinson Co.
J. C. ALLEN, Vice Chairman, G. T. M., Sears Roebuck & Co.
A. H. SCHWIETERT, General Secretary, T. D., The Chicago Association of Commerce and Industry
One North La Salle St., Chicago 2, Ill.

THE CHICAGO ASSOCIATION OF COMMERCE AND INDUSTRY

"THE TRANSPORTATION VOICE OF THE CHICAGO MARKET"

Trucking service shown herein is Direct via Carrier shown except as noted. ‡ Service involves transfer to a connecting carrier en route.

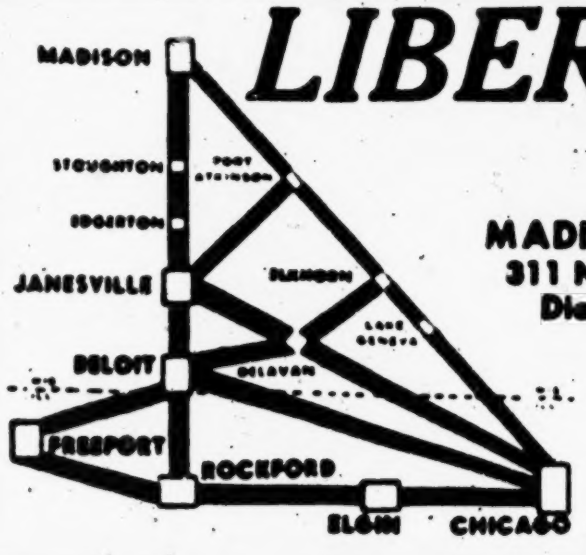
Motor Carrier Embargoes



In an order issued by the Interstate Commerce Commission, effective April 15, 1943, motor common carriers of property may issue embargoes on their services, when, because of lack of facilities or personnel or any other reason beyond its control, it is unable to perform the transportation services requested.

"Way to Ship" subscribers have been and will continue to be furnished with notices of all embargoes issued by motor carriers, members of The Chicago Association of Commerce and Industry. We suggest that our subscribers consult these embargo notices and advise us of any case where a carrier refuses freight for a point to which he is shown in this guide as having service and to which an embargo has not been issued.

Trucking service shown herein is Direct via Carrier shown, except as noted. See pages 5 and 7 for full name, address and telephone number of Carriers.
◊Terminal. ◊◊Home Office.
Ⓣ Service involves transfer to a connecting carrier en route.
Ⓡ Refrigerator service also available.

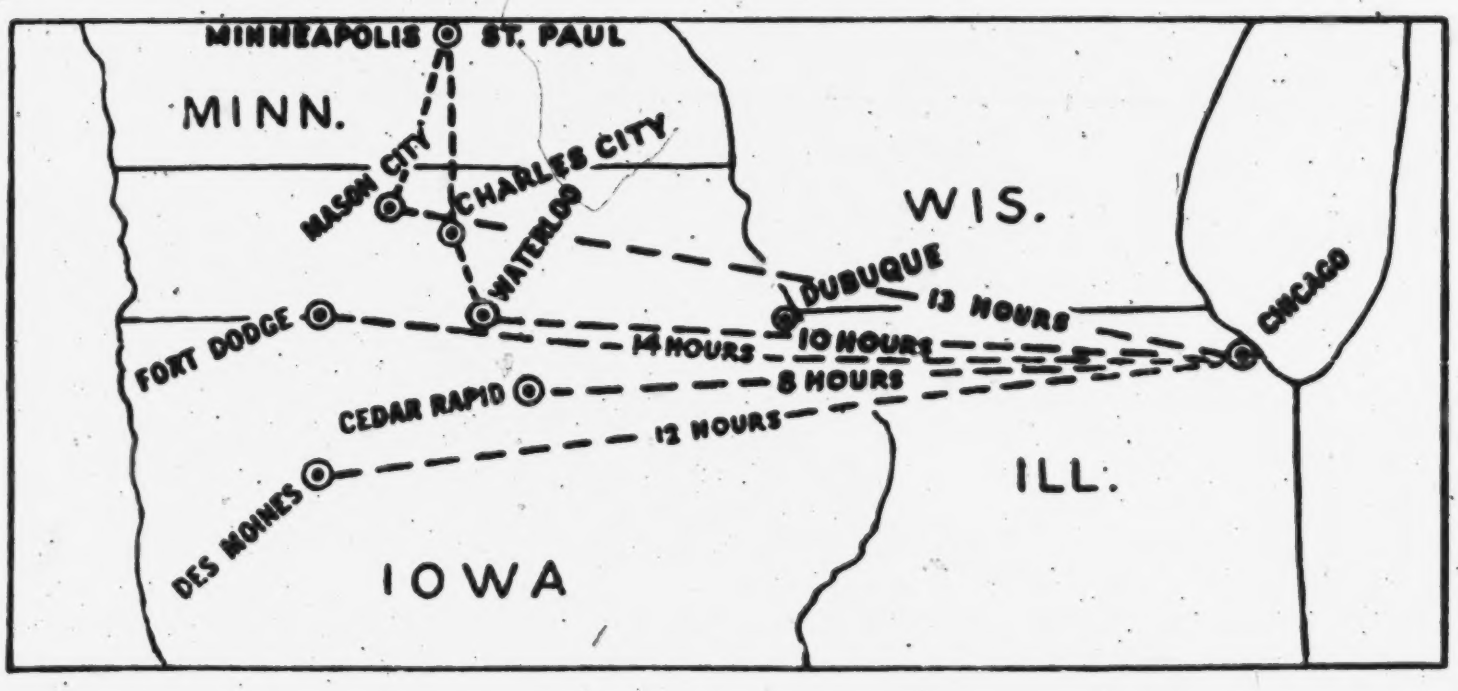
85 DIRECT ROUTES TO YOUR IOWA CUSTOMERS

WITH

The Real McCOY TRUCK LINES

PHONE: SEeley 3-3101



ADDRESS: 2131 South THROOP ST.

McCOY'S DIRECT ROUTE SHIPPING is the answer to your shipping needs with FAST SERVICE - A MINIMUM OF HANDLING-NO TRANSFERS.

McCOY'S DIRECT ROUTE SHIPPING cuts your routing problems to a minimum. You are served with the most modern and up-to-date delivery and over-the-road tandem equipment — 32-foot Dual Axle Trailer — 34,000-lb. capacity.

There is refrigeration and heater service with special supervision on the handling of all freight.

C.O.D. shipments are accepted with immediate payment from destination point.

R. WEBBER, General Chairman, Presiding

STATUS OF THE REED-BULWINKLE APPLICATIONS: Mr. Craig, Chairman of the committee reported.

In its decision last December on the Section 5a application of the Middle Atlantic Conference the Commission refused to prohibit the Conference from asking for suspension of a tariff filed by member carriers. In the application of the Columbia River Tariff Bureau filed with the Commission, that group sought approval of a provision that would give authority to the manager of the Bureau to ask for suspension of rates published by a member carrier. On February 19, 1952, Division 2 of the Commission denied this application on that and two other grounds. This does not mean that the Bureau cannot ask for a suspension, but it does mean that the Bureau does not have the sanction of a Section 5a agreement to support their position.

In the latest application filed by Central States Motor Freight Bureau their hearing was heard in Chicago, beginning on January 22nd, but that hearing was indefinitely postponed when it was brought out at the hearing that member carriers had not been furnished with a copy of the agreement involved.

[fol. 2511] *REPORT OF THE PROTECTIVE SERVICE COMMITTEE*: Mr. Couch, Chairman of the committee, reported.

Proposal No. 478 of the Middlewest Motor Freight Bureau would amend the application of the present Over-Flow Rule so that it would not apply on perishable commodities. Mr. Couch moved that the Council voice opposition to this proposal. The motion was seconded by Mr. Porter and carried.

REPORT OF THE RATES, RULES AND CLASSIFICATION COMMITTEE (Forwarder Section): Mr. Washer, Chairman of the Committee reported.

S. 2712. This bill, introduced by Senator Magnuson, proposes to amend the definition of the freight forwarder and would require that they prove public convenience and necessity before obtaining a certificate. Passage of this bill would mean that freight forwarders in seeking a new permit or certificate could be opposed by truck lines, rail carriers or the air lines.

S. 2713. Also introduced by Senator Magnuson this bill seeks "to provide more definite standards for determining those entitled to exemption from Part IV of the Act as an association of shippers or a shippers' agent". The bill provides that the Commission in determining whether or not such an association is exempt would consider the following factors: 1. Whether or not the involved activities are actually and substantially competitive with the operations of regulated freight forwarders; 2. Whether they are limited to the handling of a single commodity or of homogeneous commodities; 3. Whether or not the number of persons participating in or benefiting from the activities in question is such as to justify removal of the exemption; and, 4. Whether or not the operations of the person claiming exemption have been such as to constitute unfair or destructive competitive practices within the meaning of the National Transportation Policy. Mr. Jelsma, staff advisor to the Senate on transportation legislation, stated that the purpose of this

bill is to provide a more clear-cut basis for regulating groups in competition with forwarders. Your Committee recommends that the Council oppose S. 2713, and Mr. Washer so moved. Motion was seconded by Mr. Spamer and carried.

REPORT OF LEGISLATIVE COMMITTEE: Mr. Schwietert reported in the absence of Mr. Quasey.

A committee of the National Industrial Traffic League is at the present time studying the various bills affecting transportation introduced during the current session of Congress. A proper consideration of this legislation requires more detailed study than the Council has thus far been able to give these matters. When the National Industrial Traffic League committee has completed its studies, the Council will be in a better position to take any action that is necessary.

REPORT OF THE RATES, RULES AND CLASSIFICATION COMMITTEE (Rail Section): Mr. Felton, Chairman of the Committee, reported.

Illinois Intrastate Rates: The Illinois Commerce Commission approved the Official Territory Ex Parte 175 increase of 9 per cent in lieu of the previously authorized 6

[fol. 2512] per cent. This increase became effective on February 28, on one day's notice.

Cancellation of L.C.L. and Any Quantity Exceptions Ratings in Official, Illinois and Southern Territories: A joint docket of the Southern Freight Association, the General Freight Traffic Committee of the Eastern Railroads and the Illinois Freight Association proposes to cancel all less carload and any quantity exceptions ratings, within Official Classification Territory; within Southern Freight Association Territory; within Illinois Freight Association Territory; between Official Territory, on the one hand, and Southern, Illinois, Western Trunk Line and Southwestern Territories, on the other; between Southern Territory, on the one hand, and Official, Illinois, Western Trunk Line and Southwestern Territories, on the other; between Illinois Territory, on the one hand, and Official, Southern, Western

Trunk Line and Southwestern Territories, on the other. This proposal does not contemplate cancellation of exceptions ratings applying from Chicago to Western Trunk Line Territory, or to Southwestern Territory, said Mr. Felton. This is a subject on which the Council as a group would find it very difficult to take any action, but individual shippers should carefully examine its effect on their commodities and, if necessary, be prepared to defend their exception ratings at the hearing which will be held on March 18th and 19th at Chicago.

Mr. Schwietert commented briefly on two statements that had been prepared and distributed which illustrate the effect of the cancellation of exception ratings on several commodity groups. It was pointed out that while the cancellation of these exceptions would result in increases to nearby points, there would be offsetting reductions on shipments moving for longer distances.

W.T.L. Application E-58-388: This is a carrier proposal to cancel Item 250 of W. T. L. Tariff 271-N and similar items in individual lines issues which restrict the partial unloading of freight moving under executed Section 7 of the Uniform Bill of Lading, said Mr. Felton. Mr. Foster moved that the Council go on record as approving cancellation of the item as proposed by the carriers. Motion was duly seconded and carried.

Modified Rule 10: The Uniform Freight Classification No. 1, published to become effective May 30, 1952, carries forward Rule 10 as it stands in the present Consolidated Freight Classification. As the Docket 28300 class rates will be subject to this new classification, shippers will no longer have the benefit of the modified Rule 10 presently applicable by exceptions to the classification in Southwestern and Western Trunk Line Territory. Shippers of mixed carloads of freight would pay substantially higher charges under the straight Rule 10 as the shipment is billed at the rate for the highest rated article in the mixed carload. The modified Rule 10 provides for assessing charges on the basis of the rate applicable to each individual commodity. Mr. Felton moved that the Council urge the adoption of the modified Rule 10 in the Uniform Freight Classification. The motion was seconded by Mr. Werner and carried.

[fol. 2513] *REPORT OF THE RATES, RULES AND CLASSIFICATION COMMITTEE (Motor Section:* Mr. Lumpp, Chairman of the Committee, reported.

C.S.M.F.B. Docket 15736—Class Rate Adjustment in Tariff 247-H: Your Committee, together with the Motor Committee from the Wisconsin Manufacturers Association, met with Earl Girard on February 15th for the purpose of discussing this proposal. As a result of this meeting, your Committee decided to recommend to the Council that it not oppose an increase in rates in Tariff 247 of 7 per cent, subject to a number of provisions.

Mr. Girard has subsequently amended the original proposal to read as follows:

1. Hold in abeyance any action by the bureau as concerns the $1.50 shipment charge matter covered by Docket No. 15736 until final action is decided upon by all carriers in Central Territory. The Bureau has been informed to this effect.

2. Increase all truckload or volume class rates in the tariff in accordance with recommendation of seven (7%) per cent.

3. Increase all commodity rates, other than commodity rates published for less-than-truckload quantities of less than 10,000 pounds, on the basis of recommendation of seven (7%) per cent. (These are 3rd or 4th Class L. T. L. commodity rates in this tariff.)

4. Increase all less-than-truckload or any quantity class rates and commodity rates of less-than-truckload quantities, other than those subject to a minimum weight of 10,000 pounds or greater, ten (10%) per cent, including the minimum charge per shipment.

As the Chicago-Milwaukee carriers' amended proposal agrees substantially with our original recommendation (the only difference being a 10 per cent increase on L.T.L. or Any Quantity class rates and commodity rates), we recommend that the Council not oppose this amended proposal. All changes in rates and charges are to be published with

an expiration date of six months from the date they become effective.

On motion of Mr. Porter, seconded by Mr. Crawford and carried, the committee's recommendation was adopted.

C.S.M.F.B. Dockets 15777 and 15869—Minimum Charge per Shipment: Docket 15777 proposes that charges for a single shipment under 500 pounds shall not be less than charges resulting from the application of $2.00 plus the Class 55 truckload rate on the first 100 pounds or fraction thereof, and 60 cents plus the Class 55 truckload rate applicable to the additional weight over the first 100 pounds. Docket 15869 provides that the minimum charge for any

March 6, 1952 Page No. 242

[fol. 2514] shipment less than a capacity load shall be for 200 pounds at the first class rate but in no case shall the charge on a single shipment be less than $2.00. The proposal under Docket 15869 is identical to the rule that was published for the account of several carriers in Central Territory, suspended by the Interstate Commerce Commission and currently applicable for these few carriers because of the expiration of the suspension period. Your committee recommends that the carriers be requested to defer any action on these dockets until final decision by the carriers on Docket 15268 and decision by the Interstate Commerce Commission in MC-C-543, the Small Shipments Case, as well as the Minimum Charge Per Shipment Cases.

On motion of Mr. Washer, seconded by Mr. Crawford and carried, the committee was instructed to oppose these dockets.

C.S.M.F.B. Dockets 15784, 15789-E and 15790: These dockets would establish provisions in various tariffs to provide relief for carriers required to reduce gross weight of vehicles moving on highways of the State of Michigan during Frost Law periods. Your committee recommends opposition to these dockets as the Council has long been opposed to the establishment of any extra charges or arbitraries over and above the normal application of the through rate.

Mr. Porter moved that the Council oppose these dockets. The motion was seconded by Mr. Crawford and carried.

C.S.M.F.B. Docket 15785—Pick-Up and Delivery Service Rule: This docket proposes to amend Tariff 500 by adding the following to the Pick-Up and Delivery Service Rule shown therein: Whenever a shipper or consignee requests delivery to a receiving point not directly accessible to trucks, an extra charge of 25 cents per 100 lbs. will be made with a minimum charge of $1.00 per shipment, except, if inside delivery to other than the ground floor is inaccessible to trucks, such delivery, if requested, will be made at an extra charge of 35 cents per 100 lbs., minimum $1.50.

On motion of Mr. Couch, duly seconded and carried, the committee was directed to ask that this subject be deferred for further study by the Council, and, also that the carriers clarify the term 'inaccessible'.

C.S.M.F.B. Dockets 15814 and 15850—Class and Commodity Rate Adjustments: Docket 15814 would amend all class tariffs by establishing a new column of class rates to apply on shipments weighing less than 2,000 lbs., such rates to be 30 cents per 100 pounds higher than the present Column B (5000 lbs., or more) rates. Docket 15850 proposes to increase all class and commodity rates in C.S.M.F.B. standard tariffs by 20 per cent. Your committee recommends opposition to these dockets for the reason that Docket 15819-E proposing a 15 per cent increase is now under consideration by the carriers.

On motion of Mr. Porter, seconded by Mr. Kirk and carried, the recommendation of the committee was adopted.

March 6, 1952 Page No. 243

[fol. 2515] *C.S.M.F.B. Docket 15833—Stop-Off Charge:* This docket proposes to amend Item 220 of Tariff 500 by increasing the charge for shipments stopped for partial loading or unloading from $10.00 for each stop, to $12.89 for each stop, exclusive of initial pick-up or final delivery stop. As no justification has been furnished for adopting the charge presently applicable via rail carriers, your committee recommends opposition to this docket.

On motion of Mr. Porter, duly seconded and carried, the recommendation of the committee was adopted.

C.S.M.F.B. Docket 15834—Minimum Charge Rule: This docket proposes to amend applicable tariffs by increasing the minimum charge as follows: On traffic subject to single-line haul, the minimum charge will be for 100 pounds at the First Class rate, but not less than $2.50. On traffic subject to joint-line hauls, the minimum charge will be for 100 pounds at the First Class rate, but not less than $3.50. Your committee recommends opposition to this docket because it would not only increase the minimum charge, but would establish different minimum charges for single-line and joint-line hauls.

On motion of Mr. Porter, seconded by Mr. Crawford and carried, the committee's recommendation was adopted.

C.S.M.F.B. Docket 15268—$1.50 Surcharge and Docket 15819-E—15% Increase: Docket 15268 which has been approved by the Central Committee, was the subject of a conference between the carriers and the Central Territory Traffic Conference this morning. The 15 per cent general increase covered by Docket 15819-E which has been approved "in principle" by the Standing Rate Committee, was a subject of the same shipper-carrier meeting. The carriers indicated that the total increase resulting from the last labor contract revision amounts to a 22 per cent increase in their labor costs. They also indicate that the operating ratio for a group of 46 study carriers for January 1952, was 94.2 compared with 93.3 for January 1951. Traffic studies indicate the number of shipments, weight and revenue for various sized shipments as follows:

Size of Shipment	Number of Shipments	Weight	Revenue
All Minimum Charge Shipments	35.7%	1.9%	5.1%
0 to 5,000 pounds (Other than Minimum Charge Shipments)	57.3%	25.9%	40.7%
Over 5,000 pounds	7 %	72.2%	54.2%

The carriers indicated that the application of the $1.50 surcharge would give them about an 8 per cent increase

in total revenue. In connection with an across-the-board increase, carriers emphasized that a 5 per cent increase would result in only a 3 per cent increase in total revenue. Mr. Porter moved that the Motor Committee study the carriers' figures and recommend to the Council the best solution to the carriers' proposal for both a surcharge on small shipments and a general increase. The motion was

March 6, 1952 Page No. 244

[fol. 2516] seconded and carried. (Secretary's note—The Central Territory Traffic Conference representatives, in a meeting held after the joint shipper-carrier meeting, decided not to oppose an increase in the minimum charge as proposed in Docket 15268 on shipments less than 5,000 pounds providing for the charge accruing at the applicable rate and at the actual weight (but not less than 100 pounds) plus $1.50, with the understanding that this increase in the minimum charge basis is to be in lieu of any general increase in rates. On March 11, 1952, the Board of Directors of the Central States carriers approved this basis which will supersede the present minimum charge bases as well as other proposals before the carriers' Standing Rate Committee for revised minimum charges or general increases.)

Eastern Central Docket SR-3783—15 Per Cent Increase: This docket, to be considered by the General Committee at Cleveland on March 19, proposes to increase all rates, arbitraries, and charges published in Tariff Nos. 10-A, 11-A, 12-F, 14-H (except Items 1520 to 4360), 15-I, 19-G, 24-A by 15 per cent. Reported for information only.

Central and Southern Docket 3845—9 Per Cent Increase: This proposal to increase all rates and charges by 9 per cent was heard by the North-South Appeal Committee on February 20, 1952. A letter voicing opposition to this increase was mailed to the committee in time for their consideration. Reported for information only.

M.W.M.F.B. Docket 11255—$1.50 Surcharge: This proposal that the minimum charge on all shipments be at the charge based on the applicable rate at actual weight or truckload minimum weight, plus $1.50, failed of adoption by the Standing Rate Committee. The General Rate Com-

mittee, meeting on February 28 and 29, sustained the recommendation of the Standing Rate Committee. Reported for information only.

M.W.M.F.B. Proposal 249—11 Per Cent Increase: This proposal to increase all rates and charges by 11 per cent was heard by the Standing Rate Committee which has recommended that an increase of 10% be published on all rates in Tariff No. 4 only. (Tariff No. 4 does not involve Chicago.) The proposal as to all other tariffs is still under consideration. In accordance with instructions of the Council, opposition to this proposal was expressed in a letter sent to the committee. Reported for information only.

Eastern Central Docket SR-3504: This docket proposes to adjust the class rates in Tariffs 10-A, 11-A, 12-F, and 19-G to reflect rail 28300 scale, including the Ex Parte 175-A 9 per cent increase, down to and including Class 35, making the present Class 35 become Class 27.5 and inserting Classes 32.5 and 30 between Class 35 and Class 27.5 with graduation of not less than one cent. Proposal would also add a twenty cent (20¢) differential to the L.T.L. traffic weighing less than 5,000 lbs. At the October Council meeting the committee was directed to voice opposition to this docket. The proposal was deferred at the last meeting of the General Committee on February 22, 1952, and is being further analyzed by a sub-committee. Reported for information only.

March 6, 1952 Page No. 245

[fol. 2517] *Eastern Central Dockets SR-3723 to 3727—Minimum Charge:* These dockets proposed to amend various tariffs by establishing a new minimum charge rule providing the basis of 200 pounds at the applicable first class rate with a minimum charge per shipment of $2.00. As the Council actively opposed the identical proposal in Central States tariffs, we also voiced opposition to these dockets. The General Committee has adopted this proposal as amended on the basis of 100 pounds at the first class rate applicable, plus $1.50. We understand that the Central Territory Traffic Conference is meeting with the carriers regarding this proposal. Reported for information only.

M.W.M.F.B. Proposal 374: This proposal would amend tariffs applying between points in Middlewest Territory, also between points in Central States and Middlewest Territories as follows:

(1) Increase all L.T.L. or A.Q. rates by ten (10) per cent; or

(2) Add surcharge of 150 cents to all shipments; or.

(3) Add surcharge of 100 cents to all shipments; or

(4) Add surcharge of 75 cents to all shipments; or

(5) Add surcharge of 50 cents to all shipments; or

(6) Add surcharge of 100 cents to the charges on each shipment determined by multiplying the weight by the rate, with the aggregate to be not less than the minimum charge published in the tariff. This docket was heard by the Standing Rate Committee on February 26, 1952. Reported for information only.

M.W.M.F.B. Proposal 393—Minimum Charge: This proposal would provide a minimum charge per shipment of not less than $2.50 in Middlewest Motor Freight Bureau tariffs which now provide for a lesser amount. This proposal was heard by the Standing Rate Committee on March 4, 1952. Reported for information only.

I. & S. M-3646—Pittsburgh Arbitraries: Supplements published by the Central States Motor Freight Bureau to become effective February 16 name arbitraries ranging from 10 cents to 20 cents per 100 pounds on L.T.L. traffic and from 3 cents to 5 cents per 100 pounds on truckload shipments for pick-up and delivery in the Pittsburgh, Pa., area. These charges were first published to become effective early in 1951, but were suspended by the Interstate Commerce Commission. As this case is still pending, the carriers are permitted to place the charges in effect because of the expiration of the normal suspension period. About 20 motor carriers have excluded themselves from the application of these arbitraries. Reported for information only.

I. & S. M-3929—New York Surcharge: This proceeding embraces suspended tariffs published by several motor carrier bureaus establishing surcharges on traffic moving from

or to points in the State of New York intended to compensate the carriers for added cost resulting from the state's new ton-mile highway use tax. A petition of the various motor carrier rate bureaus involved in this proceeding for vacation of the order of suspension was denied by the Commission. Proceedings involving the legality of the state tax are now before the New York State Appellate Court on appeal. Reported for information only. (Secretary's Note: The New York State Appellate Court has upheld the constitutionality of the highway use tax.)

March 6, 1952 Page No. 246

[fol. 2518] *Ex Parte Number MC-37—Commercial Zones and Terminal Areas:* In a sixth supplemental report and order in Ex Parte MC-37, Commercial Zones and Terminal Areas, the Commission has determined the limits of terminal areas of motor carriers and freight forwarders within which transportation by motor vehicles in the performance of collection and delivery or transfer service is exempted from truck regulations, with exceptions regarding hours of service and safety. The Commission's order in this proceeding becomes effective April 15, 1952. Reported for information only.

Rock Island Motor Transit Application: Mr. Schwietert reported that Application No. MC-29130, Sub 70 of the Rock Island Motor Transit Company had been set for hearing beginning March 18 in Des Moines, Iowa. The application is for a certificate to handle up to 5,000 pounds from and to points on U. S. Highway No. 6 from Davenport, Iowa, to Omaha, Nebraska. The Applicant is presently the only carrier serving certain points on this route. Rock Island Motor Transit Co. has intimated that their application may be amended to seek authority to handle all traffic over Route 6. After a discussion of the matter, Mr. Couch moved that we not only support the application in its present form, but that we also support it should it be amended to include truckload as well as less-than-truckload traffic. The motion was seconded and carried.

REPORT OF THE EXPORT-IMPORT COMMITTEE: Mr. Parker, Chairman of the Committee, reported.

World Trade Conference: The Chicago World Trade Conference opened today at noon at the Sherman Hotel and will continue through tomorrow. It is sponsored by the Chicago Association of Commerce and Industry and the Export Managers Club of Chicago. The speakers are all practical foreign traders and promise a most interesting program.

Customs Simplification: The House of Representatives passed this measure last fall. Your committee outlined the provisions of this bill in our report of September 6, 1951. The Senate Finance Committee is now considering it. Those of us who do considerable importing should be in favor of it and should express their views to Senators Douglas and Dirksen and possibly to Senator Walter F. George of the Committee.

New Directory: A new 1952 membership directory and port guide has just been issued by the Ocean Freight Agents Association of Chicago. This handy brochure lists the agents by names, telephone numbers, and lines represented. Copies may be obtained through the offices of the Grace Line, 230 N. Michigan Avenue.

Letters of Credit: Mr. Parker called attention to a most interesting discussion on "What is a 'Clean' Bill of Lading?" by Daniel C. Draper. It appears in the I. C. C. Practitioners Journal for February, 1952, and presents the latest views

[fol. 2519] of English, Scottish and American Courts on the question of what notations may appear on ocean bills of lading and still not render them a "foul" bill of lading.

Ocean Rate Increases: The North Atlantic/U.K. Conference has issued a notice of rate increases, effective May 1. The amount of increase will have to be determined by contacting the various carriers.

Export Control: Commencing April 7, exporters must obtain a new document from foreign customers known as an "Import Certificate" which is to be issued by the foreign government concerned. So far, the regulation applies only

to ten Western European Countries—England, France, Holland, Germany, etc. It will replace the present end use statement now required to be furnished by the customer.

REPORT OF THE AIR TRANSPORTATION COMMITTEE: Mr. Stockton, Chairman of the Committee, reported.

Following is a brief outline of the territories covered by several pending airline merger proposals:

Northwest-Capital. From East and Gulf Coast to the Midwest to Seattle-Portland; thence to Alaska, the Aleutians, Tokyo and Korea; also a spur from Seattle and Portland to Hawaii.

Braniff-Mid-Continent. Essentially a north-south system covering the central U. S. from Chicago, Denver and other north central cities to New Orleans; Houston and other Texas cities; then on south to Mexico City, Havana, Balboa and South America.

National-Colonial. North-south system in eastern U. S. from Montreal southward via New York to Miami and the Gulf Coast, plus a spur route to Bermuda from New York and Washington.

Delta-Northeast. These are widely separated systems, with Northeast serving New England and New York City while Delta operates east-west from Miami and Atlanta through the Deep South to Texas cities. Merger is contingent on acquisition of a linking route from the Deep South to New York; since C. A. B. opposes big route shake-ups like this, observers see this merger as contingent on acquisition by Capital of a southern route or a further merger hook-up with a north-south airline like National.

West Coast-Empire. These are local service airlines serving the states of Washington, Oregon and Idaho.

Air Freight Rate Increases: From a recent check with Slick Airways, the Flying Tiger Line, Trans-World Airlines, United Air Lines, American Airlines and one or two

others, we have been informed that they have either filed or are about to file with the Civil Aeronautics Board re-

[fol. 2520] quests for rate increases which will average about 10 per cent and which will range from 7 to 25 per cent. The major portion of these increases, we understand, will be in specific commodities rather than the general commodities and the effective date April 15, 1952.

Braniff Airways, effective April 15, will amend its tariff No. C-1 CAB8 to cancel certain volume rates in the 1000 through 10,000 pound bracket, leaving only 100 pounds northbound direction rates in effect. Braniff Airways proposes to increase their general commodity rates 10 per cent, effective April 15.

REPORT OF THE MAIL AND EXPRESS COMMITTEE: Mr. Kirby, Chairman of the Committee, reported.

MAIL

Public Law 233—Surcharge on purchases of postal cards in quantities of 50 or more: S. 2394—a bill to repeal the present 10 per cent surcharge on purchases of postal cards in quantities of 50 or more has been passed by the Senate and House and sent to the President for signature. The bill will become law effective 10 days after signature.

Public Law 199—Restrictions on size and weight of parcel post shipments: The Postal Service Committee has prepared a questionnaire to be distributed to Association members in the next few days to develop information on the effect on operations of Association members and their recommendations whether the law should be amended or repealed.

Mail Transportation by Motor Vehicles: Effective March 1, the Postal Transportation Service will take over the separation and dispatch of mails to be handled by motor carriers in the Chicago Suburban area.

EXPRESS

Ex Parte 177 Increases in Express Rates: The Illinois Commerce Commission has approved the Ex Parte 177 increase of November 15 in Railway Express rates for application on Illinois intrastate shipments effective on March 11, 1952.

The Interstate Commerce Commission voted not to suspend Railway Express tariffs effective February 26, increasing less carload first and second class charges 6 cents per shipment. The additional charge of 6 cents will not apply on shipments moving on commodity rates.

The Illinois Commerce Commission has scheduled a hearing March 11 at Chicago on the application of the 6 cent increase on intrastate less carload shipments.

SERVICE FEE FOR 1952: Chairman Webber explained that the members are assessed an annual service fee to defray Council expenses such as postage, stationery, etc. For the past several years this fee has been $7.50 annually and the Council has been able to operate on that amount. Mr. Porter moved that the service fee for 1952 continue at $7.50. The motion was seconded by Mr. Crawford, and carried.

Meeting was adjourned at 3:00 P. M.

R. WEBBER, General Chairman

Gerald E. Franzen, Secy.

[fol. 2534] EXHIBIT No. 21

LEWIS COMMERCIAL CLUB

Meets Second Thursday Each Month

Home of Cold Springs Park

LEWIS, IOWA

This petition is presented by the merchants of Lewis, Iowa.

When the Rock Island Rail Road was taken out several years ago it was the understanding then that the town was to be serviced by the Rock Island Motor Freight, which they have continued to do.

The only other freight service we have is the McVay truck which operates a local service from Greenfield to Omaha. The Rock Island truck line is the only freight service we have which brings in freight from all points and is the only truck line which carries freight out to all points.

The Berry Garage and Machine Shop is dependent upon the Rock Island freight line to bring in farm machinery from Detroit and repair parts from Des Moines.

The Joyce Lumber *Co.* gets all their mill work for houses from Des Moines and they are dependent entirely upon the Rock Island truck line to bring it in. The Rock Island handles every thing that is trucked in.

This also applies to the Marker Hardware. They are dependent entirely upon the Rock Island trucks to bring in their merchandise from Des Moines and Chicago.

The Cavin Woodworking Shop reports that he gets 3 day service from Des Moines, by the Rock Island truck, for all his lumber and they deliver it to his shop during day light hours.

This same situation applies to all other business houses. Out side of the local McVay truck the Rock Island is the only freight service we have, and the only one that brings in long distance freight such as Detroit and Chicago and the only service from the east.

We like the Rock Island service and we request that by all means they continue to serve us.

[fol. 2538] EXHIBIT No. 24

AFFIDAVIT OF FRED J. MILLETT

State of Iowa)
County of Polk) *ss.*

I, Fred J. Millett, being first duly sworn do state: I reside in Des Moines, Iowa; I am now employed by Rock Island Motor Transit Company as Assistant to the General Freight Agent; I have been so employed since April 1, 1938, and prior thereto was employed by White Line Motor Freight Company, the operating authority and equipment of which were acquired by Rock Island Motor Transit Company; my employment with both the companies above named has been in connection with rate and traffic matters.

In the year 1946 I made an examination of the freight bills of Rock Island Motor Transit Company, covering all shipments handled during the years 1944 and 1945, for the purpose of determining the number of instances, in which during those years, there had been delivered to Rock Island Motor Transit Company shipments by connecting motor carriers, which motor carriers according to their published tariffs had authority to serve the points to which such shipments were destined.

During 1944 Rock Island Motor Transit Company received interstate shipments from connecting carriers, which according to their published tariffs had regular route authority to serve the destination points of the shipments between Davenport and Council Bluffs, Iowa, a total of 3,077 shipments. These shipments were received at the junction points with connecting carriers in the number set out below with the destinations shown herein. These shipments originated in all parts of the United States.

I am familiar with the traffic moving over the lines of the Rock Island Motor Transit Company to destinations in the State of Iowa and from Iowa points to destinations outside the State of Iowa. While I have not made a specific study of the freight bills during the years 1946, 1947, 1948 and 1949, I know that the practices followed by the carriers hereinbefore referred to during 1944 and 1945 continued, with minor exceptions, and that during the years from 1940 down to the

present time most of the regular route motor carriers having authority to serve intermediate points between Davenport, Iowa and Council Bluffs, Iowa have followed the practice of delivering to Rock Island Motor Transit Com-
[fol. 2546] pany at Davenport, Cedar Rapids, Des Moines, Iowa or Omaha, Nebraska interstate shipments destined to the smaller intermediate points.

I do further state that in many instances westbound shipments destined to points between Davenport and Des Moines, Iowa have been delivered to Rock Island Motor Transit Company at Des Moines, Iowa, for delivery at destination; likewise, eastbound shipments destined to points between Council Bluffs and Des Moines have been delivered to Rock Island Motor Transit Company at Des Moines, Iowa.

N. E. DISTRICT ILLINOIS
WILLIAM F. DROHAN DANIEL D. CARMELL
TRUSTEES

March 18, 1952

Subject: Receiving freight from connecting lines at Cedar Rapids, Iowa

To: Carriers doing business with Keeshin Motor Express

Gentlemen:

We have been trying to continue our peddle operations, handling both our own freight and that received from the connectine line carriers. We have tried this without success despite orders from our Chicago office. However, with the present shortage of equipment, we are not going to be able to accept freight from any line except the two set-up by our tariff which are: H & W Motor Express and A. W. Schmidt.

We are very sorry we cannot continue to accept freight from the other carriers as we have enjoyed good business connections with you. If conditions are changed so that we again can inter-line freight with you here at Cedar Rapids, we will notify you immediately.

To give you time to change your operations to our change, I will not commence this policy until next week or Monday 24, 1952, to be exact. Please notify all your employees this concerns as we will not accept freight after that date except from the two companies designated and then only when two line hauls are involved.

Thanks for your cooperation.

Very truly yours,

/s/ Frank J. Alba, Terminal Manager

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

No. MC 47619*

IOWA-NEBRASKA TRANSPORTATION CO., I. C.,
CHICAGO, ILLINOIS

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 5, held at its office in Washington, D. C., on the 11th day of July, A. D., 1949

AFTER DUE INVESTIGATION, It appearing that the above-named carrier has complied with all applicable provisions of the Interstate Commerce Act, and the requirements, rules, and regulations prescribed thereunder, and, therefore, is entitled to receive authority from this Commission to engage in transportation in interstate or foreign commerce as a motor carrier; and the Commission so finding;

IT IS ORDERED, That the said carrier be, and it is hereby, granted this Certificate of Public Convenience and Necessity as evidence of the authority of the holder to engage in transportation in interstate or foreign commerce as a common carrier by motor vehicle; subject, however, to such terms, conditions, and limitations as are now, or may hereafter be, attached to the exercise of the privileges herein granted to the said carrier.

IT IS FURTHER ORDERED, That the transportation service to be performed by the said carrier in interstate or foreign commerce shall be as specified below:

REGULAR ROUTES:

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17, M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading,

Between Chicago, Ill., and Omaha, Nebr., as follows:

From Chicago over Alternate U. S. Highway 30 to junction U. S. Highway 30, thence over U. S. Highway 30 to Denison, Iowa, thence over Iowa Highway 141 to Sioux City, Iowa, and thence over U. S. Highway 75 to Omaha (also from Denison over U. S. Highway 30 to Missouri Valley, Iowa, thence over U. S. Highway 75 to Omaha).

From Chicago over U. S. Highway 34 to junction Illinois Highway 92, thence over Illinois Highway 92 to junction Illinois Highway 82, thence over Illinois Highway 82 to Geneseo, Ill. (also from Chicago over U. S. Highway 34 to junction U. S. Highway 6, thence over U. S. Highway 6 to Geneseo), thence over U. S. Highway 6 via Iowa City, Iowa, to Atlantic, Iowa, thence over Iowa Highway 83 to Avoca, Iowa, thence over Iowa Highway 64 to Council Bluffs, Iowa, and thence across the Missouri River to Omaha (also from Atlantic over U. S. Highway 6 to Omaha).

From Chicago to Iowa City, as specified above, thence over U. S. Highway 218 to Mount Pleasant, Iowa, thence over U. S. Highway 34 to Glenwood, Iowa, and thence over U. S. Highway 275 to Council Bluffs, Iowa, and thence across the Missouri River to Omaha (also from Glenwood over U. S. Highway 34 to Plattsmouth, Nebr., thence over U. S. Highway 73 to Omaha.)

Return over these routes to Chicago.

Service is authorized from the off-route point of Joliet, Ill., restricted to pick-up of only *wall paper* and *steel wire*.

[fol. 2550] Between Cedar Rapids, Iowa and Iowa City, Iowa:

From Cedar Rapids over U. S. Highway 218 to Iowa City, and return over the same route.

Between Marengo, Iowa, and Belle Plaine, Iowa:

From Marengo over Iowa Highway 212 to Belle Plaine, and return over the same route.

Between Marshalltown, Iowa, and Des Moines, Iowa:

From Marshalltown, Iowa over Iowa Highway 330 to junction Iowa Highway 64, thence over Iowa Highway 64 to Des Moines, and return over the same route.

Service is authorized to and from all intermediate points in Iowa.

Between Avoca, Iowa, and Des Moines, Iowa:

From Avoca over Iowa Highway 64 to Des Moines, and return over the same route.

Service is authorized to and from all intermediate points.

Packing-house products and *fresh meat*:

Between Omaha, Nebr., and Arcadia, Iowa:

From Omaha over U. S. Highway 75 to Missouri Valley, Iowa, thence over U. S. Highway 30 to junction Iowa Highway 285, and thence over Iowa Highway 285 to Arcadia, and return over the same route.

Service is authorized to and from all intermediate points; and the off-route points of Audubon, Brayton, Defiance, Earling, Elkhorn, Exira, Guthrie Center, Hamlin, Halbur, Hancock, Jacksonville, Kimballton, Manilla, Manning, Shelby and Walnut, Iowa.

IRREGULAR ROUTES, traversing New Jersey, Ohio, Connecticut, and Rhode Island, for operating convenience only:

Fresh meats, packing-house products and *packing-house supplies,*

Between Dunlap, Iowa, and Panama, Portsmouth and Persia, Iowa.

Between Denison, Iowa, and Deloit, Iowa.

Between Arcadia, Iowa, and Botna and Irwin, Iowa.

Between Harlan, Iowa, and Panora, Iowa.

Service authorized under this commodity description is restricted to traffic moving to or from Omaha, Nebr.

Butter, eggs and *dressed poultry,* minimum 16,000 pounds each from any one consignor.

From Omaha, Nebr., and points and places within 100 miles of Omaha, to New York, N. Y., Philadelphia, Pa., and Boston, Mass.

[fol. 2551] *General commodities,* except those of unusual value, and except dangerous explosives, livestock, household goods as defined in *Practices of Motor Common Carriers of Household Goods,* 17 M.C.C. 467, commodities in bulk, and those requiring special equipment,

From New York, N. Y., to Chicago, Ill.

Mica splittings and dust,

From New York, Cohoes and Utica, N. Y., to Valparaiso, Ind.

Return, with no transportation for compensation except as otherwise authorized, to the above-specified origin points.

Regular and Irregular Routes:

Butter, eggs, dressed poultry, and *agricultural commodities,*

From Avoca, Harlan and Exira, Iowa, to Chicago, Ill.:

From Avoca, Harlan and Exira over irregular routes to Atlantic, Iowa, and thence over the above-specified regular routes to Chicago, with no transportation for compensation on return except as otherwise authorized.

Service is not authorized to or from intermediate points.

Any repetition in the statement of the authority granted herein shall not be construed as conferring more than a single operating right.

IT IS FURTHER ORDERED, and is made a condition of the certificate that the holder thereof shall render reasonably continuous and adequate service to the public in pursuance of the authority herein granted, and that failure so to do shall constitute sufficient grounds for suspension, change, or revocation of this certificate.

AND IT IS FURTHER ORDERED, That this certificate shall supersede the certificates issued to the above-named carrier under Docket Nos. MC 47619 on February 11, 1944, MC 47619 Sub 2 on October 19, 1942, and MC 47619 Sub 6 on September 24, 1946, and those issued to the predecessor-in-interest under Docket Nos. MC 61530 on March 20, 1941, and MC 61530 Sub 1 on September 9, 1940; and said certificates are hereby canceled.

By the Commission, division 5.

W. P. Bartel, Secretary.

(SEAL)

---

* This certificate embraces the operating rights granted the above-named carrier in Certificates Nos. MC 47619, MC 47619 Sub 2 and MC 47619 Sub 6, and those in Certificates Nos. MC 61530 and MC 61530 Sub 1, acquired by the above-named carrier pursuant to MC-F 3860.

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY
No. MC 44055

BOS TRUCK LINES, INCORPORATED,
MARSHALLTOWN, IOWA

February 17, 1948

REGULAR ROUTES:

General commodities, except those of unusual value, and except dangerous explosives, commodities in bulk, commodities requiring special equipment (not including those requiring refrigeration), and those injurious or contaminating to other lading,

Between Chicago, Ill., and Kearney and Hastings, Nebr., as follows:

From Chicago over Illinois Highway 64 to St. Charles, Ill., thence over Illinois Highway 31 to Geneva, Ill., thence over Alternate U. S. Highway 30 to junction U. S. Highway 30, thence over U. S. Highway 30 to junction Iowa Highway 131, thence over Iowa Highway 131 to Belle Plaine, Iowa, thence over Iowa Highway 212 to junction U. S. Highway 30, thence over U. S. Highway 30 to Missouri Valley, Iowa, thence over U. S. Highway 75 to Omaha, Nebr., thence over U. S. Highway 275 to junction U. S. Highway 30, and thence over U. S. Highway 30 to Kearney;

From Chicago to Missouri Valley as specified above, thence over U. S. Highway 30 to Kearney;

From Chicago over U. S. Highway 34 to junction Illinois Highway 65, thence over Illinois Highway 65 to Aurora, Ill., thence over Illinois Highway 31 to junction U. S. Highway 34, thence over U. S. Highway 34 to junction Illinois Highway 92, thence over Illinois Highway 92 to Rock Island, Ill., thence

over U. S. Highway 6 to Omaha, Nebr., thence over Nebraska Highway 38 to junction unnumbered highway, thence over unnumbered highway to Millard, Nebr., thence over Nebraska Highway 31 to junction U. S. Highway 6, and thence over U. S. Highway 6 to Hastings; and

Return over these routes to Chicago.

Service is authorized to and from all intermediate points on the above-specified routes; and the off-route points of Ferguson, Mitchellville, and Kellogg, Iowa.

Between Waterloo, Iowa, and Denison, Iowa:

From Waterloo over U. S. Highway 63 to junction Iowa Highway 58, thence over Iowa Highway 58 to Grundy Center, Iowa, thence over Iowa Highway 14 to Marshalltown, Iowa, thence over U. S. Highway 30 to junction Iowa Highway 64, thence over Iowa Highway 64 via Melbourne, Iowa, to junction Iowa Highway 253 (also from Marshalltown over Iowa Highway 14 to junction unnumbered highway, thence over unnumbered highway via Van Cleve and Haverhill, Iowa, to Melbourne), thence over Iowa Highway 235 to Rhodes, Iowa, thence over County Highway G via Collins, Iowa, to Maxwell, Iowa, thence over Iowa Highway 210 via Slater, Iowa, to Madrid, Iowa, thence over Iowa Highway 89 to Woodward, Iowa, thence over Iowa Highway 141 via Perry, Iowa, to [fol. 2578] junction U. S. Highway 59, and thence over U. S. Highway 59 to Denison, and return over the same route.

Service is authorized to and from all intermediate points; and the off-route points of Ferguson, Mitchellville, and Kellogg, Iowa.

Between Sterling, Ill., and Silvis, Ill.:

From Sterling over Illinois Highway 2 to Silvis, and return over the same route.

Service is not authorized to or from intermediate points.

Between Ames, Iowa, and Des Moines, Iowa:

From Ames over U. S. Highway 69 to Des Moines, and return over the same route.

Service is not authorized to or from intermediate points.

Between Carroll, Iowa, and Atlantic, Iowa:

From Carroll over U. S. Highway 71 to junction U. S. Highway 6, thence over U. S. Highway 6 to Atlantic, and return over the same route.

Service is not authorized to or from intermediate points.

Between Grand Island, Nebr., and Hastings, Nebr.:

From Grand Island over U. S. Highway 281 to Hastings, and return over the same route.

Service is not authorized to or from intermediate points.

GENERAL COMMODITIES, except those of unusual value and except dangerous explosives, commodities in bulk, and those requiring special equipment (other than those requiring refrigeration) minimum 20,000 pounds,

Between Des Moines, Iowa and the U. S. Ordnance Plant near Ankeny, Iowa:

From Des Moines over U. S. Highway 69 to the U. S. Ordnance Plant, near Ankeny, and return over the same route.

Service is not authorized to or from intermediate points.

PACKING-HOUSE AND DAIRY PRODUCTS, DRESSED POULTRY, CANNED GOODS, PETROLEUM PRODUCTS, IN CONTAINERS, AND IRON AND STEEL ARTICLES,

Between Omaha, Nebr., and Denver, Colo.:

From Omaha over Alternate U. S. Highway 30 through Wahoo and Osceola, Nebr., to junction U. S.

Highway 30, thence over U. S. Highway 30 through Central City and Brule, Nebr., to junction U. S. Highway 138, thence over U. S. Highway 138 to Sterling, Colo., and thence over U. S. Highway 6 to Denver, and return over the same route.

Service is authorized to and from the intermediate points of Central City, Nebr., and Sterling and Fort Morgan, Colo.

Service is authorized from the off-route points of Fremont, Ravenna, and Oxford, Nebr., restricted to pick-up of dairy products and dressed poultry, and Blair, Plattsmouth, and Nebraska City, Nebr., restricted to pick-up of canned goods.

[fol. 2579] *Heating supplies and equipment,*

From Chicago, Ill., to Michigan City, Ind.:

From Chicago over U. S. Highway 20 to Junction Indiana Highway 43, thence over Indiana Highway 43 to Michigan City; and

Return with no transportation for compensation over the same route to Chicago.

Service is not authorized to or from intermediate points.

IRREGULAR ROUTES:

Fresh meats and packing house products,

From Omaha and South Omaha, Nebr., to points and places in Benton, Boone, Cedar, Carroll, Dallas, Grundy, Guthrie, Hamilton, Harding, Iowa, Jasper, Johnson, Linn, Marshall, Muscatine, Poweshiek, Story and Tama Counties, Iowa.

Butter, eggs, dressed poultry, and feathers,

From points and places in Benton, Boone, Carroll, Dallas, Fayette, Green, Grundy, Hardin, Iowa, Jasper, Madison, Marshall, Page, Poweshiek, Ringgold, Story, Tama, and Taylor Counties, Iowa, and Maryville, Mo., to Chicago and La Grange, Ill.

Flour and feed,

From Omaha, Nebr., to points and places in Iowa on and south of U. S. Highway 20.

Road machinery,

From Omaha, Nebr., to points and places in Colorado on and east of U. S. Highway 87, those in Kansas on and east of U. S. Highway 81, those in Illinois on and north of U. S. Highway 36, and those in Iowa.

Dried beans,

From Denver and Greeley, Colo., and Scottsbluff, and Minatore, Nebr., to Omaha, Nebr., points and places in Iowa on and south of U. S. Highway 20, and those in Illinois on and north of Illinois Highway 9.

Canned goods,

From Lawrence, Lansing, Coleman, Bay City, Fremont, Sturgeon, Traverse City, Lake Odessa, and Shelby, Mich., and points and places in Wisconsin, to Mason City, Marshalltown, Carroll, Des Moines, Oskaloosa, Cedar Rapids, Davenport, Dubuque, Sheldon, Ottumwa, Sioux City, Fort Dodge, Laurens, Waterloo, and Webster City, Iowa.

From Roland, Grundy Center, Oskaloosa, Cambridge, and Gilman, Iowa to Chicago, Ill.

Canned goods and groceries,

From Marshalltown, Roland Ackley, Hampton, Grundy Center, Waverly, Oskaloosa, and Cambridge, Iowa, to Beaver Dam, Milwaukee, and Madison, Wis.

[fol. 2580] *Paper and paper products,*

From Green Bay, Wis., to Marshalltown, Cedar Rapids, Davenport, and Ottumwa, Iowa.

Cheese

From Monroe, Green Bay, Manitowoc, Doylestown, Platteville, and Plymouth, Wis., to Des Moines, Iowa.

Canned Milk,

From Waupun, Wis., to Des Moines, Iowa.

Powdered milk,

From Madison, Bloomer, Lake Mills, Troy, and Waterloo, Wis., to Des Moines, Iowa.

Butter,

From Slater, Iowa, to Buffalo, N. Y.

From Marshalltown, Iowa, to Youngstown, Ohio.

Furnace castings,

From Jackson, Ohio, to Marshalltown, Iowa.

Electric motors,

From Lima, Ohio, and Fort Wayne, Ind., to Marshalltown, Iowa.

Furnaces and furnace parts,

From Columbus, Ohio to Chicago, Rockford, Joliet and Peoria, Ill., Gary, Fort Wayne, South Bend, and Hammond, Ind., Madison, Sheboygan, and Manitowoc, Wis., and Cedar Rapids, Davenport, and Des Moines, Iowa.

Return with no transportation for compensation except as otherwise authorized to the above-specified origin points.

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods,* 17 M.C.C. 467, commodities in bulk, and those requiring special equipment (not including those requiring refrigeration).

Between points and places in the CHICAGO, ILL., COMMERCIAL ZONE as defined by the Commission in 1 M.C.C. 673, and Chicago Heights and Elmhurst, Ill., as an extension of said carrier's presently authorized operations.

Heating furnaces, heating equipment and supplies, and foundry equipment and supplies,

Between Marshalltown, Iowa, and Columbus, Ohio.

Eggs, dressed poultry and live poultry,

From Fairfield, Iowa, to Chicago, Ill.

[fol. 2581] *Rejected shipments* of the immediately above-specified commodities,

From Chicago, Ill., to Fairfield, Iowa.

Household goods,

Between Marshalltown, Iowa, and points and places in Iowa within 100 miles of Marshalltown, on the one hand, and, on the other, points and places in Illinois and Nebraska.

Any repetition in the statement of the authority granted herein shall not be construed as conferring more than a single operating right.

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

No. MC 44055 SUB 24

December 2, 1948

General commodities, except those of unusual value, dangerous explosives, commodities in bulk, and commodities requiring special equipment (not including those requiring refrigeration), over alternate regular routes for operating convenience only in connection with said carrier's presently authorized regular-route operation.

Between junction U. S. Highway 30 and Iowa Highway 131, and junction U. S. Highway 30 and Iowa Highway 212:

From junction U. S. Highway 30 and Iowa Highway 131 over U. S. Highway 30 to junction Iowa Highway 212.

Between Belle Plaine, Iowa and Marengo, Iowa.

From Belle Plaine over Iowa Highway 212 to Marengo.

Between junction U. S. Highway 6 and Iowa Highway 64, and Marshalltown, Iowa:

From junction U. S. Highway 6 and Iowa Highway 64, over Iowa Highway 64 to junction U. S. Highway 30, thence over U. S. Highway 30 to junction Iowa Highway 14, thence over Iowa Highway 14 to Marshalltown.

Between junction U. S. Highway 30 and U. S. Highway 330 near Lamoille, Iowa, and junction U. S. Highway 30 and Iowa Highway 64:

From junction U. S. Highway 30 and U. S. Highway 330 near Lamoille, Iowa over U. S. Highway 30 to junction Iowa Highway 64.

Between junction U. S. Highway 30 and Iowa Highway 14, and junction U. S. Highway 30 and U. S. Highway 330 (approximately 5 miles southeast of Marshalltown):

From junction U. S. Highway 30 and Iowa Highway 14 over U. S. Highway 30 to junction U. S. Highway 330.

Between junction U. S. Highway 30 and alternate U. S. Highway 30, near Sterling, Ill., and junction U. S. Highway 20 and Indiana Highway 49, as follows:

[fol. 2582] From junction U. S. Highway 30 and alternate U. S. Highway 30, over U. S. Highway 30 to junction Indiana Highway 49, thence over Indiana Highway 49 to junction U. S. Highway 20.

Return over these routes.

Service is not authorized to or from intermediate points.

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

MC-44055 Sub 25

December 2, 19 3

IRREGULAR ROUTES:

Canned goods and *groceries,*

From Marshalltown, Iowa, to Norfolk, Nebr., with no transportation for compensation on return except as otherwise authorized.

Iron castings, heating furnaces, furnace parts, heating equipment and *supplies* and *foundry equipment* and *supplies,*

From Marshalltown, Iowa, to Kenosha, Racine and Milwaukee, Wis., with no transportation for compensation on return except as otherwise authorized.

Malt beverages,

From Milwaukee, Wis., to Marshalltown, Iowa.

Empty malt beverage containers,

From Marshalltown, Iowa, to Milwaukee, Wis.

Authority is granted to traverse Illinois for operating convenience only.

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

C-15.1

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

No. MC 53980*

DES MOINES TRANSPORTATION COMPANY, INC.,
DES MOINES, IOWA

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 5, held at its office in Washington, D. C., on the 17th day of March, A. D., 1947

AFTER DUE INVESTIGATION, It appearing that the above-named carrier has complied with all applicable provisions of the Interstate Commerce Act, and the requirements, rules, and regulations prescribed thereunder, and, therefore, is entitled to receive authority from this Commission to engage in transportation in interstate or foreign commerce as a motor carrier; and the Commission so finding:

IT IS ORDERED, That the said carrier be, and it is hereby, granted this Certificate of Public Convenience and Necessity as evidence of the authority of the holder to engage in transportation in interstate or foreign commerce as a common carrier by motor vehicle; subject, however, to such terms, conditions, and limitations as are now, or may hereafter be, attached to the exercise of the privileges herein granted to the said carrier.

IT IS FURTHER ORDERED, That the transportation service to be performed by the said carrier in interstate or foreign commerce shall be as specified below:

REGULAR ROUTES:

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods,* 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading,

Between Chicago, Ill., and Des Moines, Iowa, as follows:

From Chicago over U. S. Highway 34 to junction Illinois Highway 65, thence over Illinois Highway 65 to Aurora, Ill., thence over Illinois Highway 31 to junction U. S. Highway 34, thence over U. S. Highway 34 to junction Illinois Highway 92, thence over Illinois Highway 92 via Yorktown, Ill., to Moline, Ill., thence over U. S. Highway 6 to Iowa City, Iowa, thence over U. S. Highway 218 to Cedar Rapids, Iowa, thence over U. S. Highway 30 to Ames, Iowa, and thence over U. S. Highway 69 to Des Moines.

From Chicago to Yorktown as specified above, thence over Illinois Highway 92 to junction Illinois Highway 78, thence over Illinois Highway 78 to junction U. S. Highway 30, thence over U. S. Highway 30 to Ames, Iowa, and thence over U. S. Highway 69 to Des Moines;

From Chicago to Iowa City as specified above, thence over U. S. Highway 6 to Des Moines; and Return over these routes to Chicago.

[fol. 2586] Service is authorized to and from the intermediate points of Davenport, Iowa City, Newton, Cedar Rapids, Ames, Marengo, Grinnell, and Kellogg, Iowa; and the intermediate and off-route points of Villa Park and Chicago Heights, Ill., and those in the CHICAGO, ILL., COMMERCIAL ZONE, as defined by the Commission, in 1 M.C.C. 673.

Between Omaha, Nebr., and Des Moines, Iowa:

From Omaha over U. S. Highway 6 ~~to~~ Des Moines, and return over the same route.

Service is authorized to and from the intermediate points of Council Bluffs, Atlantic, and Adel, Iowa.

IRREGULAR ROUTES:

Butter, eggs, and *dressed poultry,*

From Des Moines, Denison, Creston, Osceola, Leon, Perry, Gowrie, Atlantic, and Coon Rapids, Iowa, to Chicago, Ill.

Meat and *packing-house products and supplies,*

From Des Moines, Iowa, to Elgin, Galesburg, Jacksonville, Joliet, Marengo, Ottawa, Peoria, Springfield, Belvidere, Bloomington, Lincoln, Clinton, Pontiac, Naperville, Chicago, Rock Island, La Salle, Sterling, Dixon, Rochelle, DeKalb, Aurora, Freeport, Rockford, and Dwight, Ill.

From Chicago, Ill., to Adel, Cedar Rapids, Clarion, Creston, Fort Dodge, Guthrie Center, Jefferson, Mason City, Mount Ayr, Perry, Winterset, and Muscatine, Iowa.

From Perry, Atlantic, Centerville, Clarinda, Creston, Guthrie Center, and Ottumwa, Iowa, to Chicago, Ill.

Butter and *eggs,*

From Glidden, Iowa, to Chicago, Ill.

From Slater, Iowa, to Buffalo, N. Y., traversing Indiana, Ohio, and Pennsylvania for operating convenience only.

Alcoholic liquors,

From Peoria and Pekin, Ill., to Des Moines, Iowa.

Mail-order catalogs,

From Des Moines and Davenport, Iowa, to points and places in Iowa.

Return with no transportation for compensation except as otherwise authorized to the above-specified origin points.

General commodities, except those of unusual value, and except dangerous explosives, commodities in bulk, and those requiring special equipment,

[fol. 2587] From Des Moines, Iowa, to points and places in Iowa within 100 miles of Des Moines, and return with no transportation for compensation, except as otherwise authorized, to Des Moines.

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in Practices of Motor Common Carriers of Household Goods, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading,

Between Bettendorf and Davenport, Iowa, on the one hand, and, on the other, Rock Island, Moline, East Moline, Carbon Cliff, Silvis, and Milan, Ill.

Advertising materials, supplies, and equipment,

From Davenport, Iowa, to points and places in that part of Illinois north of a line drawn from the Iowa-Illinois State line along U. S. Highway 34 to junction

Illinois Highway 116, thence along Illinois Highway 116 to Peoria, Ill., thence along U. S. Highway 24 to Chenoa, Ill., and thence along U. S. Highway 66 to Chicago, including points and places on the indicated portions of the highways specified, with no transportation for compensation on return, except as otherwise authorized.

IT IS FURTHER ORDERED, and is made a condition of this certificate that the holder thereof shall render reasonably continuous and adequate service to the public in pursuance of the authority herein granted, and that failure so to do shall constitute sufficient grounds for suspension, change, or revocation of this certificate.

AND IT IS FURTHER ORDERED, That this certificate shall supersede the certificate issued to the above-named carrier in this proceeding on February 17, 1945, in its entirety, and that issued to its predecessors in interest under Docket No. MC 13150 on June 28, 1943, and under Docket No. MC 68548 on May 5, 1942, with respect to the operating rights authorized herein, and said certificates are hereby canceled to that extent; a portion of the operating rights authorized in the latter certificates having been duly transferred to the above-named carrier as set forth in the footnote appended hereto.

By the Commission, division 5.

W. P. Bartel,
Secretary

(SEAL)

* This certificate embraces (1) the operating rights previously granted the above-named carrier under Docket No. MC 53980, including the consolidation noted on the previous certificate, (2) a portion of the operating rights granted White Line Transfer & Storage Company, Inc., Docket No. MC 13150, purchased by the above-named carrier pursuant to MC-F 2990, approved June 12, 1946; and (3) a portion of the operating rights granted Margaret Plagmann, doing business as Plagmann Transfer Co., Docket No. MC 68548, purchased by the above-named carrier pursuant to MC-F 3170, decided September 17, 1946.

[fol. 2588] C-15.1

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

No. MC 53980 Sub 9*

DES MOINES TRANSPORTATION COMPANY, INC.,
DES MOINES, IOWA

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 5, held at its office in Washington, D. C., on the 14th day of May, A. D., 1951

AFTER DUE INVESTIGATION, It appearing that the above-named carrier has complied with all applicable provisions of the Interstate Commerce Act, and the requirements, rules, and regulations prescribed thereunder, and, therefore, is entitled to receive authority from this Commission to engage in transportation in interstate or foreign commerce as a motor carrier; and the Commission so finding:

IT IS ORDERED, That the said carrier be, and it is hereby, granted this Certificate of Public Convenience and Necessity as evidence of the authority of the holder to engage in transportation in interstate or foreign commerce as a common carrier by motor vehicle; subject, however, to such terms, conditions, and limitations as are now, or may hereafter be, attached to the exercise of the privileges herein granted to the said carrier.

IT IS FURTHER ORDERED, That the transportation service to be performed by the said carrier in interstate or foreign commerce shall be as specified below:

REGULAR ROUTES:

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, and those requiring special equipment.

Between Des Moines, Iowa, and Eagle Grove, Iowa:

From Des Moines over U. S. Highway 69 to junction Iowa Highway 175, thence over Iowa Highway 175 to junction Iowa Highway 60, thence over Iowa Highway 60 to Webster City, Iowa, thence over unnumbered highways to Woolstock, Iowa, thence over Iowa Highway 323 to junction Iowa Higliway 60, and thence over Iowa Highway 60 to Eagle Grove, and return over the same route.

From Des Moines over U. S. Highway 69 to junction U. S. Highway 20, thence over U. S. Highway 20 to Webster City, and thence to Eagle Grove as specified above, and return over the same route.

Service is authorized to and from the intermediate points of Stanhope and Woolstock, Iowa; and the off-route points of Stratford, Kamrar, and Vincent, Iowa.

[fol. 2589] Between Des Moines, Iowa, and Denison, Iowa:

From Des Moines over U. S. Highway 69 to Ames, Iowa thence over U. S. Highway 30 to Denison, and return over the same route.

Service is authorized to and from the intermediate points of Ankeny, Huxley, Ames, Ericson, Jordon, Boone, Ogden, Beaver, Grand Junction; Jefferson, Scranton, Ralston, Glidden, Carroll, West Side, and Vail, Iowa, and the off-route point of Arcadia, Iowa.

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading.

Between Coon Rapids, Iowa, and Omaha, Nebr., as follows:

From Coon Rapids over Iowa Highway 141 to junction U. S. Highway 71, thence over U. S. Highway 71 to Hamlin, Iowa, thence over Iowa Highway 64 to Council Bluffs, Iowa, and thence across the Missouri River to Omaha.

From Coon Rapids over unnumbered highways to junction U. S. Highway 30, thence over U. S. Highway 30 to Missouri Valley, Iowa, and thence over Alternate U. S. Highway 30 to Omaha.

Return over these routes to Coon Rapids.

Service is authorized to and from intermediate and off-route points in Greene, Carroll, Audubon, and Guthrie Counties, Iowa, not including the points of Jefferson, Guthrie Center, Manning, Lanesboro, and Panora.

General commodities, except those of unusual value, and except livestock, dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading,

Between Des Moines, Iowa, and Clarion, Iowa, and St. Paul, and Minneapolis, Minn., as follows:

From Des Moines over U. S. Highway 69 to junction Iowa Highway 3, thence over Iowa Highway 3 to Clarion.

From Des Moines over U. S. Highway 69 to Garner, Iowa, thence over U. S. Highway 18 to Mason City, Iowa, thence over U. S. Highway 65 to Owatonna, Minn., thence over Minnesota Highway 218 via Rosemount, Minn., to St. Paul.

From Des Moines to Rosemount, Minn., as specified above, thence over Minnesota Highway 218

to junction Minnesota Highway 55, and thence over Minnesota Highway 55 to Minneapolis.

Return over the above-specified routes to Des Moines.

[fol. 2590] Service is authorized to and from the intermediate points of Ankeny, Huxley, Ames, Jewell, Blairsburg, Belmont, Goodell, Garner, Ventura, Clear Lake, Mason City, Manley, Kensett, and Northwood, Iowa, and Gordonsville, Glenville, Albert Lea, Clarks Grove, Geneva, Steele Center, Owatonna, Medford, Faribault, Dundas, Northfield, Farmington, and Rosemount, Minn.; the off-route points of Story City, Galt, and Klemme, Iowa, and Austin and Scotchlite, Minn.; and intermediate and off-route points in the Minneapolis-St. Paul Minn. Commercial Zone, as defined by the Commission.

Between Des Moines, Iowa and Mason City, Iowa, as an alternate route for operating convenience only:

From Des Moines over U. S. Highway 65 to Mason City, and return over the same route.

Service is not authorized to or from intermediate points.

IRREGULAR ROUTES:

Seed corn, during the season extending from the 15th day of February to the 15th day of April, inclusive,

Between Coon Rapids, Iowa, on the one hand, and, on the other, points in Nebraska, and those in that part of Missouri north of the Missouri River.

The authority herein granted, to the extent it duplicates any heretofore granted said carrier, shall not be construed as conferring more than one operating right.

AND IT IS FURTHER ORDERED, and is made a condition of this certificate that the holder thereof shall render reason-

ably continuous and adequate service to the public in pursuance of the authority herein granted, and that failure so to do shall constitute sufficient grounds for suspension, change, or revocation of this certificate.

By the Commission, division 5.

W. P. Bartel,
Secretary

(SEAL)

---

* This certificate embraces that portion of the operating rights in Certificate No. MC 107496 and all of the operating rights in Certificate No. MC 107496 Sub 13, purchased by the above-named carrier pursuant to MC-F 4744, and assigned No. MC 53980 Sub 9.

[fol. 2604] EXHIBIT No. 50

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

NO. MC 111154*

G. H. WOLTER,
DOING BUSINESS AS P. & W. TRUCK LINE,
ALBIA, IOWA

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 5, held at its office in Washington, D. C., on the 25th day of November, A. D., 1949.

AFTER DUE INVESTIGATION, It appearing that the above-named carrier has complied with all applicable provisions of the Interstate Commerce Act; and the requirements, rules, and regulations prescribed thereunder, and, therefore, is entitled to receive authority from this Commission to engage in transportation in interstate or foreign commerce as a motor carrier; and the Commission so finding;

IT IS ORDERED, That the said carrier be, and it is hereby, granted this Certificate of Public Convenience and Necessity as evidence of the authority of the holder to engage in transportation in interstate or foreign commerce as a common carrier by motor vehicle; subject, however, to such terms, conditions, and limitations as are now, or may hereafter be, attached to the exercise of the privileges herein granted to the said carrier.

IT IS FURTHER ORDERED, That the transportation service to be performed by the said carrier in interstate or foreign commerce shall be as specified below:

REGULAR ROUTES:

General commodities, except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M. C. C. 467, commodities in bulk commodities requiring special equipment, and those injurious or contaminating to other lading.

Between Quincy, Ill., and Shelbyville, Mo.:

From Quincy over U. S. Highway 24 to junction Missouri Highway 6, thence over Missouri Highway 6 to Edina, Mo., and thence over Missouri Highway 15 to Shelbyville, and return over the same route.

Service is authorized to and from all intermediate points; and the off-route points of Maywood, Monticello and Leonard, Mo.

Such merchandise as is dealt in by wholesale grocery business houses, in truckload lots,

From Quincy, Ill., to Moberly, Mo., as follows:

From Quincy over U. S. Highway 24 to Moberly.

From Quincy over U. S. Highway 24 to junction U. S. Highway 61, thence over U. S. Highway 61 to Hannibal, Mo., thence over U. S. Highway 36
[fol. 2605] to Monroe City, Mo., and thence over U. S. Highway 24 to Moberly.

Return, with no transportation for compensation, over these routes to Quincy.

Service is authorized to and from the intermediate point of Hannibal, Mo.

Livestock,

From Grand Island, Nebr., to Omaha, Nebr.:

From Grand Island over U. S. Highway 30 to junction U. S. Highway 275, thence over U. S. Highway 275 to Omaha.

Return, with no transportation for compensation, over the same route to Omaha.

Service is not authorized to or from intermediate points.

From Chariton, Iowa, to St. Louis, Mo.:

From Chariton over U. S. Highway 34 to Mount Pleasant, Iowa, thence over U. S. Highway 218

to junction U. S. Highway 61, thence over U. S. Highway 61 to Keokuk, Iowa, thence across the Mississippi River to junction Illinois Highway 10, thence over Illinois Highway 10 to junction U. S. Highway 67, and thence over U. S. Highway 67 to St. Louis.

Return, with no transportation for compensation, over the same route to Chariton.

Service is not authorized to or from intermediate points.

Between Chariton, Iowa, and Kansas City, Mo.:

From Chariton over U. S. Highway 34 to junction U. S. Highway 71, thence over U. S. Highway 71 to Kansas City, and return over the same route.

Service is authorized to and from the intermediate point of Kansas City, Kans.; and the off-route point of St. Joseph, Mo.

Between Bloomfield, Iowa, and Chicago, Peoria, and East St. Louis, Ill., as follows:

From Bloomfield over U. S. Highway 63 to Ottumwa, Iowa, thence over U. S. Highway 34 to Chicago.

From Bloomfield over Iowa Highway 2 to junction U. S. Highway 61, thence over U. S. Highway 61 to Burlington, Iowa, thence over U. S. Highway 34 to junction Illinois Highway 116, and thence over Illinois Highway 116 to Peoria.

From Bloomfield over Iowa Highway 2 to junction U. S. Highway 61, thence over U. S. Highway 61 to Fort Madison, Iowa, thence across the Mississippi River to Niota, Ill., thence over
[fol. 2606] Illinois Highway 9 to junction U. S. Highway 67, and thence over U. S. Highway 67 to East St. Louis.

Return over these routes to Bloomfield.

Service is authorized to and from intermediate and off-route points within 15 miles of Bloomfield.

Binder twine.

From Peoria, Ill., to Chariton, Iowa:

From Peoria over Illinois Highway 116 to junction U. S. Highway 34, thence over U. S. Highway 34 to Chariton.

Return, with no transportation for compensation, over the same route to Peoria.

Service is not authorized to or from intermediate points.

Livestock and *feed,*

Between Chariton, Iowa, and Omaha, Nebr.:

From Chariton over U. S. Highway 34 to Glenwood, Iowa, thence over U. S. Highway 275 to Omaha, and return over the same route.

Service is not authorized to or from intermediate points.

Between Chariton, Iowa, and Chicago, Ill., as follows:

Livestock and *wool,*

From Chariton over U. S. Highway 34 to Mount Pleasant, Iowa, thence over U. S. Highway 218 to junction Iowa Highway 92, thence over Iowa Highway 92 to junction U. S. Highway 61, thence over U. S. Highway 61 to Davenport, Iowa, thence over Illinois Highway 92 via Silvis, Ill., to junction U. S. Highway 34, thence over U. S. Highway 34 to Oswego, Ill., thence over Illinois Highway 31 to Aurora, Ill., thence over Illinois Highway 65 to junction U. S. Highway 34, and thence over U. S. Highway 34 to Chicago.

Service is authorized from intermediate and off-route points within 30 miles of Chariton, restricted to pick-up only.

Agricultural machinery and *feed*,

From Chicago over the above-specified route to Chariton.

Service is authorized to the intermediate and off-route points within 30 miles of Chariton, restricted to delivery only; and from the off-route point of Moline, Ill., restricted to pick-up of agricultural machinery.

[fol. 2607] IRREGULAR ROUTES:

Emigrant movables,

Between points and places in that part of Iowa on and south of Iowa Highway 150 from Davenport to Cedar Rapids, on and south of Iowa Highway 64 from Cedar Rapids to the western boundary of Dallas County, and east of the western boundaries of Dallas, Madison, Union and Ringgold Counties, Iowa, on the one hand, and, on the other, points and places in Nebraska, Kansas, Missouri, Illinois, Wisconsin, Minnesota and South Dakota, traversing North Dakota for operating convenience only.

Machinery and farm equipment and *parts* thereof,

From Milwaukee, Wis., and Canton, Chicago, East Moline, Rock Falls, Rock Island and Sandwich, Ill., to points and places in that part of Iowa described above.

Binder twine,

From Chicago, Ill., to points and places in that part of Iowa described above.

Livestock,

Between points and places in that part of Iowa described above, on the one hand, and, on the other, Omaha, Nebr., points and places in that part of Missouri on and south of U. S. Highway

50, and points and places in Illinois, Indiana, Michigan and Wisconsin.

From Albia, Iowa, and points and places within 25 miles thereof, to Chicago, Peoria, and Galesburg, Ill.

From Ames, Colfax, Grinnell, Centerville, Corydon, Des Moines and Oskaloosa, Iowa, and points and places within 25 miles of Oskaloosa, to Omaha, Nebr., and Chicago, Galesburg and Peoria, Ill.

From Chariton, Iowa, and points and places in Iowa within 150 miles of Chariton, to points and places in Missouri.

Livestock and *agricultural commodities,*

Between Eddyville, Iowa, points and places in Monroe and Appanoose Counties, Iowa, those in that part of Mahaska County, Iowa, south and west of the Des Moines River, and those in that part of Wapello County, Iowa, on the west of a line beginning at the Wapello-Davis County line and extending along U. S. Highway 63 to Ottumwa, thence along Iowa Highway 15 to Eddyville, except Ottumwa, on the one hand, and, on the other, Chicago, Galesburg, Peoria and National Stock Yards, Ill., and Kansas City and St. Joseph, Mo.

Horses,

From Albia, Iowa, to Knox City, Mo.

[fol. 2608] *Feederstock,*

From Chicago, Ill., to Oskaloosa, Iowa, and points and places within 25 miles of Oskaloosa.

Hides and *rendering plant products,*

From Albia, Iowa, to points and places in the CHICAGO, ILL., COMMERCIAL ZONE, as defined by the Commission in 1 M.C.C. 673.

Chicken and pig brooders, poultry nests, poultry and livestock feeders, water tanks, tank heaters, and *agricultural and poultry hand utensils,*

From Albia, Iowa, to points and places in Missouri, Illinois, Indiana, Wisconsin, Minnesota, South Dakota, Nebraska, Kansas, Colorado and Oklahoma.

Seed,

From Chicago and Quincy, Ill., to Keosauqua, Bloomfield, Chariton and Corydon, Iowa, and points and places in Monroe and Appanoose Counties, Iowa.

Feed and *seed,*

From Chicago, Ill., and Kansas City, Mo., to Eddyville, Iowa, points and places in Monroe and Appanoose Counties, Iowa, and those in the portions of Mahaska and Wapello Counties, Iowa, specified above.

Feed,

From Chicago and Peoria, Ill., and Kansas City and St. Joseph, Mo., to Albia, Iowa, and points and places within 25 miles of Albia.

Soy beans,

From Albia, Iowa, to St. Joseph, Mo.

Farm implements,

From Chicago, Peoria and Rock Island, Ill., to Albia, Corydon, Centerville, Moravia and Chariton, Iowa.

Twine and *farm supplies,*

From Chicago, Ill., and St. Louis, Mo., to points and places in Monroe and Appanoose Counties, Iowa.

Coal,

From points and places in Peoria, Tazewell, Knox and Rock Island Counties, Ill., to Albia, Iowa.

Hardware and *agricultural machinery and parts thereof,*

From Chicago, Rock Island, Moline, East Moline, Silvis and Canton, Ill., St. Paul and Minneapolis, Minn., Kansas City and St. Louis, Mo., and Kansas City, Kans., to Eddyville, Iowa, points and places [fol. 2609] in Monroe, Lucas and Appanoose Counties, Iowa, and those in that part of Wapello County, Iowa, specified above.

Petroleum products, in containers,

From Chicago, Rock Island, Moline and Keithsburg, Ill., to Oskaloosa, Iowa.

Bakery supplies and equipment,

From Chicago and Moline, Ill., to Oskaloosa, Iowa.

Peaches,

From Koshkonong, Mo., and points and places within ten miles thereof, to Albia, Iowa, and points and places within 25 miles of Albia.

Watermelons,

From Monmouth, Ill., and points and places within ten miles thereof, and those in Missouri on and south of U. S. Highway 50 to Albia, Iowa, and points and places within 25 miles of Albia.

Malt beverages,

From Minneapolis, Minn., to Albia, Iowa.

From Chicago and Peoria, Ill., to Albia, Chariton and Oskaloosa, Iowa.

Empty malt beverage containers,

From Albia, Chariton and Oskaloosa, Iowa, to Chicago and Peoria, Ill.

From Albia, Iowa, to Minneapolis, Minn.

Fencing,

From Fort Madison, Iowa, to points and places in Illinois and Nebraska.

Iron and steel products,

From points and places in the CHICAGO, ILL., COMMERCIAL ZONE, supra, to Omaha, Nebr., and points and places in that part of southeastern Iowa on or enclosed by U. S. Highway 6 from the Iowa-Illinois State line to junction U. S. Highway 169, and thence over U. S. Highway 169 to the Iowa-Missouri State line.

Castings and *valve parts,*

From Chicago, Ill., to Oskaloosa, Iowa.

Materials and supplies used in the manufacture of batteries and ignition systems.

From points and places in the CHICAGO, ILL., COMMERCIAL ZONE, supra, to Corydon, Iowa.

[fol. 2610] *Junk,*

From Albia and Ottumwa, Iowa, to Chicago, Ill.

Washing machines and *parts* therefor, and *materials* used in the manufacture thereof,

From Fairfield, Iowa, to Alliance, Galion and Warren, Ohio.

Washing machine parts and *materials* used in the manufacture of washing machines and *parts* therefor,

From Alliance, Galion and Warren, Ohio, to Fairfield, Iowa.

Furniture,

From Chicago, Ill., to Ottumwa, Iowa.

New and old furniture, and *commodities* such as are dealt in by retail furniture stores,

From Chicago, Ill., to Albia, Iowa.

Return, with no transportation for compensation except as otherwise authorized, to the above-specified origin points.

Household goods as defined in *Practices of Motor Common Carriers of Household Goods,* 17 M.C.C. 467,

Between points and places in Monroe County, Iowa, on the one hand, and, on the other, points and places in Nebraska, Michigan and Minnesota.

Between points and places in Monroe County, Iowa, on the one hand, and, on the other, points and places in Wisconsin, Illinois, Missouri and Kansas.

Between Albia, Iowa, and points and places within 25 miles thereof, on the one hand, and, on the other, points and places in Illinois, Iowa, and Missouri.

Any repetition in the statement of the authority granted herein shall not be construed as conferring more than a single operating right.

IT IS FURTHER ORDERED, and is made a condition of this certificate that the holder thereof shall render reasonably continuous and adequate service to the public in pursuance of the authority herein granted, and that failure so to do shall constitute sufficient grounds for suspension, change, or revocation of this certificate.

[fol. 2611] And It Is Further Ordered, That this certificate shall supersede the certificates issued to the respective predecessors-in-interest under Docket Nos. MC–72576 on June 13, 1947, MC 72576 Sub 1 on July 24, 1942, MC 72576 Sub 4 on November 6, 1947, MC 72576 Sub 5 on November 6, 1947, MC 72576 Sub 6 on December 7, 1948, MC 10354 on May 20, 1941, and MC 19135 on January 29, 1941, in their entirety, and that issued to the predecessor-in-interest under Docket No. MC 63542 on July 11, 1942, with respect to the operating rights authorized herein; and said certificates are hereby canceled to that extent.

By the Commission, division 5.

W. P. Bartel,
Secretary

(Seal)

---

* This certificate embraces (1) the operating rights in Certificates Nos. MC 72576, MC 72576 Sub 1, MC 72576 Sub 4, MC 72576 Sub 5 and MC 72576 Sub 6, acquired by the above-named carrier pursuant to MC-FC 50533 and assigned Docket Nos. MC 111154, MC 111154 Sub 1, MC 111154 Sub 2, MC 111154 Sub 3, and MC 111154 Sub 4, Respectively, (2) a portion of the operating rights in Certificate No. MC 63542, which certificate was transferred in its entirety pursuant to MC-FC 23748, and said portion thereof in turn acquired by the above-named carrier pursuant to successive transfers in MC-FC 25260 (assigned Docket No. MC 72576 Sub 8) and MC-FC 50533, assigned Docket No. MC 111154 Sub 5; (3) the operating rights in Certificate No. MC 10354, acquired by the above-named carrier pursuant to successive transfers in MC-FC 25474 (assigned Docket No. MC 72576 Sub 9) and MC-FC 50533, assigned Docket No. MC 111154 Sub 6; and (4) the operating rights in Certificate No. MC 19135, acquired by the above-named carrier pursuant to successive transfers in MC-FC 25327 (assigned Docket No. MC 72576 Sub 10) and MC-FC 50533, assigned Docket No. MC 111154 Sub 7.

FOR DETAILS OF INTRA-STATE SERVICE, RATES, SCHEDULES AND OTHER INFORMATION, PHONE THE NEAREST GATEWAY TERMINAL

GATEWAY CITY TRANSFER CO. INC.

2615

By Mr. Nolan:

Q. In what county in Iowa are those trucks and tractors licensed?

A. Pottawattamie.

Q. Then the other 28 tractors that you referred to, by whom are they owned?

A. They are leased operators.

Q. By various people? They are owned by various owners; is that right?

A. Yes.

[fol. 2623] Q. Do you have leases just for trips with those operators, or do you have extended term leases?

A. Trip-lease basis.

Q. They are operators whom you may contact when you want something hauled; is that right?

A. They are always available at this end for our use.

Q. Well, I am saying, you contact them just on a trip basis; is that correct?

A. That is right.

Exam. Carpenter: Known as owner-operators?

The Witness: They are owner-operators.

By Mr. Nolan:

Q. You use those 28 tractors only on a trip basis on call and emand by your company; isn't that correct?

A. Yes.

Q. How many trailers are owned and licensed in the name of the Iowa-Nebraska Transportation Company?

A. Just one minute, please. Twenty-five.

Q. And where are they licensed?

A. In the State of Iowa.

Q. And in Pottawattamie County?

A. Yes sir.

Q. Who owns the other 35 trailer units that you referred to that your company owned?

A. They are privately owned by owner-operators, and we lease them from them.

Q. On a trip basis?

A. Yes.

By Mr. Nolan:

Q. I notice under your certificate you have authority to operate between Marengo, Iowa, and Belle Plaine, Iowa, as follows:

"From Marengo over Iowa Highway 212 to Belle Plaine and return over the same route."

Now, state whether or not your company operates over that route regularly and daily?

Mr. Cohn: Objection, as being a route not involved within the issues in this proceeding.

Exam. Carpenter: It goes into Marengo, does it not?

Mr. Nolan: Yes, sir.

Exam. Carpenter: Objection overruled.

The Witness: We operate into Marengo every day.

Mr. Nolan: I move to strike the answer as not responsive to the question.

Exam. Carpenter: The answer may be stricken.

The Witness: What is the question, please?

Exam. Carpenter: Read the question, please.

(Question read.)

[fol. 2631] The Witness: Our peddle truck from Des Moines peddles shipments when it leaves Des Moines in the morning, for the East, peddles shipments to Marengo and Belle Plaine if we have them.

By Mr. Nolan:

Q. Does it traverse the route I just described, regularly and daily?

A. Yes, it travels this route daily, and delivers the shipments we have.

Q. And state whether or not service is performed to and from Marengo by the use of the three highways which I have described, namely over U. S. Highway No. 30, over U. S. Highway 6, and over the combination of U. S. Highway 34, U. S. Highway 218, and U. S. Highway 6, from and between Omaha and Chicago?

A. I don't believe would be practical to travel Highway

BEFORE THE INTERSTATE COMMERCE COMMISSION

Docket #MC-29130 (Sub. 69)

IN THE MATTER OF THE APPLICATION OF THE ROCK ISLAND MOTOR TRANSIT COMPANY—DES MOINES, IOWA
Motor Carrier of Freight-Extension

Late filed Exhibits Nos. —— to ——

Transcript of Testimony

of

CARL REED, Chairman of Iowa State Commerce Commission

E. S. PETERSEN, President of Iowa-Nebraska Transportation Company

BIRNEY BAKER, President of Des Moines Transportation Company

FRED MILLETT, Assistant Traffic Agent, Rock Island Motor Transit Company

from hearing on Docket MC-29130 (Sub. 69) T. A.

A. B. HOWLAND, 501 Bankers Trust Building, Des Moines, Iowa, Attorney for Applicant.

[fol. 2617] CARL REED, Chairman—Iowa State Commerce Commission (R. 1098-1101) testified:

By Mr. Nolan:

Q. Will you state your name, place of residence, and occupation, please?

A. My name is Carl W. Reed. I am temporarily residing in Des Moines. I am a member of the Iowa State Commerce Commission. My permanent home is at Cresco, in this state.

[fol. 2624] Q. And by various and sundry truck-owner-operators?

A. Yes.

Q. So then in reality, your company owns and has licensed in its own name, eight pickup trucks, 22 tractors and 25 trailers?

A. That is true, to the best of my knowledge, without my records and books here.

Q. Could you furnish us a certified list of your registration on those trucks owned by your company? Would you be willing to do that?

A. Well, I would be willing to do it. I don't see any sense to it. They are on the records in Pottawattamie County, and you can go and get them.

(R. 1224)

Q. Under the designated authority of your company's certificate, MC-47619, I notice that you have the following specified route authority, under the caption, "Between Chicago, Illinois, Omaha, Nebraska," as follows:

"From Chicago over alternate U. S. Highway 30 to junction U. S. Highway 30, thence over U. S. Highway 30 to Denison, Iowa, thence over Iowa Highway 141 to Sioux City, Iowa, and thence over U. S. Highway 75 to Omaha (also from Denison over U. S. Highway 30 to Missouri Valley, Iowa, thence over U. S. Highway 75 to Omaha)."

Now, Mr. Petersen, is it claimed by you as the chief executive of your company that you render a regular daily motor carrier service to all points upon the route which I have just described?

[fol. 2625] A. Our service is offered to all those points.

(R. 1227)

By Mr. Nolan:

Q. Now, Mr. Petersen, referring to your company's certificate, I notice there is a route described as follows, under the caption "Between Chicago, Illinois, and Omaha, Nebraska": "From Chicago over U. S. Highway 34 to junction Illinois Highway 92, thence over Illinois Highway 92 to junction Illinois Highway 82, thence over Illinois Highway 82 to Geneseo, Illinois (also from Chicago over U. S. High-

30 and 34 to run shipments to Marengo and Belle Plaine. They are all handled from our Des Moines terminal.

Q. Do you use those routes in performing service to and from Marengo, regularly and daily?

A. I wouldn't think so.

Q. Well, do you or don't you? Answer my question.

Exam. Carpenter: Do you know? If you don't know, say you don't know.

The Witness: I don't know.

By Mr. Nolan:

Q. I notice in your certificate that the following route is described between Marshalltown and Des Moines, Iowa:

"From Marshalltown over Iowa Highway 330 to junction Iowa Highway 64, then over Iowa Highway 64 to Des Moines and return over the same route."

[fol. 2632] State whether or not your company operates a regular daily service over that route.

Mr. Cohn: Objection, as not being a route involved in this application.

Exam. Carpenter: You may have a continuing objection to those particular types of questions, Mr. Cohn. The objection is overruled. Go ahead.

The Witness: Do you want me to answer that?

Exam. Carpenter: Yes, sir?

The Witness: We operate a peddle truck from Des Moines every day, out over 64 to Marshalltown.

By Mr. Nolan:

Q. Then where to?

A. On up to Highway 30.

Q. And return over the same route?

A. Yes.

Q. State whether or not you use in transporting freight to and from Marshalltown, to and from Omaha, Nebraska, and to and from Chicago, Illinois, by the use of the Highway which I have just described.

A. Yes.

Q. You are now the chairman of the Iowa State Commerce Commission, are you not?

A. I am this year, yes, sir.

Q. That is a rotating office among the members of the Commission, is that right?

A. That is right.

Q. How long have you been a member of the Iowa Commerce Commission, Judge?

A. Since the second day of January, 1941.

Q. And you have been a practicing lawyer and also a judge of the District Court here in Iowa, have you not?

A. That is correct.

Q. And a member of the State legislature years ago?

A. Back in the early twenties.

Q. Now, Judge, the general duties of the Iowa Commerce Commission, is dealing with the shipping problems of the people of Iowa, is that correct?

A. Yes.

Q. The Iowa State Commerce Commission is the statutory body created by the legislature to look after the ship-
[fol. 2618] ping interests and needs of the people of the State of Iowa, is that correct?

A. That is right.

Q. Now, the Iowa State Commerce Commission has intervened in support of the instant application, and would you state the position of the Commission in this proceeding, Judge?

A. The Commission is primarily interested in these matters in seeing that service is furnished to the various communities. We are interested in this particular case because of the service that is needed in the communities along the route covered by the Rock Island Motor Transit application.

That truckline has been furnishing service to these communities under authority of the Commission, and also some interstate authority, for several years, since before I came on the Commission.

Many of these towns have no other truck service whatever, except that furnished by the Rock Island Motor Transit. Some of them have no rail service, either, and it is because of the needs of the community for the kind of

way 34 to junction U. S. Highway 6, thence over U. S. Highway 6 to Geneseo) thence over U. S. Highway 6 via Iowa City, Iowa, to Atlantic, Iowa, thence over Iowa Highway 63 to Avoca, Iowa, thence over Iowa Highway 64 to Council Bluffs, Iowa, thence over the Missouri River"——

Exam. Carpenter: That is "thence across."

By Mr. Nolan:

Q. —"thence across the Missouri River to Omaha (also from Atlantic over U. S. Highway 6 to Omaha)."

Now, that is the route that you claim that you operate daily; is that right?

A. Yes.

Q. And you give peddler service in both directions over that route?

A. Yes.

(R. 1235)

Q. Do you operate into Cedar Rapids daily?

A. Yes, from Chicago, and also from Omaha.

Q. Over what route?

A. From Chicago, over our regular route, to Cedar Rapids.

[fol. 2626] Q. That isn't what I asked you. Over what route do you operate from Chicago to Cedar Rapids and from Omaha to Cedar Rapids, which you claim to be a daily operation?

A. We operate over our regular routes, is the only thing I can tell you.

Q. Well, what——

Exam. Carpenter: Do you mean all three of the routes that have been mentioned by Mr. Nolan? That is, you have a route authority north of Highway 6, and one south of Highway 6, have you not?

The Witness: What is your question again?

Exam. Carpenter: Read the question.

(Question read.)

The Witness: The answer is yes.

Q. State whether or not you use the highway which I have just described between Marshalltown, Iowa, and Des Moines, Iowa, in transporting freight from Chicago, Illinois and points in Illinois, to Des Moines, Iowa?

A. Yes.

Q. Is that a regular daily scheduled operation?

A. When the traffic warrants.

[fol. 2633] Q. Well, is it operated regularly and daily?

A. That I couldn't answer.

Q. What would you say would be the frequency of that operation?

A. I wouldn't know without my records.

Q. What is your best judgment on it?

A. I wouldn't want to make a guess.

Q. State whether or not you would use the highway which I just described between Marshalltown, Iowa, and Des Moines, Iowa, in the transporting of freight between Marshalltown, to and from Omaha, Nebraska?

Mr. Cohn: Objection, as not being involved in this application. The service between Marshalltown and Omaha, Nebraska, is not involved in this application.

Exam. Carpenter: I take it you said to Des Moines?

Mr. Nolan: Through Des Moines.

Exam. Carpenter: Over Highway 6?

Mr. Nolan: That is right.

Exam. Carpenter: Objection overruled.

The Witness: The operation over this Highway 64 is from our Des Moines terminal on our peddle truck. It goes up there every day.

By Mr. Nolan:

Q. So then there is a regular scheduled daily operation between Marshalltown, Iowa, and Omaha, Nebraska, by the use of the Highway which I have just described between Des Moines and Marshalltown, is that right?

A. We have a regularly scheduled operation from Omaha into Des Moines and that freight is broken at Des Moines [fol. 2634] and put on this peddle truck that leaves Des Moines that goes to Marshalltown the next day.

By Mr. Nolan:

Q. Well now, Mr. Petersen, do you operate over U. S. Highway No. 30 between Chicago and Cedar Rapids, in a daily operation?

A. Yes.

Q. Do you operate over U. S. Highway 30 between Omaha and Cedar Rapids daily?

A. Yes.

Q. And that is a daily scheduled operation, is it not?

A. Yes.

Q. And actually operated by your company daily, except Sundays and holidays?

A. Yes, except Saturdays.

Q. And you give a local service between Chicago and Cedar Rapids?

[fol. 2627] A. Yes.

Q. Between Cedar Rapids and Omaha?

A. Yes.

Q. For traffic moving in both directions between Chicago and Cedar Rapids, and Cedar Rapids and Omaha?

A. Yes.

Q. Do you serve intermediate points between Chicago and Cedar Rapids and Cedar Rapids and Omaha in both directions on this daily scheduled operation?

A. When the shipments are offered to us.

Q. All right. Now, do you serve Cedar Rapids through the use of U. S. Highway No. 6 on a daily basis from Chicago and from Omaha?

A. Yes.

Q. And is that a service in both directions?

A. Yes.

Q. And does that include service to intermediate points in connection with the use of Highway No. 6 between Chicago and Cedar Rapids, and Cedar Rapids and Omaha?

A. Yes.

Q. Do you serve Cedar Rapids by the use of U. S. Highway No. 34 and 218, and the other highways connected with your operations on U. S. Highway No. 34?

A. What was that question again, please?

Exam. Carpenter: Read the question, please.

(Question read.)

Q. State whether or not the highway which I have described in your certificate between Marshalltown, Iowa and Des Moines, Iowa is used by your company in its operations between Des Moines, Iowa and Chicago, Illinois?

A. I answered that question once. We do use it.

Q. And is that on a through schedule operation?

A. Occasionally.

Q. In other words, do you use that highway which I have described between Des Moines, Iowa and Marshalltown, Iowa, in routing a truck from Des Moines, Iowa to Chicago, Illinois?

A. Yes.

Q. And in a return movement?

A. Yes.

Q. And how frequently would you say that operation would be conducted?

A. I would not want to make a guess.

Q. Now I notee that you have in your certificate a route between Avoca, Iowa and Des Moines, Iowa, as follows:

"From Avoca over Highway 64 to Des Moines and return over the same route."

State whether or not that highway is used regularly.

A. It is

Q. And daily?

A. Yes, I would say practically daily.

Q. And is a service provided to the intermediate points on that route?

[fol. 2635] A. Yes.

Q. On a daily scheduled basis?

A. Yes.

Q. State whether or not the highway which I have just described between Avoca, Iowa, and Des Moines, Iowa is used for the transportation of shipments with your company's equipment between Chicago, Illinois and Avoca, Iowa?

A. It is.

Q. And to and from the intermediate points from Chicago, Illinois to and from the intermediate points between Avoca, Iowa, and Des Moines, Iowa?

A. It is.

service that the Rock Island has been furnishing, and only the Rock Island Motor Transit has been furnishing that we are interested in and supporting this application.

Q. If there is some other carrier that would give comparable service, or was giving comparable service to the Rock Island Motor Transit Company, would your position be different than it is, if there was some other carrier or carriers doing that service?

A. Well, it would be different to this extent. That if some community was getting satisfactory service we would [fol. 2619] not want to disturb that service.

Q. State whether or not in your opinion, if the Rock Island Motor Transit Company's operations were curtailed to the point—I mean if their traffic were curtailed to the point where their operations would have to be lessened or the quality of service diminished, state whether or not, in your opinion, that would create an emergency situation to many of these points presently served by the Rock Island Motor Transit Company.

A. It is my belief that it would. Many of those communities would be able to get no service whatever.

Q. What is the fact as to whether or not the demands of the various communities of the State of Iowa are made known to your commission in regard to the service or lack of service currently?

A. Yes, we have had information along this line from both shippers and commercial clubs in some of the towns.

Q. I mean as a general proposition, where there is a necessity for service, that comes to your attention, does it not, throughout the State, where there is poor service, or where there is no service? Does that come to your attention, other than through the carriers?

A. Oh, yes, yes, It does.

Mr. Nolan: I believe that is all.

Exam. Carpenter: Cross examine, Mr. Cohn?

Mr. Cohn: I don't believe I have any questions.

Mr. Huston: No questions.

Mr. Rice: No questions.

Q. And is that a daily scheduled operation?

A. Yes.

Q. Now, as I understand your testimony, you have a daily scheduled peddle operation between Omaha, and Des Moines, over U. S. Highway No. 6, is that correct?

A. Well, I will qualify that answer. The truck comes to Avoca on Highway 64 and leaves Avoca and Highway 83, and traverses U. S. 6 from Atlantic on to Des Moines.

Q. Is that a daily scheduled operation?

A. Yes, except Saturday.

Q. Does that operation operate in the reverse direction daily?

A. Yes

Q. Service to and from all intermediate points?

A. Yes.

Q. And how many units, how many vehicles are used in [fol. 2636] that operation?

A. One.

Q. You mean that a truck leaves Omaha, peddles that entire route to Des Moines and back again, in the same day?

A. The truck leaves Avoca, and travels to Des Moines, and back to Avoca.

Q. Peddling all the intermediate points that day?

A. Yes.

Q. Then you use another truck from Omaha to Avoca, and return to Omaha, the same day?

A. Yes.

Q. That would be two trucks then used in that operation?

A. Yes, that is right.

Q. Now, do you have any through operations from Omaha to Des Moines, daily?

A. Only the ones spoken of before.

Q. Just the peddle truck?

A. Yes.

Q. You have no overhead operations between Omaha and Des Moines?

A. Only when the traffic warrants.

Q. How frequently would that be?

A. I wouldn't want to—I wouldn't be able to answer that.

The Witness: Do you mean, do we run a truck from Council Bluffs down around 34, up to Cedar Rapids?

[fol. 2628] By Mr. Nolan:

Q. I am asking you if you perform a service in and out of Cedar Rapids in connection with your use of U. S. Highway No. 34, and the other connecting routes in your service from Cedar Rapids to Chicago, and Cedar Rapids to Omaha, irrespective of the physical operation of any particular piece of equipment.

Exam. Carpenter: Go ahead and answer the question if you can.

The Witness: Let me have the question again.

Exam. Carpenter: Read the question.

(Question read.)

Mr. Cohn: Do you understand the question, Mr. Petersen?

The Witness: No, I don't believe I do.

By Mr. Nolan:

Q. Well now, Mr. Petersen, you stated that you operated in and out of Cedar Rapids for the handling of interstate traffic, both from Omaha to Cedar Rapids, and from Chicago to Cedar Rapids, and vice versa, and that you used your routes authorized by the Interstate Commerce Commission in the performance of that service, did you not?

A. Yes, but we would use the shortest route.

Mr. Nolan: I move to strike that answer, "use the shortest routes," as not being responsive.

Mr. Cohn: I think it is responsive.

Exam. Carpenter: The portion of the answer referring to the shortest route is stricken.

By Mr. Nolan:

Q. Mr. Petersen, you told me just before lunch that your company is now serving and has been serving Cedar Rapids, Iowa, to and from Chicago and to and from Omaha on the

[fol. 2620] E. S. PETERSEN, Pres. of Iowa-Nebraska Transportation Company, Inc., Avoca, Iowa (R. 1215 to 1293 inc.) testified:

Q. Now, you testified that you had ten delivery trucks, fifty tractors, and approximately sixty trailers?

A. Yes.

Q. Are those all company-owned units?

A. They are not.

Q. How many company-owned units, licensed in the name of Iowa-Nebraska Transportation Company, does your company have, and can you furnish us a certified list of those vehicles, showing the place where they are registered?

A. The Iowa-Nebraska Corporation owns eight pickup and delivery trucks.

Q. And are those licensed——

Exam. Carpenter: Wait a minute. I don't think that is a complete answer to your question.

By Mr. Nolan:

Q. Let's break it up as we go along. Are those eight pickup and delivery trucks licensed in the name of the Iowa-Nebraska Transportation Company?

A. They are.

Q. Where are they licensed?

A. Seven are licensed in the State of Iowa, and one in the State of Illinois.

Q. Where are those eight units used?

A. In the State of Iowa, and the City of Chicago.

Q. So the company owns eight pickup and delivery trucks?

[fol. 2621] A. Yes.

Q. Licensed in the name of Iowa-Nebraska Transportation Company; is that right?

A. That is right.

Q. How about these two other delivery trucks that you referred to, that you said the company used or had control over?

A. They are leased trucks in the City of Chicago.

Q. Who owns those trucks?

[fol. 2629] three routes, U. S. Highway 30, U. S. Highway 6 and the combination of U. S. Highway 218, U. S. Highway 34, and U. S. Highway 6.

Now, will you tell me whether or not your company has been and is presently performing a pick up and delivery service to all points intermediate between Cedar Rapids and Omaha via U. S. Highway 218 and U. S. Highway 34?

Mr. Cohn: To which objection is made, on the ground that the route involved is not in issue in this proceeding.

Exam. Carpenter: Only a portion of the route isn't, Mr. Cohn.

Mr. Cohn: I say intermediate points, to which reference was made, are not in issue in this proceeding.

Exam. Carpenter: Mr. Nolan, are you talking of intermediate points on 218, or on both 218 and 34?

Mr. Nolan: Both 218 and 34.

Exam. Carpenter: Objection overruled. Go ahead and answer the question.

The Witness: We are performing such operation when we have call for the service.

By Mr. Nolan:

Q. Well, how regular would you say that service is?

A. I couldn't state without my records.

Q. Well, what is your best judgment? Would it be twice a week?

A. I wouldn't want to make a guess at all.

Q. Would it be weekly?

Mr. Cohn: I submit——

[fol. 2630] Exam. Carpenter: The witness said he didn't want to make a guess, Mr. Nolan.

By Mr. Nolan:

Q. But you do hold yourself out and have performed service to the intermediate points I just referred to?

A. Yes.

Mr. Cohn: I object to it as being repetitious.

Exam. Carpenter: Objection sustained.

A. Well, I wouldn't know offhand.

Q. Well, now, you told your counsel that you had two pickups, two pickup trucks in Chicago. Now, do I understand you have three pickup trucks there, one company-owned, and two leased pickup trucks?

A. That is right.

Q. Then you made a mistake when you told your counsel you only had two pickup trucks there?

A. I did.

Q. Now, how many tractors are owned and licensed in the name of the Iowa-Nebraska Transportation Company?

A. Just one minute, please. 22 tractors.

Q. And where are they licensed?

A. They are all licensed in the State of Iowa.

Q. Are they used in the transportation of the different kinds of commodities which you have been engaged in handling the last several years?

A. Yes.

[fol. 2622] Q. In what county are they licensed in in the State of Iowa?

Mr. Cohn: I am going to object to this line of inquiry, as having no materiality with any of the issues in this proceeding, as to licensing of the equipment in the State of Iowa, or any other state. It does not tend to prove or disprove any of the issues in this proceeding.

Exam. Carpenter: What is the purpose of the line of questioning?

Mr. Nolan: To determine the fitness and qualification of this company to perform the service they claim they are able to perform.

Mr. Cohn: Where the equipment is licensed, I submit, has certainly no bearing on that question.

Mr. Nolan: It may have before I get through.

Exam. Carpenter: Well, I will overrule the objection, but do not continue that line of questioning too far.

Mr. Nolan: I won't. I will assure you, I want to get out of here as early as possible.

Q. Give us your best judgment on it—twice a week—three times a week?

A. I don't believe I can answer it. I don't have any records to show.

[fol. 2637] Exam. Carpenter: Proceed.

By Mr. Nolan:

Q. Now if I understand your operation, you have a peddler truck that operates daily from Des Moines to Marengo, Iowa, is that correct?

A. Yes.

Q. And then goes north to Belle Plaine?

A. If there are shipments on it for Belle Plaine.

Q. Well, does it or does it not go north to Belle Plaine, whether you have shipments or not to Belle Plaine.

A. That I could not answer.

Q. Then you have another peddler truck which you claim operates between Des Moines, Iowa and Marshalltown, Iowa, over the route that I have described here this afternoon?

A. Yes.

Q. And that is a peddler operation?

A. Yes.

Q. Do you have any overhead operations between Des Moines and the Tri-Cities daily?

A. We don't serve the Tri-Cities.

Q. You don't serve the Tri-Cities at all?

A. No.

Q. Mr. Petersen, you testified this morning you serve all intermediate points between and including Davenport and Omaha.

A. We serve Davenport.

Q. Well, isn't Davenport a part of the Tri-Cities?

A. I think so.

By Mr. Nolan:

Q. Do you have any overhead operations between Des [fol. 2638] Moines and Davenport, any truck operating between those two terminals daily?

A. Yes, on overhead truck that would be destined to Chicago, with a drop-off in Davenport.

Q. How many of such truck operations would you have going through Davenport, Iowa, daily?

A. Oh, possibly one, practically every day. I wouldn't say they are definitely every day.

Q. That is on a scheduled route operation, on U. S. Highway No. 6?

A. Yes.

Q. Do you have any scheduled and do you operate any trucks between Omaha, Nebraska and Chicago, Illinois, on a scheduled operation?

A. Yes.

Q. And that is on U. S. Highway No. 6, or may it be on 30, 6, or 34?

A. It would be either on Highway 6 or Highway 64, to Des Moines, and 6 from Des Moines on in.

Q. Is that a scheduled daily operation?

A. I wouldn't say it was daily.

Q. Well, what would be the frequency of such an operation?

A. Possibly four times a week.

Q. And do you operate more than one vehicle in such operation on any different or given days, in the operation between Omaha, and Chicago, Illinois.

A. Yes, there are two vehicles assigned to that run.

[fol. 2639] Q. How frequent would you say you operated two vehicles between Omaha and Chicago, Illinois, either over U. S. Highway No. 6 or by the use of Highway 64 and U. S. 6?

Mr. Cohn: The question was from Omaha, to Chicago, originally. Now it has become between. I assume you still mean from Omaha to Chicago?

Mr. Nolan: I think the question is plain.

Mr. Cohn: I don't think it is.

Exam. Carpenter: Read the question.

(Question read.)

Exam. Carpenter: There is no question as to from.

By Mr. Nolan:

Q. I will put it from Omaha.

Exam. Carpenter: The question is from Omaha to Chicago, I assume that.

By Mr. Nolan:

Q. Over either or both of those routes, how frequent would you operate two units?

A. They are scheduled runs for each one to make two trips a week.

Q. But you say that you have at least one scheduled operation between Omaha and Chicago at least four times a week, is that correct?

A. That is the same one I am talking about now, that uses these two trucks.

Q. Well, then do I understand your answer to be that you only operate twice a week with two vehicles on those occasions between Omaha and Chicago, is that correct?

[fol. 2640] A. No, it is not correct in this sense: That our local truck in Omaha, to Avoca, would have the Chicago freight and we would start the truck from Avoca to Chicago.

Q. Well, then your operation between Omaha and Chicago is two days a week with two vehicles, irrespective of where you may—what route or where you may operate to intermediate points on those operations, isn't that true?

A. I believe that would be correct.

Q. All right.

How about from Chicago to Omaha, and intermediate points? How frequently do you have scheduled operations out of Chicago, either by the use of U. S. 30, U. S. No. 6, or by a combination of U. S. No. 6 and Iowa 64, or by a combination of U. S. Highway No. 6, 218 and 34?

A. Well, we would have scheduled runs. We have the trucks leaving Chicago every night, according to how the traffic warrants.

Q. Well, how many do you operate between Chicago and Omaha, over the routes which I described?

A. It could possibly be three, or it could possibly be 10 some nights; I wouldn't know.

Q. And those are destined to Omaha, is that right, or do they serve all intermediate points on the routes which I have described?

A. Some of them may have straight loads, and some of them may have some drops.

Q. But those two to ten——

Mr. Cohn: Three to ten.

[fol. 2641] Exam. Carpenter: Three to ten.

By Mr. Nolan:

Q. Three to ten are regularly scheduled routes between Chicago and Omaha, or intermediate points in Iowa between Davenport and Omaha, is that right?

A. They are available; if the traffic warrants we send them out of Chicago.

Q. Are those your own trucks, or are those leased?

A. They could be both.

Q. How many of your own trucks do you operate, on the average, daily, out of Chicago into the Iowa territory, or through the Iowa territory to Omaha?

A. I couldn't answer that question.

Q. What is your best judgment on it?

A. I don't have any judgment on it.

Q. You told us about your scheduled operations here this morning, and you were very exact in the details of the matters you wanted to tell us about. Can't you tell us now how many trucks you have on the average between Chicago and Omaha, on any of these routes, which we have described here this afternoon?

A. As I said, we have three to ten.

Q. Now, I believe you testified this morning that the operations which you have described on direct examination between Omaha and Chicago, and Chicago and Omaha, along U. S. Highway No. 6 and to and from intermediate points, has been the same and has been conducted regularly to your personal knowledge since 1938?

[fol. 2642] A. The service has always been there to be had.

Q. That has been a regular service as you described here this afternoon, along U. S. Highway No. 6?

A. It has been that way according to the traffic that has been available.

Q. Well, it has been approximately the same frequency as you described here this afternoon, these operations which we have detailed between Omaha and Des Moines, Des Moines and Davenport, Omaha and Chicago, and between Des Moines and Chicago, is that correct?

A. I don't remember that far back.

Q. Well now, Mr. Petersen, you told us this morning that you have been with this company since 1938 and the operations are substantially the same today as they were then, and they have been continuous since that time, is that correct?

A. Well, I know this, that our operation has been about the same as far as the operation is concerned, and we handle all the traffic that has been offered to us in our operation.

Mr. Nolan: Well, I move to strike that answer as not being responsive to the question. Read the question to the witness.

Exam. Carpenter: Read the question.

(Question read)

Exam. Carpenter: The answer may be stricken.

Mr. Conn: Did you make that statement this morning?

The Witness: I don't remember.

By Mr. Nolan:

Q. Now, Mr. Petersen, as I understand your operations [fol. 2643] today, you have a scheduled operation between Des Moines and Omaha, operating in each direction on fixed routes. You have another operation between Des Moines and Marengo, up to Belle Plaine, on fixed routes, which are daily, You have at least two scheduled operations between Omaha and Chicago, Illinois, traversing fixed routes in Iowa. At least two trucks on each of those occasions. You have from three to ten trucks leaving Chicago for

Omaha and intermediate Iowa points on fixed routes on a daily basis. Is that a correct summary of those operations?

A. I would say so.

Q. And those operations are substantially the same now as they have been since 1938, is that correct?

A. Our operations are more extensive now than they were in 1938.

Mr. Nolan: I move to strike the answer as not being responsive to the question.

Mr. Cohn: I think the answer is responsive.

Exam. Carpenter: I think the answer is all right, Mr. Nolan.

By Mr. Nolan:

Q. All right. You opened the door there, now let's see how far we can drive in. You say your operations are more extensive than they were in 1938. You just tell me in each particular where in your operations are more extensive to date than they were in 1938. Give me each point served and the route traversed wherein your operations are more extensive to date than they were in 1938.

A. Well, over the operation of No. 6, in general, we have had more business offered to us, and which we have been handling.

Q. All right. Let me interrupt there a minute. How many [fol. 2644] more trucks are you running over U. S. Highway No. 6 today, on a regular scheduled basis than you did in 1938?

A. I don't believe I could answer that.

Q. Where else are your operations more extensive to date than they were in 1938?

A. We have more extensive peddle runs on Highway 30, but that is not involved in this application.

Q. Well, how much more extensive on 30 today than you had in 1938? Just tell me what the details of those peddle operations are on U. S. Highway 30 today?

Mr. Cohn: I am going to object to that question, as involving a route and points of service not involved in this application.

Exam. Carpenter: You may answer.

The Witness: I couldn't say without checking the records.

By Mr. Nolan:

Q. Well, you don't know, is that the answer? You personally don't know?

A. I personally don't know.

Q. All right. Where else are your operations more extensive to date than they were in 1938?

A. I don't know.

Q. You did conduct regular scheduled operations over the routes which we have described here between Omaha and Chicago and the intermediate points, did you not, in 1938?

A. We have continuously, whenever the traffic was tendered to us.

Q. Well, those were regular scheduled operations, were they not?

A. Most of the time.

[fol. 2645] Q. And you had this three to ten units coming out of Chicago, scheduled to Omaha, or intermediate points in Iowa, since 1938?

A. I would say most of the time.

Q. How many miles is it across the State of Iowa from Davenport to Council Bluffs?

A. 318 miles, I believe.

Q. And that is by the use of U. S. Highway No. 6?

A. Yes.

Q. How many miles is it from Davenport to Council Bluffs, Iowa, by the use of U. S. Highway No. 6 to Iowa City, U. S. Highway No 218 from Iowa City to Mount Pleasant, and by the use of U. S. Highway 34, from Mount Pleasant to Council Bluffs?

A. Mr. Cohn: I am going to object, as not being the route involved in this application.

Exam. Carpenter: Objection overruled. I gave you a continuing objection on those questions, Mr. Cohn.

The Witness: I don't know.

By Mr. Nolan:

Q. Now, I don't suppose you are able to state then, the mileage between the east line of the State of Iowa on U. S. Highway No. 30, and the west line of the State of Iowa, on U. S. Highway No. 30, are you?

A. I don't believe so.

Q. It would be in excess of 300 miles?

A. I wouldn't want to say.

Q. Now, Mr. Petersen, you recall the ton-mile tax that was in force and effect in Iowa up until the year 1940, that [fol. 2646] applied to carriers engaged in the transportation of freight by motor vehicles, both in intra and interstate commerce?

Mr. Cohn: Objection, as having no materiality or relevancy to any issues in this proceeding.

Mr. Fairgrave: It is repetitious. The question has been asked and answered before, as I recall.

Mr. Rice: The same question was put this morning.

Mr. Nolan: It is merely preliminary.

Exam. Carpenter: The question was asked early this morning. The objection is sustained. It has been answered.

By Mr. Nolan:

Q. That was, was it not, a quarter of a cent a ton-mile tax imposed upon the gross weight of vehicle and load?

Mr. Cohn: Objection as not having any materiality or relevance to any issues in this proceeding.

Mr. Nolan: He said he recalls the ton-mile tax and was familiar with it.

Mr. Cohn: I objected to it at that time, and I object to this question.

Exam. Carpenter: The objection is overruled.

The Witness: I remember the ton-mile tax, but I wouldn't remember the rate on it.

By Mr. Nolan:

Q. What size unit would you say your company was operating over the specified routes in 1938 and 1939? What would be the gross load of those vehicles?

A. I could not answer that question.

Q. Would it be fair to say that the gross load of vehicle and load would avearge 40,000 pounds?

[fol. 2647] A. I couldn't remember.

Q. Well, would you say that was too high, or too low?

Mr. Cohn: Objection to the question. It has already been asked and answered.

Exam. Carpenter: Objection sustained.

By Mr. Nolan:

Q. Would it be 50,000 pounds?

Mr. Cohn: Objection.

Exam. Carpenter: Discontinue that line of questioning, Mr. Nolan.

By Mr. Nolan:

Q. All right. Assuming, Mr. Petersen, that a load, the weight of a load, including vehicle and cargo, was 40,000 pounds, and it was operated between the west line of the State of Iowa and the East line of the State of Iowa, for a distance of 300 miles. State whether or not the ton-mile tax on such a load would not be $15 per trip?

Mr. Cohn: Objection.

Mr. Nolan: One way trip.

Mr. Cohn: Objection, as not being material or relevant to anything material to this proceeding.

Mr. Rice: Objection also——

Exam. Carpenter: Objection sustained.

Mr. Rice: He doesn't know what the rate was.

Mr. Nolan: Well, we will prove that otherwise.

By Mr. Nolan:

Q. Do you recall the amount of ton-mile tax paid by your company to the State of Iowa in 1939?

Mr. Cohn: Objection, as not material or relevant to any issues in this proceeding.

[fol. 2648] Exam. Carpenter: Objection sustained.

Mr. Nolan: If Your Honor please, this goes to the veracity and competency of this witness when he stated this operation has been continuous, and this is laying the foundation for purpose of impeachment.

Exam. Carpenter: I know exactly what you are trying to do, Mr. Nolan.

Mr. Nolan: Well, we will do it some other way.

By Mr. Nolan:

Q. You are familiar with the present compensation tax imposed upon motor vehicles which are enaged in the transportation of freight for hire, both in intra and interstate commerce by carriers operating through or in the State of Iowa, are you not, Mr. Petersen?

Mr. Cohn: Objection, as not material or relevant to any issues in this proceeding.

Exam. Carpenter: Are we tying that down anywhere at all, Mr. Nolan? Are you tying it down over just Highway 6? Of course it applies to the entire state, I understand.

Mr. Nolan: It applies, Your Honor, to the number of vehicles which this company has engaged in the serving of these various points and routes, and it goes to the very question of whether or not this carrier is complying with the statutory laws of the State of Iowa which goes to whether or not he is a bona fide operation—or his company is a bona fide operation. It goes to the competency and veracity of this witness, and as to whether or not the service he claims has been performed, is actually being performed by his company.

[fol. 2649] Exam. Carpenter: Do you have anything to say, Mr. Cohn?

Mr. Cohn: I would say the question would involve an interpretation of the laws of the State of Iowa which, in itself, would present a case of larger proportions than this alone, and that regardless of what was developed in this type of testimony, would have no bearing upon any of the issues in this proceeding under section—which is a case under the temporary authority provisions of the Interstate Commerce Act, as I interpret it, and along the lines

of what the compensation tax is, or isn't, or whether it is paid or isn't paid, certainly would not tend to prove or disprove any issues in this proceeding.

Mr. Nolan: I might add further on that, Your Honor, that this line of examination will tend to prove that this carrier does not have equipment dedicated to the transportation in interstate commerce over specified routes sufficient to give the service he claims he is giving to points intermediate on U. S. Highway No. 6 and on all these other routes that he is claming he is giving such service.

Mr. Cohn: Certainly the other routes are not involved in this application. If there is any proof that this carrier is not giving the service over Highway 6, that certainly can be developed. It is certainly not to be developed under this type of presentation.

Exam. Carpenter: I will overrule the objection, but connect it up.

Mr. Nolan: I will certainly try.

[fol. 2650] Will you read the question, please?

Exam. Carpenter: Read the question.

(Question read)

The Witness: The answer is "yes".

By Mr. Nolan:

Q. And I will ask you to state what the fact is as to whether your company has licensed under the compensation tax of the State of Iowa, which we have just referred to, for operation over all the routes operated by your company in and through the State of Iowa, the following vehicles—types of vehicles: Three Class "A" vehicles of 8 tons or less.

Exam. Carpenter: Would you rather have them altogether?

The Witness: I will have one answer for it anyhow, he might as well read them all.

By Mr. Nolan:

Q. You answer the questions, just as I present them. Do you not have such vehicles licensed or plated under the compensation tax of the State of Iowa?

A. I believe we do.

Q. And that is an 8 ton vehicles gross, including vehicle and load, is that not right?

A. I assume you have the records. I don't have my records here. But I assume that is right.

Q. That would be for a peddle operation, would it not, or a pick-up operation, rather than even peddle?

A. It is for a peddle operation.

Q. All right.

State whether or not your company has presently licensed under the compensation tax law of the State of Iowa, one Class "B" vehicle with a gross carrying capacity of both vehicles and load of 12 tons?

[fol. 2651] A. Yes, I believe that is correct.

Q. State whether or not your company has licensed under the Compensation License Laws of the State of Iowa four Class "C" motor vehicles with a gross carrying capacity of both load and vehicle of 16 tons or less?

A. I believe that is correct.

Q. And state whether or not your company has 6 vehicles licensed under the Compensation Tax Law of the State of Iowa, designated as Class "D", with a gross load of vehicle and cargo of 16 tons or over?

A. Did you say that last was six?

Q. Yes, six Class "D".

A. I believe that is correct.

Q. And state whether or not it isn't a fact that those are all the vehicles that your company has licensed under the Compensation Tax Law of the State of Iowa, covering common carriers transporting freight by the motor vehicle both in intra and interstate commerce through or in the State of Iowa?

A. That is all the vehicles carrying plates, but then we use travel orders for the balance of the vehicles.

Mr. Nolan: I move to strike the answer as to travel orders for the balance of the vehicles. That is not responsive to the question.

Mr. Cohn: I think the witness has a right to explain his answer, if the Examiner please.

Exam. Carpenter: The answer may remain.

[fol. 2652] By Mr. Nolan:

Q. Those vehicles which I have just described are the vehicles which you operate regularly over all these routes which we have described herein, including your operations on U. S. Highway No. 30, U. S. Highway No. 6, to Des Moines, and Iowa Highway 64 to and throu. Avoca, to Council Bluffs, U. S. Highway No. 6 from Davenport to and through Council Bluffs, and U. S. Highway No. 6 to Iowa City, U. S. Highway No. 218 from Iowa City to Mount Pleasant, and U. S. Highway No. 34 from Mount Pleasant to Council Bluffs, and in the operations of the routes between Cedar Rapids, Iowa and Iowa City, Iowa, Marengo, Iowa, and Belle Plaine, Iowa, Marshalltown, Iowa, and Des Moines, Iowa, Avoca, Iowa and Des Moines, Iowa, is that not true?

A. That is true, according to the equipment license, and also the equipment using travel orders.

Q. Now, did you not state of direct examination, that you had three trucks operating daily from Omaha to Des Moines?

A. From Omaha to Des Moines?

Q. Yes, sir.

A. No, just one truck.

Q. Well, if you testified on direct examination that you had three trucks operating daily between Omaha and Des Moines, do you want to correct that testimony now?

A. That testimony was we had three trucks operating from Omaha to Avoca, I believe that is right.

Q. Well, if you testified that you had three trucks operating daily between Omaha and Des Moines, on direct examination, do you want to correct that testimony now?

[fol. 2653] A. Yes, we have one truck operating from Omaha to Des Moines.

Exam. Carpenter: I think his testimony was he only had one truck operating between Omaha and Des Moines.

Mr. Nolan: Your Honor, I have a note here that says he had three trucks. I may be in error.

Exam. Carpenter: So may I. That is my recollection of his testimony.

By Mr. Nolan:

Q. How long have you had a terminal in Des Moines, Mr. Petersen?

A. That I don't remember.

Q. When was your terminal in Des Moines first listed in the telephone directory of Des Moines, Iowa?

A. I wouldn't know that.

Q. Well, what is your best judgment on it?

A. I wouldn't want to make a guess.

Q. Now you said that you never transferred with the Rock Island Motor Transit—I mean interlined with the Rock Island Motor Transit, is that correct?

A. I don't believe I said that.

Q. Can you explain why there was a transfer to the Rock Island Motor Transit for a shipment at Des Moines, for a shipment to West Des Moines, within the last year?

A. No, I can't explain it.

Q. If you are operating daily there, would you not have made that delivery?

A. I certainly would, I can't explain it.

Q. You testified on direct examination that you were not tendering any shipments to the Rock Island Motor Transit [fol. 2654] Company to points where your company had authority to serve, is that correct?

A. I don't remember that testimony.

Q. But whether you testified to that or not, your company did tender such a shipment for West Des Moines delivery within the past year, isn't that true?

A. According to your record.

Q. You don't think we came over and stole that shipment from you, do you, to deliver it to West Des Moines?

A. No.

Mr. Nolan: That is all I have on that phase of it.

Exam. Carpenter: Mr. Howland?

Mr. Howland: I would like to examine the witness with respect to some other phases.

Cross examination.

By Mr. Howland:

Q. Mr. Petersen, when did you also inaugurate your so-called peddle run from Des Moines, to Marengo, and return by Tama?

A. I couldn't say. I don't have any records here to show it.

Q. Well now, Mr. Petersen, you have a total of only 50 employees in your organization?

A. I believe that is right.

Q. Yes.

Can you not tell us approximately when it was that the peddle run that you have testified to between Des Moines, Marengo, and return via Tama was first established?

A. I don't believe I can answer that.

Q. You can't answer that?

A. No.

[fol. 2655] Q. Is it not true that the peddle run was inaugruated in the year 1951?

A. No, I don't believe so. I believe it has been before that.

Q. How long, in your best judgment, was it before that, that that peddle run was inaugurated?

A. I wouldn't want to make a guess.

Q. In other words, you don't know?

A. I don't know.

Q. You have produced here certain groups of bills which you say, and which you testified on direct examination, were in support of the proposition that service had been rendered by Iowa-Nebraska Transportation Company. You so testified this morning.

A. Let's have that question again, please?

Mr. Howland: I withdraw the question.

By Mr. Howland:

Q. You have produced here for examination, certain groups of freight bills, have you not?

A. Those are our delivery receipts.

Q. Yes. Have you produced any delivery receipts which bear date prior to the month of June, 1951?

A. No. We have them in our files, however.

Q. Will you produce delivery receipts showing the handling of shipments, delivered at destinations, on U. S. Highway 6, between Des Moines and Marengo, for the years 1949 and 1950?

A. Yes; I believe we can.

Q. Now, I notice that your bills have certain prefixes before what I would refer to as the pro numbers.

A. That is right.

[fol. 2656] Q. One of those prefixes is "D. M.". What does that indicate?

A. That indicates the billing was made in the Des Moines office.

Q. The Des Moines office.

Another group of bills bears the prefix "C. H.".

A. That indicates the billing was made in Chicago.

Q. And another group of bills has the prefix "O. H.".

A. That indicates they were billed in Omaha.

Q. Have you produced here a number of bills bearing the "D. M." prefix, in which shipments for points for destinations between Des Moines and Marengo, Iowa were delivered to you by Watson Transportation Company and by Brady at Des Moines, Iowa?

A. I believe that is right.

Q. Yes.

In other words, those shipments were delivered to you at Des Moines for transportation to the destination, is that right?

A. Yes.

Q. Is it not true that in a large number of those bills for delivery at points between Marengo and Des Moines, Iowa, that the original routing was from Chicago, Illinois, over Watson, Brady, Merchants, or other carriers?

A. That I couldn't say without looking at the bills.

Q. Well, haven't you observed that that is true of quite a large number of those bills?

A. I wouldn't say quite a large number. There might be occasional bills.

Q. In other words, it is true, is it not, that in instances, Watson, Brady, Merchants have delivered to you at Des [fol. 2657] Moines for delivery to destinations between Des Moines and Marengo, shipments that have moved through the destination point?

A. I wouldn't want to say yes without a complete examination of the papers.

Q. All right. Let's examine a few of your Des Moines bills.

Refer to the bill bearing No. "D. M." 16552. Was that a shipment destined over your line between what points?

A. That shipment originated on our line, at Mitchellville.

Q. It bears the notation inbound reference Weber Ctge. What is indicated by that?

A. That is an error there. There is no inbound reference on it. Weber Cartage took the shipment from Chicago to Milwaukee.

Q. Weber is the delivering carrier?

A. Delivering carrier.

Q. Rather than the originating carrier then.

A. Yes.

Q. All right, look at the bill bearing reference "D. M."—16580. Tell us how that shipment moved.

A. It moved to Des Moines via Watson from Chicago.

Q. And it was destined to the Foremost Electric Company, at Grinnell?

A. That is right.

Q. Interchanged to your line at Des Moines, Iowa?

A. Yes.

Q. Look at the bill bearing pro number DM-16587, July 5, 1951. How did that shipment move?

A. It moved via Watson from Chicago to Des Moines, consigned to Colfax, Iowa.

[fol. 2658] Q. Consigned to Colfax, Iowa, and you performed the delivery service from Des Moines to Colfax, although the point of origin was Chicago?

A. . . at is right.

Q. Is the same thing true of pro number DM-16598, dated July 6, 1951, consigned to Mitchell Motors, at Grinnell, Iowa?

A. The shipment originated in Kansas City.

Q. That one is a Kansas City shipment?

A. Yes.

Q. How about the shipment bearing pro number 16653, prefixed "D. M.", July 7, 1951? How did that shipment move?

A. That shipment was given to us in Des Moines by Watson.

Q. Where did it originate?

A. It originated in Rockford, Illinois.

Q. The service which you performed was only between Des Moines and Colfax?

A. That is right.

Q. Now the shipments on which you performed delivery on your pro numbers bearing the prefix "D. M.", in many instances, originated on the lines of Watson at points such as Omaha, Kansas City, Missouri, or other points on the Watson line?

A. Yes.

Q. Look at pro number DM-16715, dated July 10, 1951. That shipment was handled in what manner?

A. Brought to Des Moines from Chicago by Watson.

Q. The originating point was Port Washington, Wisconsin, is that right?

A. That is right.

[fol. 2659] Q. That shipment was destined to Mitchellville, Iowa, was it not?

A. Right.

Q. Now, on your pro number DM-16735, that shipment was consigned to Newton, Iowa, and was that delivered to you at Des Moines, Iowa?

A. Yes.

Q. By Brady?

Q. That is correct.

Q. Look at pro number DM-16767, July 11, 1951. Was that a shipment moving Adel, Iowa, from Cincinnati, Ohio?

A. Yes.

Q. Delivered to you by Watson at Des Moines?

A. Correct.

Q. Look at the delivery receipt bearing pro number DM-16768. How was that shipment handled?

A. It was delivered to us at Des Moines by Watson.

Q. That shipment originated at Findlay, Ohio, consigned to Davis Oil Company, Ladora, Iowa?

A. That is right.

Q. On July 11, 1951?

A. Yes.

Q. How about shipment, or delivery receipt bearing the prefix DM and the nunber 16771. Where was that shipment from?

A. The shipment originated in Chicago, brought to Des Moines by Watson, and it was delivered to Grinnell, Iowa.

Q. On the 11th day of July, 1951, is that right?

A. Yes.

[fol. 2660] Q. The delivery receipt bearing pro number DM-16795 covers a shipment that was handled in what manner?

A. Brady picked it up at Rock Island, Illinois, and delivered it to us in Des Moines, and we delivered it to Newton, Iowa.

Q. That is on July 11, 1951, is that right?

A. I didn't notice the date.

(Handed to Witness)

A. Yes.

Q. Delivery receipt bearing No. DM-16821 was a shipment consigned to Carlson's Department Store, Colfax, Iowa, shipped by Smith Bros of St. Joseph, Missouri, interlined to you at Des Moines, by Watson?

A. Yes.

Q. That was on July 12, 1951?

A. Correct.

Q. Do you know what the fact is as to whether Watson operates on U. S. Highway 6 to points such as Newton, Iowa?

A. I do not know anything of their operation.

Q. You are not familiar with that?

A. I am not.

Q. Now, is it not true that all of the shipments interchanged by you at Des Moines, in interstate commerce were with either Watson or Brady for delivery to points both west and east of Des Moines, on U. S. Highway No. 6, that are contained in this group of bills bearing the prefix D. M. Before the pro number?

[fol. 2661] A. I would say that is right, according to this group of bills.

Q. Yes. And those bills cover what period of time—the top one is dated July 2 and the bottom one, as I recall, was dated August 15, 1951.

A. That is correct.

Q. What is the name of the driver on your peddle truck that you say operates between Des Moines and Marengo, and return, via Taina?

A. I do not know. I would have to call the office.

Q. Do you know how long he has been in the employee of the Iowa-Nebraska Transportation Company?

A. I do not.

Q. Is he one of the 50 regular employees of the Iowa Nebraska Transportation Company?

A. Yes.

Q. And you are unable to give us his name or the length of time that he has been employed?

A. That is right.

Q. Have you served any of the points in the Tri-City area located on the easterly side of the Mississippi River in connection with your service from Chicago or Omaha, over U. S. Highway 6?

A. Do you mean Rock Island, or East Moline?

Q. Rock Island, Moline, East Moline, Silvis, or any of the points on the easterly side of the Mississippi River?

A. No.

[fol. 2662] Q. You have performed no service at any of the Tri-Cities except the point of Davenport, Iowa?

A. That is right.

Q. What proportion of your shipments, handled by the Iowa-Nebraska Transportation Company, consist of truckloads, as compared to the total tonnage handled?

Mr. Cohn: Are you confining it to this territory, or the whole system?

Mr. Howland: I am referring to his whole operation.

The Witness: I'm not certain, but I believe our records show 51 per cent, or 56 per cent, something like that.

By Mr. Howland:

Q. 51 or 56 per cent would comprise truckloads? I just want to understand your answer.

A. Well, I'm trying to think. I know there is a question on the I. C. C. Report that asks the same questions as to percentages.

Mr. Cohn: Can you give us an approximation?

The Witness: I will say between 51 to 56 per cent, that would hit us somewhere in that.

By Mr. Howland:

Q. Now, do I understand that by that last answer you mean to say that approximately 51 to 56 per cent of the total tonnage handled by Iowa-Nebraska Transportation Company has been in truckload quantities?

A. That is what I said, but I will withdraw it. The I.C.C. Report, and the question on the I.C.C. Report is as to Special commodities.

Q. Well, what is your answer to that question? What percentage of your tonnage handled by the Iowa-Nebraska [fol. 2663] Transportation Company has been in the form of truckload shipments?

A. I cannot answer.

Q. Is it not true that on your I.C.C. Report that you have shown a figure of 80 per cent being truckloads?

A. I do not know.

Q. You don't know as to that?

A. No.

Q. You don't recall those figures for the years 1946, '47 and '48?

A. No, I don't.

Q. Now, the delivery receipts bearing the prefix "CH" indicate shipments billed by your company at its Chicago office?

A. That is right.

Q. And there is a group of those bills which you have submitted here. They begin with July 2, 1951, and extend to and include August 15, 1951, on the last. Does that appear to be correct.

A. It is.

Q. Now, these shipments, do I understand, delivery was effected by your over-the-road units to destinations between Des Moines and Davenport, Iowa, on U. S. Highway 6?

A. Either over-the-road, or peddle trucks.

Q. What peddle trucks did you have been Davenport, Iowa, and Des Moines, Iowa, in the months of July and August, 1951?

A. Any shipment being delivered to any point between Des Moines and Marengo was brought to the Des Moines terminal and rehandled and sent back on the peddle truck.

Q. But any shipment destined to any point between [fol. 2664] Davenport and Marengo, Iowa, I believe you said, delivery was effected by the road unit?

A. That is right, except for the over-the-road truck which would deliver the shipments to our agencies at Davenport and Iowa City, and would peddle the small shipments to the small towns.

Q. Now, when did you first have an agency at Davenport?

A. It has been several years, but I wouldn't know when.

Q. Approximately when, can you tell us?

A. No, I couldn't.

Q. Do you have a company employee stationed at Davenport?

A. No.

Q. Who performs the service for you at Davenport, Iowa?

A. At this time it is the G & M. Trucking Company.

Q. The G & M Trucking Company. And how long has that been in effect, that arrangement?

A. I do not know.

Q. Can you give us an approximation of that?

A. I don't believe I could guess at that.

Q. Now, Maher Bros. Transfer Company, as I under-

stand, have been the firm performing your service at Iowa City, Iowa?

A. That is right.

Q. And can you tell us approximately when that arrangement was entered into?

A. I cannot.

[fol. 2665] Q. Do you have any agency of any kind, draymen, or otherwise, at any point between Davenport and Iowa City, on Highway No. 6?

A. Between Davenport and Iowa City?

Q. Yes.

A. No.

Q. Do you have any agent at Marengo, Iowa?

A. No.

Q. You have no drayman to perform any pick-up and delivery service there?

A. No.

Q. How about Grinnell, Iowa?

A. No.

Q. How about Newton, Iowa?

A. No.

Q. How about Cedar Rapids, Iowa?

A. Yes.

Q. Who performs services for you at Cedar Rapids, Iowa?

A. Cedar Rapids Transfer and Storage Company.

Q. As I understand it then, you have no full-time employees of your company located at Cedar Rapids?

A. No, we have no full-time employees.

Q. When did you first establish an office or agency at Omaha, Nebraska?

A. We have always had an agency or a terminal at Omaha.

Q. Well, when was it that it was established as a company agency with a regular employee?

A. I do not remember.

[fol. 2666] Q. You are unable to answer that?

A. That is right.

Q. At some time, I take it, from your preceding answer, there was a change at Omaha from a drayage arrangement to a full-time company employee?

A. I believe that is correct.

Q. But you are unable to tell us when the change was made?

A. I wouldn't want to say, because I don't remember.

Q. Now, you referred to the town of Hancock being a point served in connection with your regular route between Omaha, Nebraska and Arcadia, Iowa, in connection with the delivery of packing house products. Do you recall that?

Exam. Carpenter: Read the question, Mr. Reporter, please?

(Question read)

Exam. Carpenter: That was an off-route point, Mr. Howland.

Mr. Howland: I believe it was an off-route point, the way you say.

By Mr. Howland:

Q. Where is Arcadia, Iowa, located?

A. Highway 30.

Q. About how far from the town of Hancock?

A. Mr. Cohn: Do you want to see a map?

The Witness: No, I know where it is. I don't understand why it would make any difference.

By Mr. Howland:

Q. Well, just answer the question as to whether it is and then we will let somebody else decide that.

[fol. 2667] A. O.K., I imagine it is about 45 miles between the two towns.

Q. Is Hancock named as a point, off-route, or otherwise, in your certificate between Omaha and Arcadia?

A. That is what it says here, yes.

Q. In your certificate?

A. Yes. "Service authorized to and from intermediate points and off-route points of Hancock".

Mr. Cohn: You mean all intermediate points and the off-route point of Hancock, among others, isn't that correct?

The Witness: That is right.

By Mr. Howland:

Q. Mr. Petersen, I will ask you if you will procure for us, and furnish to us, the name of the driver of your peddler truck operating between Des Moines, Marengo and return via Tama, and the date that he was first employed by your company?

Mr. Cohn: I don't see that is relevant or material to this case, if the Examiner please.

Exam. Carpenter: It might be very material, Mr. Cohn.

(Question read)

The Witness: Yes, I will furnish that information.

By Mr. Howland:

Q. Thank you. Now, when did you first have an arrangement with Smiley Bros. at Atlantic, Iowa?

A. I do not remember, because they are the present agency there now, There have been several predecessors to Mr. Smiley.

Q. When did you first have any arrangement in Atlantic, Iowa, in the way of an agency arrangement?

A. I do not remember that.

[fol. 2668] Q. Can you, Mr. Petersen, furnish to counsel for the applicant, by noon tomorrow, bills or delivery receipts rather, for the comparable periods of 1949 and 1950, showing your Omaha billings, your Des Moines billings, and your Chicago billings, to points and places located on U. S. Highway 6?—across the State of Iowa, comparable to the ones—and for the same period as the bills in the year 1951?

Mr. Cohn: We are going to object to producing those bills unless directed to do so by the Examiner for the reason that those bills and any use that would be made of them would not be related to the issues in this proceeding as involving a period remote from the time with which we are concerned in this proceeding, which is one under the provisions of the temporary authority section of the Interstate Commerce Act, which issue is, whether there is motor carrier service capable of meeting a need at the present time in this territory. What may have been the situation two,

three, or 13 years ago, or some other time remote in the past, is certainly not in issue in this proceeding, and those bills, if brought into this proceeding, would add nothing to this record, and would not be material or relevant to the issue to be determined in this proceeding by the Commission.

Exam. Carpenter: I will overrule the objection, and direct the bills be produced as soon as possible.

Mr. Cohn: I don't know whether we could get them in by noon tomorrow, which is a part of the request.

[fol. 2669] Mr. Howland: I don't want to be unreasonable about the time, but I would like to have them before we conclude the hearing.

Mr. Cohn: Are we directed to produce all the representative bills, are we given a time limit, I would like to know?

Exam. Carpenter: Representative bills. I suppose that would be sufficient, from July to August.

Mr. Howland: July 1, to August 15, that is my request.

Mr. Cohn: For what years?

Exam. Carpenter: 1949 and 1950.

Mr. Cohn: I would like to find out from Mr. Petersen.

Exam. Carpenter: Let's go off the record.

(Discussion off the record)

Exam. Carpenter: On the record.

By Mr. Howland:

Q. Mr. Petersen, your financial statement as of June 30, 1951, as embodied in Exhibit 17, is what is commonly referred to as the balance sheet statement, is it not?

Exam. Carpenter: Off the record.

(Discussion off the record)

Exam. Carpenter: On the record.

(Question read)

The Witness: Yes.

By Mr. Howland:

Q. Now, under the asset side you show various items including an item of $2500 for permits. What is the nature of that item?

[fol. 2670] A. That is the value we have placed on our operating authority.

Q. Was that acquisition cost of permits, that you acquired from someone else?

A. That is all it is, is the acquisition cost of one permit.

Q. And when was that permit secured?

A. In November, 1938.

Exam. Carpenter: Is that actually a certificate, instead of a permit?

The Witness: It is a certificate.

By Mr. Howland:

Q. In the item of pre-payments, you show a figure of 13,600 odd. What is included in that item?

A. In that item would be the balance of the licenses to be charged out for the year 1951, tires on hand, pre-payments on the tires that are not charged out in the operation.

Q. Anything other than those items?

A. There could be, but I am not familiar with it.

Q. It doesn't represent a cash item which will be collected in the normal course of your business?

A. No, I don't think so.

Q. All right. Now, I notice at the bottom you have a figure of $23,764.76 listed as drafts outstanding. What is the general nature of such item?

A. That is drafts drawn by the Braniff offices on the local bank.

Q. Those are items which represent when advances which will have to be made by third parties when those drafts reach the bank?

[fol. 2671] A. When the drafts reach the bank we issue our check to pick up the drafts.

Q. Well, you have 23,764 dollars in drafts, and you have $3250.67 of cash on hand. I take it some arrangement would have to be made to have those drafts honored and credit provided for your continued operations?

A. They will honor them.

Q. I am not questioning that, but what I mean is, they, in fact, represent debts or debits for which a credit must necessarily be arranged?

A. That could be.

Q. Yes.

All right, now on your notes payable of $54,500, does that represent equipment, conditional sale purchases, or is it just for money borrowed?

A. It is covered by all conditional sales purchases on equipment.

Q. It comprises entirely that?

A. Money owed on equipment.

Q. And accounts payable are the—does that include both supplies and interline accounts payable?

A. Yes. It is a current interline accounts, and current money accounts.

Q. Does the item of accounts receivable in your asset figure of $65,920 include both interline accounts receivable and customers' accounts receivable?

A. That is right.

Q. I notice this statement is not set up on the basis of [fol. 2672] your current assets and current liabilities. That is true, is it not? You know what I mean by your current assets and your current liabilities in accounting, don't you?

A. I don't believe I do.

Q. Well, on your liabilities here, are the accounts payable, notes payable, and drafts outstanding, all due within one year or less?

A. No.

Q. Over what period of time are the items due and payable?

A. We probably have some conditional contracts on tractors that would run anywhere from 18 to 24 months yet for payments.

Q. About what proportion of your notes payable would represent liabilities due in more than one year?

A. I couldn't say definitely.

Q. I notice you have no figure in either Exhibit 17 or 18 in the way of a reserve for income tax payments. Do you ordinarily carry a reserve for such purposes in your business?

A. No.

Q. There is no such reserve set up in the figure of prepayments?

A. No.

Q. What is included in the item of $4900 of special deposits in the assets?

A. They are deposits put up on insurance policies, such as the liability and property damage, cargo, workmen's compensation insurance.

Q. Mr. Howland: That is all the cross examination I have, if the Examiner please.

[fol. 2673] Exam. Carpenter: Redirect, Mr. Cohn?

Redirect examination.

By Mr. Cohn:

Q. Mr. Petersen, on cross examination you made reference to the use of travel orders in connection with operations of motor vehicle equipment to and from points in the State of Iowa. Can you explain what a travel order is?

A. Travel order is an order issued by the Iowa State Commerce Commission costing $5, and it gives a truck authority to pass through the State within 24 hours—or pass into the State or through it in 24 hours.

Q. Is that issued in lieu of compensation tax plates or payments?

A. That is right.

Q. Then all of the motor vehicle equipment which your company operates in the State of Iowa is either covered by the compensation tax or the travel orders?

A. Yes.

Q. Just one other question. In reference to the financial statement, which is Exhibit 17, the item of accounts receivable of $65,920, as appears thereon, is that made up of accounts which are presently due and owing and collectible?

A. Yes.

Q. For the most part, is that correct?

A. Yes.

Q. That would be the usual accounts which are due within seven days after billing?

A. Yes.

Mr. Cohn: I believe that is all I have.

[fol. 2674] Exam. Carpenter: Any recross?

Recross examination.

By Mr. Howland:

Q. What period of time do you extend credit to customers on freight charges?

A. Approximately seven days.

Q. Most of your freight charges are collected on delivery?

A. A certain per cent of them.

Q. Well, could you tell us about how much you customarily collect on delivery, or how much involves an extension of credit?

A. I cannot.

Mr. Howland: That is all I have.

Mr. Nolan: At this time I want to make a statement for the record, on the claimed authority of the Iowa-Nebraska Transportation Company to serve the points intermediate between Davenport, Iowa, and Omaha, Nebraska, including Davenport, Iowa, by, at this time, moving to strike all the testimony of the witness, Mr. Petersen, in relation to the service alleged and claimed to be being performed by the Iowa-Nebraska Transportation Company to the intermediate points between Davenport, Iowa, and Omaha, Nebraska, including Davenport, Iowa, for the reason that under the certificate presently held by the Iowa-Nebraska Transportation Company, Inc., the same appearing as certificate of public convenience and necessity No. MC-47619, issued by the Interstate Commerce Commission under date of July 11, 1949, that the Iowa-Nebraska Transportation Company does not have, hold, or possess, authority to perform a service in interstate or foreign commerce to or from the intermediate points on U. S. High-[fol. 2675] way No. 6 between Davenport, Iowa, and Omaha, Nebraska, including the point of Davenport, Iowa, in that under said certificate there are three routes specified on sheet 1 of said certificate between Chicago, Illinois, and Omaha, Nebraska, briefly referred to as route No. 1 over

U. S. Highway No. 30, route No. 2, over U. S. Highway No. 6, and Route No. 3, over U. S. Highway No. 6, to Iowa City, Iowa, the over U. S. Highway No. 218 to Mt. Pleasant, Iowa, and thence over U. S. Highway No. 34 to Council Bluffs and Omaha, Nebraska, with return over said routes, with the specific service being authorized from the off-route point of Joliet, Illinois restricted to pick-up only wall-paper and steel wire at said point of Joliet, Illinois, there being no reference or provision in relation to the aforesaid routes between Chicago and Omaha, Nebraska, of any authority to serve any intermediate points between Chicago, Illinois and Omaha, Nebraska, on the aforesaid three specified routes except the off-route point of Joliet; Illinois, which service is restricted to the picking up only of wall-paper and steel wire.

Further, in connection with this motion to strike the testimony of the witness, Petersen, as above referred to, the attention of the Examiner and Commission is called to the further routes set forth in said certificate as follows:

The route between Cedar Rapids, Iowa, and Iowa City, Iowa, followed by Highway designation for such route.

The further route between Marengo, Iowa, and Belle Plaine, Iowa, followed by the specification of Highway designations for such route.

[fol. 2676] Further, the specified route between Marshalltown, Iowa, and Des Moines, Iowa, followed by a specified designation of the route between said points, with the provision, under the aforesaid routes of between Cedar Rapids, Iowa, and Iowa City, Iowa, Marengo, Iowa to Belle Plaine, Iowa, and Marshalltown, Iowa, to Des Moines, Iowa, there is the provision that service is authorized to and from all intermediate points in Iowa.

The attention of the Examiner and the Commission is further directed to the separate route on said certificate appearing on page 2 of said certificate between Avoca, Iowa and Des Moines, Iowa, with the specified designation of the Highway between said points following said specific route, or between Avoca, Iowa and Des Moines, Iowa, and followed by the provision, "Service is authorized to and from all intermediate points."

It is the position of the interveners represented by me, in support of said application, that the authorization of service to and from all intermediate points in Iowa, appearing on Sheet 2 of said certificate, applies solely and only to the points intermediate on the routes specified and set out on said Sheet 2, to-wit, between Cedar Rapids, Iowa, and Iowa City, Iowa—Marengo, Iowa, and Belle Plaine, Iowa, and Marshalltown, Iowa and Des Moines, Iowa.

Mr. Cohn: That will be sheets 1 and 2?

Mr. Nolan: Two, on the official copy.

It is further the position of the interveners represented by me that any service authorized under the provision, "Service is authorized to and from all intermediate points", [fol. 2677] appearing on Sheet No. 2, and following the specified and designated route of "between Avoca, Iowa, and Des Moines, Iowa", followed by the specification of the designated route between said points, applies solely and only to service and the authorization of service to and from all intermediate points between Avoca, Iowa, and Des Moines, Iowa.

That, under the undisputed, clear, and unambiguous terms and provisions of the aforesaid certificate issued to and held by the Iowa-Nebraska Transportation Company, Inc., the Iowa-Nebraska Transportation Company, Inc. does not hold or possess any authority, right or power to perform to or from, service in interstate commerce by motor vehicle for the transportation of general commodities, to and from the intermediate points between Davenport, Iowa, and Omaha, Nebraska, including the point of Davenport, Iowa, over U. S. Highway No. 6 or any other Highway route or road.

Exam. Carpenter: What do you say, Mr. Cohn?

Mr. Howland: We join in the objection and statement of counsel for the intervener.

Exam. Carpenter: You join in the motion, I believe?

Mr. Howland: Join in the motion, thank you.

Mr. Cohn: If the Examiner please, we have previously stated the position of the intervener, Iowa-Nebraska Transportation Company with reference to the authority authorized under exhibit 16, and we wish for the record to show that the records of the Interstate Commerce Com-

mission of the service performed by the Iowa-Nebraska Transportation Company and its predecessor in interest, [fol. 2678] and the certificate itself, Exhibit 16, will indicate that the service that is being performed and testified to by the President of the company is properly being performed and authorized by authority of this Commission and the provisions of Part 2 of the Interstate Commerce Act.

I would further desire to point out at this time, though, it would appear that the appropriate proceeding in which the question would be raised would be in a complaint, investigation, or interpretation proceeding, that the certificate itself provides for certain alternate highway routings over regular routes between Chicago, Illinois and Omaha, Nebraska, which would clearly indicate, in our opinion, an intent that the service be performed in connection with the various alternate routings that are provided between Chicago, Illinois and Omaha, Nebraska as well as the intermediate points shown in the certificate.

I would further like to point out at this time, on Sheet 3 of the certificate, in connection with a route from Avoca, Harlan, and Exira, Iowa, to Chicago, Illinois, over specified regular and irregular routes, that there is a provision specifically negativing the right to perform service to or from intermediate points, which I quote, "Service is not authorized to or from intermediate points."

Such negation of authority to serve intermediate points is not found in connection with the regular route authority granted on Sheets 1 and 2 between Chicago, Illinois and Omaha, Nebraska.

It is further pointed out that the provision on Sheet No. [fol. 2679] 2, which I quote, "Service is authorized to and from all intermediate points in Iowa.", appears after the route descriptions and point descriptions following a listing of the general commodity authority, with the usual common carrier exceptions, contained on Sheet 1. Under our interpretation that modifies service performed with respect to the classification of commodities as shown on Sheet 1.

It is further pointed out, in support of the last point made, with respect to the relationship of the provision permitting service to and from all intermediate points, that

the next classification of commodities shown is packing house products and fresh meat, and the portion of the certificate dealing with general commodities, which precedes the packing house products and fresh meat classification must be read as a distinct and complete section of the certificate.

Exam. Carpenter: The motion is overruled.

Mr. Howland: There is one question I would like to ask Mr. Petersen, before he is excused today.

Recross examination (Cont.).

By Mr. Howland:

Q. Mr. Petersen, does Iowa-Nebraska Transportation Company, Inc., have any Iowa intrastate rights to transport shipments on Highway 6, or any combination with that, including Highway 83 and 64?

A. They do not have.

[fol. 2680] Birney Baker, President of Des Moines Transportation Co., (R. 1315-1324), testified:

Cross examination.

By Mr. Nolan:

Q. Mr. Baker, I believe you stated that your company started in 1931?

A. Yes, sir.

Q. Have you been associated with the company since that time?

A. I have, except I was in the service a little over two years. I was still with the company.

Q. I mean you have been associated and conversant with the operation of the company throughout that period?

A. Yes, sir.

Q. Your company has shown a constant growth, has it not?

A. It has.

Q. That has been true in a progressive way, year after

year, so that today you are hauling more freight and engaging more people as employees and using more equipment than you did five years ago, or four years ago?

A. That is very true.

Q. Or three years ago?

A. That is right.

Q. Throughout that period of time, particularly since the Rock Island Motor Transit Company acquired the White Line Motor Freight Company's operating authority, in this area, you have been competitive with the Rock Island Motor Transit Company?

A. That is right.

Q. Now, have you made any investigation to determine [fol. 2681] the volume of traffic moved out of Des Moines by your company in comparison with other companies?

A. In comparison with other companies?

Q. Yes.

A. For what period of time, or to what points, I mean. In and out of Des Moines?

Q. No, freight handled by your company here in Des Moines, in regard to the volume as compared with the volume handled by other carriers?

A. The only way you could do is take their word for how much they were handling. At one time we were called in by the ODT and required to lay our records on the table.

Q. If I should make the statement that for a period from January 29 to February 3, 1951, that your company here in Des Moines in the picking up and delivering of traffic exceeded the combined picking up and delivery of traffic by the Rock Island Railroad and the Rock Island Motor Transit, would you agree with that?

A. In my opinion I think we pick up many times as much freight in Des Moines as the Rock Island Motor Transit. I am not positive, I only think so, in seeing their trucks and seeing our trucks, knowing how many we run.

Q. Yes. Then if I made the statement to you that during that period, from January 29, to February 3, 1951, that your company picked up and delivered approximately twice as much freight in Des Moines as the Rock Island Motor Transit and more than the Rock Island Motor Transit and the Rock Island Railroad combined, would you disagree [fol. 2682] with that statement?

A. I don't know how much the Rock Island Railroad—I have no way of knowing how much freight the Rock Island Railroad picked up, because the Rock Island Railroad might have a whole string of cars parked down there, and I don't know what is on them.

Q. But you agree with the fact, you do pick up many more times freight and deliver many more times freight in Des Moines, than the Rock Island Motor Transit?

A. The number of trucks I see operating, I think we do.

Q. Then, Mr. Baker——

A. Might I ask one further question? You have given me some specific dates.

Q. Yes.

A. What days did it include, is there a Sunday in there, January 29 to February 3, I think you said.

Q. I don't know. I say, are you familiar with the survey made in regard to the picking up and delivering of freight for your company, Watson Brothers, Bruce Motor Freight, Burlington Transportation, Bruce Transfer, and the Rock Island Motor Transit at a period, in a period, at the forepart of this year?

A. I wasn't in on that particular survey.

Q. But you know there was one?

A. There was one made. I do not know the circumstances of it, and I could not be familiar. I can get you the figures on it, if you want them.

Q. Well, I have them right here.

[fol. 2683] A. All right.

Q. Now, then, Mr. Baker, from your own statement here that your company has constantly grown throughout the period since the time that the Rock Island Motor Transit started in business here in and out of Des Moines, and in this Iowa, territory, that you handle many times more freight according to your own observations than the Rock Island Motor Transit does in this territory, and particularly in Des Moines, then there is no contention on your part that the Rock Island Motor Transit Company is monopolizing this traffic for freight, is there?

A. Not monopolizing it, as far as I am concerned. We do handle points which we serve in Iowa, which we have both inter- and intrastate, we have many times more freight than we do to the points along Highway 6 where they have the interstate rights.

Q. Well, naturally, but the answer is that they haven't created a monopoly so far as you are concerned?

A. They certainly haven't. That is very evident.

Q. Now, you have a territory where you have both the intra- and interstate rights?

A. That is right.

Q. But that is not along U. S. Highway No. 6?

A. No.

Q. Isn't that right?

A. That is right. That is Highway 30, and Mason City.

Q. And where you have both the intra- and interstate rights, your company attempts to serve all points?

[fol. 2684] A. We do serve all points.

Q. And you have volume there by reason of having both the intra- and interstate traffic sufficient to give a reasonably adequate service to all points?

A. We certainly do.

Q. Now, you have no intrastate authority along U. S. Highway No. 6?

A. We do not.

Q. Involved in this proceedings, isn't that correct?

A. We do not have any?

Q. As I understand your authority, so we will get it definitely in the record, you have authority to operate between Chicago, Illinois, and Des Moines, Iowa, over U. S. Highway No. 34 to Junction, Illinois, Highway 65, thence over Illinois Highway 65 to Aurora, Illinois, thence over Illinois Highway 31, to Junction U. S. Highway 34, thence over U. S. Highway 34 to Illinois Highway 92, and thence over Illinois Highway 92, to Moline, Illinois, thence over U. S. Highway No. 6 to Iowa City, thence over U. S. Highway No. 218 to Cedar Rapids, thence over U. S. Highway No. 30 to Ames, and thence over U. S. Highway No. 69 to Des Moines.

Q. You also have a route between Chicago and Iowa City, and also from Iowa City-Des Moines, over U. S. Highway No. 6, isn't that right?

A. That is right

Q. And a return to Chicago over either one of the routes I described?

A. That is right.

[fol. 2685] Q. The only intermediate or off-route points you serve on U. S. Highway No. 6 involved in this proceedings, are Davenport, Iowa City, Newton, Marengo, Grinnell, and Kellogg, isn't that true?

A. That is correct. That Davenport area towns, which are not included.

Q. That is the commercial zone of Davenport, or the Tri-City commercial zone?

A. That is correct.

Mr. Cohn: That is east of Des Moines.

The Witness: That is east of Des Moines, that is what he is talking about.

By Mr. Nolan:

Q. Now between Omaha and Des Moines, you have authority to operate over U. S. Highway No. 6?

A. That is right.

Q. The only intermediate points between Des Moines and Omaha, on U. S. Highway No. 6, involved in this proceedings, to which your company is authorized to serve, are Council Bluffs and Atlantic?

A. And Adel.

Q. Adel isn't in this proceeding, it is not a point on the Rock Island Railroad.

Q. So then of the 49 points involved in this proceedings along and continuous to U. S. Highway No. 6, between Davenport and Omaha, Nebraska, your Company is authorized to serve only approximately 9 of those points, which would be Iowa City, Newton, Marengo, Grinnell, Kellogg, Des Moines, Atlantic, and Council Bluffs.

[fol. 2686] Mr. Cohn: And Davenport.

The Witness: And Davenport.

By Mr. Nolan:

Q. And Davenport. Well, then, that would make it 50 points.

Mr. Cohn: That includes Omaha.

By Mr. Nolan:

Q. Mr. Baker, are you able to give us a breakdown of the ratio of truckload business handled by your company as compared to the total tonnage handled by your company?

A. Yes, sir.

Q. What would you say the truckload volume, or percentage of your company's business would be in ratio to your total tonnage?

A. About 55 per cent of our business is truckload business.

Q. Now in reference to these shipments as shown on Exhibit No. 10, which show that there were some isolated shipments handled by the Rock Island Motor Transit which were originally routed over your Company's line to points which your company has authority to serve, you say that that no doubt was brought about by some confusion or mishandling by the connecting carrier there in Chicago, is that right?

A. I think that is very true.

Q. You have had that same experience?

A. Many times each day.

Q. Of course, where there is any volume, and for an extended period of time—of course that wouldn't necessarily be a misdirection or mishandling, would it?

[fol. 2687] A. It might be an argument between the two companies.

The local company might not have had their interline account settled, and we would have demanded cash when they came down to our place of merchandise. It might have been for some other reason. Maybe the cartage man might have drove past our place and it was busy, and he drove on to the next place, thinking he would get back, and he didn't get back.

Q. I don't think you paid any attention to my question.

Examiner Carpenter: Read the question.

(Question read.)

By Mr. Nolan:

Q. The point I am trying to make is this, Mr. Baker. According to Exhibit No. 10, there are only a few shipments originally routed over your company's line and tendered to and handled by the Rock Island Motor Transit, whereas for other carriers, such as Western, McCoy, Watson, Bos, Ringsby, there appears to be a rather extensive turning over of shipments originally routed over their line and turned over to the Rock Island Motor Transit.

Now if that condition prevailed, evidently the carrier who had been designated as the delivering carrier either did not perform the service, and refused to take the shipment, or else the connecting line carrier and that carrier were having difficulty over some settlement or dispute, is that right?

A. That is very likely correct.

Q. You were asked the question that if any of the existing carriers' service was curtailed or discontinued, if you would be able and glad to handle the traffic presently [fol. 2688] handled by such carrier. I assume that you had in mind, and had consulted with your counsel, that you had reference to the Rock Island Motor Transit Company?

A. Any other carrier or line that was curtailed in handling freight in our territory, we would certainly be glad to handle it.

Q. Now, Mr. Baker, it isn't your policy, is it, to make your success, and build your business upon the demise of somebody else?

A. It hasn't been.

[fol. 2689] Fred Millett, Ass't Traffic Agent for Rock Island Motor Transit Company. (R. 1338-1348), testified:

By Mr. Nolan:

Q. You are the same Mr. Fred Millett that was on the witness stand previously in this proceeding, are you not?

A. Yes, sir.

Q. You are the assistant traffic agent for the Rock Island Motor Transit Company?

A. That is correct.

Q. At our request did you examine the freight bills or delivery receipts tendered by Mr. Petersen of the Iowa-Nebraska Transportation Company, showing shipments handled by his company—first, originating at Chicago, into the territory involved in this case, which freight bills and delivery receipts cover the period of time from July 1 to and including August 15, 1951?

A. I did.

Q. And did you make a tabulation of those freight bills or delivery receipts for such shipments originating in Chicago?

A. I did.

Q. For destination to the points in Iowa involved in this case?

A. I did.

Q. And will you read and state into the record, starting with the town of Bettendorf, Iowa, and right down the list of all the points involved in this proceedings, and state the name of the town and the number of shipments, if any, that were handled by the Iowa-Nebraska Transportation [fol. 2690] Company, originating at Chicago, either direct or on interline, and handled by the Iowa-Nebraska Transportation Company to destination as shown by said freight bills?

A. Bettendorf, one. Davenport, 85. Walcott and Stockton, none. Durant, twelve. Wilton Junction, three, Moscow, none, Atalissa, one. West Liberty, none. Iowa City, 101. Cedar Rapids, none. Coralville, four. Tiffin, Oxford, Homestead and So. Amana, none. Marengo, seven. Ladora, one. Victor, none. Brooklyn, ten. Grinnell, 16. Kellogg, none. Newton, 52. Colfax, two. Mitchellville, six. Altoona, one. Des Moines, two. Dexter, one. Stuart, two. Menlo, one. Casey, two. Adair, five. Anita, one. Wiota, none. Atlantic, 48. Lewis, none. Oakland, nine. Council Bluffs, 29. Omaha, none. Muscatine, none. Marne, one. Walnut, two. Avoca, 14. Corley, none. Harlan, sixty-eight. Shelby, none. Hancock, none. Minden, none. Neloa, three. Underwood and Weston, none, and none to the rest of the points.

Q. Name them.

A. Audubon, Hamlin, Exira, Brayton, Griswold, Carson, Traynor, Kalona, and Wellman, none.

Examiner Carpenter: And the delivery receipts referred to cover a period from July 2 to August 15, is that right?

The Witness: That is right.

By Mr. Nolan:

Q. And that covered the shipments handled from Chicago by the Iowa-Nebraska Transportation Company during that period.

[fol. 2691] Now, Mr. Millett, did you at our request, examine the freight bills tendered by the Iowa-Nebraska Transportation Company covering shipments originating at Des Moines or transferred by interline carriers at Des Moines?

A. I did.

Q. To the Iowa-Nebraska Transportation Company for delivery to points on or picked up from points on the routes involved in this case?

A. I did.

Q. For what period of time did those bills cover?

A. July 2 to August 15, 1951.

Q. And did you make a tabulation of those bills?

A. I did.

Q. And that showed either shipments delivered to destination or shipments picked up at some points along the route involved here, is that right?

A. It showed a tabulation of 269 shipments, 206 of them were delivered to them at Des Moines by Watson Brothers.

Q. Delivered to who?

A. Iowa-Nebraska. And 35 by Brady.

Q. And were those to points to which Brady and Watson Brothers had authority to serve?

A. Yes, they were.

Q. How many shipments altogether did you examine on those freight bills?

A. I checked 269—241 of them were from a connecting line.

[fol. 2692] Q. By either Watson Brothers or Brady?

A. That is right.

Q. To points to which Watson Brothers or Brady had rights to serve, is that right?

A. That is right.

Q. Will you give us the names of the towns, and the number of shipments handled by the Iowa-Nebraska Transportation Company, which shipments originated on the Iowa-Nebraska Transportation Company's line at Des Moines, during the period covered by those bills, the same being from July 2, 1951, to and including August 15, 1951?

A. I can. Do you want me to read the whole list, or just the ones listed here?

Q. No, because we want them in the record.

Mr. Cohn: If he lists those that are on there, then we understand the other points have no shipments, is that right?

The Witness: That is what I was wondering.

By Mr. Nolan:

Q. Let's have the record complete on that. Now the towns which we are referring to are the same list of towns and points which you previously named in respect to shipments originating at Chicago on the line of the Iowa-Nebraska Transportation Company?

A. That is right.

Q. And points to which the Rock Island Motor Transit serves in this case?

A. That is right.

Q. All right, Now will you name the towns that you [fol. 2693] found shipments handled by the Iowa-Nebraska Transportation Company, during that time?

A. West Liberty, one.

Mr. Rice: May I interrupt to ask a question here?

Exam. Carpenter: Yes, sir.

Mr. Rice: Where do these shipments originate?

Mr. Nolan: At Des Moines.

Mr. Rice: Thank you.

The Witness: Marengo, 14, Ladora, 3, Brooklyn, 8. Grinnell, 68. Kellogg, three. Newton, 29. Colfax, 21. Mitchellville, 55. Altoona, 5. Dexter, 10. Stuart, 14. Menlo, 3. Casey, 12. Adair, 11. Anita, 6. Wiota, 1. Atlantic, 1. Avoca, 4.

By Mr. Nolan:

Q. Do I understand, of the remaining points, there being 50, altogether, that there were no shipments to any of the points except those that you named and the number of shipments to those points?

A. That is right.

Q. Now did you make a similar investigation of the freight bills tendered by the Iowa-Nebraska Transportation Company for shipments originating at Omaha for destination to the points involved in this proceedings, the said points being the same as you enumerated by name in connection with the Iowa-Nebraska Transportation Company's operations from Chicago?

A. Yes.

Q. And what period of time did those freight bills cover?

A. From Chicago to points——

[fol. 2694] Q. No, Omaha. For what period of time did that cover?

A. July 2, through August 1.

Q. Will you state now, what your investigation revealed as to the points to which shipments moved during that period of time, according to those freight bills, by the Iowa-Nebraska Transportation Company, and the number of shipments to such points?

A. The same list of towns was checked with the following results: The towns not named, there were no shipments. Davenport, 2. Iowa City, 4. Grinnell, 3. Des Moines, 2. Dexter, 5. Stuart, 23. Menlo, 4. Casey, 20. Adair, 33. Anita, 45. Wiota, 4. Atlantic, 143. Oakland, 211. Walnut, 54. Avoca, 150. Corley, 1. Harlan, 129. Minden, 3. Neola, 10.

Q. Then on the remaining 50 points, there were no shipments except the points that you named, and the number of those shipments, is that right?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Cross examine, Mr. Cohn.

Cross examination.

By Mr. Cohn:

Q. In your inspection of the bliss, Mr. Millett, did you ascertain whether the bills were the actual delivery receipts of the Iowa-Nebraska Transportation Company?

A. No, I didn't, unless I would check their actual delivery [fol. 2695] receipts, what they call their delivery receipts. These were the bills submitted.

Q. Don't the documents show actual signatures of the consignees on them which would be considered as delivery receipts, isn't that correct?

A. I would say so.

Q. They indicate the actual deliveries were made by the Iowa-Nebraska Company, of the shipments to which you have referred, to these various communities.

A. They do, but they didn't show dates.

Q. But I say, they do show actual delivery, do they not?

A. Not date of delivery.

Q. Yes, but not date of delivery. Is that the answer? Will you read the last answer?

Examiner Carpenter: Is that your answer, yes, not date of delivery?

The Witness: Yes.

By Mr. Cohn:

Q. In your investigation, did you determine whether the shipments covered embraced the general list of commodities?

A. They were general commodities.

Q. And as to the weight of the shipments, that many of them were very small shipments of less than 100 pounds, or what we call minimum shipments?

A. I didn't pay any attention to the weights.

Mr. Cohn: That is all.

Exam. Carpenter: Redirect?

[fol. 2696] Redirect examination.

By Mr. Nolan:

Q. Mr. Millett, there wasn't anything to indicate when the shipments were delivered by the Iowa-Nebraska Transportation Company, was there, by any of the freight bills, or delivery receipts?

A. No.

Q. You couldn't tell whether they were all delivered on one day, or whether they were delivered on consecutive days, isn't that true?

A. That is right.

Mr. Nolan: That is all.

Exam. Carpenter: Any recross?

Mr. Cohn: Nothing further.

Exam. Carpenter: You are excused.

(Witness excused.)

Mr. Nolan: The Interveners represented by me, the same being designated as the specified shippers and employees of the Rock Island Motor Transit Company, hereby offer to prove by the custodian, and person in charge of the official records of the Iowa State Commerce Commission, the fact that during the year 1939 the Iowa-Nebraska Transportation Company paid to the State of Iowa through the offices of the Iowa State Commerce Commission, the sum of $1,113.87 for the entire year of 1939 under the ton-mile tax law of the State of Iowa, said law imposing a tax of one-quarter of a cent per ton mile on the gross load of vehicles used and operated upon the highways of the state of Iowa in regular route operation for the transportation of freight [fol. 2697] both in the interstate and intrastate commerce. The grross load, or weight of the vehicle, including the weight of the vehicle and the cargo carried thereon, and said interveners propose to further show that by computation of said tax upon the physical operations of any motor carrier engaged within the purview and provisions of said ton-mile tax law, that for a vehicle having a gross weight of 40 thousand pounds, including both weight of the vehicle and load and cargo carried thereon, that the tax would be

approximately—or would be 5 cents per mile, and that for a vehicle operating across the state of Iowa a distance of at least 300 miles, which was so engaged, that the tax would be at least 15 dollars on such a physical operation, and that the tax paid by the Iowa-Nebraska Transportation Company would not have covered more than 80 operations across the state of Iowa by one vehicle in one direction during the year 1939 in accordance with the tax reported and paid by the Iowa-Nebraska Transportation Company for said year. The purpose of this evidence being to rebut the testimony of the witness, Mr. Petersen of the Iowa-Nebraska Transportation Company wherein he testified. He has been with the Iowa-Nebraska Transportation Company in a representative and executive capacity since the year 1938, and that the present operations of his company in regard to engaging in regular transportation in interstate commerce across the state of Iowa are a continuation of the operations conducted by his company since 1938, and insofar as the present route, or route under consideration in this proceeding is concerned, that the operations of his [fol. 2698] company today are approximately and substantially the same as they were in 1938.

Examiner Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: On the record.

Mr. Cohn: We object to the tender and offer to prove as being irrelevant and immaterial for any purpose in this proceeding for the further reason that the proposed testimony relates to operations conducted 11 years ago, which is a period far removed and remote from any operations which are properly to be considered as embraced within the issues in this proceeding under Section 210 (a) of part 2 of the Interstate Commerce Act. That the issue in this case is the ability of present existing motor carriers, such as Iowa-Nebraska Transportation Company to perform service at this time to points and places in the territory involved in the proceeding, and what may or may not have been the operations conducted during the year 1938 or 1939 or any other years far removed from the present time are not properly to be considered in this proceeding.

Mr. Houston: I join in the objection.

Mr. Rice: I join in the objection. May I say something off the record.

Exam. Carpenter: Off the record.

(Discussion off the record.)

Exam. Carpenter: On the record.

[fol. 2699] Mr. Nolan: In connection with the aforesaid tender and offer to prove, the said interveners propose to show that 1939 was the last year that the ton-mile tax was in force and in effect in the State of Iowa, that said ton-mile tax was repealed and succeeded by what is known as a compensation tax, on regular route carriers both in interstate and intrastate commerce in the State of Iowa, using regular routes.

Exam. Carpenter: The objection is sustained.

IN THE

Supreme Court of the United States

October Term, 1955

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., *Appellants*,

v.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, *Appellees*.

On Appeal from the United States District Court for the District of Columbia

JURISDICTIONAL STATEMENT

Appellants, American Trucking Associations, Inc., its Regular Common Carrier Conference, Iowa-Nebraska Transportation Company, Des Moines Transportation Company, Inc., Bruce Motor Freight, Inc., Western Transportation Company, McCoy Truck Lines, Inc., Brady Transfer and Storage Company, Motor Cargo, Inc., Gateway Transportation Company, and Bos Truck Lines, Inc., appeal from the judgment of the United States District Court for the District of Columbia, entered on January 27, 1956, sustaining the order of the Interstate Commerce Commission complained of, and submit this statement to show that the Supreme Court of the United States has jurisdiction of the appeal and that substantial questions are presented.

OPINION BELOW

The opinion of the United States District Court for the District of Columbia has not been reported, but a copy is attached hereto as Appendix A. A copy of the judgment of the District Court is attached hereto as Appendix B. The report of the Interstate Commerce Commission is reported at 63 M.C.C. 91. The order of the Interstate Commerce Commission has not been reported but is attached hereto as Appendix C.

JURISDICTION

This is an action to suspend, enjoin and set aside the report and order of November 22, 1954, of the defendant, Interstate Commerce Commission, in Docket No. MC-29130 (Sub-No. 70), *The Rock Island Motor Transit Company Common Carrier Application*, pursuant to Section 205(g) of the Interstate Commerce Act, 49 U.S.C. §305(g), Section 10 of the Administrative Procedure Act, 5 U.S.C. §1009, and Sections 1336, 1398, 2284 and 2321 to 2325, inclusive, of the Judicial Code, 28 U. S. C. §§1336, 1398, 2284 and 2321-2325. The judgment of the District Court was entered on January 27, 1956, and notice of appeal was filed in that court on March 23, 1956. The jurisdiction of the Supreme Court to review this decision by direct appeal is conferred by Section 1253 and 2101(b) of the Judicial Code, 28 U.S.C. §§1253 and 2101(b). The following decisions sustain the jurisdiction of the Supreme Court to review the judgment on direct appeal in this case: *United States* v. *Contract Steel Carriers, Inc.*, — U.S. —, No. 102, March 12, 1956; *United States* v. *Watson Bros. Transportation Co.*, — U.S. —, No. 490, January 9, 1956; *M. & M. Transportation Company* v. *United States*, 350 U.S. 857, 76 S. Ct. 102.

STATUTES INVOLVED

The National Transportation Policy, 49 U.S.C. preceding §1, and Sections 5(2)(a), 5(2)(b), 206, 207, 208(a) and 212 of the Interstate Commerce Act, as amended, 49 U.S.C. §§5(2)(a), 5(2)(b), 306, 307, 308(a) and 312, are set forth verbatim in Appendix D hereof.

QUESTIONS PRESENTED

1. Whether the record before the Interstate Commerce Commission in Docket No. MC-29430 (Sub-No. 70), *The Rock Island Motor Transit Company Common Carrier Application*, fails to support the Commission's report (63 M.C.C. 91) and order of November 22, 1954, authorizing unrestricted motor-carrier operations by the Rock Island Motor Transit Company, a wholly-owned subsidiary of the Chicago, Rock Island and Pacific Railroad Company, between the points directly involved, as well as between points throughout a much broader territory not directly involved in the proceeding before the Commission?

2. Whether the Interstate Commerce Commission, after authorizing the performance of restricted motor-carrier service by a railroad affiliate over routes acquired by purchase under Section 5 of the Interstate Commerce Act (49 U. S. C. §5) lacks the power to void such restrictions and authorize the performance of an unlimited motor-carrier service over the same routes through approval of an application subsequently filed by the same rail affiliate under Section 207 of the Interstate Commerce Act (49 U. S. C. §307)?

3. Whether, in any event, the Interstate Commerce Commission, in authorizing the performance of motor-carrier service by railroads or their affiliates, is required

by the provisions of the Interstate Commerce Act and the National Transportation Policy to limit the motor service to be rendered to that which is auxiliary to or supplemental of the rail service of the parent railroad?

The second question stated was dealt with in complete detail, both in brief and on oral argument before the District Court, by counsel for the rail labor groups, intervening plaintiffs below. As they can be expected to develop it fully before this Court, these appellants will not further treat with it herein.

STATEMENT

This is the first case, in the more than twenty years of federal regulation of motor carriers, in which the Supreme Court has been called upon to determine the perimeter of the Commission's power to authorize the performance of unlimited truck service by a railroad or its subsidiary. In all previous cases, with unimportant exceptions, the Commission has restricted the authority granted in order to assure that the motor service rendered would be limited to operations auxiliary to, or supplemental of, the train service of the railroad. The case at bar represents, for the first time, a complete abandonment by the Commission of all effort to protect the public interest in an independent motor-carrier industry through the imposition of restrictions upon rail operation of motor vehicles. And in so doing, as will be more fully developed later, the Commission has abruptly reversed its interpretation of the statutory safeguards enacted by Congress to assure the continued development and preserve the inherent advantages of an independent motor-carrier system. This violation of Congressional policy creates the novel question here presented. Not only does it do violence to the Commission's consistent interpretation, but it overrules what this Court decided, at least inferen-

tially, in the *Rock Island* and *Texas and Pacific* cases, *infra*.

Commission Approves Purchase of White Line for Restricted Operations.

The controversy herein can be said to have originated almost twenty years ago, when the Chicago, Rock Island and Pacific Railroad Company, a common carrier by railroad subject to part I of the Interstate Commerce Act, 49 U. S. C. §1 *et seq.*, hereinafter called the railroad, became interested in conducting motor-carrier operations paralleling its lines between Chicago, Illinois, and Omaha, Nebraska. Through a subsidiary company, The Rock Island Motor Transit Company, hereinafter called Motor Transit, the railroad on October 13, 1937, filed an application with the Interstate Commerce Commission for authority under Section 213 (now Section 5 of the Interstate Commerce Act, 49 U. S. C. §5) to purchase certain operating rights and property of White Line Motor Freight Company, Inc., and White Line Trucking Company, motor carriers of property subject to part II of the Act, 49 U.S.C. §301 *et seq.*, hereinafter collectively called White Lines. In its report conditionally approving the purchase, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 5 M.C.C. 451, dated April 1, 1938, the Commission, Division 5, after referring to the considerable testimony that had been offered to show how the correlation of truck-and-rail service over the routes would be effected, found, as required by statute (formerly §213, now §5(2)(b)), that the purchase would promote the public interest by enabling the railroad to use service by motor vehicle to public advantage in its operations and would not unduly restrain competition. Nevertheless the Commission expressly conditioned the authority granted "to such further limitations, restrictions, or modifications as we may find it necessary to impose or make in order to insure that service shall be auxiliary

or supplementary to train service of the railroad and shall not unduly restrain competition." Id., at 5 M.C.C. 458. The certificate, authorizing operations between Silvis, Illinois, and Omaha, Nebraska, and containing the foregoing reservation, was issued to Motor Transit on December 3, 1941.

Commission Approves Purchase of Frederickson for Unrestricted Operations.

Subsequently, on November 28, 1944, in *Rock Island M. Transit Co.—Purchase—Frederickson*, 39 M.C.C. 824, the Commission, Division 4, approved the purchase by Motor Transit of motor-carrier operating rights between Atlantic, Iowa, an intermediate point on the White Lines route, and Omaha, that would permit future truck operations by Motor Transit to follow the line of the railroad much more closely than had the previously-acquired routes. However, the report did not confine Motor Transit to auxiliary and supplemental service. Because of the inconsistency of having truck operations over one route restricted and those over an alternate route unrestricted, the Commission, on February 5, 1945, before the Frederickson certificate was issued, ordered both finance proceedings and the applicable compliance docket reopened for reconsideration.

Commission Reconsiders Both Cases and Restricts Combined Operations.

The Commission on reconsideration issued a comprehensive report, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 40 M.C.C. 457, dated March 4, 1946, wherein it found that the White Lines certificate should be amended and the Frederickson certificate restricted so as to require that all future operations conducted thereunder should be subject to five express conditions insuring auxiliary and supplemental service. Following this re-

port Motor Transit petitioned for reconsideration, and on June 9, 1947, the Commission reopened the proceedings for further hearing. The report of the Commission on further hearing, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 53 M.C.C. 567, dated April 11, 1949, affirmed the prior report, including the imposition of the auxiliary and supplemental restrictions.

District Court Invalidates Restrictions.

Thereupon Motor Transit filed a complaint in the U. S. District Court for the Northern District of Illinois, Eastern Division, to have the Commission's orders set aside. In *Rock Island Motor Transit Co. v. United States*, 90 F. Supp. 516, decided November 29, 1949, the three-judge court held, *inter alia*, that the imposition of the auxiliary and supplemental restrictions constituted a partial revocation of the operating rights acquired by Motor Transit and of the certificates evidencing such rights. As the procedures for the revocation of certificates prescribed by Section 212(a) of the Act, 49 U.S.C. §312(a), had not been followed, the court said, the relief sought should be granted.

Supreme Court Upholds Restrictions.

On appeal the Supreme Court reversed the decision of the District Court and sustained the Commission's imposition of the auxiliary and supplemental restrictions. The Court in its decision of February 26, 1951, in *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 71 S. Ct. 382, held that the modification of the White Lines certificate by the addition of the specific auxiliary and supplemental restrictions was not a partial revocation within the meaning of Section 212(a) and that, until the Frederickson certificate actually had been issued, the Commission could condition it in whatever manner it deemed necessary. The Court agreed with the Commis-

sion that, under the circumstances, it was required to restrict the motor carrier operating rights acquired pursuant to the provisions of Section 213 to the rendition of service auxiliary to, and supplemental of, the rail service of the railroad. Rehearing was denied by the Supreme Court on April 9, 1951. *United States* v. *Rock Island Motor Transit Co.*, 341 U. S. 906, 71 S. Ct. 609.

Commission Grants Temporary, then Permanent, Unrestricted Rights.

The certificate with the auxiliary and supplemental restrictions attached was issued to Motor Transit on September 11, 1951.[1] In the meantime, however, Motor Transit had applied for and had been granted temporary authority under Section 210a of the Interstate Commerce Act, 49 U. S. C. 310a, to operate over virtually identical routes to those it had acquired through the White Lines and Frederickson purchases under somewhat less re-

[1] The certificate was limited by the following restrictions:

1. The service to be performed by The Rock Island Motor Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not render any service to, or from, or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.

4. All contractual arrangements between the Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

strictive conditions than those contained in the certificate issued September 11, 1951.[2] On October 26, 1951, Motor Transit filed an application under Section 207 (49 U. S. C. 307) for permanent authority to perform unrestricted motor carrier operations over the pertinent routes. Hearings were held in this proceeding, docketed as No. 29130 (Sub-No. 70), on March 18 through April 21, 1952, and on May 20, 21, and 22, 1952, at Des Moines, Iowa. Almost a year later, on April 21, 1953, the examiner's recommended report and order was served upon the parties. After the filing of exceptions and replies thereto oral argument was had before the Commission on March 8, 1954. By its report and order of November 22, 1954, in *The Rock Island Motor Transit Company Common Carrier Application*, 63 M. C. C. 91, complained of herein, the Commission granted Motor Transit's Section 207 application, finding that the present and future public convenience and necessity required Motor Transit's operations between Silvis and Omaha free of any auxiliary and supplemental restrictions. The appellants herein, protestants and interveners in the Commission proceeding, on February 16, 1955, petitioned the Commission for reconsideration of its report, and Motor Transit and interveners in its behalf resisted. The petition for reconsideration was denied by order of the Commission dated July 6, 1955, served July 14, 1955, corrected copy served July 27, 1955.

District Court Upholds Commission's Grant.

Appellants, plaintiffs below, filed their complaint in the District Court on July 20, 1955. The case was heard by the District Court on December 15, 1955. The opinion was rendered January 11, 1956, and the judgment, January 27, 1956. The notice of appeal was filed March 23, 1956.

---

[2] The temporary authority was limited to shipments of 2,000 pounds (later increased to 5,000 pounds), and certain key-point restrictions were imposed.

THE QUESTIONS ARE SUBSTANTIAL

Scope of Review Admittedly Limited.

The task of the courts in reviewing determinations of an administrative agency, as in the instant case the Interstate Commerce Commission, is acknowledged to be a limited one. *I.C.C.* v. *Mechling*, 330 U. S. 567, 574, 67 S. Ct. 894, 898. The judicial function is exhausted when there is found to be a rational basis for the conclusions approved by the administrative body. *Mississippi Valley Barge Line Co.* v. *United States*, 292 U. S. 282, 287, 54 S. Ct. 692, 694. It is not for the court to weigh the evidence introduced before the Commission or to inquire into the soundness of the reasoning by which its conclusions are reached; these are matters left by Congress to the Commission. *United States* v. *Carolina Freight Carriers Corp.*, 315 U. S. 475, 482, 62 S. Ct. 722, 726; *Assigned Car Cases*, 274 U. S. 564, 580, 47 S. Ct. 727, 733. But Congress has placed limits on the Commission's statutory powers and it is the duty of the courts on judicial review to determine those limits. *East Texas Motor Freight Lines, Inc., et al.* v. *Frozen Food Express, et al.*, — U. S. —Nos. 162-164, April 23, 1956.

Here, Evidentiary Support Was Lacking.

Thus while appellants disagree with the ultimate finding by the Interstate Commerce Commission that the public convenience and necessity require the proposed motor common carrier operations of The Rock Island Motor Transit Company, they concede that there was sufficient evidence of record to enable the District Court to sustain the Commission's order insofar as it authorized a bona fide auxiliary and supplemental service to be rendered to and from such relatively minor points as Brooklyn, Colfax, Marengo, Newton, Oxford, Victor, Walcott and Wilton Junction. However, to the extent that the Com-

mission's order finds that unrestricted service by Motor Transit between such major points as Davenport, Cedar Rapids, Des Moines, Council Bluffs and Omaha is required by the public convenience and necessity, appellants contend that the District Court erred in failing to set aside the Commission's order for want of evidentiary support. In short, it is appellants' position that while the record before the Commission supports a grant of auxiliary and supplemental authority such as that embodied in the restricted certificate issued to Motor Transit on September 11, 1951, under which it has never conducted operations, it supports no more. Findings of the Interstate Commerce Commission of the existence of public convenience and necessity not supported by evidence must be set aside. *Interstate Common Carrier Council* v. *United States*, 84 F. Supp. 414, 422, affirmed *per curiam*, 338 U. S. 843, 70 S. Ct. 91.

Public Convenience and Necesity Must be Proved.

Under Section 206(a)(1) of the Interstate Commerce Act, 49 U.S.C. §306(a)(1) no common carrier by motor vehicle subject to the Act may operate on the highways without a certificate of public convenience and necessity. Section 207, 49 U.S.C. §307, provides for the issuance of the certificate on application if the proposed service "is or will be required by the present or future public convenience and necessity." A finding of public convenience and necessity was made by the Commission, 63 M.C.C. 108, but that ultimate finding must have been based on the proper statutory criteria and must have had the necessary factual findings to support it, *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60, 64, 65 S. Ct. 1490, 1492. The term "public convenience and necessity" as used in the Act is not defined by the statute, and the difficulty of laying down any general rule by which it can be determined whether or not certificates of public convenience and necessity should be issued long has been

recognized. *Cf. San Antonio & A.P. Ry. Co. Construction*, 111 I.C.C. 483, 493. The purpose underlying the requirement of a finding of public convenience and necessity was said by the Supreme Court in *Texas & N.O.R. Co.* v. *Northside Belt Ry. Co.*, 276 U.S. 475, 479, 48 S. Ct. 361, 362, to be "to prevent interstate carriers from weakening themselves by constructing or operating superfluous lines, and to protect them from being weakened by another carrier's operating in interstate commerce a competing line not required in the public interest." This statement of general purpose has been refined into a policy of the Interstate Commerce Commission of fostering sound economic conditions in the motor carrier industry by according existing motor carriers the right to transport all traffic which they can handle adequately, efficiently and economically in the territories served by them. *Clark, Callahan, Inc.*, 41 M.C.C. 693, 706; *Gabler Common Carrier Application*, 21 M.C.C. 743; *C & D Oil Co., Contract Carrier Application*, 1 M.C.C. 329, 332. As the three-judge court said in *Hudson Transit Lines* v. *United States*, 82 F. Supp. 153, 157, affirmed *per curiam*, 338 U.S. 802, 70 S. Ct. 59:

> The Commission has frequently held that under §207 of the Act, 49 U.S.C.A. §307, there must be an affirmative showing not only that a common carrier service is required in the convenience of the public but also that it is a necessity, and that the latter element includes a showing that present facilities are inadequate. Pan-American Bus Lines Operation, 1 M.C.C. 190, 203; Bluenose Bus Co. Ltd., Common Carrier Application, 1 M.C.C. 173, 176; Richard L. Richards, Extension of Operations, 6 M.C.C. 80, 81; Ohio Transportation Co., Common Carrier Application, 29 M.C.C. 513, 520; Royal Cadillac Service, Inc., Common Carrier Application, 43 M.C.C. 247, 259. The courts, too, have recognized inadequacy of existing facilities as a basic ingredient in the determination of public "necessity". Inland Motor Freight v. United

States, D. C. E. D. Wash. 60 F. Supp. 520, 524. See also Interstate Commerce Commission v. Parker, 326 U.S. 60, 69, 70, 74, 65 S. Ct. 1490, 89 L. Ed. 2051 and dissenting opinion of Mr. Justice Douglas. This does not mean that the holder of a certificate is entitled to immunity from competition under any and all circumstances. Chesapeake & O. R. Co. v. United States, 283 U.S. 35, 51 S. Ct. 337, 75 L. Ed. 824. The introduction of a competitive service may be in the public interest where it will secure the benefits of an improved service without being unduly prejudicial to the existing service. Interstate Commerce Commission v. Parker, supra. No such finding has here been made, nor is there any evidence to support such a finding.

No Evidence of Service Need at Larger Points.

In the instant proceeding the record lends no support to a finding that the public convenience and necessity require the service of Motor Transit between the major points referred to. Witness after witness testifying in support of the application by Motor Transit acknowledged that there was no need for such service. For example, Judge Carl Reed, Chairman of the Iowa State Commerce Commission, testified that service to the larger communities such as Davenport, Des Moines and Omaha was adequate, and that his Commission had no complaints regarding service to such points (R. 783). Similar acknowledgements were made by virtually each of the shipper and Chamber of Commerce witnesses. In short, out of the multitude of more than 150 witnesses offered by Motor Transit in support of its application not one gave the slightest indication of a need for this type of service.

In summation, there is no evidence in the record to buttress a finding of public need for additional service at the larger points. Any conclusion reached by the Commission that there is a public need for more motor carrier service at such points is not supported by basic facts

and, on the contrary, is actually refuted by the testimony of witnesses testifying on behalf of Motor Transit.

Commission Lacks Power to Grant Rights Here Conferred.

Even if the ultimate finding of public convenience and necessity had been sustained by basic facts, the issuance by the Interstate Commerce Commission of the order authorizing unrestricted motor-carrier operations by Motor Transit nevertheless would constitute reversible error as an unlawful attempt to circumvent the limitation of Section 5(2)(b) of the Act. That section, formerly Section 213 of the Motor Carrier Act, denied discretion to the Commission to approve a proposed acquisition of a motor carrier by a railroad except upon a finding that the transaction would promote the public interest, would enable the acquiring carrier to use service by motor vehicle to public advantage in its operations, and would not unduly restrain competition.

The Commission, heeding the clear intent of Congress, was quick to recognize that it could not give the railroads free opportunity to go into the kind of truck service which was strictly competitive with, rather than auxiliary to, their rail operations. In *Pennsylvania Truck Lines, Inc.—Control—Barker,* 1 M.C.C. 101, an acquisition proceeding under Section 213, the Commission declared that for railroads or their subsidiaries seeking to perform motor-carrier service, only those operations which were auxiliary to or supplemental of train service, could be approved. That construction since has been followed by the Commission.

In the instant proceeding, as stated earlier herein, the Supreme Court, when the case previously was before it, sustained the Interstate Commerce Commission's imposition of restrictions upon the motor-carrier operating rights acquired by Motor Transit, a railroad subsidiary,

in the White Lines and Frederickson purchases so as to insure that the acquired rights would be available solely for the rendition of auxiliary and supplemental service. By the order complained of the Commission would permit Motor Transit to operate without limitation over the identical routes acquired in the White Lines and Frederickson purchases and to serve the very same points. Moreover, unlike the earlier grant, the present award would enable Motor Transit to conduct operations unrelated to and independent of the rail service of the parent railroad company and in competition with that rail service as well as the service of independent motor carriers.

Appellants maintain that, irrespective of whether the grant of motor-carrier authority to a railroad or its subsidiary is based on an application filed under Section 5(2)(b) or Section 207, the Interstate Commerce Commission is without power to authorize the performance by such a railroad or subsidiary of unrestricted motor carrier service entirely divorced from the operations of the railroad and in direct competition with the service afforded by independent motor carriers and, indeed, the railroad itself. As the Interstate Commerce Commission and the government, in their joint brief filed in the Supreme Court in *United States* v. *Texas and Pacific Motor Transport Co.* so aptly said:[3]

> To be sure, section 207 does not contain a provision like that in section 213 (now sec. 5), imposing restrictions and requiring special findings in instances where the applicants are railroad subsidiaries. But that section does preclude the Commission from granting a certificate of operating authority unless it is able to find that the proposed operations are required by public convenience and neces-

[3] Nos. 38 and 39, October, 1950, term. See pp. 53-55 of joint ICC-government brief.

sity; and, in instances of applications by railroad subsidiaries, the Commission, in the practical administration of section 207, is confronted with substantially identical obstacles and problems as in cases of applications by railroad subsidiaries under section 213. Like Section 1 (18), which forbids the railroads from extending their lines unless authorized by the Commission based on findings that the extension is required by public convenience and necessity, section 207 was enacted by Congress to enable the Commission to control and prevent wasteful competition and destructive competitive practices. Although section 213 (now sec. 5) deals with the acquisition of existing motor carrier operations, which, as acquired by railroad subsidiaries, would presumably be taken out of the field of independent existing competition, nevertheless, the purposes of Congress' transportation policy, declared when enacting the Motor Carrier Act, refute any inference that Congress, while closing the door to railroad suppression of motor carrier competition by means of acquiring through a subsidiary existing motor carrier operations, at the same time left open the unfettered opportunity to do the same thing by means of obtaining through a subsidiary authority to institute new motor carrier operations. So far as opportunity for suppression of competition is concerned, there is little difference, particularly in the motor carrier field, between the opportunity afforded through the control by a railroad of an already existing motor carrier and that afforded by control of one newly created.

Commission Has Consistently Recognized Its Lack of Power.

While Section 207 of the Motor Carrier Act, regulating the extension of existing motor-carrier operations, contained no express limitation upon railroad participation in truck transportation as did Section 213, the Interstate Commerce Commission, as noted, has consistently acknowledged that it was required to read the Act as a

whole and to apply the policy reflected by the wording of Section 213 in interpreting and applying the provisions of Section 207. In *Kansas City S. Transport Co., Inc., Common Carrier Application*, 10 M.C.C. 221, an application proceeding under Section 207, the Commission relied on the principles and criteria of the *Barker* case and subjected the motor-carrier authority granted to the rail applicant to five conditions[4] intended to insure that the authorized operations would be auxiliary and supplemental to the train service of the railroad.

Thereafter in virtually every acquisitions proceeding under Section 213 and every application proceeding under Section 207 the Commission limited the motor authority granted to a railroad or its affiliate by the imposition of auxiliary and supplemental restrictions. The Commission's construction of the Act, as indicated by the *Barker* and *Kansas City Southern* cases, was called to the attention of Congress, which by the Transportation Act of 1940, 54 Stat. 919, *et seq.*, reenacted the pertinent sections in virtually identical form, thereby impliedly ratifying the Commission's prior construction.

---

[4] 1. The service to be performed by applicant shall be limited to service which is auxiliary to, or supplemental of, rail service of the Kansas City Southern Railway Company or the Arkansas Western Railway, hereinafter called the railways.

2. Applicant shall not serve, or interchange traffic at, any point not a station on a rail line of the railways.

3. Shipments transported by applicant shall be limited to those which it receives from or delivers to either one of the railways under a through bill of lading covering, in addition to movement by applicant, a prior or subsequent movement by rail.

4. All contractual arrangements between applicant and the railways shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to restrict applicant's operations to service which is auxiliary to, or supplemental of, rail service. (10 M.C.C. 240)

This Court Has Recognized Commisison's Lack of Power.

The question of the Commission's construction of the pertinent provisions of the Act was before the Supreme Court in the *Rock Island* case, *supra*, and *United States* v. *Texas & Pacific Motor Transport Co.*, 340 U.S. 450, 71 S. Ct. 422. The former was an appeal from a lower court decision setting aside an order of the Commission imposing auxiliary and supplemental restrictions on the authority to operate trucks over the identical routes involved in the instant proceeding, acquired by Motor Transit by purchase from independent motor carriers. In its report, 40 M.C.C. 457, the Commission comprehensively reviewed the legislation, its history and the Commission's construction thereof and concluded, *inter alia*, that the accomplishment of the purposes forming the National Transportation Policy, 49 U.S.C. preceding § 1, *required* that grants to railroads or their affiliates of authority to operate as common carriers by motor vehicle or to acquire such authority by purchase or otherwise should be so conditioned as definitely to limit the future service by motor vehicle to that which is auxiliary to, or supplemental of, train service.

In its brief to the Supreme Court containing the legal argument applicable to both the *Rock Island* and *Texas & Pacific* cases, the Commission, joined by the United States, said that the first prerequisite to Commission approval is that the service by motor vehicle be for use by the railroad in its operations. If the operations of the motor-carrier subsidiary were not a part of the railroad's operations at all, the Commission would not be able to make a determination as to the further prerequisites that the operations would promote the public interest and would not unduly restrain competition.[5]

---

[5] Footnote 13, pp. 52-53 of joint I.C.C.-Government brief.

The Supreme Court concurred, sustaining the Commission's construction that the National Transportation Policy requires that motor-carrier operations of railroads and their affiliates be auxiliary to and supplemental of train service. The Court approved the Commission's reading into Section 207 the requirements of Section 5(2)(b) (formerly part of Section 213), thus assuring a consistent attitude toward the use of motor carriers by railroads. Following the Court's decisions in the *Rock Island* and *Texas & Pacific* cases and referring thereto the Commision announced that legislation was required if there is a need in the public interest for more liberal treatment of the railroads in their endeavors to conduct motor-carrier operations not auxiliary or supplemental of train service. No such legislation, although continually recommended for enactment by the railroads, has been forthcoming.

The Commission would rationalize its grant of unrestricted authority to Motor Transit by the mere assertion that the evidence justified an exception to the policy of the *Kansas City Southern* case, 63 M.C.C. 108. However, in that proceeding the Commission recognized that the language of Section 213 (now Section 5) showed that Congress had not been convinced that the railroads should be given "free opportunity to go into the kind of truck service which is strictly competitive with, rather than auxiliary to, their rail operations." 10 M.C.C. 237. No exception to that policy of Congress is permissible as none was provided by Congress itself. True, the Commission in the past has attempted to find exceptional circumstances which would permit a departure from the policy of the *Kansas City Southern* case. These actions by the Commission were taken largely in proceedings that were uncontested, and none is known to have been challenged in court and sustained. However, even if these Commission proceedings constituted valid precedent

for departures, under exceptional circumstances, from the well-established policy of restricting railroad truck operations, that line of Commission cases is clearly distinguishable from the instant case.

The Division 5 report upon which defendants and supporting interveners placed such great reliance below, *St. Andrews Bay Transp. Co. Extension of Operations*, 3 M.C.C. 711, amply illustrates the cleavage that separates the instant case from those proceedings in which the Commission has attempted to fashion an "exceptional circumstances" doctrine. There the railroad subsidiary sought authority to operate between Dothan, Ala., with a population of 17,000, and Columbus, Ga., with a population of 53,000, a distance of 120 miles. Only one motor carrier who lacked direct authority to serve most of the points protested the proposed operation, and there was testimony that no common-carrier truck service had been maintained between the terminal and intermediate points. The decision, which preceded the Commission's order in the *Kansas City Southern* case, that in effect overruled it, was never passed upon either by the entire Commission or the courts.

The Commission's Decision Constitutes a Departure from the Statute.

The Commission's report and order complained of herein, unless set aside, would confer upon Motor Transit a broad grant of authority to conduct motor-carrier operations not auxiliary to or supplemental of train service. In the area directly involved comprising a total of approximately 500 miles of routes, serving such important points as Chicago, DesMoines, Cedar Rapids and Omaha, the proposed operations would constitute a complete departure from the type of service contemplated by the statute and heretofore authorized by the Commission.

Further, the record before the Commission makes it clear that the railroad subsidiary, by "tacking" the authority granted by the Commission to authority already held, would be able to perform completely unrestricted motor-carrier service over a much broader area than that directly involved in the proceeding before the Commission, including, for example, service between such important points as the Twin Cities and Kansas City. This without a scintilla of evidence in the record before the Commission of any need for such additional motor-carrier service and in the teeth of the Commission's holding, at an earlier stage of this same proceeding, that a railroad applicant for motor-carrier operating authority "has a special burden, not by reason of any attitude or action on our part, but by reason of the very circumstance that it is a railroad."[6]

Whether it be viewed as lifting of auxiliary and supplemental restrictions imposed on motor carrier operating authority previously acquired by purchase or as a grant of new authority not subject to auxiliary and supplemental restrictions, the Commission's report and order complained of herein violates the letter and the spirit of the law, to wit, the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act, and is contrary to the decisions of the Commission and the Supreme Court. The report and order ignores completely the first prerequisite to Commission approval that the service by motor vehicle be for use by the parent railroad *in its operations*. It pays lip service only to the further prerequisite, which it could not validly reach, that the proposed operation is in furtherance of the public interest and will not unduly restrain competition. However, even assuming the Commission had been able to

---

[6] *Rock. Island Mtr. Transit Co.—Purchase—White Line M. Frt., supra*, at 40 M. C. C. 474. Report of the entire Commission on reconsideration.

make the necessary findings, the only operations that could be approved nevertheless would be auxiliary and supplemental operations, and the Commission would be required, as it is in the case of every grant to a railroad or to a railroad affiliate of authority to operate as a common carrier by motor vehicle or to acquire such authority by purchase or otherwise, to condition the authority so as definitely to limit future service by motor vehicle to that which is auxiliary to, or supplemental of, train service.

The import of the Commission's grant of unrestricted motor-carrier authority to Motor Transit far transcends consideration of the immediate needs of the shippers and receivers of freight in the affected area, the willingness and ability of the existing motor carriers to satisfy that need, or the impact of the added competition of a railroad sustained, State-protected subsidiary motor carrier.[7] Being the first case involving an attempt to award unrestricted motor rights of such magnitude to a railroad

---

[7] Motor Transit is the only motor carrier with intrastate authority to operate over U. S. Highway 6 between the Iowa points involved herein. This intrastate monopoly, conferred by the Iowa State Commerce Commission, enables Motor Transit to transport in the same vehicle combined loads of interstate and intrastate traffic to and from the small Iowa points, much more economically than can the independent motor carriers which are denied the right to transport intrastate freight. The Commission, clearly aware of this, nevertheless subordinated its duty, set forth in the *Parker* case, to guard against a transportation monopoly, in favor of Iowa's policy directly to the contrary, by authorizing Motor Transit to handle interstate traffic to and from the same small Iowa points with no restrictions imposed. If the Commission's decision is allowed to stand, the Iowa intrastate monopoly granted Motor Transit will inevitably ripen into a complete monopoly, both of inter- and intrastate freight. This is bad enough in itself, but the Commission grossly compounds its error by allowing Motor Transit to conduct unrestricted operation between major cities throughout the parent railroad's system, in Iowa and elsewhere, despite the absence of a shred of record evidence to support a need for such service.

or its subsidiary, this proceeding presents the basic question of the proper relationship between the rails and the trucks. Is the one mode of transportation to continue the measure of independence of the control of the other that has existed in the past? Is an independent motor carrier industry, contemplated by the National Transportation Policy and the Interstate Commerce Act to be supplanted, through Commission fiat, by fully integrated transportation rendered by the railroads and their wholly-owned subsidiaries?

The Interstate Commerce Commission from the time of the *Barker* decision until its order complained of herein has recognized its duty of confining motor-carrier operations of railroads or their subsidiaries to service auxiliary to, and supplemental of, their rail service. In accordance with the Congressional mandate it has sought to maintain the integrity of the independent motor-carrier industry. To be sure, appellants believe the Commission has been altogether too generous in authorizing the railroads to engage in over-the-road trucking operations in the performance of so-called auxiliary and supplemental service. It has seemed to gloss over the statutory requirements that the railroads establish that their acquisition of existing motor-carrier operating authority is in the public interest (Section 5(2)(b)) or that their inauguration of a new motor-vehicular operation is required by the public convenience and necessity (Section 207). Instead, it has permitted railroads to operate intercity trucks in feeder service and service in substitution for way freight trains upon a mere showing that the railroads thereby could achieve certain economies; the Commission's decisions "construe the statute as if 'railroad convenience and necessity' rather than 'public convenience and necessity' were the standard." Mr. Justice Douglas, dissenting in the *Parker* case, *supra*, at 326 U.S. 74, 65 S. Ct. 1497. But even though its standard of pub-

lic need in the case of rail applications to perform truck service has been different (and much easier to satisfy) than has been the case in connection with applications by independent motor carriers, nevertheless the Commission has never heretofore authorized a railroad to conduct unrestricted trucking operations virtually paralleling its lines throughout its entire system.

By the departure from its policy that the decision herein represents the Interstate Commerce Commission would permit the compete integration of truck and rail transportation. Not confined to operations auxiliary to, and supplemental of, the train service of the parent railroad company, the grant of unrestricted motor-carrier operating authority would enable the railroad subsidiary to compete all out with independent motor carriers and indeed the railroad itself. The subsidiary, relying on the financial and soliciting resources of the parent railroad, would be such a potent competitor that it soon would be able to dominate the field and eventually drive the independent motor carriers from the roads. A motor industry owned or controlled by the railroads certainly was not what Congress had in mind.[8] The appellants here are not objecting to the use of trucks by the railroads in pick-up and delivery services, feeder service or service in substitution for way freight trains. They are, however, objecting to the entry of the railroads into the trucking business through subsidized motor affiliates rendering an unrestricted trucking operation such as would otherwise be rendered by the independent motor

[8] See, for example, the statement of Senator Wheeler, chairman of the Senate Committee on Interstate Commerce, relating to the language now embodied in the proviso of §5(2)(b), that "with this limitation, it will be possible for the Commission to allow acquisitions which will make for coordinated or more economical service and at the same time to protect against the monopolization of highway carriage by rail, express, or other interests." 79 Cong. Rec. 5655, April 15, 1935.

carriers. In short, our objection goes to the fundamental departure from policy which is inherent in the Commission's decision—the complete abandonment of the rule, consistently applied since motor carriers came under federal regulation, that railroad use of motor vehicles must be so tied in with their train operations as to enable the Commission to hold that the motor service authorized is for the purpose of improving the railroad's train service, as distinguished from the performance of a completely independent motor service. Appellants believe that Congress by the enactment of the National Transportation Policy and the provisions of Sections 5(2)(b) and 207 of the Interstate Commerce Act made it abundantly clear that the Commission was not empowered to authorize railroads to perform motor-carrier service completely divorced from their train operations.

The Interstate Commerce Commission by promulgating the order complained of went counter to the Congressional direction and exceeded its lawful authority.

CONCLUSION

For the foregoing reasons it is urged that jurisdiction be noted and that the judgment of the District Court be reversed and the case remanded to the District Court for disposition consistent with the Supreme Court's opinion.

CERTIFICATE OF SERVICE

I, Peter T. Beardsley, one of the attorneys for appellants herein, and a member of the bar of the Supreme Court of the United States, hereby certify that, on the eighteenth day of May, 1956, I served copies of the foregoing document on the several parties thereto, as follows:

1. On the United States, by mailing a copy in a duly addressed envelope, with postage prepaid, to Oliver Gasch, United States Attorney for the District of Columbia, at Room 3600-A, United States Court House, Washington, D. C.; and by mailing a copy in a duly addressed envelope, with postage prepaid, to The Solicitor General, Department of Justice, Washington 25, D. C.

2. On the Interstate Commerce Commission, by mailing a copy in a duly addressed envelope with postage prepaid, to Robert Ginnane, Esq., its General Counsel, at the offices of the Commission, Washington 25, D. C.

3. On the Rock Island Motor Transit Company, Employees' Committee of Rock Island Motor Transit Co., Davenport Chamber of Commerce, et al., and Shippers' Committee, intervening defendants, by mailing copies in a duly addressed envelope, with postage prepaid, to Arthur L. Winn, Jr., Esq., their attorney, at 743 Investment Bldg., Washington, D. C.

4. On the Railway Labor Executives' Association, Brotherhood of Railroad Trainmen, and Order of Railway Conductors and Brakemen, intervening plaintiffs, by mailing copies, in a duly addressed envelope, with postage prepaid, to James L. Highsaw, Jr., their attorney, at 620 Tower Bldg., Washington, D. C.

Defendants.

Civil Action No. 3171-55

MEMORANDUM OPINION

Before PRETTYMAN, Circuit Judge, and PINE and HOLTZOFF, District Judges, sitting as a statutory three-judge court.

PRETTYMAN, *Circuit Judge*: The Chicago, Rock Island and Pacific Railroad Company is a through trunk-line railroad operating, so far as is here pertinent, across the State of Iowa from Davenport to Council Bluffs. It owns a subsidiary, called herein "Motor Transit", which owns operating rights and property as a motor carrier on routes paralleling or stemming from the Railroad route. The motor carrier certificates have heretofore contained limitations requiring that the motor service be auxiliary or supplementary to the rail service, but these limitations were stayed and have never been enforced. The motor carrier applied for a certificate without the restrictions. The ap-

plication was opposed by other motor carriers. After extensive proceedings the Interstate Commerce Commission granted the application, subject to the conditions that there might be attached such reasonable terms, conditions and limitations as the public convenience and necessity might require and that all contractual arrangements with the Railroad should be reported to the Commission and be subject to its revision. Petition for reconsideration having been denied, this action to set aside the order was brought by motor carriers operating in the same general area as Motor Transit.

The nub of the controversy is in two parts, (1) whether the Commission has power to grant a certificate to a motor carrier wholly owned by a railroad without a restriction that the service shall be auxiliary or supplementary to the railroad service and (2), if so, whether the findings of the Commission to the effect that the public convenience and necessity justified the grant in the present case were supported by evidence in the record.

Two sections of the Interstate Commerce Act, as now amended, are involved. Section 5(2)(b)[1] provides that, whenever a carrier by railroad, or its subsidiary, is an applicant for approval of a transaction involving a motor carrier, the Commission shall not approve unless it finds, *inter alia*, that the transaction will enable the carrier to use service by motor vehicle to public advantage in its operations. This section governs the acquisition of motor carriers by railroads. Section 207(a) of the Act[2] provides that a certificate shall be issued to any qualified applicant therefore if it is found, *inter alia*, that the proposed service is or will be required by the present or future public convenience and necessity. This latter section (207(a)) does

---

[1] Formerly Sec. 213(a)(1), amended Aug. 2, 1949, 63 STAT. 485, 49 U.S.C.A. § 5(2)(b).

[2] As enacted Aug. 9, 1935, 49 STAT. 551, 49 U.S.C.A. § 307(a).

not contain the requirement which appears in the former section (5(2)(b)) that the proposed service must be used in the operation of the railroad if a railroad is the applicant. It is agreed that the requirement that the service be used in the operation of the railroad applicant means that the service must be auxiliary or supplementary to the rail service.

Plaintiffs say that the requirement which appears in Section 5(2)(b) must be read into Section 207(a) and therefore controls in the issuance of certificates where a railroad, or its subsidiary, is the applicant. The Commission says the requirement is notably omitted from the terms of Section 207(a); that the policy, not the terms, of the requirement applies to the issuance of certificates under 207(a). It says a policy requirement is not so rigid as a flat requirement in terms but is flexible and permits a grant in exceptional circumstances where the Commission finds that the public interest, convenience and necessity require the grant.

We agree with the contention of the Commission in the foregoing respect. The case concerns the issuance of a certificate.[3] Certainly the terms of the requirement as to auxiliary and supplementary service do not appear in Section 207(a). It is equally certain that the policy of the requirement, being a basic policy in the statute, does apply. The difference between a rigid requirement and an applicable policy is one of flexibility and permits the Commission to be governed in exceptional circumstances by the needs of the public convenience and necessity.

This brings us to the second main part of the contro-

[3] See Interstate Commerce Comm'n v. Parker, 326 U.S. 60, 89 L.Ed. 2051, 65 S. Ct. 1490 (1945); United States v. Rock Island Co., 340 U.S. 419, 428, 431, 442, 95 L.Ed. 391, 71 S. Ct. 382 (1951); United States v. Texas & Pac. Co., 340 U.S. 450, 95 L.Ed. 509, 71 S.Ct. 422 (1951).

versy. The traffic consists of intrastate traffic, rail originated traffic, and interstate "peddle" traffic. The rail originated traffic goes, through natural course of events, to Motor Transit. That service is largely auxiliary or supplementary to the train service and is not actually involved in the controversy. Certificates for the intrastate traffic are issued by the State of Iowa, and that State follows the usual rule of public utility regulation that where the business makes economically feasible only one carrier it will certificate only one. It has certificated Motor Transit for the intrastate traffic along the routes here involved, and so that traffic is not actually involved in the present controversy. The so-called interstate peddle operation is one in which the motor carrier, starting with a full truckload, moves interstate and distributes that load at various points of destination; or, in reverse, a truck picks up parts of loads at various points of origin and eventually transports interstate a full truckload. This is really the traffic which is involved in the pending case. The Commission found, in effect, that this peddle operation, standing alone, is not a profitable one and that the trend of motor carriers operating in Iowa has been to refrain from rendering this service; that the business communities along the routes need this sort of service; and that Motor Transit, already having rail originated and intrastate traffic, can readily render this additional service. As a matter of fact Motor Transit has operated since its first acquisition in 1938 without the restrictions here in issue. During that period it satisfactorily performed this particular service. Actually the result of sustaining the motor carriers' position would be a privilege to them of giving the service now rendered by Motor Transit if they so desire and refusing to give it when it is economically not feasible. That would not appear to serve the public interest.

We think the position of the Commission is well taken on the evidence. Voluminous testimony was produced. The

findings are extensive. The conclusion that the grant appears necessary in the public interest is well founded. Judgement will be rendered for the defendants.

CIVIL ACTION NO. 3171-55

JUDGMENT

This action, to enjoin and set aside an order of the Interstate Commerce Commission, having come on for final hearing on December 15, 1955, before a duly constituted three-judge District Court, convened pursuant to Sections 2284 and 2321-2325, Title 28, United States Code, consist-

ing of the undersigned judges; and the Court having considered the pleadings and evidence, and the briefs and arguments of counsel for the respective parties; and being fully advised in the premises; and having on January 11, 1956, filed herein its opinion holding that the order of the Interstate Commerce Commission herein assailed is valid and that judgment will be rendered for defendants; now in accordance with the said opinion,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED That the relief sought herein be, and the same hereby is, denied, and judgment be, and the same hereby is, rendered for the defendants, with costs assessed against the plaintiffs and intervening plaintiffs.

This 27th day of January, 1956.

APPENDIX C

ORDER

At a General Session of the INTERSTATE COMMERCE COMMISSION, held at its office in Washington, D. C., on the 22nd day of November, A. D., 1954.

No. MC-29130 (Sub. No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY COMMON CARRIER APPLICATION

Investigation of the matters and things involved in this proceeding having been made, and the Commission, on the date hereof, having made and filed a report herein containing its findings of fact and conclusions thereon, which report is hereby made a part hereof:

It is ordered, That said application, except to the extent granted in said report, be, and is hereby, denied.

By the Commission.

GEORGE W. LAIRD,
Secretary.

APPENDIX D

NATIONAL TRANSPORTATION POLICY

[*September 18, 1940.*] [*49 U. S. C., preceding §§ 1, 301, 901, and 1001.*] It is hereby declared to be the national transportation policy of the Congress to provide for fair and impartial regulation of all modes of transportation subject to the provisions of this Act, so administered as to recognize and preserve the inherent advantages of each; to promote safe, adequate, economical, and efficient service and foster sound economic conditions in transpor-

tation and among the several carriers; to encourage the establishment and maintenance of reasonable charges for transportation services, without unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices; to cooperate with the several States and the duly authorized officials thereof; and to encourage fair wages and equitable working conditions;—all to the end of developing, coordinating, and preserving a national transportation system by water, highway, and rail, as well as other means, adequate to meet the needs of the commerce of the United States, of the Postal Service, and of the national defense. All of the provisions of this Act shall be administered and enforced with a view to carrying out the above declaration of policy.

* * * * *

COMBINATIONS AND CONSOLIDATIONS OF CARRIERS

SEC. 5. [*As amended August 24, 1912, February 28, 1920, June 10, 1921, June 16; 1933, June 19, 1934, August 9, 1935, September 18, 1940, and August 2, 1949.*] [*49 U. S. C. § 5.*]

* * * * *

(2) (a) It shall be lawful, with the approval and authorization of the Commission, as provided in subdivision (b)—

(i) for two or more carriers to consolidate or merge their properties or franchises, or any part thereof, into one corporation for the ownership, management, and operation of the properties theretofore in separate ownership or for any carrier, or two or more carriers jointly, to purchase, lease or contract to operate the properties, or any part thereof, of another; or for any carrier or two or more carriers jointly, to acquire control of another through ownership of its stock or otherwise; or for a person which is

not a carrier to acquire control of two or more carriers through ownership of their stock or otherwise; or for a person which is not a carrier and which has control of one or more carriers to acquire control of another carrier through ownership of its stock or otherwise; or

(ii) for a carrier by railroad to acquire trackage rights over, or joint ownership in or joint use of, any railroad line or lines owned or operated by any other such carrier, and terminals incidental thereto.

* * * * *

(b) Whenever a transaction is proposed under subparagraph (a), the carrier or carriers or person seeking authority therefor shall present an application to the Commission, and thereupon the Commission shall notify the Governor of each State in which any part of the properties of the carriers involved in the proposed transaction is situated, and also such carriers and the applicant or applicants (and, in case carriers by motor vehicle are involved, the persons specified in section 205 (e)), and shall afford reasonable opportunity for interested parties to be heard. If the Commission shall consider it necessary in order to determine whether the findings specified below may properly be made, it shall set said application for public hearing; and a public hearing shall be held in all cases where carriers by railroad are involved unless the Commission determines that a public hearing is not necessary in the public interest. If the Commission finds that, subject to such terms and conditions and such modifications as it shall find to be just and reasonable, the proposed transaction is within the scope of subparagraph (a) and will be consistent with the public interest, it shall enter an order approving and authorizing such transaction, upon the terms and conditions, and with the modifications, so found to be just and reasonable: *Provided*, That if a carrier by railroad subject to this part, or any person which is controlled by such a carrier, or affiliated therewith within the

meaning of paragraph (6), is an applicant in the case of any such proposed transaction involving a motor carrier, the Commission shall not enter such an order unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage in it operations and will not unduly restrain compition.

* * * *

APPLICATION FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

SEC. 206. [*August 9, 1935, amended June 29, 1938, September 18, 1940, September 1, 1950.*] [*49 U.S.C., § 306.*]

(a) (1) Except as otherwise provided in this section and in section 210a, no common carrier by motor vehicle subject to the provisions of this part shall engage in any interstate or foreign operation on any public highway, or within any reservation under the exclusive jurisdiction of the United States, unless there is in force with respect to such carrier a certificate of public convenience and necessity issued by the Commission authorizing such operations: *Provided, however*, That, subject to section 210, if any such carrier or predecessor in interest was in bona fide operation as a common carrier by motor vehicle on June 1, 1935, over the route or routes or within the territory for which application is made and has so operated since that time, or if engaged in furnishing seasonal service only, was in bona fide operation on June 1, 1935, during the season ordinarily covered by its operation and has so operated since that time, except in either instance as to interruptions of service over which the applicant or its predecessor in interest had no control, the Commission shall issue such certificate without requiring further proof that public convenience and necessity will be served by such operation, and without further proceedings, if application for such certificate is made to the Commis-

sion as provided in paragraph (b) of this section and within one hundred and twenty days after this section shall take effect, and if such carrier was registered on June 1, 1935, under any code of fair competition requiring registration, the fact of registration shall be evidence of bona fide operation to be considered in connection with the issuance of such certificate. Otherwise the application for such certificate shall be decided in accordance with the procedure provided for in section 207 (a) of this part and such certificate shall be issued or denied accordingly. Pending the determination of any such application the continuance of such operation shall be lawful: *And provided further*, That this paragraph shall not be so construed as to require any such carrier lawfully engaged in operation solely within any State to obtain from the Commission a certificate authorizing the transportation by such carrier of passengers or property in interstate or foreign commerce between places within such State if there be a board in such State having authority to grant or approve such certificates and if such carrier has obtained such certificate from such board. Such transportation shall, however, be otherwise subject to the jurisdiction of the Commission under this part.

(2) Unless otherwise specifically indicated in such certificate, the holder of any certificate heretofore issued under this part, or hereafter issued under this part pursuant to an application filed on or before the date on which this paragraph takes effect, authorizing the holder thereof to engage as a common carrier by motor vehicle in the transportation in interstate or foreign commerce of passengers or property over any route or routes or within any territory, may without making application under this section engage, to the same extent and subject to the same terms, conditions, and limitations, as a common carrier by motor vehicle in the transportation

of passengers or property, as the case may be, over such route or routes or within such territory, in commerce between places in the United States and places in Territories or possessions of the United States.

(3) Subject to the provisions of section 210, if any person (or its predecessor in interest) was in bona fide operation on March 1, 1950, over any route or routes or within any territory, as a common carrier engaged in the transportation of passengers or property by motor vehicle in commerce between any place in the United States and any place in a Territory or possession of the United States, and has so operated since that time (or if engaged in furnishing seasonal service only, was in bona fide operation on March 1, 1950, during the season ordinarily covered by its operations and has so operated since that time), except in either instance as to interruptions of service over which such applicant or its predecessor in interest had no control, the Commissioner shall issue a certificate authorizing such operations without requiring further proof that public convenience and necessity will be served thereby, and without further proceedings, if application for such certificate is made to the Commission as provided in paragraph (b) of this section and within one hundred and twenty days after the date on which this subparagraph takes effect. Pending the determination of any such application, the continuance of such operation without a certificate shall be lawful. Any carrier which, on the date this subparagraph takes effect, is engaged in an operation of the character specified in the foregoing provisions of this subparagraph, but was not engaged in such operation on March 1, 1950, may under such regulations as the Commission shall prescribe, if application for a certificate is made to the Commission within one hundred and twenty days after the date on which this subparagraph takes effect, continue such

operation without a certificate pending the determination of such application in accordance with section 207 (a).

(b) Application for certificates shall be made in writing to the Commission, be verified under oath, and shall be in such form and contain such information and be accompanied by proof of service upon such interested parties as the Commission shall, by regulation, require. Any person, not included within the provisions of paragraph (a) of this section, who or which is engaged in transportation in interstate or foreign commerce as a common carrier by motor vehicle when this section takes effect may continue such operation for a period of one hundred and twenty days thereafter without a certificate and, if application for such certificate is made to the Commission within such period, the carrier may, under such regulations as the Commission shall prescribe, continue such operation until otherwise ordered by the Commission.

ISSUANCE OF CERTIFICATE

SEC. 207. [*August 9, 1935.*] [*49 U.S.C., § 307.*] (a) Subject to section 210, a certificate shall be issued to any qualified applicant therefor, authorizing the whole or any part of the operations covered by the application, if it is found that the applicant is fit, willing, and able properly to perform the service proposed and to conform to the provisions of this part and the requirements, rules, and regulations of the Commission thereunder, and that the proposed service, to the extent to be authorized by the certificate, is or will be required by the present or future public convenience and necessity; otherwise such application shall be denied: *Provided, however*, That no such certificate shall be issued to any common carrier of passengers by motor vehicle for operations over other

than a regular route or routes, and between fixed termini, except as such carriers may be authorized to engage in special or charter operations.

(b) No certificate issued under this part shall confer any proprietary or property rights in the use of the public highways.

TERMS AND CONDITIONS OF CERTIFICATE

SEC. 208. [*August 9, 1935.*] [*49 U.S.C., § 308.*] (a) Any certificate issued under section 206 or 207 shall specify the service to be rendered and the routes over which, the fixed termini, if any, between which, and the intermediate and off-route points, if any, at which, and in case of operations not over specified routes or between fixed termini, the territory within which, the motor carrier is authorized to operate; and there shall, at the time of issuance and from time to time thereafter, be attached to the exercise of the privileges granted by the certificate such reasonable terms, conditions, and limitations as the public convenience and necessity may from time to time require, including terms, conditions, and limitations as to the extension of the route or routes of the carrier, and such terms and conditions as are necessary to carry out, with respect to the operations of the carrier, the requirements established by the Commission under section 204 (a) (1) and (6): *Provided, however*, That no terms, conditions, or limitations shall restrict the right of the carrier to add to his or its equipment and facilities over the routes, between the termini, or within the territory specified in the certificate, as the development of the business and the demands of the public shall require.

SUSPENSION, CHANGE, REVOCATION, AND TRANSFER OF CERTIFICATES, PERMITS, AND LICENSES

SEC. 212. [*August 9, 1935, amended June 29, 1938, September 18, 1940.*] [*49 U.S.C., § 312.*] (a) Certificates, permits, and licenses shall be effective from the date specified therein, and shall remain in effect until suspended or terminated as herein provided. Any such certificate, permit, or license may, upon application of the holder thereof, in the discretion of the Commission, be amended or revoked, in whole or in part, or may upon complaint, or on the Commission's own initiative, after notice and hearing, be suspended, changed, or revoked, in whole or in part, for willful failure to comply with any provision of this part, or with any lawful order, rule, or regulation of the Commission promulgated thereunder, or with any term, condition, or limitation of such certificate, permit, or license: *Provided, however*, That no such certificate, permit, or license shall be revoked (except upon application of the holder) unless the holder thereof willfully fails to comply, within a reasonable time, not less than thirty days, to be fixed by the Commission, with a lawful order of the Commission, made as provided in section 204 (c), commanding obedience to the provision of this part, or to the rule or regulation of the Commission thereunder, or to the term, condition, or limitation of such certificate, permit, or license, found by the Commission to have been violated by such holder; *And provided further*, That the right to engage in transportation in interstate or foreign commerce by virtue of any certificate, permit, license, or any application filed pursuant to the provisions of section 206, 209, or 211, or by virtue of the second proviso of section 206 (a) or temporary authority under section 210a, may be suspended by the Commission, upon reasonable notice

of not less than fifteen days to the carrier or broker, but without hearing or other proceedings, for failure to comply, and until compliance, with the provisions of section 211 (e), 217 (a), or 218 (a) or with any lawful order, rule, or regulation of the Commission promulgated thereunder.

(b) Except as provided in section 5, any certificate or permit may be transferred, pursuant to such rules and regulations as the Commision may prescribe.

No. 101

IN THE

Supreme Court of the United States

October Term, 1956

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., *Appellants*,

v.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, *Appellees*.

On Appeal from the United States District Court for the District of Columbia

REPLY TO MOTIONS TO AFFIRM

Come now appellants, American Trucking Associations, Inc., its Regular Common Carrier Conference, Iowa-Nebraska Transportation Company, Des Moines Transportation Company, Inc., Bruce Motor Freight, Inc., Western Transportation Company, McCoy Truck Lines, Inc., Brady Transfer and Storage Company, Motor Cargo, Inc., Gateway Transportation Company, and Bos Truck Lines, Inc., and in reply to the motions to affirm filed on behalf of the Interstate Commerce Commission and certain interveners in support of its order say to this Honorable Court:

PRELIMINARY

The picture of the legislative history of the 1938 amendments to the Motor Carrier Act painted in the Commission's Motion to Affirm (pp. 13-14) is grossly

inaccurate. To paraphrase the Commission's argument, Senator Shipstead attempted to have the language of the proviso of Section 213 inserted in Section 207, found that his proposed amendment was controversial, and, for this reason alone, withdrew it. And it follows, says the Commission, that Congress in 1938 thus squarely refused to require the Commission to restrict rail operation of motor vehicles to auxiliary and supplemental service when such authority is granted pursuant to an application filed under section 207, as distinguished from one filed under section 5. The Commission, of course, as pointed out in our Jurisdictional Statement, argued diametrically to the contrary before this Court in the *Rock Island case* in 1951.* Aside from this complete about-face in its interpretation of the governing statute, the Commission's argument on this point is disarmingly simple, but its simplicity is achieved only by conveniently overlooking the very significant testimony of Commissioner Joseph B. Eastman in connection with the 1938 legislation referred to, and indeed the very language of Senator Shipstead at the time he withdrew his proposed amendment. We deal now with these facets of the legislative history which the Commission's Motion to Affirm did not discuss.

1. Shipstead Amendment Was Deemed Unnecessary.

The Commission's discussion of the proposed amendment to Section 213 offered by Senator Shipstead during the 1938 hearings before a Subcommittee of the Senate Committee on Interstate Commerce on S. 3606, a bill to amend certain provisions of the Motor Carrier Act, 1935, is completely misleading. At p. 13 of its Motion to Affirm the Interstate Commerce Commission points out that Senator Shipstead proposed an amendment which would have repeated in Section 207 the proviso of Section 213

* See pp. 15-16 of our Jurisdictional Statement, filed May 22, 1956.

(now Section 5(2)(b)) limiting railroads to the rendition of only auxiliary and supplemental motor-carrier service. The Commission then goes on to say:

> . . . Senator Shipstead withdrew his amendment for the reason that it appeared that the amendment would provoke a controversy and might delay the adoption of S. 3606 at that session. Sen. Rep. 1650, 75th Cong., 3d Sess., p. 3.
>
> Thus, in 1938, with specific knowledge of the Commission's view that the proviso of Section 5(2)(b) was not controlling in determining applications for motor carrier certificates under Section 207, Congress declined to avail itself of an opportunity to write the proviso into Section 207.

To be sure, Senator Shipstead was desirous of expediting the hearings and assuring the passage of S. 3606. However, a more objective reading of the legislative history than the Commission has undertaken reveals that the primary basis for the withdrawal of his proposed amendment was the testimony of Interstate Commerce Commissioner Joseph B. Eastman, then Chairman of the Commission's Legislative Committee. Commissioner Eastman's testimony clearly indicated that a proper interpretation of the statute required the Commission to read the proviso of section 213 into section 207 whenever a railroad or rail-controlled motor carrier sought to extend its operations under the latter section. To the extent, therefore, that any conclusions can be drawn from the legislative history of the 1938 amendments to the Motor Carrier Act, it is that Congress was satisfied that the Interstate Commerce Commission would apply the restrictive proviso of Section 213 to proceedings under Section 207, as well.

The purpose of the amendment was explained in an exchange between Senator Shipstead and Commissioner Eastman, as follows:

Senator Shipstead. Well, there has been an apprehension that the things prohibited in the act, so far as purchasing and acquiring are concerned, and the denial to purchase and acquire, can be secured in this way: That they can acquire indirectly, by a certificate, what they cannot otherwise acquire.

Commissioner Eastman. I think you mean that they could acquire a motor carrier and make the requisite proof under Section 213, and then could extend the operations of that motor carrier without making any such proof. And your proposed amendment, here, is intended to correct that situation.

Senator Shipstead. Yes; it is intended to clarify what seems to be a misunderstanding as to the act. I think the intention of Congress was perfectly plain. But the question has arisen. And in order to avoid any further controversy, this amendment is introduced. It would change the whole policy of the act, if they could proceed to acquire by certificate what they are not directly permitted to do. The question is whether that should be allowed to continue. (Hearings, pp. 28 and 29)

Commissioner Eastman stated that the Commission did not oppose the amendment, but he expressed some doubt that it actually was necessary in view of the Commission's probable construction of the pertinent provisions of the Act.

Commissioner Eastman. . . . We have indicated that it seems to us consistent with the policy now reflected in section 213(a), paragraph 1; that his amendment should be added to section 207(a).

In other words, if a railroad must submit special proof that the public interest will be promoted in certain respects, before it can acquire a motor carrier, it seems entirely consistent that it shall make such special proof when it seeks to extend the operations of a motor carrier which is already under its control. So we have no objection to offer to the amendment.

As a matter of fact, I think it could be argued, with a great deal of force that in interpreting and applying the provisions of section 207(a) as it now stands, the Commission should read the act as a whole and take cognizance of this policy which is now reflected in section 213(a)(1). (Hearings, p. 27)

. . . If I had to pass on the issue now, I should say that in administering the provisions of section 207, it would be the duty of the Commission to read the act as a whole and to apply the same policy with respect to the extension of operations of a railroad-controlled motor carrier as is provided by the proviso of section 213.

Senator Johnson of Colorado: Under the present law?

Commissioner Eastman: Under the present law. (Hearings, p. 30)

The following day, relying on Commissioner Eastman's representation that his amendment was unnecessary, Senator Shipstead withdrew the amendment.

Senator Shipstead: . . . In view of the statement made by Commissioner Eastman for the Commission as to their view of this matter, and also his personal view, that he thinks the provision of this amendment is already in the law, and that——

Senator Johnson of Colorado (interposing): That is, you mean the Shipstead amendment?

Senator Shipstead: Yes; that is already in the law, and evidently he considers it unnecessary at the present time. So, in order to save the time of the subcommittee, and in order to facilitate advancing the Commission's recommendations for amendments to the Motor Carrier Act, I withdraw, for the present at least, the amendment I offered. I think we will stand on the Commission's point of view, and the personal view of Commissioner Eastman. (Hearings p. 141.)

Later that same year in the leading case of *Kansas City S. Transport Co., Inc., Com. Car. Application*, 10

M.C.C. 221, affirmed, 28 M.C.C. 5, the Commission *did* find that the principles and criteria applicable to acquisition proceedings under Section 213 were equally applicable to application proceedings under Section 207. Such construction was consistent with the Congressional intent and was neither more nor less than Commissioner Eastman led Senator Shipstead and the Subcommittee of the Senate Committee on Interstate Commerce to expect would be the Commission's construction.

2. Congress Was Advised of Restrictions.

The motion to affirm of the Interstate Commerce Commission continues, at pages 13 and 14, with the following misleading statement:

> Moreover, between the *St. Andrews Bay* case [*St. Andrews Bay Transp. Co. Extension of Operations*, 3 M.C.C. 711] and February 1940, the Commission at least twice reiterated its view that the proviso of Section 5(2)(b) was not rigidly controlling in cases under Section 207. *Interstate Transit Lines Extension—Yeakom, Nebraska*, 10 M.C.C. 665 (1938); *Santa Fe Trail Stages, Inc. Common Carrier Application*, 21 M.C.C. 725, 753 (1940). Nevertheless, in the general overhaul of the Interstate Commerce Act by the Transportation Act of 1940, Section 207(a) was not changed. We submit that this post-enactment legislative history is persuasive evidence that the Commission has interpreted correctly the will of Congress. *United States v. American Trucking Associations*, 310 U. S. 534, 549-550.

Contrary to the Commission's contention, neither the *Interstate* nor the *Santa Fe* case contains any language pertaining to the applicability of the proviso of Section 5(2)(b) to proceedings under Section 207. The requirements of the proviso that the railroad applicant's use of motor vehicles be in the public interest, enable it to use service by motor vehicle to public advantage in its operations and not unduly restrain competition are not even

mentioned. At best what these two cases stand for is the proposition that the approved motor-carrier operations need not be confined in every instance to the "territory parallel and adjacent to its rail lines" as might have been inferred from the Commission's decision in *Pennsylvania Truck Lines, Inc.—Control-Barker Motor Freight*, 1 M.C.C. 101, 113, affirmed, 5 M.C.C. 9. Thus in the *Interstate* case the Commission, Division 5, authorized service to a point "not served by either the Union Pacific Railroad Company or the Chicago and North Western Railway Company, which own and control applicant." 10 M.C.C. 667. And in the *Santa Fe* case the Commission, Division 5, approved the application of the Santa Fe's motor-carrier subsidiary even though "the applicant herein serves points not served by the Santa Fe Railway and that to some extent its extensions do not strictly parallel the Santa Fe rails."

In any event it is doubtful that Congress had any knowledge of the Commission's decisions in the *Interstate* and *Santa Fe* cases preceding the enactment of the Transportation Act of 1940. An examination of the Commission's annual reports to the Congress reveals that the Commission did not consider these cases of even sufficient importance to warrant their discussion in the reports. On the other hand a number of cases which could be cited to support the practice of the Commission of restricting railroad-affiliated motor carriers to the rendition of auxiliary and supplemental service were specifically called to Congress' attention prior to the enactment of the 1940 Act. *United States v. Rock Island Motor Transit Co.*, 340 U.S. 419, 432, 71 S. Ct. 382, 389. For example, the decision in *Kansas City S. Transport. Co., Inc., Com. Car. Application*, 10 M.C.C. 221, affirmed 28 M.C.C. 5, was discussed at page 107 of the 53rd Annual Report of the Interstate Commerce Commission, and that in *Pennsylvania Truck Lines, Inc. Control-Barker*,

1 M.C.C. 101, affirmed 5 M.C.C. 9, was discussed at pages 68 and 69 of the 51st Annual Report. Thus, if the post-enactment legislative history is persuasive evidence that the Commission properly interpreted the will of Congress, it is only because the Congress had been led to believe that it was the practice of the Interstate Commerce Commission to confine railroad operations of motor vehicles to the rendition of auxiliary and supplemental service whether pursuant to Section 213 (now Section 5(2)(b)) or Section 207.

3. Rock Island Case No Precedent for Commission's Action Here.

In support of the statement, made at page 17 of its motion to affirm, that it has been the "Commission's long-established view that in certificate cases under Section 207, the proviso of Section 5(2)(b) is a legislative policy to be taken into account, rather than a straitjacket," the Interstate Commerce Commission quoted from the *Rock Island* case, 340 U. S. 442, 71 S. Ct. 395, as follows:

> Rail affiliates have been permitted to leave the line of the railroad to serve communities without other transportation service. Those divergencies, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission. It is because Congress could not deal with the multitudinous and variable situations that arise that the Commission was given authority to adjust services within the limits of the Motor Carrier Act.

However, the Interstate Commerce Commission neglected to quote the next sentence which concluded the paragraph from which the quotation was taken, as follows:

> The Commission has continually evidenced, as indicated above, by opinion and certification its intention to have rail-owned motor carriers serve in auxiliary and supplemental capacity to the railroads.

It is the Commission's unwarranted and unlawful departure from this established practice that is the one major point of contention in the instant proceeding.

Even some of the cases cited by the Interstate Commerce Commission and the interveners in its behalf in support of their argument that the Commission's disposition of Motor Transit's application in this proceeding was not at variance from previous policies or practices reflect the Commission's concern lest the railroads or their affiliates operate motor vehicles in unrestricted, competitive service. Thus in *Santa Fe Trail Transp. Co. Extension—Joplin*, 44 M.C.C. 474, 481, the Commission specifically restricted certain authorized operations "to service which is auxiliary to, or supplemental of rail service" and other operations by reserving the right to impose "such specific conditions as we in the future may find it necessary to impose in order to restrict applicant's operation to service which is auxiliary to, or supplemental of, rail service." In *Santa Fe Trails Stages, Inc. —Control-Central Arizona*, 1 M.C.C. 225, 231, the Commission, Division 5, deemed the grant of authority to result in "an operation auxiliary and supplementary to its rail operations." In *Santa Fe Trail Stages, Inc., Com. Car. App.*, 21 M.C.C. 725, 753, the Commission, Division 5, said of the proposed operations, "Coordination, such as that proposed, has been advocated and encouraged by the Commission and students of the transportation problem for a long time." In *Clinton, Davenport & Muscatine Ry. Co.—Ext.—Davenport—Clinton*, 24 M.C.C. 250, 251, the Commission, Division 5, noted that "the proposed operation will take the place of an interurban electric railway freight service . . ." And finally in *Burlington Transp. Co. Ext.—Council Bluffs*, 28 M.C.C. 783, 790 the Commission, Division 5, observed that "when operations are commenced over the entire route applicant proposes to utilize the station facilities of the railroad, and coordinate the service with that of the railroad."

In only a handful of cases has the Commission even attempted to carve out exceptions to the clearly-expressed Congressional policy that railroad applicants may be authorized to conduct trucking operations only in auxiliary and supplemental service. Essentially these were uncontested proceedings before the Commission, and in not a single instance known to these appellants was the Commission's decision in such a case subjected to judicial review. These cases fall largely into three clearly-defined categories,* into which virtually all of the balance of cases cited in the motions to affirm can readily be grouped:

1. Where truck service is to be rendered to a point not on the line of the railroad and not adequately served by any other railroad or motor carrier. *Santa Fe Trail Transp. Co.—Purchase—Johnson*, 45 M.C.C. 653, 660; *Southern Pac. Transport Co.—Purchase—Reynolds*, 45 M.C.C. 617, 621; *Interstate Transit Lines, Ext.—Verdon, Nebraska*, 10 M.C.C. 665, 667; *St. Andrews Bay Transp. Co. Extension of Operations*; 3 M.C.C. 711, 716.

2. Where truck service is to be rendered over a short and insignificant extension and the existing truck service to which it will be tacked already is subject to appropriate restrictions. *Santa Fe Trail Transp. Co. Extension—New Mexico Points*, 48 M.C.C. 85; *Texas & Pac. Motor Transport Co. Ext.—Point Blue, La.*; 47 M.C.C. 425; *Rock Island Motor Transit Co. Ext.—Wellman, Iowa*, 31 M.C.C. 643.

3. Where the truck service, together with other motor carrier operations, will constitute the major portion of the applicant's business, the rail service having become unimportant. *ET & WNC Transportation Company—Control—The Inter City Trucking*

* A fourth group appears to have resulted from a tendency, corrected by the Commission's report in the *Rock Island case, supra*, at 40 M.C.C. 469, "to treat the Barker case restrictions as geographical or territorial only in their intent rather than as substantive limitations upon the character of the service which might be rendered by a railroad or its affiliate under any acquired right."

Company, 60 M.C.C. 620; *ET & WNC Transportation Co.—Purchase—Huckaber*, 56 M.C.C. 50; *Louisville, N. A. & C. R. Co.—Purchase—Meerman*, 45 M.C.C. 6.

Clearly the all-out truck operations here authorized to be conducted by Motor Transit between Chicago and Omaha, serving such additional major points as Cedar Rapids and Des Moines, cannot be squeezed into any one of the three limited categories of unrestricted motor carrier authority heretofore awarded by the Commission to rail applicants. Such a grant clearly is contrary to the very practice of the Commission established over years of carrying out the Congressional intent of limiting railroads to the rendition of auxiliary and supplementary motor service.

4. The So-Called "Restrictions" Which The Commission Has Imposed Herein Are Meaningless.

The Interstate Commerce Commission's motion to affirm, at page 22, argues that "it should not be overlooked that the Commission has imposed two conditions upon the motor carrier operating authority which it has given to Motor Transit." These conditions are meaningless; neither is adequate to insure the rendition of auxiliary and supplemental service, either at present or at some time in the future.

The first of the conditions—"that there may be attached from time to time the privileges granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require"—virtually repeats verbatim the statutory language of Section 208(a) of the Act, 49 U.S.C. § 308(a). No greater authority is conferred by the reservation than the Commission otherwise would have. Auxiliary and supplemental restrictions could not be imposed in the future, for their imposition would be tantamount to a suspension, change or revocation of the operating authority previously granted

by the Commission. The only statutory authority for the suspension, change or revocation of a certificate is contained in Section 212(a), 49 U.S.C. § 312(a). *Watson Bros. Transportation Co.* v. *United States*, 132 F. Supp. 905, affirmed, — U.S. —, 76 S. Ct. 302. The requirement of that section that there must have been a willfull violation of the Act or a Commission order before revocation cannot be reconciled with the Congressional intent expressed in the National Transportation Policy and the proviso of Section 5(2)(b) requiring the Commission, *in any event*, to restrict motor operations by railroads or their affiliates to auxiliary and supplemental service.

The other restriction imposed—"that all contractual arrangements between the Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties"—is equally impotent. The Interstate Commerce Commission, at page 23 of its motion to affirm, says, "the validity of this condition was sustained in *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 436-444." However, these appellants on rereading the *Rock Island* decision are unable to find any discussion of the restriction and its relationship to the limitation of railroads and their affiliates to insure the rendition of auxiliary and supplemental service. We have found however, that the Interstate Commerce Commission, in referring to the reporting requirement, has said, "In matters relating to compensation between the two companies, the railroad will in reality be dealing with itself and, so far as ultimate financial results to it are concerned, it is immaterial what these arrangements may be. . . . Such information might be important in a rate proceeding or otherwise." *Frisco Transp. Co. Extension—Joplin—Miami*, 62 M.C.C. 367, 379; *Texas &*

Pacific Motor Transport Co. Com. Car. Application, 47 M.C.C. 753, 763. The ability in the future to enforce an appropriate bookkeeping transaction, we are sure, is not what was had in mind when the Commission undertook the practice of imposing auxiliary and supplemental restrictions in response to the Congressional intent of limiting railroad motor-carrier operations. To jettison the other, more meaningful restrictions, keeping only the restriction that may or may not be of some academic interest and adding a restriction which merely repeats certain statutory authority, cannot be deemed to accomplish the legislative purpose. The restrictions imposed do not, and cannot, insure that the Chicago, Rock Island and Pacific Railway Company will use the motor-carrier authority conferred upon its subsidiary, The Rock Island Motor Transit Co., to public advantage in its train operations, and yet under the National Transportation Policy and the provisions of the Interstate Commerce Act that is the limited extent to which it properly may operate motor vehicles for hire in interstate and foreign commerce.

Wherefore, it is again urged that jurisdiction be noted and that the judgment of the District Court be reversed and the case remanded to the District Court for disposition consistent with the Supreme Court's opinion.

CERTIFICATE OF SERVICE

I, Peter T. Beardsley, one of the attorneys for appellants herein, and a member of the bar of the Supreme Court of the United States, hereby certify that, on the tenth day of July, 1956, I served copies of the foregoing document on the several parties thereto, as follows:

1. On the United States, by mailing a copy in a duly addressed envelope, with postage prepaid, to Oliver Gasch, United States Attorney for the District of Columbia, at Room 3600-A, United States Court House, Washington, D. C., and by mailing a copy in a duly addressed envelope, with postage prepaid, to The Solicitor General, Department of Justice, Washington 25, D. C.

2. On the Interstate Commerce Commission, by mailing a copy in a duly addressed envelope with postage prepaid, to Robert Ginnane, Esq., its General Counsel, at the offices of the Commission, Washington 25, D. C.

3. On the Rock Island Motor Transit Company, Employees' Committee of Rock Island Motor Transit Co., Davenport Chamber of Commerce, et al., and Shippers' Committee, intervening defendants, by mailing copies in a duly addressed envelope, with postage prepaid, to Arthur L. Winn, Jr., Esq., their attorney, at 743 Investment Bldg., Washington, D. C.

4. On the Railway Labor Executives' Association, Brotherhood of Railroad Trainmen, and Order of Railway Conductors and Brakemen, intervening plaintiffs, by mailing copies, in a duly addressed envelope, with postage prepaid, to James L. Highsaw, Jr., their attorney, at 620 Tower Bldg., Washington, D. C.

REPLY BRIEF

Appellants, American Trucking Associations, Inc., its Regular Common Carrier Conference, Iowa-Nebraska Transportation Company, Des Moines Transportation Company, Inc., Bruce Motor Freight, Inc., Western Transportation Company, McCoy Truck Lines, Inc., Brady Transfer and Storage Company, Motor Cargo, Inc., Gateway Transportation Company, and Bos Truck Lines, Inc., for their reply to briefs filed herein by the Interstate Commerce Commission, appellee, and Rock Island Motor Transit Company, intervening appellee, say to this Honorable Court:

PRELIMINARY

This reply brief is filed for four reasons: First, the Commission's brief [1] herein affords a striking contrast to its earlier interpretation of the legislative history of the Motor Carrier Act of 1935, as set forth in its brief to this Court in the *Texas & Pacific* case; second, the Commission's brief misstates our position respecting the nature of "auxiliary and supplemental" restrictions which the proviso of § 5(2)(b) requires in cases of this kind; third, the Commission's brief is misleading, however unintentionally, regarding its *present* attitude toward the Congressional policy involved; fourth, the brief of The Rock Island Motor Transit Company, one of the intervening appellees, in referring to the testimony which it relies upon to support the Commission's order, fails, in several instances, to accurately analyze such testimony, with the result that incorrect conclusions are drawn therefrom.

The Commission's Present Interpretation of the Legislative History of the Motor Carrier Act is the Exact Opposite of its Earlier Construction.

Commencing at page 26 of its brief, the Commission, in an apparent attempt to buttress its claim of unlimited discretion to determine the limits of railroad operation of motor vehicles (or indeed, whether there should be any limits at all), sets forth its *current* interpretation of the legislative history of the Motor Carrier Act of 1935. In so doing, it contends (page 26) that the legislative history shows "that no one concerned had any precise idea as to the extent to which railroads should be allowed to engage in motor transportation"; that Commissioner Eastman, in his testimony respecting the

[1] The United States has not filed a brief in this proceeding and, presumably, does not support the Commission's order before the Court.

proposed legislation "was urging further experimentation in railroad use of motor vehicles" (page 28); that "the extent to which a railroad could render motor carrier service to points which it already served by rail was nowhere defined or discussed." (pp. 30-31) The Commission then concludes (page 31) that "In any event, *the legislative history contains no suggestion that the proviso in Section 213(a)(1) was to be read into section 207 as a rigid limitation on the Commission's power to issue certificates of public convenience and necessity for new motor service.*" (emphasis theirs)

The above-cited statements and conclusion are in striking contrast to the Commission's previous interpretation of the legislative history of the Motor Carrier Act of 1935. In its brief in No. 38, *U. S.* v. *Texas and Pacific Motor Transport Company*, October Term, 1950, which involved, as does this case, a § 207 application filed by a railroad subsidiary, the Commission had this to say (pages 32-33):

> **It is apparent that, as in *Coordination of Motor Transportation, supra,* the use which Commissioner Eastman considered that the railroads could, with advantage to themselves and the public, make of motor trucks and vehicles was the auxiliary or supplemental use thereof in their own operations. He was not recommending that the railroads be allowed to go into the general motor carrier business in competition with their own operations and those of independent motor carriers. And that such was not the intent of the bill as enacted into law is shown by statements on the floor of Congress by those in charge of the legislation."** [1a]

The Commission's present interpretation of the legislative history of the Motor Carrier Act of 1935 is completely the opposite of its earlier one. Since the provi-

[1a] The Commission then went on to cite the statements of Congressman Sadowski and Senator Wheeler referred to at pages 17-18 of our brief herein.

sions of the law remain the same, both of the Commission's interpretations cannot be correct. We respectfully submit that it was right the first time and that this Court's decision in the *Rock Island* and *Texas & Pacific* cases have affirmed its earlier construction.

The Commission's Brief Misstates Appellants' Position Respecting the Specific Restrictions Which Should be Imposed.

At various points throughout its brief, the Commission refers to what is said to be our position respecting the requirement of the proviso of § 5(2)(b) relative to so-called "auxiliary and supplemental" restrictions which must be imposed in cases of this kind. For example, at page 26 of its brief, the Commission refers to our "specific contentions" that the proviso requires the Commission to restrict railroad motor-carrier operations "to largely less-than-truckload movements to smaller points and on railroad bills of lading and at rail rates . . ." Again, at page 31, the Commission similarly characterizes our position. And at page 68 of its brief, our position is said to be one which "would preclude Motor Transit from performing motor transportation between any two points each of which has a population in excess of 6,000."

These statements completely misstate our position. What we have said, and all that we have said, is that the language of the proviso of § 5(2)(b), to use the Commission's phrase, means what it says. This being so, we contend that the Commission, in a § 5 proceeding or a § 207 case such as this, must so restrict the motor operations of the railroad or its affiliate as to enable it to find that the service by motor vehicle will be used in "its [the railroad's] operations." Once this has been done, the railroad or its affiliate is, of course, free, within the limits specified, to transport freight, in small or large volume, between the points, whatever their population, within the territory involved, and these appellants have

never contended otherwise. Thus, under the certificate issued September 11, 1951, intended to restrict the rail subsidiary to auxiliary and supplemental operations, and set forth in the map preceding page 1 of our brief, Motor Transit could have performed service between Chicago and Iowa City or between Chicago and Cedar Rapids. Since the Commission itself shows the population of Iowa City to be 27,212 and Cedar Rapids to be 72,296 (see map appended to its brief), it is idle for it to argue, as it does, that our position would preclude "Motor Transit from performing motor transportation between any two points each of which has a population in excess of 6,000.". We hasten to add that under a prior or subsequent rail-haul restriction, which we urge that the Commission be required to impose, the railroad's motor subsidiary would be able to transport traffic in unlimited volume, between any points in its territory, provided only that the traffic had previously moved in rail service or was destined to so move after completion of the motor portion of the through journey.

In addition, the Commission itself, not these appellants, is responsible for the historical development of conditions which "restrict" railroad motor operations to traffic which moves on rail billing at rail rates. To describe these conditions as "restrictions" is in reality a misnomer. We say this because, where there is any difference in the rate levels of less-than-truckload as against less-than-carload shipments, the rail rate is invariably lower. Thus, railroad motor affiliates often have a rate advantage over independent motor carriers by virtue of the so-called restriction which ties them to rail rates.

In addition to what we have said regarding the Commission's misstatements relative to our position in respect to the imposition of auxiliary and supplemental restrictions, one other facet of the Commission's brief on this phase of the case deserves mention. It will be

noted that the Commission lays great stress upon the fact that its order herein allows the rail subsidiary to perform unrestricted motor carrier service "only to points on or near the rail line." See, e.g., pages 19 and 25 of the Commission's brief. Thus the Commission, for all intents and purposes, argues that a condition which merely limits otherwise unrestricted motor service performed by a railroad or its affiliate to points "on or near the rail line," will conform to the Congressional policy evidenced by the proviso of § 5(2)(b). This, in turn, brings the attitude of the Commission into clear focus. It is no longer concerned that proposed railroad motor carrier operations will, in the language of the *Barker* case, 5 M.C.C. 9, 11, "compete with an established motor carrier." It continues to be much concerned, however, with limiting the railroad motor operations authorized herein to points on or near the rail line. Why? Because, we submit, as stated in *Barker, supra,* should such motor operations not be so limited, they would "invade to a substantial degree a territory already adequately served by another rail carrier." Thus the Commission abandons its obligation to prevent undue encroachment by railroads upon the independent motor carrier field, while at the same time continuing its efforts to prevent rail invasion of another railroad's operating territory through the use of motor vehicles.

In Its Present Administration of the Law, The Commission Largely Ignores the Statutory Prohibition Against Unrestricted Motor-Vehicle Operations.

The Commission's brief goes to great lengths to stress that only the existence of what are said to be exceptional circumstances[2] led it to authorize Motor Transit to perform all-out truck service completely divorced from

---

[2] Characterized, at page 11 of its brief, as "an unusual or special need" for the performance of unrestricted truck service by the rail subsidiary.

its rail parent's train operations. In so doing, it emphasizes the fact that its order herein "is based upon Section 207(a) which . . . does not contain the limitations upon motor carrier operations by railroads which the proviso of Section 5(2)(b) imposes where a railroad or its affiliate requires [sic] an existing motor carrier operation." Although the corollary of this argument would seem to be that the Commission is bound, in Section 5 cases, to limit rail operation of trucks to coordinated rather than unrestricted service, nevertheless the Commission insists that even there it has discretion to ignore the positive mandate of the statute in "unusual or special cases." Parenthetically, if, as the Commission insists at page 20 of its brief, statutes "mean what they say" we are at a loss to understand how it can, at one and the same time, find so much room for discretion in language which states that it "shall not" issue an order approving rail operation of motor vehicles unless certain conditions,[3] not satisfied by its order herein, are met.

In any event, the rationale of the Commission's argument respecting this phase of the case is that the Commission has taken great care, in both Section 5 and 207 cases, to assure that the unrestricted service authorized to be performed by railroads or their affiliates has, in every instance, been allowed only "to meet an unusual or special public need for service which other motor carriers were not providing." Commission brief, page 12. Whether or not that allegation correctly sums up the infrequent past departures from the Congressional policy cited, we respectfully submit that it is simply not the fact with respect to the Commission's present administration of the law.

The, to us, appalling fact is that in its *current* administration of the law the Commission, by and large, treats

---

[3] i.e., that the motor operations will be used "to public advantage in its [the parent railroad's] operations."

the mandate of Section 5(2)(b) in a most cavalier manner, whether the request of the railroad to perform unrestricted truck service is filed pursuant to Section 5 or 207. It has recently, in both types of cases, ignored the language of the proviso without even an intimation in the record that there is "an unusual or special public need for service which other motor carriers were not providing." In *Burlington Truck Lines—Purchase—Arrow Freight Lines*, a Section 5 case, the Commission's Examiner, in recommending that the application be denied, stated:

> There are no special, or unusual, circumstances shown to be present in this proceeding which would warrant a departure from the policy stated in *Rock Island Motor Transit Co.—Purchase—White Line*, 40 M.C.C. 457, and 55 M.C.C. 567, requiring that every grant of authority to a railroad, or a railroad affiliate, of rights to operate as a motor carrier of property, or to acquire such rights by purchase, or otherwise, should be so conditioned as definitely to limit the future service by motor vehicle to that which is auxiliary to, or supplemental of, rail service. Such a limitation does not permit all motor carrier service or the interchange of freight with other motor carriers under joint rates. See also *Rock Island Motor Transit Co.—Purchase—Riley*, 45 M.C.C. 544. Under the circumstances, the transaction may not properly be approved on the basis of the evidence submitted on the present record.

Despite the absence noted by the Examiner of any record evidence indicating any "unusual" circumstances which would justify a departure from the policy which the Commission's brief so stoutly maintains it strives to uphold, the Commission's division 4 abruptly reversed the Examiner's recommended order and authorized the purchase without restrictions.[4] To be sure, the Division

---

[4] Docket No. MC-F-6345, *Burlington Truck Lines—Purchase—Arrow Freight Lines*, decided June 21, 1957. Pending before the entire Commission on reconsideration.

paid lip service to the Congressional policy by stating that "considering all the evidence, we are of the opinion that an exception to the principles discussed in the *Rock Island* case is warranted." However, the report nowhere indicates that the independent motor carriers in the area have in any way failed to render an adequate service. Other recent examples of Commission decisions which demonstrate that its current administration of the law falls far short of the claimed consistent adherence to the Congressional policy, are:

Docket No. MC-78787 (Sub-No. 34)—*Pacific Motor Trucking Co. Ext.—Oregon:* In this proceeding, a § 207 case, the entire Commission, by report and order dated May 8, 1957, authorized the wholly-owned subsidiary of the Southern Pacific Railroad to perform unrestricted motor *contract* carrier service from General Motors Chevrolet plants in Oakland, California, to all points in Oregon which are stations on the line of its parent railroad. By order of August 16, 1957, reconsideration was granted, and the matter is now pending.

Docket No. MC-F-6415—*Howard Terminal—Control—El Dorado Motor Transportation Co.* By report and order dated May 23, 1957, the Commission, Division 4, approved the purchase by Howard Terminal, which controls the Howard Terminal Company, a railroad, of control of El Dorado, a motor carrier, and, through the acquisition, the performance of unrestricted truck operations in the Sacramento area.

In none of the cases just cited are the Commission's or its Examiners' reports supported by record evidence that the authority granted or recommended is required by "an unusual or special public need for service which other motor carriers were not providing," and the reports themselves contain no such finding. This is likewise true of the Examiners' decisions referred to immediately below.

The Commission's examiners have been quick to appreciate its changed attitude respecting adherence to the Congressional policy embodied in § 5(2)(b), and have reacted accordingly. For example, in Docket No. MC-78787 (Sub-No. 37)—*Pacific Motor Trucking Co. Ext.—Automobiles—California Assembly Plants to 7 Western States,* the examiner, by report served June 20, 1957, has recommended that the Southern Pacific Railroad's wholly-owned subsidiary be granted unrestricted motor contract carrier authority to transport new automobiles, trucks and buses, from General Motors plants at Los Angeles and Oakland, California, to all points on the rail parent's lines in the States of Arizona, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, and Washington. And in Docket No. MC-F-6528—*Burlington Truck Lines, Inc.—Purchase—Love Transfer,* the examiner, by report served August 16, 1957, has recommended that the subsidiary of the Burlington Railroad be authorized to purchase, without restriction, the operating rights of Love, an independent motor carrier.

Some of the cited cases involved little or no protest to the application by independent motor carriers but that does not excuse the Commission's failure to adhere to the Congressional policy, for it is the Commission, and no one else, which is required "to guard against the danger of the development of a transportation monopoly." *I.C.C.* v. *Parker,* 326 U.S. 60, 73.

Regardless of the justification, or lack thereof, for the Commission's occasional past failure to adhere to Congressional policy, its present day-to-day unwillingness, generally speaking, to conform to the mandate of § 5(2)(b), emphasizes the need, adverted to at pages 71-76 of our original brief herein, for reexamination of the *Parker* case and the corrective action by this Court requested therein.

Rock Island Motor Transit's Brief Fails to Accurately Analyze the Testimony of Many Witnesses.

Intervenor-Appellee, The Rock Island Motor Transit Company, commencing at page 23 of its brief, seeks to refute the appellants' contention "that the District Court erred in failing to set aside the Commission's order for lack of evidentiary support as to the 'major points.'". It attempts to do this by summarizing the testimony of 40 shipper or chamber of commerce witnesses from such "major points" as Chicago, the Quad-City area (Davenport and Bettendorf, Iowa, and Rock Island, Moline and East Moline, Illinois), Iowa City, Cedar Rapids, Des Moines, Omaha and Council Bluffs. What is not clear from a reading of these summaries is that the testimony related almost completely to the need for service to or from the smaller points lying intermediate to the "major" points. Insofar as their testimony touched on the present availability of service being rendered by independent motor carriers between the larger distribution centers, it would more accurately be summarized as follows:

Mr. D. R. MacDonald of Chicago testified that some motor carriers were rendering excellent service from Chicago to Iowa destinations on U.S. Highway 6. (R. 269-270). The brief of The Rock Island Motor Transit Co., at page 24, summarizes the witness' testimony to convey the contrary impression, stating in part, "Other carriers had failed to respond to calls for pick-up service for outbound shipments, while Rock Island Motor Transit had responded to all calls promptly in a three months' period." In fact, the witness testified that, in addition to Rock Island Motor Transit Company, Iowa-Nebraska Transportation Company and Des Moines Transportation Company responded on the same day to telephoned requests for pickups; other motor carriers, such as Bos Truck Lines, Inc., Brady Motorfrate, Inc., McCoy Truck Lines, Inc., and Watson Brothers Transportation Com-

pany, responded the same day or the day following in most cases. (R. 270-271).

Mr. B. J. Lussa of Chicago testified that he was satisfied with the service he has received from the Rock Island Motor Transit Company from Chicago to Iowa destinations (R. 278) and as a matter of fact has not used any other carrier to these particular points. (R. 280).

Mr. R. Ozinga of Chicago testified that, while Rock Island Motor Transit Company was the most reliable carrier to "the so-called smaller towns or non-key-point towns" (R. 282-283), he uses Takin Brothers Freight Line, Inc., to Cedar Rapids and Iowa City, Rock Island Transfer and Storage Company to the Tri-City area (Davenport, Rock Island and Moline), Prucka Transportation, Inc., to Council Bluffs and Des Moines Transportation Company to Des Moines. (R. 285).

Mr. D. R. Hoppe of Chicago testified that he was satisfied with the service he has received from the Rock Island Motor Transit Company from Chicago to Iowa destinations and has had no occasion to use any other common carrier by motor vehicle. (R. 289).

Mr. A. J. Maurer of Chicago testified that there is adequate truck service from Chicago to the larger points. (R. 247). Twenty-two motor carriers operate between Chicago and Davenport; ten serve Iowa City; at least four serve Grinnell; at least nine serve Newton; and at least six serve Atlantic. (R. 251-256). He thought there probably was no demand for any additional motor carrier service between Chicago and Omaha. (R. 253).

Mr. H. H. Stevens of Moline testified that he has "a lot of lines" and "can get service" to such points as Des Moines and Omaha. (R. 468-469).

Mr. P. E. Gans of Moline qualified his statement that he knew of no motor carrier—other than Rock Island

Motor Transit Company—rendering service from the Tri-City area (Davenport, Rock Island and Moline) to a number of Iowa destination points by limiting his observations to carriers "with complete terminal facilities in the Tri-Cities." He further qualified his statement by acknowledging that he shipped assembled farm implements by motor common carriers other than Rock Island Motor Transit Company. (R. 263-264).

Mr. F. J. Schunter of Moline testified that he was satisfied with the service of the Rock Island Motor Transit Company and has had no occasion to make inquiry whether or not there might be other service available. (R. 327).

Mr. C. H. Pahl of Rock Island testified that he was unable to recall the name of any motor carrier which refused to accept shipments from Rock Island to any Iowa destination point. (R. 884-885).

Mr. H. C. Woodard of the Tri-City area testified that he was not familiar with the operations of motor truck operators operating between the Tri-City area, Des Moines and Omaha; he knew neither their identity nor their general operations. (R. 394-395).

Mr. G. M. Cummins of Davenport testified that there are 27 carriers rendering daily service between Chicago and the Tri-City area (Davenport, Rock Island and Moline). From Davenport to such points as Grinnell, Newton, Council Bluffs and Des Moines interstate motor carrier service other than that of the Rock Island Motor Transit Company was available. (R. 234).

Mr. J. A. Gould of Muscatine testified that he has used the services of Poole Transfer, Inc., as well as those of the Rock Island Motor Transit Company. (R. 1265).

Mr. R. L. Sweany of Muscatine testified that the major motor carrier in Muscatine is Poole Transfer, Inc., serv-

ing Minneapolis and Chicago daily. In addition to the Rock Island Motor Transit Company, the Burlington Transportation Company (R. 1254), Green Transportation Lines, Inc., Hedrick Motor Freight Line, and Western Transportation Company serve Muscatine. (R. 1259-1260).

Mr. H. P. Jacobs of Iowa City testfied that truck lines other than Rock Island Motor Transit Company operate between Chicago and Iowa City. (R. 487). Watson Brothers Transportation Company as a matter of fact maintains an office at Iowa City. (R. 490).

Mr. J. H. Nesmith of Iowa City testified that he generally uses only the Rock Island Motor Transit Company on out-of-state shipments. (R. 492).

Mr. C. H. Swanholm of Iowa City testified that, in addition to the Rock Island Motor Transit Company, he has used Poole Transfer, Inc., Merchants Transfer and Storage Company, Watson Brothers Transportation Company and other carriers for interstate shipments. (R. 495).

Mr. T. Slager of Iowa City testified that there are a number of trucking companies serving Iowa City. (R. 1144). In addition to the Rock Island Motor Transit Company, he has used Western Transportation Company and Watson Brothers Transportation Company. (R. 1144-1146).

Mr. J. P. Wegmuller of Iowa City testified that he has used the services of motor carriers other than the Rock Island Motor Transit Company. (R. 1139).

Mr. R. L. Gage of Iowa City testified that its trucking facilities is one of the outstanding attractions of Iowa City. (R. 485).

Mr. Harold F. Eucoldt of Cedar Rapids testified that there is a substantial number of motor carriers operat-

ing between Cedar Rapids and such points as Chicago, the Tri-City area and Omaha. (R. 1121). Fifteen carriers operate between Chicago and Cedar Rapids alone. (R. 1124).

Mr. L. L. Johnson of Cedar Rapids testified that he could not name any town where he had an account that could not be served out of Chicago with truckload lots. (R. 1114). He has had no occasion to make any investigation as to whether any transportation, other than The Rock Island Motor Transit Company, is available from Chicago to certain Iowa destination points. (R. 1115).

Mr. M. F. Zimmerman of Grinnell testified that he had used the services of the Rock Island Motor Transit Company almost exclusively for the preceding five years. (R. 714).

Mr. E. Mathews of Grinnell testified that he has received shipments from Iowa-Nebraska Transportation Company as well as the Rock Island Motor Transit Company. (R. 717).

Mr. B. Ritter of Grinnell testified that he has received shipments from the Watson Brothers Transportation Company, Nebraska Motor Transport, Inc., and McCoy Truck Lines, Inc., as well as the Rock Island Motor Transit Company. (R. 734).

Mr. D. H. McKean of Grinnell testified that Western Transportation Company maintains a full-time terminal agent at Grinnell. (R. 749). The Iowa-Nebraska Transportation Company and the Des Moines Transportation Company as well as Western and Rock Island Motor Transit Company, have delivered freight to him. (R. 750).

Mr. P. Brink of Grinnell testified that the Iowa-Nebraska Transportation Company, the Western Transportation Company and the Des Moines Transportation Company, in addition to the Rock Island Motor Transit Com-

pany, serve Grinnell (R. 755), and he has received shipments from these carriers. (R. 758).

Mr. L. V. Phelps of Grinnell testified that he has received truckload shipments from Chicago via American Transit Line. (R. 726-727). He has received less-than-truckload shipments from Iowa-Nebraska Transportation Company and he has received shipments from Pasch Cartage Company which does local cartage work for Keeshin Motor Express Company and Des Moines Transportation Company (R. 728).

Mr. F. Triggs of Des Moines testified that a number of motor carriers, including Des Moines Transportation Company, Watson Brothers Transportation Company and Western Transportation Company, are available for transporting shipments between Chicago and Des Moines. (R. 1295).

Mr. L. Lomberto of Des Moines testified that he has used the Des Moines Transportation Company, Western Transportation Company and quite a few other carriers on inbound shipments from the East. (R. 1304).

Mr. L. Brody of Des Moines testified that, in addition to the Rock Island Motor Transit Company, Watson Brothers Transportation Company has transported shipments for his concern. (R. 1312).

Mr. R. M. Griffith of Des Moines testified that he had no difficulty finding carriers to handle shipments in excess of 5,000 pounds after that weight limitation was imposed upon the Rock Island Motor Transit Company. (R. 1314).

Mr. C. A. Hausen of Des Moines testified primarily as to the smaller intermediate points. (R. 1318).

Mr. B. Robinson of Atlantic testified that he has received inbound shipments from the Iowa-Nebraska Transportation Company, as well as the Rock Island Motor Transit Company. (R. 542).

Mr. M. Turner of Atlantic testified that Watson Brothers Transportation Company served Atlantic daily and that in addition Iowa-Nebraska Transportation, as well as the Rock Island Motor Transit Company, serves the area. (R. 935).

Mr. O. A. Meredith of Atlantic testified that, while his firm specifies the Rock Island Motor Transit Company on all shipments, it has had service from Watson Brothers Transportation Company, Iowa-Nebraska Transportation Company, Bos Truck Lines, Inc., and possibly others. (R. 533).

Mr. D. C. Mitchell of Atlantic testified that he was able to find other carriers to handle shipments in excess of 5,000 pounds after that weight limitation was imposed upon the Rock Island Motor Transit Company. (R. 549, 551).

Mr. G. Ball of Council Bluffs testified that he has received satisfactory service on shipments from Chicago to Council Bluffs from Prucka Transportation, Inc. and On-Time Truck Line. He has used Watson Brothers Transportation Company, Darling Transfer and Transamerican Freight Lines, Inc., as well as the Rock Island Motor Transit Company, on outbound shipments from Council Bluffs. (R. 1008).

Mr. P. E. Seastedt of Omaha testified that on outbound service from Omaha, the service in which he was most interested, he had the services of two or more carriers available to some points in Iowa on U.S. Highway 6; to other points only Rock Island Motor Transit Company renders a service. He hasn't had "too great a complaint" about the service rendered by the other motor carriers. (R. 1011-1012). Since the 5,000-pound weight limitation was imposed on the Rock Island Motor Transit Company, he has used other carriers for volume shipments. (R. 1013).

Mr. J. J. Hartnett of Omaha testified that on shipments from Omaha to cities such as the Tri-Cities, Ottumwa, Cedar Rapids, Minneapolis and Des Moines he has the services of a number of motor carriers available to him and that he has used most of them, as well as the Rock Island Motor Transit Company, to those points. (R. 1005).

The testimony of these forty witnesses, as well as the testimony of the independent motor carriers themselves (as summarized at pages 88-95 of the appellants' brief), is conclusive on the point that the record lends no support to a finding that the public convenience and necessity require the service of the Rock Island Motor Transit Company between the major points referred to. At best the testimony reveals a shipper preference for the service of the Rock Island Motor Transit Company, in several instances coupled with lack of knowledge of, rather than dissatisfaction with, the services of independent motor carriers. But the Commission itself has recognized that a mere preference for the services of an applicant does not satisfy the applicant's burden of proving his services are *required* by the public convenience and necessity. As was pointed out at page 53 of the appellants' brief, "there must be an affirmative showing not only that a common carrier service is required in the convenience of the public but also that it is a necessity, and . . . the latter element includes a showing that present facilities are inadequate." *Hudson Transit Lines* v. *United States*, 82 F. Supp. 153, 157, affirmed *per curiam*, 338 U. S. 802, 70 S. Ct. 59. Here no showing of inadequate service between such points as Chicago, Cedar Rapids, Council Bluffs, Des Moines, Iowa City, the Quad-City area, and Omaha can be made; the independent motor carriers are ready, willing and able to transport—and, in fact, are presently transporting—all freight tendered them between these points.

One other erroneous impression conveyed by the brief of the Rock Island Motor Transit Company is of sufficient importance to call for clarification. At page 45 of its brief, the intervenor-appellee states:

> . . . It is charged that at many points where no Motor Transit representative is stationed, railroad agents act for it. This is contrary to the record and is supported only by an inadvertent statement by one witness at Ladora, Iowa, (R. 455-456) who apparently was referring to rail-billed traffic. The Commission made no finding that the rail depot agent assumes to act for Motor Transit with respect to shipments moving on motor carrier billing. The record is just the reverse.

Lest there be any doubt what the record contains with respect to our allegation that at many points where no Motor Transit representative is stationed the railroad depot agent assumes his functions, we shall quote verbatim from a few pertinent sections of the record. First, as to the claimed inadvertent statement attributed to Mr. Victor Hess, the witness from Ladora, the record shows the following colloquy:

> By Mr. Fowler,
> Q. Does the Rock Island railroad have a station agent at Ladora?
> A. Yes.
> Q. Does the Rock Island agent handle matters for you in connection with your dealings with Rock Island Motor Transit?
> A. Yes. (R. 455).

Witness Graham Godby of Dexter, Iowa, testified as follows on cross-examination:

> Q. Who do you pay your freight bills to? Your motor freight bills?
> A. You mean the Rock Island Motor?
> Q. Yes.
> A. You mean the person himself?
> Q. Well, do they have an agent there?

A. They do at the station, yes. That is the person we pay.

Q. You pay at the station?

A. Yes.

Q. And is it the railroad station agent that you pay?

A. Yes.

Q. Regardless whether it is motor truck billed freight or rail-billed freight?

A. Yes.

Q. If you have a claim to make, do you see that same station agent to handle it?

A. Yes.

Q. Does he process that claim?

A. Yes.

Q. And he does that regardless whether it is rail freight or motor freight?

A. Yes. (R. 1188-1189).

Witness G. M. Hartline at Altoona, Iowa, testified on cross-examination as follows:

Q. The only representative the railroad or the motor company have in Altoona is the depot agent?

A. The depot agent, yes, sir.

Q. And if you have any problems in connection with that [truck service of Motor Transit], you would talk to him about it?

A. Yes. (R. 865).

Witness Louis C. Willenbrock of Mitchellville testified on cross-examination as follows:

Q. . . . Now, you mentioned that you go to the depot and tell him to have the driver stop. Who do you mean by "him"?

A. The depot agent.

Q. Is that the rail depot agent?

A. That is right.

* * * *

Q. All of your dealings are direct with the station agent?

A. That is right. (R. 829).

The foregoing quotations from the record more accurately reveal just what the testimony relative to Motor

Transit's use of the railroad's depot agents was than can any summation by counsel. The record clearly shows that at many of the points involved the shippers utilizing the facilities of Motor Transit deal with the local depot agents of the parent railroad company. There can be no questioning that the presence of these representatives is of material benefit to Motor Transit and that Motor Transit thereby enjoys a distinct advantage that the independent motor carriers competing with it do not have.

CERTIFICATE OF SERVICE

I, Peter T. Beardsley, one of the attorneys for appellants herein, and a member of the bar of the Supreme Court of the United States, hereby certify that, on the sixteenth day of October 1957, I served copies of the foregoing document on the several parties herein as follows:

1. On the United States, by mailing a copy in a duly addressed envelope, with postage prepaid, to Oliver Gasch, United States Attorney for the District of Columbia, at Room 3600-A, United States Court House, Washington, D. C., and by mailing a copy in a duly addressed envelope, with postage prepaid, to The Solicitor General, Department of Justice, Washington 25, D. C.

2. On the Interstate Commerce Commission, by mailing a copy in a duly addressed envelope with postage prepaid, to Robert Ginnane, Esq., its General Counsel, at the offices of the Commission, Washington 25, D. C.

3. On the Rock Island Motor Transit Company, intervening defendant, by mailing a copy in a duly addressed envelope with airmail postage prepaid, to A. B. Howland, Esq., its attorney, at 500 Bankers Trust Building, Des Moines 9, Iowa.

4. On the Employees' Committee of Rock Island Motor Transit Co., Davenport Chamber of Commerce, et al., and Shippers' Committee, intervening defendants, by mailing a copy in a duly addressed envelope with airmail postage prepaid, to D. C. Nolan, Esq., their attorney, at Suite 405, Iowa State Bank Bldg., Iowa City, Iowa.

5. On the Railway Labor Executives' Association, Brotherhood of Railroad Trainmen, and Order of Railway Conductors and Brakemen, intervening plaintiffs, by mailing copies, in a duly addressed envelope with post

age prepaid, to James L. Highsaw, Jr., their attorney, at 620 Tower Bldg., Washington, D. C.

6. On the National Industrial Traffic League, *amicus curiae*, by mailing a copy in a duly addressed envelope, with airmail postage prepaid, to John S. Burchmore, Esq., its attorney, at 2106 Field Building, Chicago 3, Illinois.

I.	Opinion Below	1
II.	Jurisdiction	1
III.	Statutes Involved	2
IV.	Questions Presented	2
V.	Statement of Case	3
	A. The Commission approved the purchase of White Line for restricted operations	4
	B. The Commission approved the purchase of Frederickson for unrestricted operations	5
	C. The Commission reconsidered both cases and restricted the combined operations	6
	D. The Supreme Court upheld the restrictions	6
	E. The Commission granted temporary, then permanent, unrestricted rights	7
	F. The District Court upheld the Commission's grant	8
VI.	Summary of Argument	9
VII.	Argument	14
	A. The proviso of Section 5(2)(b)—formerly Section 213	14
	1. Congressional policy against integration of competing modes of carriage long antedated the Motor Carrier Act	14
	2. Congress forbade railroad control of the motor carrier industry	16
	3. In the *Baker* case the Commission properly viewed its duties pursuant to the proviso	18
	B. The proviso applied to Section 207	21
	1. The declaration of policy called for the preservation of the inherent advantages of truck transportation	21
	2. The statement of Commissioner Eastman revealed the Commission would give effect to the proviso in reading the Act as a whole	22

PAGE

3. In the *Kansas City Southern* case the Commission properly applied the terms of the proviso in a Section 207 proceeding. 27
4. Congress approved the Commission's application of the proviso to Section 207 proceedings. 29

C. Auxiliary and supplemental restrictions consistently applied to effectuate proviso.. 30

1. The Commission consistently restricted grants of motor carrier authority to railroads to the rendition of auxiliary and supplemental service. 30
2. In the *Rock Island* and *Texas & Pacific* cases the Supreme Court sustained the Commission's imposition of auxiliary and supplemental restrictions..... 35
3. The Commission recognized, as did the railroads, that it was powerless to issue unrestricted motor-carrier authority to railroads..... 39
4. There is no valid precedent for Commission's action here. 44
5. The conditions here imposed do not, and will not, limit the railroad to the rendition of auxiliary and supplemental service. 48

D. The lack of need for service by the railroad subsidiary 51

1. There is no evidence of record that there is need for the railroad's unrestricted motor operations between the major points. 51
2. The testimony of shipper and carrier witnesses reveals ample service between the major points. 55

E. The Commission's failure to guard against the danger of the development of a Rock Island monopoly 57

1. The railroad would sustain its trucking subsidiary with freight, facilities, funds and personnel..... 57

PAGE

2. The annihilation of independent motor carriers would confer a monopoly upon the railroad. 63
3. The Commission committed a fundamental error. 65

F. Need for Reexamination of *Parker* Doctrine 71

Certificate of Service 77

No. 6

IN THE

Supreme Court of the United States

October Term, 1957

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., *Appellants,*

v.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, *Appellees*

On Appeal from the United States District Court for the District of Columbia

APPELLANTS' BRIEF

OPINION BELOW

The opinion of the United States District Court for the District of Columbia (R. 192) is reported at 144 F. Supp. 365. The report of the Interstate Commerce Commission (R. 93) appears at 63 M. C. C. 91.

JURISDICTION

The judgment of the District Court (R. 195) was entered on January 27, 1956, and notice of appeal (R. 197) was filed on March 23, 1956. Probable jurisdiction was noted by this Court on October 8, 1956. (R. 204), 352

U. S. 816, 77 S. Ct. 36. Jurisdiction to review the decision on direct appeal is conferred upon this Court by Sections 1253 and 2101(b) of the Judicial Code, 28 U. S. C. §§1253 and 2101(b).

STATUTES INVOLVED

The National Transportation Policy, 49 U.S.C. preceding §1, and Sections 5(2)(a), 5(2)(b), 206, 207, 208(a) and 212 of the Interstate Commerce Act, as amended, 49 U.S.C. §§5(2)(a), 5(2)(b), 306, 307, 308(a) and 312, are set forth verbatim in Appendix A hereof.

QUESTIONS PRESENTED

1. Whether the record before the Interstate Commerce Commission in Docket No. MC-29130 (Sub-No. 70), *The Rock Island Motor Transit Company Common Carrier Application,* fails to support the Commission's report and order authorizing unrestricted motor-carrier operations by the Rock Island Motor Transit Company, a wholly-owned subsidiary of the Chicago, Rock Island and Pacific Railroad Company, between the points directly involved, as well as between points throughout a much broader territory not directly involved in the proceeding before the Commission?

It is appellants' contention that the record before the Commission is totally devoid of evidence to support a need for service between the major points involved.

2. Whether, in any event, the Interstate Commerce Commission, in authorizing the performance of motor-carrier service by railroads or their affiliates, is required by the provisions of the Interstate Commerce Act and the National Transportation Policy to limit the motor service to be rendered to that which is auxiliary to or supplemental of the rail service of the parent railroad?

It is appellants' contention that the Congressional policy permits no exceptions, and that the Commission has no discretion to deviate therefrom.

3. Whether the Interstate Commerce Commission, after authorizing the performance of restricted motor-carrier service by a railroad affiliate over routes acquired by purchase under Section 5 of the Interstate Commerce Act, 49 U. S. C. §5, lacks the power to void such restrictions and authorize the performance of an unlimited motor-carrier service over the same routes through approval of an application subsequently filed by the same rail affiliate under Section 207 of the Interstate Commerce Act, 49 U. S. C. §307?

The last question was dealt with in complete detail, both in brief and on oral argument before the lower court, by counsel for the rail labor groups, intervening plaintiffs below. As they can be expected to develop it fully before this Court, these appellants will not further treat with it herein.

STATEMENT

This is the first case, in the more than twenty years of federal regulation of motor carriers, in which this Court has been called upon to determine the perimeter of the Commission's power to authorize the performance of unlimited truck service by a railroad or its subsidiary. In all previous cases, with unimportant exceptions, the Commission has restricted the authority granted in order to assure that the motor service rendered would be limited to operations auxiliary to, or supplemental of, the train service of the railroad. The case at bar represents, for the first time, a complete abandonment by the Commission of its duty to protect the public interest in an independent motor-carrier industry through the imposition of restrictions upon rail operation of motor vehicles. And in so doing, as will be more fully developed

later, the Commission has abruptly reversed its interpretation of the statutory safeguards enacted by Congress to assure the continued development and preserve the inherent advantages of an independent motor-carrier system. This violation of Congressional policy creates the novel question here presented. Not only does it do violence to the Commission's consistent interpretation, but it overrules what this Court decided, at least inferentially, in the *Rock Island* and *Texas and Pacific* cases, *infra.*

Much of the history of this proceeding was recited by this Court in its 1951 decision in the *Rock Island* case, *infra,* at 340 U. S. 421-430, 71 S. Ct. 385-389. Its repetition herein is for the sake of convenience and continuity.

The Commission Approved the Purchase of White Line for Restricted Operations.

The controversy herein can be said to have originated twenty years ago, when the Chicago, Rock Island and Pacific Railroad Company, a common carrier by railroad subject to part I of the Interstate Commerce Act, 49 U. S. C. §1 *et seq.,* became interested in conducting motor-carrier operations paralleling its lines between Chicago, Illinois, and Omaha, Nebraska. Through a subsidiary company, The Rock Island Motor Transit Company, the railroad on October 13, 1937, filed an application with the Interstate Commerce Commission for authority under Section 213 (now Section 5 of the Interstate Commerce Act, 49 U. S. C. §5) to purchase certain operating rights and property of White Line Motor Freight Company, Inc., and White Line Trucking Company, motor carriers of property subject to part II of the Act, 49 U.S.C. §301 *et seq.,* hereinafter collectively called White Lines. In its report conditionally approving the purchase, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.,* 5 M.C.C. 451, dated April 1, 1938, the Commission, Division 5, after referring to the considerable testimony that had been of-

fered to show how the correlation of truck-and-rail service over the routes would be effected, found, as required by statute (formerly §213, now §5(2)(b)), that the purchase would promote the public interest by enabling the railroad to use service by motor vehicle to public advantage in its operations and would not unduly restrain competition. Nevertheless the Commission expressly conditioned the authority granted "to such further limitations, restrictions, or modifications as we may find it necessary to impose or make in order to insure that service shall be auxiliary or supplementary to train service of the railroad and shall not unduly restrain competition." *Id.*, at 5 M.C.C. 458. The certificate, authorizing operations between Silvis, Illinois, and Omaha, Nebraska, and containing the foregoing reservation, was issued to Motor Transit on December 3, 1941.

The Commission Approved the Purchase of Frederickson for Unrestricted Operations.

Subsequently, on November 28, 1944, in *Rock Island M. Transit Co.—Purchase—Frederickson,* 39 M.C.C. 824, the Commission, Division 4, approved the purchase by Motor Transit of motor-carrier operating rights between Atlantic, Iowa, an intermediate point on the White Lines route, and Omaha, that would permit future truck operations by Motor Transit to follow the line of the railroad much more closely than had the previously-acquired routes. However, the report did not confine Motor Transit to auxiliary and supplemental service. Because of the inconsistency of having truck operations over one route restricted and those over an alternate route unrestricted, the Commission, on February 5, 1945, before the Frederickson certificate was issued, ordered both finance proceedings and the applicable compliance docket reopened for reconsideration.

The Commission Reconsidered Both Cases and Restricted the Combined Operations.

The Commission on reconsideration issued a comprehensive report, *Rock Island M. Transit Co. — Purchase — White Line M. Frt.*, 40 M.C.C. 457, dated March 4, 1946, wherein it found that the White Lines certificate should be amended and the Frederickson certificate restricted so as to require that all future operations conducted thereunder should be subject to five express conditions insuring auxiliary and supplemental service. Following this report Motor Transit petitioned for reconsideration, and on June 9, 1947, the Commission reopened the proceedings for further hearing. The report of the Commission on further hearing, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 55 M.C.C. 567, dated April 11, 1949, affirmed the prior report, including the imposition of the auxiliary and supplemental restrictions.

Thereupon Motor Transit filed a complaint in the U. S. District Court for the Northern District of Illinois, Eastern Division, and in *Rock Island Motor Transit Co.* v. *United States*, 90 F. Supp. 516, decided November 29, 1949, the three-judge court set aside the Commission's report and order.

The Supreme Court Upheld the Restrictions.

On appeal this Court reversed the decision of the District Court and sustained the Commission's imposition of the auxiliary and supplemental restrictions. The Court in its decision of February 26, 1951, in *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 71 S. Ct. 382, agreed with the Commission that, under the circumstances, it was required to restrict the motor-carrier operating rights acquired pursuant to the provisions of Section 213 to the rendition of service auxiliary to, and supplemental of, the rail service of the railroad. Rehearing was denied by this Court on April 9, 1951. *United States*

v. *Rock Island Motor Transit Co.*, 341 U. S. 906, 71 S. Ct. 609.

The Commission Granted Temporary, then Permanent, Unrestricted Rights.

The certificate with the auxiliary and supplemental restrictions attached was issued to Motor Transit on September 11, 1951.[1] In the meantime, however, Motor Transit had applied for and had been granted temporary authority under Section 210a of the Interstate Commerce Act, 49 U. S. C. §310a, to operate over virtually identical routes to those it had acquired through the White Lines and Frederickson purchases under somewhat less restrictive conditions than those contained in the certificate issued September 11, 1951.[2] On October 26, 1951, Motor Transit filed an application under Section 207, 49 U. S. C.

---

[1] The certificate was limited by the following restrictions:

1. The service to be performed by The Rock Island Motor Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not render any service to, or from; or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.

4. All contractual arrangements between the Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

[2] The temporary authority was limited to shipments of 2,000 pounds (later increased to 5,000 pounds), and certain key-point restrictions were imposed.

§307, for permanent authority to perform unrestricted motor carrier operations over the pertinent routes. Hearings were held in this proceeding, docketed as No. 29130 (Sub-No. 70), on March 18 through April 21, 1952, and on May 20, 21, and 22, 1952, at Des Moines, Iowa. Almost a year later, on April 21, 1953, the examiner's recommended report and order (R. 1) was served upon the parties. After the filing of exceptions and replies thereto oral argument was had before the Commission on March 8, 1954. By its report and order of November 22, 1954, in *The Rock Island Motor Transit Company Common Carrier Application,* (R. 93) 63 M. C. C. 91, complained of herein, the Commission granted Motor Transit's Section 207 application, finding that the present and future public convenience and necessity required Motor Transit's operations between Silvis and Omaha free of any auxiliary and supplemental restrictions. While Silvis and Omaha are the extremeties of the operations that would be authorized by the report and order herein, it is clear that by "tacking" these rights to rights it has acquired previously Motor Transit would be able to perform all-out trucking in an area ranging from Minneapolis-St. Paul on the north, Kansas City on the south, Chicago on the east and Omaha on the west. The appellants herein, protestants and interveners in the Commission proceeding, on February 16, 1955, petitioned the Commission for reconsideration of its report, and Motor Transit and interveners in its behalf resisted. The petition for reconsideration was denied by order (R. 122, 137) of the Commission dated July 6, 1955, served July 14, 1955, corrected copy served July 27, 1955.

The District Court Upheld the Commission's Grant.

Appellants, plaintiffs below, filed their complaint (R. 85) in the District Court on July 20, 1955. The case was heard by the District Court on December 15, 1955. The opinion (R. 192) was rendered January 11, 1956, and the

judgment (R. 195), January 27, 1956. The notice of appeal (R. 197) was filed March 23, 1956. Probable jurisdiction was noted by this Court on October 8, 1956 (R. 204), 352 U. S. 816, 77 S. Ct. 36.

SUMMARY OF ARGUMENT

The Commission's report and order complained of herein would confer upon Motor Transit a broad grant of authority to conduct motor-carrier operations not auxiliary to or supplemental of the train service of its parent railroad. In the area directly involved comprising a total of approximately 500 miles of routes, serving such important points as Chicago, Des Moines, Cedar Rapids and Omaha, the proposed operations would constitute a complete departure from the type of service contemplated by the statute and heretofore authorized by the Commission.

Further, the record before the Commission makes it clear that the railroad subsidiary, by "tacking" the authority granted by the Commission to authority already held, would be able to perform completely unrestricted motor-carrier service over a much broader area than that directly involved in the proceeding before the Commission, including, for example, service between such important points as Chicago and Kansas City. This without a scintilla of evidence in the record before the Commission of any need for such additional motor-carrier service and in the teeth of the Commission's holding, at an earlier stage of this same proceeding, that a railroad applicant for motor-carrier operating authority "has a special burden, not by reason of any attitude or action on our part, but by reason of the very circumstance that it is a railroad."[3]

---

[3] *Rock Island Mtr. Transit Co.—Purchase—White Line M. Frt., supra*, at 40 M. C. C. 474. Report of the entire Commission on reconsideration.

Whether it be viewed as the lifting of auxiliary and supplemental restrictions imposed on motor carrier operating authority previously acquired by purchase or as a grant of new authority not subject to auxiliary and supplemental restrictions, the Commission's report and order complained of herein violates the letter and the spirit of the law, to wit, the National Transportation Policy and Sections 5(2)(b) and 207 of the Interstate Commerce Act, and is contrary to the decisions of the Commission and this Court. The report and order ignores completely the first prerequisite to Commission approval that the service by motor vehicle be for use by the parent railroad *in its operations*. It pays lip service only to the further prerequisite, which it could not validly reach, that the proposed operation is in furtherance of the public interest and will not unduly restrain competition. However, even assuming the Commission had been able to make the necessary findings, the only operations that could be approved nevertheless would be auxiliary and supplemental operations, and the Commission would be required, as it is in the case of every grant to a railroad or to a railroad affiliate of authority to operate as a common carrier by motor vehicle or to acquire such authority by purchase or otherwise, to condition the authority so as definitely to limit future service by motor vehicle to that which is auxiliary to, or supplemental of, train service.

The import of the Commission's grant of unrestricted motor-carrier authority to Motor Transit far transcends consideration of the immediate needs of the shippers and receivers of freight in the affected area, the willingness and ability of the existing motor carriers to satisfy that need, or the impact of the added competition of a railroad-sustained, State-protected subsidiary motor car-

rier.[4] Being the first case involving an attempt to award unrestricted motor rights of such magnitude to a railroad or its subsidiary, this proceeding presents the basic question of the proper relationship between the railroads and the motor carriers. Is the latter mode of transportation to continue the measure of independence of the control of the former that has existed in the past? Is an independent motor carrier industry, contemplated by the National Transportation Policy and the Interstate Commerce Act to be supplanted, through Commission fiat, by fully integrated transportation rendered by the railroads and their wholly-owned subsidiaries?

The Interstate Commerce Commission from the time of the *Barker* decision, *infra*, until its report and order complained of herein has recognized its duty of confining motor-carrier operations of railroads or their subsidiaries to service auxiliary to, and supplemental of, their rail service. In accordance with the Congressional mandate it has sought to maintain the integrity of the independent

---

[4] Motor Transit is the only motor carrier with intrastate authority to operate over U. S. Highway 6 between the Iowa points involved herein. This intrastate monopoly (R. 98), conferred by the Iowa State Commerce Commission, enables Motor Transit to transport in the same vehicle combined loads of interstate and intrastate traffic to and from the small Iowa points, much more economically than can the independent motor carriers which are denied the right to transport intrastate freight. The Commission, clearly aware of this, nevertheless subordinated its duty, set forth in the *Parker* case, *infra*, to guard against a transportation monopoly, in favor of Iowa's policy directly to the contrary, by authorizing Motor Transit to handle interstate traffic to and from the same small Iowa points with no restrictions imposed. If the Commission's decision is allowed to stand, the Iowa intrastate monopoly granted Motor Transit will inevitably ripen into a complete monopoly, both of inter- and intrastate freight. This is bad enough in itself, but the Commission grossly compounds its error by allowing Motor Transit to conduct unrestricted operations between major cities throughout the parent railroad's system, in Iowa and elsewhere, despite the absence of a shred of record evidence to support a need for such service.

motor-carrier industry. To be sure, appellants believe the Commission has been altogether too generous in authorizing the railroads to engage in over-the-road trucking operations in the performance of so-called auxiliary and supplemental service. It has glossed over the statutory requirements that the railroads establish that their acquisition of existing motor-carrier operating authority is in the public interest (Section 5(2)(b)) or that their inauguration of a new motor-vehicular operation is required by the public convenience and necessity (Section 207). It has permitted railroads to operate inter-city trucks in feeder service and service in substitution for way freight trains upon a mere showing that the railroads thereby could achieve certain economies; the Commission's decisions "construe the statute as if 'railroad convenience and necessity' rather than 'public convenience and necessity' were the standard." Mr. Justice Douglas, dissenting in the *Parker* case, *infra*, at 326 U.S. 74, 65 S. Ct. 1497. But even though its standard of public need in the case of rail applications to perform truck service has been different (and much easier to satisfy) than has been the case in connection with applications by independent motor carriers, nevertheless the Commission has never heretofore authorized a railroad to conduct unrestricted trucking operations of the magnitude of those involved herein.

By the departure from its policy that the decision herein represents the Interstate Commerce Commission would permit the complete integration of truck and rail transportation. Not confined to operations auxiliary to, and supplemental of, the train service of the parent railroad company, the grant of unrestricted motor-carrier operating authority would enable the railroad subsidiary to compete all-out with independent motor carriers and indeed with the railroad itself. The subsidiary, relying on the financial and soliciting resources of the parent

railroad, would be such a potent competitor that it soon would be able to dominate the field and eventually drive the independent motor carriers from the roads. A motor industry owned or controlled by the railroads certainly was not what Congress had in mind. The appellants here are not objecting to the use of trucks by the railroads in pick-up and delivery services, feeder service or service in substitution for way freight trains. Stated differently, they are not objecting to a railroad's use of trucks in service auxiliary to, or supplemental of, the railroad's train service. They are, however, objecting to the entry of the railroads into the trucking business through subsidized motor affiliates rendering an unrestricted trucking operation such as would otherwise be rendered by the independent motor carriers. In short, our objection goes to the fundamental departure from policy which is inherent in the Commission's decision—the complete abandonment of the rule, consistently applied since motor carriers came under federal regulation, that railroad use of motor vehicles must be so tied in with their train operations as to enable the Commission to hold that the motor service authorized is for the purpose of improving the railroad's train service, as distinguished from the performance of a completely independent motor service. Appellants believe that Congress by the enactment of the National Transportation Policy and the provisions of Sections 5(2)(b) and 207 of the Interstate Commerce Act made it abundantly clear that the Commission was not empowered to authorize railroads to perform motor-carrier service completely divorced from their train operations. Indeed, both the Commission and the Government, in their joint brief filed in this Court in 1951 in the *Texas and Pacific* case, subscribed to this view. See discussion, *infra*, pp. 25 and 26.

The Interstate Commerce Commission by promulgating the order complained of went counter to the Congressional direction and exceeded its lawful authority.

ARGUMENT

The Proviso of Section 5(2)(b)—Formerly Section 213

Congressional Policy Against Integration of Competing Modes of Carriage Long Antedated the Motor Carrier Act.

The principle that competing media of transportation should not be commonly owned or controlled was well established by the time interstate motor carriers came under federal regulation. The Panama Canal Act of 1912, 37 Stat. 566, 49 U.S.C. §5 (14), (15) and (16), and the legislative debates thereon announced in unequivocal terms the desire of Congress to keep each form of transportation independent of ownership or control by carriers with which it was in actual or potential competition. "The proper function of a railroad corporation is to operate trains on its tracks, not to occupy the waters with ships in mock competition with itself, which in reality operate to the extinction of all genuine competition." H. R. Rep. No. 423, 62nd Cong., 2nd Sess. (1912), p. 12.

Two years after the passage of the Panama Canal Act Congress enacted the Clayton Act, 38 Stat. 731, 15 U.S.C. §18, applicable to railroads as well as other corporate enterprises, which prohibited the acquisition by one corporation engaged in interstate commerce of stock in another such corporation if "the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly." Later Section 500 of the Transportation Act of 1920, 44 Stat. 499, 49 U.S.C. §142, declared it "to be the policy of Congress to promote, encourage, and develop water transportation, service, and facilities in connection with the commerce of the United States, and to foster and preserve in full vigor both rail and water transportation". In the same vein Congress, in establishing the Inland Waterways Corporation, speci-

fied that "no member of the board shall be an officer, director, or employee of or substantially interested in, any railroad corporation." 43 Stat. 361, 49 U.S.C. §154. Congress further directed "that the facilities of the corporation shall not be sold or leased (1) to any carrier by rail or to any person or company directly or indirectly connected with any carrier by rail." 45 Stat. 978, 49 U.S.C. §153.

It was to be expected, therefore, that, when the motor carrier industry had grown to such importance that it become desirable to bring it under Federal regulation, the Congress, notwithstanding the recommendation of the Interstate Commerce Commission that the railroads should be permitted to engage in the transportation of freight by motor truck on an equal basis with independent operators, *Coordination of Motor Transportation*, 182 I.C.C. 263, 377, would safeguard the motor carrier industry, as it had the water carrier industry, from domination and control by the railroads or other competitive transportation media.[5] Indeed, **"there was strong opposition to permitting the railroads to acquire motor carriers at all. . . . the proviso [of Section 213] was intended to do no more than to authorize that the railroads be permitted to acquire motor carriers for use of the motor service in their own operations, principally way-train and terminal operations. Indeed, all the legislative history, including the historical background thereto, confirms this view, as do the early Commission motor carrier reports, since consistently followed."** Brief for U.S. and I.C.C. before Supreme Court in *U. S. v. T. & P. Motor Transp. Co.*, p. 35.

---

[5] Comparable limitations upon ownership or control by competing transportation agencies subsequently were included in the legislation bringing air carriers under Federal regulation. Section 408 of the Civil Aeronautics Act of 1938, 49 U.S.C. §488.

Congress Forbade Railroad Control of the Motor Carrier Industry.

By Section 213 of the Motor Carrier Act of 1935 (now included in Section 5 of the Interstate Commerce Act) the Interstate Commerce Commission, which had been charged with the Act's enforcement, was authorized to approve the acquisition of control of a motor carrier by another such carrier upon a finding, after hearing, that "the transaction proposed will be consistent with the public interest". However, should the applicant for Commission approval be "a carrier other than a motor carrier"—that is, a carrier by railroad, express or water—the Commission was precluded from acting favorably thereon unless the proposed transaction met the following three requirements:

1) It would "promote the public interest":

---

[6] Whenever a consolidation, merger, purchase, lease, operating contract, or acquisition of control is proposed under this section, the carrier or carriers or the person seeking authority therefor shall present an application to the Commission, and thereupon the Commission shall notify the Governor of each State in which any part of the properties or operations of the carriers involved in the proposed transaction is situated, and also such carriers and the applicant or applicants, and other parties known to have a substantial interest in the proceeding of the time and place for a public hearing. If after such hearing the Commission finds that the transaction proposed will be consistent with the public interest and that the conditions of this section have been or will be fulfilled, it may enter an order approving and authorizing such consolidation, merger, purchase, lease, operating contract, or acquisition of control, upon such terms and conditions as it shall find to be just and reasonable and with such modifications as it may prescribe: *Provided, however,* That if a carrier other than a motor carrier is an applicant, or any person which is controlled by such a carrier other than a motor carrier or affiliated therewith within the meaning of section 5 (8) of part I, the Commission shall not enter such an order unless it finds that the transaction proposed will promote the public interest by enabling such carrier other than a motor carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

2) It would enable the acquiring carrier "to use service by motor vehicle to public advantage in its operations"; and
3) It would "not unduly restrain competition."

In speaking of this limitation on the right of the railroads to acquire motor carriers Chairman Sadowski of the Subcommittee of the House Committee on Interstate and Foreign Commerce said:

> Section 213 provides that the Commission shall control the consolidation, merger, and acquisition of control of motor carriers. I will say in this respect that it is the intent, and it is important to the welfare and progress of the motor-carrier industry, that the acquisition of control of the carriers be regulated by the Commission so that the control does not get into the hands of other competing forms of transportation, who might use the control as a means to strangle, curtail, or hinder progress in highway transportation for the benefit of the other competing transportation. 79 Cong. Rec. 12206, July 31, 1935.[7]

To the same effect, Senator Burton K. Wheeler, then Chairman of the Senate Committee on Interstate Commerce, said of the proviso in Section 213 of the Bill:

---

[7] Commissioner Joseph B. Eastman of the Interstate Commerce Commission, the most distinguished transportation authority of his time, testifying in 1938 before a subcommittee of the Senate Committee on Interstate Commerce, said of the proviso:

> The reason for that proviso was that at the time when this act was under consideration by your committee, there was a feeling on the part of many that railroads, for example, ought not be permitted to acquire motor carriers at all. It was pointed out, in opposition to that view, that there were many cases where railroads could use motor vehicles to great advantage in their operations, in substitution for rail service, as many of them are now doing. Many railroad men, for example, feel that the operation of way trains has become obsolete; that the motor vehicle can handle such traffic between small stations much more economically and conveniently than can be done by a way train; and the motor vehicles are being used in that way by many railroads. The same is true of many terminal operations. The motor vehicle is a much more

With this limitation, it will be possible for the Commission to allow acquisitions which will make for coordinated or more economical service and at the same time to protect the public against the monopolization of highway carriage by rail, express, or other interests. 79 Cong. Rec. 5655, April 15, 1935.

In the* Barker *Case the Commission Properly Viewed its Duties Pursuant to the Proviso.

The leading early Commission motor carrier report dealing with the problem of rail utilization of trucking facilities was *Pennsylvania Truck Lines, Inc.—Control—Barker*, 1 M.C.C. 101, decided October 8, 1936. Therein a motor-carrier subsidiary of the Pennsylvania Railroad Company applied for Commission aproval for the purchase of the operating rights of an independent motor carrier for the purpose of offering motor-vehicle service, on the one hand fully coordinated with, and on the other hand completely disassociated from, the rail operations of the railroad. The Commission, Division 5, after re-

---

flexible unit than a locomotive switching cars, and it can be used to great advantage and with great economy in many railroad operations.

For that reason, something of a compromise was reached between those two opposing views, and it was provided that a railroad could acquire a motor carrier if it could make special proof that the transaction was not only consistent with the public interest but would promote the public interest in a special way, namely by enabling such carrier other than a motor carrier to use service by motor vehicle to public advantage in its operations. And a further finding was required, that the acquisition will not unduly restrain competition.

Now, in drafting that, while it was aimed particularly at railroad acquisitions, the general expression "carrier other than a motor carrier" was used, it being felt that the same thing might apply to water carriers possibly or possibly to express companies or possibly to electric railways in certain situations. Hearings before a Subcommittee of the Senate Committee on Interstate Commerce on S. 3606, 75th Cong., 3rd Sess., p. 23.

viewing the provisions of Section 213, observed, "It is the obvious intent of the act that special safeguards shall surround acquisitions of motor carriers by carriers engaged in other forms of transportation, and no doubt railroads were particularly in mind." 1 M.C.C. 109. The Commission, at 1 M.C.C. 111, declined to give its approval to the purchase, setting forth its reasons in what since has become the classic statement of the rationale underlying the separation of rail and truck ownership or control:

> While we have no doubt that the railroad could, with the resources at its command, expand and improve the partnership service and that, so far as numbers are concerned, there is now an ample supply of independent operators in the territory for the furnishing of competitive service, we are not convinced that the way to maintain for the future healthful competition between rail and truck service is to give the railroads free opportunity to go into the kind of truck service which is strictly competitive with, rather than auxiliary to, their rail operations. The language of section 213, above quoted, is evidence that Congress was not convinced that this should be done. Truck service would not, in our judgment, have developed to the extraordinary extent to which it has developed if it had been under railroad control. Improvement in the particular service now furnished by the partnership might flow from control by the railroad, but the question involved is broader than that and concerns the future of truck service generally. The financial and soliciting resources of the railroads could easily be so used in this field that the development of independent service would be greatly hampered and restricted, and with ultimate disadvantage to the public.

Thus, at the very inception of its regulation of the motor-carrier industry, the Commission construed the governing statute as requiring it to restrict rail use of motor vehicles in such a manner as to insure against rail control and consequent retardation of the future

development of independent truck service. Until this proceeding it has insisted that the motor-carrier service furnished by a railroad or an affiliated company "be confined to service auxiliary and supplementary to that performed by the . . . [railroad] in its rail operations. . . ." 1 M.C.C. 113. Spelling out exactly what it meant by such limitation the Commission, Division 5, said in a supplemental report in the *Barker* case, at 5 M.C.C. 9, 11:

> Approved operations are those which are auxiliary or supplementary to train service. Except as hereinafter indicated, nonapproved operations are those which otherwise compete with the railroad itself; those which compete with an established motor carrier, or which invade to a substantial degree a territory already adequately served by another rail carrier.

The principle of the *Barker* case, that a railroad should be authorized to engage in motor-carrier operations only to the extent that it employs such service in operations auxiliary and supplementary to its train service, was approved by the full Commission in *Northland—Greyhound Lines, Inc.—Purchase—Liederbach*, 5 M.C.C. 215, and was followed by Division 5 in at least ten other acquisition proceedings under Section 213 of the Act during the following two years.[8]

The Proviso Applied to Section 207

The Declaration of Policy Called for the Preservation of the Inherent Advantages of Truck Transportation.

While the express limitations upon railroad participation in truck transportation, contained in Section 213, were not repeated in Section 207 of the Act, 49 U.S.C. §307, governing the issuance of motor-carrier certificates of public convenience and necessity, that section, as any other, was required to be read in connection with the rest of the Act and interpreted with due regard to its manifest purpose. This Court has applied this principle to the Interstate Commerce Act. *Nashville, C. & L. Ry. v. State of Tennessee*, 262 U.S. 318, 43 S.Ct. 583.

Section 202 of the Motor Carrier Act, now expanded into the National Transportation Policy, 49 U.S.C. preceding §1, required the Commission "to regulate transportation by motor carriers in such manner as to recognize and preserve the inherent advantages of, and foster sound economic conditions in, such transportation and among such carriers." It declared further that motor carrier service should be rendered without "unfair or destructive competitive practices" and that the Commission should "improve the relations between and coordinate transportation by and regulation of, motor carriers and other carriers."

In speaking of this provision in the debate preceding enactment of the bill that became the Motor Carrier Act, Senator Wheeler said:

> Subsection (a) [of Section 202] contains a comprehensive declaration of policy. As amended, it makes clear that the policy of Congress is to deal fairly and impartially with transportation by motor carriers and to preserve the natural advantages of such transportation.
>
> . . . we specifically wrote into the bill, in the declaration of policy provision, and at other places throughout the bill, that the peculiar features of

transportation by truck and by bus should be taken into consideration at all times by the Interstate Commerce Commission, and we put such a provision in the declaration of policy. 79 Cong. Rec. 5650, April 15, 1935.

We tried to modify it [the bill] as much as possible to take away any fear that might exist in the minds of some that the motor buses and trucks were going to be regulated in the interest of the railroads. 79 Cong. Rec. 5657, April 15, 1935.

The Statement of Commissioner Eastman Revealed the Commission Would Give Effect to the Proviso in Reading the Act as a Whole.

As early as 1938 it was firmly settled that the Commission was bound as strongly under Section 207 as under Section 213 to limit a railroad's motor-carrier operations to those which are auxiliary to, and supplemental of, its rail service. It was in March of that year that Commissioner Eastman, speaking for the Commission, testified on S. 3606, a bill to amend certain sections of the Motor Carrier Act, before a subcommittee of the Senate Committee on Interstate Commerce, 75th Congress, 3rd Session. Senator Shipstead, a member of the Committee, had offered an amendment to the bill which would have added an express proviso to Section 207, as was contained in Section 213, requiring the Commission to deny the application filed by a carrier other than a motor carrier unless it found "that the transaction proposed will promote the public interest by enabling such carrier other than a motor carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition." Hearings on S. 3606, Senate Committee on Interstate Commerce, 75th Cong., 3rd Sess., p. 23.

The purpose of the amendment was explained in an exchange between Senator Shipstead and Commissioner Eastman, as follows:

Senator Shipstead. Well, there has been an apprehension that the things prohibited in the Act, so far as purchasing and acquiring are concerned, and the denial to purchase and acquire, can be secured in this way: That they can acquire indirectly, by a certificate, what they cannot otherwise acquire.

Commissioner Eastman. I think you mean that they could acquire a motor carrier and make the requisite proof under Section 213, and then could extend the operations of that motor carrier without making any such proof. And your proposed amendment, here, is intended to correct that situation.

Senator Shipstead. Yes; it is intended to clarify what seems to be a misunderstanding as to the act. I think the intention of Congress was perfectly plain. But the question has arisen, and in order to avoid any further controversy, this amendment is introduced. It would change the whole policy of the act, if they could proceed to acquire by certificate what they are not directly permitted to do. The question is whether that should be allowed to continue. (Hearings, pp. 28 and 29)

Commissioner Eastman stated that the Commission did not oppose the amendment, but he expressed some doubt that it actually was necessary in view of the Commission's probable construction of the pertinent provisions of the Act.

Commissioner Eastman . . . We have indicated that it seems to us consistent with the policy now reflected in section 213(a), paragraph 1; that his amendment should be added to section 207(a).

In other words, if a railroad must submit special proof that the public interest will be promoted in certain respects, before it can acquire a motor carrier, it seems entirely consistent that it shall make such special proof when it seeks to extend the operations of a motor carrier which is already under its control. So we have no objection to offer to the amendment.

As a matter of fact, I think it could be argued with a great deal of force that in interpreting and

applying the provisions of section 207(a) as it now stands, the Commission should read the act as a whole and take cognizance of this policy which is now reflected in section 213(a)(1).

* * * *

. . . If I had to pass on the issue now, I should say that in administering the provisions of section 207, it would be the duty of the Commission to read the act as a whole and to apply the same policy with respect to the extension of operations of a railroad-controlled motor carrier as is provided by the proviso of section 213.

Senator Johnson of Colorado: Under the present law?

Commissioner Eastman: Under the present law. (Hearings, pp. 27-30)

The following day, relying on Commissioner Eastman's representation that his amendment was unnecessary, Senator Shipstead withdrew the amendment.

Senator Shipstead: . . . In view of the statement made by Commissioner Eastman for the Commission as to their view of this matter, and also his personal view, that he thinks the provision of this amendment is already in the law, and that . . .

Senator Johnson of Colorado (interposing) . . . that is, you mean the Shipstead amendment?

Senator Shipstead: Yes; that it is already in the law, and evidently he considers it unnecessary at the present time. So, in order to save the time of the subcommittee, and in order to facilitate advancing the Commission's recommendations for amendments to the Motor Carrier Act, I withdraw, for the present at least, the amendment I offered. I think we will stand on the Commission's point of view, and the personal view of Commissioner Eastman. (Hearings p. 141.)

Commissioner Eastman's testimony clearly indictated that a proper interpretation of the statute required the

Commission to read the proviso of Section 213 into Section 207 whenever a railroad or rail-controlled motor carrier sought to extend its operations under the latter section. The legislative history of the 1938 amendments to the Motor Carrier Act, demonstrates that Congress was satisfied that the Interstate Commerce Commission would apply the restrictive proviso of Section 213 to proceedings under Section 207 as well.

The testimony of Commissioner Eastman was quoted in part and with approval by the Commission and the Government at pages 31 and 32 of their joint brief in the *Texas and Pacific* case, and later in the brief, at pages 53-55, they said:

> **To be sure, section 207 does not contain a provision like that in section 213 (now sec. 5), imposing restrictions and requiring special findings in instances where the applicants are railroad subsidiaries. But that section does preclude the Commission from granting a certificate of operating authority unless it is able to find that the proposed operations are required by public convenience and necessity; and, in instances of applications by railroad subsidiaries, the Commission, in the practical administration of section 207, is confronted with substantially identical obstacles and problems as in cases of applications by railroad subsidiaries under section 213. Like section 1 (18), which forbids the railroads from extending their lines unless authorized by the Commission based on findings that the extension is required by public convenience and necessity, section 207 was enacted by Congress to enable the Commission to control and prevent wasteful competition and destructive competitive practices. Although section 213 (now sec. 5) deals with the acquisition of existing motor carrier operations, which, as acquired by railroad subsidiaries, would presumably be taken out of the field of independent existing competition, nevertheless, the purposes of Congress' transportation policy, declared when enacting the Motor Carrier Act, refute any inference that Congress, while closing the door to railroad suppression of motor carrier com-**

> **petition by means of acquiring through a subsidiary existing motor carrier operations, at the same time left open the unfettered opportunity to do the same thing by means of obtaining through a subsidiary authority to institute new motor carrier operations. So far as opportunity for suppression of competition is concerned, there is little difference, particularly in the motor carrier field, between the opportunity afforded through the control by a railroad of an already existing motor carrier and that afforded by control of one newly created. . .**

Reversing completely its 1951 argument, the Commission now lays great stress upon the absence from Section 207 of the specific language of the proviso of Section 5(2)(b). The failure to include such language in the section of the statute dealing with extension applications such as that involved here, says the Commission, allows it to ignore the Congressional mandate whenever it decides that restricting railroad operation of motor vehicles "is clearly not in the public interest." (R. 115), 63 M.C.C. 107-108. This effort of the Commission to arrogate to itself the prerogative which Congress has already exercised evokes the recent pronouncement of this Court in *N.L.R.B* v. *Lion Oil Co.*, 352 U.S. 282, 288, 77 S. Ct. 330, 334:

> In Mastro Plastics Corp. v. National Labor Relations Board, supra, we had before us another provision of §8(d). What we said there in ruling out a narrowly literal construction of the words of the statute is equally apropos here. "If the above words are read in complete isolation from their context in the Act, such an interpretation is possible. However, 'In expounding a statute, we must not be guided by a single sentence or member of a sentence, but look to the provisions of the whole law, and to its object and policy.' United States v. Boisdoré's Heirs, 8 How. 113, 122, 12 L.Ed. 1009." 350 U.S. at page 285, 76 S. Ct. at page 359. Moreover, in Mastro Plastics we cautioned against accepting a construction that "would produce incongruous results." Id., 350 U.S. at page 286, 76 S. Ct. at page 360.

In the Kansas City Southern *Case the Commission Properly Applied the Terms of the Proviso in a Section 207 Proceeding.*

Later in the year 1938 in the leading case of *Kansas City S. Transport Co., Inc., Com. Car. Application,* 10 M.C.C. 221, the Commission, Division 5, found that the principles and criteria laid down in the *Barker* case, *supra,* as applicable to acquisition proceedings under Section 213 were equally applicable to proceedings under Section 207. One observer, analyzing the developments, noted that it seemed unlikely that Congress intended, after creating a narrow doorway through which railroads must squeeze into the trucking field with difficulty, in the next breath to create a larger doorway through which the railroads could walk with more ease. J.E.E., "Interstate Commerce Act—Certificates of Public Convenience and Necessity—Railroad Application for Truck Lines to Haul Less-than-Carload Freight Between Railroad Way-Stations," Geo. Wash. L. Rev., 14: 838, Feb. '46.

In the *Kansas City Southern* case the railroad affiliate sought, under Section 207, motor common carrier rights to operate partly in auxiliary and supplemental service and partly in independent service. The Commission, Division 5, denied the application for independent service and granted, in part, that for auxiliary and supplemental service. After discussing the *Barker* decision, it made the limited grant, subject, however, to five conditions intended to insure that service would remain auxiliary and supplemental to the train service of the railroad.[9] The

---

[9] 1. The service to be performed by applicant shall be limited to service which is auxiliary to, or supplemental of, rail service of the Kansas City Southern Railway Company or the Arkansas Western Railway, hereinafter called the railways.

2. Applicant shall not serve, or interchange traffic at, any point not a station on a rail line of the railways.

3. Shipments transported by applicant shall be limited to those which it receives from or delivers to either one of the railways under a through bill of lading covering, in addition to movement

decision in the *Kansas City Southern* case thereafter was followed consistently, and by 1940 substantially identical restrictions had been imposed in disposing of numerous railroad applications for motor carrier operating authorities.[10]

The consistent imposition of restrictions intended to limit railroad motor-carrier operations to service auxiliary and supplemental of the train service of the railroad—in application proceedings under Section 207 as well as acquisition proceedings under Section 213—left no doubt as to how the Commission construed the requirements of the law. Section 213, prescribing that the motor service

---

by applicant, a prior or subsequent movement by rail.

4. All contractual arrangements between applicant and the railways shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to restrict applicant's operation to service which is auxiliary to, or supplemental of, rail service. [10 M.C.C. 240.]

be of public benefit in its, the railroad's operations, and Section 202, directing that the inherent advantages of motor carriers be preserved, imposed a duty upon the Commission to allow railroads to engage in motor-carrier operations only as such operations were coordinated with their rail operations.

Congress Approved the Commission's Application of the Proviso to Section 207 Proceedings.

Such was the construction of the Commission at the time that the Congress considered the legislation that became the Transportation Act of 1940, 54 Stat. 899 *et seq.* A number of cases which reflected the practice of the Commission of restricting railroad-affiliated motor carriers to the rendition of auxiliary and supplemental service had been specifically called to Congress' attention prior to the enactment of the 1940 Act. *United States v. Rock Island Motor Transit Co., supra*, at 340 U.S. 432. For example, the decision in the *Kansas City Southern* case was discussed at page 107 of the 53rd Annual Report of the Interstate Commerce Commission to Congress, and that in *Pennsylvania Truck Lines, Inc. Control—Barker, supra*, was discussed at pages 68 and 69 of the 51st Annual Report.

By the Transportation Act of 1940 the provisions of former Section 202 were broadened to embrace the other forms of transportation and became the National Transportation Policy. The provisions with respect to consolidations and mergers formerly in Section 213 were moved forward and incorporated into Section 5(2)(b) of the Act. While the phraseology was changed somewhat, the Congressional conferees made it plain "that it is not their intention, by changing the language of section 213 . . . to change the legislative intent of the Congress one iota with respect to the acquisition of a carrier by motor vehicle by a carrier by railroad, and that it is the intention of the conferees that section 5(2)(b), as

amended by section 7 of the conference report, shall have the same practical application and legal effect as section 213(a)(1) as it is now shown in Part II of the Interstate Commerce Act". 86 Cong. Rec. 10188, August 12, 1940. It is well established that such Congressional reenactment serves as an implied legislative approval of prior construction. *Johnson* v. *Manhattan Ry. Co.*, 289 U.S. 499, 500, 53 S.Ct. 721, 729; *Old Colony R. Co.* v. *Commissioner of Internal Revenue*, 284 U.S. 552, 557, 52 S. Ct. 211, 212; *Brewster* v. *Gage*, 280 U.S. 327, 337, 50 S. Ct. 115, 117. As this Court said in *N. Y., N. H. & H. R. Co.* v. *I.C.C.*, 200 U.S. 361, 26 S.Ct. 272, 281:

> . . ..a construction made by the body charged with the enforcement of a statute, which construction has long obtained in practical execution, and has been impliedly sanctioned by the reenactment of the statute without alteration in the particulars construed, when not plainly erroneous, must be treated as read into the statute.

Accordingly, if there had been any doubt that former Section 202 of the Motor Carrier Act required the Commission to read the provisions of Section 213, pertaining to purchase applications, into Section 207, dealing with extension applications, such doubt was removed finally by the enactment of the National Transportation Policy. The Commission and this Court in the *Rock Island* and *Texas & Pacific* cases, *infra*, in fact have recognized that this policy requires such construction.

Auxiliary and supplemental restrictions consistently applied to effectuate proviso

The Commission Consistently Restricted Grants of Motor Carrier Authority to Railroads to The Rendition of Auxiliary and Supplemental Service.

Since the original decision in the *Barker* case, the Commission has steadfastly held that railroads should

not be permitted to invade the field of motor service except for the purpose of conducting such motor carrier services as are auxiliary to and supplemental of rail service. Interstate Commerce Commission, Bureau of Transport Economics and Statistics, *Historical Development of Transport Coordination & Integration in the United States*, 1950, p. 108.

Where rail carriers have been granted motor-carrier operating authority, appropriate conditions similar to those set out in the *Kansas City Southern* case have been imposed. The imposition of these restrictions, as modified, was approved by the entire Commission in the *Kansas City Southern* case at 28 M.C.C. 5 and in *Chicago, M., St. P. & P.R. Co. Extension—Milwaukee Division*, 53 M.C.C. 341; *Kansas City S. Ry. Co. Extension of Operations*, 42 M.C.C. 74; *Rock Island M. Transit Co. Extension—Chicago—Joliet, Ill.*, 33 M.C.C. 459; and *Chicago, R. I. & P. Ry. Co. Ext.—Iowa, Mo., Kans., and Nebr.*, 30 M.C.C. 621. In these Section 207 application cases, in addition to the general requirement that the service be limited to that auxiliary to, or supplemental of, rail service, including particular restrictions against service at points not stations on the rail lines and so-called key-point restrictions, the Commission has reserved the right to impose in the future such further restrictions as may be found necessary to keep authorized services auxiliary to and supplemental of rail service.[11]

ity to a railroad subsidiary pursuant to its practice of applying the proviso of Section 5(2)(b) to proceedings under Section 207 first was sustained by this Court in *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60, 65 S. Ct. 1490. In reversing the lower court's setting aside of the Commission's order in *Willet Co. of Ind., Inc., Ext.—Fort Wayne—Mackinaw City*, 42 M.C.C. 721, this Court revealed its understanding of the Commission's obligation to consider railroad applications under Section 207 in the light of the limitations of Section 5(2)(b). The Court stressed and approved the fact that the Commission had restricted the certificate under consideration to the rendition of truck transportation which was "truly supplementary or auxiliary to the rail traffic", *id.* at 326 U.S. 63; 65 S. Ct. 1492, and that such limitation was consonant with the legislative history of the Motor Carrier Act which clearly was not intended to "bar" railroads from the operation of motor vehicles but which sought to limit such operations to "appropriate places." *Id.* at 326 U.S. 67, 65 S. Ct. 1494. The Court concluded, at 326 U.S. 69, 65 S. Ct. 1495:

> Since, however, on adequate evidence the Commission found that the motor service sought was of a different character from the existing motor service and not directly competitive or unduly prejudicial to the already certificated motor carriers, 42 M.C.C. 725-726, we hold that the Commission had statutory authority and administrative discretion to order the certificate to issue.

The converse is implicit in the Court's statement. In the absence of findings that the proposed motor-carrier service would be of a different nature from that presently being rendered by independent motor carriers, namely in auxiliary and supplemental service, and that it would not unduly restrain competition the Commission is without statutory authority to order the certificate to issue. Since the action of the Commission before the Court was

approval of an application for a certificate under Section 207 and no issue of acquisition was involved, the foregoing observation obviously represents recognition by the Court that the standards of Section 5(2)(b) must be applied by the Commission in a Section 207 proceeding. Such application would appear necessary because, in the words of this Court, "The Commission is trusted by Congress to guard against the danger of the development of a transportation monopoly . . . It has the duty to preserve the inherent advantages of each mode of transportation." *Id.*, at 326 U.S. 73, 65 S. Ct. 1497.

In a companion case, *American Trucking Ass'ns* v. *United States*, 326 U.S. 77, 65 S. Ct. 1499, this Court again looked to the requirements of Section 5(2)(b) in determining the validity of the Commission's grant of authority to a railroad in a Section 207 application proceeding. Reversing the decision of the lower court which had sustained the Commission's order in *Seaboard Air Line Ry. Co. Extension—Gaston—Garnett, S. C.*, 34 M.C.C. 441, the Court determined, at 326 U.S. 83, 65 S. Ct. 1502, that the Commission improperly excluded certain evidence offered to show the economic effect on the existing motor carriers of the proposed motor operation by the railroad and hence relevant to a finding that the proposed operation would be in the public interest and not unduly restrain competition. It is not sufficient, said the Court, that the Commission only find, as it did, that the railroad's trucking operations would be of a "specialized type coordinated with rail operations." Said the Court, at 326 U.S. 86, 65 S. Ct. 1503:

> It is not enough that the railroad's motor operations are found by the Commission to be of a different character from over-the-road motor operations because they are integrated with railroad operations. The Commission *must* also consider the disadvantage to the public of a serious impairment of the non-rail motor carriers. Those affected are entitled to fully

develop the bearing of the proposals on the transportation agencies which are involved. The discretion of the Commission should be exercised after consideration of all relevant information. [Emphasis added].

Patently, this evidence would have been irrelevant in a Section 207 proceeding were it not for the considerations required under Section 5(2)(b). Edward J. Hickey, Jr., "Surface Carrier Participation in Air Transportation Under the Civil Aeronautics Act", *Georgetown Law Journal*, Vol. 36, No. 2, January, 1948, pp. 125-153.

In the Rock Island *and* Texas & Pacific *Cases the Supreme Court Sustained the Commission's Imposition of Auxiliary and Supplemental Restrictions.*

Whatever doubt may have survived this Court's decisions in the *Parker* and *American Trucking* cases that the law required the Commission to examine a railroad's Section 207 application compatibly with the limitations of Section 5(2)(b) was dispelled by the Court's decisions in *United States* v. *Rock Island Motor Transit Co., supra*, and *United States* v. *Texas & Pacific Motor Transport Co.*, 340 U.S. 450, 71 S. Ct. 422, rendered February 26, 1951.

As was discussed previously herein, in the former case this Court reversed the decision of the three-judge district court which had set aside the order of the Interstate Commerce Commission in *Rock Island M. Transit Co.—Purchase—White Line M. Frt., supra*. The Commission had found that the motor-carrier operating rights purchased by the railroad subsidiary from Frederickson and White Lines, pursuant to Commission approval, should be subject in the future to the five conditions intended to limit the trucking operations to service auxiliary to, and supplemental of, the rail operations of the parent railroad. However, the lower court viewed the imposition

of the restrictions subsequent to the Commission's approval of the acquisitions without such express limitations as being a partial revocation of the authority granted and hence void unless in conformity with Section 212(a) prescribing the procedure for revocation.

This Court reversed, discussing at length the whole area of railroad ownership or control of motor-carrier operations. "The issues," said this Court in opening its remarks in the *Rock Island* case, *supra*, at 340 U.S. 422, 71 S. Ct. 385, "involve a basic power of the Commission to regulate the operations of motor carriers affiliated with railroads so as to assure that at all times the motor operations shall be consonant with the National Transportation Policy, 54 Stat. 899, 49 U.S.C.A., preceding section 301. The Commission has decided that that policy *requires* the motor operations of railroads and their affiliates to be auxiliary to and supplemental of train service." [Emphasis added.] In this construction this Court concurred.

Spelling out in greater detail what it understood the Commission's construction to be, the Court, after reciting the history of the proceeding, said, at 340 U.S. 427, 71 S. Ct. 387:

> The Commission understands the Declaration of Policy, §202(a) of the Motor Carrier Act, enacted at the inception of federal regulation of motor carriers in 1935, 49 Stat. 543, 49 U.S.C.A. §302, as directing it to preserve the inherent advantages of such transportation in the public interest. It finds support for this view in the National Transportation Policy set out in the 1940 amendments to the Interstate Commerce Act, 54 Stat. 899, declaring that the Act should be administered so as to recognize and preserve the inherent advantages of rail, motor and water transportation. It treats §213 of the Motor Carrier Act of 1935 and present §5 of the Interstate Commerce Act as authorizing mergers, consolidations and acquisitions between rail and motor car-

riers only within the Transportation Policy. Although §207, providing for the issuance of certificates of convenience and necessity, has no clause requiring special justification for railroads to receive motor-carrier operating rights, such as appears in the proviso in former §213 and present §5, the Commission applies the rules of the National Transportation Policy so as to read the proviso into §207 in order to preserve the inherent advantages of motor-carrier service.

The Court pointed out specifically, "The Commission has power at the time of its approval of an application to limit the authority to be granted by certificates of convenience and necessity for the operation of motor carriers, whether the certificate is issued on an original application under §207 or after acquisition under §213 of the Motor Carrier Act, §5(2), Interstate Commerce Act." 340 U.S. 430, 71 S. Ct. 389. The limitations restricting railroad motor-carrier operations to auxiliary and supplemental service, said the Court, were "in furtherance of the National Transportation Policy, for otherwise the resources of railroads might soon make over-the-road truck competition impossible." 340 U.S. 432, 71 S. Ct. 390. "The Commission reads into §207 the same requirement" that it does under §5(2)(b), continued the Court, and "thus a consistent attitude toward the use of motors by railroads is maintained." The Court's conclusion of a consistent attitude on the part of the Commission towards the consideration of railroad applications under Section 5(2)(b) and those under Section 207 takes on special meaning in the context of the Commission's precise pronouncement of what were its obligations under the law. In its brief in the *Texas & Pacific case* (relied on for the legal argument in the *Rock Island* case), wherein the restrictions placed upon motor-carrier operating rights attained by application under Section 207 as well as under Section 5(2)(b) were challenged, the Commission in the footnote on page 52 said:

> . . . if the motor operations of the railroad subsidiary were not a part of the railroad's operations at all, it would be a ***non sequitur*** to consider that the Commission should exercise its administrative judgment to determine whether or not the service by motor vehicle in such operations enabled the parent railroad to use motor service to public advantage in its operations or even to determine whether or not such operations unduly restrain competition. In short, as stated, the statute establishes as a first prerequisite to Commission approval, that the service by motor vehicle be for use by the railroad in its operations. It follows that, if the railroad subsidiary were to use the motor vehicle service in other operations, such, for example, as engaged in by independent motor carriers, a statutory presumption exists that such use would unduly restrain competition and is, therefore, forbidden by Congress.

Even assuming that this Court's observations were made gratuitously in the *Rock Island* case insofar as Section 207 proceedings were concerned, the Court relied upon its decision in the *Rock Island* case for rejecting all reasons for affirming the judgment below in the *Texas & Pacific* case, which, as previously stated, involved restrictions imposed upon Section 207 certificates. At 340 U.S. 458, 71 S. Ct. 426, the Court stated:

> So far as the . . . . issues relied upon by the District Court for its injunction are concerned, they seem to have been resolved in favor of the Government by our opinion in the Rock Island case. This proceeding involves certificates for new routes under §207. No such certificates or applications were in that case. The opinion, however, considered the Commission's practice in §207 proceedings and *stated that it was the same as in §§5 and 213 acquisition proceedings. We now hold that the same considerations justify the reservation in issue here.* [Emphasis added.]

It is clear, therefore, that in the *Rock Island* and *Texas & Pacific* cases this Court sustained the Commission's

construction of the National Transportation Policy as requiring the reading of the restrictive proviso of Section 5(2)(b) into Section 207. Under these decisions any grant of motor-carrier authority to a railroad or its subsidiary must be appropriately restricted to insure the rendition of only auxiliary and supplemental service.

The Commission Recognized, as Did the Railroads, That It Was Powerless to Issue Unrestricted Motor-Carrier Authority to Railroads.

The Commission's annual reports to Congress demonstrate its awareness that it is without authority to approve motor carrier operations by railroads or their motor-carrier affiliates beyond the extent that those operations can be coordinated with those of the railroad. In its *65th Annual Report* (1951) the Commission stated, at page 4:

> Some urge that the railroads, in order to improve service and reduce costs, should make greater use of motor transportation in conjunction with their rail operations. Our interpretations of the statute are criticized as placing undue restrictions on such use by not permitting "all motor" operations. This problem has been given thorough consideration. Our interpretations were sustained in *U.S.* v. *Rock Island*, 340 U.S. 419 and *U.S.* v. *T. & P.*, 340 U.S. 450. Legislation is required if there is need in the public interest for more liberal treatment of the railroads in this respect.

Again the following year the Commission observed that the law would have to be changed before it could authorize railroads to engage in all-motor operations, saying at page 3 of its *66th Annual Report* (1952):

> INTERAGENCY COMPETITION.—In our last report we discussed at length the forces which produce continued and great competitive thrusts among transportation agencies and the principles which guide us in passing on the issues which reach us for

decision. We also referred to railroad criticisms of what is looked upon as an unduly restrictive policy in dealing with railroad applications to engage in motor-carrier service. Shippers have expressed an interest in greater use of motor vehicles as a means of improving less-than-carload service.

> During the year there has been continued and apparently more concerted discussion in railroad quarters of the desirability of giving railroads more freedom in dealing with what they designate as managerial questions, particularly in the adjustment of rates and in the use of motor transport facilities. It is obvious that a substantial change in Congressional policy, particularly as it relates to intercarrier competition in its bearing on the public interest, is presented by this type of proposal, and that a more searching analysis of the possible advantages and disadvantages, and of the implications of such a change, must be made than any which thus far have come to our attention. There are a number of aspects of interagency competition which would be embraced in a broad review of the subject. It shows itself in forums concerned with matters with which we do not deal. We necessarily abstain from expressions of views here as to these issues or the broader problems of policy which they involve.

Only a short time ago, in its *68th Annual Report* (1954) the Commission again referred to its inability under the law to grant unrestricted motor-carrier authority to a railroad or its subsidiary. At page 5 the Commission said:

> INTEGRATION. Efforts to obtain a relaxation of our interpretations of what the Act permits in the operation of highway motor vehicles by railroads again were made during the year. We have adhered to our prior interpretations.

Nevertheless, even before the *68th Annual Report* was released to the public the Commission departed from its prior interpretations in issuing the report and order complained of herein, for the latter confers broad grants of

motor-carrier authority to the railroad's subsidiary free of any auxiliary and supplemental restrictions and in disregard of the requirement that the Commission must find that the proposed motor-carrier operations by the railroad will be of public benefit in its operations.

The unrelenting efforts of the railroads to have the Act amended clearly indicate that the Interstate Commerce Act does not permit the Commission to authorize a railroad, directly or through a subsidiary company, to engage in unrestricted motor carrier operations. Having challenged the interpretation heretofore consistently placed upon the Act by the Commission in the *Rock Island* and *Texas & Pacific* cases and having been denied judicial relief, the railroads have sought to attain their ends by legislative change. Over the years they have urged that the Act should be amended so that the Interstate Commerce Commission will have no choice but to treat a railroad seeking to acquire a motor carrier under section 5(2)(b) or to inaugurate a new motor carrier service under section 207 as if it were an ordinary applicant. The railroads have advocated the repeal of the special limitations on railroad acquisition of motor carriers expressly stated in Section 5(2)(b) and read into Section 207 and have asked that they be required simply to establish that the public convenience and necessity requires the proposed motor-carrier operation.

"The law should be so phrased," said Vice President R. V. Fletcher of the Association of American Railroads in a 1944 address, "as to place a carrier seeking permission to operate in another field in the same category as an individual asking for the right to enter the business." *Traffic World*, vol. LXXIII, no. 22, May 27, 1944, p. 1450. To the same effect the statement submitted by the A.A.R. in response to the 1946 inquiry of the House Committee on Interstate and Foreign Commerce said, "We think there should be no more restrictions against such con-

solidations [of carriers of different types] than apply to consolidations between carriers of the same type." P. Harvey Middleton, *Transportation Coordination in the U.S.*, Railway Business Association, Chicago, 1946. The study published in 1947 by the A.A.R. on *Transportation in America* recommended, "Rail carriers should have the right to engage, either directly or through subsidiaries, in motor-vehicle service on the highways on equal terms with all others, and without discrimination in favor of or against other transportation agencies in the same field. This should include the right to purchase, equally with all others, lines then in operation as well as to establish new lines."

The most illuminating of the railroad statements recommending legislative change was delivered on behalf of the Association of American Railroads by Witness W. L. Grubbs before the subcommittee of the Senate Committee on Interstate and Foreign Commerce holding hearings on Senate Resolution 50 of the 81st Congress, 2nd Session. His discussion of the limitations of Section 5(2)(b) commences on page 250 of the published hearings and is concluded at page 252 with the following statement:

> The railroad industry seriously questions the necessity for key-point restrictions in acquisition and in all new certificate cases, to accomplish the statutory purpose. It feels that the Commission has gone far beyond a proper interpretation of the will of Congress as expressed in the proviso of section 5(2)(b) to which I have referred.
>
> *Recommendation*
>
> We advocate that this proviso be so clarified as to preclude such an interpretation and enable it to be plainly understood that conditions should not be imposed which will operate to prevent economical and efficient use of motor vehicles in their service.

We believe this could be done by changing the following language of the proviso:

to use service by motor vehicle to public advantage in its operations—to read:

to provide an improved general transportation service to the public.

Only recently, months after the Interstate Commerce Commission had issued the orders complained of herein, Vice President J. Carter Fort of the A.A.R. testified before a subcommittee of the House Committee on Interstate and Foreign Commerce that "it has been the position of the railroads for years that they should have the same right as anyone else to engage in the trucking business . . . without any special limitations, upon a proper showing of the public convenience and necessity of the proposed truck operation." Hearings Before a Subcommittee of the Committee on Interstate and Foreign Commerce, House of Representatives, 84th Cong., 1st Sess., on the Report of the Presidential Advisory Committee on Transport Policy and Organization, 1955, p. 129-130.

The foregoing demonstrates that both the Commission and the railroads have believed the former is without authority to grant unrestricted motor rights to a railroad. The Commission has so informed Congress; and the railroads have besought Congress to change the law. Both have understood the law to require a railroad or its subsidiary to prove (1) that the motor operation is in the public interest, (2) that it will not unduly restrain competition and (3) that the motor service will be used to public advantage in the railroads' operations.

Yet in spite of its own decisions, of its reports to Congress, and of urging by railroad spokesmen that the law be amended to broaden the Commission's authority, the Commission here has assumed to grant an extensive, unrestricted motor carrier authority to Motor Transit. If a railroad can be awarded the right to operate as a

motor carrier over hundreds of miles of routes, free of any auxiliary and supplemental restrictions, upon a questionable showing of a public need for the motor carrier service, there is no need for the railroads to urge the amendment of the law. However, as the railroads have pressed for legislative change even after the Commission rendered its decision challenged herein, it would appear to be clear, even to the railroads, that the Commission granted the unrestricted authority to Motor Transit contrary to law.

There is No Valid Precedent for Commission's Action Here.

The Commission concluded its discussion in the report complained of herein with the gratuitious comment, at (R. 116), 63 M.C.C. 108:

> The findings hereinafter made are not to be construed as an abrogation of the policy established in *Kansas City S. Transport Co. Inc., Com. Car. Application, supra.* They represent an exception to that policy justified by the evidence in this proceeding.

However, in the *Kansas City Southern* case the Commission recognized that the language of Section 213 (now Section 5(2)(b)) showed that Congress had not been convinced that the railroads should be given "free opportunity to go into the kind of truck service which is strictly competitive with, rather than auxiliary to, their rail operations." No exception to that policy of Congress is permissible as none was provided by Congress itself. *Baltimore & A.R. Co.—Purchase—Bison Lines, Inc.*, 60 M.C.C. 509, 518. As Commissioner Alldredge said in his dissenting opinion, at (R. 119), 63 M.C.C. 111:

> The majority seems to pay some homage to this policy by declaring it to be sound and subject to relaxation "only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue re-

straint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience." Congress, however, has not provided for any exclusions from its declared policy. That is a prerogative of Congress itself.

We anticipate that the Commission, as it did in the court below, will seek to justify its action in this proceeding by citing certain of the handful of cases—distinguishable and relatively unimportant—in which the Commission has attempted to carve out exceptions to the clearly-expressed Congressional policy that railroad applicants may be authorized to conduct trucking operations only in auxiliary and supplemental service. Essentially these were uncontested proceedings before the Commission, and in not a single instance known to these appellants was the Commission's decision in such a case subjected to judicial review. These cases fall largely into three clearly-defined categories.[12]

1. Where truck service is to be rendered to a point not on the line of the railroad and not adequately served by any other railroad or motor carrier. *Santa Fe Trail Transp. Co.—Purchase—Johnson*, 45 M.C.C. 653, 660; *Southern Pac. Transport Co.—Purchase—Reynolds*, 45 M.C.C. 617, 621; *Interstate Transit Lines, Ext.—Verdon, Nebraska*, 10 M.C.C. 665, 667; *St. Andrews Bay Transp. Co. Extension of Operations*; 3 M.C.C. 711, 716.

2. Where truck service is to be rendered over a short and insignificant extension and the existing truck service to which it will be tacked already is subject to appropriate restrictions. *Santa Fe Trail*

---

[12]-A fourth group appears to have resulted from a tendency, corrected by the Commission's report in the *Rock Island case, supra*, at 40 M.C.C. 469, "to treat the Barker case restrictions as geographical or territorial only in their intent rather than as substantive limitations upon the character of the service which might be rendered by a railroad or its affiliate under any acquired right."

Transp. Co. Extension—New Mexico Points, 48 M.C.C. 85; *Texas & Pac. Motor Transport Co. Ext.—Point, Blue, La.*, 47 M.C.C. 425; *Rock Island Motor Transit Co. Ext.—Wellman, Iowa*, 31 M.C.C. 643.

3. Where the truck service, together with other motor carrier operations, will constitute the major portion of the applicant's business, the rail service having become unimportant. *ET & WNC Transportation Company—Control—The Inter City Trucking Company*, 60 M.C.C. 620; *ET & WNC Transportation Co.—Purchase—Huckabee*, 56 M.C.C. 50; *Louisville, N. A. & C. R. Co.—Purchase—Meerman*, 45 M.C.C. 6.

Even some of the cases cited by the Interstate Commerce Commission and the interveners in its behalf in support of their argument that the Commission's disposition of Motor Transit's application in this proceeding was not at variance from previous policies or practices, reflect the Commission's concern lest the railroads or their affiliates operate motor vehicles in unrestricted, competitive service. Thus in *Santa Fe Trail Transp. Co. Extension—Joplin*, 44 M.C.C. 474, 481, the Commission specifically restricted certain authorized operations "to service which is auxiliary to, or supplemental of rail service" and other operations by reserving the right to impose "such specific conditions as we in the future may find it necessary to impose in order to restrict applicant's operation to service which is auxiliary to, or supplemental of, rail service." In *Santa Fe Trails Stages, Inc. —Control-Central Arizona*, 1 M.C.C. 225, 231, the Commission, Division 5, deemed the grant of authority to result in "an operation auxiliary and supplementary to its rail operations." In *Santa Fe Trail Stages, Inc., Com. Car. App.*, 21 M.C.C. 725, 753, the Commission, Division 5, said of the proposed operations, "Coordination, such as that proposed, has been advocated and encouraged by the Commission and students of the transportation problem for a long time." In *Clinton, Davenport & Muscatine Ry.*

Co.—Ext.—Davenport—Clinton, 24 M.C.C. 250, 251; the Commission, Division 5, noted that "the proposed operation will take the place of an interurban electric railway freight service . . ." And finally in *Burlington Transp. Co. Ext.—Council Bluffs*, 28 M.C.C. 783, 790 the Commission, Division 5, observed that "when operations are commenced over the entire route applicant proposes to utilize the station facilities of the railroad, and coordinate the service with that of the railroad."

In view of the fact that the foregoing decisions contravene the policy of Congress, even though they are distinguishable from the Commission's action herein, appellants do not concede their validity. But, in any event, the all-out truck operations authorized to be conducted by Motor Transit between Chicago and Omaha, serving such additional major points as Cedar Rapids and Des Moines, cannot be squeezed into any one of the three categories of unrestricted motor-carrier authority heretofore awarded by the Commission to rail applicants. Nor do these categories permit of grouping under the broad generalization that the Commission has relaxed the bars to unrestricted truck operations by railroads or their subsidiaries "where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition; and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience." (R. 108), 63 M.C.C. 102.

The precise language of Section 5(2)(b) of the Act and the clear intent of the National Transportation Policy permit of no exception to the bar that has been placed by Congress to railroads' operating trucks except in auxiliary and supplemental service. The Commission's attempts to lift the bar would be of no avail even if the circumstances herein lent themselves, as they

do not, to an accommodation with the exceptions that the Commission has attempted to fashion.

The Conditions Here Imposed Do Not, And Will Not, Limit the Railroad to the Rendition Of Auxiliary and Supplemental Service.

The Interstate Commerce Commission can be expected to attempt to bring the instant case within the framework of the *Kansas City Southern* case by stating, as it did in its motion to affirm, ". . . . it should not be overlooked that the Commission has imposed two conditions upon the motor carrier operating authority which it has given to Motor Transit." (p. 22.) These conditions are "(1) that there may be attached from time to time to the privilege granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties; . . ." (R. 117) 63 M.C.C. 109. Neither condition would currently limit Motor Transit's operations, or permit the future imposition of restrictions by the Commission to limit such operations to service auxiliary to, and supplemental of, the railroad's train service.

The first of these conditions is couched in the language of Section 208 of the Act, 49 U.S.C. §308, which provides that "there shall, at the time of issuance and from time to time thereafter, be attached to the exercise of the privileges granted by the certificate [of public convenience and necessity] such reasonable terms, conditions, and limitations as the public convenience and necessity may from time to time require, . . ." The con-

dition imposed by the Commission on the grant of authority herein adds nothing to the powers it already possessed by virtue of Section 208. On the contrary, as Commissioner Arpaia said in his dissenting expression, ". . . condition (1) in the findings is neutralized by the language in the discussion insofar as it adds any qualifications to those set forth in section 208 of the act." (R. 121), 63 M.C.C. 112.

In any event the language of Section 208 has never been held to abrogate the provisions of Section 212(a) of the Act, 49 U.S.C. §312(a). In substance Section 212(a) provides that a certificate of public convenience and necessity may be suspended, changed or revoked, in whole or in part, only after notice and hearing and only for willful failure to comply with the provisions of the Act or the orders, rules or regulations of the Commission promulgated thereunder. ". . . the Commission itself has held that unless it can find a reason to revoke a motor carrier's certificate, which reason is specifically set out in §212(a), it cannot revoke such a certificate under its general statutory power to alter orders previously made. Smith Bros., Revocation of Order, 33 M.C.C. 465.". *United States* v. *Seatrain Lines*, 329 U.S. 424, 430, 67 S. Ct. 435, 438.

The imposition of auxiliary and supplemental restrictions upon a certificate not previously limited in that respect would be held to be tantamount to a partial revocation of that certificate. Even where the certificate has been subject to an express reservation of the right to impose further limitations, restrictions or modifications to insure that the service remain auxiliary and supplemental, the Commission would not have unfettered power to change the certificate at will but only to accomplish the limited objectives contemplated by the reservation. *United States* v. *Rock Island Motor Transit Co.*,

supra, at 340 U.S. 435, 71 S. Ct. 391. The reservation herein would not permit the future limitation of the authority granted Motor Transit to confine its operations to an auxiliary and supplemental service. As Commissioner Alldredge pointed out in his dissent from the Commission's report and order assailed herein, "The phrase 'public convenience and necessity,' in the context in which it is used in the act, does not comprehend the full public interest in transportation envisaged by congressional policy." (R. 119-120), 63 M.C.C. 111. The general provisions of Section 208, herein repeated as condition (1), cannot be used to modify the specific requirement of the National Transportation Policy that the inherent advantages of all modes of transportation be retained. *United States* v. *Rock Island Motor Transit Co.*, *supra*, at 340 U.S. 436, 71 S. Ct. 392.

The other restriction imposed—"that all contractual arrangements between the Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties"—is equally impotent. The Interstate Commerce Commission, at page 23 of its motion to affirm, said, "the validity of this condition was sustained in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419, 436-444." However, these appellants on re-reading the *Rock Island* decision are unable to find any discussion of the restriction and its relationship to the limitation of railroads and their affiliates to insure the rendition of auxiliary and supplemental service. We have found however, that the Interstate Commerce Commission, in referring to the reporting requirement, has said, "In matters relating to compensation between the two companies, the railroad will in reality be dealing with itself and, so far as ultimate financial results to it are concerned, it is immaterial what these arrangements may be.

. . . Such information might be important in a rate proceeding or otherwise." *Frisco Transp. Co. Extension—Joplin—Miami*, 62 M.C.C. 367, 379; *Texas & Pacific Motor Transport Co. Com. Car. Application*, 47 M.C.C. 753, 763. The ability in the future to enforce an appropriate bookkeeping transaction, we are sure, is not what was had in mind when the Commission undertook the practice of imposing auxiliary and supplemental restrictions in response to the Congressional intent of limiting railroad motor-carrier operations. To jettison the other, more meaningful restrictions, keeping only the restriction that may or may not be of some academic interest and adding a restriction which merely repeats certain statutory authority, cannot be deemed to accomplish the legislative purpose. The restrictions imposed do not, and will not, insure that the Chicago, Rock Island and Pacific Railway Company will use the motor-carrier authority conferred upon its subsidiary, The Rock Island Motor Transit Co., to public advantage in its train operations, and yet under the National Transportation Policy and the provisions of the Interstate Commerce Act that is the limited extent to which it properly may operate motor vehicles for-hire in interstate and foreign commerce.

The Lack of Need for Service by the Railroad Subsidiary

There is No Evidence of Record That There Is Need For the Railroad's Unrestricted Motor Operations Between the Major Points.

While appellants disagree with the ultimate finding by the Interstate Commerce Commission that the public convenience and necessity require the proposed motor common carrier operations of The Rock Island Motor Transit Company, they concede that there was sufficient evidence of record to enable the District Court to sustain the Commission's order insofar as it authorized a bona

fide auxiliary and supplemental service to be rendered to and from such relatively minor points as Brooklyn, Colfax, Marengo, Newton, Oxford, Victor, Walcott and Wilton Junction. The District Court's statement (R. 194) that the so-called "peddle" traffic ". . . is really the traffic which is involved in the pending case" misconstrues the basis for the appeal. However, to the extent that the Commission's order finds that unrestricted service by Motor Transit between such major points as Chicago, Davenport, Cedar Rapids, Des Moines, Council Bluffs and Omaha is required by the public convenience and necessity, appellants contend that the District Court erred in failing to set aside the Commission's order for want of evidentiary support. In short, it is appellants' position that while the record before the Commission supports a grant of auxiliary and supplemental authority such as that embodied in the restricted certificate issued to Motor Transit on September 11, 1951, it supports no more. Findings of the Interstate Commerce Commission of the existence of public convenience and necessity not supported by evidence must be set aside. *Interstate Common Carrier Council* v. *United States*, 84 F. Supp. 414, 422, affirmed *per curiam*, 338 U.S. 843, 70 S. Ct. 91.

Under Section 206(a)(1) of the Interstate Commerce Act, 49 U.S.C. §306(a)(1), no common carrier by motor vehicle subject to the Act may operate on the highways without a certificate of public convenience and necessity. Section 207, 49 U.S.C. §307, provides for the issuance of the certificate on application if the proposed service "is or will be required by the present or future public convenience and necessity." A "finding" of public convenience and necessity was made by the Commission, (R. 116) 63 M.C.C. 108, but to be lawful that ultimate finding must have been based on the proper statutory criteria and must have had the necessary factual findings to

support it. *Interstate Commerce Commission* v. *Parker*, *supra*, at 326 U.S. 64, 65 S. Ct. 1492.

The term "public convenience and necessity" as used in the Act is not defined by the statute, and the difficulty of laying down any general rule by which it can be determined whether or not certificates of public convenience and necessity should be issued long has been recognized. *Cf. San Antonio & A.P. Ry. Co. Construction*, 111 I.C.C. 483, 493. The purpose underlying the requirement of a finding of public convenience and necessity was said by this Court in *Texas & N.O.R. Co.* v. *Northside Belt Ry. Co.*, 276 U.S. 475, 479, 48 S. Ct. 361, 362, to be "to prevent interstate carriers from weakening themselves by constructing or operating superfluous lines, and to protect them from being weakened by another carrier's operating in interstate commerce a competing line not required in the public interest." This statement of general purpose has been refined into a policy of the Interstate Commerce Commission of fostering sound economic conditions in the motor carrier industry by according existing motor carriers the right to transport all traffic which they can handle adequately, efficiently and economically in the territories served by them. *Clark-Callahan, Inc.*, 41 M.C.C. 693, 706; *Gabler Common Carrier Application*, 21 M.C.C. 713; *C. & D Oil Co., Contract Carrier Application*, 1 M.C.C. 329, 332. As the Court said in *Hudson Transit Lines* v. *United States*, 82 F. Supp. 153, 157, affirmed *per curiam*, 338 U.S. 802, 70 S. Ct. 59:

> The Commission has frequently held that under §207 of the Act, 49 U.S.C.A. §307, there must be an affirmative showing not only that a common carrier service is required in the convenience of the public but also that it is a necessity, and that the latter element includes a showing that present facilities are inadequate. Pan-American Bus Lines Operation, 1 M.C.C. 190, 203; Bluenose Bus Co. Ltd., Common Carrier Application, 1 M.C.C. 173, 176; Richard L. Richards, Extension of Operations, 6 M.C.C. 80, 81;

Ohio Transportation Co., Common Carrier Application, 29 M.C.C. 513, 520; Royal Cadillac Service, Inc., Common Carrier Application, 43 M.C.C. 247, 259. The courts, too, have recognized inadequacy of existing facilities as a basic ingredient in the determination of public "necessity". Inland Motor Freight v. United States, D. C. E. D. Wash. 60 F. Supp. 520, 524. See also Interstate Commerce Commission v. Parker, 326 U.S. 60, 69, 70, 74, 65 S. Ct. 1490, 89 L. Ed. 2051 and dissenting opinion of Mr. Justice Douglas. This does not mean that the holder of a certificate is entitled to immunity from competition under any and all circumstances. Chesapeake & O. R. Co. v. United States, 283 U. S. 35, 51 S. Ct. 337, 75 L. Ed. 824. The introduction of a competitive service may be in the public interest where it will secure the benefits of an improved service without being unduly prejudicial to the existing service. Interstate Commerce Commission v. Parker, supra. No such finding has here been made, nor is there any evidence to support such a finding.

The record is utterly devoid of testimony showing a need by the public for motor carrier service between the major points along the routes involved—Chicago, Omaha, Des Moines, Tri-Cities, Iowa City, Grinnell, Newton and Atlantic. Yet, based on testimony affecting the very small points between those larger cities, the Commission, with no pretense of finding a public need for service, would grant Motor Transit authority to serve those larger cities in an unrestricted service. The record proves there is no need for such service.

What must have prompted the Commission's action is a misplaced sympathy for Motor Transit. As will be developed more fully, *infra*, p. 65, the Commission's fundamental error was in treating Motor Transit as a separate entity and not as an integral part of the Rock Island family, so that the advantage to Rock Island of having Motor Transit render even an auxiliary and supplemental service to the smaller Iowa points was obscured by the

supposed disadvantage to Motor Transit in not serving the larger points as well.

The Testimony of Shipper and Carrier Witnesses Reveals Ample Service Between the Major Points.

In the instant proceeding the record lends no support to a finding that the public convenience and necessity require the service of Motor Transit between the major points referred to. Witness after witness testifying in support of the application by Motor Transit acknowledged that there was no need for such service. For example, Judge Carl Reed, Chairman of the Iowa State Commerce Commission, testified that service to the larger communities such as Davenport, Des Moines and Omaha was adequate, and that his Commission had no complaints regarding service to such points. (R. 744-745). Similar acknowledgements were made by virtually each of the shipper and Chamber of Commerce witnesses. In short, out of the multitude of more than 150 witnesses offered by Motor Transit in support of its application not one gave the slightest indication of a need for this type of service.

A representative of the Chicago Association of Commerce and Industry, testifying for applicant, observed that, "We have approximately four hundred common carrier truck lines out of Chicago and there is plenty of service to the larger points." (R. 247). This witness referred to a motor carrier directory which named twenty-two carriers serving Davenport from Chicago (R. 251-252); ten among those serve Iowa City; at least four serve Grinnell (R. 252); at least nine serve Newton (R. 255); and at least six serve Atlantic. (R. 256). The witness stated that there is "probably not" any demand for additional motor carrier service between Chicago and Omaha. (R. 253). Other witnesses for Motor Transit

also testified as to ample service to and from the larger points.

A representative of the Davenport Chamber of Commerce knew of twenty-seven motor carriers operating between Chicago and the Tri-City (Davenport, Moline and Rock Island) area and rendering good daily service. (R. 234).

A representative of the Cedar Rapids Chamber of Commerce was aware that at least fifteen motor carriers operate between that city and Chicago (R. 1124).

A representative of the John Deere Plow Company admitted that there was no difficulty experienced in getting service to points such as Des Moines and Omaha. (R. 469).

A representative of the Omaha Chamber of Commerce was able to recall the names of eight substantial motor carriers having a service between Omaha and Chicago which he described as a "regular established service". (R. 1361). He knew of four substantial carriers serving Omaha from Twin-Cities (R. 1365). Regular service exists between Kansas City and Omaha. (R. 1365).

A representative of the Iowa City Chamber of Commerce described the available trucking facilities as one of the city's "outstanding attractions." (R. 485).

Representatives of several motor carriers rendering service in the area involved presented testimony at the hearings. The testimony of just three of these is summarized in Appendix B to further demonstrate that the record reveals ample service between the major points.

There is no evidence in the record to buttress a finding of public need for additional service at the larger points. Any conclusion reached by the Commission that there is a public need for more motor carrier service at such points is not supported by basic facts and, on the con-

trary, is actually refuted by the testimony of witnesses testifying on behalf of Motor Transit, and the independent motor carriers as well.

The Commission's Failure to Guard Against the Danger of the Development of a Rock Island Monopoly

The Railroad Would Sustain Its Trucking Subsidiary With Freight, Facilities, Funds and Personnel.

This Court, in the *Parker* case, *supra,* at 326 U. S. 73, 65 S. Ct. 1497, clearly set forth the Commission's continuing obligation, in dealing with applications by railroads or their affiliates to perform motor-carrier service, "to guard against the danger of the development of a transportation monopoly." It would be difficult to imagine a record which more strongly evokes the need for strict adherence by the Commission to this admonition than that herein—or one in which it has been so completely ignored.

Motor Transit possesses at least four distinct competitive advantages to which no independent motor carrier can successfully aspire.

First, the policy of the Iowa State Commerce Commission in granting intrastate monopolies insures that only Motor Transit can render intrastate motor carrier service between the Iowa points and along the routes herein involved. (R. 98, 114), 63 M.C.C. 94, 107. Second, Motor Transit receives rail-billed traffic from its railroad affiliate to swell its volume, fill empty space in its trucks and increase its revenues. (R. 113), 63 M.C.C. 106. Third, at many points where no Motor Transit representative is stationed the railroad depot agent assumes his functions. (R. 111); 63 M.C.C. 104. Fourth, and probably most important of all, whereas independent motor carriers must conduct their financial affairs within the rigid confines of economic reality, Motor Transit, as revealed by its an-

nual reports to the Commission, is able, through heavy subsidization of the parent railroad, to obtain huge sums to finance equipment purchases and similar transactions. (R. 104), 63 M.C.C. 99.

The advantages accruing to Motor Transit over its independent motor carrier competition through receipt of rail-billed traffic are obvious. Included are the opportunity to operate vehicles at maximum efficiency, with resultant higher revenues and profit, a choice of rates (rail or motor) given the shipper, and, of course, more traffic. Another obvious advantage in receiving this traffic is the opportunity it gives to achieve a balanced movement, the importance of which is indicated by the opinion of Motor Transit's General Manager, "You haven't a chance if you can't balance your operations." (R. 1408-1409).

One witness' testimony is of particular value in demonstrating the practical advantage to a carrier which can maintain a representative or agent continually available for contact in a town. (R. 800-804). Admittedly it is not economically feasible for Motor Transit or any other motor carrier to maintain an agent at every point which it might have authority to serve. But Motor Transit does have this advantage: at many of the points which are too small to justify maintenance of such a representative, the railroad depot agent performs the function without apparent cost to Motor Transit. At Dexter, Iowa, for example, the railroad station agent accepts payments due Motor Transit, and claims may be made through him. (R. 1188). Other examples of points where this strategically advantageous situation exists are Altoona (R. 865), Atalissa (R. 956), Ladora (R. 455), Mitchelville (R. 829), and Wilton Junction, (R. 961). The record reveals numerous others.

The Commission itself is obviously cognizant of this tremendous advantage as seen from the comment in its report, "Motor Transit is able to provide such complete

service because it maintains freight agents at many points on its routes and the other motor carriers have them located at some of the larger points only." (R. 111), 63 M.C.C. 104. These agents, however, are railroad freight agents available to Motor Transit only because of its affiliation, and insofar as the record shows, are a great advantage obtained *at no cost* to Motor Transit.

Indicative to some extent of the financial support given Motor Transit by its railroad parent is the fact that as of January 31, 1952, advances to Motor Transit payable to Rock Island totalled some $837,527. (R. 97), 63 M.C.C. 94. The Commission's report admits the existence of this financial assistance. (R. 104), 63 M.C.C. 99. Among independent motor carriers such an advance would be deemed to be very large and of great benefit.

It is sufficient here to point out that "all of the capital for the Rock Island Motor Transit Company has been provided by the railroad, either by purchase of common stock, or in the way of advancements by loans or otherwise". (R. 1399).[13] And thus the applicant is relieved from facing the economic facts of life which independent motor carriers must look straight in the eye. What is additionally apparent is that the railroad has achieved substantial savings by using its affiliate as a substitute for way-freight service (R. 213)—and now seeks to profit further by using that affiliate in unrestricted motor carrier operations, which profit can only be derived by diminishing the revenues of independent motor carriers.

Many other advantages arise by reason of this dual status of Motor Transit, the joint use of communications systems being but one. (R. 853). Another disclosed by the record is the extensive use by Motor Transit of Rock Island's freight houses, some of which are used only by

---

[13] Rock Island's President testified regarding railroad loans for the purchase of motor carrier equipment. (R. 218).

the motor carrier and not by its principal. (R. 226). Yet another is the opportunity to balance traffic which is predominantly eastbound by rail and westbound by motor carrier. (R. 1417-1418).

In addition, something should be said respecting the criticism by the Commission of the independent motor carriers which, it is indicated, have failed to provide adequate service to the small Iowa points involved. Without admitting the gravity of the failure alleged, it is proposed to explore a reason for the situation. Strangely enough, the Commission does not seem to consider it of any importance that these independent motor carriers, unlike Motor Transit, have no indulgent parent, ever ready to supply the wherewithal in money, equipment and labor necessary to undertake the motor vehicle service rendered, with little or no regard to the cost of performing such service. In this proceeding it may be entirely true that the independent motor carrier protestants, because of the economic reality that they must profit or die altogether, could not match the service sought to be provided by their subsidized competitor. Indeed, the Commission's report itself seems to recognize that the underlying basis for the failure of the independent motor carriers to render a greater service to the smaller Iowa points is the simple fact that, in contrast with Motor Transit, they are rarely tendered freight by the shippers involved. (R. 111) 63 M.C.C. 104. Be that as it may, the criticism of their alleged service failures by the Commission seems largely unjustified when it is recognized, as it must be, that the service afforded by Motor Transit is made possible only by raiding the coffers of the parent railroad, and by the intrastate monopoly granted it by the Iowa State Commerce Commission. A combination of these two factors comprises, in effect, a raid upon the independent motor carriers, forcing them into an economic and service straitjacket.

The record herein leaves a good deal to be desired in the way of details of the financial arrangements between Motor Transit and its parent, the Chicago, Rock Island and Pacific Railway Company. Witnesses were not too helpful in supplying such details. An investigation by the Commission into these matters might have proved very revealing. In the absence of such investigation the appellants herein, in their petition for reconsideration of the Commission's report, invited the attention of the Commission to Motor Transit's last annual report, for 1953, filed with the Commission. Of course, the Commission could have noted officially the content of that report. *Market St. Ry. Co.* v. *Railroad Commission*, 324 U.S. 548, 562, 65 S. Ct. 770, 777.

Schedule 9002 of that annual report, listing the salaries of the officers and directors of Motor Transit, shows that more than 93 percent of total salaries of eleven general officers are paid by the railroad. The total salary ($75,000) of the president of Motor Transit is assumed by the railroad. As a matter of fact, the only expenditures charged against the motor carrier for the payment of salaries of its officers are portions of the salary of one of the vice presidents and the general manager, totaling $11,700.00. The parent railroad, on the other hand, pays $168,006.83 in salaries to these officers of its motor subsidiary.

Schedule 9009, covering contracts and agreements with affiliated companies, reveals that the parent railroad has agreed to transport the freight of Motor Transit for 1¼ cents per ton-mile. Assuming that the payload capacity of the subsidiary's vehicles is 15 tons, this means that the transportation cost to the subsidiary is 19 cents per truck-mile (without regard to the classification of the tonnage) whenever the parent railroad performs the service covered by the contract referred to. In these days of high operating costs, when the average motor carrier

cost is 51 cents per truck-mile,[14] Motor Transit is fortunate indeed to make such a bargain. And, when it is considered that the charge involved probably includes loading and unloading paid for by the parent railroad, the arrangement is found to be truly gilt-edged so far as the motor subsidiary is concerned.

The figures reflecting operations and maintenance expenses (Schedule 4000 in the Annual Report Form, but consolidated for passenger and property expenses and labeled "Schedule 4002" by Motor Transit) indicate that the motor subsidiary incurred operating rents of $18,022.00. Considering that it operates 6,049 route miles in inter-city service (Schedule 9001), grossed $5,677,962.00 in 1953 (Schedule 2930-A), and makes extensive use of the terminals of the parent railroad at nearly every city, town or hamlet covered by its operating authority, it would appear that the rentals it pays to the parent railroad do not begin to represent fair charges for use of the property involved.

Finally, Schedule 2200, Advances Payable—Affiliated Companies, emphasizes the extremely openhanded policy of the railroad toward its motor subsidiary. Listed are a so-called demand note for $400,000 and an "open account," also for $400,000, covering monies owed the railroad by Motor Transit. The demand note, issued September 1, 1943, bears interest at the rate of 4%. Its age clearly indicates that the railroad is obviously in no hurry to "demand" repayment, but what is more important is the fact that no lending institution would make such a loan to an independent motor carrier unless it were fully secured by mortgage of its operating property. The "open account" referred to, on which Motor Transit pays not one penny interest, seems nothing less than a

generous handout by the railroad to its prodigal offspring.

Having demonstrated that the applicant in this proceeding is heavily subsidized by its parent railroad, the all-important question comes naturally to mind: Does the Commission propose, in every case in which independent motor carriers are unable to match the subsidized competition of rail subsidiary motor carriers, to authorize unrestricted service to such subsidiaries on the ground that the shipping public has an inherent right to receive more than a dollar's worth of such service for every dollar spent, so long as the parent railroad is willing to pick up the tab for the difference? Even assuming the Commission's power to issue unrestricted certificates to railroad subsidiaries, fundamental fairness would seem to require that it first be fully informed with respect to the cost of service proposed to be rendered, and, fortified with such information, be prepared to require that each competitor for the traffic involved stand on an equal footing with the other to secure it.

We submit such unfair competition, destructive of the inherent advantages of truck transportation, was what the Congress clearly intended to prevent, and the facts of record, although incomplete, amply support the legislative wisdom.

The Annihilation of Independent Motor Carriers Would Confer a Monopoly Upon the Railroad.

The record clearly demonstrates that independent motor-carrier competition along the involved Iowa routes has already been restrained. Complete freedom in motor carrier operations by the Rock Island's subsidiary will unquestionably insure an even greater restraint than now exists.

Admittedly, the Commission has recognized in its decision that prerequisite to approval of the application

herein must be a finding that competition will not be restrained. It said:

> The main purpose for the policy of imposing the five above-quoted restrictions, or modifications thereof, was to prevent the railroads from acquiring motor operations through affiliates and using them in such a manner as to unduly restrain competition of independently operated motor carriers. (R. 108), 63 M.C.C. 102.

However, the conclusion was reached that:

> Thus the operations of applicant have not unduly restrained competition, and there is no evidence that its proposed operations would produce such a result. (R. 113), 63 M.C.C. 106.

This finding is simply not in accordance with the facts, and indeed the record proves precisely the opposite.

Motor Transit's officials are cognizant of their dominant position as proved by the comment of its General Manager. "Yes, we have both the intrastate and the interstate authority in this area, and if you didn't have the combination of the interstate, the intrastate, the truck billing, and the rail billing, you just couldn't even begin to get started to maintain the cost of operation." (R. 1388). Since no independent motor carrier has all this, Motor Transit by this application is seeking to seal tight its present near-monopoly. But compare the above admission with the same witness' pious protestation:

> . . . I am sure on an equal basis that we can hold our own. We don't ask for any advantages. All we ask is to be on an equal basis. (R. 1409).

The Commission apparently accepted this view. But, in fact, the only way to achieve an "equal basis" would be for Motor Transit to surrender its intrastate monopoly, or for the State of Iowa to grant intrastate rights to the independent motor carriers. Since both these ends are impossible to appellants, the idea of "equal" competition is unrealistic, untrue and preposterous.

The privilege of doing intrastate business is an advantage distinct and readily apparent to an interstate carrier.[15] A number of the witnesses herein have testified to shipping both within the State of Iowa and beyond. If only one carrier can be offered the intrastate traffic, can it be disputed that this same carrier automatically obtains a tremendous competitive advantage on traffic moving outside the state either simultaneously or at differing times? Nor can it be denied that the volume and revenue so gained can enable the monopolizing carrier to conduct a better balanced, more efficient and, therefore, a more profitable operation than its independent competitor could hope to achieve on the same route.

One is moved to observe that the Commission in this proceeding is permitting itself to be dominated by the Iowa Commission's policy of intrastate monopoly. Because only Motor Transit is favored along these routes by that policy, it is to become favored also by the Federal Commission by removal of those restrictions which would tend to insure its interstate use only in operations auxiliary to or supplemental of those of its parent railroad. The Commission's report observes, "that such peddle operations could not be profitably operated with interstate traffic only." (R. 114), 63 M.C.C. 107. Therefore, it concluded, we must remove all restrictions from the Iowa Commission's nominee—a railroad affiliate—to increase further its stranglehold on the motor carrier traffic to the smaller points in the area.

The Commission Committed a Fundamental Error.

The fundamental error which led the Commission to completely reverse its settled construction of the law rests on a dual basis: first, its peculiar inability, or

---

[15] As one witness observed, "where we have our interstate shipments and intrastate both delivered by the same carrier, it makes it a convenience to us." (R. 786).

unwillingness, to view Motor Transit in its true light; second, its failing memory respecting the purpose of the railroad's original entry into the field of limited motor transport. Somewhere along the tortured path of these proceedings, sometime during the more than fifteen years which elapsed between the filing of the White Line and Frederickson applications and the decision complained of herein, the Commission seems to have lost sight of both those facets of this case. But when they are viewed in their proper light, the situation comes into focus.

Motor Transit is a railroad subsidiary. By the grant here opposed, it would become the unrestricted alter ego of the railroad between two major cities, Chicago and Omaha, separated by approximately 500 miles.[16] As a captive motor carrier, it would compete with the railroad and with the independent motor carriers between important cities over great distances. By failing to recall Motor Transit's true nature, the Commission has convinced itself that the rail subsidiary's desire to perform a completely independent motor carrier service has merit sufficient to warrant its ignoring the statutory mandate against granting such authority. Had it remembered what Motor Transit is, and the great growth of its parent, it might have weighed the affected transportation equation in its entirety.

The Commission expresses solicitude for the claimed plight of the parent railroad when it states, (R. 113), 63 M.C.C. 106, that its less-than-carload traffic has consistently declined over a five-year period, while in the same breath admitting that Motor Transit's tonnage has

---

[16] Actually, this understates the magnitude of the authority which the Commission would grant. As pointed out at page 9, *infra*, the rail subsidiary, through "tacking," could also perform unrestricted operations between other major points.

increased. And this concern over the declining l-c-l tonnage—costly to perform and usually shown as a deficit figure in Commission statistics—is nowhere matched either by pertinent inquiry or by comment as to the railroad's fortunes in the transportation of carload traffic which is the fiscal lifeblood of any railroad operation. Had the Commission's preoccupation with the alleged financial predicament of the applicant not been so intense, a look at the carload tonnage figures would have quickly disabused its thinking respecting the claimed need to carve out such a massive exception to the *Barker* and *Kansas City Southern* cases, *supra*, as it professes to find in this proceeding. From 1940 to 1952, the year the hearings were held in the latest phase of this seemingly endless proceeding, the parent railroad's carload tonnage increased from almost 24 million tons to 42½ million tons. Over this same period the revenue accruing from the transportation of this carload tonnage rose from sixty-five million dollars to nearly one hundred eighty million dollars, an increase of nearly 300%![17] In these circumstances, the bleating plea of poverty of the subsidiary of this well-to-do transportation giant should have fallen on extremely deaf ears.

Moreover, the Commission seriously erred in ignoring completely the purpose of the railroad's entry into the motor carrier business. As the earlier reports of the Commission in this proceeding demonstrated, the ostensible purpose of allowing the railroad to perform *any* motor carrier service was to permit it to substitute the more efficient motor truck for obsolescent way-train and peddle car service theretofore performed by the railroad itself. But the Commission forgot this reason for making the grant to the railroad and became preoccupied with

[17] Source: Freight Commodity Statistics, Class I Railways in the United States, published by the ICC's Bureau of Transport Economics and Statistics.

the alleged costly nature of the peddle service by Motor Transit which in turn motivated its grant of authority to that carrier to perform volume service between points as to which the record clearly shows there is already adequate service. Since the cost of this peddle truck service is less than the cost of performing the inefficient rail service it has replaced, it is obvious that there is no reason for going further and granting a wholly unrestricted motor service, completely unrelated to the rail service. Thus the Commission, over the protests of independent motor carriers, has placed the railroad in a position to compete effectively with the former for small-lot traffic while retaining its dominant position with respect to volume tonnage. In this manner, it seeks to bestow its largesse upon the Rock Island family through an unprecedented grant of authority to Motor Transit to perform completely unrestricted truck service throughout the length and breadth of the Rock Island empire. A better case could not be found to illustrate the wisdom of the Congressional mandate against allowing just such motor carrier operations by the railroads.

The Commission's fundamental error here is sharply exposed by its earlier thinking, as set forth in its brief in the *Texas and Pacific* case:[18]

> **The difference between the *Parker* case and the case now before the Court is that, in the former, the railroad subsidiary was defending its right to perform a closely coordinated l.c.l service in substitution for way-train service against the contentions of non-railroad motor carriers that even such restricted service was an encroachment on their field of transportation, whereas, in the present case, the railroad subsidiary, having crossed the line of permissible and nonpermissible motor service open to railroads is in effect insisting that it is its right to fully enter into**

[18] Joint brief of the Commission and the United States in No. 38, *U.S.* v. *Texas and Pacific Motor Transport Co.*, October, 1950, Term.

the motor carrier field. Transport supported its applications on the basis of the economies, more efficient and expeditious service, that would result from the use of motor for train service. It then used the limited authority granted to cross the line into the field of general motor carrier operations. Thus it revealed the trend toward monopoly which Congress feared and guarded against by enacting section 213 (now sec. 5) and by making it the Commission's duty to administer the Act so as to preserve the inherent advantages of each mode of transportation.

As previously stated, the Commission's decision herein abruptly reverses its consistent interpretation, followed for many years, of the pertinent provisions of the Interstate Commerce Act and the National Transportation Policy. In addition, it is grossly unfair in its effect upon the operations of numerous independent motor carriers authorized to serve between the major points directly and indirectly involved.

The conclusion is inescapable that the grant of authority which would enable the rail subsidiary to perform unrestricted motor-vehicle service between such major points as Chicago, Omaha, Des Moines, Kansas City and Minneapolis-St. Paul, without a scintilla of evidence in support thereof, is nothing more than an effort by the Commission to penalize the independent motor carriers for their alleged failure to render sufficient service to the small Iowa points involved. We have previously discussed the handicaps under which the independent motor carriers labor in their efforts to compete with the subsidized operations of the rail subsidiary, buttressed by the intrastate monopoly conferred by the Iowa Commerce Commission. But aside from that aspect of the case, the Commission's award of authority to the rail subsidiary to perform unrestricted motor service between major points as to which its own witnesses denied there was need for added motor carrier service, brings about completely incongruous results.

Assuming, *arguendo*, that the independent motor carrier appellants have, without excuse, failed to render proper service to the small Iowa points involved, the Commission's grant of authority to Motor Transit to serve the major cities nevertheless does not stop at "punishing" them. Its punitive effects go a lot deeper. Its action also severely harms the interests of other independent motor carriers authorized to provide service to some or all of the major points involved, which lack authority to serve the Iowa points on the White and Frederickson routes. The Commission made no finding in this proceeding that *all* independent motor carriers serving Chicago, for example, have failed to provide adequate service to other points authorized by their franchises. Yet all such carriers, whether or not they are authorized to serve the small Iowa points, are to be abruptly faced with the prospect of dual competition for Chicago traffic by the railroad, on the one hand, and the unrestricted trucking operations of the railroad's subsidiary, backed by all its parent railroad's financial resources, on the other.

Although the Commission took pains to point out that its decision under review herein is "not to be construed as an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application*," (R. 116), 63 M.C.C. 108, we sincerely doubt the Commission's ability to make its words stick. If its decision is allowed to stand, the Commission will shortly be presented with requests for unrestricted truck operating authority by the *rail* competitors of the Rock Island, which it will be unable to resist. The ability to conduct all-out truck operations will be a potent competitive weapon in the hands of the Rock Island Railroad, not only with respect to its independent motor carrier competitors, but also as respects its railroad competition. What then, would the Commission, having placed this weapon in the Rock Island's hands, say to one of its *rail* competitors seeking

equal treatment. To the railroad whose traffic was being diverted to the Rock Island by virtue of its ability to offer all-rail, all-motor, or a combination rail-motor service, throughout its territory, would the Commission, in effect, say: "No, we allowed Rock Island to perform unrestricted truck service only because it was able to satisfy us that certain independent motor carriers failed to render a satisfactory service to some small points also served by the Rock Island. Unless you can make a similar showing, we cannot allow you to institute unrestricted truck service in order to better compete with the Rock Island." We think such an answer highly unlikely. To the contrary, we believe the Commission would feel constrained to allow the Rock Island's rail competitors equal opportunity to perform all-out motor operations. And bearing in mind the overlapping of railroad systems throughout the country, it would be only a short time until all railroads would claim a need to perform such service in order to stay competitive with other railroads.

Need For Reexamination of the *Parker* Doctrine

The imposition of a restriction limiting Motor Transit in its operations between designated key points, prohibiting service to, through or from more than one of the named points, would not assure the rendition of an auxiliary and supplemental motor service. If the service is to be a purely auxiliary and supplemental service, then in the words of Mr. Justice Douglas, dissenting in *Interstate Commerce Commission* v. *Parker*, *supra*, at 326 U.S. 77, 65 S. Ct. 1498, ". . . let the service be limited to commodities which have a prior or subsequent rail haul." In his dissenting opinion therein Mr. Justice Douglas, at 326 U.S. 75, 65 S. Ct. 1497, said:

> If, as the Commission at first required (Kansas City Southern Transp. Co., 10 M.C.C. 221), this motor carrier service was restricted to goods which had a

prior or subsequent rail haul, the service might properly be designated as an auxiliary or supplemental one. But the Commission changed its position and withdrew that condition. Kansas City Southern Transp. Co., 28 M.C.C. 5. The key-point condition was substituted. Between those points the railroad will operate like any motor carrier. The service which it seeks to render is not a combined rail-and-truck service. As the Commission states in its report in the present case, "The railroad, through its subsidiary, merely seeks the substitution of a more efficient for a less efficient means of service." This "substituted" service differs from the adequate, independent motor carrier service already existing only in its being under railroad control. In that respect and in that respect alone is the service of a new and different character.

The absence of any statutory or I.C.C.-determined standards for the establishment of key points, together with the ease of securing Commission authority for the modification of whatever key-point restrictions may be imposed, makes it clear, as was implicit in Mr. Justice Douglas's statement, that the imposition of key-point restrictions is inadequate to insure the rendition of an auxiliary and supplemental service by a railroad-affiliated motor carrier. The most notorious and one of the most recent examples of how the naming of key points can become a mere rhetorical exercise occurred in the proceeding in which the Commission approved the purchase by Pacific Motor Trucking Company, a wholly-owned subsidiary of the Southern Pacific Company, of the franchise and property of Pacific Freight Lines, which at the time was the largest independent motor carrier operating in the State of California. The applicant for Commission approval, in the face of the vigorous protests of motor carriers serving the area, consented to the designation of certain suggested key points. Of these the Commission in its report and order in Docket No. MC-F-5783, *Southern Pacific Company—Control; Pacific Motor Trucking*

Company—Purchase—Pacific Freight Lines, 70 M.C.C. 5, dated June 4, 1956, and served June 26, 1956, said:

> Furthermore, it appears such points, other than Santa Barbara, are rather small, the population of Harold, Newhall Ranch, and Vernalis apparently consisting of less than 300 persons. There is no indication that any of such points have facilities adaptable to the operations proposed under the unified rights or that such smaller points have any justified basis for selection as key points. Considering that PMT could perform a through operation under the key points, it proposes from points in the San Joaquin Valley to points in the Imperial Valley, approximately in some instances distances of 600 miles, it is apparent that the key points selected by applicants would permit operations unrelated to the rail operations of So Pac, and competitive with its rail operations and operations of existing motor carriers.

Nevertheless, by "corrected" sheets issued June 27, 1956, the Commission approved the imposition of those very key points. What made the Commission's abuse of its discretion particularly callous was its complete disregard of the Examiner's conclusion that the basic reason for the acquisition by Pacific Motor Trucking Company of the operating rights of Pacific Freight Lines was to remove a substantial operator from the field of competition by independent motor carriers. At sheet 15 of his proposed report the Examiner had said:

> The very liberal consideration to be paid in the transaction might be warranted from the standpoint of the purchasers, by removing PFL, one of the largest, if not the largest motor carrier in the Pacific Coast area, as a formidable competitor of PMT and its parent railroad, which appears to be the primary objective of the proposal.

Not only did the Commission completely ignore the Examiner's conclusion that the purchase would not be in the public interest, but in approving the purchase the Commission imposed key-point restrictions that would be

wholly ineffectual in confining the Pacific Motor Trucking Company's operation of the rights acquired from Pacific Freight Lines to service auxiliary and supplemental of the train service of the Southern Pacific Company.

In Docket No. MC-30605, *The Santa Fe Trail Transportation Company—Petition for Modification of Certificate*, 64 M.C.C. 461, the Commission removed Dodge City, Kansas, as a key point, thereby allowing the motor-carrier subsidiary of the Atchison, Topeka and Santa Fe Railway Company to "operate like any motor carrier" between Wichita, Kansas, on the east, and Pueblo, Colorado, on the west. The Commission at 64 M.C.C. 469-470, said:

> No doubt petitioner [Santa Fe Trail Transportation Company] and Railway could change their present pattern of operations and thus effect some operating economies; however, we doubt if little could be accomplished in the way of operating economies or efficiency so long as the Dodge City key-point restriction remains in effect, because the most practical route for the movement of the greater portion of available traffic is over highways that pass through Dodge City. The evidence is convincing that removal of this restriction would result in substantial benefit of petitioner and the supporting shippers. True, its removal would enable petitioner to provide all-truck service for distances of 500 miles or more, and more effectively to compete with the independent motor carriers; however, the all-truck service would not result in any substantial diversion of traffic . . .

The Commission's liberality in modifying such key-point restrictions as it may impose and its haphazard designation of key points to begin with have enabled such railroad-affiliated carriers as Pacific Motor Trucking Company and Santa Fe Trail Transportation Company to rank among the biggest motor carriers in the country. Pacific Motor Trucking Company is, revenue-wise, the tenth largest motor carrier of property having had oper-

ating revenues in the year 1956 of $29,071,328, and Santa Fe Trail Transportation Company is the 46th with 1956 operating revenues of $11,997,175. Surely these railroad-affiliated motor carriers would not have grown to such awesome proportions if their operations had, indeed, been effectively restricted to service auxiliary to, or supplemental of, the train service of their parent railroads. Their size alone would seem to bear testimony to the inefficacy of the key-point manner of restricting their service. Only the imposition of prior or subsequent rail haul restrictions would assure that railroad-subordinate motor carriers confine their activities in aid only of the rail operations. Such a restriction should be a condition in every grant to a railroad or an affiliated motor carrier to render motor service, whether by acquisition under section 5(2) or by application under section 207. As Mr. Justice Douglas said so concisely, ". . . let the service be limited to commodities which have a prior or subsequent rail haul."

In short, the recent history of the Commission's administration of the provisions of the National Transportation Policy and the Interstate Commerce Act relating to railroad operation of motor vehicles indicates that it has abandoned its obligation, set forth in *Parker, supra,* at 326 U.S. 73, 65 S. Ct. 1497, "to guard against the danger of the development of a transportation monopoly." The time has come, we believe, for this Court to forcefully remind the Commission of this mandate and to take steps to insure that it is faithfully obeyed, in this case and others of similar nature which may follow. The most appropriate method by which this Court can achieve this objective is to require the Commission in this case, and others which involve rail use of motor vehicles, to impose, as a minimum, a restriction limiting such use to the transportation of shipments having a prior or subsequent rail haul. Only by such a holding can the Court insure that the Congressional policy intended to main-

tain and promote a healthy, independent, motor carrier industry, will not become a dead letter.

Wherefore, it is urged that the judgment of the District Court be reversed and the case remanded to the District Court with instructions to set aside the Commission's report and order insofar as it authorizes Motor Transit to render service not confined to auxiliary and supplemental operations and for disposition otherwise consistent with this Court's opinion.

CERTIFICATE OF SERVICE

I, Peter T. Beardsley, one of the attorneys for appellants herein, and a member of the bar of the Supreme Court of the United States, hereby certify that, on the twenty-sixth day of August, 1957, I served copies of the foregoing document on the several parties herein as follows:

1. On the United States, by mailing a copy in a duly addressed envelope, with postage prepaid, to Oliver Gasch, United States Attorney for the District of Columbia, at Room 3600-A, United States Court House, Washington, D. C., and by mailing a copy in a duly addressed envelope, with postage prepaid, to The Solicitor General, Department of Justice, Washington 25, D. C.

2. On the Interstate Commerce Commission, by mailing a copy in a duly addressed envelope with postage prepaid, to Robert Ginnane, Esq., its General Counsel, at the offices of the Commission, Washington 25, D. C.

3. On the Rock Island Motor Transit Company, intervening defendant, by mailing a copy in a duly addressed envelope with airmail postage prepaid, to A. B. Howland, Esq., its attorney, at 500 Bankers Trust Building, Des Moines 9, Iowa.

4. On the Employees' Committee of Rock Island Motor Transit Co., Davenport Chamber of Commerce, et al., and Shippers' Committee, intervening defendants, by mailing a copy in a duly addressed envelope with airmail postage prepaid, to D. C. Nolan, Esq., their attorney, at Suite 405, Iowa State Bank Bldg., Iowa City, Iowa.

5. On the Railway Labor Executives' Association, Brotherhood of Railroad Trainmen, and Order of Railway Conductors and Brakemen, intervening plaintiffs, by mailing copies, in a duly addressed envelope, with post

age prepaid; to James L. Highsaw, Jr., their attorney, at 620 Tower Bldg., Washington, D. C.

6. On the National Industrial Traffic League, *amicus curiae*, by mailing a copy in a duly address 1 envelope, with airmail postage prepaid, to John S. Burchmore, Esq., its attorney, at 2106 Field Building, Chicago 3, Illinois.

PETER T. BEARDSLEY

APPENDIX A

NATIONAL TRANSPORTATION POLICY

[*September 18, 1940.*] [*49 U. S. C., preceding §§ 1, 301, 901, and 1001.*] It is hereby declared to be the national transportation policy of the Congress to provide for fair and impartial regulation of all modes of transportation subject to the provisions of this Act, so administered as to recognize and preserve the inherent advantages of each; to promote safe, adequate, economical, and efficient service and foster sound economic conditions in transportation and among the several carriers; to encourage the establishment and maintenance of reasonable charges for transportation services, without unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices; to cooperate with the several States and the duly authorized officials thereof; and to encourage fair wages and equitable working conditions;—all to the end of developing, coordinating, and preserving a national transportation system by water, highway, and rail, as well as other means, adequate to meet the needs of the commerce of the United States, of the Postal Service, and of the national defense. All of the provisions of this Act shall be administered and enforced with a view to carrying out the above declaration of policy.

* * * * *

COMBINATIONS AND CONSOLIDATIONS OF CARRIERS

SEC. 5. [*As amended August 24, 1912, February 28, 1920, June 10, 1921, June 16, 1933, June 19, 1934, August 9, 1935, September 18, 1940, and August 2, 1949.*] [*49 U. S. C. § 5.*]

* * * * *

(2) (a) It shall be lawful, with the approval and authorization of the Commission, as provided in subdivision (b)—

(i) for two or more carriers to consolidate or merge their properties or franchises, or any part thereof, into one corporation for the ownership, management, and operation of the properties theretofore in separate ownership or for any carrier, or two or more carriers jointly, to purchase, lease or contract to operate the properties, or any part thereof, of another; or for any carrier, or two or more carriers jointly, to acquire control of another through ownership of its stock or otherwise; or for a person which is not a carrier to acquire control of two or more carriers through ownership of their stock or otherwise; or for a person which is not a carrier and which has control of one or more carriers to acquire control of another carrier through ownership of its stock or otherwise; or

(ii) for a carrier by railroad to acquire trackage rights over, or joint ownership in or joint use of, any railroad line or lines owned or operated by any other such carrier, and terminals incidental thereto.

* * * * *

(b) Whenever a transaction is proposed under subparagraph (a), the carrier or carriers or person seeking authority therefor shall present an application to the Commission, and thereupon the Commission shall notify the Governor of each State in which any part of the properties of the carriers involved in the proposed transaction is situated, and also such carriers and the applicant or applicants (and, in case carriers by motor vehicle are involved, the persons specified in section 205 (e)), and shall afford reasonable opportunity for interested parties to be heard. If the Commission shall consider it necessary in order to determine whether the findings specified below may properly be made, it shall set said application for public hearing; and a public hearing shall be held in all cases where carriers by railroad are involved unless the

Commission determines that a public hearing is not necessary in the public interest. If the Commission finds that, subject to such terms and conditions and such modifications as it shall find to be just and reasonable, the proposed transaction is within the scope of subparagraph (a) and will be consistent with the public interest, it shall enter an order approving and authorizing such transaction, upon the terms and conditions, and with the modifications, so found to be just and reasonable: *Provided*, That if a carrier by railroad subject to this part, or any person which is controlled by such a carrier, or affiliated therewith within the meaning of paragraph (6), is an applicant in the case of any such proposed transaction involving a motor carrier, the Commission shall not enter such an order unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

* * * *

APPLICATION FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

Sec. 206. [*August 9, 1935, amended June 29, 1938, September 18, 1940, September 1, 1950.*] [*49 U.S.C., § 306.*] (a) (1) Except as otherwise provided in this section and in section 210a, no common carrier by motor vehicle subject to the provisions of this part shall engage in any interstate or foreign operation on any public highway, or within any reservation under the exclusive jurisdiction of the United States, unless there is in force with respect to such carrier a certificate of public convenience and necessity issued by the Commission authorizing such operations: *Provided, however*, That, subject to section 210, if any such carrier or predecessor in interest was in bona fide operation as a common carrier by motor vehicle

on June 1, 1935, over the route or routes or within the territory for which application is made and has so operated since that time, or if engaged in furnishing seasonal service only, was in bona fide operation on June 1, 1935, during the season ordinarily covered by its operation and has so operated since that time, except in either instance as to interruptions of service over which the applicant or its predecessor in interest had no control, the Commission shall issue such certificate without requiring further proof that public convenience and necessity will be served by such operation, and without further proceedings, if application for such certificate is made to the Commission as provided in paragraph (b) of this section and within one hundred and twenty days after this section shall take effect, and if such carrier was registered on June 1, 1935, under any code of fair competition requiring registration, the fact of registration shall be evidence of bona fide operation to be considered in connection with the issuance of such certificate. Otherwise the application for such certificate shall be decided in accordance with the procedure provided for in section 207 (a) of this part and such certificate shall be issued or denied accordingly. Pending the determination of any such application the continuance of such operation shall be lawful: *And provided further*, That this paragraph shall not be so construed as to require any such carrier lawfully engaged in operation solely within any State to obtain from the Commission a certificate authorizing the transportation by such carrier of passengers or property in interstate or foreign commerce between places within such State if there be a board in such State having authority to grant or approve such certificates and if such carrier has obtained such certificate from such board. Such transportation shall, however, be otherwise subject to the jurisdiction of the Commission under this part.

(2) Unless otherwise specifically indicated in such certificate, the holder of any certificate heretofore issued

under this part, or hereafter issued under this part pursuant to an application filed on or before the date on which this paragraph takes effect, authorizing the holder thereof to engage as a common carrier by motor vehicle in the transportation in interstate or foreign commerce of passengers or property over any route or routes or within any territory, may without making application under this section engage, to the same extent and subject to the same terms, conditions, and limitations, as a common carrier by motor vehicle in the transportation of passengers or property, as the case may be, over such route or routes or within such territory, in commerce between places in the United States and places in Territories or possessions of the United States.

(3) Subject to the provisions of section 210, if any person (or its predecessor in interest) was in bona fide operation on March 1, 1950, over any route or routes or within any territory, as a common carrier engaged in the transportation of passengers or property by motor vehicle in commerce between any place in the United States and any place in a Territory or possession of the United States, and has so operated since that time (or if engaged in furnishing seasonal service only, was in bona fide operation on March 1, 1950, during the season ordinarily covered by its operations and has so operated since that time), except in either instance as to interruptions of service over which such applicant or its predecessor in interest had no control, the Commission shall issue a certificate authorizing such operations without requiring further proof that public convenience and necessity will be served thereby, and without further proceedings, if application for such certificate is made to the Commission as provided in paragraph (b) of this section and within one hundred and twenty days after the date on which this subparagraph takes effect. Pending the determination of any such application, the continuance of such operation without a certi

~~ficate shall be lawful. Any carrier which, on the date this~~ subparagraph takes effect, is engaged in an operation of the character specified in the foregoing provisions of this subparagraph, but was not engaged in such operation on March 1, 1950, may under such regulations as the Commission shall prescribe, if application for a certificate is made to the Commission within one hundred and twenty days after the date on which this subparagraph takes effect, continue such operation without a certificate pending the determination of such application in accordance with section 207 (a).

(b) Application for certificates shall be made in writing to the Commission, be verified under oath, and shall be in such form and contain such information and be accompanied by proof of service upon such interested parties as the Commission shall, by regulation, require. Any person, not included within the provisions of paragraph (a) of this section, who or which is engaged in transportation in interstate or foreign commerce as a common carrier by motor vehicle when this section takes effect may continue such operation for a period of one hundred and twenty days thereafter without a certificate and, if application for such certificate is made to the Commission within such period, the carrier may, under such regulations as the Commission shall prescribe, continue such operation until otherwise ordered by the Commission.

ISSUANCE OF CERTIFICATE

SEC. 207. [*August 9, 1935.*] [*49 U.S.C., § 307.*] (a) Subject to section 210, a certificate shall be issued to any qualified applicant therefor, authorizing the whole or any part of the operations covered by the application, if it is found that the applicant is fit, willing, and able properly to perform the service proposed and to conform to the provisions of this part and the requirements, rules,

and regulations of the Commission thereunder, and that the proposed service, to the extent to be authorized by the certificate, is or will be required by the present or future public convenience and necessity; otherwise such application shall be denied: *Provided, however,* That no such certificate shall be issued to any common carrier of passengers by motor vehicle for operations over other than a regular route or routes, and between fixed termini, except as such carriers may be authorized to engage in special or charter operations.

(b) No certificate issued under this part shall confer any proprietary or property rights in the use of the public highways.

TERMS AND CONDITIONS OF CERTIFICATE

SEC. 208. [*August 9, 1935.*] [*49 U.S.C., § 308.*] (a) Any certificate issued under section 206 or 207 shall specify the service to be rendered and the routes over which, the fixed termini, if any, between which, and the intermediate and off-route points, if any, at which, and in case of operations not over specified routes or between fixed termini, the territory within which, the motor carrier is authorized to operate; and there shall, at the time of issuance and from time to time thereafter, be attached to the exercise of the privileges granted by the certificate such reasonable terms, conditions, and limitations as the public convenience and necessity may from time to time require, including terms, conditions, and limitations as to the extension of the route or routes of the carrier, and such terms and conditions as are necessary to carry out, with respect to the operations of the carrier, the requirements established by the Commission under section 204 (a) (1) and (6): *Provided, however,* That no terms, conditions, or limitations shall restrict the right of the carrier to add to his or its equipment and facilities over the routes, between the termini, or within the territory speci-

fied in the certificate, as the development of the business and the demands of the public shall require.

SUSPENSION, CHANGE, REVOCATION, AND TRANSFER OF CERTIFICATES, PERMITS, AND LICENSES

SEC. 212. [*August 9, 1935, amended June 29, 1938, September 18, 1940.*] [*49 U.S.C., § 312.*] (a) Certificates, permits, and licenses shall be effective from the date specified therein, and shall remain in effect until suspended or terminated as herein provided. Any such certificate, permit, or license may, upon application of the holder thereof, in the discretion of the Commission, be amended or revoked, in whole or in part, or may upon complaint, or on the Commission's own initiative, after notice and hearing, be suspended, changed, or revoked, in whole or in part, for wilful failure to comply with any provision of this part, or with any lawful order, rule, or regulation of the Commission promulgated thereunder, or with any term, condition, or limitation of such certificate, permit, or license: *Provided, however,* That no such certificate, permit, or license shall be revoked (except upon application of the holder) unless the holder thereof willfully fails to comply, within a reasonable time, not less than thirty days, to be fixed by the Commission, with a lawful order of the Commission, made as provided in section 204 (c), commanding obedience to the provision of this part, or to the rule or regulation of the Commission thereunder, or to the term, condition, or limitation of such certificate, permit, or license, found by the Commission to have been violated by such holder: *And provided further,* That the right to engage in transportation in interstate or foreign commerce by virtue of any certificate, permit, license, or any application filed pursuant to the provisions of section 206, 209, or 211, or by virtue of the second proviso of section 206 (a) or temporary authority under section 210a, may

be suspended by the Commission, upon reasonable notice of not less than fifteen days to the carrier or broker, but without hearing or other proceedings, for failure to comply, and until compliance, with the provisions of section 211 (c), 217 (a), or 218 (a) or with any lawful order, rule, or regulation of the Commission promulgated thereunder.

(b) Except as provided in section 5, any certificate or permit may be transferred, pursuant to such rules and regulations as the Commission may prescribe.

APPENDIX B

C. A. GRACEY

(Record pp. 1502-1580)

Mr. Gracey is Vice-President of the Iowa-Nebraska Transportation Company, Inc. (R. 1502). The principal office and one of its terminals is located at Avoca, Iowa, one of the points included in applicant's request for authority. (R. 1503).

The company in addition to its Avoca terminal has terminals located in New York, New York, Chicago, Illinois, Des Moines, Iowa, and Omaha, Nebraska at which points it maintains full time employees and provides pick up and delivery service. In addition to said terminals the company maintains agents at Davenport, Iowa City, Cedar Rapids, Marshalltown, Sioux City, Ames, Nevada, and Boone, Iowa. These agents are independent cartage companies and make the pick ups and deliveries at said points. (R. 1504).

The company has authority to and is presently serving in interstate commerce all points located in the State of Iowa situated on U.S. Highway 6 and Omaha, Nebraska. It conducts an operation over Iowa Highways 83 and 64 between Atlantic, Iowa, and Omaha, Nebraska, serving all intermediate points. It operates between Cedar Rapids and Iowa City over U.S. Highway 218. (R. 1506).

The company is providing peddler service to points lying along U.S. Highway 6 and over Iowa Highways 83 and 64. It is also providing peddler service to Cedar Rapids, Iowa City and intermediate points on U.S. Highway 218. (R. 1507). To all of these points it provides delivery service and pick up service where traffic demands it. It handles interline freight for delivery at these points originating at Chicago, Des Moines, and Omaha. Likewise it turns over to connecting lines at

Chicago, Des Moines, and Omaha freight that is destined to points beyond its line which is picked up in these various communities. (R. 1508). It renders service on L.T.L. shipments as well as truckload shipments to all points. (R. 1509-1510).

Exhibit #30 lists the shipper witnesses who appeared in support of the application from various towns involved. (R. 1928). Of these the Iowa-Nebraska Transportation Company serves Adair, Altoona, Anita, Atlantic, Casey, Cedar Rapids, Colfax, Coralville, Council Bluffs, Davenport, Des Moines, Dexter, Durant, Grinnell, Harlan, Ladora, Marne, Marengo, Menlo, Mindon, Mitchellville, Newton, Neola, Oakland, Stuart, Tiffin, Underwood, Walnut, and Wilton Junction, Iowa. Referring to the list of witnesses from each town, witness testified that he was familiar with many of the names and that they were consignees rather than shippers and that his company served many of them. In most cases it is on less than truckload shipments. (R. 1510-1511).

Exhibits No. 31, 32 and 33 are lists of representative shipments indicating the services that have been performed from September 27, 1951 to April, 1952, by the company, for the communities involved in this application. (R. 1939-1956). These exhibits were prepared from delivery sheet records and the underlying data made available to all those present in the hearing room. (R. 1511). Exhibit 31 covers shipments originating in Omaha destined to the communities involved, (R. 1512), Exhibit 32 covers the same type of shipments originating at Des Moines (R. 1512), and Exhibit 33 the same out of Chicago. (R. 1513). It should be noted that as here used the word origin means either point of origin on Iowa-Nebraska Transportation lines or origin through connecting line source. (R. 1513).

The equipment of the company in the great majority of cases is being used to full capacity. In the event that

additional equipment should be necessary to handle any increased demands for service in the territory, the company is in a position and is willing to add such needed equipment. Mr. Gracey did not know of any occasions where freight was destined to or originated at any points involved in this application where the company refused or otherwise neglected to pick up the shipment. (R. 1515).

JOE BOS

(Record pp. 1638-1664)

Mr. Bos is president of the Bos Truck Lines, Inc. with headquarters at Marshalltown, Iowa. (R. 1638). It is authorized to serve all intermediate points located on U.S. Highway 6 in the State of Iowa. (R. 1639-1640).

The company owns sixty trailers, forty tractors and seventeen straight trucks and does some leasing besides. (R. 1640). It has terminals located in Chicago, Marshalltown, Des Moines and Omaha. (R. 1640).

The company renders a daily service between Chicago and Omaha over both U.S. Highway 6 and 30. It always has one or two trucks daily on U.S. 6 out of Omaha to Des Moines and two or three trucks out of Chicago to Des Moines on U.S. 6. It runs about six to seven trucks in and out of Chicago and out of Marshalltown. It could haul more freight than it is now hauling with the same equipment. (R. 1640). It maintains eight pick-up and delivery trucks and about seven to ten semi-trailers in Des Moines at all times. At Omaha it keeps about six pick-up trailers and three or four semi-trailers at all times. (R. 1641).

It is rendering service on U.S. Highway 6 at the present time. It has never refused to render any service on Highway 6. It has teletype service between its various terminals. It interlines freight with other carriers at

Des Moines, Omaha, Chicago, and Tri-Cities. It solicits business and advertises for business and is continuously and constantly seeking to haul more freight. (R. 1641-1642).

The company is rendering a daily service from Chicago to Des Moines, from Des Moines to Chicago, from Des Moines to Omaha and from Omaha to Des Moines. From Omaha to Chicago there are some trucks that do not stop while other trucks stop at points on Highway 6. It has had no complaints with reference to the service it is rendering to intermediate points on U.S. Highway 6. (R 1644).

The company renders a daily service at Council Bluffs, Davenport and the Tri-Cities. (R. 1649). It has authority between Cedar Rapids and Omaha and conducts an operation between those points. (R. 1651).

It has not, in the last six months, had any calls for service on L.T.L. shipments of ordinary merchandise destined to the small towns on U.S. Highway 6 that it has refused to handle. In fact, it has guides out, and is soliciting business. (R. 1650).

If a sufficient volume of freight were tendered to this company to warrant the institution of the operation, it would be willing to establish a daily service to all points which it is authorized to serve on U.S. Highway 6, providing service on L.T.L. as well as volume shipments. (R. 1650).

The present competition between Chicago, Tri-Cities, Des Moines and Omaha includes Watson Bros. Transportation Co., Des Moines Transportation Company, Iowa-Nebraska Transportation Company, Carstenson Freight Line and there are some others. If the restriction is removed from the Rock Island Motor Transit Company it would have a big effect on his company's business. (R. 1650-1651).

Bos Truck Lines interlines with other carriers at Marshalltown, Cedar Rapids, Des Moines and Omaha, including Iowa-Nebraska Transportation, Rock Island Motor Transit, Des Moines Transportation Co., Roberts Transfer and others. (R. 1652).

A. W. HOBBS

(Record pp. 1665-1710)

Mr. Hobbs is Vice-President of the Des Moines Transportation Company, Inc. (R. 1665). The company presently operates approximately three hundred tractor-trailer units, with terminals located at Des Moines, Omaha, Mason City, Twin Cities, St. Paul, Chicago and Davenport. (R. 1666).

It operates a daily service between Chicago, the Tri-Cities, Des Moines and Omaha in both directions and conducts daily operations between the Twin Cities and Des Moines. (R. 1666).

It has interline arrangements at Des Moines with respect to shipments destined to Kansas City or St. Louis originating at the Twin Cities and is at present handling a substantial volume of traffic of that kind. The principal carrier with which it interlines at Des Moines for Kansas City is Knaus Freight Lines. With respect to St. Louis, Missouri, it interlines with various carriers. It interlines with other carriers at all of its terminals. (R. 1666-1667).

The company operates one or more trucks, depending on the tonnage, daily from Chicago to Omaha, Nebraska. From Chicago to Des Moines it operates several trucks daily. Except for straight load traffic, the Chicago-Tri-City shipments are loaded on a truck destined to points west of the Tri-Cities. It has a daily truck operation eastbound from Omaha to Chicago and a daily operation eastbound from Des Moines to Chicago. With respect to L.T.L. shipments originating at Chicago or delivered to

Des Moines Transportation by another carrier at Chicago destined to Iowa City, they are loaded on a road truck and delivered to Maher Bros. Transfer at Iowa City. This is a daily operation if there is freight. (R. 1670). A shipment originating at Chicago, or delivered to Des Moines Transportation Company, Inc., by another carrier at Chicago destined to Marengo would be loaded on a road truck at Chicago and delivered direct to the customer at Marengo. A similar shipment destined to Grinnell would be delivered to the Pasch Transfer at Grinnell for delivery. A similar shipment to Kellogg, Iowa, would be delivered direct from the road trailer. A similar shipment to Newton, Iowa, would be delivered to Merchants Transfer at Newton, Iowa. A similar shipment to Atlantic, Iowa, would be delivered to Smiley Transfer Company, and a similar shipment to Council Bluffs, Iowa, would be delivered out of the Omaha Terminal. (R. 1671).

For the purpose of showing representative types of shipments, witness Hobbs produced Manifest Sheets for the months of January and February, 1951 and for the same months in the year 1952. These sheets were available in the hearing room. (R. 1673). The witness picked at random two of the Manifest Sheets for the month of January, 1951, two for the month of February, 1951 and two for January, 1952 and two for February, 1952. Exhibits 37, 38, 39 and 40, (R. 1979-1982), are Manifest Sheets typical of the type of shipments which are handled by this company from Chicago to points located on U.S. Highway 6 which it is authorized to serve. (R. 1674). It is their practice to accept small L.T.L. shipments for delivery at these points. As a matter of fact, 81% of the total of them average less than 600 pounds. (R. 1675).

Witness selected five Manifest Sheets for the year 1951 and five for the year 1952 at random, which refer to shipments handled by Des Moines Transportation Com-

pany between Des Moines and the Davenport Terminal. They are handled on a truck moving from Des Moines eastward which peddles on the return trip. In other words, it peddles to points they are authorized to serve on Highway 6. Manifest Sheet bearing heading Des Moines Transportation Company from Des Moines to Davenport January 10, 1951 is Exhibit 41. Exhibit 42 is a similar Manifest Sheet dated January 4, 1951. Exhibit 43 is a similar Manifest Sheet bearing date of February 3, 1952 and Exhibit 44 is a similar Manifest Sheet bearing date February 19, 1952. (R. 1676-1678, 1983-1990).

Exhibit 45 dated February 5, 1951, Exhibit 46 dated February 1, 1951, Exhibit 47 dated January 27, 1952 and Exhibit 48 dated February 5, 1952, are manifests on trucks that moved on Highway 6 that had deliveries to the towns of Kellogg and Marengo. This is a movement east from Des Moines. (R. 1679).

With respect to all points that the Des Moines Transportation Co. is authorized to serve on Highway 6 it is rendering a daily service or substantially daily service to every point on every shipment irrespective of the type, except for the point Adel which is not involved in this application. There is a carrier that serves Adel from Des Moines. In fact, there are several. (R. 1684).

In the event there was a curtailment or an abandonment of any existing transportation service which is available to the public to points located on Highway 6 it would be willing to file an application for authority to provide a daily peddle service to all points on Highway 6 and, if such authority were granted, it would be willing to perform the service. This would also be true insofar as intrastate traffic is concerned. It would attempt to get that type of authority. (R. 1686-1687).

The company is willing to accept interline freight at Davenport from other carriers destined to points on U.S. Highway 6 which it is authorized to serve, and that is

true with respect to any type or weight of shipment. (R. 1687).

A L.T.L. shipment picked up in the Twin Cities today would arrive in Des Moines tomorrow and be delivered to a point served on U.S. Highway 6 the next day. The same would be true with an interline shipment from Kansas City, if it were received today by 3:30, which is the cut-off time. It would be loaded out tonight for points on U.S. 6. From Chicago to such points as Marengo and other points, other than Des Moines and the Tri-Cities, shipments would be loaded on a truck at Chicago late tonight and peddled, for example, at Marengo direct tomorrow. (R. 1687-1688).

There is a lot of competition between Chicago and Omaha including, On Time, Watson Bros. Transportation Company, Red Ball Transportation Company, Merchants Motor Freight, Rock Island Motor Transit, I.T.I. and Union. It is fair to say at least five or six substantial carriers are coming into Des Moines from Chicago. There are more than five substantial carriers from Minneapolis to Des Moines. (R. 1688).

If the restrictions were lifted from the Rock Island Motor Transit Company, that company would be the very highest type competitor and it would have an effect upon business. If Rock Island is limited to an auxiliary and supplemental service to train service with key-point restrictions preventing through operations from Chicago to Des Moines, and from Chicago to Omaha by motor carrier, it would not be as competitive from an operational standpoint. (R. 1688-1689).

Tonnage-wise about 50% of Des Moines Transportation Co. traffic is interline traffic. Shipment-wise about 46%. (R. 1707). It interchanges with Iowa-Nebraska Transportation Company and other carriers. No claims have been called to its attention regarding Iowa-Nebraska Transportation Company. (R. 1708).

NO. 6

AMERICAN TRUCKING ASSOCIATIONS, INC., et al.,
Appellants

vs.

UNITED STATES OF AMERICA, and INTERSTATE COMMERCE COMMISSION,
Appellees.

On Appeal From The United States District Court
For The District of Columbia

BRIEF OF THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE AS AN AMICUS CURIAE

THE INTEREST OF THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE

The League is a nationwide organization of shippers via all forms of transportation, including railroads, motor carriers, water carriers, and air carriers. The organization is dedicated to the promotion of sound economic transportation.

Broadly speaking, the League has an interest on behalf of its membership, as representative of the shipping public, in the principles and policies governing the regulation of

transportation. It is, therefore, concerned with the interpretation by the Courts and by the Interstate Commerce Commission of the provisions of the National Transportation Policy and the Interstate Commerce Act.

In particular, the League is concerned that the public need for adequate and competitive service by all modes of transportation shall be the paramount consideration in the determination of applications for motor carrier authority, and in the determination in a particular case, as to whether the needed highway transport service shall be performed by a railroad affiliated motor carrier.

In this case the Commission granted operating rights for motor transport service to a railroad owned motor carrier without attaching to the certificate any condition limiting the service to be performed to that which would be auxiliary or supplemental to the railroad service of the affiliated railroad. It is the contention of appellants that as a matter of law the proviso in 49 U.S.C. 5(2)(b) and the National Transportation Policy forbid such unrestricted certificates to rail affiliated motor carriers. The question thus presented, in which the League is interested, is as stated by appellants:

> 2. Whether, in any event, the Interstate Commerce Commission, in authorizing the performance of motor-carrier service by railroads or their affiliates, is required by the provisions of the Interstate Commerce Act and the National Transportation Policy to limit the motor service to be rendered to that which is auxiliary to or supplemental of the rail service of the parent railroad?

It is the position of the League that the Commission is not required by law to limit the motor service to be rendered by a railroad affiliate to that which is auxiliary to or supplemental of the rail service; and that the Commission has the power to authorize motor service by a railroad

affiliate without such limitation when it finds that such authorization is required by the present and future public convenience and necessity.

The League has no interest in the operating rights or ownership of any particular carrier and simply presumes in this case that the record supports the finding of public convenience and necessity for an unrestricted certificate. In doing so we rely upon the decision of the court below as to the sufficiency of the evidence on this record to support the order. On that issue this Court holds that the findings of the Commission may not be reversed if there is substantial evidence to support them. *United States* v. *Pierce Auto Freight Lines*, 327 U.S. 515.

We do not argue here the question whether the proviso of section 5(2)(b) constitutes a policy which affects the Commission's power under 49 U.S.C. 307 or whether the Commission has the power to impose restrictions on motor operations of railroad affiliates, either in acquisition cases under section 5 or in certificate cases under section 307. We believe those questions have been settled in the affirmative by this Court. *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60; *American Trucking Associations* v. *United States*, 326 U.S. 77; *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419; *United States* v. *Texas & Pacific Motor Transport Co.*, 340 U.S. 450.

ARGUMENT.

I.

THE STATUTE DOES NOT REQUIRE THE RESTRICTION OF RAILROAD AFFILIATED MOTOR CARRIER CERTIFICATES.

The proviso of section 5(2)(b) expresses no requirement as to the type of certificate, or the inclusion of restrictions thereto. It does require that the Commission shall not approve the acquisition of a motor carrier by a railroad unless it makes certain findings pertinent to railroad ownership of motor transport. The proviso says:

> *Provided*, That if a carrier by railroad subject to this part, or any person which is controlled by such a carrier, or affiliated therewith within the meaning of paragraph (6), is an applicant in the case of any such proposed transaction involving a motor carrier, the Commission shall not enter such an order unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

These provisions clearly specify the requisite findings to support an order authorizing such an acquisition. They do not specify or necessarily affect the terms of the order to be entered upon such findings when properly made.

A fundamental difference is involved here. For it is one thing to find that an acquisition will enable a railroad to use motor service to public advantage in its operations, as the proviso specifies; it is a wholly different thing to require that the acquired service be limited to the supplementing of rail service. We submit, therefore, that restrictions as to the service to be performed are not inflexibly required by the statute, even in acquisition cases.

In certificate cases under section 307, the policy of the 5(2)(b) proviso properly influences the Commission's determination as to public convenience and necessity. But in such cases the absence of explicit requirement for service restrictions is coupled with the fact that the proviso was never made directly applicable thereto. Its influence is only by implication. The contention of appellants is not supportable by mere implication and finds no basis in the words of the statute or in the regulatory scheme.

In this connection it should be noted that the power of the Commission to attach conditions and limitations to certificates is granted by 49 U.S.C. 308, for expressed purposes. The section is significantly silent as to the imposition of limitations to carry out the policy of the proviso in Section 5(2)(b). Since, therefore, the imposition of limitations under section 308 is discretionary even as to the specific subjects which the Congress enumerated for treatment by limitation, then *a fortiori* it cannot be reasonably contended that the law prescribes the imposition of a limitation pursuant to the proviso of section 5(2)(b).

II.

THE COMMISSION HAS CORRECTLY INTERPRETED THE LAW

In its administration of the statute, the Commission has always inquired into the public need for service as the paramount consideration in determining whether or not to restrict a rail affiliated motor carrier to auxiliary or supplemental rail service. *Interstate Transit Lines, Ext.—Verdon, Nebraska*, 10 M.C.C. 665, 667; *St. Andrews Bay Trans. Co., Extension of Operations*, 3 M.C.C. 711, 716; *Texas & Pac. Motor Transport Co., Ext.—Point Blue, La.*, 47 M.C.C. 425; *Rock Island Motor Transit Co., Ext.—Wellman, Iowa*, 31 M.C.C. 643.

The paramount public need has likewise been given effect by the Commission in acquisition cases under section 5, in determining whether a limiting restriction must be attached to the order. *Rock Island Motor Transit Co.—Purchase—White Line Motor Freight, Inc.*, 40 M.C.C. 457; and *Pacific Motor Trucking Company—Purchase—Lowinel Trucking Co.*, 60 M.C.C. 373.

We submit that the foregoing cases, among others, invalidate the argument of appellants that the Commission has recognized that it is powerless to issue unrestricted motor carrier authority to railroads, or that there is no valid precedent for the Commission's action in this case.

When there is public need for additional motor carrier service which other motor carriers will not or cannot meet, the Commission should have, and we submit that it does have, the authority to certificate a rail affiliated motor carrier to perform such service without restricting it to operations that are auxiliary to or supplemental of the rail operation. The rigid limitation upon the Commission's power which the appellants would read into the proviso of section 5(2)(b) would deny that power contrary to the public interest.

III.

THE CONGRESS HAS IMPLICITLY APPROVED THE COMMISSION'S AUTHORIZATION OF UNRESTRICTED MOTOR SERVICE BY A RAILROAD AFFILIATE.

A search of the legislative history surrounding the enactment of the proviso in section 5(2)(b), and of subsequent amendments to the law, reveals no clear expression as to the congressional intent with respect either to the Commission's power or to its alleged duty to restrict rail affiliated motor carrier service. The mere fact that

the statute has been extensively amended and the declaration of policy overhauled without the imposition of any express requirements for such limitation is indicative of congressional approval of the Commission's administration of the Act under the cases cited above.

Further proof of the complete lack of any congressional intent to impose a rigid limitation on the Commission's power is found in the legislative history surrounding the 1938 amendments to the original Motor Carrier Act. At that time the Congress was confronted with a proposal to make section 307 subject to the requirement of special findings as set forth in the 5(2)(b) proviso. This was on its face something less than a requirement prescribing restricted certificates, yet it was strongly supported by the appellant American Trucking Associations and just as vigorously opposed by the Association of American Railroads. *Hearings Before The Senate Sub-Committee on Interstate Commerce on S.* 3696, 3rd Sess., pp. 128-129; 157-164. The report of the sub-committee, which was adopted by the full Senate Committee, shows that the proposal was dropped as too controversial (Sen. Rep. 1650, 75th Cong., 3rd Sess., p. 3):

> Senator Shipstead introduced an amendment to S. 3606 which proposed to amend section 207(a) of the Motor Carrier Act, 1935, by requiring the same showing upon the application of a carrier other than a motor carrier to obtain a certificate of public convenience and necessity as is required by such carrier to obtain approval of the purchase or other acquisition of a motor carrier. At the hearings upon S. 3606, Senator Shipstead withdrew his amendment for the reason that it appeared that the amendment would provoke controversy and might delay the adoption of S. 3606.

If the amendment of section 207 [49 U.S.C. 307] was too controversial, then *a fortiori* an express requirement upon the Commission to restrict rail-owned motor carrier certificates was wholly outside congressional intent.

CONCLUSION.

The League prays that the Court will interpret 49 U.S.C. 307 and the National Transportation Policy to hold that it is within the discretion and power of the Commission, upon all the evidence to issue an unrestricted certificate to a railroad affiliated motor carrier whenever it finds that the issuance of such a certificate is required by the present and future public convenience and necessity.

Respectfully submitted,

JOHN S. BURCHMORE,
ROBERT N. BURCHMORE,
Amicus Curiae

BURCHMORE, GOOD & BOBINETTE,
2106 Field Biulding,
Chicago 3, Illinois,
Of Counsel.

BRIEF OF TRAFFIC BUREAUS OF OR CHAMBERS OF COMMERCE, SHIPPERS, AND EMPLOYEES OF ROCK ISLAND MOTOR TRANSIT COMPANY, INTERVENERS-APPELLEES

I. FOREWORD

Appropriate and extensive Briefs are being filed by the Interstate Commerce Commission and the Rock Island Motor Transit Company, intervening

defendant, in which the questions presented and issues raised by Appellants and intervening Plaintiffs, in their Briefs, will be fully covered and answered. Thus, we will not burden the Court with a repetition of pointing out the untenable positions of appellants on the issues of (1) whether the Interstate Commerce Commission, in every instance, in authorizing the performance of motor carrier service by railroads or their affiliates, are required, by the Provisions of the Interstate Commerce Act and the National Transportation Policy, to limit the motor service to be given to that which is auxiliary to or supplemental of the rail operations of the railroads involved; and (2) whether the Interstate Commerce Commission, after authorizing the performance of restricted motor carrier service, by a railroad affiliate, over routes acquired by purchase, under Section 5 of the Interstate Commerce Act, 49 U. S. C. Section 5, has authority, under Section 207 of the Interstate Commerce Act, 49 U. S. C. Section 307, *upon proper application and after full public hearing,* to grant to such carrier the right to perform a partially restricted motor carrier service over the same routes?

Likewise, the foregoing Appellees will fully respond to Appellants' contention that the record fails to support the Interstate Commerce Commission's Report and Order authorizing the Rock Island Motor Transit Company to conduct the motor carrier operations granted it in Docket No. MC-29130 (Sub. No. 70), *The Rock Island Motor Transit Company Common Carrier Application.* (63 M.C.C. 91).

It is the intention of these intervening Appellees to supplement the briefs filed by Counsel for the Interstate Commerce Commission and Rock Island Motor

Transit Company relative to the great need of the service authorized as evidenced in the Record and to sustain the Interstate Commerce Commission's decision in this case in the public interest.

II. BASIS OF INTERVENTION

The following organizations and persons intervened in and participated throughout the entire proceedings in this cause before the Interstate Commerce Commission:

The Traffic Bureaus of and/or the Chambers of Commerce of:

Town	Approx. Population
Davenport, Iowa	80,000
Iowa City, Iowa	30,000
Cedar Rapids, Iowa	80,000
Newton, Iowa	12,000
Des Moines, Iowa	190,000
Atlantic, Iowa	7,000
Harlan, Iowa	5,000
Ottumwa, Iowa	40,000
Mason City, Iowa	30,000

Shippers' Committee

(1) Mr. Paul Monroe, President of Monroe Company, Colfa, Iowa, manufacturer of lodge and church furniture, and chairman of Shippers' Committee.

(2) Mr. A. C. Holmdahl, President of the Mid West Stamping Company, Kellogg, Iowa, manufacturer of stamping, hardware and machinery parts — now engaged in essential government work.

(3) Mr. P. H. Kuyper, President of Rol Screen Company, Pella, Iowa, manufacturer of window case-

ments and venetian blinds, engaged in government contract work.

(4) Mr. Sharp Lannon, General Manager, Grinnell Shoe Company, Grinnell, Iowa, manufacturer of shoes, with past government contract work and probable similar work in future.

(5) Mr. G. L. Engle, Traffic Manager, Wind-Power Mfg. Company, Newton, Iowa, manufacturer of farm machinery, engaged in government work.

(6) Mr. R. L. Cocklin, Vice-President, Laco-Oil Burner Company, Griswold, Iowa, manufacturer of oil burners and heaters.

(7) Mr. C. C. Vieth, general merchandise store, Oakland, Iowa,

because the firms represented by these organizations and persons had depended upon the service of the Rock Island Motor Transit Company and its predecessor, the White Line Motor Freight Company, for more than twenty (20) years, the vital importance of such service to them will be more fully developed in the brief following.

Employees' Committee

(1) John F. Morrison, *Chairman,* Company Commercial Agent, Des Moines, Iowa, nine (9) years' service with the Company; (2) Don Quinn, City Dispatcher, Des Moines, Iowa, nine (9) years' service; (3) Ross Johnson, former driver now over-the-road dispatcher, Des Moines, Iowa, ten (10) years' seniority with Company; (4) Mrs. Lillian McKenna, Assistant Payroll Clerk, Des Moines, Iowa, seven (7) years' association with Company; (5) P. J. Doyle,

former driver, dock worker and now claim adjuster, twelve (12) years' service with Company, because the more than eight hundred and fifty (850) employees of the Rock Island Motor Transit Company were dependent upon the continuation of the motor carrier operations of that company for their jobs and tenure and seniority rights which they had acquired in the employment with the Rock Island Motor Transit Company and its predecessor, The White Line Motor Freight Company, which facts will be further developed in the brief following.

III. BACKGROUND OF CASE

It is the purpose of these Interveners to point out to the Court the fact that there is a great deal more at stake in this case than any effect that its final determination will have, be it favorable or adverse, upon the applicant, the Rock Island Motor Transit Company, or the interveners and protestants in opposition to the company's application for a certificate to continue to perform motor carrier service in the territory involved.

The Record shows that a great number of witnesses, those who had actually used the Company's service for many years, testified without qualification, that a denial of a continuation of the Company's service would cause them irreparable loss in their respective businesses because no comparable transportation service was available to them.

It is difficult to properly present the interests and positions of these interveners without repeating or partially duplicating some of the factual data which may be presented in other briefs filed in this cause. However, to give the Court a full understanding of all

the facts which the Interstate Commerce Commission had before it, at the time of its decision herein, we deem it necessary to review some of the background and history of the case.

The application, although it covers the route between Chicago, Illinois, and Omaha, Nebraska, primarily provides service to a large segment of the State of Iowa. To appreciate the interest of the shipping interests represented by these intervening Appellees, the development of the motor carrier industry in the State of Iowa must be considered.

Prior to the Federal Motor Carrier Act of 1935, Part II of the Interstate Commerce Act, and from the time of the first enactment of a regulatory act in Iowa, governing Iowa intra-state transportation of freight, in 1923 the average motor carrier was engaged in transporting merchandise from jobbing and wholesale centers in the State such as Des Moines, Cedar Rapids, Sioux City, Davenport, Waterloo, etc., to the small towns in the trade areas of those shipping centers. *It was a one-way operation*—from the jobber or wholesaler to the small town merchant. The motor carrier of that day was generally an owner-operator and occasionally would have one or two additional trucks. These trucks had a very limited capacity and a truck which transported more than five tons was an exception rather than the rule.

With the advent of paved highways between the jobbing centers and across the State of Iowa in 1929 to 1931 intercity motor carrier operations developed so that by 1934 there was a complete network of motor carrier lines operating between all the principal towns and cities within the state, and serving all the

intermediate points, under authority granted them under the Iowa Motor Carrier Act, for intra-state authority, and performing interstate operations over such routes and to all intermediate points without regulation or grant of authority until the Federal Motor Carrier Act of 1935 was passed. (For this network of lines which were so established see Exhibit 25, R. 1919.)

Likewise, in the period between approximately 1930 to 1935, extensive intercity motor carrier operations were established, by new motor carriers in the field, between Chicago, Illinois, and Des Moines, Iowa; Des Moines, Iowa, and Omaha, Nebraska; Des Moines, Iowa, and the twin cities of Minneapolis and St. Paul, Minnesota; etc. These operations were confined primarily to overhead operations between the terminal points and as time went on these operations were extended to other interstate points. During all this time, however, the local service, to the smaller communities, commonly referred to in the industry as "peddler service," was being conducted by the original carriers.

The White Line Motor Freight Company, the predecessor of Rock Island Motor Transit Company, the present applicant, was one of the original motor carriers in the State of Iowa (R. 228), performing first a local peddler service from Des Moines to Iowa towns along U. S. Highway No. 6, both east and west from Des Moines. Later this Company, but long prior to Federal regulation in 1935, extended its operations to the interstate points of Omaha, Nebraska, and Chicago, Illinois, continuing to give local "peddler" service to all the small and intermediate towns between Omaha and Chicago.

With the development of motor carrier service along the main highways in Iowa, both in intra- and interstate commerce, which highways in virtually every instance paralleled a main rail line across the state, the local way freight service of the railroads gradually diminished because of the diversion of traffic to the motor carrier lines who were giving a more flexible and efficient service. The merchants and businesses in the small communities along these lines and routes thus turned to and developed their businesses and enterprises on the motor carrier service so established.

The White Line Motor Freight Company and its successor, Rock Island Motor Transit Company continued throughout the years to serve all the merchants along U. S. Highway No. 6 between Omaha and Chicago and various off-route points, all of which were rail points of the Chicago, Rock Island and Pacific Railroad, both in intra- and interstate commerce; whereas, the motor carriers or predecessors who came into the transportation field shortly prior to Federal Regulation in 1935, such as Des Moines Transportation Company; Iowa-Nebraska Transportation Company; Bruce Motor Freight Company; etc.; continued to perform only an overhead service between the main terminal points and to such intermediate points where there was volume traffic and then in only interstate commerce because the original carriers, such as White Line Motor Freight Company, had been granted exclusive intra rights along the routes served by them (R. 21).

The purpose of the foregoing recital of the development of the motor carrier industry in Iowa and particularly as it developed in the territory involved in this proceeding is to point out to the Court the basis

and reason of the dependence of these interveners and the shipping interests represented by them in the continuation of the service so long provided by the Applicant and its predecessor.

ARGUMENT

POINT I

The Federal Motor Carrier Act, Part II of the Interstate Commerce Act, 49 U. S. C. 207, Requires That the Findings and Order of the Defendant, the Interstate Commerce Commission, be Sustained.

Section 207, Title 49 U. S. C., provides:

> "(a) Subject to Section 310, a *certificate shall be issued* to any qualified applicant therefor, authorizing the whole or any part of the operations covered by the Application, if it is found that the Applicant is fit, willing and able properly to perform the service proposed and to conform to the provisions of this part and the requirements, rules, regulations of the Commission thereunder, and that the proposed service, to the extent to be authorized by the certificate, *is or will be required by the present or future public convenience and necessity* * * *."

The applicant in this case was found fit, willing and able properly to perform the service proposed and to conform to the requirements, rules and regulations of the Commission (R. 10). Its many years of successful operations demonstrate that it possesses these qualities. The sole issue remaining, therefore, is the service proposed required by the present or future public convenience and necessity? This query must be definitely answered in the affirmative. Past lawful operations in a territory is not only the best, but virtually conclusive evidence of the need of the service. (See

C. & D. Motor Delivery Company—Elliott, 38 M.C.C. 547; *Miller-Newman,* 57 M.C.C. 395.) The Applicant has been serving and proposes to continue to serve many points and places not otherwise served by motor carriers and in many instances without rail service. No other motor carrier or other transportation facility is presently giving or can perform the service which has been performed by the Applicant and which the Applicant proposes to continue to perform. (R. 74)

A denial of the instant application by the Commission would have been arbitrary in view of the record establishing the great need for the continuation of Applicant's service and subject to "judicial review and reversal." See: 9 American Jurisprudence, 489, Section 87; *Baltimore & Ohio Railroad Company* v. *United States,* 5 Fed. Supp. 929 and affirmed 293 U. S. 454; 55 S. Ct. 268; *Oregon R. & N. Co.* v. *Fairchild,* 224 U. S. 510, 32 S. Ct. 535, and *Thomson* v. *Iowa State Commerce Commission,* 235 Iowa 469; 15 W. W. 2d 603.

In *Baltimore & Ohio Railroad Company* v. *United States, supra,* it is said:

> "Epitomizing what has already been said—the commission was bound to give legal effect to facts established in evidence; Oregon R. & N. Co. v. Fairchild, 224 U. S. 510, 525, 32 S. Ct. 535, 56 L. Ed. 863; its order should be set aside if disregard by it is shown of substantial and uncontradicted evidence having a bearing upon the issue, S. W. Bell Tel. Co. v. Public Service Commission, 262 U. S. 276, 287, 43 S. Ct. 544, 67 L. Ed. 981, 31 A. L. R. 807; and to refuse to consider pertinent and substantial evidence is considered arbitrary action, sufficient to set aside its order, Chicago Junction Case, supra."

A decision, in this case, denying the Application, in view of the overwhelming evidence of the need of the service, would have been directly contrary to the definitely expressed intention of the Congress as set forth in the above quoted part of the Federal Motor Carrier Act.

POINT II

The Public Interest Was and is the Sole and Paramount Issue in This Case.

The intervention of the Iowa State Commerce Commission in support of the instant application; the intervention and support of the traffic bureaus and Chambers of Commerce of the principal jobbing and shipping centers in the State of Iowa; the intervention and support of the traffic bureaus of the great shipping centers of Chicago, Twin Cities, St. Joseph, Missouri, and Omaha, Nebraska, together with the intervention and support of the application by representatives of independent motor carriers serving the midwest territory, some of whom are competitive with the applicant in the territory involved, very forcibly demonstrate that there is a great public demand and need for the service proposed by the Applicant.

Certainly, if there was not such a need for applicant's service, the following typical representatives of traffic bureaus and Chambers of Commerce would not have made such pertinent statements in their testimony as:

George M. Cummins, Traffic Commissioner of Davenport, Iowa, Chamber of Commerce, testified:

> "It (Applicant) has been a satisfactory service, and we want it to continue as a daily service. Anything that will hurt, that is going to jeopardise

our interests. (R. 231). * * * I would say * * * that I know of no other one (motor carrier serving Davenport) that so completely gives that satisfactory service." (R. 232)

Arthur J. Maurer, Assistant Traffic Director of the Chicago Association of Commerce and Industry, testified:

"* * * it is the feeling of our shippers (2100) that the Rock Island Motor Transit is performing a necessary service and that they should be permitted to perform a *full common carrier operation.* That means to handle not only the smaller towns but the larger towns on their route and to handle truckloads as well as less-than-truck load traffic. In other words, to have an operation which is economically sound." (R. 245)

Robert T. Gage, Secretary-Manager of Iowa City, Iowa, Chamber of Commerce, stated:

"* * * there is no doubt but what one of the outstanding attractions that we have in Iowa City is our trucking facilities and, of course, the very nub of that is the Rock Island Motor Transit's interstate service." (R. 485)

Henry Archambo, Assistant Traffic Director for the Minneapolis, Minnesota, Traffic Association, whose members have a regular flow of traffic, by motor truck, into the Iowa territory served by Applicant company, testified:

"* * * We have got some very good truck service which we want to keep out of the Minneapolis market, principally Watson, H & W, Des Moines Transportation; but when you come to peddle service, my experience has been this in investigations which I have made * * * the Rock

Island Motor Transit Company has been complying with its common carrier authority, where the other fellows who should give us this kind of service are picking and choosing the freight, and that is very detrimental to our industry." (R. 1086)

Carl A. Hansen, Traffic Manager of Des Moines, Iowa, Chamber of Commerce, said:

"I know numerous carriers have interstate rights to serve those points, (small communities located intermediate between the larger centers) but I know of none who are serving on the smaller shipments except the Rock Island Motor Transit. (R. 1318) * * * peddler service, which is being rendered by the Rock Island Motor Transit Company, for the handling of both intra- and interstate shipments, is a matter of concern to the shippers and receivers of freight who are members of our bureau here in Des Moines." (R. 1319)

nor would it be expected that such representative independent motor carrier operators would have made the following statements in support of the continuation of Applicant's service:

V. J. Grice, General Manager of H & W Motor Express Company of Dubuque, Iowa, which company is in direct competition with the applicant company in part of the Iowa territory,

"We have a large amount of interchange with Rock Island Motor Transit, both in freight that we originate and freight that they originate. We have common points of interchange at Des Moines, Cedar Rapids and the Tri-cities, (Davenport, Iowa, Rock Island and Moline, Illinois) and in some respects we are competitive to the Rock Island Motor Transit. There are points served by Rock Island Motor Transit that our company has

authority to serve for which we interline traffic with Rock Island Motor Transit for delivery because there is insufficient volume for us to conduct the operation at a profit." (R. 295)

M. J. Riley, Vice-President and Traffic Manager of Dohrn Transfer Company of Rock Island, Illinois:

"* * * We have interlined considerable traffic with the Rock Island Motor Transit Company at the Tri-cities (see above) (R. 343). Excepting one or two smaller points * * * I know of no other carrier that performs a local peddler who will render a consistent service to the points in Iowa served by the Rock Island Motor Transit Company than that company." (R. 345)

Other motor carriers who have interlined with the Applicant company for years gave similar evidence of their dependence on Rock Island Motor Transit for local service to all the points and places served by it.

The Record in this case demonstrates beyond question that the quality and character of the service rendered by the Applicant Company throughout the years up to the time that it was ordered to curtail its operations was of such a nature that business and industry, both within and without the State of Iowa, became dependent upon it to the extent that a cessation of such operations would result in a direct impairment of the conduct of business and service rendered by such businesses and industry.

The testimony of *Honorable Carl Reed, Chairman of the Iowa State Commerce Commission,* and a man who has had many years experience with and knows the transportation problems of the State of Iowa, clearly establishes that the service proposed by the

applicant was in the public interest and welfare. The following testimony of Chairman Reed demonstrates this public interest:

> "The experience of our commission, based upon the information that came to us from the shippers and also the carriers themselves, has been *that the carriers were not interested in local service.* (R. 741). The trend in this state in the matters that we have contact with has been that the carriers generally are getting away from the local service and the smaller shipments. (R. 742). The position of the commission has been that it does not take any position for or against any particular carrier. In this particular instance, our interest has been to see that service was performed to the various communities. * * * I don't know offhand just what authority every carrier has, *but I do not recall of any carrier that has been performing this service that the Rock Island Motor Transit Company has been performing.*" (R. 743)

Who is better qualified to know and who is more familiar with the transportation needs and requirements of the people of Iowa than the legally constituted body established by the State of Iowa, the Iowa State Commerce Commission, speaking through its Chairman? The Iowa State Commerce Commission as shown by Chairman Reed's testimony is not interested in or concerned with what particular carrier performs a service as long as the service is performed. That body has the statutory duty to see that public transportation agencies provide an efficient and regular intra-state service to the extent of their capabilities, be that service rail or motor.

POINT III

Any Restriction Imposed Upon the Applicant Company Requiring it to Operate Strictly on an Auxiliary and Supplemental Basis to the Rail Operations of the Chicago, Rock Island and Pacific Railroad to the Extent That Traffic Handled by It Had to be on Rail Billing and Have Either a Prior or Subsequent Movement by Rail Would be Contrary to the Record and Detrimental to the Public Interest.

It is apparently appellants' position that any authority granted to Applicant must, under Section 5 (2) (b) of the Interstate Commerce Act as they attempt to read it into Section 207 of the Motor Carrier Act, be strictly confined to the handling of rail freight by the transit company, i.e., on rail billing and which had either a prior or subsequent rail movement. Of course we cannot agree with appellants' interpretation of Section 5 applying to cases arising under Section 207 of the Motor Carrier Act (convenience and necessity or certificate cases). As stated, this contention will be thoroughly answered by Briefs filed by Defendant-Appellees.

We do, however, point out that if such restrictions were imposed that Applicant's operations would be so curtailed that its service would not and could not fulfill the public requirements. Before further discussing the drastic effect that such restrictions would have upon the service involved, it is well to keep in mind that the operations authorized by the Commission in this case were restricted to require: (1) that applicant serve only points on the rail lines of the Rock Island Railroad as specifically designated in the Report of the Commission; (2) that there may be attached from time to time to the privileges such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and

(3) all contractual arrangements between the applicant company and the Chicago, Rock Island & Pacific Railroad Company shall be reported to the Commission and shall be subject to revision. (R. 116-117)

The finding by the Commission that a restriction requiring that applicant handle only rail-billed would be unworkable is fully supported in the record as established by the Commission's finding:

> "Theoretically this should be true, but in actual practice the motor-billed freight is handled with greater dispatch; and this is the reason that many of the public witnesses supporting applicant have refused to deliver their shipments to Rock Island for billing even though the line-haul transportation thereof is performed entirely by Motor Transit. The reluctance of shippers to use this kind of service is clearly due to the fact that it requires longer time in transit. For example, a shipment moving on rail billing from the Twin Cities to Marengo is picked up by the cartage company employed for that purpose by Rock Island and delivered to the Minneapolis or St. Paul rail terminal, worked, billed, and, in 1 or 2 days, turned over to Motor Transit for movement to destination. This shipment would require from 2 to 4 days more in transit than would be necessary if it moved by Motor Transit on motor billing. The situation in the reverse direction would be substantially similar. Motor-billed shipments from Chicago are picked up by Motor Transit and moved out in road-haul equipment the same night, as contrasted with rail-billed shipments which are picked up by a cartage company for Rock Island and moved to Burr Oak, 15 miles, worked, billed, and returned to Chicago for transfer to Motor Transit for transportation to destination, or if it is necessary to move these shipments west from Burr Oak in boxcars owing

to the key-point restriction they would not reach Davenport for 2 or 3 days and sometimes longer. Similar delays occur on shipments in boxcars to Des Moines. The delays in handling rail-billed shipments from Chicago are greater than from the Twin Cities. Rail-billed freight is delayed at points in Iowa on account of the (fol. 78-B) method of handling these shipments before they are transferred to Motor Transits for movement." (R. 113-114)

Likewise, such restrictions would prohibit the necessary interlining of traffic between other motor carriers and applicant, as found by the Examiner, and set forth in his report:

"Opposing motor carriers with appropriate authority have not provided such a service, except with respect to selected small segments of the routes, principally immediately east (fol. 48) of Des Moines. These ca[illegible]rior to August 30, 1951, delivered less-than-truckload freight to Motor Transit for movement to destinations they are authorized to serve. Some of this freight consisted of low-rated articles which such carriers deemed unprofitable to handle. These carriers in many instances refused to accept less-than-truckload shipments from their motor carrier connections for movement to a destination embraced in their operating authority. *As a result thereof, several of these connecting carriers have had to rely upon Motor Transit to accept and make delivery of such shipments,* even in cases where the delivering carrier was designated by the shipper. These experiences have convinced some of the connecting carriers that the unrestricted services of Motor Transit should continue to be available to them so that they may have a carrier that is always willing and able to accept interchange shipments destined to points on the White

> Lines and Frederickson Line Routes. One motor carrier that possesses rights on U. S. Highway 6 between Davenport and Des Moines, elects to give all its less-than-truckload freight to Motor Transit for delivery at such points, because it is not profitable for it to provide this service." (R. 74)

Thus, could anything be more convincing than that the "public convenience and necessity" required, as found by the Commission, that applicant be granted the modified restrictions in its authority which it was granted. To have imposed the restrictions as urged by the opposing carriers would have virtually dried up a substantial part of the flow of traffic into the communities served by applicant company because a large percentage of the traffic handled by it originated on and was interlined from other motor carriers. (See Exhibit 16, R. 1869).

POINT IV

The Setting Aside of the Commission's Order Granting the Application Involved Would Result in Great Hardship and Loss to the Present Employees of the Applicant Company and Contrary to the Public Interest.

It is most difficult to discuss hardly any phase of this case without reverting to the operations of the White Line Motor Freight Company, Applicant's predecessor. Applicant, in taking over White Line's operations in 1938, likewise took over all its personnel. Applicant continued a motor truck service, which as previously pointed out, was the original one in the territory involved in these proceedings. The public, as demonstrated by the Record, became dependent upon that service.

Likewise, the employees of the Rock Island Motor Transit, many of whom came over from the White

Line at the time of the acquisition, have acquired and established in the company very substantial positions and valuable seniority rights.

If the Decision and Order of the Commission should be reversed and Applicant denied the right to continue the operations so long conducted by it and its predecessor, White Line, the rights of a very substantial part of the Applicant's employees would not only be jeopardized, but their positions terminated. The record clearly establishes this fact in the testimony of W. F. Peterson, general manager of the Applicant Company, when he testified:

> Q. "Now, Mr. Peterson, there has been testimony in the record that at certain shipping points such as Iowa City, Grinnell, Newton and Atlantic, leaving out the larger points such as Des Moines and Davenport, that it was essential to the shipping interests there, because of the smaller nature of the businesses located in those points, that facilities be available for rate information, routing shipments, for loss and damage claims and tracing shipments. Now, in the event that your company was not authorized to restore and regain the opportunity to conduct the services they were giving prior to any restrictions, would those facilities, including the personnel available in those cities and towns, remain?
>
> A. It was my thought at the time that these restrictions were imposed, and at the time of the temporary hearing, that we might be able to maintain certain facilities at some of these points. I am convinced today that the bulk of these smaller points, so far as the motor subsidiary is concerned, will be closed up.
>
> (fol. 1888) Q. By that do I understand that in those points I have named, including, well, Muscatine and Washington, where there was

testimony that the terminal facilities that your company has included rate information, routing information, for tracing shipments, and loss and damage claims, that they were a valuable service, and the only service of that kind available in those communities by any common motor carriers, that your company would terminate those facilities and that service to those communities?

A. It is my best judgment that would happen.

Q. And, as I understand, you would no longer maintain the facilities and keep the personnel there?

A. That is correct.

Q. And your personnel would then be reduced to that extent in those particular communities?

A. Yes, that is right.

Q. Now, I understand that here in Des Moines, the home office of the Rock Island Motor Transit Company, that you have a complete office force independent of the railroad, which is available and which does aid in serving the community served by the Rock Island Motor Transit Company. Now, in the event that your company did not have its original operating rights restored, what would be the effect upon the facilities and personnel which you have here in Des Moines, which has been used by the Rock Island Motor Transit Company in serving the public in the territory involved in this case?

(fol. 1889) A. Well, of course, Des Moines would be the hardest hit of any of them. It is our general office here, and if we are forced to go into an operation such as we would have to go in under the White Line order, all I would maintain here would be cost accounting and payroll. That means that beyond that it would probably be reduced to, probably just wiped out except cost accounting and payroll.

Q. How many employees did your company have at the time of the effective date of the order

in the White Line case last July 31, which were being used to serve the public in the territory covered by your company?

A. Well, it run on the regular payroll about seven hundred fifty, and your extras aren't on there. Our peak was eight hundred eighty-three last year.

Q. How many employees does your company now have?

A. It would run between seven and eight hundred.

Q. How many employees would your company have if you were required to go to a strictly rail billing service in connection with the White Line Motor Truck Line?

A. Well, it would be far less than I anticipated at the time this order was made effective. At that time I figured two hundred twenty-two would be laid off, but they would be far more than that because I can see the results of what happened under this restrictive order, and if that is carried out, why if will be reduced far below the two hundred (fol. 1890) twenty-two that I have figured would be laid off.

Q. Well, now, do I understand that, for instance, in Newton you have a terminal agent there, you have pick-up and delivery drivers, and in these other places where you have terminals, that you have the terminal agent, pick-up and delivery drivers, and personnel of that kind, would your company if required to go to a strictly rail billing, would the personnel in those communities be eliminated or materially reduced in number?

A. They would be materially reduced, and they might be entirely eliminated because if there wouldn't be sufficient traffic to warrant the pick-up and delivery, we would put the pick-up and delivery up for bid, and some local contractor could do it cheaper than we could do it under the restricted operation.

Q. Now, you testified it required the intrastate, interstate and rail billed freight to even substantially sustain your peddler local operations, isn't that correct?

A. You have to have all of it to even begin to sustain a peddler operation."

(R. 1410-1411 & 1412)

Under the provisions of Section 5 (2e) of Part I of the Interstate Commerce Act it was the duty of the Commission, at the time of considering the acquiring of the White Line Motor Freight Company's operating rights by the Applicant Company, to have fully considered the effect of such acquisition upon the employees of the then existing carrier. If the Commission found that by reason of the transfer of such rights to the Applicant Company, that it would be necessary to restrict the Applicant Company's operations in such a way that a substantial number of the existing carrier's employees would be adversely affected, then it would have been the duty of the Commission to deny the transfer of such rights unless it was in the general public interest to otherwise approve such transfer.

It is the position of these interveners, employees, that at the time of the transfer of the White Line Motor Freight Company's rights to the Applicant Company that their rights as such employees of the original company were not considered, if there were later to be limitations and restrictions placed upon the operations of the Rock Island Motor Transit Company, which would eliminate and do away with their jobs.

We are not attempting to reargue the acquisition case of the White Line Motor Freight Company by the

Applicant Company, but we are merely attempting to point out the drastic impact and effect that a reversal of the Order granting the instant application would have not only upon the public but upon the several hundred employees of the Rock Island Motor Transit Company. We believe that the jobs and rights of several hundred employees of the Rock Island Motor Transit Company coupled with the great public demand for the continuation of the services rendered by the Rock Island Motor Transit Company, as successor to the White Line Motor Freight Company, manifest such a public interest that the public convenience and necessity required the granting of this Application in the form in which it was granted.

These intervening employees-Appellees are at a loss to understand the rather hostile and most adverse position taken, by Railway Labor Executives' Association, to their interest and welfare, most of all of whom are members of the Labor Union represented by such Association, by said Association intervening in support of the Appellants in this case. These employees have been paying dues over the years to the Union for help and protection when they needed it, yet in this time of crisis, when their jobs are at stake, they find their Union officials working against them.

POINT V

Congress Never Intended That Part II of the Interstate Commerce Act, the Regulation of Motor Carriers, should be Applied to the Public Detriment and the Denial of Motor Carrier Service Where Required in the Public Interest Simply Because the Carrier Giving That Service Happened to be Affiliated With a Railroad.

The most amazing, if not shocking, part of Appellant's Brief is found on page 75. Therein Appellants make this most alarming statement:

"The time has come, we believe for this Court to forcefully remind the Commission of this mandate and to take steps to insure that it is faithfully obeyed, in this case and others of similar nature which may follow. The most appropriate method by which this Court can achieve this objective is to require the Commission in this case, and others which involve rail use of motor vehicles, to impose, as a minimum, a restriction limiting such use to the transportation of shipments having a prior or subsequent rail haul."

Certainly nowhere in the Commerce Act is there any language manifesting any intent on the part of the Congress to prohibit railroad owned or affiliated motor carriers to confine their operations solely to such service as proposed by Appellants. Such determination by the Court would be tantamount to judicial legislating into the Commerce Act, something that Congress never intended. The statement of Senator Wheeler in the debate, on the proposed Motor Carrier Act, made it clear that it was the policy of Congress that interstate motor transportation *should be regulated in the interest of the public* and not in the interest of the railroads or any other form of transportation. See Cong. Rec. 5657, April, 1935.

To impose the restrictions as suggested by Appellants would certainly not be in the public interest because, as the record shows, public transportation service to many communities, presently served by the Applicant Company, would be denied—there being no other carriers serving them.

The Record shows and Briefs filed by other Appellees will clearly demonstrate, that instead of

Applicant having secured a monopoly in the field served by it, during the years in which it operated without restrictions, that it has not even retained the position, in respect to volume of traffic, that its predecessor, The White Motor Freight Company, had developed.

The restrictions proposed by Appellants, as set forth above, would destroy the transportation service upon which the firms, represented by these intervening Traffic Associations and Chambers of Commerce, and these shipper-interveners, have depended upon for so many years. Such destruction of transportation service to this large section of the state of Iowa, and in reality, in the midwest by reason of the traffic moving from Chicago, Minneapolis, St. Paul, Omaha and Kansas City, both direct and on interchange, into the Iowa territory, would be most contrary to the public interest. Congress intended to stabilize interstate motor carrier transportation and not destroy it by the enactment of the Federal Motor Carrier Act of 1935. Appellants are asking for something which Congress never intended and could not intend under circumstances as shown in the record in this case.

CONCLUSION

The authority granted Applicant, with the restrictions that were imposed, by the Interstate Commerce Commission, 63 M.C.C. 91, was not only supported by the Record, but required in the public interest and under the provisions of Sec. 207 of Part II of the Interstate Commerce Act. The decision of the Court below, 144 F. Supp. 365, sustaining the Commission's grant of authority to Applicant was proper and con-

sistent with the Record and applicable laws—and should be *affirmed.*

Respectfully submitted,

RAILWAY LABOR EXECUTIVES' ASSOCIATION, ET AL.,
Appellants,

v.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, ET AL.,
Appellees.

On Appeal From the United States District Court for the District of Columbia

JURISDICTIONAL STATEMENT

Appellants, the Railway Labor Executives' Association, et al., appeal from the judgment of the United States District Court for the District of Columbia, entered on January 27, 1956, affirming orders of the Interstate Commerce Commission, and submit this Statement to show that the Supreme Court of the United States has jurisdiction of the appeal and that substantial questions are presented.

OPINIONS BELOW

The opinion of the District Court for the District of Columbia has not been reported. The opinion of the District Court is attached hereto as Appendix B, and the judgment of said Court is attached as Appendix C. The opinion of the Interstate Commerce Commission is reported at 63 M.C.C. 91. The orders of the Commission are unreported. The Commission's opinion and orders are attached as Appendix D.

JURISDICTION

This suit was brought under Section 10 of the Administrative Procedure Act (5 U.S.C. 1009) and Sections 1336, 1398, 2284 and 2321-2325 of the Judicial Code (28 U.S.C. 1336, 1398, 2284, 2321-2325), and Section 205(g) of the Interstate Commerce Act (49 U.S.C. 305(g) to enjoin, annul, and set aside orders of the Interstate Commerce Commission dated November 22, 1954, July 6, 1955, and September 9, 1955, entered in Commission Docket No. MC-29130 (Sub-No. 70). The judgment of the District Court was entered on January 27, 1956, and notice of appeal was filed in that court on March 26, 1956. The jurisdiction of the Supreme Court to review this decision by direct appeal is conferred by Sections 1253 and 2101(b) of the Judicial Code (28 U.S.C. 1253 and 2101(b)). The following decisions sustain the jurisdiction of the Supreme Court to review the judgment on direct appeal in this case: *United States* v. *Capital Transit Company*, 325 U.S. 357 (1945); *United States* v. *Detroit and Cleveland Navigation Company*, 326 U.S. 236 (1945); *United States* v. *Pierce Auto Freight Lines*, 327 U.S. 515 (1946).

QUESTIONS PRESENTED

1. Where the Interstate Commerce Commission has approved the acquisition of independent motor carriers and their operating rights by a wholly-owned subsidiary of a railroad subject to restrictions on the operating rights thus acquired limiting the operations of the railroad subsidiary thereunder to services which are auxiliary to or supplemental of the railroad's train service in accordance with the requirements of the former Section 213 and present Section 5(2)(b) of the Interstate Commerce Act, does the Interstate Commerce Commission have authority thereafter to remove those restrictions without regard to the requirements of such sections of the statute and authorize the railroad subsidiary to operate an unrestricted motor carrier service over the same routes through the guise of a certificate proceeding under Section 207(a) of that Act.?

2. Whether, in any event, the Interstate Commerce Commission, in authorizing the performance of motor carrier service by a railroad subsidiary, pursuant to either Section 5(2)(b) of the Interstate Commerce Act or Section 207(a) of such Act, is required by the provisions of the Interstate Commerce Act and the National Transportation Policy to limit such motor service to that which is auxiliary to or supplemental of the rail service of the parent railroad?

STATUTES INVOLVED

This appeal involves the National Transportation Policy (49 U.S.C., preceding Section 1), Sections 5(2)(a) and (b), 206, 207(a), 208(a), and former Section 213(a)(1) of the Interstate Commerce Act, as amended (49 U.S.C. 5(2)(a) and (b) and 306,

307(a)(1), 308(a), and 313(a)(1)). These statutory provisions are set forth in Appendix A hereto.

STATEMENT

The orders of the Interstate Commerce Commission, which are the subject of this litigation, granted to the Rock Island Motor Transit Company (hereafter called "Motor Transit"), a wholly-owned subsidiary of the Chicago, Rock Island, and Pacific Railroad (hereafter called "Rock Island Railroad"), an authorization to transport general commodities, with certain exceptions, between various points in Illinois, Iowa, and Nebraska.[1] The grant contained no restrictions limiting the trucking operations of Motor Transit to those which were auxiliary to or supplemental of the parent railroad's train services.[2]

The interest of the appellants in this Commission action stemmed out of their representation of employees of the nation's railroads. The appellant Rail-

[1] The routes granted were between Silvis, Ill., and Omaha, Nebr., over Illinois Highway 92 and U. S. Highway 6, via various intermediate points; between Iowa City, Iowa, and Cedar Rapids, Iowa, over U. S. Highway 218; between Harlan, Iowa, and Omaha, Nebr., over Iowa Highway 64 and U. S. Highway 6, via various intermediate points; and between Avoca, Iowa, and Atlantic, Iowa, over U. S. Highways 59 and 6 and Iowa Highway 83.

[2] The Commission's orders made the grant subject to the following general conditions: (1) that there may be attached from time to time to the privileges granted such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

way Labor Executives' Association is composed of twenty affiliate standard national and international railway labor organizations which are the duly certified representatives under the Railway Labor Act (45 U.S.C. 151, et seq.) of various categories of employees of the country's principal railroads, including the Rock Island Railroad. These organizations are:

American Train Dispatchers' Association
Brotherhood of Locomotive Firemen and Enginemen
Brotherhood of Maintenance of Way Employes
Brotherhood Railway Carmen of America
Brotherhood of Railroad Signalmen of America
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes
Brotherhood of Railroad Trainmen
Brotherhood of Sleeping Car Porters
Hotel & Restaurant Employees and Bartenders International Union
International Association of Machinists
International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers
International Brotherhood of Electrical Workers
International Brotherhood of Firemen & Oilers
International Organization Masters, Mates & Pilots of America
National Marine Engineers' Beneficial Association
Order of Railway Conductors and Brakemen
The Order of Railroad Telegraphers
Railroad Yardmasters of America
Sheet Metal Workers' International Association
Switchmen's Union of North America

The organizations affiliated with the appellant Association have agreements with the Rock Island Railroad concerning rates of pay, rules and working conditions

of such employees which confer valuable property rights upon the employees. In their representation of rail employees, these organizations have participated in numerous Commission proceedings for the purpose of urging full implementation of the National Transportation Policy, declared by Congress to preserve the independent status and the inherent advantages of each mode of transportation (49 U.S.C., preceding Section 1). They have not opposed the acquisition of trucking operations by railroads or the expansion of railroad-owned trucking carriers. However, they have endeavored to keep such railroad controlled trucking operations auxiliary to or supplemental of the rail service of the parent railroads consistent with the requirements of the Interstate Commerce Act. Their interest in opposing unrestricted motor trucking operations by railroads or railroad subsidiaries is to preserve the job security of rail employees. Such security lies in the railroads waging a strong competitive fight to retain rail service. The abandonment of rail service by railroads in favor of trucking operations constitutes a threat to this job security. The appellants therefore intervened in the proceeding before the Commission and argued that the Interstate Commerce Act required the agency to restrict Motor Transit's operations involved in the application to those which were auxiliary to or supplemental of its parent railroads train services.

The routes which were certificated to Motor Transit on an unrestricted basis in the Commission orders here involved were already certificated to that carrier subject to restrictions designed to ensure that operations thereunder be auxiliary to or supplemental of the Rock Island Railroad's train service. Such prior

certificate was issued after lengthy proceedings before the Commission on applications by Motor Transit for agency approval of its purchase of the routes from existing independent operators as follows:

(1) The route between Omaha, Nebraska, and Silvis, Illinois, over U. S. Highway No. 6 and Illinois Highway No. 92 was purchased by Motor Transit from the White Line Motor Freight Company in 1937.[3] In *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 5 M.C.C. 451 (1938), the Commission approved the purchase pursuant to Section 213(A)(1) of the Interstate Commerce Act, which required the agency to find, *inter alia*, that the transaction would promote the public interest by enabling the Rock Island Railroad to use the acquired motor service of its subsidiary to public advantage in the railroad's own operations. The Commission made the necessary statutory finding upon the basis of the representations of Motor Transit of its intention to operate a coordinated rail-motor service and thereby to improve the parent railroad's service to the public (p. 455). The Commission found that Motor Transit's proposal was similar to that approved in *Pennsylvania Truck Lines, Inc.—Control—Barker M. Frt.*, 1 M.C.C. 101 (1936), 5 M.C.C. 9, 49 (1937), and referred to the fact that it had there outlined the scope of approved and disapproved motor carrier operations by a railroad or its subsidiary (p. 454). In such earlier case the Commission had stated (5 M.C.C. 11, 12) that "approved operations are those which are

[3] The vendor at the time of the acquisition was in process of perfecting the operating rights it sold to Motor Transit under Section 206(a) of the Interstate Commerce Act (49 U.S.C. 306(a)).

auxiliary or supplemental to train service." In addition, the Commission required Motor Transit to abandon parts of the White Line purchase not along the line of the Rock Island Railroad and imposed as specific conditions on its approval (a) that Motor Transit should not render service from or to, or interchange traffic at, any point other than a station on the line of the parent railroad, and (b) that the operating authority acquired was subject to such further limitations, restrictions, or modifications as the Commission might find necessary to impose or make in order to ensure that the motor trucking operation be auxiliary to or supplemental of the parent railroad's train service and not unduly restrain competition.

Subsequently, the Commission on its own motion reopened the proceeding and in *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 40 M.C.C. 457 (1946) imposed additional restrictions on the operating rights acquired by Motor Transit from the White Line to ensure that Motor Transit's operations thereunder be auxiliary to or supplemental of the parent railroad's train service.[1] In *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 55 M.C.C. 567

[1] The conditions thus imposed were:

1. The service to be performed by the Rock Island Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not render any service to, or from or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebraska, Des Moines, Iowa, and collectively Davenport and

(1949), the Commission reaffirmed the additional conditions and thereafter this Court sustained the validity of the Commission's action. *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951).

(2) The routes between Harlan, Iowa, and Omaha, Nebraska, over Iowa Highway 64 and U. S. Highway 6 between Avoca, Iowa, and Atlantic, Iowa, over U. S. Highways 59 and 6, and return over Iowa Highway 93 were purchased by Motor Transit from Messrs. D. H. Frederickson and J. H. Frederickson in 1944. In *Rock Island Motor Transit—Purchase—Frederickson*, 39 M.C.C. 824 (1944), the Commission approved this purchase under Section 5(2) of the Interstate Commerce Act (49 U.S.C. 5(2)). As a condition of such approval Section 5(2)(b) required the Commission to make the same findings previously required by Section 213(a)(1) that the transaction would enable the parent Rock Island Railroad to use the trucking rights thus purchased to public advantage in the railroad's own operations.[5] The Commission in its original order did

---

Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Illinois.

4. All contractual arrangements between The Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported and shall be subject to revision, if and as it is found to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as the Commission in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

[5] Section 213 was repealed by the Transportation Act of 1940 (54 Stat. 924, Section 21(e)), and its substance carried forward into Section 5(2)(b) of the Interstate Commerce Act. There is a slight difference in wording in the proviso as found in Section 213(a)(1) and Section 5(2)(b). The Commission has held, however, that this difference is of no significance. *Scott Bros., Inc.—Central—W. G. Corp.*, 37 M.C.C. 225 (1941).

not impose any specific restrictions to effectuate this statutory requirement, but prior to the issuance of a certificate for the Frederickson Line rights, the agency reopened the proceeding as a part of its reconsideration of the White Line purchase, *supra*, p. 8, and in such reconsidered proceeding imposed the conditions enumerated above upon the Frederickson rights as well as the White Line rights. This Court also upheld the validity of the Frederickson conditions in *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951).

On September 11, 1951, following this Court's decision, the Commission issued Motor Transit a certificate covering the White Line and Frederickson Line purchases which contained the enumerated restrictions limiting Motor Transit's authority thereunder to operations auxiliary to or supplemental of its parent railroad's train service. Almost immediately thereafter Motor Transit on October 21, 1951, filed with the Commission an application purportedly under Section 207(a) of the Interstate Commerce Act for the grant of unrestricted operating rights over the identical routes it had acquired in purchase proceedings as set forth above.[9]

In orders dated November 22, 1954, reaffirmed on July 6, 1955, and September 9, 1955, the Commission granted Motor Transit's application. The agency re-

[9] During the pendency of this application Motor Transit obtained from the Commission temporary authority to operate over the routes involved without the restrictions which the agency had imposed, subject to a maximum weight limitation and to the further "keypoint" restriction that no shipment could be transported between Chicago and Omaha, or through, or to, or from, more than one of the points of Omaha and, collectively, Davenport, Bettendorf, Rock Island, Moline and East Moline.

fused to consider the evidence before it in the light of the limitations imposed by Section 5(2)(b) of the Interstate Commerce Act or to make the findings required by that Section that the parent railroad is able to use the operations involved to public advantage in its rail service. This refusal was based on the ground that Motor Transit's application was subject only to Sections 207 and 208 of the Interstate Commerce Act, which do not specifically contain the limitations of Section 5(2)(b), so that the application of the standards of the latter section of the statute in passing upon Motor Transit's application was a matter wholly committed to the agency's discretion, and that in the exercise of such discretion the Commission believed the public interest required the omission of the limitations.

Thereafter, the American Trucking Association, et al., filed a complaint in the District Court on June 19, 1956, asking for a permanent injunction against the effectiveness of the Commission's orders. The appellants filed motions to intervene in the case as parties plaintiffs and asked for permission to file complaints requesting that the Commission's orders be set aside and enjoined.[7] These motions, were not opposed, were granted by orders of the District Court entered on October 24, 1955, and the complaints of the intervening plaintiffs were filed the same day.

The appellants argued to the District Court, as they had to the Commission, that the agency as a matter of

---

[7] Intervenors included two railway labor organizations not then affiliated with the appellant, Railway Labor Executives' Association. These organizations were the Brotherhood of Railroad Trainmen and the Order of Railway Conductors & Brakemen. On January 1, 1956, these two organizations became affiliated with the appellant Association.

law was required to measure the application of Motor Transit by the standards of Section 5(2)(b) of the Interstate Commerce Act. The District Court rejected this contention on the ground that the case involved only the issuance of a certificate and that the statutory requirements under which auxiliary and supplemental service limitations are imposed do not appear in Section 207(a) of the Act governing the issuance of certificates (Appendix B, p. 12a). The Court therefore affirmed the Commission's orders against the complaints of the appellants and granted judgment to the Commission and the United States.

The District Court gave no consideration to the fact that the application of Motor Transit was in substance a request to remove restrictions from a certificate issued to it pursuant to Section 5(2)(b) of the Interstate Commerce Act. Nor does its opinion reflect any consideration of the Commission's long-established practice of treating applications under Section 207(a) involving railroads or railroad subsidiaries as governed by the same basic considerations as applications by such parties under Section 5(2)(b).

The original plaintiffs, the American Trucking Association, et al., docketed their appeal from this judgment of the District Court on May 22, 1956, case No. 961.

THE QUESTIONS ARE SUBSTANTIAL

The issues involved in this appeal are of importance to the railroad industry and its employees and to the administration of the Interstate Commerce Act. The National Transportation Policy (49 U.S.C., preceding Section 1) declares it to be the policy of Congress to provide for regulation of all modes of transportation

subject to the Interstate Commerce Act so as to recognize and preserve the inherent advantages of each, to the end of developing, coordinating and preserving a national transportation system by water, highway and rail adequate to meet the needs of the commerce of the United States, of postal service, and of the national defense. This statement of policy also provides that all provisions of the Interstate Commerce Act are to be administered and enforced with a view to carrying out such declaration of policy.

One of the most important provisions in the statute for preserving the independence and inherent advantages of each mode of transportation is the proviso contained in Section 5(2)(b)[8] (and in former Section 213(a)(1)) which requires that in any case where a railroad or a subsidiary of a railroad is an applicant before the Commission for approval of a purchase or acquisition of a motor carrier, the Commission may not grant such approval "unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition."

The Court below found that in practical application this requirement means that the proposed service by motor vehicle must be auxiliary to or supplemental of the rail service of the railroad involved.[9] The enforce-

[8] 49 U.S.C. 5(2)(b).

[9] Such has been the application of the proviso of former Section 213(a)(1) and of present Section 5(2)(b) of the Interstate Commerce Act by the Commission. See *Pennsylvania Truck Lines, Inc. —Control—Barker*, 1 M.C.C. 101 (1936); *Northland-Greyhound Lines, Inc.—Purchase—Liederback*, 5 M.C.C. 215, 216 (1937); *Niagara Frt. Lines—Purchase—Westlake & Albertson*,

ment of such statutory requirement is important to the employees of the railroads in behalf of whom the present appeal is taken because any deviation therefrom must inevitably result in the weakening of rail carrier competition with trucking operations and in the abandonment of rail service to the detriment of the job security and the interest of all rail employees, including those of the Rock Island Railroad. In this case the Commission, without measuring the application of Motor Transit or the evidence submitted in support thereof against the cited statutory requirement of Section 5(2)(b), removed the restrictions on Motor Transit's certificate which the Commission had previously found were required by that section. It did so on the theory that Section 5(2)(b) was not applicable because the case before it was a certificate case and not an acquisition case, in spite of the fact that there was outstanding a certificate issued under the acquisition sections of the statute covering the identical routes. The judgment of the District Court affirming the Commission's action is, we believe, in direct conflict with the statutory requirements and can only result in the complete destruction of Section 5(2)(b) and of the National Transportation Policy embodied therein. Such judgment, if not reversed,

---

5 M.C.C. 535, 537 (1938); *Southwestern Transportation Co.—Purchase—Hill & Howe*, 37 M.C.C. 83, 89 (1941). A trucking operation which is auxiliary to or supplemental of a rail operation is ordinarily one in which shipments move at rail rates and on rail bills of lading, and which must be connected with the rail service. *Texas & Pacific M. Transport Co. Com. Car. App.*, 47 M.C.C. 721 (1943). The Commission from time to time has varied the precise conditions which it believes necessary in a given case to ensure an auxiliary or supplemental operation. However, it has continually, until the present case kept rail-owned motor carriers within the basic concept. *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 542 (1951).

also can have equally adverse effects upon the administration of the Civil Aeronautics Act.

1. This case involves the unique and almost unheard of feature of an applicant seeking a certificate to operate over routes already certificated to it by the same agency. It is doubtful whether the Interstate Commerce Commission or any other agency concerned with granting authorizations to engage in transportation has heretofore been confronted with such an application. Ordinarily, such application would be dismissed as a sheer waste of the administrative agency's time. However, in this case the Commission processed the application just as if it were a bona fide new route application and as if Motor Transit had no connection at all with the routes involved. However, it is clear from the facts that although the application was in form one for the grant of a new certificate under Section 207(a), its substance was a request to remove the restrictions previously imposed to make Motor Transit's operations auxiliary to or supplemental of the rail service of its parent, the Rock Island Railroad. This obvious purpose is stated in the findings of the Examiner as follows:

> "The restrictions and conditions set forth above were imposed on the certificate and authorities previously issued or granted, and as a result thereof applicant filed the captioned application for authority under section 207(a) of the Act seeking the identical authority it possessed prior to September 11, 1951, when the restrictions and conditions were imposed. The purpose of this application is to obtain operating authority not subject to restrictions or conditions that prevent applicant from operating as a motor carrier having no affiliation with a railroad.".

Since Motor Transit's clear purpose was not the grant of a route, but the removal of restrictions on its certificate for an existing route, it should have filed an application asking for modification of the conditions. Had it done so, no one would seriously contend that the Commission could have modified or removed the restrictions at its discretion without measuring the evidence adduced against the standards of Section 5(2)(b) and without making the findings which that Section requires.[10] Motor Transit sought to avoid that

---

[10] The Commission clearly recognized its lack of discretion in applying the standards of Section 5(2)(b) to routes acquired by purchase in *Cincinnati, N. & C. Ry. Co.—Control—Lehigh Valley Transit*, 57 M.C.C. 4 (1950), in which it declared (pp. 49 and 52):

> "Applicants further contend that, assuming applicants are affiliated with the railway, it is not necessary that we find that the motor-vehicle service of the carriers of which control would be acquired would be used to public advantage by the railway in its operations, because the literal requirements of the proviso of section 5(2)(b) can be relaxed in order to carry out the declared national transportation policy. * * *
>
> * * * *
>
> "Apparently applicants concede that they are unable to submit evidence sufficient to meet the proof requirements of the proviso of section 5(2)(b), the application contains no such evidence, and it is not apparent to us how those requirements can be met in view of the location of the railway, the nature of the service which it renders, and the location of the motor bus carriers which the partnership would indirectly control. We do not agree with the position of applicants that we are empowered to relax the specific requirements of the statute and find that this transaction would be consistent with the public interest, without also finding that the railroad would be enabled to use service by motor vehicle to public advantage in its operations. As stated in E. T. & W. N. C. M. Transportation Co.—Lease—Imperial Transp. Co., Inc., 5 M.C.C. 196: 'Inconvenience or hardships, if any, that result from following the statute as written must be relieved by legislation.'"

result by filing a certificate application purportedly under Section 207, and the Commission sanctioned this obvious evasion of the statute by erroneously treating the application as if it were a bona fide certificate application under such section completely unrelated to the prior acquisition cases and which raised only issues with respect to the public convenience and necessity.

If the Commission may validly do what it has done in this case, the proviso in Section 5(2)(b) becomes meaningless. A substantial portion of all trucking operations now performed in this country by railroads or their subsidiaries are performed over routes acquired subject to the restrictions of Section 5(2)(b) or of its predecessor Section 213, which limit those motor carrier services to those which are auxiliary or supplemental to the rail services of the railroad involved. Under the Commission's decision, every railroad in the country which has such an operation may now come in and apply to the Commission for a certificate under Section 207 authorizing it to operate over the same routes without the restrictions imposed by the acquisition provisions of the statute, and the Commission has complete discretion to grant the request without measuring it by the standards of Section 5. Indeed, if the Commission has correctly interpreted the statute, railroads may buy out independent motor carriers, accept the restrictions required by Section 5(2)(b), file an application under Section 207 for the same routes without the restrictions before the ink is dry on the certificate, and within a matter of a few months have their application granted.

Even assuming, *arguendo*, the correctness of the Commission's interpretation of Section 207(a) of the

Interstate Commerce Act in an appropriate case involving a new route application, we believe that the Commission's action here results in a clear evasion of the statute and represents a complete sacrifice of form for substance. This Court in *United States* v. *Seatrain Lines*, 329 U.S. 424 (1947) made clear that statutory requirements cannot be evaded by mere words and labels and that it is against the substance of Commission action that the validity of its orders must be measured.

In closely similar circumstances another federal agency, the Civil Aeronautics Board, characterized a like request for precisely what it was—a suggestion to the agency to read the applicable statutory requirements out of the act. In enacting the Civil Aeronautics Act of 1938, Congress showed the same concern for the preservation of the independence of air transportation from the control of service transportation as it has in maintaining the independence and inherent advantages of rail and motor carrier operations. It therefore placed in Section 408(b) of the Civil Aeronautics Act [49 U.S.C. 488(b)] the identical restrictions found in Section 5(2)(b) of the Interstate Commerce Act so that any surface carrier or a subsidiary thereof which wishes to acquire an air carrier can do so only if the Civil Aeronautics Board, the administering agency, finds that the transaction proposed "will promote the public interest by enabling such carrier other than an air carrier to use aircraft to public advantage in its operation and will not restrain competition." The Board has applied this restriction in the same manner as has the Interstate Commerce Commission in acquisition cases before it, i.e., it has required a showing that the air carrier operations will

be auxiliary to or supplemental of the applicant surface carrier's operations.[11] In the *Parks Investigation Case*, 11 C.A.B. 779 (1950), the Board had before it a wholly-owned subsidiary of a transcontinental bus company as an applicant for a certificate of public convenience and necessity to operate as an air carrier. The Board held that the relationship of the applicant to the transcontinental bus system would have to be acted upon by the Board under Section 408 of the Civil Aeronautics Act in the event the subsidiary should be granted a certificate. The parent bus company and the subsidiary then filed an application with the Board for approval of the transfer to the parent of any certificate which might be issued to the subsidiary in the proceeding. The application was predicated upon the assumption that the Board could transfer the certificate under Section 401(i) of the Civil Aeronautics Act [49 U.S.C. 481(i)] merely on findings of the public interest and that there would then be no necessity for an approval under Section 408 with its strict requirements like those of Section 5(2)(b) of the Interstate Commerce Act. The Board, in refusing to sanction this attempted evasion of the statute, stated (pp. 788, 789):

> "Basically what the applicants are thus asking us to do is to read section 408 out of the Act through the device of a transfer under section 401(i). In so doing they presume that the requirements of section 408, as applied to this case, are merely technical in nature, and that they may be avoided by another technicality. However, such an approach misconstrues the real nature of the problem confronting us in this proceeding. That

[11] *American Export Airlines, Inc.—American Export Lines Control—American Export Airlines*, 3 C.A.B. 619 (1942).

problem arises out of a clear statutory directive to restrict control of an air carrier by a surface carrier to those instances where the test of the second proviso of section 408 can be met. The courts have applied such directive to the type of situation before us. This mandate is not a mere legal technicality. It represents a substantive declaration of policy which it is our statutory obligation to enforce. We do not believe that it would be consistent with the public interest for us to attempt to avoid this obligation through the device of a transfer under section 401(i) of the Act, which does not eliminate the relationship which Congress intended to restrict. On this ground alone we would not entertain such a proposal."

This action of the Board came before the United States Court of Appeals for the District of Columbia Circuit in *Continental Southern Lines* v. *Civil Aeronautics*, 197 F. 2d 397, 403 (1952), cert. den. 344 U.S. 831, and was sustained by that Court. On this point the Court declared:

"... *Even if the necessity for actual proceedings under § 408 could be avoided by the device suggested, a result we seriously question*, the transfer could not be approved unless the Board thought it in the public interest. And the concept of 'public interest' for the purposes of a transfer is just as broad as 'public interest' on an original certification proceeding. In both cases, it includes the policies and standards of § 408(b)...." (Emphasis supplied.)

If the judgment of the court below is sustained, then not only have the Commission and the railroads effectively read Section 5(2)(b) out of the Interstate Commerce Act, but also the door has been opened wide to a similar destruction of the requirements of Section 408(b) of the Civil Aeronautics Act.

2. The Commission's determination that the ability of a railroad subsidiary to meet the restrictive standards of the proviso in Section 5(2)(b) is not a necessary requirement in the adjudication of an application of such subsidiary for a certificate of public convenience and necessity to operate as a motor carrier under Section 207(a) is contrary to the expressed policy of the statute and the Commission's past application of that policy.

The National Transportation Policy [49 U.S.C., preceding section 1] requires, *inter alia*, the recognition and preservation of the inherent advantages of each mode of transportation covered by the Interstate Commerce Act. The Commission has found that the achievement of this policy as applied to motor carrier operations by railroads and railroad subsidiaries requires the restriction of such operations to those which are auxiliary to or supplemental of the rail service of the railroad involved. *Pennsylvania Truck Lines, Inc.—Control—Barker*, 1 M.C.C. 101 (1936), 5 M.C.C. 9 (1937); *Kansas City Southern Transport Company, Inc.—Com. Car. App.*, 10 M.C.C. 21 (1938). In the present case the Commission takes the position that it need not apply this Congressional purpose because Section 207(a) does not contain the specific implementation which is found in the proviso of Section 5(2)(b). However, Congress did not so limit its purpose. The last sentence of the National Transportation Policy states that, "All of the provisions of this Act shall be administered and enforced with a view to carrying out the above declaration of policy." The effect of this language is to require the Commission to carry out the congressional purpose to the same extent in the administration of Section 207(a) as it does

in the administration of Section 5(2)(b). Congress has written limitations into Section 207(a) upon railroad entry into motor carrier service just as plainly and clearly as if it had inserted into that section the actual words appearing in Section 5(2)(b).

The requirement of a uniform administration of the certificate and acquisition provisions of the Interstate Commerce Act and a correlation of the two has been recognized by the Commission and by the courts. In *Associated Transport, Inc.—Purchase—Russell*, 55 M.C.C. 177 (1948), the Commission declared (p. 183):

> "Although the facts dealt with are dissimilar, the same National Transportation Policy applies and the same basic considerations govern, in the disposition of applications under section 5 and section 207 of the Act."

To the same effect is the statement of this Court in *Interstate Commerce Commission* v. *Railway Labor Executives Association*, 315 U.S. 373, 376, 377 (1942), that the Commission must carry out the purposes of the statute in applying the phrase "public convenience and necessity" to the same extent that it does in acting under Section 5.

The Commission has strengthened this construction of the statute by its long and consistent uniform application of the auxiliary or supplemental restrictions to cases both under Section 5 and Section 207. In the earlier case involving Motor Transit, *Rock Island Motor Transit Company—Purchase—White Line M. Frt.*, 40 M.C.C. 457 (1946), the Commission reviewed its past application in Section 207 proceedings of the requirements of Section 213. (Pages 461 and 462.) It concluded (page 468) that Congress in re-enacting

Section 213 into Section 5(2) in 1940 had given its approval of this established administrative practice. Finally, the Commission categorically stated that the requirements of the National Transportation Policy required the same treatment for railroad or railroad controlled applicants in Section 207 cases as in Section 5 cases (page 471):

> "From a regulatory standpoint motor-carrier operations conducted by a railroad affiliate should be the same whether the authority under which they are conducted was acquired by an application under Section 207 or by purchase . . . ."

Such Commission application of the requirements of Section 5(2)(b) in Section 207 proceedings has been recognized by this Court in both *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 450 (1951), and in *United States* v. *Texas and Pacific Motor Transport Co.*, 340 U.S. 450, 459 (1951).

The Commission's practice also received the sanction of this Court in *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60 (1945), which involved an application under Section 207 for extension of motor carrier operating rights by a wholly owned subsidiary of the Pennsylvania Railroad Company. This Court upheld the Commission's action in granting a certificate which was restricted to services truly supplementary or auxiliary to the operations of the parent railroad. The Court reviewed the legislative history of the Motor Carrier Act of 1935 and concluded that railroads may operate trucks "in appropriate places." (pp. 66, 67.) The Court then went on to uphold the validity of the grant of a certificate to the railroad subsidiary and, in so doing, repeatedly emphasized the

limited nature of the certificate and the coordinated rail-motor service provided.

It is submitted that the decision of the District Court fails to recognize the real substance of the Commission's action and permits a complete circumvention of the statutory requirements. It further fails to give proper recognition to the Commission's long-established construction of the statute and to Congressional approval thereof upon which the Commission itself relied as a basis for continuation of such construction. We believe that the questions presented by this appeal are substantial and that they are of public importance.

CONCLUSION

For the foregoing reasons, jurisdiction should be noted and the judgment of the District Court reversed.

Respectfully submitted,

APPENDIX A

STATUTES INVOLVED

Administrative Procedure Act (5 U. S. C. A. 1000 et seq.)

Section 10. (a):

Any person suffering legal wrong because of any agency action, or adversely affected or aggrieved by such action within the meaning of any relevant statute, shall be entitled to judicial review thereof.

Judicial Code (28 U. S. C. A. 1 et seq.)

§ 1336. *Interstate Commerce Commission's orders*

Except as otherwise provided by Act of Congress, the district courts shall have jurisdiction of any civil action to enforce, enjoin, set aside, annul or suspend, in whole or in part, any order of the Interstate Commerce Commission. June 25, 1948, c. 646, 62 Stat. 931."

§ 1398. *Interstate Commerce Commission's orders*

Except as otherwise provided by law, any civil action to enforce, suspend or set aside in whole or in part an order of the Interstate Commerce Commission shall be brought only in the judicial district wherein is the residence or principal office of any of the parties bringing such action. June 25, 1948, c. 646, 62 Stat. 936.

§ 2284(1). *Three-judge district court; composition; procedure*

In any action or proceeding required by Act of Congress to be heard and determined by a district court of three judges the competition and procedure of the court, except as otherwise provided by law, shall be as follows:

(1) The district judge to whom the application for injunction or other relief is presented shall constitute one member of such court. On the filing of the application, he shall immediately notify the chief judge of the circuit,

who shall designate two other judges, at least one of whom shall be a circuit judge. Such judges shall serve as members of the court to hear and determine the action or proceeding.

§ 2323. *Duties of Attorney General; intervenors*

The Attorney General shall represent the Government in the actions specified in section 2321 of this title and in actions under sections 20, 23, and 43 of Title 49, in the district courts, and in the Supreme Court of the United States upon appeal from the district courts. As amended May 24, 1949, c. 139, § 116, 63 Stat. 105.

The Interstate Commerce Commission and any party or parties in interest to the proceeding before the Commission, in which an order or requirement is made, may appear as parties of their own motion and as of right, and be represented by their counsel, in any action involving the validity of such order or requirement or any part thereof, and the interest of such party:

Communities, associations, corporations, firms, and individuals interested in the controversy or question before the Commission, or in any action commenced under the aforesaid sections may intervene in said action at any time after commencement thereof.

The Attorney General shall not dispose of or discontinue said action or proceeding over the objection of such party or intervenor, who may prosecute, defend, or continue said action or proceeding unaffected by the action or nonaction of the Attorney General therein. June 25, 1948, c. 646, 62 Stat. 970, amended May 24, 1949, c. 139, § 116, 63 Stat. 105.

§ 2325. *Injunction; three-judge court required*

An interlocutory or permanent injunction restraining the enforcement, operation or execution, in whole or in

part, of any order of the Interstate Commerce Commission shall not be granted unless the application therefor is heard and determined by a district court of three judges under section 2284 of this title. June 25, 1948, c. 646, 62 Stat. 970.

§ 1253. *Direct appeals from decisions of three-judge courts.*

Except as otherwise provided by law, any party may appeal to the Supreme Court from an order granting or denying, after notice and hearing, an interlocutory or permanent injunction in any civil action, suit or proceeding required by any Act of Congress to be heard and determined by a district court of three judges. June 25, 1948, c. 646, 62 Stat. 926.

§ 2101. *Supreme Court; time for appeal or certiorari; docketing; stay*

(b) Any other direct appeal to the Supreme Court which is authorized by law, from a decision of a district court in any civil action, suit or proceeding, shall be taken within thirty days from the judgment, order or decree, appealed from, if interlocutory, and within sixty days if final.

National Transportation Act of 1940 (49 U. S. C. 1 et seq.)

NATIONAL TRANSPORTATION POLICY (49 U. S. C., preceding sections 1, 301, 901 and 1001)

"It is hereby declared to be the national transportation policy of the Congress to provide for fair and impartial regulation of all modes of transportation subject to the provisions of this Act, so administered as to recognize and preserve the inherent advantages of each; to promote safe, adequate, economical, and efficient service and foster sound economic conditions in transportation and among the several carriers; to encourage the establishment and maintenance of reasonable charges for transportation services, without unjust discriminations, undue prefer-

ences or advantages, or unfair or destructive competitive practices; to cooperate with the several States and the duly authorized officials thereof; and to encourage fair wages and equitable working conditions;—all to the end of developing, coordinating, and preserving a national transportation system by water, highway, and rail, as well as other means, adequate to meet the needs of the commerce of the United States, of the Postal Service, and of the national defense."

INTERSTATE COMMERCE ACT (49 U. S. C. 1 *et seq.*)

Section 5 (2) (a) It shall be lawful, with the approval and authorization of the Commission, as provided in subdivision (b)—

(i) for two or more carriers to consolidate or merge their properties or franchises, or any part thereof, into one corporation for the ownership, management, and operation of the properties theretofore in separate ownership; or for any carrier, or two or more carriers jointly, to purchase, lease or contract to operate the properties, or any part thereof, of another; or for any carrier, or two or more carriers jointly, to acquire control of another through ownership of its stock or otherwise; or for a person which is not a carrier to acquire control of two or more carriers through ownership of their stock or otherwise; or for a person which is not a carrier and which has control of one or more carriers to acquire control of another carrier through ownership of its stock or otherwise; or

(ii) for a carrier by railroad to acquire trackage rights over, or joint ownership in or joint use of, any railroad line or lines owned or operated by any other such carrier, and terminals incidental thereto.

Section 5 (2) (b) Whenever a transaction is proposed under subparagraph (a), the carrier or carriers or person

seeking authority therefor shall present an application to the Commission, and thereupon the Commission shall notify the Governor of each State in which any part of the properties of the carriers involved in the proposed transaction is situated, and also such carriers and the applicant or applicants (and, in case carriers by motor vehicle are involved, the persons specified in section 205 (e)), and shall afford reasonable opportunity for interested parties to be heard. If the Commission shall consider it necessary in order to determine whether the findings specified below may properly be made, it shall set said application for public hearing; and a public hearing shall be held in all cases where carriers by railroad are involved unless the Commission determines that a public hearing is not necessary in the public interest. If the Commission finds that, subject to such terms and conditions and such modifications as it shall find to be just and reasonable, the proposed transaction is within the scope of subparagraph (a) and will be consistent with the public interest, it shall enter an order approving and authorizing such transaction, upon the terms and conditions, and with the modifications, so found to be just and reasonable: PROVIDED, That if a carrier by railroad subject to this part, or any person which is controlled by such a carrier, or affiliated therewith within the meaning of paragraph (6), is an applicant in the case of any such proposed transaction involving a motor carrier, the Commission shall not enter such an order unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

Section 205 (g) (49 U. S. C. Section 305 (g)) Any final order made under this part shall be subject to the same right of relief in court by any party in interest as is now provided in respect to orders of the Commission made under part I: *Provided*, That, where the Commission, in respect of any matter arising under this part, shall have

issued a negative order solely because of a supposed lack of power, any such party in interest may file a bill of complaint with the appropriate District Court of the United States, convened under section 2284 of title 28 of the United States Code, and such court, if it determines that the Commission has such power, may enforce by writ of mandatory injunction the Commission's taking of jurisdiction.

Application for Certificate of Public Convenience and Necessity

Sec. 206 (August 9, 1935, amended June 29, 1938, September 18, 1940, September 1, 1950.) (49 U.S.C. Sec. 306.) (a) (1) Except as otherwise provided in this section and in section 210a, no common carrier by motor vehicle subject to the provisions of this part shall engage in any interstate or foreign operation on any public highway, or within any reservation under the exclusive jurisdiction of the United States, unless there is in force with respect to such carrier a certificate of public convenience and necessity issued by the Commission authorizing such operations: *Provided, however*, That, subject to section 210, if any such carrier or predecessor in interest was in bona fide operation as a common carrier by motor vehicle on June 1, 1935, over the route or routes or within the territory for which application is made and has so operated since that time, or if engaged in furnishing seasonal service only, was in bona fide operation on June 1, 1935, during the season ordinarily covered by its operation and has so operated since that time, except in either instance as to interruptions of service over which the applicant or its predecessor in interest had no control, the Commission shall issue such certificate without requiring further proof that public convenience and necessity will be served by such operation, and without further proceedings, if application for such certificate is made to the Commission as provided in paragraph (b) of this section and within one hundred and twenty days

after this section shall take effect, and if such carrier was registered on June 1, 1935, under any code of fair competition requiring registration, the fact of registration shall be evidence of bona fide operation to be considered in connection with the issuance of such certificate. Otherwise the application for such certificate shall be decided in accordance with the procedure provided for in section 207(a) of this part and such certificate shall be issued or denied accordingly. Pending the determination of any such application the continuance of such operation shall be lawful: *And provided further*, That this paragraph shall not be so construed as to require any such carrier lawfully engaged in operation solely within any State to obtain from the Commission a certificate authorizing the transportation by such carrier of passengers or property in interstate or foreign commerce between places within such State if there be a board in such State having authority to grant or approve such certificates and if such carrier has obtained such certificate from such board. Such transportation shall, however, be otherwise subject to the jurisdiction of the Commission under this part.

Section 207. [*August 9, 1935*] [49 U. S. C., § 307.] (a) Subject to section 210, a certificate shall be issued to any qualified applicant therefor, authorizing the whole or any part of the operations covered by the application, if it is found that the applicant is fit, willing, and able properly to perform the service proposed and to conform to the provisions of this part and the requirements, rules, and regulations of the Commission thereunder, and that the proposed service, to the extent to be authorized by the certificate, is or will be required by the present or future public convenience and necessity; otherwise such application shall be denied: *Provided, however*, That no such certificate shall be issued to any common carrier of passengers by motor vehicle for operations over other than a regular route or routes, and between fixed termini, except

as such carrier may be authorized to engage in special or charter operations.

(b) No certificate issued under this part shall confer any proprietary or property rights in the use of the public highways.

Section 208. [*August 9, 1935.*] [49 U. S. C., § 308.] (a) Any certificate issued under section 206 or 207 shall specify the service to be rendered and the routes over which, the fixed termini, if any, between which, and the intermediate and off-route points, if any, at which, and in case of operations not over specified routes or between fixed termini, the territory within which, the motor carrier is authorized to operate; and there shall, at the time of issuance and from time to time thereafter, be attached to the exercise of the privileges granted by the certificate such reasonable terms, conditions, and limitations as the public convenience and necessity may from time to time require, including terms, conditions, and limitations as to the extension of the route or routes of the carrier, and such terms and conditions as are necessary to carry out, with respect to the operations of the carrier, the requirements established by the Commission under section 204 (a) (1) and (6): *Provided, however*, That no terms, conditions, or limitations shall restrict the right of the carrier to add to his or its equipment and facilities over the routes, between the termini, or within the territory specified in the certificate, as the development of the business and the demands of the public shall require.

(b) A common carrier by motor vehicle operating under any such certificate may occasionally deviate from the route over which, and/or the fixed termini between which, it is authorized to operate under the certificate, under such general or special rules and regulations as the Commission may prescribe.

(c) Any common carrier by motor vehicle transporting passengers under a certificate issued under this part may

transport in interstate or foreign commerce to any place special or chartered parties under such rules and regulations as the Commission shall have prescribed.

(d) A certificate for the transportation of passengers may include authority to transport in the same vehicle with the passengers, newspapers, baggage of passengers, express, or mail, or to transport baggage of passengers in a separate vehicle.

Section 213 (a) (1) [49 U. S. C. Section 313 (a)(1)] Whenever a consolidation, merger, purchase, lease, operating contract, or acquisition of control is proposed under this section, the carrier or carriers or the person seeking authority therefor shall present an application to the commission, and thereupon the commission shall, after such notice as is required by section 205 (f) and if deemed by it necessary in order to determine whether the findings specified below may properly be made, set said application down for public hearing. If the commission finds that the transaction proposed will be consistent with the public interest and that the conditions of this section have been or will be fulfilled, it may enter an order approving and authorizing such consolidation, merger, purchase, lease, operating contract, or acquisition of control, upon such terms and conditions as it shall find to be just and reasonable and with such modifications as it may prescribe: *Provided, however*, That if a carrier as defined in section 1(3) of Part I, or any person which is controlled by such a carrier or affiliated therewith within the meaning of section 5(8) of this title, is an applicant, the commission shall not enter such an order unles it finds that the transaction proposed will promote the public interest, enabling such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

APPENDIX B

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

Civil Action No. 3171-55

AMERICAN TRUCKING ASSOCIATIONS, INC., ET AL., *Plaintiffs*,

v.

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, ET AL., *Defendants*.

MEMORANDUM OPINION

Before Prettyman, Circuit Judge, and Pine and Holtzoff, District Judges, sitting as a statutory three-judge court.

PRETTYMAN, *Circuit Judge:* The Chicago, Rock Island and Pacific Railroad Company is a through trunk-line railroad operating, so far as is here pertinent, across the State of Iowa from Davenport to Council Bluffs. It owns a subsidiary, called herein "Motor Transit", which owns operating rights and property as a motor carrier on routes paralleling or stemming from the Railroad route. The motor carrier certificates have heretofore contained limitations requiring that the motor service be auxiliary or supplementary to the rail service, but those limitations were stayed and have never been enforced. The motor carrier applied for a certificate without the restrictions. The application was opposed by other motor carriers. After extensive proceedings the Interstate Commerce Commission granted the application, subject to the conditions that there might be attached such reasonable terms, conditions, and limitations as the public convenience and necessity might require and that all contractual arrangements with the Railroad should be reported to the Commission and be subject to its revision. Petition for reconsideration having been denied, this action to set aside the order was brought by motor carriers operating in the same general area as Motor Transit.

The pub of the controversy is in two parts, (1) whether the Commission has power to grant a certificate to a motor carrier wholly owned by a railroad without a restriction that the service shall be auxiliary or supplementary to the railroad service and (2), if so, whether the findings of the Commission to the effect that the public convenience and necessity justified the grant in the present case were supported by evidence in the record.

Two sections of the Interstate Commerce Act, as now amended, are involved. Section 5(2)(b)[1] provides that, whenever a carrier by railroad, or its subsidiary, is an applicant for approval of a transaction involving a motor carrier, the Commission shall not approve unless it finds, *inter alia*, that the transaction will enable the carrier to use service by motor vehicle to public advantage in its operations. This section governs the acquisition of motor carriers by railroads. Section 207(a) of the Act[2] provides that a certificate shall be issued to any qualified applicant therefor if it is found, *inter alia*, that the proposed service is or will be required by the present or future public convenience and necessity. This latter section (207(a)) does not contain the requirement which appears in the former section (5(2)(b)) that the proposed service must be used in the operation of the railroad if a railroad is the applicant. It is agreed that the requirement that the service be used in the operation of the railroad applicant means that the service must be auxiliary or supplementary to the rail service.

Plaintiffs say that the requirement which appears in Section 5(2)(b) must be read into Section 207(a) and therefore controls in the issuance of certificates where a railroad, or its subsidiary, is the applicant. The Commission says the requirement is notably omitted from the terms of

[1] Formerly Sec. 213(a)(1), amended Aug. 2, 1949, 63 STAT. 485, 49 U.S.C.A. § 5(2)(b).

[2] As enacted Aug. 9, 1935, 49 STAT. 551, 49 U.S.C.A. § 307(a).

Section 207(a); that the policy, not the terms, of the requirement applies to the issuance of certificates under 207(a). It says a policy requirement is not so rigid as a flat requirement in terms but is flexible and permits a grant in exceptional circumstances where the Commission finds that the public interest, convenience and necessity require the grant.

We agree with the contention of the Commission in the foregoing respect. The case concerns the issuance of a certificate.[3] Certainly the terms of the requirement as to auxiliary and supplementary service do not appear in Section 207(a). It is equally certain that the policy of the requirement, being a basic policy in the statute, does apply. The difference between a rigid requirement and an applicable policy is one of flexibility and permits the Commission to be governed in exceptional circumstances by the needs of the public convenience and necessity.

This brings us to the second main part of the controversy. The traffic consists of intrastate traffic, rail originated traffic, and interstate "peddle" traffic. The rail originated traffic goes, through natural course of events, to Motor Transit. That service is largely auxiliary or supplementary to the train service and is not actually involved in the controversy. Certificates for the intrastate traffic are issued by the State of Iowa, and that State follows the usual rule of public utility regulation that where the business makes economically feasible only one carrier it will certificate only one. It has certificated Motor Transit for the intrastate traffic along the routes here involved, and so that traffic is not actually involved in the present controversy. The so-called interstate peddle operation is one in

[3] See Interstate Commerce Comm'n v. Parker, 326 U.S. 60, 89 L. Ed. 2051, 65 S. Ct. 1490 (1945); United States v. Rock Island Co., 340 U.S. 419, 428, 431, 442, 95 L. Ed. 391, 71 S. Ct. 382 (1951); United States v. Texas & Pac. Co., 340 U.S. 450, 95 L. Ed. 509, 71 S. Ct. 422 (1951).

which the motor carrier, starting with a full truckload, moves interstate and distributes that load at various points of destination; or, in reverse, a truck picks up parts of loads at various points of origin and eventually transports interstate a full truckload. This is really the traffic which is involved in the pending case. The Commission found, in effect, that this peddle operation, standing alone, is not a profitable one and that the trend of motor carriers operating in Iowa has been to refrain from rendering this service; that the business communities along the routes need this sort of service; and that Motor Transit, already having rail originated and intrastate traffic, can readily render this additional service. As a matter of fact Motor Transit has operated since its first acquisition in 1938 without the restrictions here in issue. During that period it satisfactorily performed this particular service. Actually the result of sustaining the motor carriers' position would be a privilege to them of giving the service now rendered by Motor Transit if they so desire and refusing to give it when it is economically not feasible. That would not appear to serve the public interest.

We think the position of the Commission is well taken on the evidence. Voluminous testimony was produced. The findings are extensive. The conclusion that the grant appears necessary in the public interest is well founded. Judgment will be rendered for the defendants.

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

Civil Action No. 3171-55

AMERICAN TRUCKING ASSOCIATIONS, INC. ET AL., *Plaintiffs*

v.

UNITED STATES OF AMERICA and INTERSTATE COMMERCE COMMISSION, ET AL., *Defendants*

JUDGMENT

This action to enjoin and set aside an order of the Interstate Commerce Commission, having come on for final hearing on December 15, 1955, before a duly constituted three-judge District Court, convened pursuant to Sections 2284 and 2321-2325, Title 28, United States Code, consisting of the undersigned judges; and the Court having considered the pleadings and evidence, and the briefs and arguments of counsel for the respective parties; and being fully advised in the premises; and having on January 11, 1956, filed herein its opinion holding that the order of the Interstate Commerce Commission herein assailed is valid and that judgment will be rendered for defendants; now in accordance with the said opinion,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED That the relief sought herein be, and the same hereby is, denied, and judgment be, and the same hereby is, rendered for the defendants, with costs assessed against the plaintiff and intervening plaintiffs.

This 27th day of January, 1956.

APPENDIX D

INTERSTATE COMMERCE COMMISSION

No. MC-29130 (Sub-No. 70)

THE ROCK ISLAND MOTOR TRANSIT COMPANY
COMMON CARRIER APPLICATION

Submitted March 8, 1954 *Decided November 22, 1954*

Public convenience and necessity found to require operation by applicant as a common carrier by motor vehicle in interstate or foreign commerce, of general commodities, with exceptions, between certain points in Illinois, Iowa, and Nebraska, over regular routes, serving designated intermediate and off-route points, subject to conditions. Issuance of a certificate approved, and application in all other respects denied.

A. B. Howland and *J. H. Martin* for applicant.

D. C. Nolan, Henry A. Archambo, Ernest Porter, and *R. H. Heinecamp* for interveners in support of the application.

Albert B. Rosenbaum, Rex H. Fowler, Homer E. Bradshaw, Eugene L. Cohn, Bernard G. Colby, Edgar Watkins, William B. Adams, James F. Pinkney, Joseph E. Ludden, Stephen Robinson, Walter V. Huston, and *William A. Landau* for protestant and interveners in opposition.

REPORT OF THE COMMISSION

BY THE COMMISSION:

Exceptions to the order recommended by the examiner were filed by a protestant and nine motor-carrier interveners in opposition. Applicant and interveners in support of the application replied to the exceptions. The case was

orally argued before us. Our conclusions differ slightly from those recommended.

By application filed October 26, 1951, as amended, The Rock Island Motor Transit Company, hereinafter called applicant or Motor Transit, of Chicago, Ill., seeks a certificate authorizing operation, in interstate or foreign commerce, as a common carrier by motor vehicle, of general commodities, except nitroglycerine, commodities of unusual value, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) between Chicago, Ill., and Omaha, Nebr., from Chicago over U. S. Highway 34 to junction of Illinois Highway 92, thence over Illinois Highway 92 to junction of U. S. Highway 6, and thence over U. S. Highway 6 to Omaha, (2) between Iowa City, Iowa, and Cedar Rapids, Iowa, from Iowa City over U. S. Highway 218 to Cedar Rapids, (3) between Harlan, Iowa, and Omaha, Nebr., from Harlan over Iowa Highway 64 to Council Bluffs, Iowa, and thence over U. S. Highway 6 to Omaha, (4) between Avoca, Iowa, and Atlantic, Iowa, (*a*) from Avoca over U. S. Highway 59 to junction U. S. Highway 6, and thence over U. S. Highway 6 to Atlantic, and (*b*) from Avoca over Iowa Highway 83 to Atlantic, and (5) return in each instance over the same routes, serving the intermediate points of East Moline, Silvis, Moline, and Rock Island, Ill., and Bettendorf, Davenport, Durant, Wilton Junction, Atalissa, West Liberty, Iowa City, Coralville, Tiffin, Homestead, Marengo, Ladora, Victor, Brooklyn, Grinnell, Newton, Colfax, Altoona, Des Moines, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, Atlantic, Oakland, Council Bluffs, Weston, Underwood, Minden, Neola, Corley, Walnut, Marne, and Hancock, Iowa, and the off-route points of Walcott, Muscatine, Stockton, Moscow, Oxford, South Amana, Malcom, Kellogg, Mitchellville, and Shelby, Iowa. The Regular Common Carrier Conference, of the American Trucking Associations, Inc.,

and 11 motor carriers oppose the granting of the application.

Applicant is a wholly owned subsidiary of the Chicago, Rock Island and Pacific Railroad Company, hereinafter called Rock Island. It conducts motor common carrier regular-route operations in Illinois, Indiana, Iowa, Nebraska, Minnesota, Missouri, Kansas, Texas, Tennessee, Arkansas, and Oklahoma, subject in certain instances to various restrictions affecting different route segments. This proceeding primarily relates to applicant's authorized routes within the State of Iowa (except those between Cedar Rapids and Decorah, between Muscatine and Kalona, and between Wellman and West Chester) and those extending beyond to Chicago, Ill., Omaha, Nebr., Minneapolis-St. Paul, Minn., and Kansas City, Mo.

The history of the transactions and circumstances leading to the instant proceeding and the evidence adduced herein are set forth in the examiner's report in much detail. On exceptions, protestant and interveners opposing the application challenge the examiner's findings of fact and conclusions drawn therefrom; however, in no instance has specific reference been made to the page or pages of the transcript upon which they rely to refute the examiner's findings. Although we may not agree in every instance with the emphasis which the examiner has given certain of the evidence submitted in this proceeding, our review of the record indicates that basically his findings of fact are sound, and no useful purpose would be served by repeating them once again. Under these circumstances we adopt substantially the statement of issues and the evidence as reported by the examiner with such modifications and added discussion thereof as appear necessary and proper.

Prior to August 30, 1951, applicant operated over U. S. Highway 6 under a certificate, subject to the condition or reserved right of the Commission later to impose such restrictions which might be found necessary to insure, that

the service should be limited to that which is auxiliary to, or supplemental of, train service of Rock Island and shall not unduly restrain competition, and as to the remainder of the authority sought under an approved purchase without any provision for the issuance of a certificate containing such condition or reserved right. On September 11, 1951, it was issued a certificate specifying operations over the described routes, containing the following restrictions:

1. The service to be performed by The Rock Island Motor Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not render any service to, or from, or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.

4. All contractual arrangements between The Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

Our power to impose these restrictions pursuant to the reserved condition was affirmed by the United States Supreme Court in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419. However, Motor Transit in this proceeding seeks by the testimony of numerous witnesses to establish that its continued operation unencumbered by these

restrictions is necessary in the public interest. The route over U. S. Highway 6 in Iowa is the heart of Motor Transit's operations in that State, and such restrictions not only affect that route but also a number of other routes which are not similarly restricted.

Prior to the issuance of the certificate dated September 11, 1951, containing the above-described 5 conditions, applicant was issued certain temporary authorities and pursuant thereto may transport general commodities, with exceptions, over the routes described in the application, subject to a maximum weight limitation of 5,000 pounds, and further subject to the restriction that no shipment may be transported between Chicago and Omaha, nor between any of the following points, or through, or to, or from, more than one of said points: Omaha, and collectively, Davenport, Bettendorf, Rock Island, Moline, and East Moline. This presently effective temporary authority expires concurrently with the final decision in this proceeding, and applicant has been and is now operating pursuant to it, which is less restrictive in the conditions to which it is subject than those contained in applicant's certificate of September 11, 1951.

Applicant's balance sheet as of January 31, 1952, shows assets of $1,858,620, and liabilities of $1,758,620, excluding capital stock, but including $873,527 advances payable to Rock Island, $250,000 long-term bank loan, and $149,764 unappropriated surplus. As of October 26, 1951, applicant owned and operated 152 trucks, 228 tractors, 303 trailers, 4 service trucks, and 4 buses. It is fit and able, financially and otherwise, properly to conduct the proposed operation.

Prior to discussing the arguments raised on exceptions and oral argument, a brief resume of the evidence for and against the granting of the application will be helpful. The Iowa State Commerce Commission supports the application. It is the view of that body that applicant is the only carrier that, for a number of years prior to September 1951,

had been rendering an adequate and efficient service on less-than-truckload freight at the many small points on the considered routes and certain points on its authorized routes adjacent thereto, and the only carrier since that date that has been providing consistent service to the extent authorized under its temporary authorities. Because of the weight and "key point" limitations contained in the temporary authorities, the service rendered thereunder is not regarded as adequate. During the 2 years preceding the hearing in the spring of 1952, the trend of motor carriers operating in Iowa generally has been to refrain from rendering local service on small shipments. This State commission grants intrastate authority to only one motor carrier to serve points on a given route.

Chambers of commerce and other commercial organizations at Davenport, Omaha, Chicago, Des Moines, St. Joseph, Mo., Mason City, Muscatine, Ottumwa, Iowa City, Burlington, Cedar Rapids, and Atlantic, Iowa, and Minneapolis, Minn., and East Moline, Moline, and Rock Island, Ill., representing in excess of 2,300 members, ship various commodities in lots of less than 15,000 pounds and sometimes in truckloads to the destinations here involved. It is the view of their membership that rail service is too slow and that the unrestricted service proposed by applicant is essential to the proper conduct of their members' businesses as there is no other motor carrier maintaining the complete peddle service rendered by applicant prior to the imposition of the restrictions. Pool-car distribution is made from some of the described points.

Eight motor carriers have been and are interlining traffic with applicant, principally at Chicago and the Tri-Cities. Generally these carriers do not ordinarily experience any difficulty in interlining shipments destined to the larger points of population on U. S. Highway 6, such as Des Moines and Newton, but they are of the opinion that applicant must be in a position to serve these points and to handle overhead traffic in order to provide the required

service, particularly the expensive peddle operations, at the smaller points to avoid sustaining a loss on the entire operation. Several of these carriers are members of the American Trucking Associations, Inc., which is opposing the application.

Thirty-eight shippers and receivers of a large variety of commodities located at Kansas City, Mo., East Chicago and Chicago, Ill., Beatrice and Omaha, Nebr., Minneapolis, Minn., and Clinton, Muscatine, Kalona, Wellman, Columbus Junction, Washington, Pella, Prairie City, Oskaloosa, Fairfield, Brayton, Exira, Hamlin, Audubon, Lewis, Griswold, Carson, and Treynor, Iowa, points served by Motor Transit but not on routes directly involved in this proceeding support the application for a variety of reasons. Some grounds given are: (1) restoration of applicant's unrestricted authority is considered essential to eliminate inconvenience and difficulties experienced since August 30, 1951, in the conduct of their businesses, (2) applicant is providing the only regular service available and the loss thereof would be injurious, (3) the loss of this service will result in delays and will place shippers at a competitive disadvantage, (4) curtailment or abandonment of Motor Transit service would mean a tremendous loss of business, (5) other carriers' services are not regular or dependable, and (6) many years of dependence upon applicant's service, and the effect the loss of such service would have on their business activities.

There are 45 points of service on the routes of White Line Freight Company, Incorporated, and White Line Trucking Company, applicant's predecessors, hereinafter collectively called the White Line route and 11 such points on the routes of J. H. Frederickson and D. H. Frederickson, doing business as J. H. Frederickson & Son, also applicant's predecessor, hereinafter called the Frederickson Line route, in addition to certain points that are on both routes.

One hundred and one public witnesses, both consignors and consignees, hereinafter collectively called shippers, from points on the White Line route and 10 public witnesses of the same category from points on the Frederickson Line route testified in support of the application. These shippers were from every point on the White Line route, except Silvis, Bettendorf, and Moscow, and from every point on the Frederickson Line route, except Weston, Avoca, and Corley. They ship or receive a variety of commodities in less-than-truckload quantities, and some of them receive shipments in truckload lots. Their testimony relates principally to the former, which prior to August 30, 1951, was handled by applicant in peddle operations in a very satisfactory manner, and since that date in the same manner to the extent that the weight limitations in the temporary authorities issued to applicant permit. Applicant's service on truckloads also has been satisfactory, but admittedly competing motor carriers generally provide prompt service on this type of traffic. In some instances, they have refused to accept truckload shipments of low-rated commodities. In one instance, applicant was the only carrier readily available with proper equipment to transport the commodity. In general the shippers' evidence is to the effect (1) that they had, prior to August 30, 1951, very efficient and dependable peddle service by applicant, which they need in the operation of their various businesses and which to a large extent have been built upon applicant's service, (2) that peddle shipments are not accepted by many motor carriers serving the larger points, (3) that owing to competition the service of applicant is vitally essential as there are no other transportation facilities available that can replace this service, (4) that experience has demonstrated that such service is superior to that provided by other motor carriers, (5) that curtailment of applicant's service would force some shippers to purchase and operate their own equipment, (6) that a few shippers would have to pick up shipments at points from 3 to 10 miles from their places of business, (7) that the existing

weight limitation of 5,000 pounds per shipment is burdensome, (8) that imposition of the supplemental and auxiliary to rail service restriction would result in deterioration of the intrastate services rendered by applicant, (9) that certain opposing carriers' services have been unsatisfactory due to attempted night deliveries, delays, erroneous rate information, and slow payment of claims, and (10) that 11 points on the White Line route would have no motor peddle service if this application is not granted and others would have no scheduled peddle service. Generally these supporters of the application desire a return to the service rendered by Motor Transit prior to the time that the five conditions, designed to insure that its service should be auxiliary or supplemental to the train service of the parent railway, were imposed.

Ten motor carriers oppose the application. Two of them possess authority to serve all points on the White Line route, and one of these also holds authority to serve all points on the Frederickson Line route. Neither has been furnishing any substantial amount of peddle service on less-than-truckload shipments on these routes. Others of these 10 carriers render some peddle service to and from a few points principally to the immediate east of Des Moines, but the record is unconvincing that this service is adequate. Those having interstate authority on U. S. Highway 6 assert that they are anxious to provide peddle service as the traffic warrants. All believe that a grant of authority in this proceeding would be detrimental to their operations principally by depriving them of traffic that they might transport if applicant's operations are subjected to the five conditions previously discussed. These opposing carriers concede that during the approximate 14-year period in which time applicant was operating over the involved routes without restricting its service, the volume of traffic handled by each of these carriers has increased substantially and generally to a greater extent than did the volume transported by applicant.

The examiner recommended that the application be granted. On exceptions the protestant and interveners in opposition allege that the examiner erred (1) in construing the decision in *United States* v. *Rock Island Motor Transit Co.*, *supra*, (2) in stating the purpose of the application, (3) in his interpretation of our policy respecting the imposition of restrictions on operating authorities issued to motor-carrier subsidiaries of railroads, and in finding (4) that the White Line route rights had been operated for several years without complaint that such operations unduly restrained competition, (5) that applicant is the only carrier that for many years has maintained daily scheduled peddle operations over the entire White Line route and Frederickson Line route, (6) that other carriers provide such service only on small segments of these routes, (7) that opposing carriers delivered less-than-truckload freight to applicant for movement to destinations they are authorized to serve, (8) that the supporting witnesses from points in Iowa have built their businesses on applicant's service, particularly with respect to less-than-truckload shipments, (9) that such witnesses deem applicant's service very satisfactory and are not convinced that other motor carriers can or will render the same type of service, (10) that Iowa-Nebraska Transportation Co., Bos Truck Lines, and Des Moines Transportation Company, hereinafter called Iowa-Nebraska, Bos, and Des Moines Transportation, respectively, are the only motor carriers that hold appropriate authority to serve all points or a substantial number of points on the routes directly involved, (11) that there is no serious contention that Bos and Des Moines Transportation are in a position to supplant applicant's operation, (12) that Iowa-Nebraska is the carrier that the opposition advances as being in a position to take over the interstate traffic moving to and from points on the White Line and Frederickson Line routes which applicant would have to relinquish, (13) that Iowa-Nebraska inaugurated certain peddle operations for the purpose of placing the opposing

carriers in a position at the hearing to show that they are endeavoring to provide service, (14) that Iowa-Nebraska does not contemplate inaugurating daily scheduled peddle operations to take the place of each such operation conducted by applicant, (15) that opposing motor carriers did not present one public witness to testify as to adequacy of their service, (16) that applicant has in general, throughout the years, worked for the development and betterment of the motor-carrier industry, (17) that the reluctance of shippers to ship under rail billing is due to the fact that the shipments require longer time in transit, (18) that the operations of applicant have not unduly restrained competition, (19) that the nonparticipation of the railroad in motor-carrier tariffs is due to the policy of the motor carriers refusing to establish joint rates, (20) that the evidence abundantly establishes that public necessity and convenience requires the proposed less-than-truckload peddle operations, (21) that not one of the opposing carriers having the requisite authority has established or offered to establish scheduled peddle operations to replace the type of service rendered by applicant, (22) that with three kinds of traffic available to applicant it could provide better service than those carriers who claim they can take over applicant's interstate motor-billed freight, (23) that the opposing motor carriers cannot obtain intrastate rights, (24) that there is evidence that opposing motor carriers have refused to accept truckloads of low-rated commodities, (25) that the truckload traffic which is "the cream of the traffic" has been handled by applicant for many years without seriously affecting the expansion of its competitors, (26) that opposing motor carriers would be under a public duty to provide the peddle service on interstate motor-billed freight, which traffic alone will not justify the type of service heretofore rendered by applicant, (27) that applicant would still be tendered intrastate-and-rail-billed traffic, which would not warrant continuance of the operations conducted by it prior to August 30, 1951, (28) that

the net result would be injury to the public, (29) that a substantial number of employees of applicant would be dismissed, (30) that the conclusions reached in his report are not an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application*, 10 M.C.C. 221, 240, decided November 12, 1938, and in concluding (31) that the application should be granted in its entirety.

As noted, protestants and interveners challenge practically every material statement of fact and conclusion reached therefrom, in the report of the examiner. Briefly their position is that the evidence does not establish a public need for the proposed service of applicant other than a supplementary or auxiliary service to the rail service of the Rock Island, and that several of them are able, ready, and willing to provide all the types of service that Motor Transit would have to discontinue under the restrictions we have imposed on applicant's permanent authority. In addition they allege that we have no jurisdiction to grant applicant a certificate without restrictions. This will be discussed later herein.

In general protestant and interveners argue that the grant recommended by the examiner would give applicant an advantage over them by reason of its affiliation with the Rock Island through (1) financial assistance, if necessary, (2) the transportation of rail-billed freight under a contractual agreement with Rock Island, (3) the movement of traffic in merchandise cars and by truck between the same points, (4) the possibility that applicant might solicit traffic to be moved between identical points at either the rail or motor-carrier rates, (5) the ignoring by Rock Island and applicant of tariff provisions regarding packing and loading, (6) the use by applicant of dock and terminal facilities leased from Rock Island, and (7) the removal of the key-point restriction, which would permit eastbound rail-billed traffic to move by truck.

Rock Island has rendered applicant financial assistance, traffic has been moving and would continue to move as indicated in (3) and (7) above, but there is no substantial evidence that these things have during the past several years materially affected the operatinos of the opposing motor carriers. From the past history of Motor Transit's operations there is little reason to believe that future operations would be conducted in any radically different manner from those in the past. The contention in (4) above is a possibility but applicant has not done so in the past. No explanation of (5) above is advanced, but carriers may not legally disregard tariff provisions. Applicant has and would enter into contractual agreements as indicated in (2) and (6) above with Rock Island. The record is vague regarding the terms of such agreements and Rock Island through these agreements could secure transportation of its freight at less than reasonable charges for the service rendered and lease to applicant dock and terminal facilities at rents in excess of their actual value. Therefore, we are of the opinion that any grant of authority herein should be subject to a condition that all contractual agreements between applicant and Rock Island should be reported to us and should be subject to revision if and as we find it to be necessary in order that such agreements shall be fair to the parties and to the public.

The contentions advanced by protestant and interveners on oral argument with respect to the facts are for all practical purposes the same as those set forth in their exceptions. In both their exceptions and on oral argument they insist that we are without statutory authority to grant applicant the type of certificate here sought. They arrive at this conclusion from our policy since the enactment of the Motor Carrier Act, 1935, of generally imposing restrictions on certificates granted to motor carrier subsidiaries of railroads, which restrictions usually have provided, among other things, that the service of the motor carrier shall be supplemental of, or auxiliary to, the service of the railroad.

Such restrictions were first imposed in *Pennsylvania Truck Lines, Inc.—Control—Barker M. Frt.*, 1 M.C.C. 101 and 5 M.C.C. 9 and 49, and *Kansas City S. Transport Co., Inc., Com. Car. Application*, 10 M.C.C. 221, and 28 M.C.C. 5. Opposing carriers concede that section 207 of the Interstate Commerce Act, hereinafter called the act, the section under which this application was filed, does not contain any provisions requiring imposition of restrictions on certificates issued to motor-carrier subsidiaries of railroads, but nevertheless argue that the national transportation policy, congressional intent, and the provisions of section 5(2)(b) of the act governing "Combinations and consolidations of carriers" (formerly section 213 of the Motor Carrier Act, 1935), require that the various forms of transportation be kept distinct so that each can operate in its own sphere independently of the other. It is claimed that these considerations mean that we do not have statutory authority to grant applicant an unrestricted certificate. We do not subscribe to this view. Our statutory authority to impose terms and conditions on a grant of authority under section 207 is derived from section 208 of the act. We have always construed these two sections in the light of the national transportation policy to require, where the circumstances warranted, the imposition of restrictions on certificates issued to motor-carrier subsidiaries of railroads. Where the circumstances did not require such action, we have issued certificates subject to a reservation to impose in the future any limitations, restrictions, or modifications that may appear necessary, and in some instances certificates have been issued without restrictions or even a reservation as just described. These two types of certificates, if protestant's and interveners' theory is sound, would be null and void, because, according to them, we possess no statutory authority to issue certificates to carriers such as applicant unless they are limited to services that are supplemental to, or auxiliary of, the service of a railroad. All certificates of this character have been issued strictly in accordance with the applicable statute.

Protestant and interveners also contend that the decision of the United States Supreme Court in *United States* v. *Rock Island Motor Transit Co., supra*, supports their position that we are without jurisdiction to grant the kind of certificate sought. We find nothing in that decision that warrants such a conclusion. Therein the Court affirmed our power to impose the restrictions hereinbefore quoted. It did not directly or by reasonable implication say that we have no statutory power to issue certificates of the character here considered without restrictions. In our opinion the decision does not require any change in the interpretation heretofore placed on the statute and the national transportation policy. In other words we may issue certificates to motor-carrier affiliates of railroads with or without restrictions as the circumstances may require.

A review of the development of our policy of granting motor-carrier operating authorities to rail affiliates and the applicability of these precedents to this application is set forth in the examiner's report, but is worthy of repetition.

The Motor Carrier Act, 1935, was approved August 12, 1935, and therein Congress declared its policy to be as follows:

to regulate transportation by motor carriers in such manner as to recognize and preserve the inherent advantages of, and foster sound economic conditions in, such transportation and among such carriers in the public interest; promote adequate, economical, and efficient service by motor carriers, * * * improve the relations between, and coordinate transportation by and regulation of, motor carriers and other carriers; develop and preserve a highway transportation system properly adapted to the needs of the commerce of the United States and of the national defense; * * *.

The declaration of policy of Congress in the Transportation Act of 1940, approved September 18, 1940, is worded somewhat differently, but its import is substantially the same as that contained in the foregoing quotation.

Section 213(a)(1) of the Motor Carrier Act permitted a railroad to acquire a motor carrier, provided we find that the acquisition will promote the public interest by enabling the railroad to "use service by motor vehicle to public advantage in its operations," without undue restraint of competition. This section was repealed by the Transportation Act of 1940. The substance thereof was carried into section 5 of the act.

Early in the regulation of the motor-carrier industry, division 5, in *Pennsylvania Truck Lines, Inc.—Control—Barker M. Frt., supra,* said:

> we are not convinced that the way to maintain for the future healthful competition between rail and truck service is to give the railroads free opportunity to go into the kind of truck service which is strictly competitive with, rather than auxiliary to, their rail operations. The language of section 213, * * *, is evidence that Congress was not convinced that this should be done.

These views ripened into a policy in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra,* which was prior to the acquisition by Motor Transit of the White Line and Frederickson Line rights. Therein division 5 imposed 5 conditions or restrictions upon the operating authority granted to a motor-carrier subsidiary of 2 affiliated railways, which in most respects were substantially the same as the conditions and restrictions ultimately imposed and contained in the certificate issued to Motor Transit on September 11, 1951. After that decision, practically all grants of operating authority to motor-carrier subsidiaries of railroads were made subject to like conditions and restrictions or modifications thereof required by the particular circumstances, except in a few instances, such as that here under consideration insofar as the White Line rights are concerned, the certificates contained no provisions limiting the service to that which is auxiliary to, or supplemental of, train service. The approval of the purchase of the White Line rights and the original certificate

covering these rights, as before indicated, were specifically made subject to the condition or reserved right later to impose such restrictions which we might find necessary to insure that the service would be limited to that which is auxiliary to, or supplemental of, train service of the Rock Island.

The main purpose for the policy of imposing the five above-quoted restrictions, or modifications thereof, was to prevent the railroads from acquiring motor operations through affiliates and using them in such a manner as to unduly restrain competition of independently operated motor carriers. This policy was and is sound and should be relaxed only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience.

Motor Transit operated the White Line rights in Iowa under claimed "grandfather" rights from April, 1938, to December 31, 1941, and under a certificate from the latter date to February 5, 1945, that contained only the reserved right to impose in the future such conditions that may be necessary to insure that the service shall be auxiliary to, or supplemental of, train service. From February 5, 1945, to the present, Motor Transit has continued the operation by reason of pending proceedings before us or litigation before the courts, or under temporary authority originally issued August 30, 1951, later modified, and subsequently extended to the date of the disposition of this proceeding. Although our policy of imposing the quoted restrictions was established about 3 years prior to the issuance of a certificate to Motor Transit, the certificate of that carrier did not restrict the operation of the White Line rights in any manner. Thus, Motor Transit operated under such

rights for a period of about 7 years without any complaint that its operation was unduly restraining competition or indication that we contemplated exercising the said reserved rights. After we, on our own motion, reopened No. MC-29130 and the 2 related cases for reconsideration, and imposed the above-described 5 restrictions and conditions, the proceedings were reopened for further hearing upon petition of Motor Transit for reconsideration, oral argument, and withdrawal of the report on reconsideration. The attorneys representing Motor Transit at that time did not recognize our jurisdiction to change or modify the orders authorizing the acquisition of Motor Transit's certificates, and they entered a special appearance on applicant's behalf solely for the purpose of filing the petition. At the subsequent further hearing a like appearance was entered for the sole purpose of contesting our jurisdiction. Consequently there was no new or additional evidence before us and, as a result thereof, the only issue was the question whether the reasoning of the prior report on reconsideration and the conclusions reached therein were sound in the face of the criticisms thereof contained in Motor Transit's petition. In the circumstances we had no alternative but to impose the restrictions and conditions established in accordance with the policy enunciated in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* This action was considered by the United States District Court for the Northern District of Illinois in a suit initiated by Motor Transit. That court set aside and permanently enjoined enforcement of our order. This decision sustained Motor Transit's position. On appeal, however, the United States Supreme Court reversed the decision of the district court and thereby sustained our views. Thereafter, Motor Transit requested limited temporary authority and filed this application under section 207 of the act for permanent authority. Thus, after the passage of approximately 4 years, Motor Transit concluded to do substantially what it had an opportunity to do in October 1947, namely to introduce additional evidence in the reopened proceedings.

Applicant is the only carrier that for a considerable number of years has maintained daily (generally at least 5 days a week) scheduled peddle operations over the entire White Line and Frederickson Line routes regardless of the volume of traffic available for movement in such operations. Opposing motor carriers with appropriate authority have not provided such a service, except with respect to selected small segments of the routes, principally immediately east of Des Moines. These carriers prior to August 30, 1951, delivered less-than-truckload freight to Motor Transit for movement to destinations they are authorized to serve. Some of this freight consisted of low-rated articles which such carriers deemed unprofitable to handle. These carriers in many instances refused to accept less-than-truckload shipments from their motor-carrier connections, for movement to a destination embraced in their operating authority. As a result thereof, several of these connecting carriers have had to rely upon Motor Transit to accept and make delivery of such shipments, even in cases where the delivering carrier was designated by the shipper. These experiences have convinced some of the connecting carriers that the unrestricted services of Motor Transit should continue to be available to them so that they may have a carrier that is always willing and able to accept interchange shipments destined to points on the White Line and Frederickson Line routes. One motor carrier that possesses rights on U. S. Highway 6 between Davenport and Des Moines, elects to give all of its less-than-truckload freight to Motor Transit for delivery at such points, because it is not profitable for it to provide this service.

Applicant adduced testimony of a great number of public witnesses from practically every point served by Motor Transit on the routes directly involved here and also some located at certain points on its other routes that would be affected by the restrictions and conditions imposed September 11, 1951. The witnesses located at points in Iowa have used the services of Motor Transit over a period of

many years and have, to a considerable extent, built their businesses on that service, particularly with respect to less-than truckload shipments. With that service available, they do not have to maintain large inventories because they can order from the manufacturer or wholesaler at the supply points, such as Chicago, Minneapolis-St. Paul, Omaha, Kansas City, or Moline, early one day and be reasonably certain of delivery on the next day in some instances, and in others not later than the second day. Some of them stressed their need for this service in obtaining expedited movement of repair parts, including those for farm machinery. In general, all of these witnesses, both those directly and indirectly affected, are apprehensive that, if we ultimately require Motor Transit to confine its operations to the transportation of rail-billed freight, their businesses will be adversely affected; as indeed some of them already have been, by the weight limitations imposed in the temporary authorities. Some of the witnesses have not been able to obtain reasonably prompt pickup and delivery of shipments by carriers other than Motor Transit. A few of them could get along without the service of Motor Transit, but they would use it in preference to the service of any other authorized carrier. The great majority of these witnesses support this application because they have received satisfactory service from Motor Transit for a long time, and they are not convinced that any other motor carrier will or can render the type of complete service respecting transportation, claim adjustments, rate and routing information, and tracing of shipments to which they are accustomed. Motor Transit is able to provide such complete service because it maintains freight agents at many points on its routes and the other motor carriers have them located at some of the larger points only.

Of the opposing motor carriers, Iowa-Nebraska, Bos, and Des Moines Transportation are the only ones with interstate authority to serve all points or a substantial number of designated points on the routes directly involved in this

proceeding. Bos has the authority to provide peddle service at all points on U. S. Highway 6 in Iowa. It has been providing such service approximately three times a week from Des Moines to Grinnell and return; and from Des Moines to Anita and return. A few other points on the White Line route are served by over-the-road equipment, through cartage companies, or on a call-and-demand basis. These services are not comparable to the peddle services rendered by Motor Transit. Des Moines Transportation possesses interstate authority to serve only 10 intermediate points on U. S. Highway 6 between the Mississippi River and Omaha. Daily peddle service is provided at 6 of the 10 points. These 6 points are located east of Des Moines. This carrier's authority is insufficient to allow it to replace the interstate service heretofore rendered or presently being rendered by Motor Transit. Recognizing this it says that if necessary it will seek additional authority. Certain other opposing carriers hold authority to serve a few of the points on the routes directly or indirectly involved. There is no serious contention that either Bos or Des Moines Transportation is in a position to supplant Motor Transit operations as rendered prior to August 30, 1951

Iowa-Nebraska is the carrier that the opposition advances as being in a position to take over the interstate traffic moving to and from points on the White Line and Frederickson Lines routes, which Motor Transit would have to relinquish under the conditions and restrictions imposed September 11, 1951. This carrier possesses the required interstate authority to render such service, but over the years it has not been providing any substantial peddle service on these routes. This, no doubt, was attributable to the small amount of this kind of traffic available to this carrier and to some extent probably by the fact that a large part of its business is the transportation of dairy products eastbound to Chicago, Philadelphia, New York City, and Boston. In February 1952, it inaugurated certain peddle operations, and together with the other opposing

line-haul motor carriers and certain other motor carriers discontinued, after August 30, 1951, the transfer of less-than-truckload traffic to Motor Transit for delivery to points on its lines also served by one or more of the opposing carriers. Iowa-Nebraska does not contemplate inaugurating daily scheduled peddle operations to take the place of each such operation conducted by Motor Transit, but says that it will provide this type of service as demanded by the volume of traffic. This clearly is not the kind of service that the supporting witnesses have had available in the past, and their testimony demonstrates that they will not be satisfied with less in the future.

Applicant's operations have been conducted in the same manner as other motor carriers operating in the same area. It has participated in the conferences of such carriers and is a party to their agency tariffs, and in general throughout the years has worked for the development and betterment of the industry as a whole without regard to its being a subsidiary of a railroad. The less-than-carload traffic moving by railroad over a recent 5-year period has consistently declined. During a comparable period the volume of traffic handled by a group of nine motor carriers serving the Midwest area increased substantially. Applicant's tonnage also increased, but not to the extent of its competitors represented by this group of carriers. Thus the operations of applicant have not unduly restrained competition, and there is no evidence that its proposed operations would produce such a result.

The opposing motor carriers take the position that Motor Transit's operations should be restricted, in accordance with our general policy in this type of proceeding, to the transportation of rail-billed freight only. They indirectly imply that Motor Transit could handle freight on this type of billing just as expeditiously as that moving on motor-carrier billing. Theoretically this should be true, but in actual practice the motor-billed freight is handled with greater dispatch; and this is the reason that many of the

public witnesses supporting applicant have refused to deliver their shipments to Rock Island for billing even though the line-haul transportation thereof is performed entirely by Motor Transit. The reluctance of shippers to use this kind of service is clearly due to the fact that it requires longer time in transit. For example, a shipment moving on rail billing from the Twin Cities to Marengo is picked up by the cartage company employed for that purpose by Rock Island and delivered to the Minneapolis or St. Paul rail terminal, worked, billed, and, in 1 or 2 days, turned over to Motor Transit for movement to destination. This shipment would require from 2 to 4 days more in transit than would be necessary if it moved by Motor Transit on motor billing. The situation in the reverse direction would be substantially similar. Motor-billed shipments from Chicago are picked up by Motor Transit and moved out in road-haul equipment the same night, as contrasted with rail-billed shipments which are picked up by a cartage company for Rock Island and moved to Burr Oak, 15 miles, worked, billed, and returned to Chicago for transfer to Motor Transit for transportation to destination, or if it is necessary to move these shipments west from Burr Oak in boxcars owing to the key-point restriction they would not reach Davenport for 2 or 3 days and sometimes longer. Similar delays occur on shipments in boxcars to Des Moines. The delays in handling rail-billed shipments from Chicago are greater than from the Twin Cities. Rail-billed freight is delayed at points in Iowa on account of the method of handling these shipments before they are transferred to Motor Transit for movement. Perhaps these delays are unavoidable, but it seems that some course of action might be undertaken by Rock Island to eliminate or reduce the time of rail-billed shipments in transit.

The evidence abundantly establishes that public convenience and necessity require the proposed less-than-truckload peddle operations. In addition to the testimony of the many public witnesses regarding their need for such serv-

ice, there must be taken into consideration that not one of the opposing motor carriers having the requisite authority has established or offered to establish scheduled peddle operations to replace each such operation conducted by Motor Transit prior to August 30, 1951, and, by refraining from doing so, they no doubt realize that such peddle operations could not be profitably operated with interstate traffic only. The peddle service provided by Motor Transit has been, and to a limited extent, due to the weight limitation, is, based on interstate, intrastate, and rail-billed traffic. With these three kinds of traffic available it is patent that Moter Transit could provide better service to the public than the motor carriers who claim that they can take over Motor Transit's interstate motor-billed business. These carriers hold no intrastate rights on the considered White Line and Frederickson Line routes and cannot obtain such rights because it is the policy of the Iowa State Commerce Commission to grant such rights to only one carrier on a given route. Motor Transit possesses such rights on these routes.

There is some evidence of a public need for the proposed truckload services of applicant, but it is not as convincing as that with respect to the peddle operations, and this is understandable because the other motor carriers operating in the area have usually provided satisfactory service on truckload shipments. There is also some evidence that the latter have refused to accept truckloads of low rated commodities. In any event we feel that there is sufficient basis to warrant a complete grant of authority to applicant. This truckload "cream of the traffic," which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors' operations, should not be handed over to its competitors and Motor Transit expected to provide the expensive peddle services.

Acceptance of the opposing motor carriers' position would have the following results. They would be left to

provide the peddle services on interstate motor-billed traffic, which alone will not justify the type of services heretofore rendered by Motor Transit, and all such traffic in truckloads. Motor Transit would be left with intrastate and rail-billed traffic, which will not warrant continuance of the operations conducted by it prior to August 30, 1951. The net result is clearly not in the public interest.

Applicant seeks unrestricted authority and we are satisfied that the grant of authority hereinafter made should be free of restrictions, except the one previously discussed and, in addition, one whereby we shall retain jurisdiction to impose in the future whatever restrictions or conditions, if any, appear necessary in the public interest by reason of material changes in conditions or circumstances surrounding applicant's operations in relation to those of competing motor carriers. Accordingly such a restriction will be imposed.

The application requests, among other things, authority over designated highways between Chicago and Omaha. Applicant presently holds authority between Chicago and Silvis. Consequently, there is no reason for including this segment in the findings herein. The findings will include only the segment of this route between Silvis and Omaha, which authority may be tacked with the present authority between Chicago and Silvis.

The commodity description used in the findings herein authorize the transportation of dangerous explosives, except nitroglycerin. This description it its entirety is the same as that contained in the certificate issued on September 11, 1951.

The authority herein set forth in our findings supersedes and cancels all authority heretofore granted between the same points, more particularly described on "Sheets 2 and 15" of the certificate issued to applicant on September 11, 1951.

The findings hereinafter made are not to be construed as an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* They represent an exception to that policy justified by the evidence in this proceeding. In other words, such findings do not establish a precedent. Each case of this character must be determined upon the facts and circumstances disclosed by the evidence.

FINDINGS

We find that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, of general commodities, except those of unusual value, nitroglycerin, household goods as defined in *Practices of Motor Common Carriers of Household Goods, supra*, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) from Silvis, Ill., to Omaha, Nebr., over Illinois Highway 92 to its junction with U. S. Highway 6, and thence over U. S. Highway 6 to Omaha, and return over same route, serving the intermediate points of East Moline, Moline, and Rock Island, Ill., and Bettendorf, Davenport, Durant, Wilton Junction, Atalissa, West Liberty, Iowa City, Coralville, Tiffin, Homestead, Marengo, Ladora, Victor, Brooklyn, Grinnell, Newton, Colfax, Altoona, De Moines, Dexter, Stuart, Menlo, Casey, Adair, Anita, Wiota, Atlantic, Oakland, and Council Bluffs, Iowa, and the off-route points of Walcott, Muscatine, Stockton, Moscow, Oxford, South Amana, Malcom, Kellogg, Lewis, and Mitchellville, Iowa, (2) from Iowa City, Iowa, to Cedar Rapids, Iowa, over U. S. Highway 218 and return over same route, serving no intermediate points, (3) from Harlan, Iowa, to Omaha, Nebr., over Iowa Highway 64 to Council Bluffs, and thence over U. S. Highway 6 to Omaha, and return over same route, serving the intermediate points of Corley, Minden, Neola, Underwood, and Weston, Iowa, and the off-route

point of Shelby, Iowa, and (4) from Avoca, Iowa, to Atlantic, Iowa, (*a*) over U. S. Highway 59 to Oakland, and thence over U. S. Highway 6 to Atlantic, and (*b*) over Iowa Highway 83 to Atlantic, and return over either route, serving the intermediate points of Hancock, Walnut, and Marne, Iowa, subject to the conditions (1) that there may be attached from time to time to the privileges granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and our rules and regulations thereunder; that a certificate authorizing such operations should be granted; and that the application in all other respects should be denied.

Upon compliance by applicant with the requirements of sections 215 and 217 of the act, and with our rules and regulations thereunder, an appropriate certificate will be issued.

An appropriate order will be entered.

COMMISSIONER FREAS concurs in the result.

ALLDREDGE *Commissioner*, dissenting:

The majority decision authorizes a railroad subsidiary to enter the motor-carrier field for the purpose of rendering a straight, unrestricted service in the transportation of freight over extensive highway routes, although power is reserved to the Commission to attach to the privileges granted such reasonable terms, conditions, and limitations as the public convenience and necessity may require in the future. The decision so far as its immediate effect is con-

cerned, will thus permit the railroad in question to perform a motortruck service which is not merely complementary to, or supplemental of, its railroad operations, but which is, in many instances at least, directly competitive therewith. The authorized service will be competitive also with independent motor-carrier operations.

It is true, according to the record, that applicant may, and probably will, for time, be in position to render a superior motor-carrier service to that afforded numerous shippers by the regular motor carriers. The deep concern of these shippers for an efficient and reliable transportation service is understandable; but other important considerations must be resolved before an application of this kind may lawfully be granted.

In determining questions of public interest in such proceedings as this the Commission must be guided by the standards prescribed by Congress. Although the majority report apparently rests its ultimate conclusions upon sections 207 and 208 of the Interstate Commerce Act, other provisions of statutory law, including the specially enacted national transportation policy, are involved and should have decisive influence in determining the issues. One of these provisions is section 5(2)(b) of the act. That subsection states, in effect, that where a carrier by railroad, or any person controlled by such a carrier, or affiliated therewith, is an applicant in any proposed transaction involving certain intercarrier relations (which unquestionably includes the transaction here before the Commission) the Commission shall not enter an order of approval "unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage *in its operations* and will not unduly restrain competition." [Italics supplied.] The Supreme Court, in the *Rock Island* case cited in the majority report, construed this provision of law along with others and then reviewed the practice of the Commission in restricting certificates

issued to railroads or their subsidiaries to conduct motor-truck service so as to keep such service auxiliary or supplemental to railroad operations.

The Court pointed out, at pages 443 and 444 of its opinion, that such restrictions as the Commission had been imposing "hamper railroad companies in the use of their physical facilities—stations, terminals, warehouses—their personnel and their capital in the development of their transportation enterprises to encompass all or as much of motor transportation as the roads may desire." After thus stating the necessary effect of the Commission's customary restrictions, the Court said, "The announced transportation policy of Congress did not permit such development." This means, of course, that Congress has not established a policy of free and unlimited employment of motor carriers by railroads; that restrictions are necessary in order to confine each transport agency to a sphere where it may have an opportunity to develop its own inherent advantages to the fullest possible extent. This established policy of Congress was also discussed, explained, and elucidated by the Supreme Court in another important decision preceding the one in the *Rock Island* case, namely *McLean Trucking Co.* v. *United States*, 321 U. S. 67.

The majority seems to pay some homage to this policy by declaring it to be sound and subject to relaxation "only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience." Congress, however, has not provided for any exclusions from its declared policy. That is a prerogative of Congress itself. The Supreme Court did point out in the *Rock Island* case that restrictions might well vary from time to

time; but there is no indication that Congress intended to confer power upon the Commission to issue *carte blanche* authority to a railroad to perform unrestricted motor-carrier service, subject, as here stated, only to such terms, conditions, and limitations as the public convenience and necessity may require in the future. The phrase "public convenience and necessity," in the context in which it is used in the act, does not comprehend the full public interest in transportation envisaged by congressional policy.

There may be a good reason for this policy which goes beyond the protection of different modes of transportation. It may be needed to protect the railroads against themselves. Without restraining influences in the law, it would not be too difficult, for instance, for one railroad, through the purchase of an independent motor-carrier operation, to invade the territory of another railroad without complying with the public-convenience-and-necessity provisions of part I of the act. *Cf. Texas & P. Ry. Co.* v. *Gulf, C. & S. F. Ry. Co.*, 270 U. S. 266.

I cannot agree that a proper balance between the contending interests in the light of congressional policy has been reached by the majority in this proceeding. Some of the restrictions presently contained in applicant's certificates and temporary authorities could well be modified, such as the elimination of certain, but not all, key points and the removal of the quantity restriction on motortruck shipments; but this record does not call for such drastic changes in operating authorities as the majority has approved. Unquestionably, the shippers in this area are entitled to adequate and efficient transportation service. To the extent that such a relaxation of the present restrictions in applicant's operating authorities as I have suggested does not accomplish this objective, then the independent motor carriers should be required to see that the necessary service is furnished. The existing law seems to be adequate for that purpose.

ARPAIA, *Commissioner*, dissenting in part:

In considering the legal and policy questions involved in this application by a railroad affiliate for unrestricted motor-carrier authority, the majority seems to have lost sight of the more elementary question concerning the adequacy of proof of public convenience and necessity. Apparently the majority has been overwhelmed by the quantity of the evidence in this proceeding. In previous cases, we have not allowed ourselves to be persuaded by the number of witnesses or by general statements, but rather have been motivated by the quality of the evidence. See, for example *Hancock-Trucking, Inc., Ext—Gulf and West Coast Routes*, 62 M.C.C. 513, and *T. S. C. Motor Freight Lines Extension—New York*, 62 M.C.C. 499.

A careful analysis of the record is convincing that applicant has failed to prove that public convenience and necessity require its proposed service at any of the routes and points except those on U. S. Highway 6 (the White Line route). Indeed, there is considerable doubt in my mind that applicant has met its burden of proof of need for service along that segment which runs from Iowa City to Cedar Rapids. The only justification for a grant of authority to serve that portion is as a necessary adjunct to the remainder of the White Line route.

With respect to the other authority sought by applicant, the proof does not meet the standard which we have applied heretofore, and I see no reason for deviating from our established requirements.

The majority has concluded that a condition reserving our power to impose restrictions at a later date is necessary. Because of the language used on page 108 of the report in describing the need for reserving that power, I have some doubt as to the efficacy of the condition prescribed. It should be clear and unequivocal. I feel that condition (1) in the findings is neutralized by the language in the discussion insofar as it adds any qualifications to

those set forth in section 208 of the act. To be more specific, the words in the discussion after "public interest," to wit: "by reason of material changes in conditions or circumstances surrounding applicant's operations in relation to those of competing motor carriers," are not only too general and unnecesary, but, to my mind, could be construed to limit our power to attach such subsequent limitations as may be found necessary in the public interest.

APPENDIX D

Corrected Order

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 6th day of July; A. D. 1955

No. MC-29130 (Sub-No. 70)

The Rock Island Motor Transit Company—Common Carrier Application
(Des Moines, Iowa)

No. MC-29130 (Sub-No. 2)

Rock Island Motor Transit Company Extension of Operations—Silvis—Chicago, Ill.

Upon consideration of the records in the above-entitled proceedings, and of:

(1) Petition to Railway Labor Executives' Association, for leave to intervene and for reconsideration, dated February 16, 1955;

(2) Petition of protestant motor carriers, American Trucking Associations, Inc., and the Regular Common Carrier Conference thereof, for reconsideration of the report of the Commission herein, dated February 16, 1955;

(3) Reply (resistance) of applicant and interveners in (2) above;

(4) Petition of applicant and certain interveners for interpretation of present certificate in No. MC-29130 (Sub-No. 2), or in the alternative, for modification of the report of the Commission in the title proceeding, dated May 16, 1955;

(5) Reply of protestant motor carriers, American Trucking Associations, Inc., and the Regular Common Carrier Conference thereof, to (4) above, dated May 26, 1955;

(6) Reply of Railway Labor Executives' Association; to (4) above, dated May 26, 1955;

and good cause appearing therefor:

It Is Ordered, That the Railway Labor Executives' Association be, and it is hereby, permitted to intervene in said proceedings with the right to appear and participate in all further proceedings therein, and that its petition in all other respects be, and it is hereby, denied, for the reason set forth in the next succeeding paragraph;

It Is Further Ordered, That the petition in (2) above be, and it is hereby, denied, for the reason that the evidence adequately justifies the conclusions and findings in the report and order of November 22, 1954;

It Is Further Ordered, That the petition in (4) above be, and it is hereby, denied, for the reason that the relief sought is not waranted.

By the Commission.

(Seal)

Harold D. McCoy,
Secretary.

APPENDIX D

Order

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C. on the 9th day of September, A. D., 1955.

No. MC-29130 (Sub-No. 70)

The Rock Island Motor Transit Company Common Carrier Application
(Chicago, Ill.)

Upon consideration of the record in the above-entitled proceeding, and of:

(1) Petition of the Brotherhood of Railroad Trainmen, dated June 30, 1955, for leave to intervene;

(2) Petition of the Brotherhood of Railroad Trainmen, dated June 30, 1955, for reconsideration;

(3) Request of applicant for waiver of Rule 23 and reply to both petitions, filed July 22, 1955;

(4) Petition of the Order of Railway Conductors and Brakemen of America, dated August 17, 1955, for leave to intervene;

and good cause appearing therefor:

It Is Ordered, That said petitioners, the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen of America, be, and they are hereby, permitted to intervene in said proceeding with the right to appear and participate in all further proceedings herein;

It Is Further Ordered, That said late-tendered reply of applicant be, and it is hereby, filed;

It Is Further Ordered, That said petition for reconsideration in (2) above be, and it is hereby, denied, for the reason that other petitions seeking like relief were denied on July 6, 1955.

By the Commission.

(Seal)

Harold D. McCoy,
Secretary.

Supreme Court of the United States

October Term 1955

No. 973

RAILWAY LABOR EXECUTIVES' ASSOCIATION, ET AL., *Appellants,*

v.

UNITED STATES OF AMERICA AND INTERSTATE COMMERCE COMMISSION, ET AL., *Appellees.*

On Appeal From the United States District Court for the District of Columbia

REPLY OF APPELLANTS TO MOTIONS TO AFFIRM

Now come the appellants in the above-entitled cause, the Railway Labor Executives' Association, et al., pursuant to Rule 16(3) of the Revised Rules of this Court to reply to the motions of the appellees, the Interstate Commerce Commission and the Rock Island Motor Transit Company, et al., to affirm the judgment of the District Court.[1]

[1] The motions are also addressed to the appeal of American Trucking Associations, Inc., et al. in Case No. 961. The principal appellee, the United States of America, which was a required statutory defendant in the suit below, has not filed such a motion.

I.

THE COMMISSION'S ORDERS CONSTITUTE AN INVALID ATTEMPT TO REMOVE THE CONDITIONS IMPOSED ON MOTOR TRANSIT'S OPERATIONS PURSUANT TO THE STATUTORY REQUIREMENTS OF SECTION 213 AND SECTION 5(2)(b).

In point 1 of their Jurisdictional Statement the appellants contended that the Interstate Commerce Commission does not have power to remove entirely restrictions on the purchased operating authority of a wholly-owned subsidiary of a railroad imposed in acquisition proceedings in accordance with the statutory requirements of Sections 213 and 5(2)(b) of the Interstate Commerce Act (49 U.S.C. 313 and 5(2)(b)) without regard to such statutory provisions and without determining that the operations as thus unrestricted will enable the parent railroad to use the service by motor vehicle involved to public advantage in its own rail operations. (Jur. Statement, 3, 15-20.) Appellants further argued that the Commission's action in the present case constitutes such an invalid removal of statutory restrictions under the guise of a Section 207 certificate proceeding. (Jur. Statement, 12-20.)

The interventor-appellees, the Rock Island Motor Transit Co., et al., make no effort in their motion for affirmance to answer this contention. The Interstate Commerce Commission in its motion meets this basic issue only by a brief half-hearted answer in a footnote. (Motion of I.C.C., 18, footnote 1.) This failure of the two appellees to deal with appellants' contention, and the equal failure of the District Court in its opinion to deal with the issue, strongly suggests that there is no adequate answer and that the Commission's orders involve a clear effort to evade the statute.

In its footnote the Commission states that the argument of the appellants is merely another way of contending that regardless of the need for transportation, a rail subsidiary may never be authorized to perform motor carrier service which is not auxiliary to and supplemental of the rail service of its parent. This characterization of appellants' argument is obviously erroneous.

The Commission's footnote omits the all important fact that appellants' argument is addressed only to operations acquired subject to Commission approval under Section 213 and Section 5(2)(b) and is applicable whatever may be the interpretation of Section 207 in a bona fide new route case involving a rail subsidiary. Appellants' point is simply that the agency cannot today permit a rail subsidiary to acquire motor carrier routes subject to the limitations of Section 5(2)(b) and tomorrow turn around and remove those limitations without regard to such statutory requirements under the guise of a certificate proceeding. Pursuant to the decision of this Court in *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951), the Commission can vary from time to time the specific restrictions imposed upon purchased routes to accomplish the statutory objective, but must at all times ensure that the parent railroad will be using the motor service involved to public advantage in its own rail operations.[2]

---

[2] The District Court pointed out in its opinion that it was agreed that the requirement that the motor service involved be used in the operation of the railroad applicant means that the service must be auxiliary or supplementary to the rail service. (Appellants' Jur. Statement, Appendix B, 11a). Also see *Texas & Pacific M. Transport Co.—Com. Car. App.*, 41 M.C.C. 721 (1943). As this Court observed in *United States* v. *Rock Island Motor Transit Com-*

The Commission does not contend in its motion, nor has it ever argued, that it has power to authorize the acquisition of motor carrier operations of a rail subsidiary without meeting the requirements of the proviso of Section 5(2)(b). It merely argues that it has the power under Section 207 to grant new or additional motor carrier operations to a rail subsidiary without regard to the limitations of that proviso. The issue before the Court then simply boils down to a question of whether the removal of all Section 5(2)(b) and Section 213 limitations previously imposed upon operations of a rail motor carrier subsidiary in acquisition proceedings, constitutes the grant of new or additional operations[3] merely because the application therefor is labelled an application for a certificate under Section 207 rather than a request to reopen the acquisition proceedings. Appellants contend that it clearly does not.

II.

THE NATIONAL TRANSPORTATION POLICY AND THE REQUIREMENTS OF SECTION 5(2)(b) ARE LIMITATIONS ON THE PUBLIC CONVENIENCE AND NECESSITY UNDER SECTION 207.

In point 2 of their Jurisdictional Statement, appellants contended that the National Transportation Policy and the proviso of Section 5(2)(b) are limitations upon the scope of the public convenience and

---

pany, 340 U.S. 419, 442 (1951), the Commission has varied the specific conditions imposed to meet the requirements of the proviso of Section 5(2)(b). However, this leeway does not enable the agency to ignore or wipe out such requirements as it has done in this case where it does not purport to have met them.

[3] The motion of Rock Island Motor Transit Co. et al., p. 4, clearly shows that the operations involved were the same as those already acquired under Sections 213 and 5(2)(b) as does the motion of the Commission, p. 7.

necessity under Section 207 so that in any event the Commission erred in disregarding these limitations in acting on Motor Transit's application.[4] In its motion to affirm the judgment of the District Court, the Commission contends that it has discretion in applying such requirements under Section 207 and that this construction is supported by the language, history, and consistent construction of the statute. (I.C.C. Motion, 10-18.)

The Commission argues that its present construction of Section 207 is supported by the failure of Congress in 1938 to avail itself of the opportunity ~~in 1938~~ to write the proviso of Section 5(2)(b) into Section 207. This opportunity came, says the Commission, in the form of a proposed amendment to Section 207 by Senator Shipstead which was withdrawn to prevent controversy. (I.C.C. Motion, 13.) However, the Commission has failed to inform the Court that Senator Shipstead withdrew his proposed amendment only after statements by Commissioner Eastman that it was the duty of the Commission to apply the restrictive proviso in Section 207 cases and upon the expressed understanding of the Senator that the amendment was unnecessary. These facts are clearly shown by the record of the hearings before the 75th Congress on S. 3606 at pages 26-31, 141.[5] Commissioner Eastman

[4] In their motion to affirm the Rock Island Motor Transit Co. et al., erroneously state (pp. 8, 9) that appellants contend that the Commission is prohibited from issuing motor carrier authority to railroads or their subsidiaries. Appellants have never so contended. Since the intervenor-appellees' legal argument is based on this false premise (pp. 8-11), it is totally irrelevant.

[5] Hearings before a Subcommittee of the Committee on Interstate Commerce of the United States Senate, 75th Congress, on S. 3606.

first indicated that the proposed amendment was merely an expression of existing law: (pp. 27-31)[6]

> "Commissioner Eastman . . . We have indicated that it seems to us consistent with the policy now reflected in section 213(a), paragraph 1; that his amendment should be added to section 207(a).
>
> * * * * * *
>
> "As a matter of fact, I think it could be argued with a great deal of force that in interpreting and applying the provisions of section 207(a) as it now stands, the Commission should read the act as a whole and take cognizance of this policy which is now reflected in section 213(a)(1).
>
> * * * * * *
>
> ". . . If I had to pass on the issue now, I should say that in administering the provisions of section 207, it would be the duty of the Commission to read the act as a whole and to apply the same policy with respect to the extension of operations of a railroad-controlled motor carrier as is provided by the proviso of section 213.
>
> "Senator Johnson of Colorado: Under the present law?
>
> "Commissioner Eastman: Under the present law."

On this basis Senator Shipstead then withdrew his proposal: (page 141)

> "Senator Shipstead: . . . In view of the statement made by Commissioner Eastman for the

[6] The letter of the Commission to the subcommittee stated that "in good logic" it could see no reason why the proof requirements as to a railroad subsidiary should be any different in a certificate proceeding than in an acquisition case. The letter further stated that possibly, reading the act as a whole, it should be so read as it then stood, but since the matter was open to argument, the agency did not object to the amendment. (pp. 31, 31)

Commission as to their view of this matter, and also his personal view, that he thinks the provision of this amendment is already in the law, and that . . .

"Senator Johnson of Colorado (interposing) . . . that is, you mean the Shipstead amendment?

"Senator Shipstead: Yes; that it is already in the law, and evidently he considers it unnecessary at the present time. So, in order to save the time of the sub-committee, and in order to facilitate advancing the Commission's recommendations for amendments to the Motor Carrier Act, I withdraw, for the present at least, the amendment I offered. I think we will stand on the Commission's point of view, and the personal view of Commissioner Eastman."

These statements of Commissioner Eastman and Senator Shipstead show the Commission's argument to be wholly without merit.

The Commission also argues that its present interpretation is consistent with its past administrative practice. (I.C.C. Motion, 12-16.) The short answer to such contention is that this Court has expressly found to the contrary. In *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951), the Court stated at page 428:

"Although Section 207, providing for the issuance of certificates of convenience and necessity, has no clause requiring special justification for railroads to receive motor-carrier operating rights, such as appears in the proviso in former Section 213, present Section 5, the Commission applies the rules of the National Transportation Policy so as to read the proviso into Section 207 in order to preserve the inherent advantages of motor-carrier service."

Likewise, the Court in *United States* v. *Texas and Pacific Motor Transport Company,* 340 U.S. 450 (1951), stated as follows: (pp. 458 and 459)

> "This proceeding involves certificates for new routes under Section 207. No such certificates or applications were in that case [i.e., the Rock Island case]. The opinion, however, considered the Commission's practice in Section 207 proceedings and stated that it was the same as in Sections 5 and 213 acquisition proceedings."

These conclusions of the Court leave no room for argument as to what the Commission's past construction of the statute has been.

Finally, the Commission argues that the inclusion in Section 207 of a specific limitation that action thereunder is subject to Section 210 and the omission therefrom of any reference to Section 5(2)(b) presumably means that Congress did not intend that the restrictions of the latter be imported into Section 207. (I.C.C. Motion, 11, 12.) In so arguing the Commission ignores the specific language of the National Transportation Policy that all provisions of the Interstate Commerce Act shall be administered and enforced with a view to carrying out such policy, which, as this Court found in the first *Rock Island* case, the Commission understood required that motor operations of railroads and their affiliates be auxiliary to and supplemental of train service.[7] The Commission has also apparently forgot its argument to the Court in that case and the companion case of *United States* v. *Texas & Pacific Motor Transport Co.,* 340 U.S. 450, found at page 53 of its brief in the latter proceeding:

---

[7] *United States* v. *Rock Island Motor Transit Company,* 340 U.S. 419, 422.

"To be sure, section 207 does not contain a provision like that in section 213 (now sec. 5), imposing restrictions and requiring special findings in instances where the applicants are railroad subsidiaries. * * * nevertheless, the purpose of Congress' transportation policy, declared when enacting the Motor Carrier Act, refute any inference that Congress, while closing the door to railroad suppression of motor carrier competition by means of acquiring through a subsidiary existing motor carrier operations, at the same time left open the unfettered opportunity to do the same thing by means of obtaining through a subsidiary authority to institute new motor carrier operations. So far as opportunity for suppression of competition is concerned, there is little difference, particularly in the motor carrier field, between the opportunity afforded through the control by a railroad of an already existing motor carrier and that afforded by control of one newly created."

CONCLUSION.

For the foregoing reasons, the motions to affirm the judgment of the District Court should be denied.

No. 8

RAILWAY LABOR EXECUTIVES' ASSOCIATION, ET AL.,
Appellants,

v.

UNITED STATES OF AMERICA, INTERSTATE COMMERCE COMMISSION, ET AL.,
Appellees.

On Appeal From the United States District Court for the District of Columbia

---

BRIEF FOR APPELLANTS RAILWAY LABOR EXECUTIVES' ASSOCIATION, ET AL.

OPINIONS BELOW

The opinion of the District Court (R. 192-195) is reported at 144 F. Supp. 365. The opinion of the Interstate Commerce Commission (R. 93-121) is reported at 63 M.C.C. 91.

JURISDICTION

The judgment of the District Court was entered on January 27, 1956 (R. 195). Notice of appeal was filed in the District Court by the Railway Labor Executives' Association, *et al.*, on March 26, 1956 (R. 204),

and the appeal in Case No. 8 was docketed in this Court on May 24, 1956. The Interstate Commerce Commission on June 20, 1956, filed a motion to affirm the judgment below and on October 15, 1956, this Court noted probable jurisdiction and consolidated the appeal with Case No. 6 for hearing (R. 204). The jurisdiction of the Court to review the judgment of the District Court by direct appeal is conferred by Sections 1253 and 2101(b) of the Judicial Code [28 U.S.C. 1253 and 2101(b)].

QUESTIONS PRESENTED

This appeal presents these questions:

1. Does the Commission have authority under Section 207(a) of the Interstate Commerce Act to grant a railroad subsidiary unlimited motor carrier operating rights without restriction to services which are auxiliary to or supplemental of the parent railroad's train operations?

2. Assuming, *arguendo,* that the Commission does have the authority stated in question 1; the further question is presented as to whether the Commission has the authority under Section 207(a) to grant a railroad subsidiary unlimited operating rights in circumstances where:

(a) such rights cover the identical basic routes and operations previously acquired by the rail subsidiary from an independent motor carrier with Commission approval subject to restrictions limiting services thereunder to those which are auxiliary to or supplemental of the parent railroad's train service pursuant to the requirement of Section 5(2)(b) of the Interstate Commerce Act; and

(b) the only purpose of the 207 proceeding and effect of the Commission's action therein is to remove the restrictions previously imposed without regard to the statutory requirements under which they were imposed and without finding that the unlimited service thus authorized will enable the parent railroad to use motor vehicles to public advantage in its own train operations.

3. The Court has invited appellants to address themselves to the further question of their standing to sue.

STATUTES INVOLVED

This appeal involves the National Transportation Policy [49 U.S.C., preceding Section 1], Sections 5(2)-(a) and (b), 205(j), 206, 207(a), 208], and former Section 213(a)(1) of the Interstate Commerce Act, as amended [49 U.S.C. 5(2)(a) and (b), 306, 307(a)-(1), 308(a) and 313(a)(1)]. These statutory provisions are set forth in Appendix A hereto.

STATEMENT

The orders of the Interstate Commerce Commission which appellants seek to void granted certificate authority to the Rock Island Motor Transit Company (hereinafter called "Motor Transit", a wholly-owned subsidiary of the Chicago, Rock Island and Pacific Railroad (hereinafter called "Rock Island Railroad")[1] to transport by motor vehicle general commodities, with certain exceptions, between various points in Illinois, Iowa and Nebraska (R. 116, 122). The orders contained no restrictions limiting the trucking operations of Motor Transit to service auxiliary to or supplemental of the parent railroad's train serv-

[1] R. 3, 95.

ice. It is the position of the appellants that such restrictions were required in this case by the Interstate Commerce Act.

It was agreed before the District Court that the statutory requirement that the motor carrier service be used in the operation of the railroad means, in its practical application by the Commission, that such service be auxiliary to or supplemental of the rail operation (R. 193). See also *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 422, *reh. den.*, 341 U.S. 906.

At the time the Commission orders were issued, Motor Transit already held certificate authority from the Commission to conduct motor carrier operations over the routes in question (R. 3-10, 96). Such authority had been acquired by Motor Transit pursuant to Commission approval under former Section 213 and present Section 5(2)(b) of the Interstate Commerce Act for the company to purchase the operating rights and properties of two independent motor carriers subject to restrictions designed to ensure that Motor Carrier's operation of the purchased routes would be auxiliary to or supplemental of the Rock Island's train service. These acquisitions, from which the Commission removed the restrictions in the orders at issue, were as follows:

(1) The Commission orders under review authorized Motor Transit to operate on an unrestricted basis between Omaha, Nebraska, and Silvis, Illinois, over U. S. Highway 6 and Illinois Highway 92 via certain intermediate points, and to serve Cedar Rapids from Iowa City which is located on U. S. Highway 6 (R. 116). Motor Transit purchased the operating rights for this route from the White Line Motor Freight Company

in 1937.[2] The Commission approved the purchase pursuant to then Section 213 of the Interstate Commerce Act, which required the agency to find, *inter alia*, that the transaction would promote the public interest by enabling the parent Rock Island Railroad to use the proposed motor service to public advantage in the railroad's own operations. *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 5 M.C.C. 451 (1938). The Commission made the necessary statutory finding upon the basis of representations by Motor Transit that it would provide a coordinated rail-motor service over the purchased routes and thus improve the parent Rock Island Railroad's service to the public (2d. at p. 455). In addition, in order to comply with the statutory requirement, the Commission required Motor Transit to abandon parts of the White Line purchase not adjacent to the line of the Rock Island Railroad and imposed the following limitations in the certificate issued pursuant to its approval: (a) that Motor Transit should not render service from or to, or interchange traffic at, any point other than a station on the line of the parent railroad; (b) that the operating authority acquired was subject to such further limitations, restrictions, or modifications as the Commission might find necessary to impose or make in order to ensure that the motor trucking operation be auxiliary to or supplemental of the railroad's train service and not unduly restrain competition. Subsequently, the Commission, acting upon its own motion pursuant to the prior reservation of jurisdiction, reopened the proceeding and imposed additional restrictions upon the

[2] The vendor at the time of the acquisition was in process of perfecting the operating rights it sold to Motor Transit under Section 206(a) of the Interstate Commerce Act, 49 U.S.C. 306(a).

operating rights acquired by Motor Transit from the White Line in order to ensure that Motor Transit's operations thereunder were auxiliary to or supplemental of the parent railroad's train service.[3] *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 40 M.C.C. 457 (1946); 55 M.C.C. 567 (1949). This Court sustained the validity of the Commission's action. *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951), *reh. den.*, 341 U.S. 906.

(2) The orders here involved also granted Motor Transit unrestricted operating rights (a) between Harlan, Iowa, and Omaha, Nebraska, over Iowa High-

---

[3] The specific conditions imposed were:

1. The service to be performed by the Rock Island Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of the Chicago, Rock Island and Pacific Railway Company.

2. The Rock Island Motor Transit Company shall not render any service to, or from or interchange traffic at any point not a station on the rail line of The Chicago, Rock Island and Pacific Railway Company.

3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebraska, Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Illinois.

4. All contractual arrangements between The Rock Island Motor Transit Company and The Chicago, Rock Island and Pacific Railway Company shall be reported and shall be subject to revision, if and as it is found to be necessary in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as the Commission in the future, may find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

way 64 and U. S. Highway 6, via various intermediate points, and (b) between Avoca, Iowa, and Atlantic, Iowa, over U. S. Highways 59 and 6 and Iowa Highway 83 (R. 117). Motor Transit purchased the operating rights for this route from Messrs. D. H. Frederickson and J. H. Frederickson in 1944. The Commission approved the purchase pursuant to Section 5(2)(b) of the Interstate Commerce Act, which section had replaced Section 213(a)[4] and which also required the Commission to find that the purchase would enable the parent Rock Island to use the trucking rights involved to public advantage in its own operations. *Rock Island Motor Transit—Purchase—Frederickson*, 34 M.C.C. 824 (1944). The Commission in its original order approving the purchase did not make any findings or impose any restrictions to meet this statutory requirement. However, prior to the issuance of a certificate covering the Frederickson rights, the agency reopened the acquisition proceeding as part of its reconsideration of the White Line Purchase, *supra*, p. 6, and in such reconsidered proceedings imposed the same restrictions upon the Frederickson rights as it did upon the White Line rights. This Court also upheld the validity of the Frederickson conditions. *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951), *reh. den.*, 341 U.S. 906.

These specific conditions were imposed by the Commission on the White Line and the Frederickson pur-

[4] Section 213 was repealed by the Transportation Act of 1940, 54 Stat. 924, Section 21(e), and its substance was carried forward into Section 5(2)(b) of the Interstate Commerce Act. There is a slight difference in wording in the proviso as found in Section 213(a)(1) and Section 5(2)(b). The Commission has held, however, that this difference is of no significance. *Scott Bros. Inc.—Central—W. G. Corp.*, 37 M.C.C. 225 (1941).

chases because it was clear that contrary to the Motor Transit's original representations to the Commission and to the specific and unambiguous limitations of Section 5(2)(b) of the Interstate Commerce Act the purchased routes had been operated without regard to their relationship to the parent railroad's services. This fact was brought out in the record of the present proceeding in the testimony of Motor Transit's officers that "Although Motor Transit is a subsidiary of Rock Island, it operated prior to September 11, 1951, under permanent authority in substantially the same manner as any independent motor carrier transporting less-than-truckload and truckloads of general freight over practically all of its authorized routes in Iowa" (R. 11). Thus, when this Court sustained the Commission's action in the *Rock Island* case as merely the exercise of a statutory authority to limit motor carrier operations of rail subsidiaries, Motor Transit was at long last faced with the necessity of complying with the statutory requirements it had theretofore ignored. The device hit upon to avoid these statutory requirements was to file an application for the same routes under Section 207 of the Interstate Commerce Act [49 U.S.C. 307] without the restrictions. This advice was given by new counsel hired to handle the matter as shown by the following findings of the Examiner in the record before the Court (R. 74):

> "Thereafter, Motor Transit changed counsel with respect to this matter and he advised Motor Transit to seek limited temporary authority and to file an application under Section 207 of the act for permanent authority."

Motor Transit followed this advice and on October 26, 1951, filed an application, as subsequently amended

(R. 2), for the same routes it already had without the restrictions imposed upon operations over such routes by the Commission's certificate of September 11, 1951 (R. 10).

This application was clearly nothing more than a request to remove the restrictions imposed on its operations in accordance with the requirements of Section 5(2)(b) of the Interstate Commerce Act.

Both the Examiner and the Commission recognized that Motor Transit was in the same legal situation under its application as the carrier was in 1947 during the reopened acquisition proceedings and found that its application was simply the means to give it an opportunity to introduce evidence on the necessity of the specific conditions which it had previously declined to do in the reopened proceedings in favor of a challenge to the Commission's authority. This recognition is evidenced by the following Examiner's finding on the nature of Motor Transit's Section 207 application (R. 74):

> "Thus, after the passage of approximately four years, Motor Transit concluded to do substantially what it had an opportunity to do in October, 1947, namely to introduce additional evidence in the reopened proceeding."

The Commission repeated this finding in *haec verba* (R. 109).

Thus both the Examiner and the Commission recognized what was the obvious fact, *i.e.*, that the proceedings on the new application were merely another phase of the original acquisition proceedings and that the issues before the agency were those with which it was faced in the reopened acquisition case in 1947. There-

fore, Motor Carrier's application should have been processed in accordance with such findings and the requirements of Section 5(2)(b) so that the restrictions should have been removed only if the Commission could validly find, which it obviously could not, that the resulting unrestricted operation would enable the Rock Island Railroad to use Motor Transit's services to public advantage in its own train operations.

However, the Commission closed its eyes to its own findings as to the true nature of the situation and treated the application as if it involved an application under Section 207 for new routes not previously operated by the carrier and on this basis held that it was not legally required to meet the standards of Section 5(2)(b), because the limitations found in that section on the operation of truck routes by railroads or railroad subsidiaries are not found in Section 207 (R. 105). Thus freed in its view of the statutory limitations by this extraordinary gambit, the Commission went on to find that it would not as a matter of policy impose any restrictions designed to keep Motor Transit operations auxiliary to or supplemental of the railroad's train service (R. 105-116). It therefore granted Motor Transit's request solely upon the basis of findings as to the public convenience and necessity (R. 116) and determined to issue to the carrier an unrestricted certificate covering the routes in question which would permit it to conduct an independent trucking operation wholly unrelated to its parent railroad's services.[5]

The Commission did not say what became of its certificate of September 11, 1951, which is still outstanding and which limits Motor Transit's operations over

[5] Two conditions were imposed which in no way limited the scope of operations under the certificate (R. 117).

the routes to those auxiliary to or supplemental of its parent railroad's train service.[6]

On July 6, 1955, and September 9, 1955, the Commission reaffirmed this action and rejected the petitions for reconsideration filed by various motor carriers, which are appellants in Case No. 6, and by the railway labor organizations, appellants in Case No. 8 (R. 122, 137, 161).

Thereafter, the motor carrier protestants, the American Trucking Associations, Inc., *et al.*, filed their complaint in the District Court on June 19, 1956, asking for a permanent injunction against the effectiveness of the Commission's orders (R. 85). The appellants filed motions to intervene in the case as parties-plaintiff and asked for permission to file complaints requesting that the Commission's orders be set aside and enjoined (R. 140, 157). These motions, which were not opposed, were granted by orders of the District Court entered on October 24, 1955, and the complaints of the intervening plaintiffs were filed the same day (R. 171, 172).

The appellants argued to the District Court that the Commission had erred as a matter of law in granting Motor Transit unrestricted operating rights without finding that operations pursuant thereto would enable the parent Rock Island Railroad to use such service by motor vehicle to public advantage in the railroad's own operations (R. 148, 150, 165-167). The District Court rejected this argument on the ground that the

---

[6] During the pendency of this latest phase of the *Rock Island* case, Motor Transit has operated over the routes involved under a temporary authority subject to maximum weight limitations and "keypoint" restrictions.

Commission's action involved only the issuance of a certificate under Section 207(a) of the Interstate Commerce Act, which does not in terms require the finding alleged to be necessary (R. 194)[7] The District Court therefore affirmed the Commission's orders against the complaints of the appellants and entered judgment for the Commission and the United States (R. 195).

The District Court's opinion gave no consideration to the fact that the application of Motor Transit to the Commission was in substance a request to remove restrictions from certificates issued to it pursuant to acquisition proceedings under former Section 213 and present Section 5(2)(b) of the Interstate Commerce Act. Nor does such opinion reflect any consideration of the Commission's long established practice of treating applications to the agency by railroads or by railroad subsidiaries for motor carrier operating authority under Section 207(a) of the Interstate Commerce Act as governed by the same basic considerations as applications by such parties made under Section 5(2)(b) of that Act (R. 192-195).

SUMMARY OF ARGUMENT

1. This is th first time to our knowledge when the Commission has urged to this Court that it has the discretion under the Interstate Commerce Act to grant a railroad subsidiary authority to conduct unrestricted motor carrier operations without regard to the limitations expressed in Section 5(2)(b) of the Interstate Commerce Act and contained in the National Trans-

[7] The District Court also dealt with certain contentions of plaintiffs motor carriers, not involved in the complaints of the railway labor organizations, that the evidence before the Commission did not support the agency's findings (R. 194, 195).

portation Policy simply because the applications were filed pursuant to Section 207 of the Act governing the issuance of certificates of public convenience and necessity. By such decision the Commission has reversed a consistent practice to the contrary of over twenty years standing and is taking action which is not only contrary to Congressional intent but is completely incompatible with previous decisions of this Court which have examined and approved the heretofore contrary practice of the Commission. *United States* v. *Rock Island Motor Transit Co.*, 340 U.S. 419 (1951); *United States* v. *Texas & Pacific Motor Transit Co.*, 340 U.S. 450 (1951); *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60 (1945); *American Trucking Assns., Inc.* v. *United States*, 326 U.S. 77 (1945).

2. If the Commission's decision is permitted to stand, the circumstances under which it was rendered in the instant case clearly disclose that the statutory restrictions contained in the proviso to Section 5(2)-(b) of the Interstate Commerce Act will become meaningless. It is undisputed that the only purpose of the application by Rock Island Motor Transit Company under Section 207 was to obtain unrestricted motor carrier operating authority by ridding itself of restrictions and conditions previously imposed upon it by the Commission in acquisition proceedings covering the identical basic routes and operations here involved and subsequently upheld as valid statutory requirements by this Court in *United States* v. *Rock Island Motor Transit Co.* 340 U.S. 419. Hence it is clear that although the application approved by the Commission was in form one for the grant of a new certificate, in substance it was obviously a deliberate evasion of the statutory requirements of Section 5(2)(b).

The Commission's sanction of such a manifest circumvention of Congressional intent is a patent distortion of the statutory purpose with regard to railroad-controlled operations in the motor carrier field. Unless the lower court's affirmance of the Commission's decision is reversed by this Court, a chaotic condition could immediately develop. Under the Commission's decision, every railroad or railroad subsidiary now conducting motor carrier operations acquired by purchase under Section 5(2) of the Act and subject to specific limitations restricting such operations to serve which is auxiliary to or supplemental of the railroad's train operations could, through the mere filing of an application under Section 207, obtain from the Commission a certificate authorizing it to operate over the same routes without restriction.

3. The railway labor appellants have standing to contest the validity of the Commission's orders before the courts. They had a legal interest which entitled them to participate as a party in interest before the Interstate Commerce Commission pursuant to the provisions of Section 205(e) and Section 17(11) of the Interstate Commerce Act, 49 U.S.C. §§ 305(e) and 17(11), and they were permitted to intervene therein by order of the Commission. The stated reason for their intervention was the threat to the security of their jobs and working conditions with the Rock Island Railroad by the removal of previously imposed restrictions which confined the railroad's operations to those integrated with rail service rather than an unrestricted motor service substituting trucks for rail operations. The Commission's grant of appellants' participation as a party in interest was proper. See *Brotherhood of Railroad Trainmen* v. *Baltimore & Ohio Ry. Co.*, 331 U.S. 519.

Appellants were also entitled to test the validity of the Commission's action in the District Court as a matter of legal right. Section 2323 of the Judicial Code, 28 U.S.C.A. § 2323. This section provides that any party in interest to the proceeding before the Interstate Commerce Commission in which an order or requirement is made may appear as a party on his own motion and as of right in any action involving the validity of such Commission order or requirement. The right of appellants to protest the Commission's action in the court below is also clearly established by this Court's decision in *Baltimore & Ohio Ry. Co.* v. *United States*, 264 U.S. 258, 268.

The appellants also clearly have a sufficient interest to appeal the judgment of the District Court to this Court. *Baltimore & Ohio Ry. Co.* v. *United States*, 264 U.S. 258, 268. That appellants are the proper parties to represent the interests of the Rock Island employees has already been recognized by this Court in other actions testing the validity of Commission action. *Interstate Commerce Commission* v. *Railway Labor Executives' Association*, 315 U.S. 373; *Railway Labor Executives' Association* v. *United States*, 339 U.S. 142.

ARGUMENT

I

IN AUTHORIZING THE PERFORMANCE OF MOTOR CARRIER SERVICE BY RAILROADS OR THEIR SUBSIDIARIES PURSUANT TO APPLICATIONS FILED UNDER SECTION 207 OF THE INTERSTATE COMMERCE ACT, THE COMMISSION IS REQUIRED BY STATUTE TO LIMIT THE OPERATIONS TO THOSE WHICH ARE AUXILIARY TO OR SUPPLEMENTAL OF THE APPLICANT'S RAIL SERVICE.

The Commission's determination that the ability of a railroad subsidiary to meet the limitations contained in the proviso to Section 5(2)(b) of the Interstate Commerce Act is not a necessary requirement in the

adjudication of an application of such subsidiary for a certificate of public convenience and necessity under Section 207(a) is contrary to the express policy of the statute, the Commission's past application of that policy, and the legislative history of the statutory provisions.

The National Transportation Policy [49 U.S.C., preceding section 1] requires, *inter alia*, the recognition and preservation of the inherent advantages of each mode of transportation covered by the Interstate Commerce Act. The Commission has found that the achievement of this policy, as applied to motor carrier operations by railroads and railroad subsidiaries, requires the restriction of such operations to those which are auxiliary to or supplemental of the rail service of the railroad involved. *Pennsylvania Truck Lines, Inc.—Control—Barker*, 1 M.C.C. 101 (1936), 5 M.C.C. 9 (1937); *Kansas City Southern Transport Company, Inc.—Com. Car. App.*, 10 M.C.C. 21 (1938). In the present case the Commission takes the position that it need not apply this Congressional purpose because Section 207(a) does not contain the express restrictions contained in the proviso of Section 5(2)(b). However, Congress did not so limit its purpose. The last sentence of the National Transportation Policy states that, "All of the provisions of this Act shall be administered and enforced with a view to carrying out the above declaration of policy." The effect of this language is to require the Commission to carry out the Congressional purpose to the same extent in the administration of Section 207(a) as it does in the administration of Section 5(2)(b). Congress has written limitations into Section 207(a) upon railrload entry into motor carrier service just as plainly and clearly

as if it had inserted into that section the actual words appearing in Section 5(2)(b).

The requirement of a uniform administration of the certificate and acquisition provisions of the Interstate Commerce Act and a correlation of the two has been recognized by the Commission and by the courts. In *Associated Transport, Inc.—Purchase—Russell*, 55 M.C.C. 177 (1948), the Commission declared (p. 183):

> "Although the facts dealt with are dissimilar the same National Transportation Policy applies and the same basic considerations govern, in the disposition of applications under section 5 and section 207 of the Act."

To the same effect is the statement of this Court in *Interstate Commerce Commission* v. *Railway Labor Executives' Association*, 315 U.S. 373, 376, 377 (1942), that the Commission must carry out the purposes of the statute in applying the phrase "public convenience and necessity" to the same extent that it does in acting under Section 5.

Moreover, the Commission has implemented this construction of the statute by its long and consistent uniform application of the auxiliary or supplemental restrictions to cases both under Section 5 and Section 207. In the earlier case involving Motor Transit, *Rock Island Motor Transit Company—Purchase—White Line M. Frt.*, 40 M.C.C. 457 (1946), the Commission reviewed its past application in Section 207 proceedings of the requirements of Section 213 (pp. 461-462). It concluded (p. 468) that Congress, in re-enacting Section 213 into Section 5(2) in 1940, had given its approval of this established administrative practice. Finally, the Commission categorically stated that the

been recognized by this Court as the representative of employees who are members of its constituent organizations in actions testing the validity of Commission action. *Interstate Commerce Commission* v. *Railway Labor Executives' Association*, 315 U.S. 373 (1942); *Railway Labor Executives' Association* v. *United States*, 339 U.S. 142 (1950). It is admitted that members of the Association have agreements with the Rock Island on behalf of the employees of that carrier (R. 147, 174, 186). It is also admitted that the other intervening railway labor organizations before the Commission which are appellants here represent employees of the Rock Island under the Railway Labor Act (R. 163, 177, 189).

The Commission recognized the clear standing of the appellants to participate as parties in the proceedings before the agency upon behalf of the Rock Island's employees and granted their petitions to intervene (R. 122, 151, 161). No issue was raised in the Court below as to the validity of this action.

International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers
International Brotherhood of Electrical Workers
International Brotherhood of Firemen & Oilers
International Organization Masters, Mates & Pilots of America

Order of Railway Conductors and Brakemen
The Order of Railroad Telegraphers
Railway Employes' Department, AFL-CIO
Railroad Yardmasters of America
Sheet Metal Workers' International Association
Switchmen's Union of North America

requirements of the National Transportation Policy required the same treatment for railroad or railroad-controlled applicants in Section 207 cases as in Section 5 cases. It said (p. 471):

> "From a regulatory standpoint motor-carrier operations conducted by a railroad affiliate should be the same whether the authority under which they are conducted was acquired by an application under Section 207 or by purchase . . ."

Such Commission application of the requirements of Section 5(2)(b) in Section 207 proceedings has been recognized and approved by this Court in both *United State* v. *Rock Island Motor Transit Co.*, 340 U.S. 419, 450 (1951), and in *United States* v. *Texas and Pacific Motor Transport Co.*, 340 U.S. 450, 459 (1951).

The Commission has argued that its present interpretation is consistent with its past administrative practice. The short answer to such contention is that this Court has expressly found to the contrary. In *United States* v. *Rock Island Motor Transit Company*, 340 U.S. 419 (1951), the Court stated (p. 428):

> "Although Section 207, providing for the issuance of certificates of convenience and necessity, has no clause requiring special justification for railroads to receive motor-carrier operating rights, such as appears in the proviso in former Section 213, present Section 5, the Commission applies the rules of the National Transportation Policy so as to read the proviso into Section 207 in order to preserve the inherent advantages of motor-carrier service."

Also, in *United States* v. *Texas and Pacific Motor Transport Company*, 340 U.S. 450 (1951), the Court observed (pp. 458 and 459):

> "This proceeding involves certificates for new routes under Section 207. No such certificates or applications were in that case [i.e., the Rock Island case]. The opinion, however, considered the Commission's practice in Section 207 proceedings and stated that it was the same as in Sections 5 and 213 acquisition proceedings."

These conclusions of the Court leave no room for argument as to what the Commission's past construction of the statute has been.

The Commission's past practice and interpretation of the statute also received the sanction of this Court in *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60 (1945), which involved an application under Section 207 for extension of motor carrier operating rights by a wholly owned subsidiary of the Pennsylvania Railroad Company. This Court upheld the Commission's action in granting a certificate which was restricted to services truly supplementary or auxiliary to the operations of the parent railroad. The Court reviewed the legislative history of the Motor Carrier Act of 1935 and concluded that railroads may operate trucks "in appropriate places." (pp. 66, 67.) The Court then went on to uphold the validity of the grant of a certificate to the railroad subsidiary and, in so doing, repeatedly emphasized the limited nature of the certificate and the coordinated rail-motor service provided.

In addition, the legislative history of Section 207 supports the conclusion that the standards of Section 5(2)(b) are a legal restriction upon an application of a railroad subsidiary under Section 207. In 1938 Senator Shipstead proposed an amendment to Section 207 which would have specifically written the limitations

B. The Action of the Commission Affected Legal Rights of Rock Island Employees Represented by Appellants Which Entitled Them to Test the Validity of That Action in the District Court.

Shortly after the Commission issued its order of July 6, 1955, denying reconsideration of its action in granting unrestricted operating rights to Motor Transit, the protesting motor carriers filed their complaint in the District Court (R. 85). On September 16, 1955, the appellant Association filed a motion to intervene in the court proceeding as a party plaintiff and for leave to file a complaint (R. 140). This motion alleged that the Association had a legal right to intervene in the case to contest the validity of the Commission's action under Section 2323 of the Judicial Code [28 U.S.C. 2323]; Section 10(a) of the Administrative Procedure Act [5 U.S.C. 1009(a)]; Section 17(11) and 205(g) of the Interstate Commerce Act [49 U.S.C. 17(11) and 305(g)]; and Rule 24 of the Federal Rules of Civil Procedure (R. 142, 143). This claim was unopposed and intervention was granted by the District Court (R. 171). The complaint of the Association, already lodged with the clerk of the Court, was filed pursuant to said order (R. 145, 171). The complaint listed in paragraph 3 thereof the member organizations of the Association (R. 146). It then alleged in paragraph 5 as follows (R. 146, 147):

> "5. Certain of the labor organizations listed in Paragraph No. 2 above, which are members of the Railway Labor Executives' Association, are the duly designated collective bargaining representatives under the Railway Labor Act for most of the employees of the Chicago, Rock Island and Pacific Railroad Company, the parent company of the Rock Island Motor Transit Company, and have agreements with said railroad carrier concerning

of Section 5(2)(b) into Section 207. The proposed amendment was withdrawn after Commissioner Eastman assured Senator Shipstead and the committee considering the amendment that it was the duty of the Commission to apply the restrictive proviso of Section 5(2)(b) in all Section 207 cases, and it was upon this express understanding that the amendment was considered unnecessary. These facts are clearly shown by the record of the hearings before the 75th Congress on S. 3606 at pp. 26-31, 141. Commissioner Eastman first indicated that the proposed amendment was merely an expression of existing law (pp. 27-31):[8]

> "Commissioner Eastman: . . . We have indicated that it seems to us consistent with the policy now reflected in section 213(a), paragraph 1; that his amendment should be added to section 207(a).
>
> * * * * *
>
> "As a matter of fact, I think it could be argued with a great deal of force that in interpreting and applying the provisions of section 207(a) as it now stands, the Commission should read the act as a whole and take cognizance of this policy which is now reflected in section 213(a)(1).
>
> * * * * *
>
> ". . . If I had to pass on the issue now, I should say that in administering the provisions of section 207, it would be the duty of the Commission to read the act as a whole and to apply the same pol-

[8] The letter of the Commission to the subcommittee dealing with the amendment stated that "in good logic" it could see no reason why the proof requirements as to a railroad subsidiary should be any different in a certificate proceeding than in an acquisition case. The letter further stated that possibly, reading the Act as a whole, it should be so read as it then stood, but since the matter was open to argument, the agency did not object to the amendment. (pp. 31, 32)

icy with respect to the extension of operations of a railroad-controlled motor carrier as is provided by the proviso of section 213.

"Senator Johnson of Colorado: Under the present law?

"Commissioner Eastman: Under the present law."

On this basis Senator Shipstead then withdrew his proposal (p. 141):

"Senator Shipstead: . . . In view of the statement made by Commissioner Eastman for the Commission as to their view of this matter, and also his personal view, that he thinks the provision of this amendment is already in the law, and that . . .

"Senator Johnson of Colorado (interposing) . . . that is, you mean the Shipstead amendment?

"Senator Shipstead: Yes; that it is already in the law, and evidently he considers it unnecessary at the present time. So, in order to save the time of the sub-committee, and in order to facilitate advancing the Commission's recommendations for amendments to the Motor Carrier Act, I withdraw, for the present at least, the amendment I offered. I think we will stand on the Commission's point of view, and the personal view of Commissioner Eastman."

In presenting this argument in answer to question No. 1 presented for determination by our appeal, we have sought to avoid unnecessary repetition of details on the major points above stated, for the reason that the question is the subject of considerable comment and discussion in the brief (pp. 14-47) filed by appellants in No. 6 of this consolidated appeal.

However, in passing to a discussion of our contentions with respect to question No. 2 presented by this appeal, we should add that nowhere in our view is the need or logic of the statutory construction just discussed better illustrated than under the circumstances of the instant case.

II

THE COMMISSION'S ORDERS CONSTITUTE AN INVALID ATTEMPT TO REMOVE THE CONDITIONS IMPOSED ON MOTOR TRANSIT OPERATIONS PURSUANT TO THE STATUTORY REQUIREMENTS OF SECTION 213 AND SECTION 5(2)(b) OF THE INTERSTATE COMMERCE ACT.

Assuming, *arguendo,* the correctness of the Commission's interpretation of Section 207(a) of the Interstate Commerce Act in an appropriate case involving a new route application, we believe that the Commission's action here results in a clear evasion of the statute and represents a complete sacrifice of substance for form.

This case involves the unique and almost unheard of feature of an applicant seeking a certificate to operate over routes already certificated to it by the same agency. It is doubtful whether the Interstate Commerce Commission or any other agency concerned with granting authorization to engage in transportation has heretofore been confronted with such an application. Ordinarily, such application would be dismissed as a sheer waste of the administrative agency's time. In this case the Commission processed the application just as if it were a bona fide new route application and as if Motor Transit had no connection at all with the routes involved. However, it is clear from the facts that although the application was in form one for the grant of a new certificate under Section 207(a), in

substance it was a request to remove the restrictions previously imposed in acquisition proceedings to make Motor Transit's operations auxiliary to or supplemental of the rail service of its parent, the Rock Island Railroad, in accordance with the requirements of Sections 213 and 5(2)(b). This obvious purpose is stated in the findings of the Commission Examiner as follows (R. 10):

> "The restrictions and conditions set forth above were imposed on the certificate and authorities previously issued or granted, and as a result thereof applicant filed the captioned application for authority under section 207(a) of the act *seeking the identical authority it possessed prior to September 11, 1591, when the restrictions and conditions were imposed. The purpose of this application is to obtain operating authority not subject to restrictions or conditions* that prevent applicant from operating as a motor carrier having no affiliation with a railroad." (Italics supplied).

Since Motor Transit's clear purpose was not the grant of a route, but the removal of restrictions on its certificate for an existing route, it should have filed an application asking for modification of the conditions.

Both the Examiner and the Commission recognized that in substance the proceedings were merely a continuation of the acquisition proceedings when they found that Motor Transit was availing itself of the opportunity it had in the 1947 reopened acquisition case to present evidence on the need for restrictions (R. 74, 109). Having so recognized, the Commission should then have treated the Motor Transit application as a request to remove the existing conditions and measured this request against the standards of Section 5(2)(b) since it is clear that in the 1947 proceedings

Motor Transit could not have obtained a complete removal of the restrictions previously imposed without regard to such standards. The Commission's only area of discretion in that proceeding was to determine which of the restrictions were required to comply with Section 5(2)(b).[9] Motor Transit sought to avoid that result by filing a certificate application purportedly under Section 207, and the Commission sanctioned this

---

[9] The Commission clearly recognized its lack of discretion in applying the standards of Section 5(2)(b) to routes acquired by purchase in *Cincinnati, N. & C. Ry. Co.—Control—Lehigh Valley Transit*, 57 M.C.C. 4 (1950), in which it declared (pp. 49 and 52):

> "Applicants further contend that, assuming applicants are affiliate with the railway, it is not necessary that we find that the motor-vehicle service of the carriers of which control would be acquired would be used to public advantage by the railway in its operations, because the literal requirements of the proviso of section 5(2)(b) can be relaxed in order to carry out the declared national transportation policy. * * *
>
> * * * *
>
> "Apparently applicants concede that they are unable to submit evidence sufficient to meet the proof requirements of the proviso of section 5(2)(b), the application contains no such evidence, and it is not apparent to us how those requirements can be met in view of the location of the railway, the nature of the service which it renders, and the location of the motor bus carriers which the partnership would indirectly control. We do not agree with the position of applicants that we are empowered to relax the specific requirements of the statute and find that this transaction would be consistent with the public interest, without also finding that the railroad would be enabled to use service by motor vehicle to public advantage in its operation. As stated in E. T. & W. N. C. M. Transportation Co.—Lease—Imperial Transp. Co., Inc., 5 M.C.C. 196: 'Inconvenience of hardships, if any, that result from following the statute as written must be relieved by legislation.'"

obvious evasion of the statute by erroneously treating the application as if it were a bona fide certificate application under such section completely unrelated to the prior acquisition cases and which raised only issues with respect to the public convenience and necessity.

If the Commission may validly do what it has done in this case, the proviso in Section 5(2)(b) becomes meaningless. A substantial portion of all trucking operations now performed in this country by railroads or their subsidiaries are performed over routes acquired subject to the restrictions of Section 5(2)(b), or of its predecessor Section 213, which limit the motor carrier services to those which are auxiliary to or supplemental of the rail services of the railroad involved. Under the Commission's decision here, every railroad in the country which has such an operation may now come in and apply to the Commission for a certificate under Section 207 authorizing it to operate over the same routes without the restrictions imposed by the acquisition provisions of the statute, and the Commission has complete discretion to grant the request without measuring it by the standards of Section 5(2)(b). Indeed, if the Commission has correctly interpreted the statute, railroads may buy out independent motor carriers, accept the restrictions required by Section 5(2)(b), file an application under Section 207 for the same routes without the restrictions before the ink is dry on the certificate, and within a matter of a few months have the restrictions removed.

In closely similar circumstances, another federal agency, the Civil Aeronautics Board, characterized a like request for precisely what it was—a suggestion to the agency to read the applicable statutory requirements out of the Act. In enacting the Civil Aeronau-

ties Act of 1938, Congress showed the same concern for preserving the independence of air transportation from the control by surface transportation as it has in maintaining the independence and inherent advantages of rail and motor carrier operations. It therefore placed in Section 408(b) of the Civil Aeronautics Act [49 U.S.C. 488(b)] the identical restrictions found in Section 5(2)(b) of the Interstate Commerce Act so that any surface carrier or a subsidiary thereof which wishes to acquire an air carrier can do so only if the Civil Aeronautics Board, the administering agency, finds that the transaction proposed "will promote the public interest by enabling such carrier other than an air carrier to use aircraft to public advantage in its operation and will not restrain competition." The Board has applied this restriction in the same manner as has the Interstate Commerce Commission in acquisition cases before it, *i.e.*, it has required a showing that the air carrier operations will be auxiliary to or supplemental of the applicant surface carrier's operations.[19] In the *Parks Investigation Case*, 11 C.A.B. 779 (1950), the Board had before it a wholly-owned subsidiary of a transcontinental bus company as an applicant for a certificate of public convenience and necessity to operate as an air carrier. The Board held that the relationship of the applicant to the transcontinental bus system would have to be acted upon by the Board under Section 408 of the Civil Aeronautics Act in the event the subsidiary should be granted a certificate. The parent bus company and the subsidiary then filed an application with the Board for approval of the transfer to the parent of any certificate

[19] *American Export Airlines, Inc.—American Export Lines—Control—American Export Airlines*, 3 C.A.B. 619 (1942).

which might be issued to the subsidiary in the proceeding. The application was predicated upon the assumption that the Board could transfer the certificate under Section 401(i) of the Civil Aeronautics Act [49 U.S.C. 481(i)] merely on findings of the public interest and that there would then be no necessity for an approval under Section 408 with its strict requirements like those of Section 5(2)(b) of the Interstate Commerce Act. The Board, in refusing to sanction this attempted evasion of the statute, stated (pp. 788, 789):

> "Basically what the applicants are thus asking us to do is to read section 408 out of the Act through the device of a transfer under section 401(i). In so doing they presume that the requirements of section 408, as applied to this case, are merely technical in nature, and that they may be avoided by another technicality. However, such an approach misconstrues the real nature of the problem confronting us in this proceeding. That problem arises out of a clear statutory directive to restrict control of an air carrier by a surface carrier to those instances where the test of the second proviso of section 408 can be met. The courts have applied such directive to the type of situation before us. This mandate is not a mere legal technicality. It represents a substantive declaration of policy which it is our statutory obligation to enforce. We do not believe that it would be consistent with the public interest for us to attempt to avoid this obligation through the device of a transfer under section 401(i) of the Act, which does not eliminate the relationship which Congress intended to restrict. On this ground alone we would not entertain such a proposal."

This action of the Board came before the United States Court of Appeals for the District of Columbia

Circuit in *Continental Southern Lines* v. *Civil Aeronautics Board*, 197 F. 2d 397 (1952), *cert. den.*, 344 U.S. 831, and was sustained by that court. On the point here involved the court stated (197 F. 2d 397 at 403):

> "... *Even if the necessity for actual proceedings under § 408 could be avoided by the device suggested, a result we seriously question*, the transfer could not be approved unless the Board thought it in the public interest. And the concept of 'public interest' for the purposes of a transfer is just as broad as 'public interest' on an original certification proceeding. In both cases, it includes the policies and standards of § 408(b) ..." [Italics supplied]

If the judgment of the court below is sustained, then not only have the Commission and the railroads effectively read Section 5(2)(b) out of the Interstate Commerce Act, but the door has also been opened wide to a similar destruction of the requirements of Section 408(b) of the Civil Aeronautics Act.

The court below, the Commission, and Motor Transit have all been strangely silent on this aspect of the case. Neither the Commission nor Motor Transit made any attempt at all to meet this contention before the District Court although it was briefed and stressed in oral argument. The lower court also practically ignored the point in its opinion and merely answers the argument by the superficial observation (R. 194) that Section 207 does not contain the restrictive language of Section 5(2)(b). This failure to come to grips with the issue strongly suggests that there is no adequate answer and that the Commission's orders involve a clear effort to evade the limitations of the statute. The

Commission at no time has ever asserted that it has the power to authorize the acquisition of motor carrier operations by a rail subsidiary without meeting the requirements of the proviso of Section 5(2)(b). It obviously cannot make such an assertion because the statute gives it no discretion whatsoever with respect to the necessity for a rail applicant to meet the limitations there imposed. This being so, appellants cannot perceive how it is possible under the statute for the Commission to comply with the requirements thereof in an acquisition proceeding and then turn immediately around and nullify the limitations imposed without regard to the requirements of Section 5(2)(b) upon the theory that it is now considering the matter under another section of the statute.

It is submitted that the decision of the court below fails to recognize the real substance of the Commission's action and permits a complete circumvention of the statutory requirements. This Court in *United States* v. *Seatrain Lines*, 329 U.S. 424 (1947), made clear that statutory requirements cannot be evaded by mere words and labels and that it is against the substance of Commission action that the validity of its orders must be measured.

III

THE RAILWAY LABOR APPELLANTS HAVE STANDING TO CONTEST THE VALIDITY OF THE COMMISSION'S ORDERS BEFORE THE COURTS.

In its order of October 8, 1956, noting probable jurisdiction of this appeal, the Court invited counsel to discuss the issue of appellants' standing to sue. We therefore address ourselves to this question. Counsel do not know precisely what the Court may have in mind so that the discussion below may go into unneces-

sary detail or matters with which the Court is not concerned.

A. The Railway Labor Appellants Had a Legal Interest in the Proceedings Before the Commission Which Entitled Them to Participate as a Party Thereto.

Section 205(e) of the Interstate Commerce Act, 49 U.S.C. 305(e), provides generally for the intervention of "interested parties" in proceedings before the Interstate Commerce Commission arising under Part II of that Act in the following language:

> "In accordance with rules provided by the Commission, reasonable notice shall be afforded, in connection with any proceeding under this part, to interested parties and to the board of any State, or to the governor if there be no board, in which the motor-carrier operations involved in the proceeding are or are proposed to be conducted, and opportunity for intervention in any such proceeding for the purpose of making representations to the Commission or for participating in a hearing, if a hearing is held, shall be afforded to all interested parties."

In addition, Section 17(11) of the Interstate Commerce Act, 49 U.S.C. 17(11), specifically provides for the intervention of railroad employees in Commission proceedings as follows:

> "Representatives of employees of a carrier, duly designated as such, may intervene and be heard in any proceeding arising under this act affecting such employees."

Section 205(b) of the Act, 49 U.S.C. 305(b), makes the provisions of Section 17(11) also applicable to proceedings under Part II of the Act. This section gives representatives of employees an absolute right

to participate in and be heard in Commission proceedings which affect such employees. *Brotherhood of Railroad Trainmen* v. *Baltimore & Ohio Ry. Co.*, 331 U.S. 519 (1947).

The employees of the parent Rock Island railroad clearly were "interested parties" to the proceeding before the Commission on Motor Transit's application, and such proceeding equally clearly "affected" them. The proposal of Motor Transit to avoid the limitations imposed upon its operations and to perform a wholly independent trucking service as a substitute for rail service of the parent constituted a threat to their job security. Such proposal was simply an attempt by the Rock Island to meet the competition of independent motor carriers for the transportation of freight in less-than-car-load lots by itself conducting independent trucking operations through its wholly owned subsidiary. Such a course of action directly affects the interests of the parent rail carrier's employees in their jobs because it involves the preservation of business by means other than the maintenance and development of rail service and results in a decline in the volume of such service with a consequent reduction in the number of jobs available to perform it. As the situation stood prior to this case, Motor Transit's permanent certificate limited its operating authority. If the position of the appellants is upheld, Motor Transit will have to continue to operate a completely coordinated rail-truck service instead of unrestricted motor operations.

This interest in preserving rail service against the substitution therefor of truck service by railroads led the employees, through their representatives, to participate in the early proceedings before the Commis-

sion involving the issue of whether the agency should authorize under Section 207 only those trucking operations of railroads or railroad subsidiaries auxiliary to or supplemental of rail service. In these proceedings the appellant Railway Labor Executives' Association was a principal exponent of the principle established by the Commission that trucking operations of railroads should be so limited. *Kansas City S. Transport Co. Inc. Com. Car. Application*, 10 M.C.C. 221 (1938). From time to time railroad employees have participated in other similar Commission proceedings for the same purpose. The employees of the Rock Island did not move to participate at the outset of the present proceeding before the Commission because of their belief that the principles they advocated were so firmly established that there was no necessity to do so. However, when the Commission abandoned those principles by its order of November 22, 1954, these employees through appellants filed petitions to intervene in the proceeding (R. 122, 161). The petition of appellant Railway Labor Executives' Association (hereinafter called the "Association") was filed on February 16, 1955 (R. 122) and separate petitions were filed by the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen on June 30, 1955, and August 17, 1955, respectively (R. 161), which were not then, but now are, members of the Association. These petitions to the Commission stated that the petitioners, or in the case of the Association, its constituent organizations, had entered into agreements with the Rock Island Railroad on behalf of the carrier's employees represented by petitioners or the members of the Association concerning rates of pay, rules and working conditions of such employees. The petitions also recited that the working conditions of

the employees would be vitally affected if the Commission's action was finalized:

> "A decision by this Commission removing previously imposed "key point" restrictions on the Railway Company's participation in the motor transport industry by allowing its subsidiary, the applicant Rock Island Motor Transit Company, to operate without such restrictions would vitally affect the work and working conditions of many of the employees of the Railway Company by the reduction of work on that carrier in favor of its subsidiary, the motor transit company."

This allegation set forth the legal interest of the Rock Island's employees in the Commission proceedings.

It is also clear that the appellants were proper parties to represent this interest of the Rock Island's employees. The appellant Association is composed of standard national and international railway labor organizations who are the duly certified representatives under the Railway Labor Act for most of the employees of the Rock Island [11] (R. 140). It has heretofore

---

[11] The Association is now composed of the following twenty-two railway labor organizations:

American Railway Supervisors Association
American Train Dispatchers' Association
Brotherhood of Locomotive Firemen and Enginemen
Brotherhood of Maintenance of Way Employes
Brotherhood Railway Carmen of America
Brotherhood of Railroad Signalmen of America
Brotherhood of Railway and Steamship Clerks, Freight Handlers, Expres and Station Employes
Brotherhood of Railroad Trainmen
Brotherhood of Sleeping Car Porters
Hotel & Restaurant Employees and Bartenders International Union
International Association of Machinists

rates of pay, rules and working conditions of such employees. Said agreements confer upon such employees valuable property rights in relation to their employment. By virtue of the foregoing the intervening plaintiffs represent the interests of said employees."

The answers admit these allegations (R. 174, 179, 186). The answers also admit the allegations of paragraph 1 of the complaint that the District Court could entertain the complaint of the Association (R. 174, 179, 186). Paragraphs 9 and 12 of the complaint set forth the following claims of injury to the employees of the Rock Island (R. 148, 150):

"9. The intervening plaintiffs have exhausted their administrative remedies before the Interstate Commerce Commission and the certificate of public convenience and necessity authorized by the report and orders of the Commission on November 22, 1954 and July 6, 1955 will be issued by the Commission and operations performed thereunder to the injury of employees represented by the intervening plaintiffs unless such report and orders are suspended, enjoined, annulled, and set aside, and issuance of a certificate authorized thereunder be enjoined or, if issued, be declared invalid."

* * * *

"INJURY"

"12. The intervening plaintiffs and the employees represented by them are threatened with irreparable injury by the erroneous and unlawful actions of the Interstate Commerce Commission as enumerated in Paragraph No. 10 above, in that they are subject to loss of employment, displacement and other economic detriment if the Commission's orders are allowed to stand."

No finding to the contrary is contained in the opinion of the District Court (R. 192-195).

On October 3, 1953, the Brotherhood of Railroad Trainmen and the Order of Railway Conductors and Brakemen of America filed a joint motion with the District Court to intervene as party plaintiffs in the cause and for leave to file a complaint (R. 157). This motion, which was unopposed, was granted by the District Court (R. 171), and the complaint filed (R. 162). This complaint alleged in paragraph 1 thereof that the Court could entertain the action of the Brotherhoods (R. 163), and in paragraph 5 stated as follows (R. 163):

> "5. Movants are the duly designated collective bargaining representatives under the Railway Labor Act for certain employees of the Chicago, Rock Island and Pacific Railroad Company, the parent company of the Rock Island Motor Transit Company, and have agreements with said railroad carrier concerning rates of pay, rules and working conditions of such employees. Said agreements confer upon such employees valuable property rights in relation to their employment. By virtue of the foregoing the intervening plaintiffs represent the interests of said employees."

These allegations were admitted by the answers of the government (R. 177, 189).[12] The two Brotherhoods also alleged in paragraphs 9 and 12 of the complaint (R. 165, 167) the same injury to the employees of the Rock Island represented by them as was alleged in the complaint of the Association. The District Court did not hold to the contrary (R. 192-195). These allega-

[12] The answer of Motor Transit stood silent on these allegations (R. 183-185).

tions were sufficient to establish a legal right or interest in the Rock Island employees represented by appellants that would be injuriously affected by the Commission's orders.

Appellants submit that their participation in the District Court proceedings was not merely permissive but a matter of legal right as alleged in their motions to intervene (R. 142-144, 159, 160).

Section 2323 of the Judicial Code [28 U.S.C.A. 2323] reads in pertinent part as follows:

> "The Attorney General shall represent the Government in the actions specified in section 2321 of this title and in actions under sections 20, 23, and 43 of Title 49, in the district courts, and in the Supreme Court of the United States upon appeal from the district courts. As amended May 24, 1949, c. 139, § 116, 63 Stat. 105.
>
> "The Interstate Commerce Commission *and any party or parties in interest to the proceeding before the Commision,* in which an order or requirement is made, *may appear as parties of their own motion and as of right,* be represented by their counsel, in any action involving the validity of such order or requirement or any part thereof, and the interest of such party." (Italics supplied).

The District Court case involved the validity of an order of the Commission entered in a proceeding in which the appellants were admitted as a party in interest and clearly affected the interest of the employees of the Rock Island represented by such appellants. Indeed, as this Court stated in *Baltimore & Ohio Railroad Company* v. *United States*, 264 U.S. 258 (p. 268):

> "Moreover, the fact of intervention, allowed as it was, implies a finding by the Commission that

the plaintiffs have an interest. In the proceeding before the Commission, they opposed by evidence and argument the granting of the application. This they did as of right. For under the rules of practice, adopted by the Commission pursuant to paragraph 1 of § 17 of the Interstate Commerce Act, the intervener becomes a party to the proceeding, entitled, like any other party, to appear at the taking of testimony, to produce and cross-examine witnesses, and to be heard in person or by counsel. The intervention must be preceded by an order of the Commission granting leave; and leave can be granted only to one showing interest. *No case has been found in which either this court, or any lower court, has denied to one who was a party to the proceedings before the Commission the right to challenge the order entered therein.* On the other hand, persons who were entitled to become parties before the Commission, but did not do so, have been allowed to maintain such suits where the requisite interest was shown." (Italics supplied)

In addition, Section 17(11) of the Interstate Commerce Act, quoted above, gives an absolute right to appellants not only to participate in the proceedings before the Commission but also in the subsequent court action testing the validity of the Commission's action. *Brotherhood of Railroad Trainmen v. Baltimore & Ohio Railroad Company*, 331 U.S. 519.

The interest of appellants in the Commission's orders as set forth above and the allegations contained in their complaints were sufficient to have justified a separate suit by them against the orders had they so chosen. This Court has held that statutory provisions such as are found in the first paragraph of Section 2323 of the Judicial Code and Section 17(11) of the

Interstate Commerce Act not only provide an absolute right of intervention but authorize persons falling within their scope to institute suits to challenge Commission's orders. *Baltimore & Ohio Railroad Company* v. *United States*, 264 U.S. 258. On this point the Court stated (pp. 267-268):

> "The plaintiffs may challenge the order because they are parties to it. The Judicial Code, § 212 (originally the Commerce Court Act, June 18, 1910, chap. 309, 36 Stat. at L. 542, Comp. Stat. § 1005), declares that any party to a proceeding before the Commission may, as of right, become a party to any suit wherein is involved the validity of such order. The section does not in terms provide that such party may institute a suit to challenge the order. But this is implied. For, otherwise, there would in some cases be no redress for the injury inflicted by an illegal order."

C. Appellants Have an Appealable Interest in the Judgment of the District Court.

The judgment of the District Court (R. 195) affirms the action of the Commission in removing the restrictions from the operations of the Rock Island's subsidiary so that the railroad may provide through that subsidiary a substitute truck service instead of a coordinated rail-truck service. If appellants were not permitted to appeal from such judgment in a proceeding in which they participated as a matter of legal right, then the purpose of Congress in enacting Section 17(11) of the Interstate Commerce Act quoted above would be thwarted. In that section Congress has given representatives of employees a specific right to "be heard" in *any* proceeding arising under the Interstate Commerce Act affecting employees. If that right is dependent upon some other party contesting

the Commission's action or is cut off at the District Court level then the employees have not been heard as Congress intended. See *Baltimore & Ohio Railroad Company* v. *United States*, 264 U. S. 258 at 268, quoted *supra*, p. 40.

Moreover, even if the express statutory provisions did not exist, the employees represented by appellants have a legal interest in the Commission's District Court judgment which entitles them to appeal therefrom. The allegations of their complaints (R. 145-151, 162-168) set forth and discussed above, show that the employees of the Rock Island represented by appellants have a legal right or interest, *i.e.*, their right in their jobs and working conditions arising out of their contracts with that carrier, admitted by the answers to be a "valuable property right," which will be injuriously affected by the Commission's action permitting a substitution of truck service for rail service by the Rock Island contrary to the requirements of statute. This interest, which has not been questioned in the pleadings before the Court, is as equally strong and immediate as that which was recognized as establishing an appealable interest in *National Coal Association, et al.* v. *Federal Power Commission*, 89 U.S. App. D.C. 135, 191 F. 2d 462 (1951). In the cited case the Railway Labor Executives' Association, among others, petitioned the United States Court of Appeals for the District of Columbia to review an order of the Federal Power Commission authorizing the construction and operation of a natural gas pipeline. The Association had intervened and participated as a party to the proceeding before the agency. Its interest was the adverse effect of pipeline competition upon railroads whose employees were represented by its

member railway labor organizations with consequent injury to such employees. This interest was almost identical to that here involved. The right of the Association to seek review of the Commission's order was attacked on the ground that it was too remote and insubstantial. This contention was rejected by the Court of Appeals in the following statement (191 F. 2d 466).[13]

> "We see no reason, and none is suggested to us, for considering the interest of employees in retention of their employment in the competing companies as any less substantial than the interest of competitors in retaining their markets or the prospect of loss of employment any less direct and immediate than the loss of markets with which the competing companies are threatened. The employees of competing companies, as much as the owners thereof, have a sufficiently direct relationship to the subject matter of the Commission's order to be 'aggrieved.'"

The status of appellants is totally unlike the situation involved in *Boston Tow Boat Co.* v. *United States*, 321 U.S. 632, in which the only interest alleged by appellant in the Commission's order was that it might establish an unfavorable precedent, or in *Moffat Tunnel League* v. *United States*, 289 U.S. 113, where suit was brought by an informal group whose only interest as found by the Court was "no more than a sentiment."[14]

---

[13] The Court of Appeals subsequently reaffirmed this view in *City of Pittsburgh* v. *Federal Power Commission*, 237 F. 2d 741, 746 (1956).

[14] Nor is the case like that before this Court in *Sprunt* v. *United States*, 281 U.S. 249, in which the appellant did not have a legal right involved and in which the parties with such a right did not

CONCLUSION

For the foregoing reasons, it is respectfully submitted that the judgment of the lower court should be reversed and the Commission's order declared invalid because not in conformity with the statutory requirements of the Interstate Commerce Act.

seek review of the lower court action. Here the original plaintiffs are appealing in Case No. 6 and appellants in Case No. 8 have a clear legal right involved.

APPENDIX A

National Transportation Act of 1940 [49 U. S. C. 1 et seq.]

NATIONAL TRANSPORTATION POLICY [49 U. S. C., preceding sections 1, 301, 901 and 1001]

"It is hereby declared to be the national transportation policy of the Congress to provide for fair and impartial regulation of all modes of transportation subject to the provisions of this Act, so administered as to recognize and preserve the inherent advantages of each; to promote safe, adequate, economical, and efficient service and foster sound economic conditions in transportation and among the several carriers; to encourage the establishment and maintenance of reasonable charges for transportation services, without unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices; to cooperate with the several States and the duly authorized officials thereof; and to encourage fair wages and equitable working conditions;—all to the end of developing, coordinating, and preserving a national transportation system by water, highway, and rail, as well as other means, adequate to meet the needs of the commerce of the United States, of the Postal Service, and of the national defense."

INTERSTATE COMMERCE ACT [49 U. S. C. 1 *et seq.*]

Section 5(2)(a) It shall be lawful, with the approval and authorization of the Commission, as provided in subdivision (b)—

(i) for two or more carriers to consolidate or merge their properties or franchises, or any part thereof, into one corporation for the ownership, management, and operation of the properties theretofore in separate ownership; or for any carrier, or two or more carriers jointly, to purchase, lease or contract to operate the properties, or any part thereof, of another; or for any carrier, or two or more carriers jointly, to

acquire control of another through ownership of its stock or otherwise; or for a person which is not a carrier to acquire control of two or more carriers through ownership of their stock or otherwise; or for a person which is not a carrier and which has control of one or more carriers to acquire control of another carrier through ownership of its stock or otherwise; or

(ii) for a carrier by railroad to acquire trackage rights over, or joint ownership in or joint use of, any railroad line or lines owned or operated by any other such carrier, and terminals incidental thereto.

Section 5(2)(b) Whenever a transaction is proposed under subparagraph (a), the carrier or carriers or person seeking authority therefor shall present an application to the Commission, and thereupon the Commission shall notify the Governor of each State in which any part of the properties of the carriers involved in the proposed transaction is situated, and also such carriers and the applicant or applicants (and, in case carriers by motor vehicle are involved, the persons specified in section 205(e)), and shall afford reasonable opportunity for interested parties to be heard. If the Commission shall consider it necessary in order to determine whether the findings specified below may properly be made, it shall set said application for public hearing; and a public hearing shall be held in all cases where carriers by railroad are involved unless the Commission determines that a public hearing is not necessary in the public interest. If the Commission finds that, subject to such terms and conditions and such modifications as it shall find to be just and reasonable, the proposed transaction is within the scope of subparagraph (a) and will be consistent with the public interest, it shall enter an order approving and authorizing such transaction, upon the terms and conditions, and with the modifications, so found to be just and reasonable: PROVIDED, That if a car-

rier by railroad subject to this part, or any person which is controlled by such a carrier, or affiliated therewith within the meaning of paragraph (6), is an applicant in the case of any such proposed transaction involving a motor carrier, the Commission shall not enter such an order unless it finds that the transaction proposed will be consistent with the public interest and will enable such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

Section 205(g) [49 U. S. C. Section 305(g)] Any final order made under this part shall be subject to the same right of relief in court by any party in interest as is now provided in respect to orders of the Commission made under part I: *Provided*, That, where the Commission, in respect of any matter arising under this part, shall have issued a negative order solely because of a supposed lack of power, any such party in interest may file a bill of complaint with the appropriate District Court of the United States, convened under section 2284 of title 28 of the United States Code, and such court, if it determines that the Commission has such power, may enforce by writ of mandatory injunction the Commission's taking of jurisdiction.

Application for Certificate of Public Convenience and Necessity

Sec. 206 (August 9, 1935, amended June 29, 1938, September 18, 1940, September 1, 1950.) [49 U. S. C. Sec. 306.] (a)(1) Except as otherwise provided in this section and in section 210a, no common carrier by motor vehicle subject to the provisions of this part shall engage in any interstate or foreign operation on any public highway, or within any reservation under the exclusive jurisdiction of the United States, unless there is in force with respect to such carrier a certificate of public convenience and necessity issued by the Commission authorizing such operations: *Provided, however*, That, subject to section 210, if any such carrier

or predecessor in interest was in bona fide operation as a common carrier by motor vehicle on June 1, 1935, over the route or routes or within the territory for which application is made and has so operated since that time, or if engaged in furnishing seasonal service only, was in bona fide operation on June 1, 1935, during the season ordinarily covered by its operation and has so operated since that time, except in either instance as to interruptions of service over which the applicant or its predecessor in interest had no control, the Commission shall issue such certificate without requiring further proof that public convenience and necessity will be served by such operation, and without further proceedings, if application for such certificate is made to the Commission as provided in paragraph (b) of this section and within one hundred and twenty days after this section shall take effect, and if such carrier was registered on June 1, 1935, under any code of fair competition requiring registration, the fact of registration shall be evidence of bona fide operation to be considered in connection with the issuance of such certificate. Otherwise the application for such certificate shall be decided in accordance with the procedure provided for in section 207(a) of this part and such certificate shall be issued or denied accordingly. Pending the determination of any such application the continuance of such operation shall be lawful: *And provided further*, That this paragraph shall not be so construed as to require any such carrier lawfully engaged in operation solely within any State to obtain from the Commission a certificate authorizing the transportation by such carrier of passengers or property in interstate or foreign commerce between places within such State if there be a board in such State having authority to grant or approve such certificates and if such carrier has obtained such certificate from such board. Such transportation shall, however, be otherwise subject to the jurisdiction of the Commission under this part.

Section 207. [*August 9, 1935*] [49 U. S. C., § 307.] (a) Subject to section 210, a certificate shall be issued to any qualified applicant therefor, authorizing the whole or any part of the operations covered by the application, if it is found that the applicant is fit, willing, and able properly to perform the service proposed and to conform to the provisions of this part and the requirements, rules, and regulations of the Commission thereunder, and that the proposed service, to the extent to be authorized by the certificate, is or will be required by the present or future public convenience and necessity; otherwise such application shall be denied: *Provided, however,* That no such certificate shall be issued to any common carrier of passengers by motor vehicle for operations over other than a regular route or routes, and between fixed termini, except as such carrier may be authorized to engage in special or charter operations.

(b) No certificate issued under this part shall confer any proprietary or property rights in the use of the public highways.

Section 208. [*August 9, 1935.*] [49 U. S. C., § 308.] (a) Any certificate issued under section 206 or 207 shall specify the service to be rendered and the routes over which, the fixed termini, if any, between which, and the intermediate and off-route points, if any, at which, and in case of operations not over specified routes or between fixed termini, the territory within which, the motor carrier is authorized to operate; and there shall, at the time of issuance and from time to time thereafter, be attached to the exercise of the privileges granted by the certificate such reasonable terms, conditions, and limitations as the public convenience and necessity may from time to time require, including terms, conditions, and limitations as to the extension of the route or routes of the carrier, and such terms and conditions as are necessary to carry out, with respect to the operations of the carrier, the requirements established by

the Commission under section 204(a)(1) and (6): *Provided, however,* That no terms, conditions, or limitations shall restrict the right of the carrier to add to his or its equipment and facilities over the routes, between the termini, or within the territory specified in the certificate, as the development of the business and the demands of the public shall require.

(b) A common carrier by motor vehicle operating under any such certificate may occasionally deviate from the route over which, and/or the fixed termini between which, it is authorized to operate under the certificate, under such general or special rules and regulations as the Commission may prescribe.

(c) Any common carrier by motor vehicle transporting passengers under a certificate issued under this part may transport in interstate or foreign commerce to any place special or chartered parties under such rules and regulations as the Commission shall have prescribed.

(d) A certificate for the transportation of passengers may include authority to transport in the same vehicle with the passengers, newspapers, baggage of passengers, express, or mail, or to transport baggage of passengers in a separate vehicle.

Section 213(a)(1) [49 U. S. C. Section 313(a)(1)] Whenever a consolidation, merger, purchase, lease, operating contract, or acquisition of control is proposed under this section, the carrier or carriers or the person seeking authority therefor shall present an application to the commission, and thereupon the commission shall, after such notice as is required by section 205(f) and if deemed by it necessary in order to determine whether the findings specified below may properly be made, set said application down for public hearing. If the commission finds that the transaction proposed will be consistent with the public interest and that the conditions of this section have been

or will be fulfilled, it may enter an order approving and authorizing such consolidation, merger, purchase, lease, operating contract, or acquisition of control, upon such terms and conditions as it shall find to be just and reasonable and with such modifications as it may prescribe: *Provided, however,* That if a carrier as defined in section . 3) of Part I, or any person which is controlled by such a carrier or affiliated therewith within the meaning of section 5(8) of this title, is an applicant, the commission shall not enter such an order unless it finds that the transaction proposed will promote the public interest, enabling such carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition.

CERTIFICATE OF SERVICE

I, Edward J. Hickey, Jr., one of the attorneys for appellants herein, and a member of the Bar of the Supreme Court of the United States, hereby certify that on August 26, 1957, I served copies of the foregoing brief on the parties hereto as follows:

1. On the United States, by mailing a copy in a duly addressed envelope, with postage prepaid, to Oliver Gasch, Esq., United States Attorney for the District of Columbia, at Room 3600-A, United States Court House, Washington, D. C., and by mailing a copy in a duly addressed envelope, with postage prepaid, to The Solicitor General, Department of Justice, Washington 25, D. C.

2. On the Interstate Commerce Commission, by mailing a copy in a duly addressed envelope, with postage prepaid, to Robert Ginnane, Esq., its General Counsel, at the offices of the Commission, Washington 25, D. C.

3. On the Rock Island Motor Transit Company, intervening defendant, by mailing a copy in a duly addressed envelope with airmail postage prepaid, to A. B. Howland, Esq., its attorney, at 500 Bankers Trust Building, Des Moines 9, Iowa.

4. On the Employees' Committee of Rock Island Motor Transit Co., Davenport Chamber of Commerce, *et al.*, and Shippers' Committee, intervening defendants, by mailing a copy in a duly addressed envelope with airmail postage prepaid, to D. C. Nolan, Esq., their attorney, at Suite 405 Iowa State Bank Bldg., Iowa City, Iowa.

5. On the National Industrial Traffic League, *amicus curiae*, by mailing a copy in a duly addressed envelope,

with airmail postage prepaid, to John S. Burchmore, Esq., its attorney, at 2106 Field Building, Chicago 3, Illinois.

6. On the American Trucking Associations, Inc., *et al.*, plaintiffs, by mailing a copy in a duly addressed envelope with postage prepaid, to its attorney, Peter T. Beardsley, Esq., 1424 16th Street, N. W., Washington, D. C.

On Appeal From The United States District Court For The District of Columbia.

MOTION OF THE NATIONAL INDUSTRIAL TRAFFIC LEAGUE FOR LEAVE TO FILE BRIEF AS AN AMICUS CURIAE

Now come John S. Burchmore and Robert N. Burchmore, as counsel for The National Industrial Traffic League, pursuant to paragraph 3 of Rule 42, and move the Court for leave to file a brief as *amicus curiae*.

The League is a nationwide organization of shippers via all forms of transportation, including railroads, motor carriers, water carriers, and air carriers, as well as freight forwarders. The organization is dedicated to the promotion of sound, economic transportation, and its membership generally has a vital interest in the principles and policies of regulation of transportation pursuant to the National Transportation Policy and in the public interest.

The League, on behalf of its membership, as representative of the shipping public, has an interest in the granting of operating rights for highway transportation sufficient to meet the public need for such transportation. Consequently, the League is concerned with the interpretation by the Interstate Commerce Commission and the Courts of those provisions of the Interstate Commerce Act relating to such operating rights.

The Court has noted probable jurisdiction in two appeals that present questions in the determination of which the League believes that the public interest and need are legally significant.

No. 419, *Shaffer Transportation Company, et al.*, v. *United States of America*, presents the question whether the public is entitled to both railroad and motor carrier transportation upon request, or whether in the absence of existing motor carrier service the issuance of operating authority for a proposed motor carrier service may be withheld until the inadequacy of existing railroad service is proven.

In this case, the Commission denied the application for operating rights and the court below dismissed the suit of the applicant motor carrier to set aside the Commission's order. 139 F. Supp. 444. The League requests leave to file a brief as *amicus curiae* in support of appellants, urging particularly the right of the public under the statute to have both railroad and motor carrier modes of transportation authorized.

No. 101, *American Trucking Associations, Inc., et al.*, v. *United States of America, et al.* (Also No. 110, *Railway Labor Executives Association, et al.*, v. *United States of America, et al.*) presents the question whether a grant of new or additional motor carrier operating authority to a carrier that is a subsidiary of a railroad must, as a matter of law, be restricted to service that is auxiliary and supplemental to rail service, regardless of the public need for unrestricted service by such subsidiary.

In this case, the Commission issued an unrestricted certificate to the railroad subsidiary and the court below dismissed the actions of motor carriers and their organizations (and of the railway labor organization) to set aside the Commission's order. The League seeks leave to file a brief as *amicus curiae* in support of the appellees, arguing particularly that the public need for highway transportation should be the paramount consideration in the determination as to what, if any, restrictions should be placed upon highway service by railroad subsidiaries.

Opposing parties refuse consent

Upon application to the parties for consent as a preliminary to this motion, the Interstate Commerce Commission granted written consent to the League in both cases, notwithstanding that the interest of the League is in support of the Commission in No. 101, and opposed to it in

No. 419. Further, written consent was granted in each case by the parties in whose support the League brief would be filed. However, in No. 419, the railroads refuse consent and in No. 101 the American Trucking Associations refuse consent.

Necessity for adequate presentation of the public interest

Except for the United States and Interstate Commerce Commission the parties to these proceedings clearly have an interest in preserving for themselves so far as they can the exclusive opportunity to provide transportation service, whether by railroad or by highway. Neither the railroad interests, on the one hand, nor the motor carriers and their associations, on the other, have any selfish interest in an adequate presentation of the question as to how the statutory provisions must be interpreted in the light of the public interest and need. Broadly speaking, the Interstate Commerce Commission is charged with the duties of regulation in the public interest according to the National Transportation Policy. And the Commission consents to the filing of League briefs in both cases, indicating the belief that an adequate presentation is made more likely by such filing.

The United States also has given its consent in writing to the requested filing.

Wherefore, counsel for The National Industrial Traffic League respectfully urge that leave be granted for the filing of a brief as *amicus curiae*.

Respectfully submitted,

JOHN S. BURCHMORE,
ROBERT N. BURCHMORE,

January, 1957.

Certificate of Service

I, Robert N. Burchmore, attorney for The National Industrial Traffic League, and member of the Bar of the Supreme Court of the United States, hereby certify that on the 31st day of January, 1957, I served copies of the foregoing document upon the several parties thereto, as follows:

1. On the United States of America by mailing a copy in duly addressed envelope with air mail postage prepaid, to the Solicitor General, Department of Justice, Washington 25, D. C.

2. Upon the Interstate Commerce Commission by mailing a copy in a duly addressed envelope with postage prepaid to Robert W. Ginnane, General Counsel, Interstate Commerce Commission, Washington 25, D. C.

3. PAGE

Motion to Affirm 1

Statement 2

Argument 5

The decision of the Commission in the case at bar involves no departure from previous policies or practices. Since the enactment of the Motor Carrier Act, the Commission has consistently ruled that in proper cases, where necessary to secure adequate service, rail carriers may acquire unrestricted motor carrier authority under Section 207 or under Section 5(2)(b) 5

Neither the National Transportation Policy nor Section 5(2)(b) of the Act prohibit the Commission from issuing certificates of public convenience and necessity for motor carrier operations, merely because the applicant therefor is affiliated with a railroad 8

The finding of the Commission that public convenience and necessity require the authority granted is supported by substantial evidence and is to be accepted by the courts 12

No. 973

APPEAL FROM UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

MOTION TO AFFIRM

Pursuant to Rule 16, paragraph 9(c) of the revised rules of this court, intervenor-appellees, Rock Island Motor Transit Company, Traffic Bureaus and/or Chambers of Commerce of Davenport, Iowa City, Cedar Rapids, Newton, Des Moines, Atlantic, Harlan, Ottumwa and Mason City, Iowa, and Rock Island Motor Transit Company Employees' Committee, move that the judgment of the District Court of the District of Columbia be affirmed, on the ground that it is manifest on the face of the record and the jurisdictional statements that the legal questions on which the decision of the cause depends are so unsubstantial as not to require further argument.

This is a direct appeal from a final judgment entered January 27, 1956, by a three judge district court convened pursuant to 28 USC, Sections 2281 and 2325, which dismissed appellants' complaint to set aside and enjoin an order of the Interstate Commerce Commission. The order of the Commission under attack, dated November 22, 1954 (reconsideration denied July 6, 1955), granted to intervenor Rock Island Motor Transit Company, a certificate of public convenience and necessity authorizing motor carrier service over regular routes extending between Silvis, East Moline, Moline and Rock Island, Illinois, across the state of Iowa, via U. S. Highway 6, and other designated highways to Omaha, Nebraska, and to numerous intermediate and off-route points.

STATEMENT

As shown by appellants' jurisdictional statements this case has an extensive background of proceedings before the Interstate Commerce Commission and the courts. The history prior to September 1951 has no bearing upon the legal questions presented. Appellee-intervenor, Rock Island Motor Transit Company, was authorized by the Commission on April 1, 1938 to acquire all physical assets and existing motor carrier authority of White Line Motor Freight Company, one of the earliest motor carriers operating between Chicago, Illinois and Omaha, Nebraska. Rock Island Motor Transit Company-Purchase-White Line M. Frt., 5MCC451. The Commission made all requisite findings required by Section 213 of the Motor Carrier Act and imposed certain conditions, among them being a reservation of "such further specific conditions as the Commission in the future may find it necessary to impose in order to insure that the service shall be auxiliary to or supplemental of train serv-

ice." On November 28, 1945, in 39MCC821, the Commission authorized Motor Transit to acquire the motor carrier certificate of the Frederickson & Son line in Western Iowa. Without evidence before it as to the effect upon the communities served, the Commission on April 11, 1949, in 55MCC567, having re-opened the White Line and Frederickson cases, restricted both certificates by requiring that shipments be confined to those moving on rail billing, and at rail rates and by imposing so-called "key point restrictions"[1] at Omaha, Nebraska, Des Moines, Iowa, and collectively at Davenport and Bettendorf, Iowa, and Rock Island, Moline and East Moline, Illinois. These restrictions prevented operation of the Transit Company as a motor carrier for transportation of shipments by motor vehicle under motor carrier billing, and thus, by virtue of the restrictions, appellee-intervenor's operations were reduced to rendering a pickup and delivery service for rail shipments between key point stations.

Appellee-intervenor, Rock Island Motor Transit, challenged the power of the Commission to so modify its certificates by an action instituted in the United States District Court for Northern Illinois at Chicago, in which the Commission order was enjoined. This court, by vote of five justices, and with four justices dissenting, sustained the power of the Commission to modify the certificates and impose the key point restrictions in *United States vs. Rock Island Motor Transit Company*, 340 US 419, 71 S. Ct. 382, 95 L. Ed. 391, (rehearing denied, 341 US 906).

Upon the issuance of the mandate of this Court, Motor Transit's suit in the United States District Court for North-

---

[1] The key point restrictions were as follows: No shipments shall be transported by Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebraska, Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa and Rock Island, Moline and East Moline, Illinois.

ern Illinois was dismissed. Thereafter, Motor Transit filed an Application for temporary authority to render service over the White Line and Frederickson routes, supported by a large number of affidavits of shippers and receivers of freight at practically all points. The Commission granted temporary restricted authority to continue service over portions of the routes involved. Application for permanent authority over these same routes, under Section 207 (49 USC 307) was filed October 26, 1951. Extensive hearings were held and the testimony of approximately 180 witnesses was taken. The examiner who heard the evidence, filed an exhaustive opinion in which he found that service of Motor Transit Company was the only service available to a large number of intermediate and off-route points, that public convenience and necessity required motor carrier authority, without key point restrictions, and recommended that a certificate issue accordingly. The Commission by its report and order of November 22, 1954, adopted the substance of its Examiner's findings, directed the issuance of a certificate but imposed the following conditions:

> 1. That there be attached from time to time to the privileges granted herein such reasonable terms, conditions and limitations as the public convenience and necessity may require, and
>
> 2. That all contractual arrangements between Motor Transit Company and the Rock Island Railroad be reported to us and shall be subject to revision.

Appellants' jurisdictional statements present but two legal questions for the consideration of this court:

First, by reason of the Transportation Policy and Section 5(2)(b) of The Interstate Commerce Act, the Commission may not grant to any railroad company, or its affiliate,

a certificate authorizing unrestricted motor carrier service, as distinguished from motor transportation of rail billed freight. This they urge is the law even though public convenience and necessity for motor carrier service be shown by overwhelming evidence.

Second, the evidence before the Commission is insufficient to support the findings that public convenience and necessity require operation of appellee-intervenor as a motor carrier between the points, and over the routes, involved.

The District Court disposed of these contentions in an opinion prepared by Circuit Judge Prettyman, in which as to the first contention the court said:

> "Certainly the terms of the requirement as to auxiliary and supplementary service do not appear in Section 207(a). It is equally certain that the policy of the requirement, being a basic policy in the statute, does apply. The difference between a rigid requirement and an applicable policy is one of flexibility and permits the Commission to be governed in exceptional circumstances by the needs of the public convenience and necessity."

With respect to the second question, the court said:

> "We think the position of the Commission is well taken on the evidence. Voluminous testimony was produced. The findings are extensive. The conclusion that the grant appears necessary in the public interest is well founded. Judgment will be rendered for the defendants."

ARGUMENT

The decision of the Commission in the case at bar involves no departure from previous policies or practices. Since the enactment of the Motor Carrier Act, the Commis-

sion has consistently ruled that in proper cases, where necessary to secure adequate service, rail carriers may acquire unrestricted motor carrier authority under Section 207 or under Section 5(2)(b).

Appellants, at various points in their jurisdictional statements, urge that the Commission has recognized its lack of power to grant certificates authorizing motor carrier operations to railroad companies, or their subsidiaries. At other points it is charged that in granting the certificate

to appellee-intervenor the Commission has disregarded its own precedents, and that a new policy has been inaugurated with this decision.

Nothing could be further from the fact. Since the enactment of the Motor Carrier Act in 1935, the Commission has had many occasions to consider operations of trucks and passenger buses by railroad companies. In numerous instances applications under Section 207 of the Act have been granted with no restrictions. In others, restrictions have been imposed. The Commission has said in the absence of "unusual circumstances" it will not ordinarily grant to a subsidiary of a railroad, unrestricted motor carrier rights, but it is very significant that "unusual circumstances" have been found to exist in a rather large number of cases. In many of those cases the evidence of public need was not so strong as in the case at bar.

In one of the earliest decisions rendered under the Motor Carrier Act in *St. Andrews Bay Transportation Co.—Extension*—3 MCC 711, the Commission pointed out that the provisions of Section 213 of the Act (now embraced in Section 5(2)(b)) requiring a finding that operation of a motor carrier by a railroad would not unduly restrain competition had no application to a proceeding under Section 207 of the Act.

In *Rock Island Motor Transit Co.—Extension Wellman, Iowa*, 31 MCC 643, appellee-intervenor applied for a certificate authorizing service between Iowa City, Kalona and Wellman, Iowa. Division 5 imposed restrictions limiting the service to be performed to movement of shipments on rail billing and at rail rates. The entire Commission removed this restriction and granted unlimited motor carrier authority.

In MCF 5573, *Southern Pacific Co.—Purchase—Lowinel*

Trucking Co.—60 MCC 373, Division 1 of the Commission said:

> "Under the circumstances here involved we are of the opinion that an exception to the principles discussed in Rock Island Motor Transit Co.—Purchase—White Line M. Frt., 40 MCC 457, is warranted, and that the service to be rendered by vendee under the unified duplicate operating rights should not be limited solely to the transportation of freight in the service auxiliary to or supplemental with train service. Our findings accordingly will not be restricted."

Quotations from numerous decisions by the Commission might be supplied at this point. To do so would unduly extend this argument. In each of the cases cited above unrestricted motor carrier authority was granted to a railroad, or a rail carrier subsidiary. Some of the cases cited arose under Section 5(2)(b) and others under Section 207. The policy of the Commission has consistently been based on the facts of particular cases and the needs of the territory served.

Neither the National Transportation Policy nor Section 5(2)(b) of the Act prohibit the Commission from issuing certificates of public convenience and necessity for motor carrier operations, merely because the applicant therefor is affiliated with a railroad.

United States of America, et al, Rock Island Motor Transit Co., et al, 340 US 119, 95 L. Ed. 391, 71 S. Ct. 382.

Interstate Commerce Commission v. Parker, et al, 326 US 60, 89 L. Ed. 2051.

Baldly stated, appellants contend that various provisions of the Act, when read together, prohibit the Commission from issuing motor carrier authority to railroad companies,

or persons controlled by railroads. They advance this contention in the face of express provisions of Section 5(2)(b) which specifically empower the Commission to authorize railroads to acquire *motor carriers* if certain requisite findings be made. In other words, it is the position of appellants that Congress has prohibited that which the Act expressly says may be done under certain conditions.

First, it is to be noted that the proviso of Section 5(2)(b) relates only to railroad acquisition of *existing* motor carriers. This provision was clearly designated as a safeguard against monopoly. The fear had been expressed that railroads might buy up truck lines and thus obtain a monopoly in the transportation field. The evidence in the case at bar shows that no monopoly exists or is threatened by the operations of appellee-intervenor.

Second, the construction of Sections 207 and 5(2)(b) for which appellants contend would defeat the obvious Congressional intent. Congress has expressly authorized railroad companies to acquire *motor carriers* if the findings specified in 5(2)(b) are made by the Commission. Appellants' contention is that the statute should be construed as authorizing a railroad to acquire only the vehicles used by a motor carrier and use them in its operation as a railroad. The language of 5(2)(b) negatives any such Congressional intent. It is motor carriers which may be acquired. Nothing in the Act supports such a tortured construction of the Act.

Third, the language of Section 207 is plain and unambiguous and expressly authorizes the issuance of a certificate to any qualified person when the requisite findings of public convenience and necessity, and fitness of the applicant, are made by the Commission. The statute requires no resort to extraneous matters to determine the legislative intent.

Fourth, nothing contained in the National Transportation Policy negatives the power of the Commission to grant to a railroad, or person affiliated with a railroad, authority to operate as a motor carrier. The National Transportation Policy is not concerned with the ownership of the facilities of commerce, but with service to the public, and the development of transportation to attain the objectives set forth. Nothing in the National Transportation Policy indicates any Congressional purpose to prohibit railroads from operating trucks as motor carriers, and there is no intimation that Congress was interested in restricting the development of truck transportation by railroads.

Fifth, this court, in at least two cases, has clearly indicated that the contentions of appellants here find no support in the provisions of the Act, or the National Transportation Policy. In *U. S. A. v. R. I. M. T. Co., et al*, 340 US 119, 95 L. Ed. 391, Mr. Justice Reed, speaking for this court, said:

> "At present a motor service is auxiliary and supplemental to rail service, in the Commission's view, when the railroad affiliated motor carrier in a subordinate capacity aids the railroad in its rail operations by enabling the railroad to give better service or operate more cheaply rather than independently competing with other motor carriers. Undoubtedly, the Commission has not consistently required each rail affiliated motor carrier to foregoing motor billings or tariffs. Key points to break traffic are relatively new. 28 M.C.C. 5. Rail affiliates have been permitted to leave the line of the railroad to serve communities without other transportation service. Those divergencies, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission. It is because Congress could not deal with the multitudinous and variable situations that arise that the Commission was given authority to adjust services within the limits of the Motor Carrier Act, Sec. 208."

Also in *Interstate Commerce Commission v. Parker*, 326 US 60, 89 L. Ed. 2051, it appeared that the Commission had granted a restri certificate to a subsidiary of Pennsylvania R. R. C authorizing over the road truck movement for shipments moving on rail billing, and at rail rates. A three judge district court annulled the order of the Commission because there were existing motor carriers serving the territory who were ready, willing and able to perform transportation of such rail billed freight. This court reversed the three judge district court and said:

> "The National Transportation Policy has recently been authoritatively summarized by Congress. That declaration requires administration so as to preserve the inherent advantages of each method of transportation and to promote 'safe, adequate, economical and efficient service.' Such broad generalizations, while well expressing the Congressional purpose, must frequently produce overlapping aims. In such situations, the solution lies in the balancing by the Commission of the public interests in the different types of carriers with due regard to the declared purposes of Congress."

After discussing the discretion vested in the Commission to regulate various types of transportation this court went on to say:

> "The alternative to the existence of this discretion is that the language of the Interstate Commerce Act, part II, forbids the granting to railroads of a certificate of convenience and necessity for the operation of motor trucks, under specially limited certificates, when there are certificated motor carriers, independent of railroad authority or supervision, with whom arrangements for the service might be made by the rail carriers. There is no such prohibition in terms. Any such implication is negated by the discretion to grant certificates conferred on the Commission by the Act."

The finding of the Commission that public convenience and necessity require the authority granted is supported by substantial evidence and is to be accepted by the courts.

U. S. A. v. Pierce Auto Freight Lines, 327 US 515, 90 L. Ed. 121
Interstate Commerce Comm. v. Parker, 326 US 60, 89 L. Ed. 2051
U. S. A. v. Pennsylvania R. R. Co., 323 US 612, 89 L. Ed. 409
McLean Trucking Co. v. U. S. A., 321 US 67, 88 L. Ed. 544

Appellants' jurisdictional statements do not challenge the finding of the Commission that appellee-intervenor, Rock Island Motor Transit Company, is the only carrier rendering a regular transportation service to a host of intermediate and off-route points in Iowa. Before the court below appellants argued that the evidence was insufficient to support the Commission's findings that public convenience and necessity required the service of Rock Island Motor Transit Company. They have apparently shifted their position and now urge that, while there is evidence sufficient to support a finding of public convenience and necessity as to the small intermediate communities, there is insufficient evidence that such service is required at the larger centers of population such as Davenport and Bettendorf, Iowa, Rock Island, Moline, East Moline, Illinois, Des Moines, Cedar Rapids, Council Bluffs, Iowa and Omaha, Nebraska.

Motor Transit holds the only outstanding intrastate certificates authorizing service on the White Line and Frederickson routes, and transports rail shipments on rail billing for its parent company. For more than twenty years appellee-intervenor and its predecessors in title and interest have been performing a dependable interstate motor carrier service to all communities on its routes, large and small. The Commission pointed out in its report and order

that by combining intrastate and rail traffic with interstate shipments intervenor was in much better position to continue to perform "peddler" service to the small intermediate and off-route communities than were the appellants here, that such service involved a high percentage of truck mileage with practically empty vehicles, and was expensive to maintain. The Commission concluded that any restriction upon the ability of Motor Transit to continue this character of service was not in the public interest because protesting motor carriers would be unable to provide comparable service for interstate traffic alone. Motor Transit would be left to handle all intrastate and rail billed traffic, the volume of which would not warrant continuance of its present service to the smaller intermediate communities. We submit the conclusion of the Commission is supported by substantial evidence, and the court below properly held that

> "The conclusion that the grant appears necessary in the public interest is well founded."

The question as to the extent of the authority to be granted to Rock Island Motor Transit Company was within the discretion of the Commission with which the courts are in no manner concerned.

CONCLUSION

The decision of the Commission in this case is in strict accord with prior decisions and policies which the Commission has followed since the enactment of the Motor Carrier Act. Neither the National Transportation Policy nor the provisions of Section 5(2)(b) of the Act, restrict the power of the Commission to authorize certificates for the performance of motor carrier service which it has found pub-

lic convenience and necessity require. The construction of Section 5(2)(b), for which appellants contend, is contrary to the Congressional intent.

The sufficiency of the evidence to support the Commission's findings is clearly within the orbit of Commission discretion. We, therefore, say it is manifest on the face of the record and the jurisdictional statements that the legal questions presented are so unsubstantial as not to require further argument. The judgment below should be affirmed.

ON APPEAL FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

MOTION BY THE INTERSTATE COMMERCE COMMISSION TO AFFIRM

Pursuant to Rule 16, Paragraph 1 (c) of the Revised Rules of this Court, the appellee Interstate Commerce Commission moves that the judgment of the district court be affirmed.

OPINION BELOW

The opinion of the district court has not been reported, but a copy is contained in Appendix A to the Jurisdictional Statement in No. 961, pp. 28–32. The Commission's decision (63 M. C. C. 91) is contained in Appendix D to the Jurisdictional Statement in No. 973, pp. 15a–46a.

STATUTES INVOLVED

The statutory provisions involved are set forth verbatim in Appendix D to the Jurisdictional Statement in No. 961, pp. 34–43.

QUESTIONS PRESENTED

1. Where the Commission, acting under Section 207 (a) of the Interstate Commerce Act, finds that the public convenience and necessity requires new or additional motor carrier service to be performed by a railroad controlled motor carrier, does the proviso of Section 5 (2) (b) of the Act, applicable to mergers and acquisitions, require that such motor carrier service be restricted to service auxiliary and supplemental to the rail service, regardless of the public need for transportation?

2. Whether the court below correctly held that the Commission's findings of fact are supported by substantial evidence.

STATEMENT

These are direct appeals taken under 28 U. S. C. 1253 and 2101 (b) from a final judgment, entered January 27, 1956, of a three-judge district court convened pursuant to 28 U. S. C. 2284 and 2325. The

judgment dismissed appellants' complaints seeking to set aside an order of the Interstate Commerce Commission (hereinafter called the Commission). The Commission's order, entered on November 22, 1954, granted an application by a motor carrier subsidiary of a railroad for a certificate of public convenience and necessity to transport property between Silvis, Illinois, and Omaha, Nebraska, over regular routes, serving designated intermediate and off-route points, and subject to certain conditions, but without imposing restrictions which would specifically limit the operations of the railroad subsidiary to services which are auxiliary to or supplemental of the rail service of the parent railroad.

Background.—On April 1, 1938, the Commission authorized The Rock Island Motor Transit Company (hereinafter called "Motor Transit", which was then and still is a wholly-owned subsidiary of Chicago, Rock Island and Pacific Railroad Company), to purchase the property and general commodity operating rights of the White Line Motor Freight Company which operated on U. S. Highway 6 between Silvis, Illinois (near the Mississippi River), and Omaha, Nebraska, with the following conditions here pertinent (Docket No. MC-F-445, *Rock Island M. Transit Co.—Purchase—White Line M. Frt.*, 5 M. C. C. 451, 458):

> (2) that applicant shall not, if the authority herein granted be exercised, render service from or to, or interchange traffic at, any point other than a station on the lines of said railroad; (3) that the authority herein granted shall be sub-

> ject to such further limitations, restrictions, or modifications as we may find it necessary to impose or make in order to insure that service shall be auxiliary or supplementary to train service of the railroad and shall not unduly restrain competition.

A certificate was issued to Motor Transit on December 3, 1941, following this purchase, in Docket No. MC–29130. On November 28, 1944, the Commission authorized Motor Transit to acquire the general commodity certificates and property of D. H. and J. H. Frederickson (Docket No. MC–F–2327, *Rock Island M. Transit Co.—Purchase—Frederickson*, 39 M. C. C. 824) covering certain routes connecting with the White Line Route, between Harlan, Atlantic and Oakland in Iowa, and Omaha, Nebraska (hereafter referred to as the Frederickson Route).

However, before a certificate covering the Frederickson Line purchase was issued to Motor Transit, the Commission, on February 5, 1945, reopened that proceeding (MC–F–2327), the proceeding relating to the White Line acquisition (MC–F–445), and Motor Transit's certificate proceeding in MC–29130, to determine what restrictions, if any, should be imposed to insure that the motor carrier service performed by Motor Transit would be limited to that which is auxiliary to, or supplemental of, the rail service of its parent company. After proceedings (40 M. C. C. 457 and 55 M. C. C. 567) in which Motor Transit offered no evidence as to the necessity for such restrictions but challenged the power of the Commission to impose them, the Commission, in April 1949, ordered that

Motor Transit's operations on the White Line and Frederickson Line routes be subjected to the following five conditions (55 M. C. C. 567, 597):

> 1. The service to be performed by The Rock Island Motor Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railroad Company, hereinafter called the railroad.
>
> 2. The Rock Island Motor Transit Company shall not render any service to or from any point not a station on a rail line of the railroad.
>
> 3. No shipments shall be transported by The Rock Island Motor Transit Company between any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.
>
> 4. All contractual arrangements between the Rock Island Motor Transit Company and the railroad shall be reported to us and shall be subject to revision, if and as we find it to be necessary, in order that such arrangements shall be fair and equitable to the parties.
>
> 5. Such further specific conditions as we, in the future, find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

The Commission's *power* to impose the quoted restrictions was challenged by Motor Transit before a three-judge District Court for the Northern District of Illinois, which denied that power in *Rock Island Motor Transit Co.* v. *United States*, 90 F. Supp. 516 (November 29, 1949). However, that decision was

reversed and the Commission's power to impose those restrictions was finally sustained by this Court in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419 (February 26, 1951). A certificate of public convenience and necessity containing these restrictions was issued to Motor Transit on September 11, 1951.

However, on August 30, 1951, and prior to the issuance of the certificate dated September 11, the Commission issued to Motor Transit temporary authority to operate over the White Line and Frederickson Line routes, subject to the following restrictions:

> (1) No service to be performed for shipments originating at Chicago, Ill., or Omaha, Nebr., and destined to either of said points.
>
> (2) No shipment to be transported between any of the following points or through, or to, or from more than one of said points: Omaha, and collectively Davenport and Bettendorf, Ia., Rock Island, Moline and East Moline, Ill.
>
> (3) No single shipment to be handled on motor carrier billing weighing more than 2,000 pounds.

On November 1, 1951, the weight limitation was increased to a maximum of 5,000 pounds for any one shipment. Since August 30, 1951, Motor Transit has operated under this temporary authority over the routes in question.

The present proceeding.—The proceeding resulting in the order presently under attack arises out of an application for a *permanent* certificate of public convenience and necessity under Section 207 (a) of the Act filed by Motor Transit on October 26, 1951.

(Commission's Docket No. MC–29130 (Sub. No. 70)). The motor carrier service for which authority was requested in this application is described in detail at pages 91 and 92 of the Commission's report (63 M. C. C. 91 and 92). Leaving aside the requested route segment between Chicago and Silvis, Illinois, which the Commission denied on the ground that Motor Transit already possessed such authority (63 M. C. C., p. 108), the application in substance sought authority to serve points on the White Line and Frederickson Line routes, plus certain named off-line points, without the restrictions which the Commission had imposed in the certificate dated September 11, 1951, and which had been upheld by this Court.

A hearing before a hearing examiner was held on Motor Transit's application, and consumed 14 days between March 18 and May 22, 1952. In this hearing, in contrast with the earlier acquisition proceedings, Motor Transit presented extensive evidence as to the public need for its motor carrier service in the territory involved in the application. The hearing examiner issued a recommended decision on April 21, 1953, exceptions were filed, and oral argument was had before the entire Commission. On November 22, 1954, the Commission issued its report (63 M. C. C. 91) and order substantially granting Motor Transit's application, subject to the following conditions (63 M. C. C., p. 109; Jurisdictional Statement No. 973, Appendix D, p. 41a):

> (1) that there may be attached from time to time to the privileges granted herein such rea-

> sonable terms, conditions, and limitations as the public convenience and necessity may require, and
>
> (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties; * * *

The plaintiffs' petition for reconsideration was denied by the Commission on July 6, 1955.

The appellants in No. 961, being motor carriers and associations of motor carriers which actively opposed Motor Transit's application under Section 207 (a) filed their complaint in the District Court on July 20, 1955, seeking to set aside the Commission's orders. The appellants in No. 973, being railway labor organizations whose intervention in the proceeding the Commission had permitted on July 6 and September 9, 1955, filed their complaints in the District Court as intervening plaintiffs on October 24, 1955.

The District Court heard arguments on the case on December 15, 1955, and rendered its opinion on January 11, 1956 (Jurisdictional Statement, No. 961, Appendix A, p. 28). Judgment for defendants (*Ibid.* Appendix B, p. 32), was entered by the District Court on January 27, 1956. The Motor Carrier appellants in No. 961 filed notice of appeal on March 23, 1956, and the railway labor appellants in No. 973 filed such notice on March 26, 1956.

The District Court's opinion held that the Commission had power, under Section 207 (a) of the Interstate Commerce Act (49 U. S. C. 307 (a)) to grant a certificate to a motor carrier affiliate of a railroad without restricting service thereunder to that which is auxiliary to or supplementary to railroad service, provided there is a sufficient showing that public convenience and necessity required such unrestricted grant. In so holding, the District Court denied the contentions of the protesting motor carriers and the railway labor organizations that the requirement of the proviso to Section 5 (2) (b) of that Act (49 U. S. C. 5 (2). (b)), prohibiting acquisitions by a railroad, or its affiliate, of motor carrier operating rights except in those cases where the Commission finds that the proposed acquisition transaction "will enable such [railroad] carrier to use service by motor vehicle to public advantage in its [rail] operations and will not unduly restrain competition," must be applied in connection with a new service or extension-of-service application by a railroad or its affiliate for motor carrier rights. The lower court held the Section 5 (2) (b) proviso not to be an absolute limitation on the grant of a motor carrier certificate to a railroad or its affiliate; and that the policy expressed by Congress in such proviso, although it is to be considered by the Commission even in application cases under Section 207 (a), need not be applied by the Commission in those exceptional cases under Section 207 (a) where the public interest, convenience and necessity require the grant of un-

restricted authority to a railroad applicant for operating authority.

The District Court further held that the Commission's findings, to the effect that the public convenience and necessity justified the grant under the exceptional circumstances of the instant case, were supported by evidence in the record.

ARGUMENT

1. We contend, with the court below, that where the Commission, acting under Section 207 (a) of the Interstate Commerce Act, finds that unusual circumstances of public convenience and necessity require new or additional motor carrier service to be performed by a railroad controlled motor carrier, the proviso of Section 5 (2) (b), applicable to mergers and acquisitions, does not require that such motor carrier service be restricted to service auxiliary and supplemental to the rail service without regard to the public need for transportation. This result is compelled by the language, history and consistent administrative construction of the Act.

(a) The Commission's order in the instant case was issued pursuant to Section 207 (a) of the Act which provides that "Subject to section 210, a certificate shall be issued to any qualified applicant * * * if it is found that the applicant is fit, willing, and able * * * and that the proposed service * * * is or will be required by the present or future public convenience and necessity." It is Section 207 (a) which empowers the Commission to authorize new or additional motor carrier service. The proviso of

Section 5 (2) (b) provides, in effect, that where a railroad or its affiliate acquires an existing motor carrier, the Commission must find not only that the proposed acquisition is "consistent with the public interest" (as in any case in which one carrier acquires another), but also that the acquisition will enable the railroad to use motor carrier service to public advantage in its rail operations and will not unduly restrain competition. The appellants contend that Section 5 (2) (b) must be read into Section 207 (a) as prohibiting the Commission from authorizing a railroad affiliate (such as Motor Transit) to provide *new or additional* motor carrier service unless such service is restricted to that which is auxiliary and supplemental to the rail service of the parent Rock Island Railroad.

To begin with, Section 207 (a) simply provides that "*any* qualified applicant" may be authorized to provide new or additional motor-carrier service—as distinguished from the acquisition of an existing motor carrier operation. It contains no requirement that unusual or special conditions be imposed upon certificates issued to motor carrier subsidiaries of railroads. The omission of such a requirement is particularly significant because Section 207 (a) begins with the words "Subject to section 210," which prohibits a contract motor carrier or its affiliate from holding a common carrier certificate under Section 207 unless such a dual operation is approved by the Commission as being in the public interest. By thus specifying in Section 207 the dual transportation operations which it did not wish to be authorized without restriction,

the failure of Congress to refer to the restriction of Section 5 (2) (b) presumably means that it did not intend that restriction to be imported into Section 207. It cannot be presumed that this precise statutory language was eccentric or inadvertent, since the Congress might well have concluded that the competitive consequences of permitting a railroad to absorb existing motor carrier competitors must satisfy other standards than the public convenience and necessity which will support the authorization of new or additional motor carrier service.

(b) While the Commission has not treated the proviso of Section 5 (2) (b) as a rigid restriction upon the authority conferred by Section 207 (a), it has recognized, beginning with *Pennsylvania Truck Lines, Inc.—Control—Barker,* 1 M. C. C. 101 (1936), that the proviso also embodies a policy against general and unrestricted railroad entry into the motor carrier field. At the same time, in a series of cases beginning with *St. Andrews Bay Transportation Company Extension of Operations,* 3 M. C. C. 711 (1937), the Commission refused to read the proviso of Section 5 (2) (b) into Section 207 as a rigid limitation on the issuance of certificates of public convenience and necessity.

The Commission's construction of Section 5 (2) (b) and 207 (a) in certificate cases is consistent with the sparse legislative history of the proviso of Section 5 (2) (b) which indicates that the specific concern of Congress was to restrict railroads' acquisition of control of motor carriers. See *Hearings before House Committee on Interstate and Foreign Com-*

merce on H. R. 5262 and S. 1629, 74th Cong., 1st Sess. (1935), pp. 46, 337, 376; 79 Cong. Rec. 5655, 12206.

More significant, during the *Hearings before the Senate Subcommittee on Interstate Commerce on S. 3606,* 75th Cong., 3d Sess. (the 1938 amendments to the Motor Carrier Act), pp. 26–31, Senator Shipstead, after referring to the Commission's decisions in the *Barker* and *St. Andrews Bay* cases, *supra,* stated that it was "clearly the intention of Congress that [railroads] should be prohibited from acquiring or initiating motor truck or bus service under certain other conditions." Accordingly, he proposed an amendment which would have repeated in Section 207 what is now the proviso of Section 5 (2) (b). Senator Shipstead's amendment was supported by the motor carrier industry (*ibid.* 128–129) and opposed by the railroads (*ibid.* 157–164). Thereafter, Senator Shipstead withdrew his amendment for the reason that it appeared that the amendment would provoke a controversy and might delay the adoption of S. 3606 at that session. Sen. Rep. 1650, 75th Cong., 3d Sess., p. 3.

Thus, in 1938, with specific knowledge of the Commission's view that the proviso of Section 5 (2) (b) was not controlling in determining applications for motor carrier certificates under Section 207, Congress declined to avail itself of an opportunity to write the proviso into Section 207. Moreover, between the *St. Andrews Bay* case and February 1940, the Commission at least twice reiterated its view that the proviso of Section 5 (2) (b) was not rigidly controlling in cases under Section 207. *Interstate Transit*

Lines Extension—Verdon, Nebraska, 10 M. C. C. 665 (1938); *Santa Fe Trail Stages, Inc. Common Carrier Application,* 21 M. C. C. 725, 753 (1940). Nevertheless, in the general overhaul of the Interstate Commerce Act by the Transportation Act of 1940, Section 207 (a) was not changed. We submit that this post-enactment legislative history is persuasive evidence that the Commission has interpreted correctly the will of Congress. *United States* v. *American Trucking Associations,* 310 U. S. 534, 549–550.

(b) As noted above, beginning with the *St. Andrews Bay* case, *supra,* the Commission has long and consistently held that the proviso of Section 5 (2) (b) is not to be read into Section 207 (a) as a rigid limitation on the issuance of certificates to railroads or their affiliates. Nevertheless, from the beginning in such cases, the Commission has pointed to the public need for the additional motor carrier service to be performed by the railroad-controlled applicant and which probably could not or would not be met by existing motor carriers. See *Kansas City Southern Transport Co. Inc., Common Carrier Application,* 10 M. C. C. 221, 237–238 (1938); and 28 M. C. C. 5 (1941); *Santa Fe Trail Stages, Inc., Common Carrier Application, supra; Burlington Transportation Co. Extension—Council Bluffs,* 28 M. C. C. 783 (1941); *Rock Island Motor Transit Co. Extension—Wellman, Iowa,* 31 M. C. C. 643 (1942); *Texas & Pacific Motor Transport Co. Ext.—Point Blue, La.,* 47 M. C. C. 425 (1947); *Burlington Truck Lines, Inc. Extension—Iowa,* 48 M. C. C. 516 (1948).

From these cases, as well as from the many cases in which motor carrier service by rail affiliates has been restricted to service auxiliary and supplemental to the rail service, the Commission has evolved the general principle that

> the accomplishment of the purposes forming the national transportation policy, require that, *except where unusual circumstances prevail*, every grant to a railroad or to a railroad affiliate of authority to operate as a common carrier by motor vehicle or to acquire such authority by purchase or otherwise should be so conditioned as definitely to limit the future service by motor vehicle to that which is auxiliary to, or supplemental of, train service. (Emphasis added)

Rock Island Motor Transit Co.—Purchase—White Line Motor Freight, Inc., 40 M. C. C. 457, 473 (1946). Or, as stated otherwise by the Commission in the instant case (App. D to Jurisdictional Statement in No. 973, p. 31a):

> The main purpose for the policy of imposing the five above-quoted restrictions, or modifications thereof, was to prevent the railroads from acquiring motor operations through affiliates and using them in such a manner as to unduly restrain competition of independently operated motor carriers. This policy was and is sound and should be relaxed only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized

independent motor carriers have not furnished, except where it suited their convenience.

We submit that the Commission clearly has struck a reasonable balance between the general Congressional objectives of preventing rail domination of motor carriage and of satisfying the public need for transportation.

(d) We believe that this Court already has recognized implicitly the power of the Commission under Section 207 to authorize a railroad or its affiliate to perform motor carrier service which is not auxiliary and supplemental to the rail service. While the Court has not had occasion to consider squarely the precise question involved in this case, it has rendered three decisions in this general area.

Interstate Commerce Commission v. *Parker*, 326 U. S. 60, upheld the power of the Commission under Section 207 to authorize a subsidiary of a railroad to perform motor carrier service supplemental to the rail service even though existing motor carriers could arrange to perform the proposed service. *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419, sustains the power of the Commission to approve the acquisition of a motor carrier by a railroad affiliate upon conditions that will restrict the acquired motor carrier operations to service auxiliary and supplemental to the rail service. In *United States* v. *Texas & Pacific Motor Transport Co.*, 340 U. S. 450, this Court held that the Commission is empowered to impose upon certificates issued under Section 207 to railroads or their affiliates substantially the same conditions which were attached to the approval of an

acquisition of an existing motor carrier in the *Rock Island* case.

There is no suggestion in any of these cases that this Court considered the proviso of Section 5 (2) (b) as an inflexible limitation upon the power of the Commission under Section 207 to issue a certificate of public convenience and necessity to "any qualified applicant." To the contrary, we find in this Court's *Rock Island decision* almost express approval of the Commission's long-established view that in certificate cases under Section 207, the proviso of Section 5 (2) (b) is a legislative policy to be taken into account, rather than a straitjacket. Thus, the Court stated (340 U. S., at 442) that—

> Rail affiliates have been permitted to leave the line of the railroad to serve communities without other transportation service. Those divergencies, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission. It is because Congress could not deal with the multitudinous and variable situations that arise that the Commission was given authority to adjust services within the limits of the Motor Carrier Act.

This Court in the *Rock Island* case cited with apparent approval (at least without express disapproval) excerpts from the Commission's decisions in which the "special circumstances" doctrine was announced and applied, in footnote 4 on p. 428 (*Rock Island Motor Transit Co.—Purchase—White Line Motor Freight*, 40 M. C. C. 457, 471, 473–474; *Kansas City Southern Tptn. Co. Common Carrier Applu.*,

10 M. C. C. 221, 237), and in footnote 21 on p. 442 (*Rock Island Motor Transit Co. Extension—Wellman, Iowa*, 31 M. C. C. 643, and *Rock Island Motor Transit Co.—Purchase—White Line M. Frt.*, 55 M. C. C. 567, 584.)

In view of the language and history of Section 207 and the proviso of Section 5 (2) (b) and their interpretation by the Commission and by this Court, we submit that the Commission clearly is authorized in appropriate circumstances, to empower a rail affiliate to perform motor carrier service which is not restricted to service auxiliary and supplemental to the rail srevice.[1]

2. The motor carrier appellants present the question of whether the record before the Commission supports the Commission's report and order authorizing Motor Transit to serve the points here involved, subject only to the conditions discussed hereafter (Jurisdictional Statement in No. 961, p. 3).

[1] The contention of the appellant labor organizations that the present case is simply a continuation or reopening of the prior proceeding involving Motor Transit's acquisition of the White Line and Frederickson Line routes, is merely another way of contending that regardless of the public need for transportation, a rail subsidiary may never be authorized to perform motor carrier service which is not auxiliary and supplemental to the rail service of its parent. As noted above, an application for a certificate under Sec. 207 (a) invokes considerations of public convenience and necessity which are not involved in an application under Sec. 5 (2) (b) for approval of a merger or acquisition. Also, in the instant proceeding, Motor Transit offered extensive evidence as to the public need for the service which the Commission has authorized; while in the earlier proceeding Motor Transit stood entirely upon its legal position that the Commission lacked power to impose the auxiliary and supplemental service restrictions.

However, they "concede that there was sufficient evidence of record to enable the District Court to sustain the Commission's order insofar as it authorized a bona fide auxiliary and supplemental service to be rendered to and from such relatively minor points as Brooklyn, Colfax, Marengo, Newton, Oxford, Victor, Walcott and Wilton Junction." But "to the extent that the Commission's order finds that unrestricted service by Motor Transit between such major points as Davenport, Cedar Rapids, Des Moines, Council Bluffs and Omaha is required by the public convenience and necessity, appellants contend that the District Court erred in failing to set aside the Commission's order for want of evidentiary support" (*Ibid.*, pp. 10–11).

The Commission's order was based upon the extensive evidence which is summarized in its report. Thus, it had before it the testimony of 111 shipper witnesses from 56 points on the routes in question as to their need for Motor Transit's service (Jurisdictional Statement in No. 973, pp. 22a, 33a–34a). Thirty-eight witnesses from other points, such as Kansas City, testified that they need to use Motor Transit's service to and from points on these routes (*Ibid.* p. 21a). There was particularly persuasive testimony from other motor carriers that only Motor Transit has provided adequate service on interchange shipments to points on the White Line and Frederickson Line routes (*Ibid.* pp. 20a, 33a).

The Commission found, and it is not disputed, that Motor Transit is the only carrier that has maintained

daily (generally at least five days a week) scheduled peddle operations over the entire White Line and Frederickson Line routes regardless of the volume of traffic available for movement in such operations (*Ibid.* p. 33a). Peddle operations consist of pick-up and delivery service, largely at smaller points and in less than truckload lots. Motor Transit is the only carrier with intra-state rights on these routes, because it is the policy of the Iowa State Commerce Commission to grant such rights to only one carrier on a given route (*Ibid.* 38a).[2] The Commission found, in effect, that the expensive peddle service can be performed only by a carrier authorized to handle both interstate and intra-state shipments. Thus, it noted that "The peddle service provided by Motor Transit has been based on interstate, intrastate, and rail-billed traffic. With these three kinds of traffic available it is patent that Motor Transit could provide better service to the public than the motor carriers who claim that they can take over Motor Transit's interstate motor-billed business" (*Ibid.* p. 38a).

Turning to what amounts to the motor carrier appellants' contention that the Commission erred in authorizing Motor Transit to serve the larger points on these routes, such as Davenport and Des Moines, which provide the more profitable truckload shipments, the Commission reasoned as follows (*Ibid.* pp. 38a–39a):

[2] We do not understand the apparent suggestion of the motor carrier appellants (Jurisdictional Statement in No. 961, p. 22, fn. 7) that the Interstate Commerce Commission should ignore if not attempt to abrogate, the policy of Iowa.

There is some evidence of a public need for the proposed truckload services of applicant, but it is not as convincing as that with respect to the peddle operations, and this is understandable because the other motor carriers operating in the area have usually provided satisfactory service on truckload shipments. There is also some evidence that the latter have refused to accept truckloads of low-rated commodities. In any event we feel that there is sufficient basis to warrant a complete grant of authority to applicant. This truckload "cream of the traffic," which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors' operations, should not be handed over to its competitors and Motor Transit expected to provide the expensive peddle services.

Acceptance of the opposing motor carriers' position would have the following results. They would be left to provide the peddle services on interstate motor-billed traffic, which alone will not justify the type of services heretofore rendered by Motor Transit, and all such traffic in truckloads. Motor Transit would be left with intrastate and rail-billed traffic, which will not warrant continuance of the operations conducted by it prior to August 30, 1951. The net result is clearly not in the public interest.[2]

---

[2] In its report (*Ibid.* 20a–21a), the Commission summarizes the testimony of 8 interlining motor carriers as follows:

"Eight motor carriers have been and are interlining traffic with applicant, principally at Chicago and the Tri-Cities. Generally these carriers do not ordinarily experience any difficulty in interlining shipments destined to the larger points of population on U. S. Highway 6, such as Des Moines and Newton, but they are of the opinion that applicant must be in a position to

As the District Court in this case put it, "Actually the result of sustaining the motor carriers' position would be a privilege to them of giving the service now rendered by Motor Transit if they so desire and refusing to give it when it is economically not feasible. That would not appear to serve the public interest." (*Ibid.* p. 13a).

We submit that the Commission's conclusion as to the scope of motor carrier service which must be authorized in order to make commercially feasible the service which is clearly required by the public convenience and necessity is well within the bounds of the broad discretion which Congress has entrusted to it in such matters. *Interstate Commerce Commission* v. *Parker*, 326 U. S. 60, 65, and cases there cited. Also, we believe that these unusual circumstances of public convenience and necessity clearly warranted the Commission in making an exception to its general policy that certificates issued under Section 207 to railroad subsidiaries should authorize only such motor carrier service as is auxiliary and supplemental to the rail service.

Moreover, it should not be overlooked that the Commission has imposed two conditions upon the motor carrier operating authority which it has given to Motor Transit:

---

serve these points and to handle overhead traffic in order to provide the required service, particularly the expensive peddle operations at the smaller points to avoid sustaining a loss on the entire operation. Several of these carriers are members of the American Trucking Associations, Inc., which is opposing the application."

> (1) that there may be attached from time to time to the privileges granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties; * * *.

The second quoted condition was adopted by the Commission for the specific purpose of providing a continuous check upon any unfair subsidization of Motor Transit's motor carrier operations by the parent Rock Island railroad, and thus anticipates the appellant motor carriers' apprehension (Jurisdictional Statement No. 961, p. 24) that Motor Transit will drive them out of business.[4] The validity of this condition was sustained in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419, 436–444.

---

[4] There is no challenge to the Commission's finding that the past "operations of [Motor Transit] have not unduly restrained competition, and there is no evidence that its proposed operations would produce such a result." (Jurisdictional Statement No. 973, p. 36a.)

CONCLUSION

For the foregoing reasons, we submit that the decision below is correct and that these appeals present no substantial questions. The judgment of the district court should be affirmed.

Respectfully submitted.

ROBERT W. GINNANE,
General Counsel,
Interstate Commerce Commission.

JUNE 20, 1956.

CERTIFICATE OF SERVICE

In compliance with the applicable provisions of the Revised Rules of the Supreme Court of the United States, I, Robert W. Ginnane, General Counsel of the Interstate Commerce Commission, on whose behalf the foregoing Motion to Affirm is submitted, and a Member of the Bar of the Supreme Court of the United States, hereby certify that I have served copies of the foregoing document on counsel for the several parties to this proceeding, as follows:

1. On American Trucking Associations, Inc., appellant in No. 961, by mailing copies in duly addressed envelopes with first class postage prepaid to:

Peter T. Beardsley, Esq., and
Fritz R. Kahn, Esq.,
1424 16th St. NW.,
Washington 6, D. C.

2. On Regular Common Carrier Conference of American Trucking Association, Inc., appellant in No. 961, by mailing copies in duly addressed envelopes with first class postage prepaid to:

Roland Rice, Esq., and
Albert B. Rosenbaum, Esq.,
1111 E. St. NW.,
Washington 6, D. C.

3. On appellant motor carriers in No. 961 by mailing copies in duly addressed envelopes with first class airmail postage prepaid to:

Eugene L. Cohn, Esq.,
1 No. LaSalle St.,
Chicago 2, Ill.

Joseph E. Ludden, Esq.,
2130 South Ave.,
La Crosse, Wis.

Stephen Robinson, Esq.,
1020 Savings & Loan Bldg.,
Des Moines 9, Iowa.

Homer F. Bradshaw, Esq., and
Rex H. Fowler, Esq.,
510 Central National Bldg.,
Des Moines 9, Iowa.

4. On Railway Labor Executives Association, et al., appellants in No. 973, by mailing copies in duly addressed envelopes with first class postage prepaid to:

Clarence M. Mulholland, Esq.,
Edward J. Hickey, Jr., Esq., and
James E. Highsaw, Jr., Esq.
620 Tower Bldg.,
Washington 5, D. C.

5. On the United States of America, appellee, by mailing copies in duly addressed envelopes with first class postage prepaid to:

Honorable Simon E. Sobeloff,
Solicitor General of the United States,

Department of Justice,
Washington 25, D. C.

Honorable Oliver Gasch,
United States Attorney for the
District of Columbia,
U. S. Court House,
Constitution Ave. & John Marshall Pl. NW.,
Washington, D. C.

6. On The Rock Island Motor Transit Company, Employees' Committee of The Rock Island Motor Transit Company, Traffic Bureaus and/or Chambers of Commerce of Davenport, et al., Shippers' Committee, et al., and Iowa State Commerce Commission, appellees, by mailing copies in duly addressed envelopes with first class airmail postage prepaid to:

Arthur L. Winn, Jr., Esq.,
743 Investment Bldg.,
Washington 5, D. C.

Alden B. Howland, Esq., and
John H. Martin, Esq.,
500 Bankers Trust Bldg.,
Des Moines 9, Iowa.

D. C. Nolan, Esq.,
405 Iowa State Bank Bldg.,
Iowa City, Iowa.

Irving E. Chenoweth, Esq., Iowa Commerce Counsel, and Conrad A. Amend, Esq., Assistant Iowa Commerce Counsel,
Iowa State Commerce Commission,
E. 12th & Court Ave.,
Des Moines, Iowa.

No. 8

BRIEF OF INTERVENOR-APPELLEE IOWA STATE COMMERCE COMMISSION

The Iowa State Commerce Commission is an elective body chosen by the people of Iowa. Broadly speaking, it is charged with the responsibility of regulating surface transportation in the public interest. Its duty is to so regulate the various carriers operating within the state as to preserve an adequate transportation system to meet the public convenience and necessity. The mem-

bers of the Commission are at all times cognizant of this responsibility. It is for this reason that the Commission intervened in support of the Rock Island Motor Transit Company before the Interstate Commerce Commission and in the courts.

The Rock Island Motor Transit Company, and its predecessors, have for many years served a large number of cities and towns in Iowa, both as an interstate carrier operating under authority granted by the Interstate Commerce Commission, and as an intrastate carrier operating under authority granted by the Iowa Commission. For a number of years prior to September 1, 1951, the Rock Island Motor Transit Company has been the only carrier rendering an adequate and efficient transportation service on less-than-truckload shipments to the many small towns located on the routes in question and to certain other adjacent points located on its authorized routes. Since that date, it has been the only carrier providing consistent service to these points to the extent authorized under its temporary authorities. Because of the weight and "key point" restrictions contained in the temporary operating authorities, however, the service rendered was not regarded as adequate. The trend of motor carriers operating in Iowa generally has been to refrain from rendering local service on small shipments. For these reasons only, the Iowa Commission has supported the Rock Island Motor Transit Company's effort to have these restrictions removed, and to continue permanently the service it has been rendering. It is not the Iowa Commission's purpose to support one carrier to the detriment of another, but only to do what it can to establish and preserve an adequate transportation sys-

tem. It recognizes that regulation of interstate transportation is within the exclusive jurisdiction of the Interstate Commerce Commission.

The Iowa Commission adheres to the rule of public utility regulation that where the potential business makes economically feasible service by only one common carrier, it certificates only one. The Iowa Commission many years ago granted a certificate to Rock Island Motor Transit's predecessor in interest for intrastate traffic along the routes in question. No other carrier is authorized, and none appears willing to perform small "peddle" type service along these routes.

The following testimony was given at the hearing before the Interstate Commerce Commission by Carl W. Reed, at that time Chairman of the Iowa State Commerce Commission. His testimony appears at page 739 of the record and the following excerpt appears at pages 741, 742 and 743:

"Q. (By Mr. Howland) Judge Reed, as a member of the Iowa State Commerce Commission, you are familiar with the general trends in the motor carrier industry with respect to service and with respect to the operation of motor carriers generally, is that true?

A. I think so.

Q. What has been the general trend in recent months and particularly in the last 18 months to 2 years with respect to the service rendered by motor carriers to intermediate points between the larger centers of population in the State, both interstate and intrastate?

Mr. Fowler: That is objected to as immaterial, incompetent.

Exam. Carpenter: The objection is overruled.

A. The experience of our commission, based upon the information that came to us from the shippers and also [fol. 939] from the carriers themselves, has been that the carriers were not interested in the local service.

Mr. Fowler: I move to strike the answer of the witness on the ground that it is hearsay.

Exam. Carpenter: The motion is overruled.

Q. (By Mr. Howland) What have you observed with respect to the position and the ability of motor carriers generally to render service on smaller shipments to intermediate points between the larger centers of population, say points between Iowa City and Des Moines or Iowa City and Newton, Iowa, territories of that kind?

Mr. Fowler: That is objected to on the ground that it is immaterial, calls for an incompetent conclusion and opinion of the witness.

Exam. Carpenter: The motion is overruled.

A. I couldn't say as to what the ability of the carriers was. I only know what the actual service that they are rendering or are not rendering is.

Q. (By Mr. Howland) And what has been the trend with respect to that phase of the matter, Judge?

Mr. Fowler: Same objection.

Exam. Carpenter: Same ruling.

A. The trend in this State in the matters that we have contact with has been that the carriers generally are getting away from the local service and the smaller shipments.

Q. (By Mr. Howland) In recent months, has the Iowa Commission had motor carrier matters be-

fore it, both in instances where there have been applications for authority and in instances in which carriers already possessing authority have proposed to curtail the quantity of the service they are performing to the intermediate points?

Mr. Fowler: That is objected to as immaterial and for the reason that if it involves matters pertaining to intrastate operators, it is particularly immaterial to this record.

Exam. Carpenter: Objection overruled.

The Witness: Will you read that question, please?

(Question read.)

A. Yes; we have had some matters of that kind and in some instances we have approved the leasing of some of the local service performed by carriers that had service between key points and along the entire line.

Q. (By Mr. Howland) Judge Reed, I just want to be certain that I fully understand the position that the Iowa commission has taken. What is the commission primarily interested in here with respect to this particular application? In other words, are you particularly supporting the application because it is made by the Rock Island Motor Transit Company, or have there been other factors that have motivated you and the other members of the commission in the position which you have taken?

Mr. Fowler: That is objected to as immaterial and hearsay.

Exam. Carpenter: The objection is overruled.

A. The position of the commission has been that it doesn't take any position for or against any particular carrier. In this particular instance,

our interest has been to see that service was performed to the various communities.

Q. (By Mr. Howland) And as far as you are advised, do you know of any carrier that is in a position to or is ready, willing, and able to perform the service which has been performed by the applicant along the routes between Davenport and Council Bluffs, Iowa, or Omaha, Nebr., which are covered by this application

Mr. Fowler: That is objected to as hearsay.

Exam. Carpenter: Objection overruled.

A. Of course, I don't know offhand just what authority every carrier has, but I do not recall of any carrier that has been performing this service that the Rock Island Motor Transit Company has been performing."

Conditions have not changed in Iowa to cause the Iowa State Commerce Commission to deviate from its previous views. It is felt that the best way to preserve adequate service to the public of the kind rendered by the Rock Island Motor Transit Company is for that carrier to conduct operations as authorized by the Interstate Commerce Commission. The order of the Interstate Commerce Commission finds abundant support in the evidence and is within the lawful powers of that Commission. We believe that both the law and the public interest require that the order of the Interstate Commerce Commission and the judgment of the District Court be sustained.

Respectfully submitted,

PAUL AHLERS,

Bankers Trust Building
Des Moines, Iowa.

OPINIONS BELOW	1
JURISDICTION	2
STATUTES INVOLVED	2
QUESTIONS PRESENTED	2
STATEMENT	3
SUMMARY OF ARGUMENT	9
ARGUMENT	16
I. The Commission is empowered under Section 207 (a) to authorize a railroad-controlled motor carrier to perform ordinary motor carrier service to points on or near the line of the railroad, at least in the special circumstances of this case	16
Preliminary analysis	16
A. By its terms, the proviso of Section 5 (2) (b) applies only to railroad acquisitions of existing motor carriers, and does not restrict the issuance of certificates under Section 207 (a) authorizing new motor carrier service	20
B. The legislative history contains no indication that the proviso of Section 5 (2) (b) was intended (1) to restrict a railroad's motor carrier operations to less-than-truckload movements to smaller points on rail billing and at rail rates, or (2) to be applied as a rigid limitation upon Section 207 (a)	26
C. The Commission has consistently interpreted the Act as empowering it, in special circumstances, to issue to a rail-controlled motor carrier a certificate under Section 207 (a) authorizing ordinary or unrestricted motor service to points on or near the railroad	37
D. Assuming that the proviso of Section 5 (2) (b) applies to the issuance of certificates under Section 207 (a), it does not preclude the Commission from authorizing a railroad controlled motor carrier to provide ordinary motor carrier service to points on or near the railroad	49
E. This Court's decisions implicitly recognize that under Section 207 (a) a railroad may be authorized to perform ordinary motor carrier service to points on the railroad	52

APPEALS FROM THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

BRIEF FOR THE INTERSTATE COMMERCE COMMISSION

OPINIONS BELOW

The opinion of the three-judge District Court (R. 192–195) is reported at 144 F. Supp. 365. The report of the Interstate Commerce Commission in Docket No. MC–29130 (Sub. No. 70), *The Rock*

Island Motor Transit Company Common Carrier Application, dated November 22, 1954 (R. 93–121), is reported at 63 M. C. C. 91.

JURISDICTION

The judgment of the District Court (R. 195–196) was entered on January 27, 1956, and separate notices of appeal were filed by the appellants on March 23 and 26, 1956 (R. 197–202). The jurisdiction of this Court rests upon 28 U. S. C. 1253 and 2101 (b). Probable jurisdiction of the cases was noted on October 8, 1956, and they were consolidated for oral argument (R. 204).

STATUTES INVOLVED

The pertinent provisions of the Interstate Commerce Act are set forth in Appendix A to the brief of the appellants in No. 6.

QUESTIONS PRESENTED

1. Whether the proviso in Section 5 (2) (b) of the Interstate Commerce Act precludes the Commission from authorizing, pursuant to Section 207 (a), a subsidiary of a railroad to provide ordinary motor carrier service at points on or near the railroad to meet a public need for service which other motor carriers cannot or will not provide.

2. Whether the motor carrier service authorized by the Commission was warranted by the Commission's findings and by the evidence as to public convenience and necessity.[1]

[1] In noting probable jurisdiction in these cases, the Court further stated that counsel in No. 8 are invited to discuss the

STATEMENT

This case originated in a complaint (R. 85–93) filed in the court below on July 20, 1955, by American Trucking Associations, Inc., its Regular Common Carrier Conference, and nine motor carriers seeking to set aside the report and order of the Interstate Commerce Commission dated November 22, 1954, which directed the issuance of a certificate of public convenience and necessity under Section 207 (a) of the Interstate Commerce Act (49 U. S. C. 307 (a)) authorizing The Rock Island Motor Transit Company to carry general commodities as a motor common carrier over described routes between Silvis, Illinois, and Omaha, Nebaska. The Iowa State Commerce Commission, The Rock Island Motor Transit Company (hereafter referred to as "applicant" or "Motor Transit"), a committee of its employees, and numerous commercial and shipper organizations from the territory involved were permitted to intervene in support of the Commission's order (R. 172, 173). The Railway Labor Executives' Association, representing

issue of standing to sue. The interest of Railway Labor Executives' Association, et al., the appellants in No. 8, as representatives of the employees of the Chicago, Rock Island and Pacific Railroad, in the subject matter of the Commission's order is somewhat tenuous. However, Section 17 (11) of the Interstate Commerce Act provides that "Representatives of employees of a carrier, duly designated as such, may intervene and be heard in any proceeding under this act affecting employees." Section 17 (11) is made applicable to motor carrier proceedings under Part II by Section 205 (h), and was applied by this Court in *Brotherhood of Railroad Trainmen* v. *Baltimore & Ohio Ry. Co.*, 331 U. S. 519. Under these circumstances, the appellees have not challenged the standing to sue of the appellants in No. 8.

18 railway labor organizations, the Brotherhood of Railway Trainmen and the Order of Railway Conductors and Brakemen were allowed to intervene in support of the plaintiffs (R. 171). Rock Island Motor Transit Company is a wholly owned subsidiary of the Chicago, Rock Island & Pacific Railroad Company (R. 95).

Answers were filed by the United States (R. 138, 174, and 176), by the Commission (R. 133, 186, and 189) and by the intervening defendants (R. 126, 152, 179, and 183).

Background proceedings. In 1938, the Commission authorized Motor Transit to purchase the property and operating rights of the White Line Motor Freight Company which operated on U. S. Highway 6 between Silvis, Illinois, and Omaha, Nebraska, with the following conditions here pertinent (*The Rock Island Motor Transit Co.—Purchase—White Line Motor Freight Co.*, 5 M. C. C. 451, 458):

> that applicant shall not, if the authority herein granted be exercised, render service from or to, or interchange traffic at, any point other than a station on the lines of said railroad; that the authority herein granted shall be subject to such further limitations, restrictions, or modifications as we may find it necessary to impose or make in order to insure that service shall be auxiliary or supplementary to train service of the railroad and shall not unduly restrain competition.

These conditions, which were accepted by Motor Transit, precluded it from making any use of White

Line operating rights to points which were not stations on the Rock Island.

In 1944, the Commission authorized Motor Transit to acquire the certificates and property of D. H. and J. H. Frederickson, covering routes between Harlan, Atlantic and Oakland in Iowa and Omaha, Nebraska (hereafter referred to as the Frederickson Line), 39 M. C. C. 824.

However, before a certificate covering the Frederickson Line route was issued to Motor Transit, the Commission, in February 1945, reopened that proceeding and the proceeding relating to the White Line acquisition to determine what restrictions, if any, should be imposed to insure that the motor carrier service performed by Motor Transit was limited to that which is auxiliary to, or supplemental of, the rail service of its parent company. Thereafter, the report of the entire Commission on reconsideration, dated March 4, 1946, directed that Motor Transit's operations on the White Line and Frederickson Line routes be subjected to the following five conditions:

> 1. The service to be performed by The Rock Island Motor Transit Company shall be limited to service which is auxiliary to, or supplemental of, train service of The Chicago, Rock Island and Pacific Railroad Company, hereinafter called the railroad.
>
> 2. The Rock Island Motor Transit Company shall not render any service to or from any point not a station on a rail line of the railroad.
>
> 3. No shipments shall be transported by The Rock Island Motor Transit Company between

any of the following points, or through, or to, or from, more than one of said points: Omaha, Nebr., Des Moines, Iowa and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill.

4. All contractual arrangements between the Rock Island Motor Transit Company and the railroad shall be reported to us and shall be subject to revision, if and as we find it to be necessary, in order that such arrangements shall be fair and equitable to the parties.

5. Such further specific conditions as we, in the future, find it necessary to impose in order to insure that the service shall be auxiliary to, or supplemental of, train service.

40 M. C. C. 457, 477. Upon further reconsideration, in the course of which Motor Transit offered no evidence as to the public need for its service without such restrictions but only challenged the power of the Commission to impose them, the entire Commission affirmed its decision. 50 M. C. C. 567. The Commission's *power* to impose the quoted restrictions was challenged in the courts by Motor Transit, and was finally sustained by this Court in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419 (1951). A certificate of public convenience and necessity containing these restrictions was issued to Motor Transit on September 11, 1951 (R. 96).

However, on August 30, 1951, and prior to the issuance of the certificate dated September 11, the Commission issued to Motor Transit temporary authority to operate over the White Line and Frederickson Line routes, subject to the following restrictions:

(1) No service to be performed for shipments originating at Chicago, Ill., or Omaha, Nebr., and destined to either of said points.

(2) No shipment to be transported between any of the following points or through, or to, or from more than one of said points: Omaha, and collectively Davenport and Bettendorf, Iowa, Rock Island, Moline and East Moline, Ill.

(3) No single shipment to be handled on motor carrier billing weighing more than 2,000 pounds (R. 97).

On November 1, 1951, the weight limitation was increased to a maximum of 5,000 pounds for any one shipment. Since August 30, 1951, Motor Transit has operated under this temporary authority over the routes in question.

The present proceeding. The present proceeding arises out of an application for a permanent certificate of public convenience and necessity under Section 207 (a) of the Act filed by Motor Transit in October 1951. The motor carrier service for which authority was requested in this application is described in detail in the Commission's report (R. 94–95). Leaving aside the requested route segment between Chicago and Silvis, Illinois, which the Commission denied on the ground that Motor Transit already possessed such authority (R. 115–116), the application in substance sought authority to serve named points on the White Line and Frederickson Line routes, plus certain named off-line points, without the restrictions which the Commission had imposed in the certificate dated September 11, 1951. The routes and points involved in the application, together with the population of the points,

are shown on the map attached to this brief as Appendix A.

A hearing on the application was held before a hearing examiner, and consumed 14 days between March 18 and May 22, 1952. In this hearing, in contrast with the prior proceedings reviewed by this Court, Motor Transit presented extensive evidence as to the public need for its motor carrier service in the territory involved in the application. The hearing examiner issued a recommended decision (R. 1–83), exceptions were filed, and oral argument was had before the entire Commission. On November 22, 1954, the Commission issued its report and order (R. 93–122) substantially granting Motor Transit's application, subject to the following conditions (R. 117):

> (1) that there may be attached from time to time the privileges granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require, and
>
> (2) that all contractual arrangements between The Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company shall be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties;

The plaintiffs' petition for reconsideration was denied by the Commission on July 6, 1955 (R. 122–123).

Following briefs and oral argument, the three-judge court, consisting of Circuit Judge Prettyman and District Judges Pine and Holtzoff, on January 11,

1956, rendered its unanimous opinion (R. 192–195) sustaining the Commission's order.

SUMMARY OF ARGUMENT

The Interstate Commerce Commission, pursuant to Section 207 (a) of the Interstate Commerce Act, authorized Rock Island Motor Transit Company, a wholly-owned subsidiary of the Chicago, Rock Island & Pacific Railroad Company, to perform the usual type of motor carrier service between Silvis, Illinois and Omaha, Nebraska, and numerous intermediate points, all of which points are on or near the railroad. In prior proceedings under Section 5 of the Act, arising out of Motor Transit's acquisition from existing motor carriers of operating rights to serve these points, the Commission had imposed upon Motor Transit conditions designed to insure that its motor carrier operations would be limited to service auxiliary to or supplemental of the train service of its rail parent. The Commission's power to impose these conditions was sustained by this Court in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. 419. In the instant proceeding, Motor Transit for the first time adduced evidence as to the public need for its motor carrier service without such restrictions. Thereafter, finding that the proposed unrestricted motor carrier operations by Motor Transit will not unduly restrain competition and that there is a public need for the proposed service which independent motor carriers are not providing, the Commission authorized Motor Transit to render ordinary motor carrier service to these points, subject to conditions

which will enable the Commission to impose in the future restrictions or conditions necessary for the protection of independent motor carriers.

The appellants contend that the Commission is precluded from authorizing Motor Transit to perform motor carrier operations which are not restricted to service which is auxiliary to or supplemental to the train service of its parent railroad, by the proviso of Section 5 (2) (b) that before a railroad or its affiliate purchases or otherwise acquires control of an existing motor carrier the Commission must find that "the proposed transaction * * * will enable such [railroad] to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition."

I

The Commission's order in this case is based upon Section 207 (a) which authorizes the issuance of certificates of public convenience and necessity for new or additional motor carrier service where it finds the applicant to be fit, willing and able and that the proposed service is or will be required by the present or future public convenience and necessity. Section 207 (a) does not contain the limitations upon motor carrier operations by railroads which the proviso of Section 5 (2) (b) imposes where a railroad or its affiliate requires an existing motor carrier operation. However, recognizing that Section 5 (2) (b) and the National Transportation Policy embody a general Congressional policy against railroad monopolization of motor transportation, the Commission, in authorizing new motor carrier operations by a railroad under

Section 207 (a), restricts such operations to service auxiliary and supplemental to the rail service, as it does in acquisition cases under Section 5, except where there is an unusual or special need for such service without restrictions.

The legislative history of Sections 5 (2) (b) and 207 (a) contain no support for the appellants' contention that a railroad's motor carrier operations must be restricted under all circumstances to service on railroad bills of lading and at rail rates and, through key point restrictions, to a local and largely less-than-truckload service. The proviso of Section 5 (2) (b) originated in Section 213 (a) (1) of the Motor Carrier Act of 1935. The history of the 1935 legislation reveals that it was intended to prevent railroad monopolization of motor transportation, and that no one had a precise idea as to the extent to which railroads should be permitted to engage in motor carrier operations. There was no indication as to whether this purpose would be satisfied by limiting a railroad's motor service to points on or near the railroad, or whether such service should be further restricted.

Moreover, there is no suggestion in the legislative history that the proviso of Section 5 (2) (b), applicable by its terms to *acquisitions*, was to be read into Section 207 (a) as a limitation on the Commission's power to authorize new or additional service. Early in the administration of the Motor Carrier Act, the Commission held that what is now the proviso of Section 5 (2) (b) did apply to the issuance of certificates under Section 207 (a). With specific knowledge of

this interpretation, Congress, in amending that Act, dropped as too controversial, an amendment which would have written the proviso into Section 207 (a).

The Commission has never interpreted the proviso of Section 5 (2) (b) and Section 207 (a) as requiring that motor carrier operations by a railroad be limited in all circumstances to service auxiliary and supplemental to the rail service, e. g., on railroad bills of lading and at rail rates and subject to key point restrictions. Even in the early and leading Section 5 acquisition case of *Pennsylvania Truck Lines—Control—Barker Motor Freight,* 5 M. C. C. 9 (1937) in which the Commission began to develop the concept of "auxiliary and supplemental" service, it interpreted the Act as permitting it to omit or remove such restrictions in order to permit a needed transportation service which was not being performed by other carriers.

While the Commission may have held initially that the proviso of Section 5 (2) (b) had no bearing upon the determination of applications for certificates under Section 207 (a), it soon evolved the policy of imposing upon authorizations for railroads to perform new or additional motor carrier service the same auxiliary and supplemental service restrictions which it applied to railroad acquisitions of existing services. At the same time, it consistently held that it could authorize a railroad to perform ordinary or unrestricted motor carrier service to meet an unusual or special public need for service which other motor carriers were not providing.

The Commission's power to authorize a railroad to perform ordinary or unrestricted motor carrier service

to points on or near the railroad, at least where there is a special need for that service, is recognized implicitly by this Court's decisions in *Interstate Commerce Commission* v. *Parker,* 326 U. S. 60; *American Trucking Assns.* v. *United States,* 326 U. S. 77; *United States* v. *Rock Island Motor Transit Co.,* 340 U. S. 419; and *United States* v. *Texas & Pacific Motor Transport Co.,* 340 U. S. 450. These decisions hold that both in acquisition cases under Section 5 and in determining applications for certificates under Section 207 (a) the Commission is *empowered* to impose drastic restrictions to insure that a railroad's motor carrier service is auxiliary and supplemental to its rail service. The Court has never held that it must do so in all circumstances. Rather, it has recognized that Section 207 (a) does not contain the restrictions of Section 5 (2) (b), while sustaining the Commission in cases under Section 207 (a) in giving effect to the general Congressional policy against railroad monopolization of motor transportation.

In the *Rock Island* case, this Court pointed out that "The words 'auxiliary to or supplemental' are not taken from the Act. There is no such specific limitation for railroad operation of motor carriers." (340 U. S., at 437). Noting that the Commission had in some cases omitted or varied the auxiliary and supplemental conditions so as to meet a public need for transportation, the Court held that "Those divergencies, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission." (340 U. S., at 442). Thus, this

> they can be used to advantage in combination with railroad service and I hope to see the time when the railroads will utilize these opportunities fully.

Clearly, Commissioner Eastman was urging further experimentation in railroad use of motor vehicles.

Other witnesses in these hearings urged in general terms only that railroads should not be allowed to monopolize motor transportation. Thus, witness Blaine stated (p. 337) that

> We are opposed to section 313, which is the merger or consolidation provision of this bill, for this reason:
>
> Under the provisions of that section the railroads can acquire all of your motor trucks and your motor busses and thus restore to them the monopoly which they so long enjoyed. Such a law at this time is contrary to our experience with respect to the past. Up until 1914 the railroads of this country could also engage in the operation of boats in competition with the railroads on the rivers and harbors and lakes but Congress, in its wisdom, in 1914 enacted paragraph 19 of section 5 of the Interstate Commerce Act which, briefly stated, prohibits a railroad operating a water vessel in competition with its rail lines. Yet, here it is proposed to write into the Motor Vehicle Act a law contrary to the last action of Congress.

And another witness (Fulbright) suggested (p. 376) that

> "if you are going to have any provision for acquisition of control, it ought to be particularly specified in there that there could not be

acquisition of control when that acquisition would substantially destroy existing competition."

Both committee reports (Sen. Rep. 482 and H. Rep. 1645, 74th Cong., 1st Sess.) made no reference to the subject of railroad operation of motor carriers.

However, as S. 1629 (which was finally enacted as Part II of the Interstate Commerce Act) was reported by the Senate Committee, Section 213 (a) (1) contained the following added language:

> *Provided, however,* That if a carrier other than a motor carrier is an applicant, or any person which is controlled by such a carrier other than a motor carrier or affiliated therewith within the meaning of section 5 (8) of part I, the Commission shall not enter such an order unless it finds that the transaction proposed will promote the public interest by enabling such carrier other than a motor carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition (79th Cong. Rec. 5666).

Senator Wheeler explained the Committee amendment as follows:

> Carriers by rail, express, or water are permitted to consolidate or merge with motor carriers or to obtain control in any of the ways indicated above, but only on a showing that "the transaction proposed will promote the public interest and enable such a carrier other than a motor carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition." With this limitation, it will be possible for the Com-

Court has already recognized that the proviso of Section 5 (2) (b) is not to be read into Section 207 (a) as a rigid limitation, that it does not embody the specific set of restrictions for which appellants contend, and that it does not preclude the Commission from authorizing ordinary and unrestricted motor carrier service by a railroad to points on or near the railroad to satisfy a public need for transportation service which other carriers are not providing.

II

The Commission held in this case that its general policy of imposing auxiliary and supplemental restrictions upon grants of motor carrier operating authority to railroads "should be relaxed only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience." The Commission's findings that these conditions exist in the present case are based upon substantial evidence.

The Commission's conclusion that unrestricted motor carrier operations by Motor Transit over the routes in question would not unduly restrain competition, is based largely upon the record of its past operations, rather than upon prophecy. Motor Transit conducted unrestricted motor carrier operations over the White Line route for 13 years prior to 1951 and over the Frederickson Line route for

seven years prior to 1951. The Commission found that during those years Motor Transit's independent motor carrier competitors prospered greatly, from which it concluded that "the operations of applicant have not unduly restrained competition." Taking into account the appellants' contention that Motor Transit might be unfairly subsidized by its parent railroad, the Commission retained the condition, sustained by this Court in the *Rock Island* case, that contractual arrangements between Motor Transit and the railroad be reported to and be subject to revision by the Commission. In addition, for the express purpose of protecting independent motor carriers from injury due to material changes in their relationship to Motor Transit, the Commission reserved the power to impose further conditions and limitations upon the authority granted to Motor Transit.

As to the public need for unrestricted motor carrier service by Motor Transit, the Commission found that "Applicant is the only carrier that for a considerable number of years has maintained daily (generally at least 5 days a week) scheduled peddle operations over the entire White Line and Frederickson Line routes regardless of the volume of traffic available for movement in such operations." It found from the testimony of many shippers that "public convenience and necessity require the proposed less-than-truckload peddle operations." It found that since Motor Transit possessed exclusive intrastate rights over these routes, other carriers could not perform such a service with interstate traffic only. It further concluded that while the proof of public need for truckload service

by Motor Transit was not as convincing, it should be permitted to share in the more profitable truckload traffic as well as to perform the expensive peddle service. The Commission's action was a rational exercise of the broad discretion conferred upon it by Congress to determine what transportation service is required by the public convenience and necessity. *Interstate Commerce Commission* v. *Parker*, 326 U. S. 60, 65.

ARGUMENT

I

The Commission is empowered under Section 207 (a) to authorize a railroad-controlled motor carrier to perform ordinary motor-carrier service to points on or near the line of the railroad, at least in the special circumstances of this case

Preliminary analysis

Since the appellants contend that the Commission's order makes possible railroad domination of motor transportation, it is important to point out the precise scope and effect of the Commission's action. In 1938 and 1944, the Commission, acting under Section 5 of the Interstate Commerce Act, authorized Rock Island Motor Transit to acquire by purchase the operating rights and properties embraced in the White Line and Frederickson routes, respectively. In authorizing acquisitions of the White Line properties, the Commission required Motor Transit to abandon White's operating rights other than common carrier rights between Omaha and Chicago (and two branch routes to Muscatine and Cedar Rapids), and further provided that Motor Transit could not "render service from or to, or interchange traffic at, any point other than a sta-

tion on the lines of" the Rock Island railroad (5 M. C. C., at 458). Thus, beginning in 1938, the Commission restricted Motor Transit to serving points on the White Line route which were already stations on the Rock Island railroad. Similarly, in 1944, the Commission authorized Motor Transit to acquire by purchase the Frederickson operating rights between Atlantic, Iowa, and Omaha, thereby providing Motor Transit with a second route via Avoca and Neola between those points, together with rights between Atlantic and Oakland and Harlan and Oakland to serve points which are on or near the line of the Rock Island railroad. In 1949, the Commission issued an order further restricting Motor Transit's operations on the White Line and Frederickson routes by imposing the five conditions sustained by this Court in *United States* v. *Rock Island Motor Transit Co., supra.* For present purposes, these conditions may be summarized as (1) restricting its motor carrier operations to movements at rail rates and on rail bills of lading, thus precluding Motor Transit from entering into joint rates with other motor carriers, (2) restricting its service (as before) to points which are stations on the Rock Island railroad, (3) prohibiting it from carrying shipments between any of the following points, or through, or to, or from, more than one of such points: Omaha, Des Moines, and collectively Davenport and Bettendorf, Iowa, and Rock Island, Moline, and East Moline, Ill., thereby, in practical effect, limiting Motor Transit's motor carrier service to carrying rail-billed shipments, in large part less-than-truckload, between one of these key

points and the smaller points intermediate to the next key point.

In the instant case, the Commission, acting under Section 207 (a), has authorized Motor Transit to render motor carrier service without these restrictions *but only to the same points on or near the line of the Rock Island railroad.*

The appellants contend that when a railroad or railroad affiliate applies for a motor carrier certificate of public convenience and necessity under Section 207 of the Interstate Commerce Act, it may be granted only in accordance with the requirement of Section 5 (2) (b) that such transaction will enable the railroad "to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition." They assert that this condition of Section 5 (2) (b) must be read into Section 207 (a) and that this means that the Commission's grant of a certificate to Rock Island Motor Transit Company was required to contain conditions (such as those which were involved in *United States* v. *Rock Island Motor Transit Co., supra*), which would limit its motor carrier operations not only to points on or near the railroad but also to a type of service which would be made "auxiliary and supplemental" to the rail service by the key point and rail rate and billing restrictions described above.

We contend that when a rail carrier or its affiliate applies for a motor carrier certificate under Section 207 (a), the limitations of Section 5 (2) (b) applicable to *acquisitions* of existing motor carriers by a railroad or its affiliate do not apply as a rigid restriction upon

the authorization of new or additional motor carrier service. However, since the Commission has recognized in Section 5 (2) (b) and in the National Transportation Policy a general Congressional purpose to prevent railroad monopolization of motor transportation, it has given railroads authority under Section 207 (a) to conduct ordinary motor carrier operations only in "special circumstances," i. e., only to meet an unusual public need for transportation. In any event, whether the proviso of Section 5 (2) (b) is regarded as fully applicable to proceedings under Section 207 (a) or, as the court below held, as a general policy to be taken into account by the Commission, it is not offended where, as here, the Commission seeks to meet special transportation needs by authorizing a railroad controlled motor carrier to furnish ordinary motor carrier service only to points on or near the rail line.

Thus, the precise issue here is whether in such circumstances the Commission may issue a certificate of public convenience and necessity to a railroad affiliate without restricting the authorized motor carrier operations to service auxiliary and supplemental to rail service, while reserving the right to impose upon such motor carrier operations in the future such limitations as the public convenience and necessity may require, and to regulate the contractual relations between such carrier and its railroad parent. In the instant case, the Commission has held, and the court below agreed, that nothing in the Act precludes it from authorizing such motor service to points on or near the railroad "where the circumstances clearly

establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience" (R. 108). We submit that this view is supported by the language, history and purpose of Sections 5 and 207, by the Commission's consistent administrative construction, and by the decisions of this Court.

A. By its terms, the proviso of Section 5 (2) (b) applies only to railroad acquisitions of existing motor carriers, and does not restrict the issuance of certificates under Section 207 (a) authorizing new motor carrier service

The Commission's order in this case was based upon Sections 207 (a) and 208 of the Interstate Commerce Act. Section 207 (a) provides that "Subject to section 210", a certificate authorizing motor carrier operations shall be issued "to *any* qualified applicant" if it is found that the applicant is fit, willing, and able to perform the proposed service and that the proposed service "is or will be required by the present or future public convenience and necessity." Section 208 generally empowers the Commission to include in such a certificate "at the time of issuance and from time to time thereafter" conditions and limitations required by the public convenience and necessity.

It is significant that Section 207 (a) contains no provision requiring the imposition of unusual restrictions upon certificates issued to motor carrier subsidiaries of railroads. Applying the rule that statutes mean what they say, this fact alone should be persuasive here.

Moreover, Section 207 (a) begins with the words "Subject to section 210." This compels the inference that Congress has thereby enumerated the other provisions of the Act which it desires to override or limit the powers granted in Section 207. This normal inference is heavily reinforced when it is noted that Section 210 prohibits a contract motor carrier or its affiliate from holding a common carrier certificate under Section 207, unless the Commission approves such dual operation as being in the public interest. That is, at the very beginning of Section 207, Congress enumerated the types of dual transportation operations which it did not wish to be authorized without restriction in the administration of Section 207. Looking only to the structure of these sections and applying ordinary rules of interpretation, it can only be concluded that by not similarly referring to the proviso in Section 5 (2) (b), Congress did not intend to write its limitation into Section 207.[2] And, as noted hereafter, Congress did not do so later when it was specifically informed that the Commission had not been applying rigidly the proviso of Section 5 (2) (b) (or its predecessor Section 213 (a) (1)), in administering Section 207 (a). (*Infra*, pp. 33–37.)

It is argued by the appellants that if the limitations of Section 5 (2) (b) are not read into Section 207 (a)

[2] *Brown* v. *Maryland*, 12 Wheaton 419, 438; *Bend* v. *Hoyt*, 13 Peters 263, 272; *United States* v. *Dickson*, 15 Peters 141, 165; *Schlemmer* v. *Buffalo R. & P. Ry.*, 205 U. S. 1, 10; *American Express Co.* v. *United States*, 212 U. S. 522, 534; *Hopkins* v. *United States*, 235 Fed. 95, 98; *Rybolt* v. *Jarrett*, 112 F. 2d 642, 645 (CA 4, 1940).

the policy of Section 5 (2) (b) will be completely thwarted. To the contrary, we submit that Section 5 (2) (b) and Section 207 (a) embody different Congressional objectives which the Commission has reconciled correctly.

If a railroad or its affiliate seeks to purchase or otherwise acquire control of an existing motor carrier, it must obtain the Commission's approval under Section 5. Under Section 5 (2) (b) such approval by the Commission must be predicated upon its findings that the proposed transaction (1) will be consistent with the public interest, (2) will enable such rail carrier to use service by motor carrier to public advantage in its operations, and (3) will not unduly restrain competition. These conditions of Section 5 (2) (b) are essentially anti-monopoly provisions designed to assure that the railroads do not use their financial resources to swallow up by acquisitions and mergers the motor carrier industry. (See *infra*, pp. 27–31.)

In contrast, while the proviso of Section 5 (2) (b) deals with acquisitions of existing motor carriers, Section 207 (a) governs the issuance of certificates of public convenience and necessity for new or additional motor carrier service. The first requirement of Section 207 (a) is that the applicant for such a certificate be fit, willing, and able properly to perform the proposed service. In the instant case, the appellants have not challenged the fitness, willingness, or ability of Rock Island Motor Transit Company to perform the motor carrier service which it proposes. The second and only other condition of Section 207

is that the proposed motor carrier service, to the extent authorized by the Commission, "is or will be required by the present or future public convenience or necessity."

In brief, Section 5 (2) (b) prescribes for railroad *acquisitions* of motor carriers an essentially anti-monopoly test, i. e., that the acquisition will enable the railroad to use service by motor carrier to public advantage in its operations, and will not unduly restrain competition. Section 207, on the other hand, places its emphasis on the public convenience and necessity, i. e., the public need for new or additional transportation service.

It is clear why Congress has not written into Section 207 the anti-monopoly provisions of Section 5 (2) (b). Where a railroad or its affiliate acquires by purchase or merger an existing motor carrier, there is lost the actual or potential competition between the railroad and the previously independent motor carrier. However, where a railroad or its affiliate undertakes to commence or expand its own motor carrier service, it can only do so in *added* competition with independent motor carriers already in the field. This economic distinction was pointed out to Congress in 1938 by a representative of the railroads in opposition to the Shipstead amendment which would have repeated in Section 207 the proviso of the present Section 5 (2) (b), in accordance with the plaintiffs' present contention. *Hearings before the Subcommittee of Senate Committee on Interstate Commerce on S. 3606, 75th Cong., 3d Sess., pp. 157, 164.* (See, *infra*, p. 35.)

Again, it is urged by appellants that under a construction of Section 207 which permits railroads to engage in unrestricted motor carrier operations, their superior financial resources, including the use of railroad terminal facilities and personnel, inevitably will enable them to eliminate the independent motor carriers. The Commission has met this possibility in two ways: first, by authorizing such unrestricted motor carrier operations by a railroad or its affiliate only in "exceptional circumstances", i. e., to meet an unsatisfied public need for transportation at points on or near the railroad without producing an undue restraint of competition, and second, as in the instant case, by subjecting such a grant of authority to such future conditions as may be required by the public convenience and necessity. And, in the instant case, the Commission specifically considered the possibility that Motor Transit might be unfairly subsidized by its rail parent (R. 104) and guarded against it by requiring that contractual arrangements between Motor Transit and its parent be reported to the Commission and subject to revision by the Commission.

This Court has recognized that Congressional directives against rail domination of motor carriage and to satisfy the public need for transportation "must frequently produce overlapping aims." *Interstate Commerce Commission* v. *Parker*, 326 U. S. 60, 66. The Commission has consistently recognized its duty to reconcile and balance these statutory purposes to achieve the basic national objective of an adequate, diversified and healthy transportation sys-

tem. While Section 207 (a), authorizing the issuance of certificates of public convenience and necessity for new or additional motor carrier service, does not contain the express anti-railroad control provisions of Section 5 (2) (b), the Commission has considered that Congress did not intend Section 207 to be an unlimited opportunity for railroad domination of motor transportation, thus thwarting both the policy proviso of Section 5 (2) (b) and the National Transportation Policy. If, in administering Section 207, the Commission ignored the purpose of Section 5 (2) (b) and the National Transportation Policy, it would mean that a railroad which acquired a motor carrier subject to the limitations of Section 5 (2) (b), could turn around and seek an authorization for additional motor carrier service under Section 207 without regard to the policy of Section 5 (2) (b).

Accordingly, as pointed out later in this brief, in issuing to railroads or their affiliates certificates for new or additional motor carrier service under Section 207, the Commission has applied the general policy of Section 5 (2) (b) by restricting such motor carrier operations to service auxiliary and supplementary to the rail service, unless there existed an unusual or special public need for ordinary motor carrier service which is not being performed by the authorized independent motor carriers. Moreover, in the instant case, the ordinary type of motor carrier service which Motor Transit has been authorized to perform is still restricted to points which are stations on the Rock Island Railroad, plus a few small points near the railroad.

B. The legislative history contains no indication that the proviso of Section 5 (2) (b) was intended (1) to restrict a railroad's motor carrier operations to less-than-truckload movements to smaller points on rail billing and at rail rates, or (2) to be applied as a rigid limitation upon Section 207 (a)

As noted above, the appellants' specific contention here is that the proviso of Section 5 (2) (b) requires the Commission in all circumstances to restrict a railroad's motor carrier operations to largely less-than-truckload movements to smaller points and on railroad bills of lading and at rail rates (thereby, as a practical matter, precluding it from interchanging freight with other motor carriers or participating in joint motor rates). Similarly, they urge this Court to reverse its decision in *Interstate Commerce Commission* v. *Parker,* 326 U. S. 60, and to hold that the proviso of Section 5 (2) (b) requires that a railroad must be restricted in its motor carrier operations to freight which has a prior or subsequent movement by rail. And they contend that the proviso, so interpreted, applies as a rigid restriction, regardless of circumstances, upon the authorization of new or additional service under Section 207. These contentions find no support in the legislative history of the proviso in Section 5 (formerly Section 213 (a) (1)) and of Section 207.

The original Motor Carrier Act of 1935. The principal conclusion which can be drawn from the legislative history of the Motor Carrier Act of 1935 is that no one concerned had any precise idea as to the extent to which railroads should be allowed to engage in motor transportation. In 1928, a published report of the Interstate Commerce Commission (*Motor Bus*

and Motor Truck Operation, 140 I. C. C. 685, 720) indicated that the railroads were making practically no use of truck transportation. In 1933, five years later, another study by the Commission revealed active experimentation in motor transportation by railroads. *Coordination of Motor Transportation,* 182 I. C. C. 263, 375. As Section 213 appeared in H. R. 5262 and S. 1629, both 74th Congress, 1st Sess. (1935), which were the subject of hearings before the House Committee on Interstate and Foreign Commerce and the Senate Committee on Interstate Commerce, it simply prohibited mergers and acquisitions of control without the prior approval of the Commission based upon a finding that "the public interest will be promoted by the transactions proposed." Railroad operation of motor carriers received little discussion at these 1935 hearings which immediately preceded enactment of the Motor Carrier Act. Thus, in the February 1935 hearings before the House Committee (entitled Regulation of Interstate Motor Carriers), Commissioner Eastman made the following general statement (p. 46):

> I hope and expect to see the railroads utilize these motor vehicles in their own operations to a much greater extent than they now do. They are doing it to a considerable extent; they operate some; they have abandoned branch lines and they are operating busses instead of trains in some cases. They are utilizing motor vehicles in their terminal operations and they have used them as a substitute for way freight service, in some cases. My own view is that there will be found many more ways where

> mission *to allow acquisitions* which will make for coordinated or more economical service and at the same time to protect the public against the monopolization of highway carriage by rail, express, or other interests [Emphasis added] (79th Cong. Rec. 5655 [3]).

In short, the complaints and fears that led to the insertion of the proviso in Section 213 (a) related only to unlimited railroad *acquisition* of existing motor carriers, and to the destruction of competition by such *acquisitions*. No attempt was made by anyone to define the clause in Section 213 (now the proviso in Section 5 (2) (b)) that such acquired motor carrier operations "will enable such carrier [other than a motor carrier] to use service by motor vehicle to public advantage in its operations." Clearly, it meant that railroads were not, by acquisition of existing motor carriers, to engage in motor carrier transportation wholly unrelated to their previous transportation operations. Specifically, the extent to which a railroad could render motor carrier service to points which it already served by rail was nowhere defined or

---

[3] In the later House debate, Representative Sadowski characterized Section 213 in the following terms:

Section 213 provides that *the Commission shall control the consolidation, merger, and acquisition of control of motor carriers*. I will say in this respect that it is the intent, and it is important to the welfare and progress of the motor-carrier industry, *that the acquisition of control of the carriers* be regulated by the Commission so that the control does not get into the hands of other competing forms of transportation, who might use the control as a means to strangle, curtail, or hinder progress in highway transportation for the benefit of the other competing transportation [Emphasis added] (79th Cong. Rec. 12206).

discussed. There was not even a suggestion that, as appellants contend, a railroad's motor carrier operations must be limited to local less-than-truckload shipments on rail billing and at rail rates.

In any event, *the legislative history contains no suggestion that the proviso in Section 213 (a) (1) was to be read into Section 207 as a rigid limitation on the Commission's power to issue certificates of public convenience and necessity for new motor service.*

The 1938 amendments. In 1938, Congress, with specific knowledge that the Commission was not applying the proviso of Section 213 (a) (1) as a rigid limitation in cases under Section 207, refused to write the proviso into Section 207.

Shortly after enactment of the Motor Carrier Act, the Commission decided *Pennsylvania Truck Lines, Inc.—Control—Barker,* 1 M. C. C. 101 (1936), containing what the motor carrier appellants describe (App. br. in No. 6, p. 19) as "the classic statement of the rationale underlying the separation of rail and truck ownership or control." That case involved an application under Section 213 (now Section 5) for approval of a purchase of an independent motor carrier by a railroad. It marked the beginning of the development of the policy under which (except in a few cases involving special circumstances) the Commission has given effect to the objective of the proviso of Section 5 by approving *acquisitions* of motor carriers by railroads or their affiliates only upon conditions that in one way or another confine the motor carrier operations to service "auxiliary and supple-

mental" to the railroad operations. As we point out elsewhere (*infra,* p. 38), even in this early and leading *Barker* case, the Commission added that it would relax such conditions to meet shippers' need for service.

However, in 1937, the Commission decided *St. Andrews Bay Transportation Company Extension of Operations,* 3 M. C. C. 711 (1937), which involved an application under Section 207 by a railroad-controlled motor carrier for a certificate authorizing an extension of its existing motor carrier operations carried on pursuant to a certificate issued under the grandfather clause of the Motor Carrier Act. In authorizing the extension, the Commission rejected the contention of protesting rail carriers that the proviso of Section 213 was controlling, in the following language (at p. 715):

> The situation presented in the *Barker* case differs from that here presented. The application in that case was filed under section 213 of the act, which provides with respect to consolidations, mergers, and acquisitions of control that if the applicant be a carrier other than a motor carrier, or a company controlled by or affiliated with such a carrier other than a motor carrier, we shall not give our approval unless we find "that the transaction proposed will promote the public interest by enabling such carrier other than a motor carrier to use service by motor vehicle to public advantage in its operations and will not unduly restrain competition." The application herein, on the other hand, is for a certificate of public convenience and necessity authorizing institution of a new

> operation and was filed under section 207 (a) of the act, which provides that, subject to section 210, a certificate shall be issued to any qualified applicant therefor, if it be found that the applicant is fit, willing, and able properly to perform the service proposed and to conform to the provisions of the act and our requirements, rules, and regulations thereunder, and that the proposed service is or will be required by the present or future public convenience and necessity.

Thus, in 1937, the Commission squarely held that the proviso of Section 213 (a) (1) was not to be read into Section 207 as an absolute limitation on the issuance of certificates of public convenience and necessity to railroads or their affiliates.

During the Congressional consideration of the 1938 amendments to the Motor Carrier Act, the *Barker* and *St. Andrews Bay* decisions were reviewed specifically. Thus, during the hearings before the Senate Subcommittee on Interstate Commerce on S. 3606, 75th Cong., 3rd Sess., Senator Shipstead proposed an amendment which would have repeated in Section 207 the proviso of Section 213 (a) (1). Senator Shipstead explained his amendment as follows (Hearings, ibid, p. 26):

> * * * The original act permits railroads under certain conditions to operate and to acquire and operate busses, as auxiliary to, or supplementary to, their regular service. I do not know that there is any objection to that. But it appeared clearly the intention of Congress that they should be prohibited from acquiring or initiating motor truck or bus service under certain other conditions. And the ques-

> tion arose after two decisions by the Motor Carrier Division of the Interstate Commerce Commission, where it appeared to many people that there was a conflict in that Division as to the intention of Congress in respect to that matter. *Those two cases were the Pennsylvania Truck Line case and the St. Andrews Bay Transportation Co. case.* [Emphasis added.]

During the same hearings, Interstate Commerce Commissioner Eastman stated that

> * * * * * *
>
> In fact, so far as I personally am concerned, I do not want to pass on issues in advance; but if I had to pass on the issue now, I should say that in administering the provisions of Section 207, it would be the duty of the Commission to read the act as a whole and to apply the same policy with respect to the extension of operations of a railroad-controlled motor carrier as is provided by the proviso of Section 213 (*Ibid.* 27, 30).

Commissioner Eastman also submitted a letter on behalf of Commissioners Lee, Rogers and himself (who comprised the Commission's Division 5 which had decided the *St. Andrews Bay Transportation Company* case) stating that they did not oppose the Shipstead amendment. However, this letter states that it had not been referred to the full Commission (*Ibid.* pp. 30–31).

Moreover, both Senator Johnson and Commissioner Eastman warned that the Shipstead amendment would add controversy to a bill on which there was substantially unanimous agreement (*Ibid.* 29, 30). This prediction was realized when later in the hearings a rep-

resentative of American Trucking Associations, Inc., strongly supported the Shipstead amendment (*Ibid.* pp. 128–129), while it was opposed with equal vigor by a representative of the Association of American Railroads (*Ibid.* pp. 157–164), who pointed out that Commissioner Eastman had consulted only two other members of the Commission (*Ibid.* p. 158).

Senator Shipstead withdrew his amendment, stating that (*Ibid.* 141–142):

> And it is quite evident that, even with the controversy aroused here, it would be, if not a waste of time, futile to try to pass my amendment at this session of Congress. On the other hand, I have come to the conclusion it is not necessary to press it at this time.

However, it is clear that the Senate Committee recognized that the Shipstead amendment had been withdrawn because it was controversial—rather than because it was unnecessary under existing law. Thus, the report of the subcommittee which was signed by Senator Shipstead and adopted by the full Senate Committee, contains the following explanation (Sen. Rep. 1650, 75th Cong. 3rd Sess. p. 3):

> Senator Shipstead introduced a clarifying amendment to S. 3606 which, he stated, is designed to give effect to the intent of Congress that the same showing be made by a carrier other than a motor carrier applying under section 207 (a) of the Motor Carrier Act, 1935, to obtain a certificate of public convenience and necessity as is required by such carrier to obtain approval of the purchase or acquisition of a motor carrier. At the hearings upon S. 3606,

following the testimony of Commissioner Eastman that the Commission had no objection to the amendment, that in his view the present act should be interpreted to give effect to the purpose of the clarifying amendment, and that if the Shipstead amendment was pressed at this time it might delay the other amendments proposed by the Commission, Senator Shipstead withdrew his amendment.

* * * While several of these amendments seem to have merit, none of them has been approved by your subcommittee or recommended for adoption for the reasons which actuated Senator Shipstead in the withdrawal of his amendment, that is, that they are largely controversial and might delay or defeat the prompt enactment of the procedural and clarifying amendments which are of importance to the Interstate Commerce Commission in attempting to perform the vast task before it in the regulation of motor carriers.

In brief, Congress was specifically aware in 1938 that the Commission was not applying the limitation on acquisitions in the proviso of Section 213 (a) (1) in determining application by railroads or their affiliates for motor carrier certificates under Section 207. With this knowledge, Senator Shipstead's amendment, which was designed to reverse the Commission's conclusion as stated in the *St. Andrews Bay Transportation Co.* case, was dropped as too controversial.

The Transportation Act of 1940. In 1940, the Interstate Commerce Act, including the Motor Carrier Act, was subjected to a general overhaul and rearrangement by the Transportation Act of 1940. Not-

withstanding the 1938 controversy over the proper relationship between Section 213 (a) (1) and 207, the 1940 Act merely transferred the proviso of Section 213 (a) (1) to Section 5 (2) (b) of the present Act, while leaving Section 207 (a) unchanged in any respect. Indeed, between the *St. Andrews Bay Transportation* case, *supra*, and February 1940, the Commission had at least twice reiterated its view that Section 213 was not controlling in cases under Section 207. *Interstate Transit Lines Extension—Verdon, Nebraska*, 10 M. C. C. 665, 667; *Santa Fe Trail Stages, Inc. Common Carrier Application*, 21 M. C. C. 725, 753.

In brief, with specific knowledge of the issue, Congress declined to avail itself of opportunities in 1938 and 1940 to write the proviso into Section 207. This is persuasive evidence that the Commission has correctly interpreted the will of Congress. *United States v. American Trucking Associations*, 310 U. S. 534, 549–550. Specifically, we submit that this history shows that in 1938 and 1940, as in 1935, Congress was not ready to specify for all times and circumstances the precise motor carrier operations which railroads should be permitted to perform in the public interest. It demonstrates the validity of this Court's conclusion in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S., at 442, that "Those divergencies, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission. It is because Congress could not deal with the multitudinous and variable situations which arise that the Commission was given authority to adjust services within the limits of the Motor Carrier Act."

C. The Commission has consistently interpreted the Act as empowering it, in special circumstances, to issue to a rail-controlled motor carrier a certificate under Section 207 (a) authorizing ordinary or unrestricted motor service to points on or near the railroad

The Commission has never construed the proviso of Section 5 (2) (b) and Section 207 as rigidly restricting railroad-controlled motor carrier operations to service which is "auxiliary and supplemental" to the railroad service, e. g., as the appellants insist, to serve on rail billing and at rail rates and subject to key point restrictions.

In the early and leading Section 5 acquisition case of *Pennsylvania Truck Lines, Inc.—Control—Barker Motor Freight, Inc.*, (report on reconsideration) 5 M. C. C. (1937) 9, 11–12, the Commission restricted the rail-controlled motor carrier service to points which were stations on the railroad, and added that

> Approved operations are those which are auxiliary or supplementary to train service. Except as hereinafter indicated, nonapproved operations are those which otherwise compete with the railroad itself, those which compete with an established motor carrier, or which invade to a substantial degree a territory already adequately served by another rail carrier.

However, in the same report (at p. 14), the Commission specifically stated that

> Should the restriction prohibiting service to points which are not Pennsylvania stations make it impracticable or uneconomical to operate over any route, steps may be taken to obtain modification of the terms of the authority granted herein.

and that

> Nor do our conclusions overlook the interests of the shipping public along the routes here considered. If as a result of proceedings initiated by shippers it is shown, after full hearing, that existing transportation facilites are inadequate or otherwise unsatisfactory at a point in connection with which service is prohibited under the terms of the order herein, such evidence may be a basis for our removing the restriction in the pertinent certificate and ordering the present applicants to render service to that point.

The concept of service "auxiliary to and supplemental of" rail service was further defined in *Texas & Pacific Motor Transport Co. Common Carrier Application*, 41 M. C. C. (1943) 721, 726, as follows:

> Condition 1 limits the character of service to be performed by the petitioner to that which is auxiliary to or supplemental of the rail service of the railway. It limits the service to be performed by truck to the transportation of the rail traffic of the railway. It permits the public to receive an improved rail service through the use of trucks instead of trains as a means of fulfilling the railway's undertaking to transport. * * * Condition 1 permits all-motor movements in the handling of rail traffic at railroad rates and on railroad bills of lading. To and from certain points on segments of the rail lines, the improved service was to be accomplished by performing the movements partly by train and partly by motor vehicle, an auxiliary or supplemental service coordinated with the train service, hence condition 3. Since

> petitioner's certificates limit the service to be performed to that which is auxiliary to or supplemental of the rail service of the railway, it is without authority to engage in operations unconnected with the rail service and, accordingly, may not properly be a party to tariffs containing all-motor or joint rates, nor participate in a directory providing for the substitution of train service for motor-vehicle service at its option.

Notwithstanding this detailed emphasis on the restrictions to be placed upon rail-controlled motor carrier operations, the Commission, even in acquisition cases under Section 5, has refrained from imposing the auxiliary and supplemental condition where there was a need for unrestricted motor service to points on the railroad (or even off it) which other motor carriers could not or would not furnish. *Pacific Motor Trucking Co.—Purchase—Lowinel Trucking Co.*, 60 M. C. C. 373 (1954).

As noted above, in the *St. Andrews Bay Transportation Co.* case, the Commission used broad language suggesting that the proviso of Section 213 (now in Section 5 (2) (b)) was entirely inapplicable to the determination under Section 207 of applications by railroads or their affiliates for certificates of public convenience and necessity authorizing new or additional motor carrier service. However, in that and in succeeding cases under Section 207 the Commission emphasized the public need for the new and additional motor carrier service to be performed by the railroad-controlled motor carrier applicant. Similarly, in *In-*

terstate Transit Lines Extension—Verdon, Nebraska, 10 M. C. C. 665, the Commission, after citing the *St. Andrews Bay Transportation Co.* case, again emphasized the public need for adequate service in rejecting the objection of a competing rail carrier based upon the *Barker* case, and issued to a railroad-controlled motor carrier a certificate under Section 207 not restricted to service auxiliary and supplemental to the rail service. Similarly, in *Santa Fe Trail Stages, Inc., Common Carrier Application,* 21 M. C. C. 725, 753 (1940), involving an application under Section 207 for an extension of service by a railroad-controlled motor carrier, the Commission stated that

> * * * protestants also urge that approval of the considered extensions would be contrary to the principle announced in *Pennsylvania Truck Lines, Inc.—Control—Barker M. Frt.,* 1 M. C. C. 101, 5 M. C. C. 9 and 49, otherwise known as the *Barker* case. Therein we approved the acquisition of a motortruck line by a railroad truck subsidiary, but conditioned our authorization to exclude the privilege of rendering service from or to, or interchanging traffic at, any point not a station on the railroad. While it may be conceded that the applicant herein serves points not served by the Santa Fe Railway and that to some extent its extensions do not strictly parallel the Santa Fe rails, we are of the opinion that the principle there announced has no application in the instant proceeding, wherein the controlling issue is whether the public needs the service proposed, and not, as in a proceeding under section 213, the propriety of permitting a rail carrier

to take over an existing and competing motor-carrier service.

In *Burlington Transportation Co. Extension—Council Bluffs,* 28 M. C. C. 783, the Commission in authorizing an extension of motor carrier service under Section 207 by a railroad-controlled motor carrier, again distinguished the *Barker* case as involving an acquisition (citing *St. Andrews Bay Transportation Co.* and *Interstate Transit Lines Extension, supra*) and emphasized that only the applicant's proposed service would satisfy a public need for transportation.

In *Rock Island Motor Transit Co. Extension—Wellman, Iowa,* 31 M. C. C. 643, the full Commission in removing auxiliary and supplemental service conditions which Division 5 had imposed in authorizing an extension of service under Section 207 by a railroad-controlled motor carrier, stated (p. 645):

> The fact that applicant is a rail subsidiary is unimportant. The proposed operation is limited to points served by the parent company which are in need of a regular-route common-carrier service in the transportation of general commodities irrespective of the rail service which includes service at several other points on the branch line. It will neither invade territory of other rail lines, endanger or impair the operations of existing motor carriers, nor eliminate the necessity for way-freight train service over the branch line. We are of the opinion that the authority requested should be granted without restriction. * * *.

In *Texas & Pac. Motor Transport Co. Extension.—Point Blue, La.,* 47 M. C. C. 425, 427, the Commission

issued a certificate under Section 207 authorizing a railroad-controlled motor carrier to provide motor carrier service for two towns which had been points on a recently abandoned branch line of the railroad. Although motor carrier service to these points could not be regarded as auxiliary or supplemental to rail service, the Commission noted that

> Businesses have been established in reliance upon transportation furnished by the railway and it should be permitted to continue supplying service through its motor affiliate in the absence of any adequate service by any other carrier. In these circumstances, a grant to applicant of unrestricted authority to serve the two considered points is justified notwithstanding its control by the railway.

See also *Santa Fe Trail Transportation Co. Extension—Joplin,* 44 M. C. C. 474. And see also *Burlington Truck Lines, Inc., Extension—Iowa,* 48 M. C. C. 516 (1948) in which the Commission noting that "We have, on occasion, granted unrestricted authority to rail applicants if warranted by special circumstances," authorized unrestricted service between certain points by a railroad-controlled motor carrier where there was a need for service not furnished by any other carrier.[4]

Simultaneously with the line of decisions referred to above, the Commission developed and applied the

[4] It should be noted that in a number of the cases just discussed, the Commission reversed its Division 5 which, in 1938, had advised the Senate Committee on Interstate Commerce that it (the Division) had no objection to the Shipstead amendment.

corresponding general policy that in the absence of special circumstances it would impose upon grants of motor carrier authority under Section 207 (a) to railroad-controlled motor carriers conditions insuring that such service would be auxiliary and supplemental to the railroad service. The development of such conditions began, as a practical matter, in *Kansas City Southern Transport Co., Inc. Common Carrier Application,* 10 M. C. C. 221 (1938); 28 M. C. C. 5 (1941).

The Commission's views as to the relationship between the proviso of Section 5 (2) (b) and Section 207 (a) were fully stated in *Rock Island Motor Transit Co.-Purchase-White Line Motor Freight, Inc.,* 40 M. C. C. 457 (1946) in which it imposed upon Motor Transit's operations the five conditions previously considered by this Court, and in its report in the instant proceeding. Thus, in the prior proceeding, the Commission stated its position as follows:

> Section 207 of the act, providing for the issuance of certificates of public convenience and necessity authorizing operations as a common carrier by motor vehicle, has never contained any provision paralleling the proviso of section 213 (now section 5) which requires special justification of acquisitions by railroads of motor-carrier operating rights. Giving effect, however, to the national transportation policy as declared by the Congress, and as colored by the provisos of sections 5 and 213, it has consistently been recognized in proceedings under section 207 that the preservation of the inherent advantages of motor-carrier service, the

promotion of efficient motor-carrier service and of sound economic conditions in the motor-carrier industry, the avoidance of unfair and destructive competitive practices, and the development of an adequate transportation system employing in coordination all available agencies make it inconsistent with the public interest, and *a priori* something not required by public convenience and necessity, for railroads directly or indirectly through an affiliate to engage, *except in special circumstances*, in motor-carrier operations other than those auxiliary to, and supplemental of, their own train service and designed to be coordinated with train service to produce in effect a new and improved type of coordinated motor-rail service [Emphasis added.] (40 M. C. C., at 466).

* * * * *

It is our opinion, originally indicated in the *Kansas City Southern* case and confirmed by nearly a decade of experience in motor-carrier regulation, that the preservation of the inherent advantages of motor-carrier service and of healthy competition between railroads and motor carriers and the promotion of economical and efficient transportation service by all modes of transportation and of sound conditions in the transportation and among the several carriers, in short the accomplishment of the purposes forming the national transportation policy, require that, *except where unusual circumstances prevail*, every grant to a railroad or to a railroad affiliate of authority to operate as a common carrier by motor vehicle or to acquire such authority by purchase or otherwise

should be so conditioned as definitely to limit the future service by motor vehicle to that which is auxiliary to, or supplemental of, train service.

We appreciate, of course, that section 207, unlike section 5, does not require of a railroad, undertaking to prove that public convenience and necessity require a motor service which it proposes, any greater measure of proof than is required by any other applicant. But this does not mean that it is as easy for one applicant, as for another, to prove need for a proposed service or that this Commission considering an application by a railroad for authority to perform an all-motor service, not in aid of its rail service but in competition therewith and with other motor carriers, can ignore the circumstance that such applicant is a railroad whose operation as proposed would ordinarily be inconsistent with the principles underlying the national transportation policy. In other words, a railroad applicant for authority to operate as a common carrier by motor vehicle, though required to do no more than prove, as any other applicant, that its service is required by public convenience and necessity, has a special burden, not by reason of any attitude or action on our part, but by reason of the very circumstance that it is a railroad. *Where it fails to show special circumstances negativing any disadvantage to the public from this fact*, a grant of authority to supply motor service other than service auxiliary to and supplemental of train service is not justified [Emphasis added.] (40 M. C. C. at 473–474).

Subsequent cases under Section 207 in which, because of the absence of "unusual circumstances" the Commission refused to authorize railroad affiliates to perform motor carrier service which was not auxiliary and supplemental to the rail service, are *Frisco Transportation Co. Extension—Springfield Airport*, 47 M. C. C. 63 (1947), and *Texas & Pacific Motor Co. Common Carrier Application*, 47 M. C. C. 753 (1948).

In its report in the instant case (R. 105–106, 108, 116), the Commission repeated its view as to the relationship of Section 5 (2) (b) and Section 207, as follows:

> * * * Opposing carriers concede that section 207 of the Interstate Commerce Act, hereinafter called the act, the section under which this application was filed, does not contain any provisions requiring imposition of restrictions on certificates issued to motor-carrier subsidiaries of railroads, but nevertheless argue that the national transportation policy, congressional intent, and the provisions of section 5 (2) (b) of the act governing "Combinations and consolidations of carriers" (formerly section 213 of the Motor Carrier Act, 1935), require that the various forms of transportation be kept distinct so that each can operate in its own sphere independently of the other. It is claimed that these considerations mean that we do not have statutory authority to grant applicant an unrestricted certificate. We do not subscribe to this view. Our statutory authority to impose terms and conditions on a grant of authority under section 207 is derived from section 208 of the act. We have always construed these two sec-

tions in the light of the national transportation policy to require, where the circumstances warranted, the imposition of restrictions on certificates issued to motor-carrier subsidiaries of railroads. Where the circumstances did not require such action, we have issued certificates subject to a reservation to impose in the future any limitations, restrictions, or modifications that may appear necessary, and in some instances certificates have been issued without restrictions or even a reservation as just described * * * (R. 105–106).

* * * * *

These views ripened into a policy in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra,* [in which] division 5 imposed 5 conditions or restrictions upon the operating authority granted to a motor-carrier subsidiary of 2 affiliated railways * * * (R. 107).

* * * * *

The main purpose for the policy of imposing the five above-quoted restrictions, or modifications thereof, was to prevent the railroads from acquiring motor operations through affiliates and using them in such a manner as to unduly restrain competition of independently operated motor carriers. This policy was and is sound and should be relaxed only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience (R. 108).

* * * * *

> The findings hereinafter made are not to be construed as an abrogation of the policy established in *Kansas City S. Transport Co., Inc., Com. Car. Application, supra.* [10 M. C. C. 221 and 28 M. C. C. 5.] They represent an exception to that policy justified by the evidence in this proceeding. In other words, such findings do not establish a precedent. Each case of this character must be determined upon the facts and circumstances disclosed by the evidence (R. 116).

In brief, both in granting and denying applications by rail affiliates under Section 207 for authority to perform motor carrier service which is not strictly auxiliary to rail service, the Commission has applied the proviso of Section 5 (2) (b), not as a rigid limitation, but as a policy against permitting a railroad to perform ordinary motor carrier operations except to meet an unusual public need for service which other motor carriers will not or cannot meet. As in this case, even where such circumstances exist, the railroad is permitted to render ordinary or unrestricted motor carrier service only to points on or near the railroad, i. e., in the railroad's existing service area.

We submit that this consistent administrative construction of the Act, known to Congress and to the industry, serves the primary Congressional purpose of developing a national transportation system "adequate to meet the needs of the commerce of the United States."

D. Assuming that the proviso of Section 5 (2) (b) applies to the issuance of certificates under Section 207 (a), it does not preclude the Commission from authorizing a railroad controlled motor carrier to provide ordinary motor carrier service to points on or near the railroad

Assuming, *arguendo,* that the proviso of Section 5 (2) (b) also applies to the issuance under Section 207 of certificates authorizing new service, we submit that the proviso cannot be read as a rigid prohibition against permitting a rail affiliate to provide ordinary or unrestricted motor carrier service to points on or near the railroad, regardless of the public's need for service. That is, we contend that the proviso, even if applicable, does not require that rail-controlled motor carrier operations be limited to service at rail rates and on rail billing and to the pickup and delivery of largely less than truckload freight at smaller points, in any and all circumstances.

The condition of the proviso that a railroad be able "to use service by motor vehicle to public advantage in its operations," is not a precise or self-explanatory requirement. As this Court stated in *United States* v. *Rock Island Motor Transit Co.,* 340 U. S. at 437, "The words 'auxiliary to or supplemental of' are not taken from the Act. There is no such specific limitation for railroad operation of motor carriers. Their connotation is to be gathered from the context in which they have been employed by the Commission."

Earlier in this brief, we have attempted to set forth fairly the legislative history of the proviso. That history reflects a broad purpose to prevent monopolization of motor transportation by railroad interests, together with recognition that limited motor carrier operations by railroads would be in the public

interest. Congress did not even attempt to prescribe in detail and for all times and conditions the motor carrier operations which could be performed by railroads. However, we may assume from this history that the proviso was intended to prevent a railroad from engaging in motor carrier operations entirely unrelated to its prior transportation service. Thus, the Rock Island railroad would be precluded from engaging in motor transportation between Chicago and New York. On the other hand, this history is entirely silent as to the extent and manner to which the Rock Island railroad should be permitted to provide motor carrier service to points which it already serves by rail.

From the beginning, therefore, the Commission has been obliged to exercise an informed judgment on a case to case basis in determining the precise motor carrier operations a railroad shall be allowed to perform. As noted above, even in cases under Section 5 (including the prior Section 213 (a) (1)), beginning with the leading *Barker* case, *supra,* in 1936, the Commission has consistently held that where there was an unusual public need for such service it could and would authorize a railroad to render ordinary or unrestricted motor carrier service to points on or near the railroad. In a few acquisition cases under Section 5, the Commission has authorized railroads to acquire rights to serve points not on the railroad and which otherwise would not have adequate transportation service. See, e. g., *Southern Pacific Company—Control; Pacific Motor Trucking Co.—Purchase—Lowinel Trucking Co.,* 60 M. C. C. 373 (1954). Such decisions have

been entirely consistent with the Congressional policy of prohibiting railroad monopolization of motor transportation. They strike a reasonable balance between the statutory policies of satisfying the public need for transportation and preventing railroad domination of motor carriage.

This Court has already recognized that even in acquisition cases the proviso of Section 5 (2) (b) does not embody any specific set of restrictions, such as rail billing on rail rates and key points, upon motor carrier operations by railroads. Thus, in *United States* v. *Rock Island Motor Transit Co.*, 340 U. S. at 442, it was noted that

> Undoubtedly the Commission has not consistently required each rail-affiliated motor carrier to forego motor billings or tariffs. Key points to break traffic are relatively new. * * * Rail affiliates have been permitted to leave the line of the railroad to serve communities without other transportation service. Those divergences, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission.

We submit, therefore, that even if the proviso of Section 5 (2) (b) is regarded as fully applicable to proceedings under Section 207, it did not preclude the Commission from authorizing Motor Transit to render ordinary or unrestricted motor carrier service to points which are stations on the Rock Island railroad (plus a few small points which are near the railroad line) to satisfy an unusual public need for transportation. It also follows that there is no merit to the

contention of the appellant Railway Labor Executives Association that by its action under Section 207 the Commission was evading or thwarting the policy of the proviso.

E. This Court's decisions implicitly recognize that under Section 207 (a) a railroad may be authorized to perform ordinary motor carrier service to points on the railroad

This Court has considered various aspects of the extent to which railroads may engage in motor transportation, in *Interstate Commerce Commission* v. *Parker,* 326 U. S. 60; *American Trucking Assns.* v. *United States,* 326 U. S. 77; *United States* v. *Rock Island Motor Transit Co.,* 340 U. S. 419; and *United States* v. *Texas & Pacific Motor Transport Co.* 340 U. S. 450. It has never held that the proviso of Section 5 (2) (b) means, even in acquisition cases, that motor carrier operations by a railroad must be limited to less-than-truckload shipments to smaller points and on railroad bills of lading at rail rates. It has never held that the proviso of Section 5 (2) (b), whatever its content, applies as a rigid limitation to the authorization of new or additional motor service under Section 207. It has never held that the proviso precludes the Commission from authorizing a railroad to provide motor carrier service to points on its railroad in order to meet a special shippers' need for service. To the contrary, we contend that the decisions of this Court implicitly recognize that the Commission is empowered under the Act to authorize a railroad or its affiliate to perform ordinary motor carrier service to points which are already stations on the railroad (plus a few small points close to the railroad).

Interstate Commerce Commission v. *Parker, supra,* involved an application under Section 207 by a railroad controlled motor carrier for certificates of public convenience and necessity authorizing new or additional motor carrier service. There, this Court upheld the power of the Commission to authorize a railroad subsidiary to engage in motor carrier operations which were supplemental to the railroad service in the sense of delivering rail-billed less-than-carload freight to way stations, even though the existing motor carriers might arrange to furnish successfully the proposed service. Much of this Court's rationale in the *Parker* case is pertinent here. It pointed out that "Section 207 (a) provides for issuance of the certificate on application, if the proposed service 'is or will be required by the present or future public convenience and necessity.' No other provisions are here involved" (Ibid. p. 64). The Court also stated that the phrase "public convenience and necessity" possesses "connotations which have evolved from the half-century experience of government in the regulation of transportation," and that Congress "chose the same words to state the condition for new motor lines which had been employed for similar purposes for railroads since the Transportation Act of 1920." The Court concluded that "The purpose of Congress was to leave to the Commission authoritatively to decide whether additional motor service would serve public convenience and necessity" (Ibid. p. 65).

The *Parker* opinion expressly recognized that the National Transportation Policy "requires administration so as to preserve the inherent advantages of

each method of transportation and to promote 'safe, adequate, economical, and efficient service.'" However, this Court did not find in that Policy a rigid mechanical restriction upon the powers granted by Section 207. Instead, it pointed out that "Such broad generalizations * * * must frequently produce overlapping aims", and declared that "in such situations, the solution lies in the balancing by the Commission of the public interests in the different types of carriers with due regard for the declared purposes of Congress" (Ibid. p. 66).

> It must be expected, however, that the Commission will be as alert to perform its duty in protecting the public in the maintenance of an efficient motor transportation system as it is in protecting that same public in the successful operation of its rail system. The Commission is trusted by Congress to guard against the danger of the development of a transportation monopoly (Ibid. p. 73).

Having held that where a certificate is sought under Section 207 "No other provisions are here involved", the Court only referred to the proviso of Section 5 (2) (b) in authorizing acquisition of motor carriers by railroads as evidence that the National Transportation Policy "was not intended to bar railroads from the operation of off-the-rail motor vehicles" (Ibid. pp. 66–67). Finally, this Court pointed out that in balancing these public interests which Congress has directed it to consider, the Commission has "customarily" inserted in motor carrier certificates issued to railroads conditions restricting the motor service to

service auxiliary or supplemental to the rail service (Ibid. p. 70).

Thus, *Interstate Commerce Commission* v. *Parker*, *supra*, supports the view that the power of the Commission to issue motor carrier certificates under Section 207 primarily invokes only the traditional concepts of public convenience and necessity, and that the standards of the National Transportation Act and Section 5 (2) (b) come into play, not as rigid limitations written into Section 207, but as flexible Congressional objectives to be balanced in the particular case against the public need for improved transportation service.

United States v. *Rock Island Motor Transit Co.*, 340 U. S. 419, contains more explicit recognition of the Commission's power to authorize a railroad-controlled motor carrier to engage in largely unrestricted motor carrier operations in "special circumstances", i. e., to meet an unusual public need for transportation. That case involved the acquisition under Section 5 by Motor Transit of the independent motor carriers operating the Frederickson and White Line routes. The issue before this Court in that case was whether the Commission was *empowered* (not *required*) to attach to its approval of such acquisitions conditions insuring that Transit's motor carrier oper-

---

[5] In *United States* v. *Texas & Pacific Motor Transport Co.*, 340 U. S. 450, 458–459, decided on the same day as the *Rock Island* case, this Court pointed out that the *Texas & Pacific* case involved certificates for new routes under Section 207, while no such certificates were involved in the *Rock Island* case.

ations would be auxiliary to, or supplemental of, the rail service of its parent. In brief, the issue in *Rock Island* was whether the Commission was empowered to impose the conditions which the plaintiffs in the instant case contend *must* be imposed by the Commission. While noting that such restrictions would be burdensome and expensive to Motor Transit, the Court sustained the Commission's power to impose them. Referring to the National Transportation Policy of preserving the inherent advantages of each mode of transportation, this Court concluded (at p. 431) that

> Specific statutory authority is found in the requirements of the proviso in § 213 (a) of the Motor Carrier Act of 1935 and § 5 of the Interstate Commerce Act as amended in 1940, quoted in note 3, *supra*. Railroad operations as motor carriers are forbidden by that *acquisition section* except to enable a railroad "to use service by motor vehicle to public advantage in its operations." [Emphasis supplied.]

In holding that the proviso in Section 5 (2) (b) empowered the Commission to impose such limitations in approving acquisitions of existing motor carriers by railroads or their affiliates, this Court had occasion to refer to the Commission's policy and practice under Section 207. Thus, the Court pointed out (at p. 428) that

> Although § 207, providing for the issuance of certificates of convenience and necessity, has no clause requiring special justification for railroads to receive motor-carrier operating

> rights, such as appears in the proviso in former § 213 and present § 5, the Commission applies the rules of the National Transportation Policy so as to read the proviso into § 207 in order to preserve the inherent advantages of motor-carrier service.

The Court drew its conclusion by quoting (fn. 4) with apparent approval from the Commission's opinion in *Rock Island Motor Transit Co.*, 40 M. C. C. 457 (discussed and quoted *supra*, at pp. 43–46) as follows:

> We appreciate, of course, that section 207, unlike section 5, does not require of a railroad, undertaking to prove that public convenience and necessity require a motor service which it proposes, any greater measure of proof than is required of any other applicant. But this does not mean that it is as easy for one applicant, as for another, to prove need for a proposed service or that this Commission considering an application by a railroad for authority to perform an all-motor service, not in aid of its rail service but in competition therewith and with other motor carriers, can ignore the circumstance that such applicant is a railroad whose operation as proposed would ordinarily be inconsistent with the principles underlying the national transportation policy. * * * *Where it fails to show special circumstances* negativing any disadvantage to the public from this fact, a grant of authority to supply motor service other than service auxiliary to and supplemental of train service is not justified. [Emphasis supplied.]

Again, after referring to the Commission's application of Section 5 (2) (b) in acquisition cases, the Court stated (at p. 433) that "As indicated above in the text just preceding note 4, the Commission reads into Section 207 the same requirement. Thus a consistent attitude toward the use of motors by railroads is maintained." It further noted that

> In acquisition cases under § 5 (2) the certificate is not to be issued without the statutory findings discussed above that the proposed merger or consolidation will be in the "public interest" and that the railroad can use the motor service "to public advantage in its operations." (p. 436),

while "In original applications under § 207, the fact that the applicant is a railroad brings up other questions of transportation policy. See note 4, *supra*."

More significant, this Court pointed out (at p. 442) that

> Rail affiliates have been permitted to leave the line of the railroad to serve communities without other transportation service. Those divergences, however, are an exercise of the discretionary and supervisory power with which Congress has endowed the Commission. It is because Congress could not deal with the multitudinous and variable situations that arise that the Commission was given authority to adjust services within the limits of the Motor Carrier Act.

It cited in support of this statement *Rock Island Motor Transit Co. Extension—Wellman, Iowa*, 31 M. C. C. 643 (discussed *supra*, at pp. 41–42), in which

the Commission authorized an extension of service under Section 207 by a railroad affiliate so as to permit it to render unrestricted motor carrier service to points needing such service. And the Court also cited "55 M. C. C. 567, 584" (which was the Commission's reaffirmance of its decision in 40 M. C. C. 457 to impose upon Motor Transit's operations the five conditions then before the Court), in which the Commission characterized its earlier *Rock Island Transit Co. Extension—Wellman, Iowa,* case, *supra,* as follows:

> Also cited is *Rock Island Motor Transit Co. Extension—Wellman, Iowa,* 31 M. C. C. 643, wherein we granted Transit unrestricted motor-carrier authority under section 207 of the act. There we found that evidence of unusual circumstances established that public convenience and necessity required the issuance of a certificate to perform all-motor operations independently of rail service, and that the carrier so operating would not invade the territory of other rail lines or endanger or impair the operations of existing motor carriers. Thus, we specifically found a need for a service not limited to a service auxiliary or supplementary to rail service. This case is without significance here, for as we indicated in the prior report herein, *special circumstances* may prevail justifying the issuance of unrestricted motor-carrier authority to a rail applicant; and the case cited, and there are others, is but an example of such circumstances.

In brief, we believe that in the *Rock Island* case this Court implicitly approved the Commission's policy and practice of not applying the proviso of Section 5 (2)

(b) in Section 207 cases in which there were "special circumstances", i. e., a special public need for new or additional transportation service.

In *United States* v. *Texas & Pacific Motor Transport Co.*, 340 U. S. 450, decided simultaneously with the *Rock Island* case, this Court sustained the *power of the Commission to impose* upon certificates issued under Section 207 to railroad subsidiaries substantially the same conditions which were attached to the approval of an acquisition of a motor carrier in the *Rock Island* case. The Court stated (at pp. 458-459):

> This proceeding involves certificates for new routes under § 207. No such certificates or applications were in (the Rock Island) case. The opinion, however, considered the Commission's practice in § 207 proceedings and stated that it was the same as in §§ 5 and 213 acquisition proceedings. We now hold that the same considerations justify the reservation in issue here.

Nothing in the *Texas & Pacific* opinion suggests that the Commission is required to impose those or other restrictive conditions under any and all circumstances in authorizing motor carrier operations under Section 207.

Perhaps the strongest confirmation that this Court has not read the proviso of Section 5 (2) (b) as a rigid limitation in Section 207, is that even in an *acquisition* case such as was before it in *Rock Island*, the Court never suggested that Section 5 (2) (b) *requires* the Commission to restrict even *acquired* motor carrier operations to essentially less-than-carload shipments to small points on rail billing and

rates. Indeed, as the Court pointed out (at p. 437): "The words 'auxiliary to or supplemental of' are not taken from the Act. There is no such specific limitation for railroad operation of motor carriers."

We submit that the decisions of this Court stand for the propositions that the proviso of Section 5 (2) (b) necessarily gives the Commission considerable discretion in determining the type of motor carrier operations which may be conducted by a railroad consistently with the Congressional purpose of preventing railroad domination of motor transportation, and that in making such determinations the Commission may take into account the special needs of shippers on or near the railroad for motor service which independent motor carriers cannot or will not provide.[6] Specifically, they sustain the conclusion of the court below that the proviso of Section 5 (2) (b)

[6] Similar questions have arisen under Section 408 (b) of the Civil Aeronautics Act which, modelled upon Section 5 (2) (b) of the Interstate Commerce Act, prohibits the Board from approving an acquisition of control of an air carrier by a non-air carrier "unless it finds that the transaction proposed will promote the public interest by enabling such carrier other than an air carrier to use aircraft to public advantage in its operation and will not restrain competition."

In *Pan-American Airways Co.* v. *Civil Aeronautics Board*, 121 F. 2d 810 (C. A. 2, 1941), the Court of Appeals for the Second Circuit, citing the Interstate Commerce Commission's decision in the *St. Andrews Bay Transportation Co.* case, *supra*, and quoting from its decision in the *Santa Fe Trail Stages* case, *supra*, held that the issuance of a certificate of public convenience and necessity under Section 401 for new air carrier service by a shipping company subsidiary was not limited by the restrictions of Section 408 (b), "though the ability of Export to meet the standards therein might be considered by the Board and by the President in connection with granting certifi-

applies to Section 207 as a flexible policy (rather than a rigid requirement) which "permits the Commission to be governed in exceptional circumstances by the needs of the public convenience and necessity" (R. 194).

II

The Commission's order is based upon adequate findings supported by substantial evidence

In the instant case, the Commission applied the policy of Section 5 (2) (b) of the Act by stating that its administrative policy of restricting motor car-

---

cates of *public convenience and necessity*." 121 Fed. 2d at 846. See also, *National Air Freight Forwarding Corp.* v. *Civil Aeronautics Board*, 197 F. 2d 384 (C. A. D. C., 1952), and particularly the dissenting opinion of Judge Prettyman.

In 1947, between the *Pan American* and *National Air Freight Forwarding Corp.* cases, the Civil Aeronautics Board, in *American President Lines, Ltd., Petition*, 7 C. A. B. 799 (1947), carefully reconsidered its understanding of the relationship between Section 401 and 408 of the Civil Aeronautics Act in the light of the *Pan American* decision and the Interstate Commerce Commission's construction of Sections 5 (2) (b) and 207 of the Interstate Commerce Act. Thereupon, the Board concluded that "We are of the opinion that a surface carrier applying for [an air carrier] certificate of public convenience and necessity would be under the necessity of showing that disadvantages existing upon the facts of the particular case by reason of its being a surface carrier were avoided or overcome by other considerations of public interest supported by the record." The concurring opinion of Board Member Landis points out difficulties created by the *Pan American* decision of the Second Circuit and intervening decisions of the Board. Thus, under similar provisions of the Civil Aeronautics Act, the Board has in effect adopted the Commission's "unusual circumstances" doctrine. In *Great Lakes Area Case*, 8 C. A. B. 360, 402–405 (1947) the Board applied this doctrine in authorizing a surface carrier to perform a helicopter service.

rier operations by a railroad "should be relaxed only where the circumstances clearly establish (1) that the grant of authority has not resulted and probably will not result in the undue restraint of competition, and (2) that the public interest requires the proposed operation, which the authorized independent motor carriers have not furnished, except where it suited their convenience." (R. 108). The Commission's conclusion that these conditions were present in this case is founded upon substantial evidence.

A. The competitive effect upon independent motor carriers

In authorizing, pursuant to Section 207 (a), the motor service here involved, the Commission specifically took into account the provision in the proviso of Section 5 (2) (b) that it shall find that motor carrier operations by a railroad or its affiliate "will not unduly restrain competition."

The present case provided a unique record for the determination of the effect of Motor Transit's proposed operations upon independent motor carriers. Since 1951, Motor Transit's operations over the routes involved have been conducted pursuant to a temporary authority under Section 210a (a) restricting it to shipments not in excess of 5,000 pounds and prohibiting movements between or through Chicago, Omaha and, collectively, Davenport, Bettendorf, Rock Island, Moline, and East Moline (*supra*, pp. 6–7). However, Motor Transit had operated without such restrictions over the White Line for more than 13 years prior to 1951, and over the Frederickson Line route for seven years. Thus, when the Commission issued its report

in November, 1954, it was able to base its judgment as to competitive effect upon extensive past operations, rather than solely upon prediction.

Thus, the Commission noted (R. 101) that

> * * * These opposing carriers concede that during the approximate 14-year period in which time applicant was operating over the involved routes without restricting its service, the volume of traffic handled by each of these carriers has increased substantially and generally to a greater extent than did the volume transported by applicant.

Again, it found (R. 113) that

> * * * The less-than-carload traffic moving by railroad over a recent 5-year period has consistently declined. During a comparable period the volume of traffic handled by a group of nine motor carriers serving the Midwest area increased substantially. Applicant's tonnage also increased, but not to the extent of its competitors represented by this group of carriers.

Accordingly, the Commission concluded that "the operations of applicant have not unduly restrained competition, and there is no evidence that its proposed operations would produce such a result" (R. 113).

This finding is supported by substantial evidence (Ex. 8, R. 1851; Ex. 9, R. 1852; Ex. 10, R. 1854; Ex. 11, R. 1856; and Ex. 12, R. 1859).

In a related contention, the appellants contend that Motor Transit's application should have been denied because of the possibility that it would be unfairly

subsidized by its rail parent. In its report (R. 104), the Commission reviewed prior financial and contractual relationships between Motor Transit and the Rock Island railroad, and concluded that

> * * * there is no substantial evidence that these things have during the past several years materially affected the operations of the opposing motor carriers. From the past history of Motor Transit's operations there is little reason to believe that future operations would be conducted in any radically different manner from those in the past.

However, noting that as to some of these agreements the record was vague, the Commission imposed the condition "that all contractual arrangements between the Rock Island Motor Transit Company and the Chicago, Rock Island and Pacific Railroad Company be reported to us and shall be subject to revision, if and as we find it to be necessary in order that such arrangements shall be fair and equitable to the parties" (R. 117).[7] In so doing, the Commission has retained effective power to prevent unfair subsidization of Motor Transit's operations by its rail parent. This is in addition to the Commission's general powers under Section 216 (g) to set aside rates which are not just and reasonable.

Also, the Commission stated in its report that "we shall retain jurisdiction to impose in the future whatever restrictions or conditions, if any, appear neces-

---

[7] This is identical with one of the five conditions imposed by the Commission in the prior proceeding and considered by this Court in *United States* v. *Rock Island Motor Transit Co.*, *supra*.

sary in the public interest by reason of material changes in conditions or circumstances surrounding applicant's operations in relation to those of competing motor carriers" (R. 115). Accordingly, it subjected the grant of authority to Motor Transit to the further condition "that there may be attached from time to time to the privileges granted herein such reasonable terms, conditions, and limitations as the public convenience and necessity may require" (R. 117).

We submit that the Commission's findings and the conditions which it imposed are fully responsive to the statutory policy that the Commission determine that motor carrier operations by a railroad "will not unduly restrain competition."

B. The public need for the transportation service authorized by the Commission's order

The appellants also attack in part (App. br. in No. 6, pp. 51–57) the Commission's finding that "the present and future public convenience and necessity" require the motor carrier service which it authorized Motor Transit to perform. They expressly "concede that there was sufficient evidence of record to enable the District Court to sustain the Commission's order insofar as it authorized a bona fide auxiliary and supplemental service to be rendered to and from such relatively minor points as Brooklyn, Colfax, Marengo, Newton, Oxford, Victor, Walcott and Wilton Junction." However, they contend that there is no proof of need for ordinary or "unrestricted service by Motor Transit between such major points as Chicago,

Davenport, Cedar Rapids, Des Moines, Council Bluffs and Omaha" (App. br. in No. 6, pp. 51–52). Elsewhere, they broaden their attack to contend that there was no proof of need for Motor Transit's service between Chicago, Omaha, Des Moines, Tri-Cities, Iowa City, Grinnell, Newton and Atlantic (App. br. in No. 6, p. 54).

In brief, the appellants concede a public need for Motor Transit to perform what would be in substantial part less-than-truckload service on rail bills of lading and at rail rates between the small towns, and between a larger town and the adjacent smaller towns intermediate to the next so-called major point. They would preclude Motor Transit from performing motor transportation between any two points each of which has a population in excess of 6,000. We contend that there was ample evidence to support the Commission's conclusion that the public convenience and necessity required that Motor Transit's operations should not be so restricted.

The Commission found (R. 110), and it is undisputed, that "Applicant is the only carrier that for a considerable number of years has maintained daily (generally at least 5 days a week) scheduled peddle operations over the entire White Line and Frederickson Line routes regardless of the volume of traffic available for movement in such operations." After summarizing the testimony of many shippers and of motor carriers which interchange freight with Motor Transit, the Commission made the following findings (R. 114–115):

The evidence abundantly establishes that public convenience and necessity require the proposed less-than-truckload peddle operations. In addition to the testimony of the many public witnesses regarding their need for such service, there must be taken into consideration that not one of the opposing motor carriers having the requisite authority has established or offered to establish scheduled peddle operations to replace each such operation, conducted by Motor Transit prior to August 30, 1951, and, by refraining from doing so, they no doubt realize that such peddle operations could not be profitably operated with interstate traffic only. The peddle service provided by Motor Transit has been, and to a limited extent, due to the weight limitation, is, based on interstate, intrastate, and rail-billed traffic. With these three kinds of traffic available it is patent that Motor Transit could provide better service to the public than the motor carriers who claim that they can take over Motor Transit's interstate motor-billed business. These carriers hold no intrastate rights on the considered White Line and Frederickson Line routes and cannot obtain such rights because it is the policy of the Iowa State Commerce Commission to grant such rights to only one carrier on a given route. Motor Transit possesses such rights on these routes.

There is some evidence of a public need for the proposed truckload services of applicant, but it is not as convincing as that with respect to the peddle operations, and this is understandable because the other motor carriers operating in the area have usually provided satis-

factory service on truckload shipments. There is also some evidence that the latter have refused to accept truckloads of low-rated commodities. In any event we feel that there is sufficient basis to warrant a complete grant of authority to applicant. This truckload "cream of the traffic," which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors' operations, should not be handed over to its competitors and Motor Transit expected to provide the expensive peddle services.

Acceptance of the opposing motor carriers' position would have the following results. They would be left to provide the peddle services on interstate motor-billed traffic, which alone will not justify the type of services heretofore rendered by Motor Transit, and all such traffic in truckloads. Motor Transit would be left with intrastate and rail-billed traffic, which will not warrant continuance of the operations conducted by it prior to August 30, 1951. The net result is clearly not in the public interest.

There is ample evidence to support the Commission's finding that the public convenience and necessity require Motor Transit's regular peddle service along the routes involved. Thus, the testimony of 111 shippers and consignees at points on the White Line and Frederickson Line routes as to their transportation needs, was summarized by the Commission as follows (R. 110–111):

* * * The witnesses located at points in Iowa have used the services of Motor Transit over a period of many years and have, to a consider-

able extent, built their businesses on that service, particularly with respect to less-than-truckload shipments. With that service available, they do not have to maintain large inventories because they can order from the manufacturer or wholesaler at the supply points, such as Chicago, Minneapolis-St. Paul, Omaha, Kansas City, or Moline, early one day and be reasonably certain of delivery on the next day in some instances, and in others not later than the second day. Some of them stressed their need for this service in obtaining expedited movement of repair parts, including those for farm machinery. * * *.

Reflecting the importance of delivery to points on these routes of freight received in interchange from other motor carriers, the Commission found (R. 110) that

> * * * These [opposing] carriers prior to August 30, 1951, delivered less-than-truckload freight to Motor Transit for movement to destinations they are authorized to serve. Some of this freight consisted of low-rated articles which such carriers deemed unprofitable to handle. These carriers in many instances refused to accept less-than-truckload shipments from their motor-carrier connections for movement to a destination embraced in their operating authority. As a result thereof, several of these connecting carriers have had to rely upon Motor Transit to accept and make delivery of such shipments, even in cases where the delivering carrier was designated by the shipper. These experiences have convinced some of the connecting carriers that the unrestricted serv-

> ices of Motor Transit should continue to be available to them so that they may have a carrier that is always willing and able to accept interchange shipments destined to points on the White Line and Frederickson Line routes. * * *.

Similarly, the Commission noted (R. 98–99) that

> Eight motor carriers have been and are interlining traffic with applicant, principally at Chicago and the Tri-Cities. Generally these carriers do not ordinarily experience any difficulty in interlining shipments destined to the larger points of population on U. S. Highway 6, such as Des Moines and Newton, but they are of the opinion that applicant must be in a position to serve these points and to handle overhead traffic in order to provide the required service, particularly the expensive peddle operations, at the smaller points to avoid sustaining a loss on the entire operation. Several of these carriers are members of the American Trucking Associations, Inc., which is opposing the application.

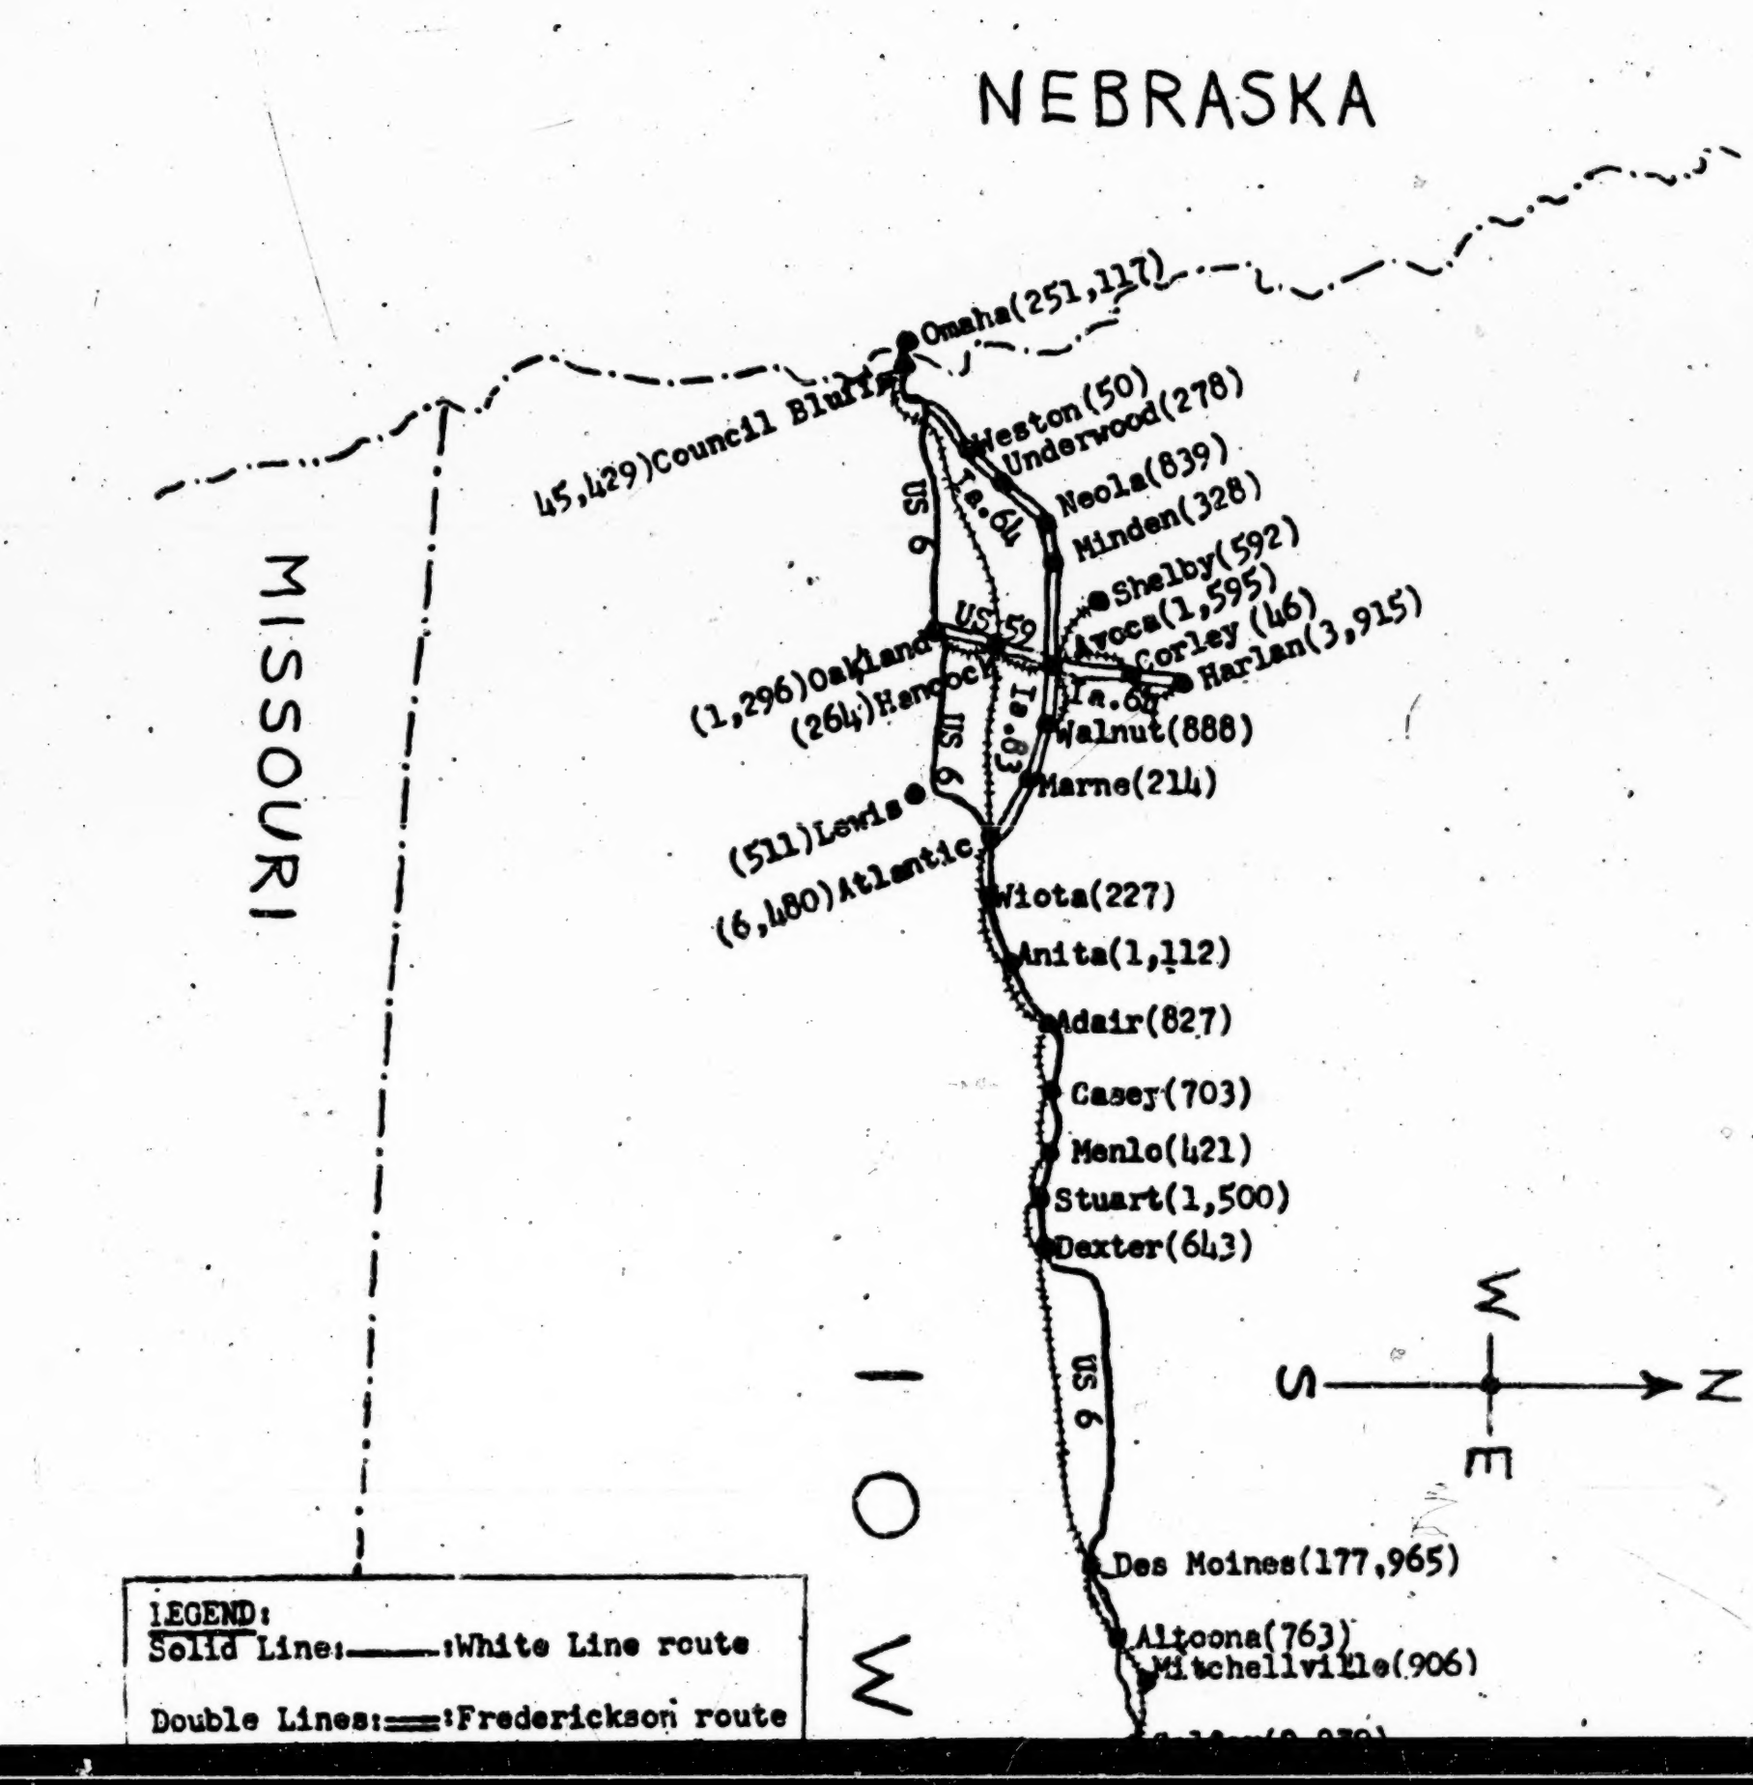
The Commission also considered in its report the operating authority and the actual operations of the appellant motor carriers and concluded that they could not or, in any event, had not, performed over most of the routes in question a regular service comparable to that performed by Motor Transit (R. 111–113).

It is undisputed that it is the general policy of the Iowa State Commerce Commission to grant intrastate operating rights to only a single carrier on a particular route (R. 98), and that Motor Transit has exclusive intrastate rights over the White Line and Frederickson Line routes (R. 114). Moreover, we do not

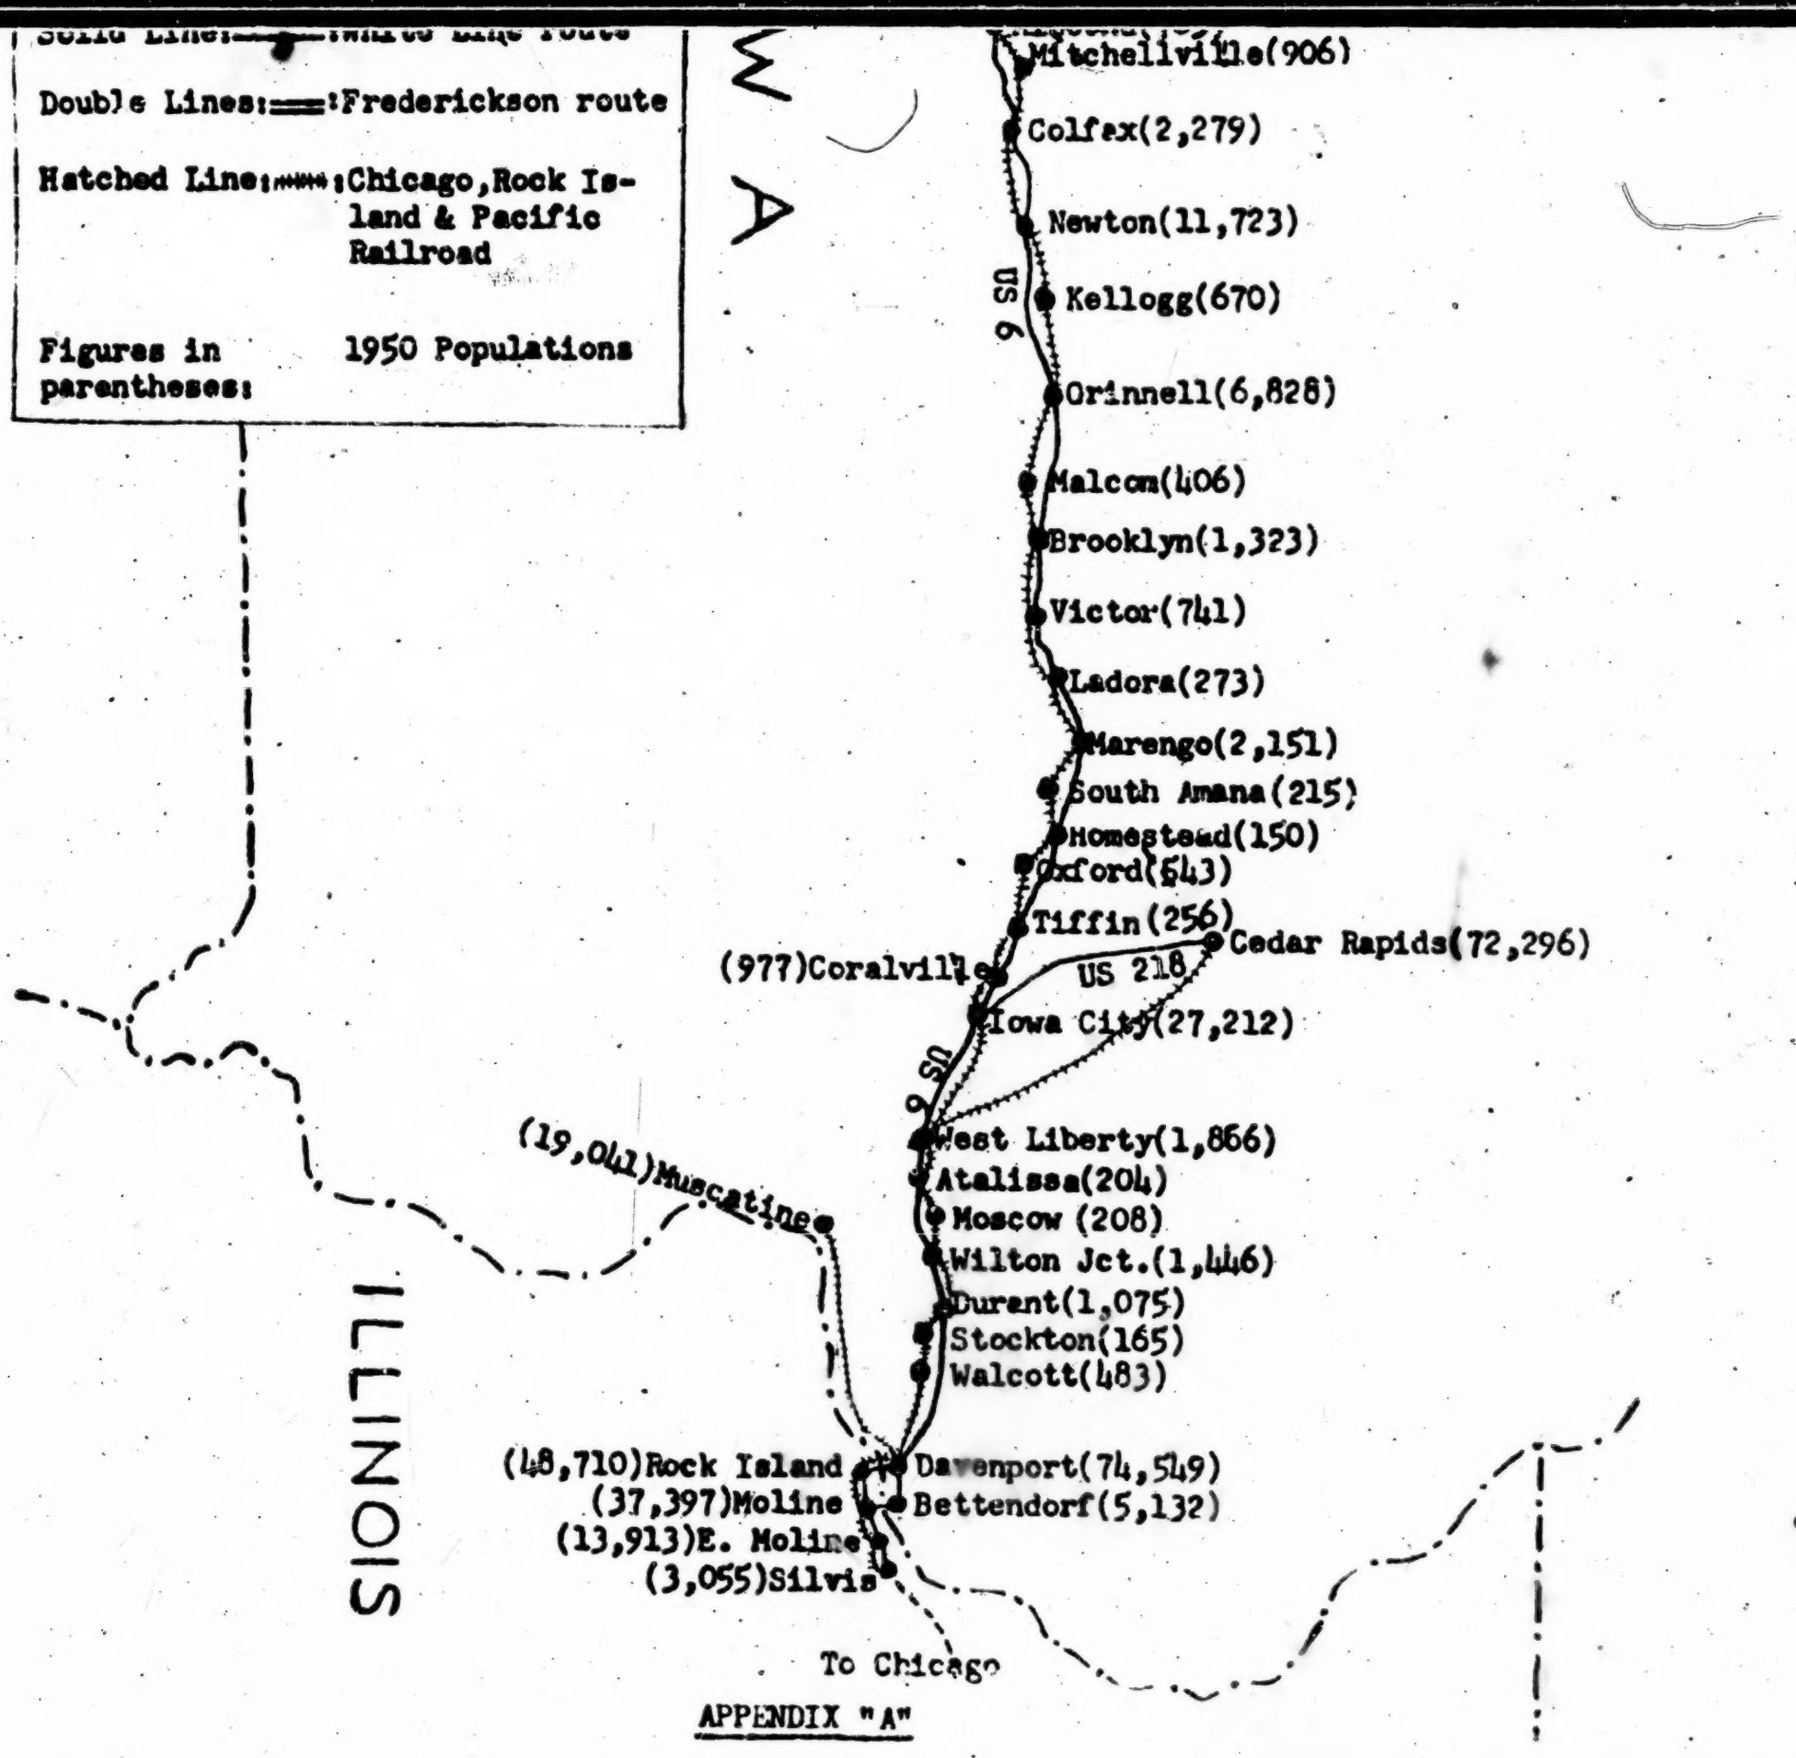
understand the appellants to challenge the Commission's conclusion that regular, scheduled peddle service can be performed in a sparsely populated area, as a matter of economics, only by a motor carrier who possesses both intrastate and interstate operating authority. Rather, they contend "that the Commission in this proceeding is permitting itself to be dominated by the Iowa Commission's policy of intrastate monopoly" (App. br. 65).

The Interstate Commerce Commission is without power to interfere with the policies of the State Commission in issuing certificates of public convenience and necessity relating to intrastate commerce. Indeed, Congress provided specifically in Section 202 (b) that "Nothing in [Part II dealing with motor carriers] shall be construed * * * to interfere with the exclusive exercise by each State of the power of regulation of intrastate commerce by motor carriers on the highways thereof." However, we submit that it is entirely proper for the Commission in administering Section 207 to take into account the effect of such State policies, just as it considers other transportation conditions.

As noted above, the appellants claim that there is no proof of public need for Motor Transit's service between the major points on these routes, amounts to a claim that there is no justification for authorizing such service between any of the points with a population in excess of 6,000 persons. For convenience, we repeat here the Commission's findings and reasoning on this aspect of the case (R. 115):



> There is some evidence of a public need for the proposed truckload services of applicant, but it is not as convincing as that with respect to the peddle operations, and this is understandable because the other motor carriers operating in the area have usually provided satisfactory service on truckload shipments. There is also some evidence that the latter have refused to accept truckloads of low-rated commodities. In any event we feel that there is sufficient basis to warrant a complete grant of authority to applicant. This truckload "cream of the traffic," which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors' operations, should not be handed over to its competitors and Motor Transit expected to provide the expensive peddle services.



It is axiomatic that regular peddle service to small communities, involving the handling of many less-than-truckload shipments, is relatively costly to perform. Generally, motor carriers prefer to handle truckload shipments which tend to have their origin and destination at larger points. As the Commission noted (R. 98), Chairman Reed of the Iowa State Commission testified that "The trend in this State in the matters that we have contact with has been that the carriers generally are getting away from the local service and the smaller shipments" (R. 742). We submit that it was consistent with the basic concept of common carriage, and within the Commission's regulatory discretion, for it to conclude that the only carrier which can and will provide regular peddle service to the

smaller towns also shall be allowed to compete for the more profitable truckload traffic between the larger points on the same routes. That motor carriers have an obligation to serve both large and small shippers, rather than "skimming the cream" of truckload traffic, is not a new principle in motor carrier regulation. It has been applied by the Commission in a variety of circumstances. See *Keele Common Carrier Application—New Operation*, 30 M. C. C. 173, 181; *D. A. Beard Truck Lines Co. Com. Car. Applic.—New Operation*, 30 M. C. C. 197, 205; *The Emery Transportation Company, Extension—Jeffersonville Radius*, MC-9685 (Sub No. 9) (not officially reported), 8 Fed. Carr. Cas. par. 31,962; *Mid-States Freight Lines, Inc.—Purchase—Carlo Transp. Co.*, 57 M. C. C. 581, 595; *Osborne Extension—Lower Minimum Weight Shipments*, 64 M. C. C. 553, 554.

Moreover, as the Commission found (R. 115) "There is some evidence of a public need for the proposed truckload services of [Motor Transit]." This evidence may be summarized as follows:

At the outset, it should be noted that the testimony of many of the witnesses whose testimony was summarized by the Commission in its report (R. 110–111), supported a need for Motor Transit's service at and through the so-called larger points, as well as to the smaller towns. It is fair to say that the case was not tried before the Commission in terms of a distinction between the need for service to the small towns and need at the larger points. Nevertheless, there was substantial evidence that shippers had reeeived from Motor Transit a better service to and between the

larger points than they had been able to receive from other motor carriers.

Thus, shipper witnesses from *Chicago* (Macdonald, R. 268–277); Lussa, R. 277–281; Ozinga, R. 281–286; Hoppe, R. 286–290), from *Tri-Cities* (Davenport, Rock Island and Moline) (Stevens, R. 467–480); Gans, R. 257–268; Schunter, R. 321–329; Pahl, R. 880–885), from *Muscatine* (Gould, R. 1263–1267; Sweany, R. 1251–1263), from *Iowa City* (Jacobs R. 486–490; Nesmith, R. 490–493; Swanholm, R. 493–497; Slager, R. 1142–1149; Wegmuller, R. 1136–1142), from *Grinnell* (Zimmerman, R. 713–716; Mathews, R. 716–720; Ritter, R. 734–738; McKean, R. 747–751; Brink, R. 752–760), from *Newton* (Denniston, R. 783–790; Dunn, R. 791–795; Engle, R. 795–813), from *Des Moines* (Griffith, R. 1313–1316; Louberto, R. 1299–1306; Triggs, R. 1289–1299), from *Atlantic* (Turner, R. 933–936; Mitchell, R. 546–551), from *Council Bluffs* (Ball, R. 1005–1010), and from *Omaha* (Seastedt, R. 1010–1014; Hartnett, R. 994–1005) testified variously that on shipments between the larger points they had received faster and more dependable service from Motor Transit than from other motor carriers, that other motor carriers had been reluctant to accept low-rated shipments, and that in some instances curtailment of Motor Transit's service would require them to operate their own trucks. Similar testimony that shippers would suffer if Motor Transit were not allowed to serve the larger communities on the routes in question was received from representatives of the Chambers of Commerce or traffic organi-

zations of *Chicago* (Maurer, R. 243–257), *Davenport* (Cummins, R. 227–243), *Muscatine* (Sweany, R. 1251–1263), *Cedar Rapids* (Ewoldt, R. 1117–1126), *Iowa City* (Gage, R. 484–486), *Des Moines* (Hansen, R. 1316–1320), *Atlantic* (Walker, R. 1197–1202), and *Omaha* (Heinecamp, R. 1356–1379). It should be noted that this evidence, and the Commission's finding derived from it, are based upon the service which Motor Transit actually had performed in the past, rather than mere expectations as to the service it could and would render.

The Commission did not purport to determine whether this evidence alone would have established that the public convenience and necessity required that Motor Transit be authorized to serve the larger communities. Rather, it determined that this demonstrated need, coupled with its conclusion that only Motor Transit could provide a regular peddle service to the smaller points, justified a grant of authority to Motor Transit to serve all of the points on the routes involved. We submit that the Commission's action upon this record was well within the broad discretion conferred upon it by Congress to determine what transportation service is required by the public convenience and necessity. *Interstate Commerce Commission* v. *Parker*, 326 U. S. 60, 65; *United States* v. *Detroit Navigation Co.*, 326 U. S. 236, 241; *United States* v. *Carolina Freight Carriers Corp.*, 315 U. S. 475, 489.

CONCLUSION

The judgment of the three-judge court should be affirmed.

Respectfully submitted.

ROBERT W. GINNANE,
General Counsel.

JAMES Y. PIPER,
Assistant General Counsel,

Questions Presented	2
Statement of the Case	3
Summary of Argument	13
Argument	14
Neither the National Transportation Policy embodied in the preamble to the Interstate Commerce Act nor Section 5(2)(b) restrict the power of the Commission to issue certificates of public convenience and necessity when need therefor is shown merely because the applicant is affiliated with a railroad	14
The decision in the case at bar involves no departure from previous policies or practices of the Interstate Commerce Commission. The Commission has consistently recognized that railroad carriers or their affiliates under proper circumstances may be granted unrestricted motor carrier authority under Section 207, or may acquire and operate existing motor carriers under Section 5(2)(b)	16
The finding of the Commission that public convenience and necessity require service by applicant both to the smaller communities and between the major points is amply supported by the evidence, and is conclusive upon the Courts	19
The contention of appellants that the operations of Rock Island Motor Transit have restrained competition with independent motor carriers, and that there is danger that Motor Transit and its rail parent may acquire a monopoly in the transportation field is wholly unsupported by the evidence	40
Conclusion	46

Appeal From the United States District Court for the District of Columbia

---

BRIEF OF ROCK ISLAND MOTOR TRANSIT COMPANY INTERVENOR-APPELLEE

The briefs of appellants correctly set forth the citation of the case below, the jurisdiction of the court, and the statutory provisions involved in the appeal.

QUESTIONS PRESENTED

The questions presented may be stated as follows:

1. When, in a proceeding under Section 207(a) of the Interstate Commerce Act, the Commission finds that public convenience and necessity require motor carrier service in a particular area, does the fact that the applicant therefor is a railroad subsidiary preclude the Commission from issuing an appropriate certificate to such applicant?

2. Are the provisions of Section 5(2)(b) of the Interstate Commerce Act, relating to acquisition of a motor carrier by a railroad, to be construed as prohibiting railroad corporations, or their subsidiaries, from conducting motor carrier operations over public highways even though the public need therefor is clearly demonstrated by evidence?

3. Is the conclusion of the Commission that public convenience and necessity requires the continuation of the service rendered by Rock Island Motor Transit Company, Intervenor-Appellee, supported by substantial evidence?

Briefly stated, the position of Rock Island Motor Transit Company, Intervenor-Appellee, is that the foregoing questions have been fully answered by the decisions of this Court in *United States, et al.* v. *Rock Island Motor Transit*, 340 U.S. 419, 95 L. Ed., 391, 71 S. Ct. 382; in *Interstate Commerce Commission, et al.* v. *Parker*, 326 U.S. 60, 89 L. Ed., 2051; and in *United States, et al.* v. *Pierce Auto Freight Line*, 327 U.S. 515, 90 L. Ed., 821.

4. A further question presented in Number 8 is:

> Does an association of labor executives, comprised of officers of various unions, some of which

represent employees of a railroad whose wholly owned subsidiary has applied for a certificate of public convenience and necessity authorizing motor carrier operations, have standing to challenge the legality of Commission action granting a certificate to such railroad subsidiary?

STATEMENT OF THE CASE

The statements of the case appearing in the briefs of counsel for appellants do not fully disclose the factual situation or background of the case. We therefore substitute the following brief outline of the previous history of the case, and the evidence before the Commission:

Rock Island Motor Transit Company is the successor in title and interest to White Line Motor Freight Company, one of the pioneer operators in the motor carrier field between Chicago, Ill. and Omaha, Nebr., and particularly between the Mississippi River points of Rock Island, Moline, East Moline, Ill., Davenport and Bettendorf, Ia., and the Missouri River points of Council Bluffs, Ia. and Omaha, Nebr. White Line commenced motor carrier operations in early 1930 between the Quad-Cities (Rock Island, Moline and East Moline, Ill., and Davenport, Ia.) and Des Moines, Ia. via U.S. Highway 6. A few months later, its operations were extended from Des Moines to Omaha, Nebr. over the same highway; its service was extended to Cedar Rapids, from Iowa City over U.S. Highway 218, and to Muscatine, about 27 miles west of Davenport over Iowa Highway 38. In the early 1930's it extended its motor carrier service east to Chicago via Highways 92 and 34, and later entered into an interchange arrangement with Keeshin Motor

Express between Chicago and East Moline, where trailers were interchanged and White Line performed the service between East Moline and Omaha, Nebr. (See *Rock Island Motor Transit Company—Purchase—White Line M.F.*, 5 M.C.C. 451)

On October 13, 1937, Motor Transit and White Line jointly applied to the Commission for its approval of the acquisition by Motor Transit of all physical assets and operating authority of White Line. A recommended report and order of an examiner of the Commission approved the transaction but suggested that the Commission impose conditions restricting the transportation to be performed to shipments moving on railroad billing and at rail rates, and that Motor Transit's operating authority be subject to such further limitations and restrictions as the Commission might find necessary to impose "to insure that the service shall be auxiliary or supplementary to the train service of the Chicago, Rock Island and Pacific Railway Company, and shall not unduly restrain competition".

Exceptions were filed and fully argued before Division 5 of the Commission, in which Motor Transit urged the desirability of performance of motor carrier service by it on motor carrier billing and at motor carrier rates. Motor Transit pointed out that the conditions proposed by the examiner would deprive some of the communities previously served by White Line of the benefits of motor carrier service. On April 1, 1938, the Commission, Division 5, entered its order approving the acquisition. It expressly found that the acquisition would promote the public interest, would enable the railroad to utilize service by motor vehicle to public advantage in its operations, and would not unduly restrain competition. The restriction confining

Motor Transit to transportation of shipments on rail billing at rail rates was eliminated, but the reservation of authority to impose future restrictions to insure that the service shall be auxiliary or supplemental to the train service of the Chicago, Rock Island and Pacific Railway Company was retained. A certificate containing that condition and restricting Motor Transit's operations to points which were stations on the line of the Rock Island Railroad was issued December 3, 1941.

Coincident with the acquisition of White Line's interstate operating authority, Motor Transit also acquired its intrastate certificates of public convenience and necessity which authorized motor carrier service between Iowa points via the same routes. Motor Transit took over the operation immediately after April 5, 1938. It purchased new equipment, acquired certain other routes connecting with the former White Line operation, and improved the White Line service by inaugurating a number of "peddler" runs, by which is meant distribution of numerous small shipments by a truck which starts from a larger terminal and makes deliveries at smaller points, either returning to its origin point, or continuing to a destination on the same route. In these peddler runs, Motor Transit handled interstate motor billed freight, intrastate motor billed freight and both inter and intrastate railroad billed shipments, which were turned over to it by the railroad.

J. H. Fredrickson and Son, of Harlan, Iowa, held interstate and intrastate certificates authorizing operations as a common carrier between Avoca, Harlan, Council Bluffs, Oakland and Atlantic, serving a number of communities which were stations on the rail line of the Rock Island Railroad, not located on U.S.

Highway 6. On November 28, 1944, in *Rock Island Motor Transit Company—Purchase—Fredrickson*, 39 M.C.C. 824, the Commission, Division 4, approved Motor Transit's acquisition of the Fredrickson certificate, but no certificate was immediately issued to Motor Transit. On February 5, 1945, the Commission ordered both the Fredrickson and the White Line cases reopened for further consideration to determine what, if any, restrictions should be imposed in order to insure that the service rendered by Motor Transit would be auxiliary and supplemental to the rail service of the railroad.

Pursuant to the reopening, the Commission, in *Rock Island Motor Transit Company—Purchase—White Line M. Frt.*, 40 M.C.C. 457, on March 4, 1946 without a hearing, entered an order directing that both the White Line and Fredrickson certificates be restricted to handling shipments on rail billing and at rail rates and with other conditions designed to insure that the service be auxiliary and supplemental to the rail service of the railroad. Motor Transit filed a petition for reconsideration of this order, in which it suggested that a hearing be held. On June 9, 1947, the Commission again reopened the two acquisition cases for further hearing. A hearing was scheduled but Motor Transit declined to introduce evidence and thereafter on April 11, 1949, in 55 M.C.C. 567, the Commission issued its order imposing the same restrictions as were embodied in the order of March 4, 1946.

Motor Transit instituted a suit in the United States District Court for the Northern District of Illinois at Chicago. A three judge court, on November 29, 1949, set aside the Commission's order of April 11, 1949, and enjoined its enforcement. *Rock Island Motor Transit*

Company v. *United States, et al.*, 90 F. Supp. 516. The United States and the Commission appealed from the judgment of the District Court, to this Court, which on February 26, 1951, in *United States et al.* v. *Rock Island Motor Transit Company*, 340 U.S. 419, 71 S. Ct. 382, 95 L. Ed. 391, by a vote of five justices to four, reversed the decision of the three judge court. This Court held that the Commission, under the reservation contained in the White Line certificate, had the power to impose the restrictions, and as to the Fredrickson case, ruled that since no certificate, covering the Fredrickson routes had been issued to Motor Transit, the Commission still had control of the proceeding. Upon the issuance of the mandate of the Supreme Court of the United States, Motor Transit's action in the Northern Illinois District Court was dismissed, and judgment rendered against it for costs of the action.

On August 30, 1951, upon a showing of lack of service to the area covered by the White Line and Fredrickson certificates, supported by affidavits of shippers and others, the Commission granted Motor Transit temporary authority for not to exceed 180 days to render motor carrier service to the affected points, restricted to a maximum of two thousand pounds for any one shipment. A hearing was held before an examiner of the Commission in September, 1951, after which the maximum restriction was raised to five thousand pounds per shipment.

On October 26, 1951, Motor Transit filed its application under Section 207 for permanent authority to perform motor carrier service over the White Line and Fredrickson routes. This was later amended to apply for removal of the maximum weight and keypoint limitations upon applicant's service. Hearings upon

this application extended over fourteen full days, March 18 through April 2, 1952 and May 20 to 22 inclusive. On April 21, 1953, the hearing examiner filed a recommended report and order which appears at R. 1. Exceptions were filed by a number of motor carriers, by American Trucking Associations, Inc. and oral arguments were had before the entire Commission on March 8, 1954. The Commission filed its report and order on November 22, 1954, 63 M.C.C. 91, R. 93. Appellants' petition for reconsideration was denied by Commission order July 14, 1955.

Appellants instituted an action in the United States District Court for the District of Columbia on July 20, 1955. The case was heard upon the record made before the Commission by a three judge court, Circuit Judge Prettyman presiding, on December 15, 1955. The unanimous opinion of the three judge court sustaining the action of the Commission was filed January 11, 1956 and judgment dismissing the appellant's complaint was entered January 27, 1956. (R. 195). Notices of appeal by appellants in both 6 and 8 were filed within the required time. This Court noted probable jurisdiction on October 8, 1956. (R. 204).

At the hearing, approximately 180 witnesses were heard. Some 136 of these witnesses were shippers and receivers of freight located in practically every point on the White Line and Fredrickson routes, and other points such as Minneapolis and St. Paul, Minnesota, Chicago, Illinois, Burlington, Ottumwa, Oskaloosa and Clinton, Iowa and Kansas City and St. Joseph, Missouri. The evidence given by these witnesses will be referred to in greater detail in our discussion of the sufficiency of the evidence to support the Commission's findings.

At the conclusion of applicant's evidence before the examiner, the protesting motor carriers, appellants here, requested a postponement of approximately six weeks to enable them to prepare to meet applicant's evidence. The examiner thereupon adjourned the hearing from April 2, 1952 until May 20, 1952. The appellants introduced no shipper witnesses to controvert the showing made by applicant. The only witnesses called, aside from certain individuals performing local pickup and delivery service for other motor carriers at points like Iowa City and Atlantic, were C. A. Gracey, Vice President of Iowa-Nebraska Transportation Company, E. W. Harlan, President and General Manager, Bruce Motor Freight, Inc., which operates between St. Paul and Minneapolis, Des Moines, Kansas City and St. Louis with no service whatever to intermediate points, including such cities as Ottumwa, Ia., population 33,000, Keokuk, Ia., population approximately 20,000, and Missouri points; Joe Bos, of Bos Truck Lines, Inc., Marshalltown, Iowa, and A. W. Hobbs, Vice President, Des Moines Transportation Company. During the cross-examination of the witness Gracey, request was made that freight bills and delivery receipts of Iowa-Nebraska Transportation Company, showing shipments originating and handled at Omaha, Nebr., Des Moines, Ia. and Chicago, Ill., destined to points involved in the proceeding, be produced for examination. The examiner denied the request but advised counsel for all parties that the failure to produce such records was a circumstance which might be taken into account in determining the weight and credit to be given the testimony of the witness as to the time when peddler service was inaugurated and the extent of it. (R. 1571-1573).

At the time of the hearing before the Commission, Motor Transit was operating peddler runs on regular daily schedules (at least five days per week) over portions of the White Line route as follows:

A. Between Davenport and Atalissa, Iowa and return, serving the intermediate points of Walcott, Stockton, Durant, Sunbury, Wilton Junction, Moscow and Atalissa. This run leaves the Davenport, Ia. terminal at 7:00 a.m., delivers and picks up freight shipments at those points. (R. 362-363)

B. Between Iowa City and Victor, Ia. and return, serving the intermediate points of Tiffin, Oxford, Homestead, South Amana, Marengo and Victor. (R. 566-568)

C. Between Iowa City and Wellman, Ia. and return, serving the intermediate point of Kalona. (R. 566-569)

D. Between Cedar Rapids and Ottumwa, Ia. via U. S. Highway 218 and Iowa City. (R. 570-571)

E. Between Des Moines and Colfax, Ia. and return, serving the intermediate points of Altoona and Mitchellville. (R. 1341)

F. Between Des Moines and Newton, where an exchange of trailers is made, and the tractor picks up a loaded semi trailer unit, and proceeds east to Chicago, making pickups in Grinnell and Iowa City. (R. 1342-1344).

G. Between Des Moines, Kellogg and Grinnell. (R. 1343)

H. Between Des Moines, Brooklyn, Marengo, Iowa City, Nichols and Muscatine. (R. 1344-1345)

I. Omaha, Nebr. to Lewis, Treynor, Carson, Oakland, Hancock, Avoca and return via Iowa Highway 64, serving in addition to the points specified, Shelby, Neola, Minden, Underwood, and Weston. (R. 1331)

J. Between Des Moines and Audubon, Ia. and return, serving Atlantic, Brayton, Exira, Hamlin and Audubon. (R. 1347)

K. Between Des Moines and Anita, Ia., serving the intermediate points of Dexter, Stuart, Menlo, Casey, Adair, Anita and return to Des Moines. (R. 1347)

These runs all handled rail billed freight, and interstate and intrastate motor carrier billed freight in the same vehicle. The proportion of rail billed freight varied from ten to twenty-five per cent, and the proportion of inter and intrastate motor billed freight varied according to the location of the run. At the hearing, the position of Rock Island Motor Transit Company, Intervenor-Appellee, was supported by numerous representatives of motor carriers who have interlined shipments with Motor Transit at such points as Chicago, Rock Island and Moline, Ill., Cedar Rapids and Davenport, Ia.

These witnesses included:

George V. Bishop, traffic representative for Clipper Transit Company, Manitowoc, Wisc., who testified that his company served eastern Wisconsin points and Chicago; that difficulty had been experienced in securing carriers at Chicago who would handle shipments to destinations in Iowa, such as Oxford, Wilton Junction, Walcott, Lone Tree and Wellman, but that Motor Transit had hand d all such shipments. (R. 290-293)

Henry H. Weixler, Vice President, Atkins Transfer Company, Louisville, Ky., who testified his company

served the area between Nashville, Tenn. and Chicago, and that he had experienced much difficulty in finding carriers to handle shipments to interior Iowa points, but that Motor Transit had handled everything given to them. He referred particularly to destinations such as Wilton Junction, Kalona, Wellman, West Liberty, Grinnell, Audubon, Griswold and Harlan (R. 1019), also to shipments of tires destined from Birmingham, Ala. to Rock Island, Ill. via Chicago.

Keith Cecil, General Manager, Central Transfer Company, Brimfield, Ill. (a suburb of Peoria), testified that his company interlined shipments originating at Illinois points with Motor Transit at Davenport, destined to interior Iowa points; that prior to September 1951, his company interlined numerous shipments in excess of five thousand pounds with Motor Transit; that during the period of time that Motor Transit was restricted to two thousand pound shipments, his company had difficulty in securing interline carriers to serve Iowa destinations, and that some companies had refused to handle them from Davenport to destination. (R. 418, 423)

M. J. Riley, Vice President and Traffic Manager for Dohrn Transfer Company, which operates between Mississippi River points in Iowa, as far south as St. Louis, Mo. and east to Indianapolis, Ind. and Chicago, testified that no motor carrier, other than Motor Transit, rendered a local peddler service to points in Iowa between the Davenport-Rock Island area and Omaha, Nebr.; that while truck loads to Des Moines and larger points could be interlined with other carriers, except at one or two points, his company could get no interline service to points along U. S. Highway 6. (R. 342-347)

V. G. Grice, General Manager, H. & W. Motor Express, which operates between Chicago, Waterloo and Cedar Rapids, Ia. via Dubuque, and to Clinton and the Quad Cities, testified that while his company holds authority to serve every point on U. S. Highway 6 between Davenport and Des Moines, the volume available was usually insufficient to conduct the operation at a profit; that the peddler operations of the carriers generally serving the Iowa territory have depreciated and that, as to many destinations, Rock Island Motor Transit has been the only carrier which would accept interline shipments from his company. (R. 298) This witness testified that interstate traffic with no intrastate certificate would not sustain local peddler service to small intermediate points. (R. 299)

William J. Creagan, General Manager, Knox Motor Service, of Rockford, Ill., which serves the Quad Cities area, including Davenport and Bettendorf, Ia., testified that Rock Island Motor Transit was the only carrier that would consistently take and handle shipments of a few hundred pounds destined to interior Iowa points on or adjacent to U. S. Highway 6. His traffic consists of repair parts for implements shipped by J. I. Case Company, medicines from Rawleigh Company at Freeport, Ill., hardware from Sterling, Ill., and Milwaukee, Wisc., and small tools, and repair parts for implements out of Rockford, Ill. (R. 701-704)

SUMMARY OF ARGUMENT

Section 5 (2)(b) applies only to acquisition cases. Section 207 requires the issuance of a certificate of public convenience and necessity whenever the Commission finds that public convenience and necessity require and that applicant is fit, willing and able to

perform the service. The mere fact that applicant for such certificate is affiliated with a railroad does not make him ineligible to secure a certificate of public convenience and necessity.

The Interstate Commerce Commission has consistently followed the policy of permitting railroad carriers and their affiliates to render motor carrier service whenever the circumstances demonstrate a real need for such service. The decision of the Commission in the case at bar involves no departure from established principles and practices.

The Commission's finding that public convenience and necessity require service by applicant, both to the smaller communities and between the larger centers of population, is a matter entrusted to the discretion of the Commission, and the evidence amply supports the Commission's conclusion. The operations of appellee Rock Island Motor Transit during the years 1938 to 1951 have not tended to create a monopoly nor to lessen competition and there is no prospect that future operations of Motor Transit, under the certificate issued by the Commission, will adversely affect independent motor carriers.

ARGUMENT

Neither the National Transportation Policy embodied in the preamble to the Interstate Commerce Act nor Section 5(2)(b) restrict the power of the Commission to issue certificates of public convenience and necessity when need therefor is shown, merely because the applicant is affiliated with a railroad.

Counsel for the Interstate Commerce Commission will, we believe, fully reply to the contention of Appellants that Congress, by the enactment of Section

5(2)(b) and by the statement found in the National Transportation Policy has forbidden railroads or their subsidiaries to enter the motor carrier field. We shall, therefore, refer to the matter only in the briefest possible manner.

First, we desire to point out that Section 5(2)(b) relates only to acquisitions of existing motor carriers. This provision was intended as a safeguard against the creation of a monopoly in the transportation field. Congress by Section 5(2)(b) has expressly authorized railroads to acquire motor carriers, if the requisite findings are made by the Commission. In other words, the contention of Appellants is that while 5(2)(b) expressly permits railroads to acquire motor carriers, still the section must be construed to prohibit such acquisitions. It is Appellants' contention that the statute must be construed as authorizing a railroad to acquire only the vehicles used by a motor carrier, and then use them in its operation as a railroad. The language of 5(2)(b) negatives any such Congressional intent.

Second, the language of Section 207 requires no construction. The section is plain and unambiguous. It expressly authorizes issuance of certificates of public convenience and necessity for motor carrier operation "to any qualified applicant", when the requisite findings are made by the Commission. The statute as written does not justify resort to extraneous matters to determine the legislative intent.

Third, nothing in the National Transportation Policy or in the provisions of Section 207 or 5(2)(b) indicate any Congressional purpose to prohibit railroads from operating motor carriers, as such. Section 5(2)(b)

indicates concern that no monopoly shall be created in the transportation field, by acquisition of motor carriers by railroads, or persons controlled by railroads. There is no intimation in the language of the Act that Congress was particularly interested in restricting the development of truck transportation by railroads, and certainly no language found in the Act supports the construction for which Appellants contend that railroads, after acquiring motor carriers, must cancel all motor carrier tariffs, and abandon motor carrier operations.

Fourth, this Court by its pronouncements in *Interstate Commerce Commission* v. *Parker*, 326 U.S. 60, 89 L. Ed. 2051, and in *United States, et al.* v. *Rock Island Motor Transit Company, et al.*, 340 U.S. 419, 95 L. Ed. 391, has clearly repudiated the construction for which Appellants' counsel contend.

The decision in the case at bar involves no departure from previous policies or practices of the Interstate Commerce Commission. The Commission has consistently recognized that railroad carriers or their affiliates under proper circumstances may be granted unrestricted motor carrier authority under Section 207, or may acquire and operate existing motor carriers under Section 5(2)(b).

Throughout their Brief, counsel for Appellants have attempted to create the impression that the decision of the Commission in the present case involves a radical departure from long established rules, and that the Commission has adopted a new policy of favoring railroad companies at the expense of the so called independent motor carriers. These statements are wholly without justification, and are in no manner supported by the prior opinions of the Commission.

First, the Commission's opinion specifically points out that its findings in the present case are "not to be construed as an abrogation of the policy established in" previous cases with respect to operation of motor carriers by railroad companies or their subsidiaries. (R. 116)

Second, an examination of the decisions of the Commission will demonstrate that the Commission has always followed a policy designed to secure for the public the benefits of efficient transportation service. Since the adoption of the Motor Carrier Act in 1935, the Interstate Commerce Commission has had frequent occasion to consider the operation of trucks and passenger busses by railroads, or railroad subsidiaries. The policy of the Commission has been to decide each case upon its particular facts with the needs of the communities for service as the controlling consideration. This policy of the Commission has found expression in cases in which rail carriers or their subsidiaries have sought to acquire existing motor carriers, and in which rail carriers have sought certificates of public convenience and necessity under Section 207. There are many outstanding instances in which the Commission has granted certificates authorizing unrestricted motor transportation by railroads. The following constitute only a partial list of such cases found in the Commission's reports.

Santa Fe Trail Stages, Inc.—Control—Central Ariz., 1 MCC 225.

St. Andrews Bay Transportation Co.—Extension, 3 MCC 711

Rock Island Motor Transit Co.—Extension—Wellman, Ia., 31 MCC 643.

Interstate Transit Lines—Extension—Verdon, Nebr., 10 MCC 665

Santa Fe Trail Stages, Inc.—Common Carrier Application, 21 MCC 725
Burlington Transportation Co.—Extension—Council Bluffs, Ia., 28 MCC 783
Texas & Pacific Motor Transport Co.—Extension—Point Blue, La., 47 MCC 425
Santa Fe Trail Transportation Co.—Extension—Joplin, Mo., 44 MCC 474
Burlington Truck Line, Inc.—Extension—Iowa, 48 MCC 516
Clinton, Davenport & Muscatine Ry. Co. —Extension, 24 MCC 250
Southern Pacific Co.—Control, Pac. Motor Trucking Co.—Purchase—Lowinel Trucking Co., 60 MCC 373

In *Rock Island Motor Transit Co.—Extension—Wellman, Iowa*, 31 MCC 643, Motor Transit applied for a certificate authorizing service between Iowa City, Kalona and Wellman, Iowa. The Record demonstrated that there was no existing motor carrier service in that territory. Division 5 found that public convenience and necessity required the service, but imposed a condition restricting the service to be performed to movement of shipments on rail billing and at rail rates. The entire Commission removed this restriction. A similar situation existed in *Clinton, Davenport and Muscatine Ry. Co.—Extension*, 24 MCC 250. Numerous railroads, large and small, have been granted unrestricted motor carrier authority, both in the passenger and freight transportation fields. Burlington Truck Lines, a subsidiary of Chicago, Burlington and Quincy Railroad Company, is an extensive midwest motor carrier, and has operated with no restrictions between Chicago and Omaha, and intermediate points, for approximately 20 years. In addition it has other extensive operations in the States of Illinois, Missouri, Nebraska,

Iowa, and Colorado, upon which no limitation of the character here involved has ever been applied.

An examination of the cited decisions of the Commission and others will demonstrate that the Commission's policy has been based upon a desire to insure adequate and proper service to the public, and that the identity of the particular carrier furnishing the service has not been given controlling weight.

The finding of the Commission that public convenience and necessity require service by applicant both to the smaller communities and between the major points is amply supported by the evidence, and is conclusive upon the Courts.

Railway Labor Executives Association, et al., appellants in Cause No. 8, do not attack the sufficiency of the evidence to support the Commission's conclusion that public convenience and necessity require continuation of service by applicant, Motor Transit Company. Before the Commission and the Court below, American Trucking Associations, Inc., and individual motor carriers, appellants in No. 6, challenged the sufficiency of the evidence to support the Commission's finding of public convenience and necessity. Apparently these appellants have abandoned that position, for, at page 52 of their Brief, they now concede:

> "that there was sufficient evidence of record to enable the District Court to sustain the Commission's order insofar as it authorized a bona fide auxiliary and supplemental service to be rendered to and from such relatively minor points as Brooklyn, Colfax, Marengo, Newton, Oxford, Victor, Walcott and Wilton Junction."

Appellants, in No. 6, still urge, however, that the Record is devoid of testimony showing any public need

for motor carrier service between "major points" involved in this Record.

These so-called "major points" are all cities and towns having a population according to the 1950 census of more than 6,000. They include Chicago, Moline, East Moline, and Rock Island, Ill. and Davenport, Iowa City, Cedar Rapids, Grinnell, Newton, Des Moines, Atlantic, Council Bluffs, Iowa, and Omaha, Nebr.

Counsel for appellants entirely overlook the fact that the undisputed Record shows that there are eleven towns between Des Moines and Davenport which are served by no other motor carrier except applicant. These points are Walcott, Stockton, Durant, Wilton, Atalissa, Tiffin, Coralville, Oxford, Homestead, South Amana and Altoona. They overlook the undisputed fact that in addition to these towns there are points such as West Liberty, Victor, Malcom, Ladora, Marengo, Kellogg, as well as off route points like Kalona and Wellman, which have either no motor carrier service whatever, except that of applicant, or no service rendered on a regular schedule. They overlook the fact that between Des Moines and Omaha the Record likewise shows that no carrier renders any regular scheduled service to points such as Lewis and Griswold located off highway No. 6 and points such as Exira and Brayton, which are between Audubon and Atlantic, Iowa.

Walcott is located approximately twelve miles west of Davenport and one mile off U. S. Highway 6. Witnesses from this community testified that applicant's service was the only available motor carrier service, and this was in no manner controverted, except for testimony that there were irregular route carriers

which occasionally brought in a load of fencing, building material or similar freight, "and we never see them again". The witnesses so testifying with respect to Walcott are Lester Lund (R. 350-353), Erben and Reilly Dietz (R. 1243-1245), and Clarence Lovewell (R. 1247-1249).

From Durant witnesses testified that many trucks pass through the community on U. S. Highway 6, "but they never stop". The witnesses from this town located twenty miles west of Davenport on U. S. Highway 6 were Grover Schneckloth (R. 329-335) and H. R. Lamp (R. 390).

Mrs. Dan Fesler, Coralville, dealer in food products, testified to delays of from two to five days in shipments handled by other carriers, which were delivered to her by transfer trucks from Iowa City. Direct deliveries were made to her place of business by Rock Island Motor Transit Company. Her experiences with the transportation service available to her community are set forth at R. 941-945.

Don Sheetz of Oxford, a dealer in animal feeds, drugs, medicine, extracts, spices and cosmetics produced by the Watkins Company of Winona, Minnesota, testified that difficulties had been encountered in securing delivery of truckloads from Winona, Minnesota; Applicant has the only interstate authority to serve Oxford and delays occurred when the Gateway Company endeavored to find a carrier which might make delivery of a truckload of his merchandise to him at Oxford. This witness's evidence appears in the Record at (R. 458-463).

Applicant has the only certificate authorizing transportation in interstate commerce to and from Kalona

and Wellman, which are located in eastern Iowa and are reached from Iowa City via Iowa Highways 1 and 22. Witnesses from Kalona were Arthur Beranek, dealer in farm implements and machinery, whose evidence appears at (R. 590-593); W. L. Gates, an implement and Chevrolet dealer, whose evidence appears at (R. 593-596); Ellis Swartzendruber, who is engaged in the sale of implements and farm supplies and whose testimony appears at (R. 596-598) and Paul Brenneman, an automobile dealer, whose evidence is set forth at (R. 598-600).

All these witnesses testified that no other service was available to them at Kalona except that of applicant, and told of the needs of their various businesses for the continuation of such service.

At Lewis in the western part of Cass County (located south of Atlantic and adjacent to U. S. Highway 6), the evidence of the witness Reilly Clark sets forth in some detail the transportation picture affecting that community. It is located only one mile off U. S. Highway 6 and numerous carriers, other than Rock Island Motor Transit, pass the community, but render no service to it. The businessmen at this point presented a petition (reproduced R. 1904) which graphically outlines the necessity of applicant's service to the community. The evidence of the witness Clark appears at (R. 1210-1216) and establishes how dependent the citizens of that community are upon the continuation of the service rendered by applicant.

At Hancock, a small community located on U. S. Highway 59 and some eight miles north of U. S. Highway 6, a similar situation exists. William Ebert, owner of Ebert Oil Company, distributor of petroleum

products, tires batteries and automoblie accessories, testified that lubricating oils are received in less than car load shipments on practically a daily basis. He testified that there were truckers located at Hancock that haul livestock to Omaha, Nebraska. That Iowa-Nebraska Company apparently has no right to serve Hancock and that there is no regular service available except that of Rock Island Motor Transit Company (R. 600-602).

American Trucking Associations, Inc. and motor carrier appellants contend that the District Court erred in failing to set aside the Commission's order for lack of evidentiary support as to the "major points". See appellants' brief in No. 6, pages 51-54. These "major points" apparently include all cities and towns having a population in excess of about 6,000 except the City of Muscatine, population 19,041, located about 27 miles southwest of Davenport on the Mississippi River. This contention of appellants overlooks a large amount of extremely pertinent and persuasive evidence which counsel have entirely ignored in their presentation. The record shows that a total of 34 shippers and receivers of freight at these so-called "major points" took the witness stand and testified to the need for Rock Island Motor Transit service to and from their communities. In addition, evidence of representatives of Chambers of Commerce from Chicago, Davenport, Moline, Muscatine, Iowa City, Cedar Rapids, Des Moines, Atlantic and Omaha was presented in support of the need for applicant's service to the so-called "major points."

From the City of Chicago four shipper witnesses and the assistant traffic manager of the Chicago Association of Commerce supported the application. The

testimony of these witnesses may be briefly summarized as follows:

MacDonald, traffic manager for Butler Brothers, wholesalers of general merchandise sold in variety stores, testified that his company shipped approximately 15 million pounds of freight per year, serving about 150 stores or dealers in Iowa, about a dozen of which are located on or adjacent to U. S. Highway 6. An average shipment to such dealers would weigh approximately 300 pounds. Occasion to make shipments of more than 5000 pounds would normally occur only in the case of store openings. The witness was particularly interested in service from Chicago to Audubon, Brooklyn, Colfax, Exira, Grinnell, Muscatine, Newton, Shelby, Stuart and Victor. Other carriers had failed to respond to calls for pick up service for outbound shipments, while Rock Island Motor Transit had responded to all calls promptly in a three months period. The witness further testified that the service rendered by Rock Island Motor Transit Company had been uniformly satisfactory (See R. 268-277).

Lussa, Chicago traffic manager for Rexall Drug Company shippers of drug store merchandise and supplies, drugs and pharmaceuticals, testified that his company shipped its products to approximately eight points including Des Moines, Grinnell, Iowa City, and others. The witness further said: "A good portion of our business is done with accounts located in these smaller towns and involving these peddle runs and we have found that the service of Rock Island Motor Transit has been favorable and we are afraid that if their service is discontinued or curtailed in any way

it would jeopardize our position." All Rexall dealers in the Iowa territory are served from the Chicago branch of the drug company. (R. 277-281)

Ozinga, traffic manager for Consolidated Grocers Corporation, which ships weekly or bi-weekly to 23 Iowa points on or adjacent to U. S. Highway 6, including such points as Atlantic, Council Bluffs, Davenport, Des Moines, Grinnell, Iowa City and Newton. He testified that Rock Island Motor Transit has proved to be the most reliable carrier; that the company had had some bitter experiences in the past with service by others, and that routings had been set up to many of the small towns for use of Rock Island Motor Transit service exclusively. On many occasions the company has need for volume shipments of over 5000 pounds weight. Any restriction or limitation on Motor Transit's service would adversely affect the firm's business for it requires consistent service to every point to which it ships groceries because of local competition. (R. 283-284)

Hoppe, traffic manager for a Chicago wholesaler of school and office supplies, housewares, books, library supplies and sundries, testified that his firm did business with schools, libraries and similar institutions in practically every incorporated town or village on U. S. Highway 6 between Davenport and Omaha; its shipments averaged from 350 to 500 pounds to those points; it has been using Motor Transit's service exclusively for the past fifteen years and he knows of no other carrier which gives the same type of service (R. 281-289)

Maurer, assistant traffic director of Chicago Association of Commerce and Industry, constisting of 400

very large industries in the Chicago area, and some 2100 shippers who use the service of the association, testified that Motor Transit "is performing a necessary service and should be permitted to perform a full common carrier operation. That means to handle not only the smaller towns but the larger towns on their routes and to handle truckload as well as the less-than-truckload traffic. In other words, to have an operation which is economically sound." (R. 243-245; Ex. Rept., R. 22)

From the Quad City area comprising Davenport and Bettendorf, Iowa, and Rock Island, Moline and East Moline, Illinois, four shipper witnesses and two representatives of Chambers of Commerce testified to the need for the continuation of Motor Transit's service to the area. These witnesses were:

Stevens, traffic manager for John Deere Plow Company of Moline, extensive producers and shippers of farm implements and parts to dealers on or adjacent to U. S. Highway 6 and to practically every city and town including the larger points of Iowa City; Cedar Rapids, Grinnell, Newton and Des Moines. The witness testified that while overhead service was available from Moline to Des Moines, many carriers would not accept shipments to intermediate points, while Motor Transit performed service to all points. He expressed the view that the interests of the Moline manufacturer and its dealers require that Motor Transit have unrestricted authority. (R. 470, Ex. Rept., R. 38)

Gans, general traffic manager for John Deere Company, testified to the needs of his company for service over the White Line and Frederickson routes in

western Iowa including specifically Omaha, Nebraska, and Atlantic, Iowa. He testified that Motor Transit was the only carrier which had served his company's needs in both the smaller and larger communities on its routes, and that it must be permitted to serve the larger, or key points, such as Des Moines and Omaha to support its over-all service. (R. 260)

Schunter, salesman for a Moline wholesale plumbing and heating firm, making daily shipments of about 500 pounds each to fifteen dealers in Iowa on U. S. Highway 6 between Davenport and Iowa City, testified that his firm had received excellent service from Motor Transit, knows of no comparable service in the area and feels it should be continued. (R. 321-325, Ex. Rept., R. 38)

Pahl, general superintendent of Rock Island Bridge and Iron Works, Rock Island, Illinois, which ships steel to points in eastern Iowa including Iowa City, testified that his company had shipped steel products via Motor Transit in quantities ranging from 500 pounds to truck loads of 28,000 pounds, to various points in Iowa on U. S. Highway 6 including Iowa City. (R. 881) Its service on both big and little orders has been satisfactory. Many of the shipments have been of a character that Motor Transit was the only carrier that would handle them. (R. 882-884)

Woodard, traffic manager of the East Moline, Moline and Rock Island traffic bureau comprising 68 industry members located on the Illinois side of the Mississippi River. The type of service rendered by Motor Transit was performed by no other motor carrier operating over U. S. Highway 6 in Iowa, and the members of his bureau require continuation of this service. (R. 392-402, Ex. Rept., R. 24)

Cummins, long time traffic director for Davenport Chamber of Commerce, testified to the necessity for continuation of applicant's service for distribution of pool car traffic to various Iowa destinations and for continuation of interline service to eastern Iowa points through the Davenport gateway. (R. 227-240)

From Muscatine, Iowa, one shipper witness and the general secretary of the Muscatine Chamber of Commerce supported the application. The witnesses were:

Gould, representing two Muscatine companies, which manufacture and distribute livestock feed and soy bean products. (R. 1263-1267) His company receives once or twice a week motor carrier shipments of parts for machinery, and equipment from both eastern and western points including Omaha. (R. 1265) Motor Transit renders the only through service on Omaha shipments and if its service was terminated or curtailed it would adversely affect Muscatine and its business interests.

Sweaney, general secretary of Muscatine Chamber of Commerce with a membership of 300 including manufacturers, wholesalers and individual merchants, testified that Motor Transit was one of two motor carriers maintaining terminals at Muscatine; that Motor Transit renders the only regular service to Omaha and points west; that the service was required by a number of members of his organization. (R. 1251-1263, Ex. Rept., R. 23)

From Iowa City, Iowa, five shipper witnesses plus the secretary-manager of the Iowa City Chamber of Commerce, testified to the service rendered by applicant and the necessity for its continuation. These witnesses were:

Jacobs, secretary and purchasing agent for an Iowa City retail lumber, building and farm supply dealer which receives shipments from Chicago and other eastern points. While other carriers operate between Chicago and Iowa City he has found that the service of applicant is superior and considers same necessary to the community. (R. 488, Ex. Rept., R. 41)

Nesmith, manager of a plumbing and heating wholesale house at Iowa City, which deals in both truckload and LTL shipments from eastern, central and southern states including Chicago, testified to the superior quality of applicant's service. That cessation or curtailment of such service would seriously affect his business and that his firm had been designated as a distributor of certain products because of the available transportation afforded by Motor Transit. (R. 486-490; Ex. Rept., R. 41)

Swanholm, local plant manager for Moore Business Forms Company, which manufactures forms for tabulating and accounting machines, and which has a volume of westbound shipments through the Omaha gateway, usually not exceeding one ton in weight. He has found service by other motor carriers to Omaha and beyond unsatisfactory. (R. 496) While that of Motor Transit has been very good. He has been routing shipments to Omaha and beyond via Motor Transit and desires to continue such practice. (R. 496)

Slager, proprietor of a hardware, appliance and farm implement store at Iowa City. Receives shipments in excess of 5000 pounds from [redacted], central and western states including Chicago and Wisconsin points. Motor Transit's service has been satisfactory while that of its competitors has been unsatisfactory,

both as to time of delivery and as to loss and damage claims. If Motor Transit's service were discontinued he would be required to seek other sources for his merchandise and to increase his inventory. (R. 1147)

Wegmuller, manager for a wholesaler of automotive parts and equipment and also operates a machine shop at Iowa City. His company receives shipments of batteries from Minneapolis, welding equipment and springs from Chicago and receives shipments from factories located in Detroit, New York, Pennsylvania, Kansas City, Springfield, Illinois, and the Pacific Coast. (R. 1137) He has found the service rendered by Motor Transit preferable to others on inbound shipments because of unreasonable delays and improper handling of claims, and curtailment of Motor Transit's service in the area would require him to provide his own delivery service by truck in the surrounding area.

Gage, secretary-manager of Iowa City Chamber of Commerce, testified to efforts to attract new industries to Iowa City at which the State University of Iowa and a large Veterans Administration Hospital are now located. Considers the trucking facilities available to Iowa City quite outstanding, based upon Motor Transit's interstate and intrastate service, and that local transportation is very important in attracting such industries. (R. 484-486)

From Cedar Rapids, Iowa, two witnesses testified to the need for continuation of applicant's service and removal of existing restrictions to points such as Tri Cities, Omaha and Chicago. These witnesses were:

Ewoldt, manager of traffic Bureau of the Cedar Rapids Chamber of Commerce, testified to the pres-

ence of numerous industries requiring service to and from the community (R. 1117-1118) and that a carrier performing local service like Motor Transit must necessarily have certain overhead or long haul revenues to make its operations economically sound. Cedar Rapids industries make shipments to and from points such as Omaha, Chicago and Kansas City which are served by Motor Transit. Motor carriers generally other than Motor Transit have tended to perform an overhead service between larger points where gross revenue is greatest and handling costs are less. (R. 1122-1123)

Johnson, general manager of Harper and McIntire Company, wholesalers of hardware and heavy goods lines, testified that his company required service for shipments in excess of 5000 pounds and that he had found applicant's service the only service available to intermediate points on U. S. Highway No. 6 in Iowa; that traffic to major points was necessary to support and keep this service available.

From Grinnell, Iowa, six witnesses testified to the necessity for continuation of applicant's service and removal of existing restrictions. These witnesses were:

Zimmerman, operator of a hardware, auto supply and appliance store, franchised by a nation-wide organization at Minneapolis, Minn., who receives 300 pound shipments almost daily from that point, and also receives merchandise direct from Chicago and Omaha. He has experienced excessive damage claims and slow service via other carriers. Operates on a small capital with low inventory, and must keep his stock moving. (R. 713-716)

Matthews, Rexall drug store proprietor, receives shipments from Chicago and other eastern points at least once or twice a week; Motor Transit's service has been about perfect, and continuation of it is necessary in his business. (R. 716-720)

Ritter, dealer in hardware, appliances, plumbing and heating equipment and supplies, receives out of state shipments from Chicago and Omaha. (R. 734) Has tried all motor carriers serving Grinnell, but has found motor Transit's service is superior and relies on Motor Transit's service for local delivery to the points served. (R. 735-738)

McKean, owner of a variety store, receives four or five shipments per week from Chicago. Has found service of Motor Transit dependable and has had unfavorable experience with other carriers especially on seasonal goods. (R. 747-751)

Brink, manager of a plant manufacturing shoes at Grinnell, employing about 125 persons. Receives shipments of raw materials from eastern and southern points which he has been routing via Motor Transit from Chicago. (R. 758) Outbound shipments generally go to dealers in the midwest area; pick up and delivery service of Motor Transit has been superior to other carriers, and delay or loss of inbound shipments would disrupt production at the plant. Considers continuation of Motor Transit's service necessary to his business. (R. 752-760, Ex. Rept., R. 49)

Phelps, general manager for Ahrens Manufacturing Company, fabricator of playground equipment, receives steel tubing from Chicago and eastern points and ships playground equipment to midwestern points through Omaha and Kansas City, and to eastern

points, such as Cleveland, through Chicago. Considers continuation of applicant's service essential, as well as removal of 5000 pounds maximum upon applicant's operating authority. (R. 721-723) Has experienced difficulties in obtaining delivery on inbound shipments from Chicago and eastern points, as well as unsatisfactory service on smaller shipments.

From Des Moines, Iowa, five shipper witnesses and the Traffic Manager of Des Moines Chamber of Commerce testified in support of the application. These witnesses were:

Triggs, manufacturer's agent for plumbing and heating equipment, including heavy boilers and allied lines moving from Chicago and Waukegan, Illinois, and Hartford, Conn. to destinations on White Line routes including Des Moines. This witness testified that his shipments in many instances weighed more than 5000 pounds; that they were consigned direct to contractors, or dealers, from out of state points and that he had found applicant's service superior to any other line prior to the imposition of the restrictions; that he had had unsatisfactory experiences with other carriers and wanted to be able to ship as he did before restrictions were imposed on applicant. (R. 1292) On cross examination the witness testified that he was interested in service from Chicago and Waukegan, Illinois, to Iowa City, Cedar Rapids, Grinnell, Newton and Des Moines and to some extent points west. The wholesale houses for which shipments are made are located at Moline, Davenport, Iowa City, Cedar Rapids and Des Moines.

Louberto, assistant traffic manager for Brown-Camp Company, wholesale hardware of Des Moines, testi-

fied that his company made interstate shipments from out of state points like Chicago, and in the east, direct to dealers at practically all points between East Moline, Illinois, and Omaha. Requires service on inbound merchandise in quantities of from 5 to 10,000 pounds and in some instances in truckloads. Has found applicant's service superior to other carriers. (R. 1299-1306)

Shartnack, traffic clerk for Des Moines Drug Company, engaged in the wholesale distribution of drugs, chemicals, turpentine, linseed oil and similar products. The company had previously used the service of the Rock Island Motor Transit Company and found it dependable and would use such service on shipments in excess of 5000 pounds from points outside the state if such service were available. (R. 1306-1310)

Brody, buyer for Brody Manufacturing Company, wholesalers and dealers in men's wear, hosiery, shirts and work clothing, testified that the service of Rock Island Motor Transit Company on inbound shipments had been very satisfactory, and on shipments to Omaha and Lincoln, Nebraska and would be used if available. (R. 1310-1312)

Griffith, traffic manager for wholesale hardware firm, which secures its principal supplies from Chicago and eastern points. Shipments are made in truckload quantities and also in small shipments. Service of the Rock Island Motor Transit Company has been entirely satisfactory. The witness was primarily interested in being able to use Rock Island Motor Transit Company on inbound shipments and felt that his company should patronize them "because we depend on their outbound service on our distribution in the

State." Company sells to retailers in Rock Island, Davenport, East Moline and it makes direct shipments from the factory to retailers located at these points. (R. 1313-1316)

Hansen, traffic manager of Des Moines Chamber of Commerce, testified that wholesalers in Des Moines do business in the state and in the states immediately surrounding Iowa while Des Moines manufacturers do considerable business throughout the country. While many carriers have interstate rights to serve intermediate points on U. S. Highway No. 6 in Iowa, no carriers are rendering service on smaller shipments except Rock Island Motor. The carriers generally are attempting to do away with peddler service and operate from one terminal point to another. Applicant's service has been satisfactory. (R. 1316-1320)

At Atlantic four shipper witnesses and the secretary of the local Chamber of Commerce appeared to support the application. Shipper witnesses were:

Robinson, operator of two retail stores at Atlantic, Iowa. He ships merchandise in from Omaha and Chicago. (R. 541-546)

Turner, employee of a Chevrolet dealer, receiving shipments of automobile parts and supplies from interstate points including both Chicago and Omaha. (R. 933-941)

Meredith, farm equipment dealer who requires service on shipments weighing as much as 6000 pounds from out of state points including both Chicago and Omaha. (R. 531-540)

Mitchell, proprietor of a wholesale grocery concern, requires service from Chicago and out of state points. (R. 546-551)

From the Omaha-Council Bluffs area three shipper witnesses and a chamber of commerce representative appeared. The Council Bluffs' witness was:

Ball, proprietor of Western Mills Supply, manufacturer of hammers for hammer mills, who testified that his company requires service to Davenport, Iowa, and Illinois points from Omaha and Council Bluffs. Has found applicant's service superior to any other available in the territory. (R. 1005)

From Omaha, Nebraska, the following witnesses appeared:

Seastedt, manager of Omaha branch of Grant Storage Battery Company, manufacturers and distributors of storage batteries. Applicant's service only available service to many points on U. S. Highway 6 from Omaha. Business requires service on shipments in excess of 5000 pounds from Chicago. Service of applicant has been very good. At many points if Rock Island is unable to handle shipments there will be no carrier available to serve many towns. Had previously used service of Rock Island Motor Transit Company on truckload lots and would use such service, if available. (R. 1010-1013)

Hartnett, traffic manager for Paxton and Gallagher Company, at Omaha, which is engaged in the roasting and distribution of coffee, and a separate wholesale hardware division distributing hardware lines in Iowa, Nebraska and southern Minnesota. Company had used service of Rock Island Motor Transit consistently since establishment of the service. Have found the service uniformly good throughout the years including volume shipments of coffee including 50 truckload shipments from January 1 to August 1,

1951, which moved from Omaha to points in Iowa on the Motor Transit line including Des Moines, Davenport, Muscatine, Cedar Rapids and Ottumwa, Iowa, and Rock Island, Illinois. Rock Island Motor Transit performs the only single line direct service from Omaha to Brighton, Buffalo, Columbus Junction, Durant, Hancock, Kalona, Princeton, Washington, Wellman, and Muscatine. Brady Motorfrate has authority to serve some of the towns mentioned but has embargoed less than truckload quantities. The trend has been on the part of most over the road motor carriers to go to overhead freight rather than peddle local freight. Such situation exists at Brooklyn and other Iowa points. Motor Transit has maintained a terminal agent with available information as to service, rates, facilities for tracing shipments and filing of claims. The company maintains storage or warehouse facilities for reshipment to smaller communities at Des Moines, Cedar Rapids, Waterloo and Davenport and requires service from Omaha to each of such destinations. It is necessary for a carrier to have volume and overhead business as well as purely local shipments to support the peddler service to intermediate points. (R. 994-1004)

This mass of evidence we submit amply supports the conclusion of the Commission that there was, and for the future will be, a need for continuation of the service performed by the applicant, not only to the smaller intermediate communities with populations of from a few hundred up to 6000 persons, but between the so-called major points as well.

Briefly stated, it is the contention of appellants in No. 6 that while they are unwilling to perform transportation service to the smaller intermediate com-

munities of a few hundred population, Motor Transit should be required, because it is a railroad subsidiary, to render service at such points for their convenience, and for the convenience of the communities, and that it should not be permitted to participate in the transportation of volume shipments, or the handling of truckload quantities, which are economically essential to sustain service to the small communities. It is the contention of appellants, some of which handle a gross business many times exceeding that of applicant, that they should be permitted to skim the cream of the profitable traffic, and applicant, because it is controlled by a railroad, should not be permitted to serve the so-called major points.

The Commission disposed of appellants' contentions on this phase of the case in its opinion by saying:

> "This truckload 'cream of the traffic,' which to some extent has been handled by Motor Transit for many years without seriously affecting the expansion of its competitors' operations, should not be handed over to its competitors and Motor Transit expected to provide the expensive peddle services.
>
> "Acceptance of the opposing motor carriers' position would have the following results. They would be left to provide the peddle services on interstate motor-billed traffic, which alone will not justify the type of service heretofore rendered by Motor Transit, and all such traffic in truckloads. Motor Transit would be left with intrastate and rail-billed traffic, which will not warrant continuance (fol. 79) of the operations conducted by it prior to August 30, 1951. The net result is clearly not in the public interest." (R. 115)

The trial court in its opinion said with reference to this phase of the case:

> "Actually the result of sustaining the motor carriers' position would be a privilege to them of giving the service now rendered by Motor Transit if they so desire, and refusing to give it when it is economically not feasible. That would not appear to serve the public interest."

It must be borne in mind that the *only question* now before the Court is whether this Record contains substantial evidence which supports the Commission's finding that public convenience and necessity requires applicant's service to and from the major points, as well as to the small intermediate communities. We have never heard of a case in which service has been required from larger centers of population to small intermediate points, without permitting the carrier to render service between the terminal points as well. A restricted operation as proposed by appellants is certainly economically unsound, and justified by neither reason nor common sense.

This Court has frequently pointed out that the Commission and not the Court is the final authority on what is required in the public interest. We believe that the extent of the authority to be given to applicant was clearly a matter within the discretion of the Commission and that the Court may not, consistent with the spirit and purpose of the Transportation Act of 1940, substitute its judgment for that of the Commission as to the points and places to and from which applicant shall be authorized to render service.

The contention of appellants that the operations of Rock Island Motor Transit have restrained competition with independent motor carriers, and that there is danger that Motor Transit and its rail parent may acquire a monopoly in the transportation field is wholly unsupported by the evidence.

Throughout the brief of appellants in Cause No. 6, it is urged that the National Transportation Policy requires that railroads and their affiliates shall be excluded from the field of motor carrier transportation; that any other rule will inevitably result in the creation of a gigantic railroad monopoly, and that the independent motor carriers cannot successfully compete with so-called subsidized operations of motor carriers, affiliated with, or controlled by railroads. In view of the developments in the transportation field in the post-war era, this contention is little short of an absurdity. In the infant days of the motor carrier industry, the fear was often expressed that railroad corporations might secure a monopoly of highway transportation, through purchases of competing motor carriers. To insure that this would not occur, Congress adopted as a part of the original Motor Carrier Act, 1935, Section 213, later carried forward as Section 5(2)(b) of the Transportation Act of 1940.

The record in the case at bar, if it establishes any fact, shows beyond a shadow of doubt that in the midwest area there is no danger that railroads, or their subsidiaries, ever secure a monopoly of highway transportation. Much has been said and written on this subject without the benefit of cold hard facts. We believe that in this record, for the first time, we have presented to the Commission, and to the Courts, some of the economic facts of life as they exist in the transportation industry in the midwest today. Thus,

it appears without dispute that in 1946, the first post war year, class I railroads of the United States handled 24,300,000 tons of less carload freight. In 1950 the railroads' portion of such traffic had dropped to 10,900,000 tons, a decline of 60% in only four years' time. (See Graph, Exhibit No. 23, opp. R. 1908.) In the same period class I motor carrier tonnage had increased more than 100%. Truck tonnage of class I motor carriers, with 12 per cent of the carriers not reporting, in the year 1946 was slightly in excess of 100,000,000 tons and in 1950 had increased to more than 210,000,000 tons. (See Exhibit 22, reproduced opp. R. 1906). Statistics for the years intervening between the year 1950 and the present day indicate startling continuations in the decline in rail tonnage, and correspondingly large increases in truck tonnage. So we say that as applied to the nation as a whole, there is no evidence in this record that the entry of railroads into the trucking field has interfered in any degree with the mushroom-like growth of independent motor carriers.

When we examine the statistics more directly applicable to the midwestern area involved in this proceeding, we find even more startling results. Thus it appears that in 1944 applicant, Rock Island Motor Transit Company, transported in intercity service 112,000 tons of freight of all types. This volume declined in 1945 to 97,697 tons, then gradually increased to a total of 159,348 tons in 1950. The consolidated L.C.L. traffic of the Rock Island Railroad and motor billed freight of Rock Island Motor Transit Company reached a high point of 748,260 tons in 1946 and declined to 423,960 tons in 1950. During the period between 1944 and 1950 the tonnage transported

in intercity service by nine selected midwest carriers competing with Motor Transit increased from 755,683 tons to 1,852,540 tons (see Graph, Exhibit 8, opp. R. 1850). The record also demonstrates that the average load in tons handled per truck, and the average length of haul, in the case of competitors, had sharply increased, while Motor Transit had shown declines in both respects.

Furthermore a study of the tonnage handled by certain of the appellants in Cause No. 6 discloses that they had fared much better than the average motor carrier, despite the presence of competition afforded by applicant. Thus, Des Moines Transportation Company, which operates between Chicago, Des Moines and Omaha, and Des Moines and Minneapolis, handled 49,874 tons in 1944 and 178,540 tons in 1950 (see Exhibit 57 reproduced R. 2074). Iowa and Nebraska Transportation Company's tonnage was 15,421 tons in 1944 and 43,678 tons in 1950.

The record contains one very significant bit of evidence with respect to the extent to which independent motor carriers have been able to capture the traffic formerly transported by railroads. In the period January 29 to February 3, 1951, inclusive, the principal motor carriers operating in the City of Des Moines, Ia., made a terminal cost survey under the supervision of Mr. L. L. Cole, auditor for Rock Island Motor Transit Company. Rock Island Motor Transit at that time performed all pickup and delivery service for the Rock Island Railroad in the City of Des Moines, as well as for its own motor billed freight. During this six-day period, Rock Island Motor performed pickup and delivery service in the Des Moines area for less than truckload shipments on 1,769,751 pounds

of freight. In the same period, Des Moines Transportation Company performed similar service on 1,922,870 pounds. Bruce Motor Freight performed such service on 1,154,479 pounds and Burlington Transportation Company on only 631,260 pounds. During the same period (before the imposition of the restrictions upon Rock Island) Motor Transit performed pickup and delivery service on truckloads of 221,669 pounds, while Des Moines Transportation rendered similar service on 1,758,134 pounds, and other carriers handled smaller amounts. (See Exhibit 12, reproduced R. 1859 and testimony of L. L. Cole R. 442-451).

This study demonstrates that in the City of Des Moines, Iowa, the principal place of business of Rock Island Motor Transit Company and its operating headquarters, one competing motor carrier was handling more less-carload business than the Rock Island Railroad and Motor Transit combined. As applied to truckload traffic, this one carrier was transporting eight times the volume handled by Rock Island Motor Transit Company. It shows also that the total volume of business handled by only three so-called independent motor carriers, including Des Moines Transportation Company, Watson Brothers, and Bruce Motor Freight, was approximately three times the combined volume handled by the Rock Island Railroad and its subsidiary.

It must be borne in mind that the study was made during the period in which the Rock Island Motor Transit Company was operating without restriction, with no keypoint and no maximum weight limitations. In the face of this factual showing, how can the appellant motor carriers contend that there is danger of monopoly if Rock Island Motor Transit is given the right to compete with them on equal terms?

The record in this case affirmatively discloses that applicant Motor Transit, while 100 per cent owned by the Rock Island Railroad, has at all times cooperated with other motor carriers, and that it has been guilty of no destructive practices affecting the industry. No evidence was introduced to show that Motor Transit's practices and methods of operation were in any manner unfair or prejudicial to the rights of its competitors. On the other hand, the record shows without question that Walter Hitchen, applicant's General Freight Agent, has devoted much time to the interests of the motor industry (R. 1405). He served as President of the Midwest Freight Bureau at Kansas City, Missouri, and was in full charge of its operations for several months. Mr. Peterson, applicant's General Manager, testified (R. 1403):

> "The policy of the Rock Island Motor Transit Company [fol. 1877] has been to maintain and create a healthy truck industry. We have cooperated with them in every way. We have cooperated with them in rates. We have cooperated with them in labor contracts. We have taken every strike right down the line. I have just finished one of three weeks in Kansas with the truck operators. Our policy has been to cooperate in every way we could cooperate with the truck industry."

Counsel for appellants urge that because Motor Transit is owned by a railroad it possesses four distinct competitive advantages to which no independent motor carrier can successfully aspire. The first is that the Iowa State Commerce Commission follows a policy of granting no overlaping certificates between identical terminal points over the same routes. They criticize the policy of the Iowa Commission as im-

proper and unsound; yet at other points in their brief they say that one of the objectives of the Federal Motor Carrier Act (1935) was to prevent wasteful and destructive competition in the motor carrier industry. Iowa's policy with respect to the regulation of motor carriers is consistent with that followed by many of the states. It is not a matter over which the Interstate Commerce Commission may exercise any control, and the question is one wholly within the sphere of state action. Any competitor of Motor Transit who secures an intrastate certificate will have the same advantages created by this state policy.

Second, it is said Motor Transit receives rail-billed traffic from its railroad parent which swells its volume, fills empty space in its trucks, and thus increases its revenues. This is exactly what the Commission authorized Motor Transit to do when it made the finding in the original *White Line Acquisition Case*, MC-F-445, that the Rock Island Railroad could use motor service to public advantage in its operations. This it cannot do when burdened with "key point" restrictions between larger centers of population.

Third, it is charged that at many points where no Motor Transit representative is stationed, railroad agents act for it. This is contrary to the record and is supported only by an inadvertent statement by one witness at Ladora, Iowa, (R. 455-456) who apparently was referring to rail-billed traffic. The Commission made no finding that the railroad depot agent assumes to act for Motor Transit with respect to shipments moving on motor carrier billing. The record is just the reverse.

Fourth, it is said, at pages 57-58 of appellant's brief, that although independent motor carriers "must con-

duct their financial affairs within the rigid confines of economic reality, Motor Transit is able, through heavy subsidization by the railroad, to finance its equipment purchases on favorable terms". This is an appeal to emotion not based on logic or common sense. It has always been true that individuals possessed of substantial means may borrow money more readily than those without such means. Furthermore, the record contains no evidence whatever that the so-called independent motor carriers have been unable to finance their equipment acquisitions on reasonable terms, or that they have been placed at any disadvantage in that respect by reason of the operations of Motor Transit.

It is urged also that independent motor carriers are in danger of extinction because of the predatory character of Motor Transit's parent corporation. The short answer to this is that in the years between 1938 and 1951, during which Motor Transit operated without restrictions, the independent motor carriers in the midwestern area, as shown by the record, achieved an unprecedented growth, and that both in the particular area involved, and the nation as a whole, motor carriers made tremendous inroads upon the traffic formerly handled by rail carriers. We think this Court may take judicial notice of the fact that in the years which have elapsed since 1952, these trends have continued at an accelerated rate.

CONCLUSION

All parties to this litigation concede that applicant, between April, 1938 and August 30, 1951, rendered an efficient dependable motor carrier service to the communities large and small, located on or adjacent to U. S. Highway 6, and to certain off routepoints, be-

tween East Moline, Ill. and Omaha, Neb. It is likewise conceded that applicant's service has enabled its rail parent to perform a more frequent, more efficient service than would have been economically feasible in this rather sparsely populated area by the use of train service alone. No one denies that this service has been made possible only because applicant possesses both interstate and intrastate certificates, and receives additional revenues from rail billed freight. No one can read this record and conclude that the operations of appellant have monopolized transportation or stifled competition from other motor carriers.

We believe that the Commission's full and complete review of the facts caused it to reach the only sound conclusion which an informed judgment could properly reach, that continuation of applicant's service was clearly in the public interest; and that public convenience and necessity require it. The conclusion of the Commission was within the sound discretion which the Congress delegated to it. We submit that the judgment of the District Court is correct and that it should be, in all respects affirmed.

Respectfully submitted.

REPLY OF APPELLANTS TO BRIEFS OF APPELLEES

Because of what we view as a substantial change of position by the Interstate Commerce Commission in its brief to this Court on the issue presented by this appeal from the position taken by the Commission in its decision under review, we believe this reply brief is desirable if confusion of the real issue involved and the

position of the opposing parties thereon is to be avoided.

In this discussion specific attention will be given only to the brief of the Interstate Commerce Commission since there is nothing in the briefs of the other appellees[1] which requires argument additional to that already made in our principal brief.

I.

CONTRARY TO THE COMMISSION'S CONTENTION, THIS APPEAL DOES NOT INVOLVE THE ISSUE OF WHAT SPECIFIC RESTRICTIONS SHOULD HAVE BEEN IMPOSED BY THE COMMISSION UPON MOTOR TRANSIT'S OPERATIONS, BUT ONLY THE ISSUE OF WHETHER UNRESTRICTED OPERATING AUTHORITY MAY BE GRANTED TO A RAILROAD-CONTROLLED MOTOR CARRIER IN VIOLATION OF SPECIFIC STATUTORY LIMITATIONS CONTAINED IN SECTION 5(2)(b) OF THE INTERSTATE COMMERCE ACT.

This proceeding involves a grant of unrestricted operating authority by the Interstate Commerce Commission to a railroad-controlled motor carrier without making the findings required by the proviso of Section 5(2)(b) of the Interstate Commerce Act. By such action the Commission has removed all restrictions which it had previously imposed upon appellee Rock Island Motor Transit Company (herein called Motor Transit) in acquisition proceedings under Section 213 and 5(2)(b) of the Interstate Commerce Act.

[1] With respect to the statutory defendant, the United States of America, however, it is significant to note that the Solicitor General has not seen fit to file a brief with the Court in defense of the Commission's decision and order or in support of the judgment below.

Accordingly, the precise basic issue raised by this appeal is whether the Commission can grant such unrestricted motor carrier operating rights *without finding* not only that they are consistent with the public interest and will not unduly restrain competition but also that the resulting operations will enable the parent railroad to use service by motor vehicle to public advantage "in its operations" as required by the proviso of Section 5(2)(b). In its brief to this Court (p. 18) the Commission has confused this issue and misstated our position on it by stating that appellants are contending that the Commission is required to impose certain specific conditions which would transgress upon the discretion which the Commission has under the statute with respect to what conditions are required to meet the statutory standards. In fact, the Commission appears to go so far as to suggest that it has complied with the requirements of Section 5(2)(b) in granting Motor Transit an unrestricted motor carrier certificate between the points involved because such statutory restrictions are not offended where the Commission seeks to meet what it regards as special transportation needs in the public interest (p. 19).

The basic issue before the Court cannot be so easily avoided. We are not here concerned with what specific conditions or particular limitations must be imposed to meet the requirements of the proviso of Section 5(2)(b). We concede that such considerations are within the discretion of the Commission if based upon the evidence before it. But we are concerned with the question of whether the Commission can, as it purports to do in its decision under review, completely ignore specific statutory

limitations contained in Section 5(2)(b) and make no findings thereon simply because the application was filed under Section 207 instead of Section 5, even though the applicant's avowed objective is to avoid restrictions previously imposed on the same carrier over the same routes in acquisition proceedings.[2]

There can be no question but that the Commission did not make the findings required by the proviso of Section 5(2)(b) but expressly refused to do so (R. 105-108).[3] It found instead only that the unrestricted operations were required by the present and future public convenience and necessity (R. 116).

In our principal brief to this Court, appellants equated the statutory requirement contained in the proviso to Section 5(2)(b)—that the transaction proposed will enable the parent railroad to use service by motor vehicle "in its operations"—with a general limitation that the motor carrier's operations should be auxiliary to or supplemental of the parent railroad's train service. We have done so because the Commission has consistently thus interpreted this statutory language, has never suggested any alternative construction, and in this case repre-

[2] See our principal brief pp. 22-23.

[3] After discussion of the contentions of the parties opposing the application of Motor Transit that the authority requested was subject to the provisions of Section 5(2)(b) of the Act, and stating that it did not subscribe to this view (R. 105), the Commission said (R. 106): "In other words, we may issue certificates to motor-carrier affiliates of railroads with or without restrictions as the circumstances may require."

sented to the District Court, which it adopted, that such was the correct statutory interpretation.[4]

We do not agree with the basic premise advanced in the Commission's decision and the contention continually stressed in the Commission's brief, that the determination of whether unrestricted operations of a railroad's motor carrier subsidiary should be authorized pursuant to an application under Section 207 of the Act, rests upon findings that there is a public need for the service sought and that it will not unduly restrain competition. Clearly omitted from consideration is the relationship of the proposed service to the operations of the railroad and the question of whether the motor service will be auxiliary to or supplemental of the rail operations. This is the crux of the question presented for determination, and no amount of argument by the Commission that it has in substance met the requirements of Section 5(2)(b) could be persuasive in the absence of a finding with respect to this particular statutory requirement. Indeed, the grant by the Commission of "unrestricted" authority is the antithesis of service restricted to operations in conjunction with the railroad. Consequently, the

[4] This is evidenced by the finding of the District Court—to which the Commission has taken no exception—reading as follows (R. 193):

> "It is agreed that the requirement that the service be used in the operation of the railroad applicant means that the service must be auxiliary to or supplementary to the rail service."

However, even if such construction of the statutory language was debatable, it would in no way affect the issue before the Court as to whether or not the Commission made findings necessary to support its decision and order in this case because the Commission clearly decided that the provisions of the proviso of Section 5(2)(b) were not binding upon it in a Section 207 proceeding.

Commission is squarely faced with the necessity of demonstrating to the Court that in passing upon a Section 207 application by a rail-controlled motor carrier it need not comply with the requirements set forth in Section 5(2)(b). Actually, that is the position taken in the Commission's decision under review as distinguished from the brief which it has filed in defense of that decision.

II.

THE COMMISSION CANNOT REMOVE RESTRICTIONS SPECIFICALLY REQUIRED BY AND IMPOSED UNDER SECTION 5(2)(b) IN ACQUISITION PROCEEDINGS SIMPLY BY ENTERTAINING AN APPLICATION UNDER SECTION 207 AND EXERCISING ITS DISCRETION.

The Commission makes only one principal argument[5] in its brief in support of its construction of

[5] A subsidiary contention is made with respect to the Civil Aeronautics Act. In footnote 6, pp. 62 and 63 of its brief, the Commission cites the Civil Aeronautics Board as supporting its view. The decision in *American President Lines Petition*, 7 C.A.B. 799, to which the Commission refers, is predicated upon the fact that the certificate provisions of the Civil Aeronautics Act (Section 401) do not include the requirements of the acquisition section (Section 408) *and* that Section 2 defines the standard of "public convenience and necessity" found in Section 401 in a way that does not include the acquisition standards (p. 802). No such limitation upon the definition of "public convenience and necessity" as found in Section 207 of the Interstate Commerce Act is set forth in other sections of that statute. To the contrary, the National Transportation Policy, as previously interpreted by the Commission, requires the application of the standards of Section 5(2)(b) in determining "public convenience and necessity" under Section 207 (Appellants' Br. p. 16). Moreover, since the CAB requires approval under Section 408 of the relationship between a surface carrier and a subsidiary during or immediately after certificate proceedings, the practical fact is that no surface carrier is today engaged in air operations either by itself or through a subsidiary. Nor does the CAB condone the type of statutory evasion here involved. (Appellants' Br. pp. 26-28)

Section 207 not already covered in our principal brief or that of appellants in Case No. 6. This argument is stated as follows (I.C.C. Br. p. 23):

> "Where a railroad or its affiliate acquires by purchase or merger an existing motor carrier, there is lost the actual or potential competition between the railroad and the previously independent motor carrier. However, where a railroad or its affiliate undertakes to commence or expand its own motor carrier service, it can only do so in *added* competition with independent motor carriers already in the field."

There are at least three answers to this argument. First, the Commission made diametrically the opposite argument to this Court in successfully defending its decision and order in *United States* v. *Texas & Pacific Motor Transport Company*, 340 U.S. 450, when it stated:[6]

> ". . . Although section 213 (now sec. 5) deals with the acquisition of existing motor carrier operations, which, as acquired by railroad subsidiaries, would presumably be taken out of the field of independent existing competition, nevertheless, *the purpose of Congress' transportation policy, declared when enacting the Motor Carrier Act, refute any inference that Congress, while closing the door to railroad suppression of motor carrier competition by means of acquiring through a subsidiary existing motor carrier operations, at the same time left open the unfettered opportunity to do the same thing by means of obtaining through a subsidiary authority to institute new*

[6] Pages 53 and 55 of the joint brief for the United States and the Commission (See pp. 25 and 26 of the brief of appellants in Case No. 6).

motor carrier operations. So far as opportunity for suppression of competition is concerned, there is little difference, particularly in the motor carrier field, between the opportunity afforded through the control by a railroad of an already existing motor carrier and that afforded by control of one newly created." (Italics supplied.)

Second, the argument is predicated upon an assumption that the purpose of the proviso of Section 5(2)(b) is entirely to maintain competition and prevent a monopoly. Such an assumption is negated by the language of the second proviso itself. That proviso requires three separate and distinct findings by the Commission. These are that the transaction proposed (a) will be consistent with the public interest, (b) will enable the railroad involved to use the service by motor vehicle to public advantage in its own operations, and (c) will not unduly restrain competition. Thus the requirement that the railroad be able to use the motor service involved to public advantage in its own operations is an absolute limitation upon the scope of rail-controlled motor services entirely separate and distinct from the effect of such services upon competition. It is, therefore, inescapable that the proviso of Section 5(2)(b) reflects a general Congressional policy to restrict and limit the participation of railroads in motor vehicle operations to situations where the railroad can use the service to public advantage in its operations as a railroad, and that the effect of such participation upon competition is an additional and separate statutory standard for the Commission to observe.

Third, one of the reasons advanced by the Commission for granting Motor Transit an unrestricted cer-

tificate in this case is that the State of Iowa has a policy of granting only monopolistic intrastate rights, and Motor Transit is the sole possessor of such authorization. (R. 114-115). Where then is the added competition of independent motor carriers of which the Commission speaks?

Both the motor carrier appellants in Case No. 6 and the railway labor organization appellants in Case No. 8 have taken the position that the Commission's action here amounts to an evasion of the statutory requirements of Section 5(2)(b) through the guise of a certificate proceeding.[7] In support of this position appellants have pointed out (a) that the routes involved were acquired by Motor Transit through purchase from independent motor carriers; (b) that the Commission, during the course of the acquisition proceedings involving such purchases, found that the requirements of Section 5(2)(b) could be met only by imposing five specific limitations designed to make the motor carrier service auxiliary to or supplemental of the train service of the Rock Island Railroad, and that the Commission's authority to so act was sustained by this Court; (c) that Motor Transit upon advice of new counsel then filed an application under Section 207 for the same routes without such restrictions; (d) that both the Examiner and the Commission found that the proceedings on the new application were merely another phase of the original acquisition proceedings and that the issues before the agency were those with which it was faced in the reopened acquisi-

[7] Brief of American Trucking Associations, Inc., et al., Case No. 6, p. 3; Brief of Railway Labor Executives' Association, et al., Case No. 8, pp. 22-29.

tion proceedings in 1947 (R. 74, 109); (e) that the question before the Commission was thus clearly whether or not the requirements of Section 5(2)(b) could be met by the removal of the restrictions imposed by the Commission and not whether the public convenience and necessity required the grant of a new certificate to Motor Transit; and (f) that the Commission's action simply amounted to a removal of conditions imposed to meet the requirements of Section 5(2)(b) without making any finding that the operation without such restrictions met those requirements.[8]

In our view, these contentions of appellants still remain unanswered despite the Commission's last minute attempts in its brief to this Court, contrary to the position it took in its decision under review, to persuade the Court that it really has met the requirements of Section 5(2)(b) even though it is not required to do so. We submit that this shifting of position spells out more strongly than could any opposing argument the tenuous basis of the Commission's decision and order in this particular case.

---

[8] Appellants' contentions have been reinforced by the brief of the Interstate Commerce Commission which states at pp. 7 and 8 that the routes and points applied for are set forth on a map attached as Appendix A. Reference to that map shows that these routes and points are a part of the "White Line Route" and the "Frederickson Route" which were originally purchased from carriers of those names, and by the statement at p. 7 of Motor Transit's brief that its application in the present case was "for permanent authority to perform motor carrier service over the White Line and Frederickson Routes."

CONCLUSION

The judgment of the District Court should be reversed and the Commission's order declared invalid because it is not based upon findings required by the Interstate Commerce Act.
